MEEK, Fielding Bradford, paleontologist and author, was born at Madison, Jefferson co., Ind., Dec. 10, 1817. His grandparents were Irish Presbyterians who emigrated from Armagh county to America about 1768, settling finally in Hamilton county, O. His father, a lawyer of some eminence, removed to Madison, and died there when the son

was but three years of age, leaving the family in moderate circumstances. The son's early education was retarded by delicate health. Upon reaching manhood he purchased a mercantile business, first in his native place and afterward in Owensboro Ky. The result was financial failure. After this, while laboring for his support, he continued his studies, devoting himself especially to natural history. In 1848-49 he was an assistant of Dr. D. D. Owen upon the U. S. geological survey of Iowa, Wisconsin and Minnesota. In 1852 he went to Albany, N. Y., as assistant to Prof. Hall, in the paleontologic work of that state. He remained there until 1858. Two summers he spent on the geological survey of Missouri and another was employed in exploring the Bad Lands of Nebraska, together with Dr. F. V. Hayden. In 1856 he prepared for publication, in conjunction with Prof. Hall, an important memoir on cretaceous fossils from Nebraska. In 1858 he went to Washington, where he continued to live until his death, devoting himself to investigating the organic remains accumulated in the government explorations and in reporting on them. When Dr. Hayden, who afterward organized the geological survey of the Rocky mountain region, began his western explorations, Prof. Meek was entrusted with all the invertebrate paleontology, much of which appeared under their joint names. He assisted greatly in systematizing and advancing that science in America. He was a member of many scientific bodies, and contributed numerous papers to their transactions. His books were all devoted to the science of which he was a professor, and a bibliography of them is issued by the Smithsonian Society. Among his published works are: "Check-List of the Invertebrate Fossils of North America" (1864); "Paleontology of the Upper Missouri" (with Dr. Hayden, 1865), and a "Report on the Invertebrate, Cretaceous and Tertiary Fossils of the Upper Missouri Country" (1876). He died in Washington, D. C., Dec. 21, 1876.

ASHMUN, Eli Porter, senator, was born at Blandford, Mass., in 1771. He studied law with Judge Sedgwick, of Stockbridge, Mass., was admitted to the bar, and practiced in his native town until 1807, when he settled in Northampton, becoming a distinguished lawyer. He served for several years as a member of the Massachusetts house of representatives and senate; in 1816 he was elected to the U. S. senate from his native state, succeeding Christopher Gore, who had resigned. As senator he served in only two congresses, however, resigning in 1818. As a lawyer he was exceedingly conscientious, having been known to send away with scorching sarcasm a client who wished to take a dishonest advantage of an opponent. The honorary degree of A. M. was conferred upon him by Middlebury College in 1807, and by Harvard in 1809. He was married to Lucy, youngest daughter of Rev. John and Sarah (Worthington) Hooker, and grand-daughter of Col. John Worthington, of Springfield, Mass. Two sons were born to him, John Hooker and George. The former, who was born at Blandford, July 3, 1809, studied for three years at Williams College, was graduated at Harvard in 1818, and became a lawyer. Upon the death of Judge Howe, in 1828, he became the head of the Northampton law school, and in 1828 received an appointment as professor of law at Harvard University, being the first to occupy the chair founded by Isaac Royall. He died April 1, 1833, having acquired a high reputation as a jurist. Eli P. Ashmun died at Northampton, Mass., May 10, 1819.

VAN RENSSELAER, Solomon, soldier and congressman, was born in Rensselaer county, N. Y., Aug. 6, 1774, son of Henry Killian and Alida (Bradt) Van Rensselaer, and a descendant of Stephen Van Rensselaer, the patroon. His father

(1741-1816) was colonel of a New York regiment during the revolutionary war, and towards the end of that conflict was made a general of militia. The son being anxious to join the army, his father obtained for him the commission of cornet of dragoons, March 11, 1792, and he immediately entered upon his duties as recruiting officer at Albany, N. Y. After receiving Gen. Washington's commission he joined Gen. Anthony Wayne's expedition, participating in the Miami campaign and engaging in the same battle with Gen. William Henry Harrison. He was promoted to the command of his troop in 1794, and at the battle of Maumee rapids, Aug. 20, 1794, he was shot from his horse while making a daring but ineffective charge against the Indians. The ball passed through his lungs, making what was feared to be a fatal wound, yet he refused to be carried from the field on a litter, and insisted on being replaced upon his horse. To Gen. Wayne's assertion that he would drop by the road, he replied: "If I do, just cover me up and let me die there." The general complied with his wish, mounting him on his horse, and with two dragoons supporting him in the saddle, Capt. Van Rensselaer rode for five or six miles to the hospital. In 1799 he became a major, and soon afterward was appointed adjutant-general of the New York militia, an office he held during the administration of Govs. John Jay, George Clinton, Morgan Lewis, Daniel D. Tompkins and DeWitt Clinton, until 1821. He negotiated an agreement by which the British were induced to consider Lake Ontario as a public highway, permitting the transportation thereon of American troops and stores during an armistice, and filled the duties and responsibilities of the office with entire satisfaction. Being in command of 225 men at the attack on Queenstown heights, Oct. 13, 1812, he sprang ashore first, formed

his men, and routed the enemy at the point of the bayonet, but received several severe wounds during the action. After this trying experience he remained in Buffalo, N. Y., until Nov. 30th, and was then conveyed to his home at Mt. Hope, near Albany, N. Y., where he was received with the honors of a victor, on the 17th of that month. For the gallantry he had displayed on the Niagara frontier he was brevetted major-general, and in March, 1819, he received a regular commission of that rank. He was elected a Federalist representative from New York state to the 16th congress (1819-21) and was elected to the 17th congress, serving until June 14, 1822, when he resigned and was appointed post-master at Albany, N. Y., an office he held for seventeen years. In the interests of the Erie canal he accompanied Gov. Clinton on a commission to Ohio, 1821, and on Nov. 4, 1825, he attended the opening ceremonies of the canal as the official representative of New York state. In 1839 he was sent as a delegate to the national convention held at Harrisburg, Pa., Dec. 4th. He was the author of "A Narrative of the Affair at Queenstown" (1836); and his daughter, Mrs. Catherine Van Rensselaer Bonney, published "A Legacy of Historical Gleanings" (1875), containing many valuable reminiscences. Maj. Gen. Van Rensselaer was married, in 1797, to Harriet, daughter of Col. Philip Van Rensselaer. His death occurred in Albany, N. Y., April 23, 1852.

Sol. Van Rensselaer

PEARCE, Charles Sprague, artist, was born in Boston, Mass., Oct. 13, 1851, son of Shadrach Houghton and Mary Anna (Sprague) Pearce. His father, a native of Ashford, Kent, England, was brought to the United States when he was six years of age, and growing up in Boston became a China merchant. His mother was the daughter of Charles Sprague, of Boston, for forty years cashier of the Globe Bank, and author of "Curiosity," "Ode to Shakespeare," "Art" and many other prize poems and addresses. Her grandfather, Samuel Sprague, of Hingham, descended from an early settler in that town, was one of the patriots who helped throw the cargo of tea into Boston harbor, and afterward served in the revolutionary army. Charles Sprague Pearce was educated at the Brimmer School and the Park Latin School, both in his native city, and then entered his father's office, where he remained for five years, during which time he employed his leisure hours in painting. A certain success as an amateur led him to regard art as a possible profession, and he decided to leave business, which had always been distasteful, and take up painting professionally. With this in view he went to Paris in 1873 and entered the school of Léon Bonnat, where he remained three years. Ill-health made it advisable for him to pass the winters in a warmer climate, and he visited Egypt, Nubia, Algeria, Italy and the south of France, returning to Paris for the summer months. Since 1885 he has lived at Auvers-sur-Oise, about twenty miles from Paris. His first painting publicly exhibited was shown at the Paris Salon in 1876. Since then he has taken part in most of the annual and international exhibitions in America and Europe, where his works have received the following awards: silver medals (Boston, 1878, 1881); prize for best figure painting (Pennsylvania Academy, Philadelphia, 1881); honorable mention (Paris Salon, 1881); gold medal of the third class (Paris Salon, 1883); gold medal (Boston, 1884); Temple gold medal (Pennsylvania Academy, 1885); grand gold medal of honor (Ghent, Belgium, 1886); gold medal, second class (Munich, 1888); grand diploma of honor (Berlin, 1891); gold medal (San Francisco, 1894); gold medal (Atlanta, 1895); gold "staats" medal (Vienna, 1898). He was created a chevalier of the Legion of Honor, France, in 1894; chevalier of the Royal Order of Leopold, Belgium, in 1895; chevalier of the Imperial Order of the Red Eagle, Prussia, in 1897, and chevalier of the Royal Order of the Dannebrog, Denmark, in 1898. He is a member of the Society of American Artists, National Society of Mural Painters, and National Institute of Arts and Letters, New York city; and is first vice-president of the Paris Society of American Painters. He represented the United States on the international jury of awards at the Paris Universal exposition (1889), and was a member of the international jury of awards at the Antwerp International exposition (1894); also chairman of the Paris advisory committee and jury of selection for the World's Columbian exposition (1893), at which exhibition he was out of competition. His principal pictures are: "Death of the First Born" (1877); "The Sacrifice of Abraham" and "Decapitation of St. John the Baptist," the latter owned by the Art Institute, Chicago (1881); "The Water Carrier" and "Prelude" (1883); "Toiler of the Sea" (1884); "Prayer" (1884), owned by the Massachusetts Charitable Mechanic Association; "The Shepherdess" (1886); "St. Genevieve" (1887); "Return of the Flock," owned by the Bohemian Club, San Francisco; decorations for the north hall of the new library of Congress (1896); "Meditation," owned by the Metropolitan Museum, New York city, and several portraits painted in America, England and France. Mr. Pearce was married in Paris, June 9, 1888, to Louise Cather-

ine, daughter of Louis and Catherine (Boissier) Bonjeau.

KELLER, Arthur Ignatius, artist, was born in New York city, July 4, 1866, son of Adam and Mathilda (Spohr) Keller. His father, born at Duren, near Aix-la-Chapelle, Germany, came to America when six years of age; his mother, born in America, was a descendant of Ludwig Spohr, the celebrated composer and violinist. Arthur Keller early showed signs of artistic talent, probably inheriting some of his gifts from his father, who was a designer and engraver of excellent repute. The elder Keller was the boy's first tutor, and everything at home was done to encourage and develop his artistic taste. He was first apprenticed to a lithographer in New York, but soon after was sent to the Academy of Design to study. While there he took the Suydam medal for "life" drawing and the Halgarten prize for his composition, "Bel-hazzar's Feast." On leaving the academy he went to Munich, where he studied for several years under Prof. von Leofftz. His first painting of note was "An Old Woman and Young Girl," which was purchased by the Munich gallery. Other paintings followed, all of which were immediately sold. Among these were: "Myra," a girl's head; "An Unrecorded Battle of 1776"; "The Best of Friends Must Part"; "Consulting the Poets," and "Interrupted Argument," purchased by the Columbus (O.) Art Gallery, and a number of portraits. He is a constant contributor to the exhibitions of the Academy of Design, the New York Water-Color Club and the Water-Color Society of Philadelphia, where his picture, "Lead, Kindly Light," won the gold medal in 1899. He received a first class award (silver medal) at the Paris exposition of 1900 for the pictures "George Washington's Wedding Reception" and "The Story of Allie Conan's First and Last Duel." Keller began his career as an illustrator by working for the New York "Herald," particularly for the special numbers for Christmas and Easter. Subsequently the magazines left him no time for newspaper work, and his productions have appeared continuously in "Harper's," the "Century" and "Scribner's." He has also illustrated "Ragged Lady," by W. D. Howells; "Jerome: The Story of a Poor Man," by Mary E. Wilkins; "Kit Kennedy, Country Boy," by David Crockett; "Caleb West," by F. Hopkinson Smith; "Homes and Life of George Washington," by Lydia Herbert; selected stories by Bret Harte and Hawthorne, and so many other works that he has been called the most versatile of our illustrators. He is a member of the Salmagundi and National Arts clubs; American Water-Color Society; the Architectural League, and other organizations, and is a man of high ideals, his motto being, "Truth is Beauty and Beauty is Truth." Mr. Keller was married, June 20, 1894, to Myra A. C., daughter of Edward and Isabella Hayes, of New York city, and has three children: Agnes Mathilda, Arthur A. L., and Edward.

ROSELAND, Harry, artist, was born in Brooklyn, N. Y., May 12, 1866, son of Henry and Mary (Hartzen) Roseland, both natives of Germany. He is largely self-taught, but in his boyhood received invaluable help from Prof. J. B. Whitaker, of the Adelphi Art School, Brooklyn, which he attended

for a few years. After painting landscapes and portraits, he turned to still life and flowers with better success; but figure-painting was the branch of art he preferred, and in his search for subjects unused by others of the craft he found material close at hand in the suburbs of Brooklyn: vegetable gardens and farms, whose cultivators, foreigners chiefly, were as picturesque as they would have been in the old world. His "Pea Pickers of Long Island," exhibited in 1887, won the gold medal of the Brooklyn Art Club, and was subsequently reproduced as an etching. But even these transplanted peasants failed to interest him, after a time, and it occurred to him that there were indigenous subjects nearer at hand; negroes, especially of the ante-bellum type, worthy of perpetuation on canvas; and the more he studied their manners, their costumes and their ways of living, the richer did the "find" appear. It is true that Eastman Johnson, Alfred Rappes and perhaps one or two others had ventured into the same field, but it was left for Mr. Roseland to cultivate it assiduously, and it is for representations of negro life that he is now best known, though he has by no means given up work of a higher order. "He is essentially a teller of stories, on his canvases, though he never attempts the impossible. . . . His types of negro life and character are presented with remarkable fidelity and a humorous spirit. His models never seem stereotyped, because they are shown in fresh situations and with new, distinct motives." He is also a skillful pen and ink draughtsman. His paintings, many of which have been reproduced in art magazines and other periodicals, include: "Confidential" (1897); "Low Tide Trollers" (1898); "The Rent Day—A Penny Short" (1898); "The Coltin'" (1898); "A Difference of Opinion" (1897); "Sunday Morning" (1896); "A Laborious Task" (1897); "Oracle of the Tea Leaves" (1898); "A Loose Button" (1897); "An Interesting Letter" (1898), which was awarded the second Hallgarten prize at the annual exhibition of the Academy of Design; "A Helping Hand," "Looking Into the Future" (1899); "The Doctor," "The Love Potion" (1900), and others.

IVES, Percy, artist, was born in Detroit, Mich., June 5, 1864, son of Lewis T. and Margaret (Lezgett) Ives. His father was a lawyer and artist. At the age of eighteen, his academic education being finished, young Ives entered the Pennsylvania Academy of Fine Arts, and remained for nearly four years. In 1885 he visited Europe, spending six months traveling in Scotland, England, the Netherlands, Germany and Italy; concluding his tour in Paris, where he remained for three years, studying at the Julian Academy under Bonhanger, Lefebvre, Benjamin-Constant and Corman. He returned to Detroit in 1889, and spent one year in teaching and painting landscapes and portraits.

After another visit to Paris in 1890, he was appointed dean of the faculty of the Detroit Museum Art School, but resigned soon after and returned to his studies at the Julian Academy, Paris. He studied at the Beaux Arts in 1893 under Gerome, and in the same year exhibited at the Salon. In 1895 Mr. Ives again returned to Detroit and resumed his position at the Museum of Art, and painted portraits of Gov. Rich (1896), Judges McGrath (1897), Douglas (1897), Durand (1897), Green (1897), Knowlton

(1897), and Profs. Meacham (1898) and Thompson (1900). He exhibited "Brittany Fishermen" (1893) at the Chicago exposition, and in 1895 was commissioned to paint the portrait of Pres. Cleveland, and later a portrait of Russell A. Alger for the war department. His large portrait of Gen. Poe (1896) hangs in the Detroit Art Museum, and among other portraits of distinguished Americans are: Ashley Pond (1895), Dr. McGraw (1896), Gov. Pingree (1899) and Judge Stevens (1900). Mr. Ives has exhibited his works in New York, Philadelphia and elsewhere, but his commissions have kept him too busy to paint anything more than portraits. He was one of the organizers of the Society of Western Artists, and is an incorporator and trustee of the Detroit Museum of Art. He was married, in 1890, to Elise, daughter of Judge Caron, of Windsor, Ont., and has one child.

MAYNARD, George Willoughby, artist, was born in Washington, D. C., March 5, 1843, son of Edward and Ellen Sophia (Doty) Maynard. He became a student at the National Academy of Design in New York, in 1868, and after a year in that institution went to Antwerp, where, in company with Francis D. Millet, he entered the Royal Academy of Fine Arts and studied under Van Lierin. After spending nearly four years in the academy and the museums of Belgium, Maynard, with his friend, made a journey through France, Germany, Austro-Hungary, Turkey, Greece and Italy. He returned to New York city in the spring of 1874, and the next year became assistant to John La Farge, in company with Messrs. St. Gaudens, Millet and Lathrop, in the interior decoration of Trinity Church, Boston, the first important work of this character done in America, whose excellence has hardly been excelled. He was an early member of the Society of American Artists, organized about this time (1876) and shared in the labors of that fraternity which has exerted such a strong influence on America's art development. In those days portrait painting was almost the only field in which an artist could earn his living, and in this branch Mr. Maynard made his mark. Among his sitters were William M. Everts and John I. Blair. In 1877 he again visited Europe, traveling through England, France and Italy, making a special study of mural painting from the frescoes of the great Italian masters of the fifteenth century to Paul Baudry's modern compositions in the Nouvelle-Opéra at Paris. He returned to America in 1878, and painted several genre pictures, and as occasion offered designed various decorations for house interiors; the Villard house of New York city being one in which his work found place. In 1883 Mr. Maynard was made an associate of the National Academy, and in 1885 became a national academician. He taught drawing in the schools of Cooper Institute and at the academy for several years; was a member of the academy council for three years, and has probably served on more juries of admission for exhibitions than any other New York painter. In 1881 he was the first recipient of the Temple gold medal at Philadelphia; in 1888 the American Art Association medal of honor was awarded him by the artist exhibitors, and in 1889 his picture, "Sappho," was purchased for the Pennsylvania

Academy of Fine Arts by the Temple fund. For the "Sirens" he received the Evans prize of \$300. He painted the figures typifying the "Chorus" and "Ballet" for the proscenium of the Metropolitan Opera House in New York in 18—, and filled a similar commission in 18— for the Bijou Theatre, Boston. He, with Thomas Hastings, the architect, assisted by H. T. Schladermundt, decorated the great Ponce de Leon Hotel at St. Augustine, Fla., and in 1890 was employed by William Rockefeller to paint the ceiling of his music-room at Rockwood hall, Tarrytown, N. Y., and with other compositions for the same beautiful house, also executed with Schladermundt, have made that dwelling one of the most ornate in America. Specimens of his workmanship may also be seen in the home of Whitelaw Reid at White Plains, N. Y., and F. G. Sarmiento's charming home at Detroit, Mich. The dining-rooms of the Plaza Hotel, the Imperial and Savoy, the café at the Hotel Waldorf and Sherry's ball-room each show examples of Mr. Maynard's skill as a decorative painter. He received the commission to decorate the agricultural building at the World's fair, Chicago, and for this work received a medal as one of the designers of the fair. Among his numerous pictures are: "The Angelus" (1873); "Water Carriers of Venice" (1878); "An Ancient Mariner" (1883); "Aurora" (1884); "Strange Gods" (1885); "Portrait of a Child" (1886), and "Old and Rare" (1887).

SHARP, Joseph Henry, artist, was born at Bridgeport, Belmont co., O., Sept. 27, 1859, third son of William Henry and Elizabeth Ann (Raynes) Sharp, and a descendant of William Sharp (1748) and Lady Elizabeth Gillespie (1752), of county Monaghan, Ireland, who came to America about 1791. A great-grandfather, William Babcock, served for a time on Washington's staff, and family tradition states that he was present at the execution of André. On account of deafness, Joseph Sharp was compelled to leave school, and just as the boy began his art career his father lost a considerable fortune, an additional difficulty being thus thrown in his path, but as bravely surmounted. At the age of fourteen he commenced his art studies in the McMicken School of Design, Cincinnati.

In 1881 he visited Europe, and in Antwerp studied under Charles Verlat for one year. In 1886 he studied in Munich, under Carl Marr, and with Gysis in the National Academy. In 1895-96 Mr. Sharp returned to Paris, and studied for two years under Jean Paul Laurens, Benjamin Constant, Courtois and Girardot. During this time he won a silver medal at the Colorossi School, and had three pictures exhibited at the Salon, which brought him much praise. Mr. Sharp has visited all the art centres of the Old World, and spent much time in pedestrian tours through the Black forest and Italy, besides traveling throughout the United States and Cuba. He spent several months in Spain, with Frank Duveneck, copying Velasquez and other gems of the Prado in Madrid, and in sketching in Seville and the Alhambra. Since 1892 Mr. Sharp has been an instructor in the life classes at the Cincinnati Art Academy. In addition to executing many portraits of prominent people in the Ohio valley, he has been doing fine work as a depicter of Indian life in the

West, standing almost alone in this particular field. His important canvases are: "The Pueblo Corn Dance" (1894), reproduced by "Harper's Weekly," and purchased by the Cincinnati Art Museum; "The Chant" (1897), a large composition, well known through color reproductions; "The Great Sleep" (1899), an Indian burial scene, and "Mourning Her Brave" (1900). Others consist of heads and genre subjects, very true to Indian life and character. Two Indian heads were accepted for the Paris exposition (1900), one in oil, the other a monotype, a form of artistic expression which Mr. Sharp has carried to a high degree of excellence. In December, 1900, he exhibited (by request) at the Cosmos Club, Washington, a collection of portraits of famous Indians, of which the U. S. government purchased eleven for the National Museum (Smithsonian), thereby approving their ethnological as well as artistic value. His works are to be found in the private galleries of Emerson McMillin; Andrew Carnegie, of New York; Joseph G. Butler, Jr., of Youngstown, O., and A. A. Pope, of Cleveland, O.; while he has been represented in Paris, New York, Chicago, Omaha, Atlanta, Pittsburgh, Philadelphia and Denver exhibitions. Mr. Sharp has written articles on his experiences in the West for "Brush and Pencil," "Harper's Weekly," and the magazines and papers of the middle West. He is a member of the Society of Western Artists, and one of the promoters and leading spirits of the famous Cincinnati Art Club. Mr. Sharp is a typical American, full of tact and energy; ever on the alert for the new, beautiful and healthful in art; of a nervous temperament, and is a fine example of a self-made man. He was married, in 1892, at Liberty, Ind., to Addie, daughter of Capt. S. D. Byram. Her father was a signal officer during the civil war, in Banks' division, on the Potomac. She is of revolutionary descent, and comes in a direct line from John Alden and Priscilla Mullins. Mrs. Sharp is a musician, and of artistic tastes, entirely in sympathy with her husband's work and accompanies him in all his travels.

BIERSTADT, Albert, artist, was born in Dusseldorf, Germany, Jan. 7, 1830, son of Henry and Christian M. (Tillmans) Bierstadt. His parents came to America in 1832, and settled in New Bedford, Mass., where he received his education in the public and high schools. During his youth he developed a love and aptitude for art, doing creditable work in oil and pastel. He went to Europe in 1853, and for four years devoted himself to the study of art in Dusseldorf, in association with Worthington Whittridge, and for one year in Rome, making summer sketching tours in Germany and Switzerland. He returned to the United States in 1857, and accompanied Gen. F. W. Lander's expedition to the Rocky mountains. During this and subsequent visits to the West he collected the materials for many of his largest and most noted paintings. Chief among his titles to distinction is the fact that he was the pioneer in the artistic delineation of the grand scenery of the Rocky mountains and the West. In 1867, 1876 and 1883 he again visited Europe. He was elected a National Academician (England), in 1860; the French decoration of the Legion of Honor was conferred upon him in 1867, and he was honored with the Russian order of St. Stanislaus in 1869. In 1871 he was favored with the second degree of the Order of St. Stanislaus, and in 1886, received from the Sultan of Turkey the Imperial Order of the Medjidid. On various occasions he has received medals in Belgium, Bavaria, Austria, and Germany. Among his pictures may be mentioned "Laramie Peak" (1861); "Sunlight and Shadow" (1864); "The Rocky Mountains, Lander's Peak" (1863); "Storm in the Rocky Mountains" (1866); "Looking Down the Yosemite" (1867); "Discovery of the Hudson River"

and "Settlement of California," both in the capitol at Washington; "El Capitan on the Merced River" (1866); "Emerald Pool" (1870); "Great Trees of California" (1874); "Mount Hood," "Valley of Kern River," (1875); "Domes of the Yosemite"; "Mount Whitney" (1877); "Estes Park" (1878); "Geyzers of the Yellowstone" (1878); "Storm on the Matterhorn" (1884); "Mount Sir Donald, British Columbia" (1886); and "The Last of the Buffalo" (1890). During 1887-88 he spent much time in Spain and the West Indies, studying scenery, costumes, equipment of vessels, and other details for four historical pictures, illustrating the work of Columbus. He is a member of the Union League Club, Boone and Crockett Club, Century Association, and National Academy of Design, and many art institutions in Europe. Mr. Bierstadt was twice married: first, in 1866, to Rosalie, daughter of Hon. A. O. Osborne, of Waterville, Oneida co., N. Y., who died in 1893; second, in March, 1894, to the widow of David Stewart, of New York city.

FROST, Arthur Burdett, illustrator, was born in Philadelphia, Pa., Jan. 17, 1851, son of John and Sarah Ann (Burdett) Frost. The founder of his family, Nicholas Frost, went from England in 1636 to Piscataqua, Me. His son, Major Charles Frost, was military governor, and the major's son, John, was married to a sister of Sir William Pepperell, who commanded the expedition against Louisburg in 1745. John Frost commanded a ship of war in 1702, and afterward held the positions of councillor and representative. When the revolution broke out John Frost, son of the naval commander, was made a brigadier-general in the American army. Mr. Frost's father, born in Kenebunk, Me., in 1800, was a graduate of Harvard College, from which he received the degree of LL.D. He was a man of letters, professor in the Central High School, Philadelphia, and the author of a "History of the United States" (1846), which was a very popular text-book. The son's instincts seem to have led him at an early age in the direction of art. He began his career in a wood-engraver's establishment, and later he took up lithography, at the same time devoting his evenings to the study of drawing. He was his own drawing-master, and to this fact is due, no doubt, his freedom from conventionality and many artistic restrictions. In 1872 he furnished a number of illustrations for "Out of the Hurly Burly" by Charles Heber Clarke (Max Adeler) which were very successful, and since then he has illustrated works by various authors, including: "Rhyme and Reason"; "Louis Carroll" (1883); "Rudder Grange" (1885); "Expiation" (1890); "Uncle Remus, His Songs and Sayings" (1895); "Story of a Bad Boy" (1895); "Aunt Miverty Ann" (1899); "Uncle Remus and His Friends" (1892); "Farming" (1892); "The Spirel Inn" (1897); "Story of a New York House" (1887); "Pomona's Travels" (1894). Individual collections of his drawings include: "Elbow Room" (1878); "Stuff and Nonsense" (1884); "The Bull Calf" (1892); "Golfer's Alphabet" (1898). In 1877 he went to England to study and work, but preferring American life and atmosphere, returned in 1878. Frank R. Stockton, many of whose works have been illustrated by Frost, has said of him: "By nature Mr. Frost is essentially a humorist. He has done some literary work in the way of verses and legends which would have given him a name among lovers of fun if he had not put pencil to paper. To understand this it is only necessary to look over the pages of his 'Stuff and Nonsense,' and if the legends to the pictures of another book, 'The Bull Calf,' had been written by any one else, the madly ludicrous illustrations would have lost a

good deal of their force." He was married in Philadelphia, in 1883, to Emily Louise, daughter of Moro Phillips. His wife is also an artist, and has studied abroad. After a short residence in the country, near Philadelphia, he removed to the vicinity of Morristown, N. J., where he now resides.

PAGE, William, artist, was born in Albany, N. Y., Jan. 23, 1811, son of Levi and Tamar (Gale) Page. In 1819 the family removed to New York city, where he attended a public school. From an early age he gave promise of an unusual talent as a draughtsman, and when but eight years old drew a likeness of his mother which was remarkably correct. When eleven years of age he received a prize from the American Institute for a drawing in India ink. He first entered the studio of James Herring, the portrait painter; a year later he became a pupil of S. P. B. Morse, through whom he was enrolled as a student at the Academy of Design, where he received the first prize—a silver palette—for his drawings from the antique. His portrait work soon attracted attention, and in 1836 he was made a member of the National Academy of Design. Among the portraits of distinguished people painted at this time were those of Gov. Marcy, for the New York City Hall, and John Quincy Adams, for Faneuil Hall, Boston. To this period also belong his "Holy Family"; "The Infancy of Henry Fourth"; "A Wife's Visit to Her Condemned Husband"; "The Whistler," and other imaginative paintings. About 1840 he opened a studio in Boston, living in Brookline, where he had the constant and intimate companionship of James Russell Lowell, W. W. Story, Robert Carter and others well known in literary and art circles. In 1843 Mr. Lowell dedicated the first complete edition of his poems to his "Friend, William Page," in these words: "I have never seen the works of the great masters of your art, but I have studied their lives, and sure I am that no nobler, gentler or purer spirit than

yours was ever appointed by the eternal beauty to bear that part of the divine message which it belongs to the great painter to reveal." While in Boston, Mr. Page painted many portraits, also a "Cupid and Psyche," and "Ruth, Naomi and Orpah." After returning to New York city for a time in 1849, he decided to study the old masters in Italy. In Florence he made many fine copies of Titian, one of which was seized by the authorities in the belief that it was an original, so remarkable was his execution. Later, in Rome, he painted his celebrated "Venus"; his "Flight into Egypt"; "Moses on Mount Horeb"; "Infant Bacchus," and a number of portraits, including those of Mr. and Mrs. Browning, who were his warm friends. Mr. Page was a delightful conversationalist and drew about him many choice friends who were painters and writers. Returning to New York city in 1860, he resumed portrait painting, and in 1870 he produced a much talked-of head of Christ. His historical portrait of Adm. Farragut on the Hartford, entering Mobile bay, was purchased by a committee and presented to the Emperor of Russia in 1871, the Grand Duke Alexis receiving it for his father from Mr. Page and Mr. Morse, the ceremony taking place at the Academy of Design, of which Mr. Page was then president (1871-74). This painting created much controversy, some persons declaring it to be not historically correct; but as the painter

made a model of that portion of the Hartford on which the admiral stood; and as the latter not only gave him many sittings but furnished him with details and incidents, there is no doubt of its truth to facts. He was a devoted student of Shakespeare, and having become interested in the death mask of the poet, owned by Dr. Becker, of Darmstadt, he visited Germany, in 1874, and made a careful study of it, becoming fully convinced of its authenticity. On his return to America he reproduced the mask from photographs and measurements and modeled a bust in clay from which he painted several heads and a three-quarter length standing figure. Mr. Page made many experiments in color theories and art methods and published a "New Geometrical Method of Measuring the Human Figure" in 1860. In 1877 he was stricken with paralysis and suffered for eight years. He was married, first, in 1833, to Lavinia Trobill, by whom he had three daughters, only one of whom survives, second, in 1843, to Sara A. Dougherty, and third, in 1858, to Sophia S. Hitchcock, by whom he had four sons and two daughters. He died at Tottenville, Staten Island, N. Y., Oct. 1, 1885.

GIBSON, Charles Dana, illustrator, was born at Roxbury, Mass., Sept. 14, 1867, second son of Charles De Wolf and Josephine Elizabeth (Lovett)

Gibson, and a direct descendant of Isil Gibson, who landed at Plymouth, Mass., in 1630. Another ancestor on the paternal side was Rev. John Cotton, the Puritan clergyman, of Boston, Lincolnshire, and Boston, Mass. (1633), while through the DeWolfs, of Bristol, R. I., he is descended from Gov. Bradford, of Plymouth colony. His mother's father, Charles W. Lovett, was assistant secretary of state of Massachusetts for forty years. When eight years old his parents removed to Flushing, L. I., where at the

and international alliances between foreign titles and American heiresses. To be sure, his women were becoming constantly more lovely to look upon and better groomed and his men much finer specimens of the gentleman and athlete; but certainly their doings for several years showed no great variations. During this time he created a few types which he made all his own, particularly the 'Bishop' and that fine type of womanhood, the American girl. . . . His experience in Paris was a most important one, for it unquestionably had more effect on his work than any of his later travels. Almost the first of his sketches to reach this country showed the effect of the French school of black and white artists. He gradually drew away from his fine-line drawing and told his story in a few bold strokes, where he would formerly have used a hundred. The change may have been due altogether to an appreciation and to a more intimate knowledge of the French artists and their work, or it is possible that the enthusiasm with which he was received as a master of his art in Paris may have inspired him to strike out in bolder methods. . . .

In London he was placed in the British estimation and admiration at the right hand of their own Du Maurier." About the same time, Anthony Hope, in "McClure's Magazine," paid him the following compliment: "A part of his merit lies in the fact that while dealing mainly with the apparently superficial, he has contrived to get into his work and to convey to the minds of those who study it, so much of what is really true and fundamental in human life and character, and to develop in a series of sketches, often fanciful in design and by no means ethical or didactic in intention, a view of the world so broad and so consistent." Mr. Gibson is a member of the Players', Racquet and Meadow Brook clubs. He was married in Richmond, Va., Nov. 7, 1895, to Irene, daughter of Chiswell Dabney and Nannie (Keene) Langhorne. They have a son and a daughter.

STERNER, Albert Edward, artist, was born in London, England, March 8, 1863. His mother was of English and his father of German-American extraction. In 1879 the family removed to Birmingham, where at the age of eleven years he entered King Edward's School at the head of a competitive list of seven hundred students. He made rapid progress in drawing and the languages, taking class prizes in each, and, after studying at the Birmingham Art Institute where he won a scholarship, went to Germany in his fifteenth year. Here he spent two and one-half years working in the commercial department of a large iron foundry and then came to America, whither the family had already emigrated, settling in Chicago, Ill. He earned a livelihood as a lithographer, scene painter, draughtsman on wood for engravers, and designer. He was a member of the Chicago Art League, and while in that city illustrated the "Rambler," a weekly humorous publication edited by Harry B. Smith, the librettist. In 1885 Sterner took up his residence in New York city, where he illustrated for "Life," "St. Nicholas" and "Harper's." Three years later he went to Paris and studied at the Beaux Arts and Julian Academy under Boulanger and Lefebvre, receiving honorable mention in 1891 for an oil painting, "The Bachelor," exhibited in the Salon, to which he has been a regular contributor. Among the volumes which he has illustrated are "Prue and I," by George William Curtis; works of Edgar Allan Poe, and "Eleanor," by Mrs. Humphry Ward. He is a member of the American Water-Color Society; of the National Art, Salmagundi and Lotos clubs of New York, and at the Paris exposition of 1900 was awarded a bronze medal. Mr. Sterner was married in , 1894, to Marie Walther, and has one son.

high school he continued the studies begun in Boston. On leaving school he entered a broker's office in New York city, but after a few months' trial of an ungenial occupation determined to study art, and spent the years 1883 and 1884 at the Art Students' League. In 1886 he began contributing to periodicals, his first drawing accepted being "The Moon and I," which appeared in "Life." In 1887 he opened a studio in New York city, and devoted himself to illustrating books, magazines and weekly papers making him known to the public. In 1899 he became a contributor to "Life" exclusively. Among the books illustrated by him are: Richard Harding Davis' "Princess Aline" and "Soldiers of Fortune"; Anthony Hope's "Rupert of Hentzau" and "Prisoner of Zenda." Individual collections include: "Americans" (1890); "Drawings by C. D. Gibson" (1894); "Pictures of People" (1896); "Sketches and Cartoons" (1897); "London as Seen by C. D. Gibson" (1898); "People of Dickens" (1898); "Sketches in Egypt" (1898); "The Education of Mr. Pipp" (1899); "A Widow and Her Friends" (1901). Writing of Gibson and his art, in the "Critic" (January, 1899), Charles Belmont Davis says: "For several years his work, save in the lengthy strides he made in his technique, varied but little. He played on the simplest chords and those which would naturally appeal to a young American—simple love stories, and a strong protest against marriages for money

SARGENT, John Singer, painter, was born in Florence, Italy, Jan. 12, 1856, son of Fitz William and Mary Newbold (Singer) Sargent, the former a native of Gloucester, Mass., and a descendant of William Sargent, of Gloucester, England, who emigrated to Massachusetts before 1650. His father was graduated at the medical department of the University of Pennsylvania, and practiced as a surgeon in Philadelphia until 1856, when he went to Europe to live. His mother was a member of an old Philadelphia family, and was an accomplished painter in water colors. Young Sargent, whose first acquired language was German, accompanied his parents on their travels about Europe, but was educated chiefly in Florence, where besides pursuing classical studies, he attended the Academy of Fine Arts. While still a youth he chanced to spend a summer in the Tyrol and there met the English painter, Frederick (later Lord) Leighton, who commended his artistic efforts and encouraged him to continue. At the age of eighteen he accompanied his father to Paris and was placed under the tuition of Carolus Duran. He made his first visit to the United States that year, but soon returned to Paris, and in 1878 exhibited a picture at the Salon: "En Route pour la Pêche." This was followed by "Scapoloan Children Bathing" (1879) and by brilliant portraits of Carolus Duran and of Dr. Pozzi, a well-known physician of Paris. About that time he aided Duran in decorating a ceiling in the Luxembourg, and in one corner introduced the likeness of his instructor. In 1879 Sargent visited Spain, where he was profoundly impressed by the work of Velasquez, and extended his tour to the northern coast of Africa, there finding material for some striking figure pieces, of which: "Smoke of Ambergris" was exhibited in 1880, and "El Jaleo" in 1882. The latter is now in the Art Museum of Boston. The Salon of 1881 contained a "Portrait of a Young Lady" by him, which elicited the following tribute from Henry James: "This magnificent work offers the 'uncanny' spectacle of a talent which on the very threshold of its career has nothing more to learn. It is not simply precocity in the guise of maturity—a phenomenon we very often meet, which deceives us only for an hour; it is the freshness of youth combined with the artistic experience, really felt and assimilated, of generations." About 1884 Sargent removed to London. In 1887 he visited New York, where he executed a number of orders for portraits, and in 1890 received a commission for decorations for the new Boston public library. The winter of 1891-92 was spent in El Faym, Egypt, in the study of Egyptian art and symbolism, after which he joined Edwin A. Abbey at Fairford, Gloucestershire, England, and for two years he worked on his canvases for the public library, his companion being engaged on similar work for the delivery room of that building. A section of the decoration was shown in London in 1894 at the exhibition of the Royal Academy, and was received by the critics with extraordinary enthusiasm. The original commission was simply to decorate both ends of what is now called the Sargent gallery, for which the trustees agreed to pay \$15,000, but when the first decoration was placed, in the spring of 1895, so much admiration was excited that \$15,000 more was raised by public subscription to enable him to unite the two ends by a decoration covering the ceiling. The complete scheme represents, to quote the artist's own words: "The pageant of religion—a mural decoration illustrating certain stages of Jewish and Christian history." He exhibited nine works at the Columbian exposition, Chicago, in 1893, including portraits of Ellen Terry as Lady Macbeth, young Augustus St. Gaudens and Mrs. Eliot F. Shepard. In 1899 an exhibition of his paintings was held in Boston under the auspices of

the Art Students' Association of that city, which was the largest and most representative collection ever made of his work, and included about 120 examples, fully fifty of them being portraits. The exhibition was considered of such importance that artists and art lovers visited it from places as far distant as San Francisco. Early in Sargent's career he was claimed by the impressionists, and in referring to this fact, the artist, Frank Fowler, wrote: "His method, which is powerfully realistic, might be brutal indeed in other hands, but in his it becomes original and almost anomalous, for with the materials at his service to produce consensus, he proffers you distinction." A few years later, another artist, Coffin, said of him: "His great success as a painter of portraits is no doubt due to the fact that in addition to a technical equipment of the highest order he possesses intuitive perceptions which enable him to grasp his sitters' mental phases. His cultivated eye quickly determines the pose which naturally and easily harmonizes the physical side with the mental, and his artistic feeling dictates unerringly by what attributes of costume and surroundings the picture formed in his mind's eye may be best presented on canvas. He rarely neglects to compose his picture, that is, not only to determine the lines of the figure, but also to fill the canvas and balance it." Still another critic, in speaking of the exhibition in Boston, observed: "The freshness that characterizes Sargent's method and intention, makes each separate canvas an individual creation. His brush never seems to be tired; scarcely a passage in the picture is without its meaning and value; there are tricks of technique, but they never harden into habit; an occasional letting of himself go in a tour de force does not lessen his habitual self-control; there is no repetition of pose or sentiment or accessories; every picture is a distinct conception, bearing the sign of having been suggested by the sitter and elaborated in conformity with the suggestion. One of the most beautiful is that of his friend, Henschel. In this one feels a complete accord of artistic and human sympathy between the sitter and the painter." His numerous works, which are chiefly portraits, are exhibited at the Salon, the Royal Academy, and the New Gallery, London, and in a few of the galleries in the United States. Among those not already mentioned are: "Danse-Oliviens-a Capri" (1879); Mue. Pailleson (1880); "Hall of the Four Children" (1882); "Venetian Interior" (1882); children of Edward Boit (1883); Mue. Gauthereau (1884), noted by Henry James, Jr., for its "exquisite style"; Mrs. Henry White (1884); "Carnation, Lily, Lily, Rose," portraits of the daughters of Fredrick Barnard, the draughtsman, exhibited at the New Gallery, 1885, and bought by the Chantrey fund; Lady Playfair (1885); Mrs. Wilton Phillips (1886); Miss V. (1886); Mrs. Kissam (1887); Henry Marquand (1887), now in the Metropolitan Museum of Art, New York city; Mrs. Boit, Mrs. Mason, Claude Monet, all in 1888; Edwin Booth, Lawrence Barrett, Joseph Jefferson, painted for the Players' Club, New York city (1890); Ada Rehan; Beatrice Goelet, a bewitching portrait of a child; "Carmen-cita," shown at the Society of American Artists (1890), and at the Salon (1892) and bought by the French government for the Luxembourg Gallery; Mrs. Comyns Carr (1890); "Izitham Note" (1890);

Lady Agnew; Mrs. Carl Meyer and children; Mr. Penrose, president of the Royal Institute of Architects; Mrs. Hammersly; Mrs. Loring; Mrs. Hunter (1809); Richard M. Hunt and Frederick Law Olmsted, for Biltmore, the residence of George Vanderbilt in North Carolina, and Col. Ian Hamilton (1899). One of his most celebrated portraits is that of A. Wertheimer, the London art dealer. He received honorable mention at the Salon of 1878; a second class medal at the Salon of 1881, was made a chevalier of the Legion of Honor in 1889, and the same year received a medal of honor at the Paris exposition. He received the grand prize at the Paris exposition of 1900. Mr. Sargent was elected an associate of the Royal Academy in 1893, a member of the Society of American Artists in 1880, an associate member of the National Academy of Design in 1894, and became an officer of the Legion of Honor in 1895. He also is a member of the Société des Beaux Arts of Paris.

LATHROP, Francis, artist, was born at sea, near the Hawaiian islands, June 22, 1849, son of Dr. George Alfred and Frances Mary (Smith) Lathrop. He is of the ninth generation from the Rev. John Lathrop, who came from Egerton, Kent, England, in 1634, and settled in Massachusetts, where he and his descendants became prominent in colonial and revolutionary history. He was a representative in the general court

and minister of Barnstable and Scituate until his death in 1633. The line of descent runs through his son, Samuel, and his wife, Elizabeth Scudder; through their son, Israel, and his wife, Rebecca Bliss; through their son, William, and his wife, Sarah Huntington; through their son, Jeremiah, and his wife, Lydia Armstrong; through their son, William, and his wife, Lydia Mix; through their son, Alfred, and his wife, Margaret Parsons; and through their son, George Alfred, the father of Francis. Mr. Lathrop's great-grandfather, Samuel Holden Parsons (b. 1737, d. 1789), a native of Connecticut and an active

Francis Lathrop.

leader of the patriot party, planned the expedition, which, commanded by Ethan Allen, captured Ticonderoga. Subsequently he took part in the battles of Long Island, Harlem heights and White Plains; served under Washington in New Jersey, and was made major-general in 1780. Gen. Parsons was a member of the court that tried Major André, and later was appointed by Washington the first judge of the Northwest territory. Francis Lathrop's father (b. 1819, d. 1877), a native of Champion, N. Y., spent many years in Hawaii, where he was sent in 1849 by the U. S. government to take charge of the Marine Hospital established there, serving later as U. S. consul at Honolulu. In 1859 the family returned to the United States, where young Francis received a part of his early education in the Columbia Grammar School, New York city. In 1867 he went to Dresden, Germany, in company with his mother and younger brother, George Parsons, who became later a well-known author. Here Mr. Lathrop attended the gymnasium, preparatory to entering the university, but having a decided penchant for art he decided to begin the study of painting at the Royal Academy of Fine Arts in that city. Shortly after he went to London, England, where he continued his art studies in the studios of Ford Madox-Brown and Sir Edward Burne-Jones, and also acted as an assistant of R. Spencer Stanhope

and of William Morris, in the execution of various works, devoting special attention to stained-glass work. In 1873 he returned to the United States, where he has since been engaged in painting portraits and decorative pictures, and in the execution of stained-glass windows, book illustrations and general decorative work. Mr. Lathrop was represented at the first exhibition of the Society of American Artists in 1878 by portraits of Ross R. and Thomas Winans, and was made a member of that body, of which he was chosen secretary in 1879, and treasurer in 1881. Among his chief decorative works are the mural painting, entitled "The Light of the World" (in 1898), over the altar of St. Bartholomew's Church; "Apollo" (1883), over the proscenium of the Metropolitan Opera House, New York city; "Moses with the Tablets of the Lord" (1877), a wall-painting in the Bowdoin Chapel, Brunswick, Me. He also assisted in the decoration of Trinity Church, Boston; designed a marble mosaic "Widows and Orphans" (1887), for the Equitable Life Insurance Co.'s building, New York city, and executed a stained-glass window for the chapel of Bethesda Church, Saratoga, N. Y., representing "The Miracle at the Pool of Bethesda." For the Marquand memorial window in Princeton College Chapel, Mr. Lathrop received a gold medal at Philadelphia, in 1889. Besides those already mentioned, he has executed many mural paintings and much stained-glass work for numerous churches and residences in New York, Albany, Boston, Baltimore and other cities. He has designed illustrations for several books, among them Clarence Cook's "House Beautiful," and for other artistic publications. Mr. Lathrop is a member of the Architectural League; of the Municipal Art Society; of the Institute of Arts and Letters; of the Society of Mural Painters; of the Society of American Artists; of the Sons of the Revolution; of the Century, Players' and Tuxedo clubs, and has been a member of the Calumet, Grolier, Lawyers', Fencers', Nineteenth Century, and New York Athletic clubs, and the Union Club of Boston.

BURBANK, Elbridge Ayer, artist, was born at Harvard, Ill., Aug. 10, 1858, son of Abner Jennings and Annie Mary (Ayer) Burbank, the latter a daughter of Elbridge Gerry Ayer, founder of Harvard, Ill. He was educated in the public schools, and began his art studies in the Academy of Design, Chicago, in 1874. While pursuing his studies he supported himself by various occupations. In 1886 he entered the Art School of Munich, Germany, and after four years spent in study abroad returned to Chicago and began his career as a portrait and genre painter. Early in his career he began a series of studies of negro character, which he treated in a semi-humorous vein that was very popular. In the exhibition of the Chicago Society of Artists in 1893 he won the Yerkes first prize. In 1897 he was encouraged by his uncle, E. E. Ayer, president of the Field Columbian Museum, to enter upon the work which will probably bring him the most enduring reputation—the painting of Indian portraits. His first trip was to Fort Sill, Oklahoma territory, where he painted portraits of Apache, Kiowa, and Comanche Indians, and from there he proceeded into the country of the Sioux, Crow, Nez Perces and Northern Cheyenne tribes. In 1897-98 he worked among the Laguna, Pueblo, Navajo, Moqui, Zuni, Apache, Mojava, and Ute tribes; in 1898-99, he visited the Arapahoe, Southern Cheyenne, Osage, Ogalalla Sioux, Columbus river, Palouse, Umatilla, and Yakima tribes. He has painted numerous portraits with a generous addition of ceremonial and costumed figures, illustrative of the appearance and costumes of each tribe. Among the noted Indians whose portraits he painted are the chiefs Red

Cloud of the Sioux, Joseph of the Nez Percés, and Geronimo of the Apaches. His pictures have been exhibited in Chicago during several seasons, and have been generously utilized by writers on the Indians, both here and abroad, and have found place in the collections of several well-known people. Mr. Burbank is a member of the Chicago Society of Artists; Society of Western Artists, and the Cosmopolitan Club of Chicago. He was married, in 1880, to Blanche Alice, daughter of Homer E. Wheeler, of Rockford, Ill.

WILLIS, Edmund Aylburton (A. Van Willis), artist, was born in Bristol, England, Oct. 12, 1808, eldest son of John Willis, a painter of genre and animal pictures, and brother of Henry Brittan Willis, fellow of the Royal Society of Painters in Water Colors, of London. On leaving the preparatory school at Broad Oaks, near Bristol, Edmund decided to follow his father's profession, and became his pupil. Later he spent some time in traveling through England, Wales and Ireland, studying from nature, and laying up material for future use, finally settling in London, where he gradually became known as a painter in oils of landscape and animals. His success with the last named attracted the attention of the duke of Bedford and other owners of fine horses, from whom he accepted several commissions to paint their favorite animals. Meeting with three almost fatal accidents, he was obliged to lay aside his brush for seven years, during which he took up the business of picture-restoring, in which he became an expert. In 1851 he came to the United States, settling in Brooklyn, N. Y., and became a naturalized citizen. He was a member of the Brooklyn Art Society, and the last surviving member of the Round Table, a club organized for the advancement of art. Mr. Willis' work is specially good in tone and color, particularly his studies of animals. Among the more important of his works (painted in America), are "Ploughing Time"; "In the Woods"; "Animals Flooding Before a Prairie Fire"; "View Near Knatskill Bay; Lake George"; "Bringing Home the Sheaves"; "An English Moor"; and "Moonlight on Great Peconic Bay." The signature on his works, "A. Van Willis," was adopted through a peculiar rule of an English society of painters, of which he was a member. Mr. Willis was married, in 1841, to Frances, daughter of William Frederick Fenwick, of London, and they had twelve children, ten of whom are living. He died Feb. 3, 1899.

RYDER, Platt Powell, artist, was born in Brooklyn, N. Y., June 11, 1821, son of Uriah and Mary Ann (Powell) Ryder, and descendant of early settlers on Long Island, some of whom were residents of Middleburg (now Newtown), in 1661. His father kept a shoe store and at an early age he entered it as a clerk, assuming full charge as soon as he had learned the business, though his heart was never in his work. A taste for drawing was indulged in whenever opportunity offered, and sketches of people and things about him were so favorably commented upon that he determined to break with his associations as soon as possible. At the age of twenty-five he gave up business for art, and having taken up painting, studied for the first time under instructors in New Orleans, which had become his family's place of residence. In 1854 Mr. Ryder went to Europe to continue his studies, and remained for three years. Returning to this country, he made his home in Brooklyn; contributed to various exhibitions; aided in founding the Brooklyn Academy of Design, and in 1868 was elected an associate member of the National Academy, New York city. The year 1869-70 was passed in Europe in study under Bonnat in Paris, and in Belgium, Holland, and England. In 1871 he took a studio in New York city. Though better known, perhaps, as a genre painter and

as a very skillful reproducer of famous pictures by others, his best work was in the field of portraiture, and many noted people patronized him. Indeed, he became so popular, that in his later years he could not execute all his commissions, and under the pressure of work broke down. Among Ryder's genre paintings are "Spinning" (1879), "Farewell" (1880); "Reading the Cup" (1882), "Welcome Step" (1883), "Washing Day" (1884), "Fireside" (1885); "Watching and Waiting" (1886); "Boys Playing Marbles" (1889), exhibited at the Paris exposition, and favorably commented on. Unassuming in his manners and genial in his disposition, he had many friends among artists and literary men, and was a valued member of the Century Association and of other clubs. Mr. Ryder died, unmarried, at Saratoga, N. Y., July 15, 1896.

MARR, Carl, artist, was born in Milwaukee, Wis., Feb. 14, 1858, son of John Marr, an engraver, who came to America from Germany in 1852, and after a short stay in Hartford, Conn., made his home in Milwaukee. He gladly left school to learn wood engraving in his father's office, for a serious defect in his hearing had made him a lonely boy and a dull scholar. His father sent him to Germany to study when he was eighteen years old, and after spending a year at Weimar he went to Berlin to work under Prof. Gussow, and from there to Munich, where he became a pupil of Seitz, and later of Gabriel Max. While with the last named he painted the "Mystery of Life," one of his two pictures in the Metropolitan Museum of Art, New York city. In 1880 he returned to Milwaukee with this picture as the key to unlock the temple of fame, but he received no recognition, and at the expiration of two years of precarious existence he once more, accompanied by the "Mystery of Life," crossed the ocean. Soon after reaching Munich he painted his "Episode of 1813," and with it scored his first success, the picture being purchased by the German Society of Historical Art. In 1885 Mr. Marr began work on "The Flagellants," and in 1889 finished it. It won the gold medal from the Royal Academy of Berlin. One year later he produced "1806 in Germany," now in the Royal Gallery at Königsberg, and for this he was awarded another gold medal by the Royal Academy of Berlin. The work which established Mr. Marr's fame is "The Flagellants." It was exhibited at the Columbian exposition in Chicago, and has been on exhibition in Berlin, Vienna, Dusseldorf, Leipzig and many other European cities. The leading art critics of Europe pronounce it one of the best paintings exhibited for the past fifty years. The painting represents a procession in Florence of members of the religious order called the Flagellants, which at the beginning of the fourteenth century spread throughout Italy and southern Germany. The painting was purchased in Milwaukee and presented to the public library of that city. Among his other pictures are: "The Fall of Icarus" (1894); "Madonna" (1897); "Maria" (1898), and "The Resurrection" (1899). As may be expected from the influence of the masters under whom he studied, Mr. Marr's work is intellectual, serious and thoughtful. His pictures are the work of a diligent student, masterful in composition, excellent in drawing, and they have fairly won for him the recognition he has received.

Carl Marr

DEWEY, Charles Melville, artist, was born at Lowville, Lewis co., N. Y., July 16, 1851, son of Silas and Jane (Stoddard) Dewey. He is directly descended from Thomas Dewey, a founder of the colony of Massachusetts Bay, who emigrated from Kent, England, to America in 1633, settling first at Dorchester, Mass., and later removing to Windsor, Conn., where he died in 1648. His father was a farmer, and removed from Massachusetts to New York in 1820. Charles M. Dewey spent his early life on his father's farm and attended a district school, where he received only the rudiments of an education. In his thirteenth year he became an invalid, being confined to his bed for the next five years with an unusual case of hip disease. As a child he displayed artistic talents, earning the money for his first painting materials by building the fire in the country schoolhouse. Upon his recovery he became a clerk in a music store in Watertown, N. Y., for the time giving up the idea of art; but the predilection was too strong to be controlled, and in 1874 he came to New York and became a pupil in the National Academy of Design. After two years' study he went to Paris and entered the atelier of Carolus Duran, receiving much from his intercourse with this great artist, by whom he was honored in being selected as one of three pupils to assist his master in the decoration of the "plafond" of the Louvre.

On Mr. Dewey's return to New York in 1878 he opened a studio, and began to exhibit in the National Academy and the exhibitions of the Society of American Artists, of which organization he was an active member. Throughout his career as a landscape painter Mr. Dewey has continued to study nature and interpret it in his own way, and rounding out his art slowly but with constantly increasing individuality he is known as one of the most personal of all our painters. He early became known as a truthful delineator of familiar phases of American landscape, and especially of those scenes along

Charles Melville Dewey

the edges of the sea where tidal moisture enriches nature and the constant atmospheric changes lend her aerial variety. His sympathy is with the ripper development of color, and some of his most successful efforts have been in subjects seized upon at the decline of day, and especially at the season of the passing year when Indian summer lingers in drowsy haze over field and forest made splendid by first frosts. His landscapes are synthetic in treatment, for he seeks to interpret rather than to transcribe an effect. He is a proficient painter in water-colors as well as in oils, and he has painted many portraits. Among his most important works are: "Edge of the Forest" (1884), owned by the Corcoran Art Gallery of Washington, D. C.; "The Queen of Night" (1901); "An Autumn Pastoral" (1890); "Shadows of the Evening Hour" (1888); "The Star and the Shadows" (1906), all of which belong to private collections; "Gray Robe of Twilight" (1894), owned by the Buffalo Museum; "Marsh Island" (1891); "River at Night" (1888), and "Return of the Hay Boats" (1890), which was exhibited at the Munich International Exhibition in 1895, and attracted the most favorable notice from foreign critics. Mr. Dewey was married, in May, 1887, to Julia, daughter of Judge Henshaw, of Batavia, N. Y., a prominent member of the New York state bar.

BEARD, William Holbrook, artist, was born at Painesville, O., April 13, 1825, son of James and Harriet (Wolcott) Beard. On his father's side he is descended from Sir James Beard, of England, and on his mother's side from Sir Lochlainn McLenn, of Scotland. His grandfather, James Beard, was judge of the supreme court of Connecticut. His father, a native of Derby, Conn., was a sea captain, and later commander of a brig on the Great lakes. His mother, the first white woman to land in Chicago, was a niece of Gov. Wolcott, of Connecticut. Almost as soon as he could hold a pencil this artist began to draw, showing a particular fondness for animals; but when he was old enough to decide to make art his profession he was discouraged by his parents, as already one of their children, James Henry, had taken up portrait painting; but the boy persisted, studying as best he could without an instructor, and about 1846 found his way to New York city, where his brother had settled; took up portraiture as a specialty, and traveled for five years; then settled in Buffalo. While there he painted a picture of a cat and kittens, which he sent to an exhibition of the National Academy of Design as his first contribution. In 1856 he went to Europe, where he remained three years, studying in Düsseldorf, and painting in Italy, Switzerland and France. On his return he settled in New York city; in 1861 was elected an associate of the National Academy of Design, and in 1862 an academician. With the exception of tours through the South and West and other parts of the United States, he spent most of his life in New York city. His works include allegorical and humorous pictures, but he was best known by his paintings of animals, which may be viewed either as caustic satires on humanity and its failings or as attempts to prove that beasts and birds are endowed with the same tastes and propensities as men. He was particularly fond of portraying the bear, and invested that clumsy and apparently uninteresting animal with traits that one becomes convinced he must possess; but he was also well known for other imaginative works. Jarves, in "The Art Idea," says: "We have in Beard, fresh from the western wilderness, an artist of the genuine American stamp, of decided originality and versatility. He paints animals from the humorous point of action, passion and sentiment. With him humor is fine art. He has an exquisite sense of the ridiculous and sensuous. His brutes are four-legged humanity. In his own vein he has no equal." Among his well known pictures are, "Kittens and Guinea Pig" (1859); "Susannah and the Elders" (1860); "Bears on a Bender" (1862); "Bear-Dance" (1865); "March of Silenus" (1866); "The Flaw in the Title" (1867); "He Leadeth Me Beside the Still Waters" (1869); "Diana and Her Nymphs," deer (1871); "Darwin Expounding His 'Theories,' monkeys (1871); "Runaway Match" (1876); "Bulls and Bears in Wall Street" (1878); "Voices of the Night" (1879); "Office-Seekers" (1886). Though he had the field of animal painting to himself, he delighted most in allegorical work. In this his prolific and poetic imagination had full sway. Among later subjects in this field were: "Witches at the Cairn" (1890); "Spirit of the Storm" (1894); "The Seasons" (1895); "The Valley of the Shadow" (1895); "Coming of Day" (1896); "Phantom Crane" (1896); "Birth of the Elfs" (1897); "Power of Death" (1897); "Passing of Ages"; "The Shades of the Druids" (1897); "The Elements" (1898). He was as industrious with his pen as with his brush; was a poet of no mean order, and left a large amount of manuscript matter richly illustrated by himself. A collection of his sketches, entitled "Humor in Animals," was published in New York

in 1885, and another book, entitled "Action in Art," in 1892. His designs for mausoleums, museums, fountains, monuments, etc., are peculiarly original and grand in conception. He was made a member of the Century Club in 1866, and he was an original member of the Artists' Fund Society and the Artists' Aid Society. Mr. Beard was married, about 1848, to Flora Johnson, granddaughter of Judge Wilkeson, who died within a year. In 1863 he was married to Carrie, daughter of Thomas Le Clear, the portrait painter. Their son, Wolcott Le C. Beard, is a civil engineer and a well-known writer. Mr. Beard died in New York city, Feb. 21, 1909.

WEIR, Robert Walter, artist, was born in New York city, June 18, 1803, son of Robert and Mary Katherine (Bruckley) Weir. His father came to America from Paisley, Scotland, in 1790, and settled at New Rochelle, N. Y., where he was a merchant. After a brief experience with mercantile life, the son began, unaided, to study art. His first work to attract attention was a large picture of "Paul Preaching at Athens," painted in his nineteenth year. As the figures were of life size and he had to manufacture his own materials, he worked under difficulties, but the painting was so successful when exhibited that the young artist was encouraged to follow his chosen profession with redoubled ardor. In order to qualify himself for its demands he took a course in anatomy at the medical college and pursued such other studies as would be useful to him in his career. In 1824 Weir went to Europe and studied in Italy for four years, going first to Florence, where he painted "Christ and Nicodemus" and the "Angel Releasing Peter," and in December, 1825, to Rome, where, with his friend, Greenough, he led an ideal student life. After arising early to study in his own atelier, he worked at the French Academy until noon; later at the Vatican or the Sistine Chapel, and after dinner enjoyed the fragrant smoke and light-hearted chat of the Café Greco until it was time to attend the evening life school. Returning to America in 1828, he took up his residence in New York city, where his pictures soon became the leading works of the exhibitions; in the same year he became an associate member of the Academy of Design, and in 1829 he was elected an academician. In 1834 he succeeded Charles R. Leslie as professor of drawing at the U. S. Military Academy, West Point, which position he filled for more than forty years, when, with the rank of colonel, he was honorably retired under the limitation of service act. Prof. Weir was greatly venerated by the older army officers, who had been under his instruction, and no single officer of that institution did more by example and personal bearing to promote patriotism and a high moral standard among the students. From 1836 to 1840 he was engaged upon a large picture for the government, "The Embarkation of the Pilgrims," which was to fill one of the panels in the rotunda of the capitol at Washington—a space twelve by eighteen feet. The proceeds of this painting, amounting to \$10,000, were devoted to the erection of a stone church near West Point, the Church of the Holy Innocents, which he also designed. After his retirement Mr. Weir went to New York city, where he resided until his death. He is perhaps best known by his historical pictures, and he was one of the first American painters to take up this branch of art. His most important works are: "The Belle of the Carnival" (1836); "The Bourbons' Last March" (1840); "Landing of Hendrick Hudson" (1842); "Indian Captive" (1843); "Church of the Holy Innocents" (1847), in the Corcoran Gallery at Washington; "Blanca" (1847); "Religion" (1852); "Christ and the Two Disciples on the Way to Emmaus" (1855); "Taking the Veil" (1855); "Ship on a Lee

Shore" (1855); "The Two Marys at the Sepulchre" (1857); "Paestum by Moonlight" (1858); "Meeting of Marnion and DeWilton" (1858); "Bay of Naples"; "Jexorion" (1860); "The Child's Dream" (1860); "Evening of the Crucifixion" (1867); "Crossing the Styx" (1869); "Christ in the Garden" (1873); "Palace of Octavia" (1874); "Our Lord on the Mount of Olives" (1877); "Titian in His Studio" (1877), beside many water color paintings and incomplete designs. Among the larger paintings are the "Evening of the Crucifixion," seven by twelve feet, an altar piece for the Church of the Holy Cross, Troy, N. Y., and a large allegorical work representing "Peace and War," which fills one end of the chapel at West Point, this last is one of the finest of his works. He also made designs for the stained glass windows of Trinity Chapel and Calvary Church, New York city. Mr. Weir's portrait, painted by Daniel Huntington, hangs in the library of the U. S. Military Academy. He was married, first, in New York city, June 27, 1829, to Louisa, daughter of John Ferguson; second, in 1846, to Susan, daughter of Rev. Lewis Pintard Bayard. He had sixteen children, among them Col. Henry Weir and the artists, John F. and Julian Allen Weir. He died in New York city, May 1, 1899.

WEIR, Julian Alden, artist, was born at West Point, N. Y., Aug. 30, 1852, son of Robert Walter and Susan Martha (Bayard) Weir. He received his first instruction in art from his father who was a distinguished painter, and for many years professor of drawing at the U. S. Military Academy. In 1883 Alden Weir went to Paris, where he was a pupil of Gérôme at the *École des Beaux Arts* until 1876, during his student days being intimately associated with Bastien-Leprieux. Upon returning to the United States the artistic quality of the work he exhibited at once brought Mr. Weir into prominence among American artists, and he is now as well known abroad. He is catholic in his choice of subjects and paints portraits, figure pieces, still life studies and landscapes with equal facility and freedom from mannerism. One by one he has discarded the conventions of art, going directly to nature for impressions, and expressing artistic truths with a pure delight in recording them that is apparent in the result. He makes no concessions to popular taste. The character of his subject, the values of light and shade and color are always the first things to be considered, and the constant seeking to apprehend these elusive elements has kept his art fresh and personal. Always full of space and light, his paintings are distinguished for broad handling, truthful and luminous color and harmony of tone. It is interesting to note the originality of composition in his figure pieces, while in his landscapes one is taken into the open air away from the studied and conventional. Mr. Weir was awarded a \$2,000 prize at one of the prize fund exhibitions of the American Art Association, and he has received honorable mention at the Salon, and medals at the Paris exposition of 1889. He was a founder and at one time president of the Society of American Artists, but withdrew from this organization in 1898 to join the seceding group of painters known as "The Ten American Painters." He is a member of the American Water Color Society, Century Association, Players' Club, and National Academy of Design. In the Metropolitan Museum he is represented by a figure painting which shows the exquisite quality of his grays. His pictures include: "A Brittany Interior" (1875); "Britany Peasant Girl" and "Study of an Old Peasant" (1877); "Breton Interior" (1878); "The Muse of Music" (1880); "Jeune Fille" and "The Good Samaritan" (1882); "The Miniature," "Ideal Head," and "Orlando" (1889); "A Bough of Green Apples" (1884); "Silver Flagon and Delft Plate" (1885); "China Bowl with

Flowers," "Summerland," "The Christmas Tree" (1891); "The Young Student," "The Lane," "The Open Book" (1893); "Baby Cora," "Williamatic Thread Factory" and "An Autumn Stroll" (1894); "Lengthening Shadows," "A Winter Day" (1895), and "The Plowman" (1901), besides many portraits, including those of Robert W. Weir (1880); Olin Warner (1881); Richard Grant White (1883); Peter Cooper (1884), and John Gilbert (1888). At the Columbian exposition he decorated one dome of the Liberal Arts building with four figure compositions: "Decorative Art"; "Art of Painting"; "The Goldsmith's Art," and "The Art of Pottery." In speaking of an exhibition held by Mr. Weir in 1889, Clarence Cook said: "This picture ('Ideal Head') and 'The Miniature'—a lady who sat with her back half turned, and looking over her shoulder at the spectator as if speaking about a miniature she held in her hand, are worthy of a place in any collection of the work of masters, new or old." Mr. Weir was married: first, to Anna Dwight, daughter of Col. Baker, U.S.A.; second, to Ella, her sister.

GAY, Walter, artist, was born at Hingham, Plymouth co., Mass., Jan. 23, 1856, son of Ebenezer and Ellen Blake (Blood) Gay. His earliest American ancestor, John Gay, probably a native of Ashford, Kent, after residing in London, came over to New England in 1635 in the *William* and Mary. From Watertown, where he lived for a time, he removed to Dedham. His grandson, Ebenezer, was pastor of the "Old Ship" church in Hingham for sixty-nine years and was given the degree of

D.D. by Harvard in 1785. The Gays were Tories, and were obliged to leave Boston on its evacuation, some fleeing to Nova Scotia, others to London, one of the latter, Samuel, son of Rev. Dr. Gay, entering the British army and becoming a colonel. Their property having been confiscated, a number never returned. Walter Gay, after attending Roxbury Grammar School, entered an office in Boston, but at the age of seventeen gave up business for art, making a specialty of flower pieces, and in 1876 sending a canvas, "Full Flowers," to the Centennial Exhibition in Philadelphia. At the age of nineteen he went to Paris and entered the atelier of Leon Bonnat, who predicted fame for the young man

and later chose one of his life studies to be placed on the wall where it hung for many years, being the only canvas thus honored, though there were many other pupils. In 1879 Gay visited Spain, and the same year exhibited for the first time at the Salon of the Champs Elysees, his picture being entitled "The Fencing Lesson." It was given a place on the line, and the "Gazette des Beaux Arts" referred to the artist as having made a brilliant debut. He has contributed regularly to this Salon, Paris having been his home almost continuously, and to exhibitions in other cities of Europe and in his native country. His principal works are: "Trained Pigeons" (1880); "Troubles of a Bachelor" (1881); "Knife-Grinders" (1882); "Conspiracy Under Louis XVI." (1883); "The Spinners" (1885), which received honorable mention at the Salon; "A Weaver" (1886), "painted," said the critic Wolf, "with the sincerity of an artist kneeling in the presence of nature"; "A Master Stroke" (1887); "Saying Grace" and "The Asylum" (1888), the former awarded a gold medal of the third

class and purchased by the French government for the Luxembourg gallery; several canvases (1889) shown at the Universal Exposition, for which he received a silver medal and became "hors concours"; "Young Girl with a Geranium" (1890); "Plain Chant" (1891), a picture containing nine life-sized figures; "Mass in Brittany" (1892), remarkable for its atmospheric and tonal qualities, and "Cigarette Makers" (1894), also purchased by the government for the Luxembourg. In 1895 he was decorated with the order of the Legion of Honor. Mr. Gay is represented in the Tate collection, now the property of the British government, in London; at the Metropolitan Museum of Art, New York city; the Museum of Fine Arts, Boston, etc., and in many private collections. Mr. Gay was awarded gold medals at Vienna and Antwerp in 1894, at Berlin 1896, and at Munich in 1897. He is a corresponding member of the Secession, Munich; fellow for life of the Metropolitan Museum of Art, New York city; associate member of the Société Nationale des Beaux Arts, Paris; member of the Société des Amis du Louvre; the Société Nouvelle; the Circle de l'Union Artistique Mirlitons, and the Society of American Painters, all of Paris; of the National Institute of America, and served on the committee of installations at the Grand Exposition, Paris, 1900. He was married in London, England, April 27, 1889, to Matilda, daughter of William R. and Maria L. (Johnson) Travers of New York city.

GAY, Winckworth Allan, artist, was born at Hingham, Plymouth co., Mass., Aug. 18, 1821, son of Ebenezer and Mary Allyn (Otis) Gay. His ancestors, John Gay and John Otis, the former being of Norman descent, emigrated from England to Hingham in 1635. Nathaniel, son of John Gay removed to Dedham, Mass., where was born Rev. Ebenezer Gay, who in 1718 became pastor of the First Church of Hingham, and held the position until his death in 1787. Descendants of John Otis removed to Scituate and West Barnstable, the latter place being the birthplace of James Otis, the patriot. His brother, Joseph, brigadier-general of the Cape Cod forces, was married to Maria Walter, and was the father of Mary Allyn Otis, who became the wife of Ebenezer Gay, grandson of the long-lived clergyman. Allan Gay's father was a lawyer, but he himself had no taste for professional life, and after attending the Lincoln and Willard private schools in Hingham, he at the age of seventeen went to West Point to study art, under Robert W. Weir, professor of drawing in the Military Academy. In 1847 Mr. Gay went to Europe, and after studying in Paris, under Troyon, and visiting Italy, Switzerland and the Rhine, returned, in 1850, to his native country, and opened a studio in Boston. In 1877-80 he traveled in Japan, and spent a winter in China, seeing Peking, Hong Kong, Macao, Shanghai and Canton. In 1881-82 he wintered in India and visited Sicily, Naples, Rome and Paris, spending two years in the last named city. He then made the old homestead, at West Hingham, his place of residence. His pictures deal with the country life and landscape of New England, as well as with life and scenery in many foreign countries. Among his works are: "Scene in the White Mountains" (1857), owned by the Boston Athenaeum; "Mackerel Fleet, Beverly Coast, Mass." (1869); "Doge's Palace, Venice" (1875); "Windmills of Delftshaven, Holland" (1876), and "Scene in Japan" (1880), owned by the Somerset Club, Boston, of which he is a member.

GAY, Eben Howard, financier, was born at Hingham, Mass., Feb. 6, 1858, son of Ebenezer and Ellen Blake (Blood) Gay. His father was a lawyer; his mother was a daughter of Dr. Oliver H.

Blood, a physician of Worcester, Mass. Mr. Gay was educated in Boston, and after graduation at the English High School, in 1871, entered business. In 1878 he took a position with the banking firm of Charles A. Sweet & Co., of Boston, and three years later became connected successively with the National Bank of the Republic and the New England Trust Co., of Boston. He then associated himself with the western banking firm of N. W. Harris & Co., of Chicago, whose eastern houses he organized, opening a Boston office in 1886, and one in New York in 1890. This was the first western banking firm to establish eastern branches, although the custom is now general. He remained in charge of both houses until 1891, when he entered into partnership with E. C. Stanwood,

of Boston. Upon the expiration of this connection he founded the banking house of E. H. Gay & Co., and since then has established branches in New York, Philadelphia and Montreal, with headquarters in Boston. Mr. Gay is treasurer of the Hudson River Water Power Co., for which his firm acts as fiscal agents. This corporation is engaged in supplying electricity for purposes of light and power to Schoenectady, Saratoga, Glens Falls and other near-by cities and towns. The plant, which is second only in size to that at Niagara Falls, consists of a dam 1,500 feet in length across the Hudson River

above Glens Falls, with a height of eighty feet, behind which is impounded a reservoir of water four and one-half miles in length. Beneath this structure is located the power house, containing turbine wheels and electric generators which are operated by the eighty foot fall of water existing at this point, and electric energy thereby created which is conveyed over transmission wires to the patrons of the company within a radius of thirty miles. Mr. Gay is a member of the Calumet Club, New York city, and of the Country and Exchange clubs, of Boston. The artist, Walter Gay, is his brother, and W. Allan Gay, the landscape artist, is an uncle as was Sydney Howard Gay (Vol. II., p. 494), the journalist and author. He was married in Boston, Dec. 15, 1898, to Cornelia S. Fanning.

ALEXANDER, John White, artist, was born in Allegheny City, Pa., Oct. 8, 1856, son of John and Fannie (Smith) Alexander, who were of Scotch descent. He was brought up by grandparents, having been orphaned in his infancy; but before he was twelve years of age began to earn his living as a messenger boy in a telegraph office in Pittsburgh. One of the directors of the company, noticing that young Alexander's leisure moments were spent in making pencil sketches, which showed cleverness, encouraged the habit and becoming more and more interested in the lad, finally adopted him. About this time, with Robert Burns Wilson, later known as a poet and painter, he spent several weeks in sketching along the Ohio and Mississippi rivers, making the journey in a skiff. After attending school, but struggling along untaught so far as art was concerned, Alexander earned a little money by making crayon portraits for a photographer, and in his eighteenth year started for New York city with the intention of becoming an illustrator. The specimens of his work that were submitted to publishers

showed at once his lack of training and he failed to find employment; nevertheless he succeeded in entering the art department of "Harper's Magazine" as an apprentice. At the end of the three years' term he went to Europe, and after a short stay in Paris spent three months in Munich as a pupil in the Academy of Fine Arts, under Benzoist, there taking a medal for excellence in drawing. Forced to live in a more economical manner than was possible even in Munich, he removed to Polling, upper Bavaria, a resort for American art students, and in this way came under the instruction of his fellow countryman, Duvencek, with whom a year later he went to Venice and there met another fellow countryman, Whistler, who gave him helpful advice. Florence was his next place of residence and was doubly profitable, affording the young man opportunities for teaching, while he was continuing his studies. Returning to New York city in 1881, he returned to illustrating, but carried on portrait painting at the same time and very soon had enough commissions to enable him to give up the other line of work. Among his sitters were Thurlow Weed, Parke Godwin, Oliver Wendell Holmes, John Gilbert, George W. Bancroft, John Burroughs, John Hay, Henry G. Marquand, Walt Whitman, Dr. McCosh, president of Princeton College; Levi P. Morton and many others. In 1885 he spent a summer in England and painted portraits of Robert Browning, Robert Louis Stevenson, Thomas Hardy, Daniel Swinburne and others. He exhibited in Paris for the first time in 1894, his contributions being three portraits of women in black, yellow and gray, respectively, and after his exhibit he was elected an associate of the society. The following year he was elected a sociétaire. Among figure pieces from his brush are: "The Mirror" and "Pot of Basil" (1897); "Pandora" (1898), both exhibited at the Salon of the Champ de Mars, Paris; "Peonies," Society of American Artists (1898); "The Green Bow," exhibited in the Paris Salon (1900) and bought for the Luxembourg Museum. The Metropolitan Museum of Art, New York city, owns his portrait of Whitman; the Boston Museum of Fine Arts his "Pot of Basil"; the Philadelphia Academy of Arts his "In the Café," and Fairmount Park Gallery, Philadelphia, portrait of the painter Thaulow; the Carnegie Gallery, Pittsburgh, his "Femme Rose." Portraits by him are to be seen in the New York Chamber of Commerce; the city hall, Albany; the supreme court building, Trenton, N. J.; the dining hall of Harvard University; the board room of Princeton University; the Luxembourg Museum, and galleries in Vienna, St. Petersburg and Edinburgh. Six mural decorations by him are in the new congressional library, Washington, the series, "Evolution of the Book," comprising: "The Cairn," "Oral Traditions," "Hieroglyphics," "Picture Writing," "The Manuscript," and the "Printed Book." Armand Dayot, the French art critic, has commented on the victorious manner in which Alexander has refuted the apprehensions of critics who affirmed that he would never be anything but a brilliant impressionist. "Without losing any of the fine qualities of his early aspirations, which impelled him toward light effects, freshness of flesh tones and backgrounds of simple draperies and foliage, toward the juvenile simplicity of the primi-

tives and a search for grace and life in the attitudes and supreme elegance in the toilet of his sitters, he has yet gained the firmness and precision he lacked and now occupies one of the foremost places among the portrait painters of the epoch. From simply expressing the canvas his brush has become penetrating, and the pictures he now shows us possess—and this we consider the highest praise that can be bestowed upon his talent—not only the charm of life, but also an intensity of thought." He was awarded the Temple gold medal in Philadelphia in 1897; the Lippincott prize, same city, in 1898; a gold medal of the first class in Paris in 1900, and another at Buffalo, N. Y., in 1901. Mr. Alexander is a corresponding member of the International Society of London; member of the Society of American Artists; an associate of the National Academy of Design; member of the Society of Mural Painters, and of the Architectural League, all of New York city; of the Secession, Munich; the Secession, Vienna; of the Austrian Society of Painters, and of the Society of American Painters of France, and is a chevalier of the Legion of Honor. He was a member of the international jury of awards at Paris, 1900. Mr. Alexander was married in New York, Nov. 2, 1887, to Elizabeth, daughter of James W. and Elizabeth (Williamson) Alexander. They have one child, a son.

EDMONDS, Francis William, artist, was born at Hudson, Columbia co., N. Y., Nov. 22, 1806, son of Samuel and Lydia (Worth) Edmonds.

His father served throughout the revolutionary war, and in the war of 1812 was chief paymaster of state troops. Francis, the youngest of a large family of children, was of an unusually reflective, sedate disposition, more inclined to seek his pleasures amid the beauties of nature than to mingle with children of his age in their ordinary pastimes. His talent for drawing and painting soon attracted the notice of his elders, and it was deemed advisable that it should be cultivated. Steps were taken to place him as a pupil with Gideon Fairman, a

F. W. Edmonds

well known engraver in Philadelphia, but a change in the circumstances of the family made it expedient for Francis to seek an occupation for immediate self-support. Though he did not have the educational advantages of his brother, Hon. John Worth Edmonds, Francis' schooling was by no means neglected. At the age of sixteen he secured a place with his uncle, Gorham A. Worth, president of the Tradesmen's Bank in New York, where he remained until 1830, when he was called to the cashiership of the Hudson River Bank of his native town. In 1832 he accepted the same office with the Leather Manufacturers' Bank in New York city, and in 1839 he was elected cashier of the Mechanics' Bank of New York city, which office he held until his retirement from active business in 1855. In 1840 he visited Europe, spending most of his time studying the art treasures of the old world. In 1853 Mr. Edmonds helped to establish the New York Clearing House, and served as chairman of its first committee. Shortly after the establishment of the National Academy of Design in 1826, he entered it as a student, and remained identified with that institution until his death, becoming an associate in 1837, and a national academician in 1840. As one of the original members of the Sketch Club, Mr. Edmonds was an incorporator of the present Century Association. He was also a share-

holder of the New York Society Library, the oldest institution of that kind in this country, and a member of the New York Historical Society, in whose gallery may be found an example of his work. Mr. Edmonds was possessed of remarkable executive ability, due, it may be said, to his great earnestness and conscientiousness. Had he been able to follow his artistic inclinations alone, he would have attained far greater eminence in the profession. Among his more important works are: "Scene from Butler's Hudibras" (1827); "Sanny, the Tailor" (1836); "Domine Sampson" (1837); "The Epicure" (1838); "The Penny Paper" (1839); "Sparking" (1840); "The Bashful Cousin" (1842); "The Image Peddler" (1844); "The New Scholar" and "Facing the Enemy" (1845); and "The Census Taker" (1855). Of these, "Sparking," "The New Scholar," and "Facing the Enemy," were engraved and published. During his residence in Hudson Mr. Edmonds was married to Martha Norman, who died a few years later, leaving two children. He was married, second, in New York city, Nov. 4, 1841, to Dorothea H., daughter of Joseph Nathan Lord, a prominent citizen. By her he had six children, all of whom, with his wife, survived him. He died at his country home, Crow's nest, Bronxville, N. Y., Feb. 7, 1863.

SHIRLAW, Walter, artist, was born at Paisley, Scotland, Aug. 6, 1838. At the age of three years he was brought by his parents to New York city. In his sixteenth year he was apprenticed to the American Bank Note Co., and ten years later entered the employ of the Western Bank Note Co., of Chicago. He went abroad in 1870 and remained for seven and a half years, studying principally in Munich under Profs. Rabb, Wagner, Runberg and Lindenschmitt, and spending his summers among the peasants of Bavaria. Since his return, in 1878, his home has been in New York city, where he is prominent as an artist and illustrator. A few of his better known works are: "Toning the Bell" (1874); "Sheep-shearing in the Bavarian Highlands" (1876), which received an honorable mention at the Paris Exposition of 1878; "Good Morning" (1878); "Indian Girl" and "Very Old" (1880); "Gossip" (1884); "Jealousy" (1886); "Water Lilies" (1889); "Psychic" (1892); "Harmonies" (1893); "Rufina"; "Drying Nets" (1899). Mr. Shirlaw was one of the first instructors at the Art Students' League; was the first president of the Society of American Artists; is a member of the Water Color Society, and in 1888 was elected a member of the National Academy of Design. He is also a member of the Chicago Academy, where, in the early part of his career, he was an instructor. His easel pictures are marked by rich color and fine composition, and he is one of the few American artists who have successfully painted the nude. His water colors and etchings have brought him high reputation in these forms of expression. Mr. Shirlaw has received many important commissions for mural paintings in public buildings, among them the new congressional library at Washington. His style is individual, his drawing authoritative, and his work in all fields displays his scholarly mind and technical skill.

EVANS, Joe, artist, was born in New York city, Oct. 29, 1857, son of Joseph T. and Czarina H. (Fuller) Evans. His father was a physician well known in the metropolis from 1845 to 1870. Through both parents he was of Welsh extraction, his ancestors having emigrated to America before the revolutionary war. The son began the study of art at the National Academy of Design in 1873. He was one of the founders of the Art Students' League of New York, which was formally opened in October, 1875. In 1877 Mr. Evans went abroad and studied at the École des Beaux Arts in the

atelier Gérôme, returning at the end of three years to New York city, where he established himself as a landscape painter. In 1891 he became president of the Art Students' League. From 1882 until the year of his death he was a zealous contributor to the exhibition of the Society of American Artists. He was made a member of the latter in 1891, was elected a member of its board of control in 1892, and in 1893 served as its secretary. Mr. Evans was actively interested in municipal reform and in public schools and free kindergartens. He was appointed a school inspector by Mayor Strong and served in 1896-97, retiring on account of ill health. He was a member of the Players' Club and of the Century Association. He died in New York city, April 23, 1898.

BEAUX, Cecelia, painter, was born in Philadelphia, Pa., in 1863, daughter of Jean Adolphe and Cecelia (Kent) Beaux, natives of the United States. She is of French descent, her father's family having originated in ancient Provence. Mrs. Thomas A. Janvier gave her her first lessons in drawing and she was a pupil of William Sartain. Commissions came to her in the orders for drawing on stone of fossils for the U. S. geological reports and for small portraits of children to be painted on porcelain. Miss Beaux emancipated herself easily from the pettiness of workmanship engendered by such employment, and began to exhibit portraits in oil, which received as many compliments for their vigorous brushwork as for their excellent drawing. The first to bring fame, the "Last Days of Infancy," was exhibited at the Pennsylvania Academy, Philadelphia, in 1885, and won the Mary Smith prize for the best painting by a resident woman artist; this same prize fell to her again in 1887, 1891 and 1892. Miss Beaux spent the winter of 1889-90 in Paris studying in the life classes of the Academy Julian under Bouguereau, Tony Robert Fleury, and Constant; also at Colarossi's, where her drawings were criticised by Courtois and Dugan-Bouyeret; spending the following summer at Concarneau, she was aided by suggestions from Alexander Harrison and from Charles Lasar. After a visit to Italy, and to England, where, at Cambridge, she painted several portraits, Miss Beaux returned to Philadelphia and in 1891 exhibited at the Pennsylvania Academy portraits of Rev. James A. Grier, D.D., and of her little niece, Ernesta. In 1893 she won the gold medal of the Philadelphia Art Club, for the portrait of Dr. Grier; also the Dodge prize of the National Academy of Design for her portrait of Mrs. Stetson, and was elected a member of the Society of American Artists, being the seventh woman to whom that honor was accorded. In 1894 Miss Beaux was elected an associate of the National Academy of Design, being the third woman to gain admission. The exhibition of the Society of American Artists in 1895 contained her "Sita and Sarita," "Perey" and "Portrait Sketch." To the Salon of the Champs de Mars, Paris, 1896, she sent six works: the portraits of Dr. Grier and Ernesta; "New England Woman"; "Sita and Sarita"; "Cynthia," a portrait of the daughter of the American artist, Mrs. Rosina Emmet Sherwood, and "The Dreamer." These were hung as a group, an unusual distinction; elicited great admiration, and brought the artist an honor enjoyed by few women, that of an election; with a handful of ballots to spare, as an associate of the Société Nationale des Beaux-Arts. The portrait called "Mother and Daughter," at Carnegie Institute, Pittsburgh, won a gold medal, 1899, and a prize of \$1,500. The "New England Woman," shown in New York city in 1897, is now owned by the Pennsylvania Academy of Fine Arts. One of the most pleasing works from her brush is "Dorothea and Francesca," daughters of Richard Watson Gilder, which had a place of honor in the International Exhibition, London.

Miss Beaux was the only woman on the international jury which chose portraits for the Paris exposition of 1900. She was represented by her "Mother and Son," "Miss Fisher," and "Mother and Daughter," and was the only woman who was awarded a gold medal for her paintings. At Buffalo, 1901, she was awarded another gold medal. In an article on Miss Beaux in the "International Studio," October, 1899, Mrs. Arthur Bell observes that her pictures have something of the manner which characterizes the portraits of Carolus Duran, and that possibly she was unconsciously influenced during her student life in Paris by his work and that of his pupil, John Singer Sargent; "yet her work remains very distinctly individual, with a simplicity, directness and unconventionality all its own. It is essentially modern in spirit; with no ornate accessories she goes straight to the point in everything she does, her children are nineteenth century little ones, just as they appear in their every-day life at home, and her men and women are represented as they really are."

CHRISTY, Howard Chandler, artist, was born in Morgan county, O., Jan. 10, 1873, son of Francis Marion and Mary M. (Bome) Christy, and a descendant in the eleventh generation from Miles Standish. His father was a member of the famous 63d regiment of the Ohio volunteer infantry. He spent his early life on his father's farm, early displayed considerable talent in drawing, and in 1889 removed to New York city, to take up the study of art. In 1893 he entered the Academy of Design, and after a short session of instruction won two prizes for draughtsmanship. He then spent two years in studying with William Chase at Shinnecock Hills, N. Y., and at his studio in New York. Although he gave great promise as a painter, Mr. Christy turned to illustrating as a more remunerative branch of art, and in 1895 received his first commissions from Dodd, Mead & Co., "Leslie's Weekly," and "Scribner's Magazine."

At the outbreak of the Spanish-American war he was sent to Cuba as a representative of "Leslie's Weekly" and "Scribner's Magazine," and his Cuban sketches and types of army and navy men, executed at this time, firmly established his reputation as an illustrator. His illustrations for "The Lion and the Unicorn" of Richard Harding Davis, made soon after his return from Cuba, show a decided advance in his technique. He has held the position of instructor in drawing in the illustrating class of Cooper Union for three years, and at the Art League, and at the Artists' and Artisans' Institute. His recent contributions include sketches of famous actors and actresses, drawn from life, published by Chase Scribner's Sons during the summer of 1899; illustrations for Page's "The Old Gentleman of the Black Stock," Churchill's "The Crisis," and numerous drawings for the "Ladies' Home Journal" and other periodicals. His chivalrous men and highbrow women, drawn in a dashing style, guided with admirable restraint appeal strongly and never in vain to popular favor, while his technique excites additional praise from the more exacting. He is a member of the Players' Club, and the National Institute of Arts, Sciences and Letters. He was married, Oct. 15, 1898, to Mabelle Gertrude, daughter of William Boone and Sue M. (Slope) Thompson, of Washington, D. C.

HARRISON (Thomas) Alexander, artist, was born in Philadelphia, Pa., Jan. 17, 1853, son of Apollus Wolcott and Margaret (Belden) Harrison. His father, a civil engineer and merchant, was a native of New Haven, descended from Thomas Harrison, of York-shire, England, who landed at New Haven early in the seventeenth century, and in 1653 was living at Branford; also from Rev. John Davenport, and Roger Wolcott, colonial governor of Connecticut. Butler Harrison, great-grandfather of the painter, served in the revolutionary war and in privateers of the coast of Ireland and the West Indies. Alexander Harrison, as the artist is generally known, was educated in private schools in Germantown, Pa., where the family lived for many years. After spending a few months as a clerk under his father, he entered the studio of George Pettit in Philadelphia, and began the study of art, which he left, however, to join the U. S. coast survey, working for four years in Maine, Florida, and on the Pacific coast. His health, which until this time had been delicate, became rugged, with this out-of-door life. He resumed his interrupted study of art at the School of Design, San Francisco, Cal., and was awarded a gold medal there, in the year 1879. In the same year he went to Paris, where he entered the Ecole des Beaux Arts under the instruction of Gérôme. He soon joined the artistic colony of French,

American and English painters at Pont-Aven, Brittany, where before nature he found the impetus the schools had not given him. Here he worked faithfully and with enthusiasm, and in 1880 he sent his first marine, entitled "The Brittany Coast," to the Paris Salon. His first popular success came the following year, when he sent to the Salon his "Chateau en Espagne," and later "Crepuscule" (Twilight). The first attracted universal attention and sold on the opening day. It represented a boy lazily dreaming on the sands. But in the second it was seen that a remarkable colorist had ap-

peared, and the individuality of his technique, together with the unusual atmospheric conditions realized, stamped him as an innovator. The impression was confirmed the following year, when "The Wave" appeared, for no man had hitherto so successfully painted water in motion. As if to show his versatility, in 1885 he produced a remarkable study of the nude out of doors, in sunlight and shadow. The canvas, which was subsequently shown in many of the art centres of Europe, was called "En Arcadie," and was later purchased by the French government for the Luxembourg Gallery, in Paris. An honorable mention was accorded him in 1885, and in 1889, having shown a number of his works in the American section of the Exposition Universelle, Paris, he was awarded a medal of the first class by unanimous vote of the jury; was honored by the French government with the decoration of the Legion of Honor, and at the same time received the decoration of Officier d'Instruction Publique. When the new Salon, that of the Champs de Mars, was formed in 1890, Harrison was elected a member of the jury of which Meissonnier was president, and at the Paris exposition of 1900 he was made a member of the international jury of awards. He is an associate of the National Academy of Design, New York city, to which he was elected in 1898; a member of the Society of American Artists, the Société Nationale des Beaux Arts, Paris; the Circle de l'Union Artistique and the

Société Internationale de Paris; of the Secessionists of Berlin and Munich; the Royal Institute of Painters in Oil Colors, London, and of various clubs, including the Century Association, the Union and Players' clubs. He is a member of the Connecticut branch of the Society of Colonial Wars. In 1894 the University of Pennsylvania conferred on Mr. Harrison the degree of doctor of sciences. He has also received medals in Vienna, Berlin, Munich, Brussels, Philadelphia, Dresden, etc. While establishing his home in Paris, Mr. Harrison has made many visits to America, spending considerable time on each occasion and holding exhibitions of his works in New York, Philadelphia and Chicago. He passed much time in earlier years in Brittany in intimacy with Jules Bastien-Lepage. During the winters for several years he has had a large class of students in Paris, which numbers some of the most prominent of the younger men. Although demonstrating his ability to paint in many directions, it is mainly by reason of his great power as a painter of the sea that Harrison's reputation stands, and in this work none approach him in the delineation of the phenomena of light and movement and color of wave forms under remarkable sky effects. His representative works include: "Au bords de la Mer" and "Shipwrecked, Coast of Brittany" (1881); "Harbor of Concarneau," "Pebble Beach" and "Breton Garden" (1884); "En Arcadie" (1885), Luxembourg Gallery, Paris; "Nymph," Royal Museum, Dresden; "Les Amateurs," Chicago Art Institute; "Twilight" (1884), Museum of Fine Arts, St. Louis, and "Landscape" (1897), Museum of Fine Arts, San Francisco.

HARRISON (Lovell) Birge, artist, was born in Philadelphia, Pa., Oct. 28, 1854, son of Apollus Wolcott and Margaret (Belden) Harrison. He received an academic education, and in 1876 went to Paris, where he entered the atelier of Carolus Duran. Two years later he entered the Ecole des Beaux Arts, and studied under Alexandre Cabanel for four years. Going to Pont Aven, Brittany, he painted his first important picture, "November," which was exhibited at the Salon of 1882, and which was purchased on varnishing day by the French government. The following year his health broke down, and he spent several years in travel, twice circumnavigating the globe. While remaining for some time in Ceylon, Australia, the South Sea Islands, California and Arizona, he produced a series of illustrated articles for "Harpers," "Scribner's," and the "Atlantic Monthly," but did very little painting. In 1885 he exhibited "The Surprise" at the Paris Salon. Having regained his health, he settled at Santa Barbara, Cal., in 1890, and painted there for five years, making occasional trips to Paris. He finally left California in 1896, and removed to Plymouth, Mass., where for the last few years he has devoted himself largely to the study of winter landscapes. Early in his artistic career he painted figures in the open air, but gradually drifted into the production of landscapes, pure and simple. His work is marked by a love of evanescent effects—moonrise over a mysterious, shadowy landscape; winter twilight after snow; the harbor ice in moonlight—these are among the subjects which find expression through his art, and a commonplace New England village, with its prim houses, rendered by him, is poetic and charming. Among his important paintings are: "The Return of the Mayflower";

Thomas Alexander Harrison

Birge Harrison

"Moonrise off Santa Barbara," Paris exposition (1900); "Moonlight on the Snow" (1899); "Winter Sunrise in New England" (1900), and "Morning on Eel River." Mr. Harrison is represented in the Museum of Marselles, the Pennsylvania Academy of Fine Arts and the Chicago Art Institute. He received a silver medal at the Paris exposition of 1889, the unique medal at the Columbian exposition of 1893, and a medal at Buffalo (Pan American exposition). He is a member of the Society of American Artists; Players' Club; Century Club, Old Colony Club; St. Botolph Club, Boston, and a fellow of the Pennsylvania Academy of Fine Arts. He was married: first, in 1883, to Eleanor, daughter of John Ritchie, of Melbourne, Australia; second, to Jennie S., daughter of A. M. Harrison, of Plymouth, Mass.

GUY, Seymour Joseph, artist, was born at Greenwich, Kent, England, Jan. 16, 1821, son of Frederick Bennet and Jane (DeKyer) Guy. He was educated at a day-school in Surrey, under an excellent teacher. At the age of nine he was left an orphan, and when he was thirteen years old he was told by his guardian to consider what trade he would follow. He chose to be either a civil engineer or an artist. Neither of these professions met his guardian's views, and by way of assisting him in his choice he was allowed no pocket money until he had made a decision. Nothing daunted he took up sign-writing, and earned money enough to purchase all the art materials he needed for practice. At fifteen he was apprenticed in the oil and color trade for seven years; but, after becoming his own master, he was articulated, in 1847, to Ambrosini Jerome, a London portrait painter. He made many copies of old masters and painted portraits with much success in London, until 1854, when he came to America. Since that time his style of work has entirely changed. He has painted many genre pictures of domestic life and of figures out-of-doors, and gives great care to every detail, yet with such art that the painting does not appear labored. He has made a specialty of candle-light effects, and has studied the problems of artificial light scientifically. Among his portraits are those of W. H. Vanderbilt (first of that name); Mrs. Philip Van Volkenburgh; Daniel A. Heald; Mrs. Hart, mother of William and James Hart, and Miss Mary Banks; and among the genre paintings: "Making a Train," owned by W. L. Elkins; "The New Story," owned by Andrew Carnegie; "Mother and Child," owned by John S. Kennedy; "Taking a Rest"; "The Orange Girl," and "Look, Mamma!" He is a member of the National Academy of Design; Artists' Fund Society, and the Artists' Mutual Aid Society, in all of which he has held office. He is also a member of the Century Association.

FRENCH, Frank, wood engraver, was born at Loudon, Merrimack co., N. H., May 22, 1850, son of Hiram and Lydia Wolcott (Bachelor) French, natives of the same town. His first ancestor in this country, Lieut. William French, of Halstead, Essex, England, and of Norman descent, emigrated to Massachusetts in 1635 in the ship Defence, embarking at London. He settled in Cambridge, his home lot being on Dunster street. Mr. French's mother was the granddaughter of a revolutionary soldier, and was descended also from Rev. Stephen Bachiler, first minister of Hampton, N. H., a Puritan clergyman of great influence. He was noted not only for his preaching, but also for his fine features, large and penetrating eyes, and gravity of manner, characteristics that still appear among his descendants, and were conspicuous in the case of Daniel Webster, John G. Whittier and his sister, Elizabeth, Caleb Cushing and William Pitt Fessenden. Samuel French, father of Hiram, was town

clerk of Loudon for sixteen years, chairman of the board of selectmen for eighteen, and sheriff for a long period. For two years he represented the town in the legislature, and also served as judge by appointment of the governor. The desire to become an artist was awakened in Frank French when he was a mere child, and with the help of a sister, he began to make pencil copies of pictures and natural objects. At the age of twenty he obtained a set of wood engraver's tools, and under the direction of Henry W. Herrick in two weeks' time produced some very creditable work, which was brought to the notice of the editor of the Manchester (N. H.), Weekly Mirror and Farmer. A commission to engrave illustrations of the stock and prize poultry for that journal followed, and later several Boston publishers employed his services. In 1870 he decided to make wood engraving his profession, and in 1872 removed to New York city under engagement by the American Tract Society. Two years later he began working independently, and five years later became associated with John G. Smithwick in a general engraving business, a number of men who were subsequently prominent in this branch of art being their assistants. Since the dissolution of this partnership, which continued for a number of years, Mr. French has been an independent worker, contributing to the "Century" and "Scribner's" magazines and to volumes by various authors. He drew and engraved the illustrations to "Home Fables and Heart Flowers" (1881), of which book he was also the author. The poems accompanying the pictures were written by Mrs. Margaret E. Saenger. He has also contributed to "Scribner's Magazine" several articles, the illustrations to which were original and were engraved by him. These are: "Wood Engravers in Camp" (1889); "A Day with a Country Doctor" (1890); "A New England Farm" (1893); "Country Roads" (1896), and "Trees" (1900). Besides engravings of original designs,

he has exhibited paintings in oil and water colors, including portraits, two of which, of Hon. Charles F. Joy, of St. Louis (1900) and of William Footho, Esq. (1900), are excellent examples of his skill with the brush. Mr. French is a member of the Society of American Wood Engravers, and was one of a committee of three chosen to select and superintend the making of a "Portfolio of Proofs," consisting of examples of the best work of the members. He also served on the jury for etchings and engravings at the Columbian exposition, receiving a medal at that time, and on a jury to select the etchings and engravings sent to the Paris exposition of 1900. For etchings shown at the Pan American exposition, at Buffalo, 1901, he was awarded a silver medal. He is a member of the Kit Kat Club and Artists' Fund Society. He was married in Brooklyn, N. Y., April 22, 1875, to Alice, daughter of William and Rosina (Shaw) Hendricks. They have a son and a daughter.

COX, Louise Howland (King), artist, was born in San Francisco, Cal., June 25, 1865, daughter of J. C. King. Removing to New York city, Miss King studied at the Academy of Design in 1882, and later at the Art Students' League, under Kenyon Cox, to whom she was married in 1892. She was for some time occupied with decorative work, chiefly designing for stained glass. Her first im-

portant painting was "The Lotus Eaters," exhibited at the National Academy of Design, 1887, at the Paris Exposition, 1889, and at the Columbian Exposition, 1893. She was elected a member of the Society of American Artists in 1893, on the merits of a picture entitled "Psyche," and since that time she has been a constant contributor to its exhibitions. She also exhibits at the National Academy, the Pennsylvania Academy of Fine Arts, the Architectural League and the Carnegie Institute. Mrs. Cox took the third Hallgarten prize at the National Academy of Design, 1897, with "Pomona," and she received a bronze medal at the Paris Exposition of 1900 for a portrait of her little son, "Leonard." Among other pictures are "The Fates" (1894); "Angiola" (1897); "The Rose" (1898); "Rosaly" (1898), and "Madonna" (1900). Her paintings are highly decorative in composition and effective in color, and are notable for their beauty of form.

MORAN, Edward, artist, was born at Bolton, Lancashire, England, Aug. 19, 1829, eldest son of Thomas and Mary (Hickson) Moran. His father was a hand-loom weaver, and at an early age he himself was put to the loom, but took little interest in his work. A neighbor, who was a Frenchman,

possessed great skill in cutting figures from paper and gave the boy lessons, showing him also how to utilize these in stencilling indoor decorations. As a natural result Edward Moran made drawings upon everything within reach, even the white cloth upon his loom, and was dismissed, with a gentle reprimand. In 1844 the family, including six children, emigrated to Maryland, and all who were able to earn a living resumed their occupation of weaving. But Edward finally rebelled, and walking to Philadelphia, found employment in a cabinet-maker's shop. He engaged in various trades, but spent his leisure time in drawing and painting. Entering the

studio of James Hamilton he soon gained greater freedom in the use of colors, and began to acquire a style of his own. He opened a modest studio, and was able to earn a little money by drawing on stone for a lithographer, but the struggle for existence was so hard that Moran was about to return to the loom, when a former employer came to his assistance and interested several gentlemen in him, one of whom, Harrison Earle, gave the artist his first commission. The Moran family now removed to Philadelphia, and the younger brothers, one by one, became the pupils of Edward. In 1861 he went to London with his brother Thomas, and spent several months in studying the masterpieces in the National Gallery, a number of which he copied. From 1862 until 1869 he lived in Philadelphia, and was the central figure of the Bohemian Council, a group of actors, literary men and musicians, including Joseph Jefferson, Louis James, F. F. Mackey, Barton Hill, Coudlock, Craig, A. Everly and T. Bishop. Mr. Moran was for a time a member of the Pennsylvania Academy of Fine Arts, but becoming dissatisfied with the slighting treatment local artists received from its directors, refused for several years to contribute to its annual exhibitions. In 1868 he sent four pictures, selecting what had been praised as his most creditable efforts, but he did not

consider that they had been properly and fairly hung, and on "vanishing day" he removed one canvas from its frame and covered the others with a temporary glaze. To punish him the pictures were placarded to the effect that they had been defaced by the artist after they were placed by the committee, and people flocked to see them. The newspapers of the city and the public generally, sided with Moran, and they were purchased by Matthew Baird, who exhibited them as the "expatriated pictures," thus giving the painter the best possible advertisement. In 1872 he removed to Staten Island, N. Y., but before leaving he held an exhibition of his works for the benefit of the sufferers of the Franco-Prussian war. For this exhibit he published the first illustrated catalogue printed in this country, the illustrations being drawn by him on stone, and he painted a special picture, "Relief Ship Entering Havre," which the Union League Club of Philadelphia bought for \$800. In 1878 Moran made a second visit to Europe, spending most of his time in Paris, until 1880, when he settled in New York city. His works, chiefly marines, and in both oil and water colors, include: "View on Delaware Bay" (1867); "Evening on Vineyard Sound" (1867); "Coast Scene Near Digby" (1868); "Departure of the United States Fleet for Port Royal" (1868); "Pinchin Castle, North Wales" (1867); "Launching of the Lifeboat" (1865); "Moonrise at Nahant" (1867); "After a Gale" (1869); "On the Narrows" (1873); "The Lord Staying the Waters" (1867); "Commerce of Nations Paying Tribute to Liberty" (1880); "Young Americans Out on a Holiday" (1882); "Life Saving Patrol"; "New Jersey Coast" (1889); "Melodies of the Sea" (1890), and "South Coast of England" (1900). A series of historical paintings, thirteen in number, two of which were exhibited at the Columbian exposition (1893), was completed in 1899. These represent thirteen epochs in the marine history of America, from the landing of Leif Erickson in 1001 to the return of Adm. Dewey in 1899. The scheme was a novel one, the artist felt the inspiration of his theme, and not only sustained his reputation as a marine painter, but created an imperishable monument for himself. Many critics consider the first in order, "The Ocean, the Highway of All Nations," to be the masterpiece of the series. He was married, first, in 1859, to Elizabeth McManes, by whom he had two sons, Leon and Percy, who are well known as figure painters.

He was married, second, in 1869, to Annette, daughter of Selou and Marie Parmentier, and granddaughter of the noted scientist, Selou Parmentier, who introduced the potato into France, and was decorated by Louis XVI, as a public benefactor, and honored by a statue erected in his native town, Bordeaux. Mr. Moran died in New York city, June 9, 1901.

MORAN, Leon, artist, was born in Philadelphia, Pa., Oct. 4, 1864, son of Edward and Elizabeth (McManes) Moran. He studied at home under his father and in England and France in 1878, later also at the National Academy. He opened a studio in New York in 1880, and exhibited paintings at the National Academy, which placed him among the popular representatives of his profession. His works include: "Borders of the Marne" (1881); "Feeding the Fowls" (1882); "Mountbanks" (1883); "Duel," "An Amateur," "Outpost" (1884); "Waylaid" (1885); "Interrupted Conspiracy" (1886); "An Idyl,"

Edward Moran

Leon Moran

"Eel-Fishing," and "Intercepted Despatches"; "Madonna and Child" (1898); "Between Two Fires" (1901), and "Dad's Wish" (1901). He received a gold medal in 1893 from the Art Club of Philadelphia for his water-color, "My Country Cousin." He is a member of the American Water-Color Society. He was married, in 1892, to Helen, daughter of Rev. J. Nevett Steele, rector of Trinity Church.

MORAN, Peter, painter and etcher, was born in Bolton, Lancashire, England, March 1, 1812, son of Thomas and Mary (Hickson) Moran. At the age of three he was brought to America by his parents, and when sixteen years old was apprenticed by his father to learn the trade of lithographic printing in Philadelphia. He gave it up after a short time to devote himself to painting, and in 1859 became the pupil of his brothers, studying landscape painting with Thomas and marine painting with Edward. Finding that animal painting was his forte, he began to study Lambinet's works, and afterwards those of Troyon and Rosa Bonheur, also grounding himself thoroughly in animal anatomy; meantime he supported himself as a scene painter and as an actor of small parts with Mrs. John Drew in the Arch Street Theatre. In 1863 he went to London to study Landseer and other English masters, and in the following year returned to Philadelphia, where he has since followed his chosen profession. Among his first productions was a large animal painting which he sent to the Philadelphia Academy exhibition, where, before the public opening, it was bought by Matthew Baldwin, of that city. In 1867 he was elected a member of the Artists' Fund Society, and in 1868 of the Pennsylvania Academy of Fine Arts. Peter Moran has never been connected with any particular school of painting; a close student of nature, his pictures are truthfully composed, fine in tone, and are executed with much feeling. Among his more important works are: "The Thunder Storm" (1873); "A Fog on the Sea Shore," and "Troublesome Models" (1874); "The Settled Rain"; "A Sunny Slope," and "The Return of the Herd" (1875), the latter receiving a medal at the Centennial exhibition; "Sand Hills, Atlantic City," and "The Return from the Market" (1876); "Spring," and "Twilight—Sheep Returning Home" (1877); "Stream Through the Meadow"; "Country Smithy," and "Near the Sea" (1880); "Corral, New Mexico"; "Pasture Land," and "Going to the Hunt" (1881); "Snake Dance at Walpé"; "Harvesters," and "The Challenge" (1882); "Down the Arroyo to Santa Fé"; "Wolves on the Buffalo Trail," and "Pueblo of Zoa" (1883); "Scout on the Teton Basin," and "Santa Barbara Mission" (1884); "Noonday"; "On the Downs," and "The Stable Door" (1886). Since 1875 Mr. Moran has devoted much time to the study of etching, and has reached the first rank in that branch of art; he received a medal at the Centennial exhibition for a set of fifteen etchings of animal subjects on copper. Since then he has issued more than 200 signed plates, including many of Western subjects. He has contributed etchings and paintings in water-colors to the American Water-Color Society and other exhibitions. His etching, "Chariot Race in the Circus Maximus," executed in conjunction with S. J. Ferris, is a masterpiece, and is considered one of the most important works of the kind produced in America. Mr. Moran is president of the Philadelphia Society of Etchers; a member of the Philadelphia Art Club, and was for eight years vice-president; a member of the Philadelphia Sketch Club and of the New York Society of Etchers. He was married, in 1867, to Emily, daughter of James Kelley, of Philadelphia, Pa., and he had two sons, Alfred and Charles. Mrs. Moran was her husband's pupil, and has pro-

duced a large number of etchings noticeable for boldness of line and picturesque effect.

FOSTER, Ben, artist, was born at North Anson, Somerset co., Me., July 31, 1852, son of Paulinus Mayhew and Lydia Ring (Hutchins) Foster. His father was a lawyer and for one term president of the state senate of Maine, and was descended from John Foster, Sr., of Salem, Mass., and Abbie, daughter of Ralph Tompkins, who came to New England in the *Truelove* in 1635. His great grandfather, Samuel Foster, was a corporal in Capt. Dexter's company, Col. Angelo's Rhode Island battalion, during the revolutionary war. He was directly related to Thomas Mayhew, once owner of Martha's Vineyard, Nantuxet, and the Islands lying between, to Isaac Albertson, fifth signer of the Mayflower compact, and to Robert Cushman, who came over in the *Fortune* in 1621. Mrs. Foster's grandfather, Capt. Samuel Hutchins, fought in the battle of Bunker Hill. Mr. Foster developed a love for art at an early age, and has painted more or less since he was eight years old. When he was about fifteen years of age he went to New York, where he was employed in mercantile business until he was about thirty, when he decided to devote himself to art. After studying under Abbott Thayer and at the Art Students' League he went to Paris in 1886, and continued his studies under Olivier Mer-

son, Aimé Morot and Harry Thompson. He exhibited at the Salon there, and since his return to New York city in 1887 has been regularly represented in the exhibitions. He received medals on four oil paintings shown at the World's Columbian exposition, and a prize for a water-color painting shown at Cleveland, O., in 1895. He has given much attention to the painting of landscapes and sheep, but his favorite subjects are night effects and woodland scenes, and his compositions are marked by a large feeling of unity. Poetical in aspect, his pictures contain sterling qualities of color drawing and construction. He attributes his success to that diligence which is prompted only by love for one's chosen profession. His studio is in New York city. Among his more important works are: "A Dreary Road"; "Fontainebleau Forest"; "A Maine Hillside"; "First Days of Spring"; "All in a Misty Moonshine"; "A Windy Night"; "The Evening Star"; "Now the Day is Over," in oil colors, also "The Day is Done," "The Shepherd," "The Swineherd" and "The Laggard," in water-colors. He is an associate of the National Academy of Design; a member of the Society of American Artists; the New York Water-Color Club; Reform Club; Lotus Club and National Arts Club. He is represented in the permanent collections of the Boston Art Club and the Montreal Art Association. His oil painting, "Lulled by a Murmuring Stream," exhibited at the Paris exposition of 1900, was purchased by the French government for the Luxembourg gallery, and only one other American artist living in this country, Winslow Homer, received this honorable distinction. In the autumn of 1900 he was awarded the silver medal and the prize of \$1,000 at the Carnegie Institute in Pittsburgh for his canvases, entitled "Misty Moonlight," and in the spring of 1901 the Webb prize for the most meritorious landscape in the Society of American Artists' exhibition painted by an American.

CHURCH, Frederick Stuart, artist, was born at Grand Rapids, Mich., Dec. 1, 1842, son of Thomas B. and Mary Elizabeth Church, both from New England stock. Except for a period of three years, during which he served in the civil war as a private, Mr. Church was engaged in business until he was twenty-six, when he found himself irresistibly drawn to the career of an artist. His training was begun at the Chicago Academy with Walter Shirlaw, and continued at the National Academy, New York city, under Prof. Wilmurth, consisting of about two winter courses altogether; but his development has been of the most independent sort, gaining character through persistent study of nature, and growing in individuality under his untiring efforts to express the countless shapes suggested by his fertile fancy. His first popularity was gained by his drawings in black and white, always original in conception and treatment; his more serious work in oil and in water color following these successes shows in a multitude of ingenious conceits the grace and beauty with which he invests the most fantastic design. His pictures are marked by much charm of color, the delicate hues being woven into a thoroughly harmonious ensemble, by charm of pose in the figures and by the decorative effect of the composition. "Una and the Lion,"

"The Lion in Love" and "Beauty and the Beast" are familiar examples of his graceful realization of purely fanciful themes. He paints animals with a thorough knowledge of his subjects, however unrealistic the treatment may be. Mr. Church also enjoys a high reputation as an original etcher. Among his more important paintings are: "Sea Princess," "Back from the Beach" (1879); "Musk Rats' Nest" (1880); "The Fog" (1881); "A Willing Captive" (1883); "Retaliation" (1884); "Peacocks in the Snow" (1885); "The Sorceress"; "Pegasus Captured"; "Witch's Daughter"; "Pandora"; "Sorceress"; "Viking's Daughter"; "St. Cecilia"; "Knowledge is Power"; "Who Are You?";

"Sea Serpent"; "White Swans"; "Evening"; "Sea Lions"; "Earth"; "Air"; "Water"; "Mermaid and Sea Wolf"; "Madonna of the Sea"; "The End of Winter"; "Beauty and the Beast"; "Spring Song"; "Twilight"; "Shepherdess"; "The Chaffing Dish," and "Twilight." He is a member of the American Water-Color Society, the National Academy of Design and the Society of American Artists.

NOURSE, Elizabeth, artist, was born at Mount Pleasant, Cincinnati, O., 1860, daughter of Caleb Elijah and Elizabeth Le Breton (Rogers) Nourse. Her earliest American ancestor was Francis Nourse, whose wife, Rebecca (born at Yarmouth, England, in 1621), was hanged for a witch at Salem, Mass., in 1692. The records of the time say, "The jury, moved by her innocence, brought in a verdict of not guilty, and the court sent them out with instructions to find her guilty." Her great-grandfather Nourse, was a revolutionary soldier. Her father, a native of Concord, Mass., removed to Ohio, and was a banker in Cincinnati. The daughter began her studies in the Cincinnati Art School in 1872, and was an exhibitor when she went to Paris in 1887. She entered the Academie Julian, studying under Boulangier and Lefebvre, and afterwards became a pupil of Carolus Duran and Henner. She made her debut

in Paris at the Salon of the Champs Elysees in 1888, exhibiting "A Mother," and in the following year, "Among Neighbors" and "In the Sheepfold." Since the foundation of the Société des Beaux Arts, in 1890, she has shown the following paintings at its exhibitions: "In the Country"; "The Last Bit" (1890); "Good Friday in Rome"; "The Pardun of St. Francis of Assisi" (1891); "Family Repose"; "The Morning Toilet" (1892); "In the Church of Volendam" (Holland); "On the Banks at Volendam"; "The Luncheon" (1893); "In the Fields" (1894); "The First Communion" (1895); "Grandfather's Feast"; "A Humble Household"; "Mother and Babe" (1897); "Motherhood"; "In the Pasture"; "Under Shelter"; "Thirst" (1898); "The Watch"; "Midsummer" (1899). She has also produced a number of portraits in oil, pastel and water-color, besides medallions in bas relief and miniatures. Her paintings, well conceived and solid in execution, are marked by great variety in composition and handling. Miss Nourse has taken medals at Chicago (1893); at Carthage (1897); a gold medal at Nashville (1898), and a silver medal at the Paris exposition (1900). She is a member of the American Art Association, Paris; Women's Art Club, New York city, and an associate member of the Société des Beaux Arts, Paris. She was elected societaire in 1901, the highest honor bestowed by the Beaux Arts in any of its sections.

HOMER, Winslow, artist, was born in Boston, Mass., Feb. 24, 1836, son of Charles Savage and Henrietta M. (Benson) Homer, and descendant of Capt. John Homer, of Boston, 1670; the Bensons were among the settlers of Hingham, Mass., and like the Homers, they are a long-lived and vigorous race. When Winslow Homer was six years of age the family removed to Cambridge, and about that time he began to make drawings in crayon and pencil, many of the latter adorning school books to the displeasure of his teachers. In 1854 his father apprenticed him to a lithographer in Boston, with whom he remained two years, proving so satisfactory that the bonus of \$300 usually demanded of apprentices was remitted. Having more skill than the other employees he was given original work to do, including title-pages for sheet music, published by Oliver Ditson, and a group of the members of the state senate. On completing his apprenticeship he took a room in Ballou's "Pictorial" building, and began an independent career, his first production being a street scene in Boston. In 1859 he settled in New York city, opening a studio in Nassau street. He took lessons in painting from Frederick Rondel, an artist of some note, and attended a night school at the Academy of Design, then in Thirteenth street. In 1861 he was commissioned to make sketches of scenes at the inaugural of Pres. Lincoln and at the front, for "Harper's Weekly," and crossed the Potomac with the first volunteers. Subsequent visits were made, independently, to the Army of the Potomac, and in 1863 Mr. Homer exhibited two pictures at the Academy of Design, "The First Goose at Yorktown" and "Home, Sweet Home," which made a strong appeal to the patriotic feelings of visitors to the galleries and elicited praise for their faithfulness to life. They were followed, in 1865, by "Prisoners at the Front," in which the figures were portraits, and this, with others, was exhibited at the Paris Salon of 1867. He spent the year 1867 in Paris, studying from models, but without instruction, unless the indirect influence of John L. Farge be taken into account, his friendship and work giving Homer a decided impulse. He returned to New York city in 1868, and in 1882 removed to his present home at Scarborough, Me. His "Snap the Whip" and "The American Type" were exhibited at the Centennial

exhibition, Philadelphia, 1876, and "Snap the Whip" and the "Country Schoolroom" at the Paris exposition of 1877. In her work, "Six Painters," Mrs. Schuyler Van Rensselaer states that his work was much noticed in Paris on account of its national flavor, and "much praised by critics who saw its technical shortcomings, but forgave them because of the genuine transatlantic sentiment that was expressed." Of these and other early works the same writer has said: "Looking back at them to-day they seem most remarkable for their revelation of a bold, unguided effort to paint outdoor nature as it actually appears, and to translate its broad effects rather than its details. Crude, harsh and awkward though they were, there was the true breath of life in them all, an accent in every line and tone which proved that they had been painted face to face with facts. I think we must place Winslow Homer first in time among the many real outdoor painters of landscape whom we have to-day, and certainly he was the first among our outdoor painters of the figure." Among his early canvases were several depicting negro life, a line of genre in which he is peculiarly successful: "Eating Watermelon" and "The Cotton Pickers" being two of them. About 1880 he exhibited a series of water-colors, marine studies, some made at Gloucester, Mass., which were so strong, so broad, so rich in color, that they marked a departure in his methods. After visits to England and the West Indies, Homer exhibited other water-colors, figure pieces chiefly, in 1883, which were still stronger, though simple in treatment, and for the first time showed a regard for composition. Among these were "A Voice from the Cliffs"; "Tynemouth"; "Inside the Bar"; the "Coming Storm," and "Norther; Key West." Among later works are: "Life Line" (1884); "Eight Bells" (1885); "Fog off the Banks" (1886); "Undertow" (1887), and "High Seas" (1894). The originality of his treatment, the marked individuality of his style, and the robust, vigorous character of his interpretations entitle him to the highest place in our native art; he seizes the spirit of his subject, whatever it may be, with a sort of grip that does not relax until he has imparted that spirit to his pictorial creation. Mr. Homer was elected an associate of the National Academy of Design in 1864, and an academician in 1865. He was awarded a medal at the Columbian exposition, 1893, and a gold medal at the Paris exposition, 1900.

NETTLETON, Walter Eben, artist, was born at New Haven, Conn., June 19, 1861, son of William Alfred and Eliza Lyman (Thomson) Nettleton. On his mother's side he is of Huguenot descent. His earliest American ancestor, Thomas Norton, emigrated from London to this country in 1630, and settled at Guilford, Conn. In infancy Walter was taken to Germany, where his father, who was a manufacturer, had business interests, and there he passed his early childhood. On their return to the United States his parents settled at Stockbridge, Mass., which has since been the artist's home. The son was fitted for college at the Hopkins Grammar School, New Haven, and, after a year's experience in business life in a Bridgeport factory, entered Yale University, where he was graduated in 1883, receiving oration rank. Several months were then devoted to European travel, when he resolved to devote himself to painting as a life work. He entered the Académie Julian, in Paris, and studied with but slight interruption under the French masters, Jules Lefèvre and Gustave Boulanger, until the spring of 1889, when he exhibited for the first time in the Salon and in the Exposition Universelle of that year in Paris. Since then he has been a constant exhibitor at the Salon, where he received, in 1892, an "honorable mention" for his picture entitled,

"December Sunshine." Mr. Nettleton has also been a frequent contributor to the National Academy of Design, in New York, and to the Society of American Artists, as well as occasionally to exhibitions in Boston, Chicago and the West. He was represented by six pictures at the World's Columbian Exposition, Chicago. Much of his time has been passed in Brittany, whence he draws inspiration for his paintings. Among his more important works may be mentioned: "A Dark Interior" (1888); "Left in Charge of the Farm Yard" (1890); "Watching for Return of Fishing Fleet" (1891); "Approach of Harvest Time" and "Teasel Gatherer" (1892).

GROVER, Oliver Dennett, artist, was born at Earlville, La Salle co., Ill., Jan. 29, 1861, son of Alonzo Jackson and Octavia Elmira (Norton) Grover, both natives of Maine. His father was distinguished as a writer and lecturer in the anti-slavery cause, a co-laborer with and intimate friend of William Lloyd Garrison, Theodore Parker, Parker Pillsbury, John G. Whittier, and the other abolitionists of that time. He was admitted to the bar of Massachusetts in 1841, and soon after removed to Earlville, Ill., where he began to practice law and continued his anti-slavery work, maintaining later a station on the "underground" railway. He was active in politics; was one of the organizers of the Republican party in the state, and was a delegate to the convention that nominated Lincoln for the presidency. He occupied a position in the treasury department in Washington during the first two years of the civil war; but with that exception never held public office, although twice nominated for U. S. senator and once for judge of the supreme court of Illinois. Oliver D. Grover entered the University of Chicago in 1877, but left at the end

Oliver Dennett Grover

of his sophomore year to study art, and going to Munich, Bavaria, entered the Royal Academy of Fine Arts. The following six years were spent there, and in the art schools of Venice, Florence and Paris. The masters whose instruction and influence were strongest and most valuable were Duvencek, the American painter, and Boulanger and Jean Paul Laurens in Paris. In 1885 Mr. Grover opened a studio in Chicago, and in 1887-92 was professor of painting in the art institute of that city. Portraits and figure compositions have occupied his attention chiefly. He has been a contributor to exhibitions both in Europe and America since 1880, when a portrait of a lady was shown in the International exhibition at Munich. The picture, "Thy Will Be Done," was awarded the first Yerkes prize at the World's Columbian exposition in 1893. Among other important works is a series of eight large panels, painted for the dome of the Branford, Conn., town library. These illustrate pictorially the text "The Evolution of the Book," and in addition there are eight decorative portraits of eminent poets and writers of New England. A decorative composition in the Holy Angels Cathedral in Chicago occupies a space 11x125 feet, and represents the celestial choir—the Holy Virgin, surrounded by hosts of adoring angels. This is one of the few

modern pictures executed directly on the wall of a building. Two figure compositions over the proscenium arch in Studebaker hall, Chicago, represent "Art" and "Music" respectively. Mr. Grover was president of the Chicago Society of Artists, is a member of the Society of Western Artists, the Municipal Art League and Chicago Art Association, and was chairman of the art section, world's congresses, held in Chicago in 1893. He has always been active in athletic sports; in college, in baseball and rowing; latterly in hunting, fishing and out-of-door sports generally. Mr. Grover was married in Detroit, Mich., Feb. 8, 1887, to Louise, daughter of Frederick and Therese (Hellings) Rolshoven, American citizens of German birth.

HEALY, George Peter Alexander, portrait painter, was born in Boston, Mass., July 15, 1813, son of William and Mary (Hicks) Healy. His father was a sailor, who, after numerous adventurous experiences as commander of a merchant vessel, went to Boston in 1812. George attended the public school and at the age of sixteen began to copy all the prints he could find and make likenesses of all who would sit to him. His first success was a copy on canvas of Guido Reni's "Ecce Homo," which a Catholic priest purchased for \$10 and placed in his church. His earliest serious encouragement came to him from Sully, who was in Boston painting a portrait, and who advised him to make art his profession. Seven years later they met in London, where Healy was engaged on a portrait of Audubon, and after looking in silence at it, Sully said: "Mr. Healy, you have no reason to regret having followed my advice." In 1831 he opened a studio in Federal street, Boston, but lacked sitters and was unable to pay his rent, until his landlord came to his rescue by ordering portraits of two members of his family, which were exhibited and attracted some attention. Seeing a very charming

ing portrait of a lady by Sully, Healy was seized with a desire to paint a woman's portrait, but knew not where to find a sitter. At the suggestion of a friend whose portrait he was painting, he called on Mrs. Harrison Gray Otis, the queen of fashion in Boston society. After examining his previous work, Mrs. Otis consented to sit to him, and his success was such that from that time he became known. But in spite of his great natural facility, his one object was to study. In April, 1834, he secured passage in a sailing vessel and while waiting in New York for a favorable wind, as was necessary in those days, he called on Prof. Morse, to whom he had a letter of introduction. Mr. Morse, who perhaps did not remember his own career with pleasure, said, somewhat bitterly: "So you want to be an artist? You won't make your salt!" "Then," answered Healy, "I must take my food without salt." Upon reaching Paris he entered the atelier of Baron Gros, one of the first French artists of his day. He had not been working there many months when he was invited by Sir Arthur and Lady Faulkner to accompany them to Italy. There he spent eighteen months, and then went to London. During his three years' residence in that city he had as sitters: Joseph Hume, the Radical member of parliament; Sir Arthur and Lady Faulkner; the duke of Sussex, uncle to Queen Victoria; Lady Agnes Buller, twin sister of the duke of Northumberland; Lord and

Lady Waldegrave, Audubon, Prescott, then minister to England, and Gen. Cass, minister to France. Healy assisted at the festivities of Queen Victoria's coronation, April 25, 1838. In the summer of 1839 he was recalled to France, where he painted the portraits of Marshal Soult and Louis Philippe; the latter commissioned him to make a copy of Stuart's Washington, besides portraits of many American statesmen, including those of Jackson, Clay, John Quincy Adams and Webster. About this time he executed his two large pictures, "Webster replying to Hayne," and "Franklin before Louis XVI.," the "Franklin" won a gold medal at the Universal exhibition, 1855. The revolution of 1848, however, deprived Healy of his royal patron and ended his fortune in France. He had frequently returned to this country and had painted many people of note, making staunch friends. Upon the warm invitation of William B. Ogden, of Chicago, he sailed for America and went to that city, where he painted an almost incredible number of portraits. Early in 1861 he visited Charleston, S. C., and was a witness of the bombardment of Fort Sumter. Going subsequently to Washington, he had sittings from Pres. Lincoln, Gens. Grant, Sherman and McClellan, Adm. Porter and many other celebrities. At the close of the war he conceived the idea of a picture to be called "The Peacemakers," which was carried out some years later. It represented Lincoln, Grant, Sherman and Porter on board the River Queen, discussing the possibilities of peace. This picture was burned in 1892, when the Calumet Club, of Chicago, was destroyed. In 1867 Healy returned to Europe and spent several years in Rome, where he painted Longfellow, Pope Pius IX., the Princess Oldenberg, then affianced to the duke of Weimar; the princess (afterwards queen) of Roumania; Liszt, and others. Returning to Paris, Gambetta and Pres. Thiers sat to him. In 1877 he went to Berlin and painted a portrait of Bismarck. In 1892 he returned to Chicago, where he remained until his death. He was married in the Church of St. Paul, London, in July, 1839, to Louisa Phillips. They had nine children. The two eldest boys died in childhood. Mr. Healy died June 24, 1894.

PLATT, Charles Adams, landscape architect and painter, was born in New York city, Oct. 16, 1861, second son of John H. Platt and Mary Elizabeth Cheney, his wife. His father (1805-87) was for many years one of the foremost members of the New York bar, having been a member of the firm of Slawson, Hutchins & Platt, and later of the firm of Hutchins & Platt. His grandfather, William Barnes Platt, was a prominent banker of Rhinebeck, N. Y.; his great-grandfather, John, served in the revolutionary war. The first of the name in this country, Richard Platt, was one of the founders of Milford, Conn., in 1639. His mother, daughter of George Wells Cheney, a silk manufacturer of South Mauchester, Conn., and Lovina Wilson, was a descendant of John Cheney, of Roxbury, Mass., 1655, and through her grandmother, Electra (Woodbridge) Cheney, from a notable line of Puritan clergymen beginning with Rev. John Woodbridge, of Stanton, England, first minister of Andover, Mass., and ending with Rev. Samuel, first minister of East Hartford, Conn. Charles Platt was educated in private schools in New York city, and at the Academy of Design and the Art Students' League. In 1882 he went to Paris, where he passed four years studying in the Académie Julian, under Bouguereau and Lefebvre, and exhibiting at the Salon. Returning to New York city, he has continued to work and to exhibit, and for several years has practiced landscape gardening and architecture as well. He is a member of the Society of American Artists and the Water Color Society, is an associate member of

the National Academy of Design, and also a member of the Century Association and Players' Club, New York city. Among his works in oil are: "Winter Landscape"; "Early Spring" (1884); "Clouds," awarded the Webb prize at the exhibition of the Society of American Artists, 1894; "Farm, Monte Mario," and "Snow," a landscape, for which he was awarded a medal at Paris, 1900. He received a medal at the Pan-American exposition, 1901. Mr. Platt is also well known as an etcher. He was married in Boston, Mass., July 17, 1863, to Eleanor, daughter of Hon. Alpheus and Caroline (Sumner) Hardy. They have two sons and a daughter.

LAMB, Joseph, artist, was born at Lewisham, Kent, England, July 31, 1831, son of Joseph and Elizabeth (Clark) Lamb. He was brought to this country in childhood by his father, who was a landscape gardener, and came to New York city to lay out the famous garden on Broadway for William Niblo. The father died soon after completing this work, and the son was educated under the guardianship of Peter Rennie, a Scotchman, who was well known in that city. Becoming impressed as a young man by the revival of Gothic architecture in England he determined to devote his life to ecclesiastical art. This work he began in the simplest way, and he was shortly afterward joined by his younger brother, Richard. Thus was established the pioneer house of J. & R. Lamb, which eventually became engaged in producing all kinds of ecclesiastical and memorial art—furniture, embroideries, glass and metal work—everything that is used in beautifying the church. During the forty years that he was in business he gathered the most skilled workmen in every branch of art, and watched with interest and critical eye each development of the craftsman's handiwork. His high ideals and devout spirit made his motto, "Art, not merely for art's sake, but art as an aid to religion," and this was carried out in his life work. Soon after the new firm was formed the civil war broke out, and Mr. Lamb went to the front at once with the 7th regiment, of which he was a member. Although of English birth, he was a typical American, and was associated with every movement that was made toward better citizenship and purer politics. He was identified with the movements for honest government, being an efficient co-worker with Seth Low in that direction. He formulated more inscriptions and arranged more designs in bronze and stone than probably any other person for the preservation of our natural scenery and the historical record of our country. He was married, July 31, 1856, to Eliza, daughter of Charles Rollison, a famous steel-engraver of old New York, and had four sons and one daughter. He died at his home in New York city, Dec. 13, 1898.

LAMB, Frederick Stymetz, artist, was born in New York city, June 24, 1863, son of Joseph and Eliza (Rollison) Lamb. He studied at the Art Students' League, under William Sartain, J. Carroll Beckwith and others. He then went to Paris and attended the classes at the École des Beaux-Arts, pursuing his studies in drawing and painting under the direct supervision of MM. LeFolvyre and Bonlangier. He also studied modeling under M. Millet, and, while in Paris, took the first place in competition for composition. On his return to this country he became interested in the possible development in the United States of decorative art, and associated himself with the various movements having the advancement of this phase in view. He received commissions for important mural decorations, among them a large canvas for the Bethlehem Presbyterian Church, Philadelphia, Pa., and interior work for Bethesda Church, Saratoga, N. Y., and St. Peter's Church, New York city. His attention being called to the possibilities

of American glass he made a careful study of the art of glass making. He received honorable mention for drawings submitted at the Chicago exposition; a gold medal for work exhibited at the Atlanta exposition, and an individual medal for the design of a window exhibited at the Paris exposition of 1900. In connection with the firm with which he is associated, he was one of the four glass workers invited to represent the United States at that exposition. Mr. Lamb is one of the organizing members of the Municipal Art Society, the National Society of Mural Painters and the National Arts Club; also a member of the Architectural League; an associated member of the National Sculpture Society and of the American Society for the Preservation of Scenic and Historical Places. He was for a number of years vice president of the Architectural League, and is, and has been, delegate to the Fine Arts Federation. He was secretary of the second commission for the preservation of the Palisades, and is secretary of the Municipal Art Society at the present time.

BIRCH, Reginald Bathurst, artist and illustrator, was born in London, England, May 2, 1856, only son of William Alexander and Isabella (Hoggins) Birch. When he was five years old his father was appointed director of the River Navigation Co. in Boulay, and the son was left with his grandfather, Dr. William Birch, in the island of Jersey. He received his early training at a school on the island and later attended St. Leonard's School for Boys at Hastings. His parents came to America in 1870, settling first in San Francisco, where father and son devoted their talents to the production of theatrical posters. The artistic work of the fourteen-year-old boy so excited the interest and admiration of the artist, Toby Rosenthal, that he invited the young man to share his studio. He made such remarkable progress that Rosenthal advised him to continue his studies in Europe, and in 1874 he went to Munich, where he studied for several years in the academy. Upon returning to America in 1881 he took up illustrating and his first work, which was done for the Century Co., of New York, resulted in a connection with that house which he still maintains (1901). Mr. Birch's work is one of the factors that have gained for his adopted country its high rank as the home of illustrated periodicals of the first class. Among the books he has illustrated the best known are: "Little Lord Fauntleroy," and his first great success, "Sara Crewe," by Mrs. Francis Hodgson Burnett; "Soldier Rigdale," by Marie Boulay Dix; "The Vizier of the Two-Horned Alexander," by Frank R. Stockton; "Lady Jane" and ballads by Virginia Woodward Clond; "The Durbey Book"; "Will Shakespeare's Little Lad" and the edition of "Silas Marner," published by Blackwood in 1899. Although his illustrations have appeared in various periodicals his work has been identified chiefly with the "Century Magazine" and "St. Nicholas." Mr. Birch's characteristics artistically are an exceedingly wide range of subjects, keen insight, remarkable freedom of execution, and above all, an interpretative sympathy of mind that renders him a consummate illustrator, and enables him to produce drawings that never cease to be artistic in achieving literary interest. He is a member of the Calumet and Salmagundi clubs, New York city.

CHAMPNEY, James Wells ("Champ") artist, was born in Boston, Mass., July 16, 1843, son of James H. and Sarah (Wells) Champney. After attending the public schools, at the age of sixteen he began his art education with Bricher & Russell, wood engravers, in Boston. In 1863 he enlisted in the 45th Massachusetts volunteers, raised for nine months' service, but held over the time of the battle of Gettysburg, in which regiment he served as corporal. In 1866 Mr. Champney went to Europe to study, and spent the period 1866-70 in Paris under the instruction of Edouard Frère, and at Antwerp as a pupil in the Academy of Fine Arts. The winter of 1869-70 was spent in Rome and that of 1871-72 in Paris, the intervening time being passed in Boston, where he had a studio. In 1873 he traveled through the southern states, making sketches for Edward King's work, "The New South." The year 1874-75 was spent in Europe, and during the Carlisle war he visited Spain for the purpose of making sketches for a periodical. In 1876 he built a studio at Deerfield, Mass., where he spends many of his summers, and for seven years was professor of art at Smith College. He is a member of the American Society of Painters in Water Colors and an associate member of the Academy of Design. His pictures of landscapes and general subjects include: "Which is Umpire?" (1871); "Sere Leaf" (1874); "Your Good Health" (1876); "Where the Two Paths Meet" (1880); "Indian Summer" (1881); "Bonny Kilmeny" (1882); "Hide and Seek" (1884); "In May Time" (1885); "Song Without Words" (1886); "Ophelia" (1890); "A Midsummer Morning" (1896); "Phœbe" (1897), and a series of decorations for the Manhattan Hotel (1898). It is a portrait painter, however, that he is best known, and his most interesting work has been done in recent years. In 1885 he began the use of pastel for portraits and ideal heads, and that year marks an important change in his life as an artist. His first sitters for works in this medium were the wife and daughter of Charles E. Carryl, of New

York city. Among other sitters have been Hon. John Bigelow, William E. Dodge, Jr., Henry M. Stanley, William Winter, Dr. Julius Sachs, Dr. Grace Peckham Murray, Mrs. Egerton, Miss Mary Manning as Daphne, Miss Grace Kimball as Betty Linley, and others prominent in society and professional life, besides many children. He has exhibited at the French Salon, and was represented at the World's Columbian exposition by portraits of Robert Collyer, Miss Suzanne Sheldon and Mrs. J. Wells Champney. In addition may be mentioned a number of "translations" from noted paintings in Euro-

pean galleries. These copies have been exhibited in the great cities of the United States and in England, France and America, and have attracted favorable comment from critics and connoisseurs. Mr. Champney was married at Manhattan, Kan., May 15, 1873, to Elizabeth, daughter of Judge Samuel Williams, of Springfield, O. They have two children: Edward Frère, a graduate of Harvard College, student of the École des Beaux-Arts, Paris, and an architect by profession, and Marie Champney Humphreys, a graduate of Vassar, who is an artist, making a specialty of miniature painting. Many of Mr. Champney's paintings and illustrations are signed "Champ."

CHAMPNEY, Elizabeth (Williams), author, was born at Springfield, O., Feb. 6, 1850, daughter of Judge Samuel B. and Caroline (Johnson) Williams. From early childhood she was surrounded by refining influences. She was graduated at Vassar College in 1869. She always desired to follow literature as a profession, and has written from the earliest years of girlhood. She made her debut as a writer for young people in the initial number of "St. Nicholas," contributing the dialect poem (illustrated by Mr. Champney), "How Pessimism Took Cah de de Baby." Her work did not attract general

notice, however, until "Harper's" and the "Century" magazines began to publish papers relating her experiences while traveling in England, France, Spain, Portugal and Morocco; these gave her a reputation, and since that time her pen has been busily employed. She has published more than thirty volumes, among the most successful of which are the "Three Vassar Girls" (1883 to 1890), a series of twelve volumes, written to interest girls in foreign travel. The first of these brought her solicitations from publishers for so many books for the young that she cannot find time to follow her bent for short stories and poems. Among other works from her pen are: "In the Sky Garden," a collection of fairy stories dealing with astronomy (1876); "All Around a Palette," art stories (1877); "Great-Grandmother's Girls," stories from American history (1887); "Howling Wolf and his Trick Pony" (1888); "The Bubbling Tea-pot," a wonder story (1889); "Six Boys" (1890); "Paddy O'Leary and his Learned Pig" (1896); "Pierre and his Poodle" (1897); "The Witch Winnie" series, eight books descriptive of art student life (1890-98); and for mature readers: "Rosemary and Rue," a romance of old-time life at Newport (1880); "Bourbon Lilies," a novel of art life in France; "Romance of the Feudal Châteaux" (1899), and "Romance of the Renaissance Châteaux" (1901), a collection of the romantic legends clustering around the old castles of France. She has written also "Dames and daughters of Colonial Days," stories of American history, not to mention upwards of a hundred magazine articles and short stories written for leading periodicals on art, travel, etc., generally illustrated by her husband. Among her historical works is "Great-Grandmother's Girls in New France," which was suggested by the massacre in Deerfield, Mass., where her ancestors lived and where she resides in summer. Mrs. Champney has given much time to philanthropic work. She was married, May 15, 1873, to J. Wells Champney, the artist, of New York, and has resided much in Europe.

QUARTLEY, Arthur, artist, was born in Paris, France, May 24, 1829, son of Frederick William Quartley. His parents were English, his father being a well-known engraver, who came to the United States in 1852, and was connected with several publishing houses. Much of his best work is in "Picturesque America" (1872), and "Picturesque Europe" (1875). He also painted "Niagara Falls," "Catskill Falls," "Butternilk Falls," and other landscapes. At the age of two Arthur was taken to London, where in 1848-50 he studied at Westminster. A year later he came to the United States, and lived for a time

Elizabeth W. Champney

James W. Champney

in Peekskill, N. Y., settling afterwards in New York city. Here he was apprenticed to a sign painter, and followed this trade for several years. In 1862-'73 he was engaged in business in Baltimore, Md., but devoted his leisure hours to painting, although he had never received any instruction. At last the inclination for art was too strong to resist, and in 1873 he opened a studio, where he devoted himself exclusively to painting. In 1875 he returned to New York, and there spent the rest of his life, with the exception of a short visit to Europe in 1885. He was elected an associate of the National Academy of Design, in 1879, and an academician in 1886. Arthur Quartley rapidly attained a high rank among the American marine painters, although entirely self-taught. He was one of the first to discover the pictorial possibilities of New York harbor, and made the picturesque effects of the bay and the docks and rivers the subject of a number of vigorous, freshly-painted compositions. His more important paintings are: "Low Tide," and "Oyster Season, Syn-potent Bay" (1876); "Morning Effect, North River," and "Close of a Stormy Day" (1877); "From a North River Pier-Head," and "An Afternoon in August" (1878); "Trinity From the River" (1880); "Queen's Birthday" (1883); "Lofty and Lowly," and "Dignity and Impudence" (1884); "Port of New York," and "The Coast of Cornwall." He died in New York city, May 19, 1886.

CARPENTER, Francis Bicknell, portrait painter, was born at Homer, Cortland co., N. Y., Aug. 6, 1830, son of Asaph H. and Elmira (Clark) Carpenter. The only instruction in art that he ever received was in 1844, when he studied for six months in the studio of Sanford Thayer in Syracuse. After returning to his native town he painted portraits there for some time, and in 1851 removed to New York city, where in the following year he was elected an associate member of the National Academy of Design. Among the prominent men who sat for Mr. Carpenter were four presidents, Fillmore, Lincoln, Tyler and Pierce; William H. Seward, Charles Sumner, George William Curtis, James Russell Lowell, Henry Ward Beecher, Schuyler Colfax and John C. Fremont. His famous historical painting of Lincoln reading the emancipation proclamation to the members of his cabinet, was painted in 1864. This was exhibited in many cities in the North, and was subsequently purchased for \$25,000 by Mrs. Mary Elizabeth Thompson, of New Hampshire. She presented it to the U. S. government, and it now hangs on the staircase of the house of representatives in Washington. His painting, "Arbitration," representing the signing of the treaty of Washington, was accepted by Queen Victoria, and was hung in her private historical collection. His portrait of Pres. Fillmore was purchased by the city of New York, and hangs in the city hall. While his greater fame was won as a painter, he possessed much literary ability, and was a frequent contributor to art journals and other periodicals. His "Six Months in the White House with Abraham Lincoln" (1866) was written from data compiled while painting the picture of the president. He was a generous patron of art in all its branches, and assisted many less fortunate members of his profession. Mr. Carpenter was married, in 1851, to Augusta, daughter of Francis R. Prentiss. They had two sons and one daughter, Mrs. Florence C. Ives. He died in New York city, May 23, 1900.

FISHER, Alvan, artist, was born at Needham, Norfolk co., Mass., Aug. 9, 1792. He was originally intended by his parents for a mercantile career, but this he abandoned for art, and in 1810 began the study of painting with Pennypacker, a decorative painter. The mechanical aptitude thus acquired was long a hindrance to his development. At the

age of twenty-two he began to paint portraits, but later undertook barn yard scenes, winter landscapes and cattle pieces. In 1825 he visited Europe, studying chiefly in Paris. Upon returning to the United States he again took up portrait painting, which he practiced for many years in Boston. He produced a number of graceful likenesses; his portrait of Spurzheim, painted from recollection after the latter's death, in 1832, is regarded as one of his best works. Mr. Fisher died at Dedham, Mass., Feb. 16, 1863.

MILLAR, Addison Thomms, artist, was born near Warren, O., Oct. 1, 1860, son of William H. and Permelia (Kennedy) Millar. His father, a native of Edinburgh, Scotland, emigrated to America in 1845, settling at Bazetta, O., and became a United Brethren minister. The son was educated in the public schools of Cortland, O., and took a few lessons in painting at Warren in 1876 from a local artist named John Bell. In 1877 he secured the first prize in a contest promoted by "The Youth's Companion," open to landscape artists under twenty years of age. In 1878 he won another prize offered by "The Youth's Companion," and in the following year a third. In 1879 he studied under De Scott Evans in Cleveland, O., and at the same time engaged in the painting of portraits. Removing to New York city in 1883, he studied at the Art Student's League, and in 1892 entered the Shinnecock School, conducted by William A. Chase. Since 1891 Mr. Millar has been a regular exhibitor at the National Academy of Design, the Society of American Artists, and in Boston, Philadelphia, Chicago and other places. In the fall of 1894 he went to Paris, where he opened a studio and continued his studies under Benjamin Constant, Henri Martin and Boldini, exhibiting a canvas at the Salon Champ de Mars. He spent the following summer in Laren, Holland, and in 1895 was a pupil of William M. Chase, in Madrid, Spain, where he spent much time copying in the gallery of the Prado. Since his return to America Mr. Millar has been permanently engaged in New York city, and has been represented in all the important exhibitions. He was also in Holland in 1900, painting interiors and portraits of Hollanders. He is a member of the Salmagundi Club. He was married in Cleveland, O., in 1882, to Janie, daughter of Francis and Jane Craft. They have one daughter, Dorothy Frances, born in 1898.

Addison T. Millar

WIGGINS, John Carleton, artist, was born at Turners, Orange co., N. Y., March 4, 1848, son of Guy Carleton and Adelaide (Ludlum) Wiggins. His paternal grandfather was an Englishman who emigrated to Canada previous to the war of 1812 and went from there to New York state, settling in Orange county. One of his sons, father of Guy Carleton, became a merchant tailor and clothier in Middletown, N. Y., removing in 1859 to Brooklyn, N. Y. His son, William T., brother of Carleton, served in the civil war as captain of the 49th New York volunteers and was killed in the battle of the Wilderness. On his mother's side his ancestors for generations have been natives of Orange county, one of this family, Capt. Swezey, was an officer in the Goshen company in the revolutionary war. Carleton Wiggins received his early education in the district schools at Middletown,

N. Y., and afterward attended the public schools in Brooklyn, where the family removed on the outbreak of the civil war. At the age of fifteen he left school to enter an insurance office in Wall street, New York city, but remained only two years, having no inclination toward a business career. He then took up the study of art under H. Carniencke, of Brooklyn, under whom he turned his attention chiefly to landscape painting. Subsequently, after having devoted some time to drawing in the National Academy, upon the advice and encouragement of his patron, Mr. Joseph Grafton, of New York, he studied with George Inness. He first exhibited at the Academy in 1870. After painting landscapes for several years with but little acknowledgment, either in an artistic or commercial way from the public at large, Mr. Wiggins decided to turn his fondness for cattle painting to account, having long admired the work of Troyon and Vou Mareke. He met with immediate success in this line and in 1881 went to Europe, where he spent several years in the study of great works of art in the public galleries and in painting from nature in the country. In the spring of 1881 he was admitted to the Paris Salon, exhibiting a "Shepherd and his Flock," which now belongs to a private collection in New York city. Among his best known works are: "The Wanderers" (1887), owned by the Hamilton Club, of Brook-

lyn; "Monarch of the Herd" (1888), owned by John Dailey, New York city; "Among the Rushes" (1889), and "Midsummer" (1899), all of which belong to private collections. He is represented in the Metropolitan Museum of Art by one of his best pictures, entitled "A Holstein Bull" (1892), which was presented by Joseph Grafton. "Cattle and Landscape," one of his largest and earliest canvases, is owned by the bishop of New Zealand, and "The Plough Horse" belongs to the

Lotos Club, while "Early Morning on the Hills" is at the Brooklyn Museum. Two pictures were shown at the Royal Academy exhibition in London in 1896 and reproduced in "Pictures of the Year" and "Royal Academy Pictures." "Mr. Wiggins is a man of thoroughly artistic temperament, in whom the development of a painter was due far more to his intelligent study of nature than to any school instruction. Although he has spent much time abroad he chooses principally American motives, and his pictures carry the evidence of their truth to nature. His technical skill is great, his color warm and vibrant, and his construction shows that he has a thorough knowledge of form. His work is highly appreciated and widely known, and his place in our art is definitely fixed." His pictures since 1880 are signed Carleton Wiggins. Mr. Wiggins is a member of the Union League and Oxford clubs of Brooklyn; the National Academy of Design; the American Water-Color Society; the Society of Landscape Painters; the Society of American Artists; the Artists' Fund Society, and a life member of the Lotos Club of New York city. He attends St. Bartholomew's Church in Brooklyn. Mr. Wiggins was married in Boston, in September, 1872, to Mary Clucas, of English parentage, having been born in the Isle of Man, the daughter of James and Esther Clucas. They have four children, Grace Carleton, May

Grafton, Guy Carleton and Grafton. His oldest son, Guy, is studying art in the National Academy of Design.

CRANE, Robert Bruce, artist, was born in New York city, Oct. 17, 1857, son of Solomon Bruce and Leah (Gillespie) Crane, the latter a native of Newburgh, N. Y. The Cranes, who, like the Gillespies, are of Scotch descent, settled at Easthampton, Long Island, on coming to this country, but removed to Cranford, N. J., about 1750. His great-grandfather lost his life in the revolutionary war and was buried in the graveyard of the historic First Presbyterian Church, Elizabeth, N. J. Bruce Crane inherited artistic talent from his father, who is an ornamental designer, and after being graduated at a public school entered an architect's office, where he remained for two years, 1875-77. He then became a pupil of Alexander H. Wyant and in 1879 exhibited his first picture at the National Academy of Design. This was entitled "An Old Mill Pond on Long Island." Since that time he has exhibited regularly, and many of his works have been reproduced in color. Mr. Crane's pictures interpret faithfully the varying effects of nature that appeal to him most forcibly, and his transcripts of spring and winter landscapes have, perhaps, brought him his greatest popularity. His methods are frank and direct, and his paintings are admired for their charm of color and truthful values. He belongs distinctively to the plain air school of landscape painters and chooses only native subjects. Among his later works are: "On Shrewsbury River"; "After the Rain" (1880); "Inlet on the Jersey Shore" (1881); "Suburban Road at Easthampton" (1882); "Winter" (1883); "Indian Summer" (1885); "November Woods" (1886); "Harvest Field" (1892), owned by Andrew Carnegie and exhibited at the World's Columbian exposition; "The Rainbow" (1896); "Long Island" (1897); "Clouds on the Way" (1899); "Brown and Sere," and "Peace at Night" (1900). For "Signs of Spring" he received the Webb prize at the Society of American Artists in 1897, and he was awarded a bronze medal at the Paris exposition of 1900, and a silver medal at the Pan-American exposition of 1901. As a teacher he has met with remarkable success. He is a member of the Salmagundi, Lotus, Arts and Water-Color clubs, and is an associate of the National Academy of Design; he has held various offices in connection with the Society of American Artists, the American Water-Color Society and the Society of Landscape Painters. He is fond of sailing, fishing and cycling and of gardening.

REINHART, Benjamin Franklin, artist, was born near Waynesburg, Green co., Pa., Aug. 29, 1829. His first instruction in the use of oil colors was received at Pittsburgh, where he began to paint, about 1844. Later he entered the National Academy of Design, New York city, and studied there for three years. He subsequently visited several western cities, painting portraits, and succeeded so well that at the age of twenty-one he had sufficient means for a journey abroad. He went to Europe in 1850, and for three years studied art in the schools of Düsseldorf, Paris and Rome successively, giving special attention to historical and genre painting. Upon his return to New York city he resumed the practice of portrait-painting and executed among others the portraits of James Buchanan, George M. Dallas and Judge Coulter. In 1861 he went to England and stayed there for seven years. When he returned to New York city he was engaged by the Geographical Society to paint a portrait of Judge Charles P. Daly, and by the Bar Association for one of Charles O'Connor. He was elected an associate of the National Academy of Design in 1871. He also traveled extensively in this

country, painting hundreds of portraits. Among the distinguished persons who sat to him were: the princess of Wales, the duchess of Newcastle, the countess of Portsmouth, Lady Vane Tempest, Lord Brougham, John Phillip, Thomas Carlyle, Lord Tenynson, Mark Lemon, Edwin M. Stanton, Gen. Winfield Scott, John C. Breckinridge, Stephen A. Douglas and Samuel Houston. His genre and historical paintings include: "Katrina Van Tassel," which has also been engraved; "Morning Greeting," of which two hundred thousand reproductions are said to have been sold; "Spring"; "Autumn"; "Nymphs of the Wood"; "Out Among the Daisies"; "Pocahontas"; "Evangeline"; "Cleopatra"; "Washington Receiving the News of Arnold's Treason"; "Consolation"; "After the Crucifixion"; "Young Franklin and Sir William Keith"; "The Regatta"; "The Pride of the Village"; "Baby Mine," and "Captain Kidd and the Governor." He died in Philadelphia, Pa., May 3, 1885. Charles Stanley Reinhart, the celebrated illustrator, is his nephew.

ELLIOTT, Charles Loring, artist, was born at Scipio, Cayuga co., N. Y., in December, 1812. His father, who followed agricultural pursuits and was also an architect, removed to Syracuse when Charles Loring was quite young, and placed his son in a store. The latter disliked his occupation, and devoted all his leisure hours to drawing and painting. About 1834 he went to New York city and became a pupil of Trumbull. Afterwards he worked with the figure painter, John Quidor, copying prints in oil, and winning favorable notice by two illustrations of scenes from Irving's and Paulding's works.

His first attempts at portraiture, however, were unsuccessful, but he gradually mastered many of the technicalities of his art. Thus equipped he returned to his native place, and was for several years engaged in the western parts of the state as a portrait painter. Upon his return to New York city he opened a studio, and there spent the greater part of his professional life. In 1845 he was elected an associate of the National Academy, and in the following year an academician. His reputation as an artist rapidly extended all over the country, and he executed about seven hundred portraits, among them those of Fitz-

Greene Halleck; James E. Freeman, belonging to the National Academy; Matthew Vassar, in Vassar College; Louis Gaylord Clark; W. W. Corcoran; James Fenimore Cooper; Govs. Bouck, Seymour and Hunt, in the New York city hall; Erastus Corning, in the state library, Albany; Sanford Thayer; Joseph Curtis and Van Cortlandt, of New York, and Church and Durand, the artists; etc. All these productions have been pronounced remarkable "for fidelity of likeness and vigorous coloring." A cabinet portrait of himself brought \$800 at the Avery sale, and his portrait of Fletcher Harper is considered a masterpiece by artists and critics. It was unanimously chosen by the committee who selected American pictures to be sent to the Paris exhibition as a typical American portrait. Several of his ideal works were exhibited at the National Academy in 1866, including "Don Quixote," "Falstaff," "Andrew Van Corlear, the Trumpeter," and a landscape, said to be the only one he painted, called "The Head of Skaneateles Lake." He died in Albany N. Y., Sept. 25, 1865.

C. L. Elliott

CONGDON, Thomas Richardson, artist, was born at Nelson, Tioga co., Pa., Oct. 30, 1859, son of Alfred Wickham and Mary Jane (Owens) Congdon. He attended the district schools and academy at Addison, N. Y. At the age of fifteen he went to Minnesota as apprentice to his brother, then master painter for the Northern Pacific railway at Brainerd. At the expiration of three years he engaged in

Thos. R. Congdon

business for himself. Having early in life developed an artistic tendency he began the study of portrait painting in 1882 under Alva S. Merriott, with whom he remained until 1887 and then removed to New York city and entered the Art Students' League, where he studied under William M. Chase, H. Siddons Mowbray and J. Carroll Beckwith for six years. In 1893 he went to Paris and studied three years in the ateliers of Benjamin Constant and Jean Paul Laurens, winning the Julian prize in 1894. In 1881 he was married to Ada Irene, daughter of Robert and Elizabeth Vose, of Thurston, N. Y. She also is an artist of considerable ability and was a pupil of L'Hermite in Paris. They spent three years in Paris and one year in Madrid, making a special study of Velasquez. Having visited Spain, Switzerland and Italy, both as artists and tourists, they returned to this country in 1896,

and resided in Buffalo for two years. They removed to New York city in 1898 and opened a studio, which two years later was totally destroyed by fire, the loss amounting to more than \$15,000 in works and furnishings. Mr. Congdon is primarily a portrait painter, but delights in producing genre pictures of peasant life; his summers are spent abroad, usually in Holland, in search of material. His first, and perhaps best, salon picture (1896) was a portrait of his wife. "The Benediction," published as frontispiece in "Art Education," in May, 1897, is the best thus far of his genre paintings. In May, 1900, the Boston Art Club purchased his "Typical Dutch Home" for its permanent collection. He is a member of the Salmagundi Club of New York and the American Art Association of Paris. Mr. and Mrs. Congdon have been exhibitors in the annual art exhibitions of New York city for many years.

Ada I. Congdon

TICKNOR, Francis Orrery, physician, was born in Baldwin county, Ga., in 1822. He studied medicine in New York city and Philadelphia, and practiced as a physician near Columbus, Ga. His lyrics of the civil war were favorites in the South, and he is represented in Steadman's "Anthology" by "Little Giffen," and several other poems. A posthumous volume "Virginians of the Valleys and Other Poems," appeared in 1879, with a notice of the author by Paul H. Hayne. His wife was Rosa Nelson. He died near Columbus, Ga., in 1874.

POTTER, William Plumer, jurist, was born near Dubuque, Ia., April 27, 1857, son of James H. and Nancy (Naylor) Potter. His great-grandfather came from the north of Ireland about 1800, and settled near Pittsburgh, Pa. Shortly after William's birth his parents removed from Iowa to Baltimore, Md. After receiving preparatory training in the grammar and high schools and from private instructors, he entered Lafayette College, Easton, Pa., in the fall of 1875. He did not complete his college course, but relinquished it to accept a position in a national bank in Iowa. Having a strong predilection for the law he studied for that profession, and was admitted to the bar in Iowa in 1880. In 1881 Mr. Potter removed to Pittsburgh, and, after further reading, including a thorough course in patent law, was admitted to the Pennsylvania bar in 1883.

After practicing for about six years, he formed a partnership with William A. Stone, afterwards governor of Pennsylvania. His early association with banking developed a taste for economics, and he has for many years been a careful student of finance and kindred subjects, gathering a fine library in that field. His authority in corporation and fiscal mat-

ters gave him a leadership in the community, and he organized and developed to successful operations a number of financial institutions in Pittsburgh and vicinity, among which are the Mercantile Trust Co., Mercantile Bank, Central Accident Insurance Co., Citizens' Deposit and Trust Co., First National Bank of McKees Rocks, Ohio Valley Bank, Bank of Millvale, and the People's National Bank of Tarentum. In all of these he was a director and counsel. His practice at the bar, while touching generally almost every question at law, has been principally directed to corporation and commercial causes. In 1900 Mr. Potter was appointed a judge of the supreme court of Pennsylvania, to fill the vacancy created by the death of Chief Justice Green. He brought to that position a broad general equipment and a deep human sympathy which have made him a most valuable acquisition to the bench. His nature is genial and kind, and he is a thinking, active, influential and popular member of society. He was married, in 1884, to Jessie, daughter of M. L. Bacon, of Des Moines, and has two daughters.

LEIGH, Benjamin Watkins, senator, was born in Chesterfield county, Va., June 18, 1781. After being graduated at the College of William and Mary, in 1802, he studied law, and was admitted to the bar. He carried on a successful practice at Petersburg, Va., until 1813, when he removed to Richmond. He was elected from Petersburg to the Virginia legislature, before which body he presented a series of resolutions asserting the right of the legislature to instruct U. S. senators elected by it. He was chosen a member of the commission which revised the statutes of the state, and in 1822 served as a commissioner to Kentucky, conferring with Henry Clay in regard to an important land law. This statute, which was known as the "occupying claimants" law, was a vital one, threatening to annul the title which Virginia held upon certain lands lying within the state of Kentucky; but a satisfactory agreement was finally reached by these two representatives. From 1829 to 1841 he served as

reporter of the Virginia court of appeals, and was active in connection with the state constitutional convention of 1829-30. He was a member of the Whig party, and on March 5, 1834, was placed by them in the U. S. senate, where he took the place of William C. Rives, a Democrat, who had refused to obey instructions from the Virginia legislature, and had tendered his resignation. Sen. Leigh was elected to the position, but on July 3, 1836, he resigned his seat rather than co-operate with his opponents, who had meantime gained a majority in the legislature. From that time his life was spent in retirement. Twelve volumes of reports were published by him from 1829 to 1841, the title being, "Reports of the Court of Appeals and General Court of Virginia." The degree of LL.D. was given him by the College of William and Mary, in 1835. He died in Richmond, Va., Feb. 2, 1849.

BOULIGNY, Dominique, senator, was born in Louisiana, in 1773, where he received a public school education. Later he studied law, and upon his admission to the bar commenced practice in New Orleans. As a U. S. senator, he was elected in 1824, succeeding Henry Johnson, and he continued to represent Louisiana in the upper house of the national legislature from Dec. 21, 1824, to March 3, 1829. He was a man of military tastes, and during 1795 held command of a regiment. Sen. Bouligny died in New Orleans, La., March 5, 1833. His nephew, John Edward Bouligny, also attained prominence, becoming a congressman from the same state.

AUSTIN, Richard Wilson, lawyer, was born in Decatur, Morgan co., Ala., Aug. 26, 1857, son of John Hall and Mary (Parker) Austin. He was educated in the common schools, and the Loudon high school, and in 1873, began a special course in the University of Tennessee. He began reading law in the office of Honk & Gibson at Knoxville, Tenn., and finished with Cook & Corkhill, Washington, D. C., being admitted to practice in 1878. In 1879 he accepted a position in the post-office department under Judge D. M. Key, then postmaster-general, and remained two years. In 1881 he was appointed assistant doorkeeper of the 47th congress, and in 1883 was made special agent of the war department. After two years' service he resigned to accept the management of the Knoxville "Daily Chronicle" and continued in the position until that paper was consolidated with the "Journal." Then returning to his native city, he entered upon the practice of law, being shortly after made city attorney. He was twice the Republican nominee for congress in the 8th Alabama district against Gen. Joseph Wheeler, and increased the vote of his party by 2,400. In 1892 he was selected to represent his district in the Republican national convention at Minneapolis, and was chosen chairman of the Alabama delegation. Returning to Knoxville in 1893 he became editor of the Knoxville "Republican" and chairman of the Republican congressional committee. In 1896 he was one of the prominent Tennessee leaders for McKinley, and in July, 1897, was appointed U. S. marshal for the eastern district of the state, and was reappointed in 1901. Mr. Austin has always been actively interested in the chamber of commerce of Knoxville. On May 2, 1882, he was married to Margaret, daughter of J. L. and C. J. Morrison, of Chattanooga, Tenn. They have three children, Charles M., Jane and R. W., Jr.

W. P. Potter

R. W. Austin

MANTLE, Lee, senator, was born in Birmingham, England, Dec. 13, 1851, son of Joseph and Mary Susan (Patrick) Mantle. His father died before he was born, and in 1864 he emigrated with his mother to America, settling at Salt Lake City, Utah. For a few years he was employed on farms, later he was engaged on the construction of the Union Pacific railroad, west of Corinne, Utah, and witnessed the joining of the road with the Central Pacific. In 1870 he walked 125 miles to Malad City, where he met B. F. White, since governor of Montana, who employed him as a driver. Two years later he studied telegraphy and was given charge of a Western Union office at Pleasant Valley, Idaho, on the apex of the Rocky mountain range. There he remained for five years, acting as telegraph operator, stage agent and postmaster, and finally acquired an interest in the old Beaver Cañon toll road. In 1877 he sold this interest and went to Butte, Mont., where he opened an office for Wells Fargo Express Co. In 1879 he took charge of the first telegraph office opened at Butte; he was also the first insurance agent there. In 1880 he became actively engaged in the municipal affairs of Butte, was instrumental in securing its incorporation, and was elected one of its first aldermen. He organized the Inter-Mountain Publishing Co. in 1881; founded the "Daily Inter-Mountain," and made it a power in the Republican politics of the state. Subsequently he became the sole owner of the paper. He was elected a member of the lower house of the territorial legislature in 1882 and 1886, and served as a delegate to the Republican national convention at Chicago in 1884. In 1887 the Northern Pacific Railroad Co. under its grants laid claim to a vast area of mineral lands. To oppose the scheme the Mineral Land Association was formed, Mr. Mantle being made its permanent president, and largely through his efforts the railroad company was defeated. In 1888 he was chosen speaker of the lower house of the territorial legislature, and during this term used his influence to secure the passage of the registration law and the Australian ballot, which has since been adopted. In 1890 he served as chairman of the Republican state convention held at Butte, and was unsuccessfully nominated for the U. S. senate. Two years later he was elected mayor of the city by a large majority, was chosen chairman of the state convention held at Missoula, for the purpose of electing delegates to the Republican national convention at Minneapolis, and became permanent chairman of the Republican state convention held at Great Falls. When Sen. Sanders' term expired, in 1893, the legislature failed to elect a successor, and Gov. Richards appointed Mr. Mantle to fill the vacancy; but the senate denied the right of a

Lee Mantle

governor to appoint where the legislature, having the opportunity, failed to elect. However, in the following January, Mr. Mantle was unanimously elected by the legislature, on the first ballot, and was a member of the U. S. senate until 1899. He again served as chairman of the state Republican committee in 1894, and besides his political activity has also been busily engaged in the commercial development of Montana.

PERRY, Antonio, jurist, was born at Honolulu, Oahu, Jan. 5, 1871, son of Jason and Anna dos Anjos Perry. The Perry family is of Portuguese ancestry, but for some generations lived in the

Azores, where Jason Perry was born, from whence he emigrated in 1845, settling in Honolulu in 1851. There he became a merchant and was for some years Portuguese consul to Hawaii. He died in 1883. Antonio Perry was educated in the public schools of Honolulu and at St. Alban's and Oahu colleges. After completing his education he entered the law office of the Hon. Alfred S. Hartwell, one of the most prominent of the island attorneys, and after a due course of study and an examination by the justices of the supreme court was admitted to the Hawaiian bar on March 15, 1893. He immediately opened an office and commenced general practice, in which he continued until Sept. 1, 1891, when he was appointed district magistrate of Honolulu. He served as magistrate until Jan. 11, 1896, on which date he was appointed second judge of the circuit court of the 1st judicial circuit of the Hawaiian islands, which comprised the island of Oahu. In November, 1897, he was made first judge of the same court, which position he was occupying when the republic of Hawaii formally became a territory of the United States. This change resulted in the creation of a Federal court and a limitation to a certain extent of the jurisdiction of the local courts, and a partial change in their personnel followed. Judge Perry was appointed by Pres. McKinley one of the associate justices of the supreme court of the new territory, the supreme bench being composed of a chief and two associate justices. He received his commission and took the oath of office on July 5, 1900.

Antonio Perry

McILVAINE, Joseph, senator, was born at Bristol, Bucks co., Pa., in 1768. After completing an academical education he pursued the study of law, and removed to Burlington, N. J., where he was admitted to the bar in 1791. In 1800 he became clerk of the Burlington county court, and continued to serve in that capacity until 1823, acting at the same time as U. S. attorney for the district of New Jersey. To the latter office he was appointed by Pres. Jefferson in 1801 and held his position until 1820. In 1818 he was tendered an appointment as judge of the superior court of New Jersey, but declined the honor. He was a man who evinced unusual interest in military matters, attaining the rank of captain in McPherson's regiment of Blues as early as 1798; and in 1804 he received an appointment as aid de camp to the governor of New Jersey, with the rank of colonel. He was elected to the U. S. senate as a Democrat in 1827, taking the place made vacant by the resignation of Samuel L. Southard, and continuing to represent New Jersey in the upper house from Dec. 1st of that year until his death, which occurred at Burlington, N. J., Aug. 19, 1826. He possessed a high character and wielded a wide influence. His son, Charles Pettit McIlvaine, became a Protestant Episcopal bishop.

KEATOR, John Frisbee, lawyer, was born at Roxbury, N. Y., April 16, 1850, son of Abigail J. and Ruth (Frisbee) Keator, grandson of Cornelius Keator (1761-1855), a pioneer of the Catskill region, and a great-grandson of John Keator, whose father, John, was a native of Holland, and who settled in Ulster county, N. Y., about 1740. After several winters spent in school teaching, he became a student at Williston Seminary, Massachusetts. He was graduated at Yale College in

1877. While an undergraduate, he was champion light wrestler of his class, president of the Delta Kappa Society, editor of the Yale "Courant" for three years, and won a first prize in oratory. He made his professional studies at the University of Pennsylvania, where he received the degree of LL. B., in 1879, being immediately after admitted to the bar. His professional career has been marked by determination, perseverance and conscientious devotion to duty, and he has achieved high success as counsel for a number of important corporations and public enterprises. In 1890 he was admitted to the U. S. supreme court, before which he has appeared in a

number of important cases. In 1896 he was elected to the state legislature, and won an enviable record for unswerving fidelity to his constituents and to what he considered to be proper courses in legislation. He was one of the leaders of the famous "seventy-six," who in the session of 1897 distinguished themselves by determined opposition to measures threatening the interests of the people. He was re-elected in 1898. He is a vigorous speaker, an able parliamentarian, and a convincing debater, thoroughly versed in the political situations of his state and city and, an aggressive

opponent of "bossism." He is a member of Psi Upsilon Fraternity; the Wissahickon Wheelmen's Club; past master of Harmony Lodge, F. & A. M., and a member of the Jr. O. U. A. M. He is a member and generous supporter of the Methodist church, a trustee and attorney of the Methodist Orphanage and Methodist Hospital, Philadelphia, and is influential in the councils of his denomination. He was married, in 1885, to Anna W., daughter of V. Clement Sweatman, of Philadelphia.

TIPTON, John, senator, was born in Sevier county, Tenn., Aug. 14, 1785, son of Joshua Tipton, who had removed from Maryland to the eastern part of Tennessee; he was killed by the Indians in 1793. The support of the family was therefore largely shared by the son at an early age. He was also soon known as an Indian fighter, considering as a sacred duty the avenging of his father's murder. In 1807 the family removed to Indiana, settling at Brinley's Ferry, Harrison county. He joined Capt. Spier Spencer's Yellow Jackets in 1809, and, becoming ensign, served through the campaign which terminated, Nov. 7, 1811, in the battle of Tippecanoe, where the death of the captain and both lieutenants gave him command of his company. A journal was written by him during the twenty-four days of this campaign, and notwithstanding the original method of spelling used, it is said to be the most complete and vivid description of the events treated. Later he attained the rank of brigadier-general in the militia service. He was elected sheriff of Harrison county in 1815 and held the office by re-election until 1819. In the latter year he was made a member of the legislature, and in 1820 served on the commission which selected (upon his suggestion) the site of Fall creek for the new capital of Indiana. In 1821 he was re-elected to the legislature and appointed a commissioner to confer with Illinois on the question of boundary. Becoming U. S. agent for the Pottawattamie and Miami Indians in March, 1823, he rendered important service by arranging with them in 1826 to open for settlement a valuable tract of land. In 1831 he was

elected to the U. S. senate, taking the place made vacant by the death of Gen. James Noble, and in 1833 was re-elected for a full term, thus serving continuously from Jan. 3, 1832, until 1839. He opposed Pres. Jackson on the bank question, though sympathizing with him in general politics. In the development of Indiana he was specially energetic, raising money for the expenses of teaching, constructing mills, erecting school houses and organizing the Ecl River Seminary Society at Logansport. Extensive purchases of land were made by him in Bartholomew county, sixty acres of which he gave for the erection of public buildings; and on this property the city of Tiptonia was built, though its name was later changed to Columbus by political opponents. Gen. Tipton was prominent in the Masonic order, attaining the office of grand master. His death occurred at Logansport, Ind., April 5, 1839.

WILLEY, Calvin, senator, was born at East Haddam, Conn., Sept. 15, 1776. After completing an academic education he studied law with John T. Peters, and was admitted to the bar in 1798, commencing the practice of his profession at Stafford. To the lower house of the state legislature he was repeatedly elected, serving continuously for nine years, and from 1806 to 1808 he held the office of postmaster of Stafford Springs. He then removed to Tolland, and was appointed postmaster there, remaining until 1816. Being elevated to the position of probate judge for the Stafford district, he officiated in that capacity for seven years, and after serving as a presidential elector on the ticket which elected John Quincy Adams in 1824, he was himself elected a member of the U. S. senate. He took his seat on Dec. 9, 1825, filling the place of James Lannan, whose appointment was not accepted, and continued as a member of the upper house until March 3, 1831, when he retired to his private practice at Stafford, Conn. His death occurred at the latter town, Aug. 23, 1858.

THOMSON, Robert Lyle, physician, was born in Clark county, Ky., Dec. 12, 1855, son of Sanford and Susan (Smith) Thomson. He is of Scotch-Irish descent. In 1880 he was graduated M. D. at the Kentucky School of Medicine with first honors. Shortly afterward he was elected to the chair of anatomy in his alma mater, retaining the position for five years. In 1885 he resigned his professorship to pursue his special study in the Manhattan Eye and Ear Hospital, New York city, serving as house surgeon under Drs. C. R. Agnew and David Webster. Dr. Thomson located in St. Louis in 1888; but in 1890 removed to Spokane, Wash., where he has become the leading specialist on diseases of the eye and ear. During his ten years' residence in Spokane he served for three years as secretary of the State Medical Association and for one term as its president.

PARKER, Horatio William, composer, was born at Auburndale, Mass., Sept. 15, 1863, son of Charles E. and Isabella G. (Jennings) Parker. His earliest American ancestor was Thomas Parker, who sailed from London in 1635 and settled at Lynn, Mass. His mother was his first instructor at music; later he studied under Stephen A. Emery and George W. Chadwick in Boston. For a short time he served as organist of a church at Dedham, Mass. In 1882 he

John L. Tipton

R. L. Thomson

went to Munich, where he won high honors at the conservatory, and remained for three years; then returned to the United States, and after teaching at Garden City, Long Island, removed to New York, and was organist of Holy Trinity Church. In 1893 he became organist of Trinity Church, Boston, a position he still holds (1901). In 1894 he was appointed director of the newly established school of music at Yale University. His principal compositions include the cantatas, "King Trojan" and "The Kobolds"; the oratorios, "St. Christoph" and "Hera Novissima," the latter performed for the first time by the Church Choral Society, in New York city, May 3, 1893, and repeated in 1891 by the Handel and Haydn Society, of Boston, and by Theodore Thomas at the eleventh Cincinnati festival. Among earlier works are a symphony; a scherzo for orchestra; three concert overtures; a suite for piano, violin and violoncello, and a string quartet. A cantata, "The Dream King and His Love," was awarded a prize at the first competition instituted by the National Conservatory of Music in 1893. In 1895 the commencement exercises at Yale were rendered unusually attractive by the rendering of an "Ode," written by the poet Stedman, and set to music by Prof. Parker. He was married, in 1886, in Munich, Bavaria, to Anna Ploesch.

JONES, Gaius J., physician, was born at Remsen, Oneida co., N. Y., Feb. 27, 1843, son of Jonathan and Elizabeth (Roberts) Jones, of Welsh descent. After an academic education he taught school, but through ill-health was compelled to abandon the school-room and become a dry-goods clerk, until the outbreak of the civil war. He was the first volunteer from his township and enlisted in company E, 14th regiment, N. Y. volunteers. He remained in the service until Jan. 13, 1862, when through disability he was honorably discharged. He then attended lectures at the Homœopathic Hospital College, of Cleveland, and in 1865 commenced the practice of medicine at Liverpool, Medina co., O., from whence he removed to Grafton in 1871. In 1872 he accepted a position as lecturer on anatomy at his alma mater and in the following year was given the full professorship of anatomy, which chair he filled until 1878. He also during this period filled temporarily the chair of surgery. For two years after his appointment on the college faculty, Dr. Jones remained at Grafton, but in 1874 removed to Cleveland, where his ability won him one of the most lucrative practices in the city. In 1878, although still a young man, he was appointed professor of theory and practice of medicine. He was dean

Gaius J. Jones

of the Cleveland Medical College from 1890 to 1897, but when the college united with the University of Medicine and Surgery under the name of the Cleveland Homœopathic Medical College he was made vice-dean. In 1899 he was again elected dean, which position he still holds. He has been on the staff of Huron street hospital since 1874 and has been a lecturer at the Cleveland Training School for Nurses. For years he was surgeon to the 5th regiment, Ohio national guard, as well as surgeon-in-chief of the L. S. and M. S. R. Employees' Relief Association and surgeon of the N. Y. P. and

O. R. R. He is now professor of theory and practice of medicine in Cleveland Medical College, and in addition to his professional duties is president of the National Safe and Lock Co. He was a charter member of the Army and Navy Post, G. A. R., and is a prominent Mason. He was married, July, 1866, to Emma Willmot, of Liverpool, and has five children.

KEENAN, George, F. S. consul and physician, was born in Dane county, Wis., July 3, 1859, son of George and Matilda Elizabeth (Fox) Keenan. His family is of Irish extraction, with a mixture

of Welsh and Anglo-Saxon, his paternal ancestors being chiefs in Fermunagh, Ireland. His mother's family came from Kilmoney, Ireland, the original name O'Carthy being changed in the thirteenth century to Siannech, the Gaelic for Fox. Authenticated manuscripts, historical records and inscriptions prove the descent of this family in an unbroken line from A. D. 375. In addition to these prominent connections in Ireland, Mr. Keenan's family is also related to the Welsh family of Auslow and the English family of Loftus. His parents came to America and settled in Wisconsin in 1840. George Keenan was educated in the public schools of his native county in the intervals of work on his father's farm, and later attended the Wisconsin State University, where he was graduated in 1881. He pursued his professional studies at the Rush Medical College, Chicago, where he received the degree of M. D. in 1883; subsequently he took advanced courses in the universities of Heidelberg and Vienna. During 1885-86 he was interne at St. Luke's Hospital, Chicago, and in the latter year entered on the general practice of medicine and surgery at Madison, Wis., where, with the exception of two years spent in study and work on the Western plains, he continued until 1894. In August, 1893, Dr. Keenan was appointed U. S. consul at Kehl, Germany, by Pres. Cleveland, and took charge in the following January. At the end of six months of service he was transferred to the consulate at Bremen, and there continued until January, 1898. His principal service during this period was on sanitary inspection of immigrants bound for the United States, and in introducing American horses into Germany. After resigning the consulate he spent some months in medical study in Berlin, Vienna and other places. He is a pupil of Prof. A. Martin, the celebrated gynecologist of Berlin. Since his return to the United States Dr. Keenan has practiced as a specialist in the diseases of women and children. He has already established a reputation in these branches, and is chief surgeon and gynecologist of St. Agnes Hospital, Fond du Lac, Wis. He was married, Sept. 20, 1893, to Mary Bishop, daughter of William P. Kelly, of Wausau, Wis., whose family settled in New York state before the revolution. They have two children: Sidney Fox and Matilda Elizabeth Keenan.

THOMAS, Jesse Burgess, senator, was born at Hagerstown, Md., in 1777, a descendant of Lord Baltimore. He studied law in Bracken county, Ky., under the direction of his brother, Richard Symmes Thomas. In March, 1803, he removed to Lawrenceburg, Ind., where he commenced the practice of his profession, and was elected a delegate to the terri-

itorial legislature in place of Benjamin Park, resigned. Taking his seat in that body, in January, 1805, he was elected presiding officer during that year and continued to officiate as speaker of the house until 1808. In the latter year he was elected to represent the territory of Indiana in the national legislature, remaining until 1809, when he removed to Kaskaskia, Ill. Upon the organization of Illinois as a territory, on March 7, 1809, he was appointed by Pres. Madison as one of the judges of the federal court; and in July, 1818, was made a delegate from St. Clair county, to the convention that framed the state constitution, of which he was president. He was elected a U. S. senator at the first meeting of the state legislature, and served from Dec. 4, 1818, to March 3, 1829. He introduced the Missouri Compromise bill of 1820, and in 1824 energetically advocated the nomination of William H. Crawford for the presidency. In 1840 he was a delegate to the Columbus convention which nominated William Henry Harrison. Later in life he resided in Mt. Vernon, O., where his death occurred, Feb. 3, 1850. His grandnephew, who was also his namesake, became a noted clergyman and the author of several theological works.

MCCORMICK, Paul, merchant, was born in Stenben county, N. Y., June 14, 1845, son of James and Margaret McCormick. His youth was spent on his father's farm, his early education being received at the district schools. At the age of nineteen he entered Alfred University, and after studying there two years he went to Montana, settling near Bozeman, where he engaged in farming. In 1875 he removed to Fort Pease, where he engaged in trading, and at the Indian outbreak a year later accompanied the Montana troops under Gen. Gibbon. In the fall of 1876 he settled at Keogh, continuing his business there until 1879, and then removed to Junction City, where he carried on a successful general merchandise business for twelve

Paul McCormick

years. Going to Billings in 1891 he engaged there in stock raising and merchandising, and now (1901) is president of the Custer Cattle Co., largest in that vicinity, and vice president of the Donovan, McCormick Co., conducting one of the largest dry-goods stores in eastern Montana. In 1892 he was a delegate to the national Republican convention at Minneapolis, and in 1900 was a candidate for presidential elector of Montana. Mr. McCormick possesses a generous and hospitable disposition, and is conspicuously identified with the social and philanthropic interests, as well as the material growth and prosperity of the city of Billings. He was married, in 1879, to Mary, daughter of Willis Spear, of Montana, and has three children, Paul, Myrtle and Blythe.

SIMMONS, Franklin, sculptor, was born at Webster, Androsoggin co., Me., Jan. 11, 1839, son of Loring and Dorothy (Batchelder) Simmons. His great-grandfather, Samuel Simmons, as an officer in the revolutionary army, was present at Burgoyne's surrender, and served through the trying winter at Valley Forge. Through his mother he is descended from Rev. Stephen Batchelder, an original settler of Vermont, and from Gov. Winslow, of Massachusetts. During his infancy his parents removed to Bath, where he attended school, and where he first manifested his passion for art. When he was about thirteen years of age his parents removed to Lewiston,

and his studies were continued there. Later he entered Bates College, and completed his classical education. There were then few works of sculpture to be seen in New England, and the opportunities for an art education were meagre, but the enthusiasm of the young artist and his taste for portraiture brought him encouragement to persevere. He opened a studio in Portland, where he modeled some portrait busts, and began his first statue, that of Maj. Gen. Berry, for Rockland. The winter of 1865 and 1866 he spent in Washington, D. C., where the members of Lincoln's cabinet and about forty leading officers of the civil war sat to him for life-sized medallions, which were cast in bronze. Among his sitters were: Secs. Seward, Chase, Speed and Wells; Gens. Grant, Sherman, Meade, Sheridan, Hooker, Burnside, Banks, Butler and Custer, and Adms. Farragut and Porter. In 1867, being commissioned by the state of Rhode Island to execute a statue of Roger Williams for the national capitol, he decided to go to Europe, and the close of 1868 found him and his young wife settled in Rome. Here he worked in his studio by day and drew from life at the English Academy in the evening. His first works produced in Rome were the statue of Williams, the group, "Grief and History," which crowns the "Peace" monument in Washington, and the ideal conception, "Joelabed with the Infant Moses," which was ordered in marble by William S. Appleton, of Boston, before the model was quite completed. After the death of his wife, in 1872, he returned to the United States, but on receiving several important commissions, again went to Rome, and has lived there since, though he has frequently visited America. The commissions were for a marble statue of William King, first governor of Maine, ordered by the state legislature; a bronze statue of Roger Williams for Providence, R. I., and one of Edward Little for Auburn, Me. Mr. Simmons was selected by the American minister in Paris, Hon. Whitelaw Reid, to inspect and accept for the U. S. government the Lafayette monument executed by two French sculptors. On his arrival in Washington the order from congress for the equestrian monument of Gen. Logan was given to him. This is made entirely of bronze, the pedestal being decorated with life-sized figures in high relief. It stands in the Iowa circle in Washington. On May 19, 1900, with imposing ceremonies, Mr. Simmons' statue of Gen. Grant was unveiled in the rotunda of the capitol. The statue, which is of heroic size, and carved from marble, was a gift to the nation from the Grand Army of the Republic. Mr. Simmons has sculptured about one hundred portrait busts in marble, besides many in bronze, and fifteen public monuments; among the latter, not previously mentioned, are the statue of Longfellow, the Soldiers' monument, Portland, Me., and the bronze statue of Oliver P. Morton, Indianapolis. Among the ideal works he has executed may be mentioned: "The Young Medusa"; "Penelope"; "Galatea"; "The Scraph Abdiel"; "Benjamin in Egypt"; "The Hymn of Praise," and "Paris and Helen." Some of these have been produced in marble many times. Mr. Simmons has received the degree of A.M. from Bowdoin College, Waterville University and Bates College, and several decorations from the king of Italy, by whom he was knighted in 1898. He was married a second time, June 9, 1892, to the Baroness Von Jenisen, daughter of John Francis Slocum, of Providence, R. I.

WILLIAMS, John Irving, manufacturer and inventor, was born in Beigny, France, May 11, 1824, son of Joseph and Mary (Bratt) Williams. His father removed from England to France, at the instance of a firm of French capitalists, to construct and operate an iron mill. In 1830 the family came

to America, and settled at Boonton Falls, N. J. In 1833 John commenced to learn his trade as an iron worker with John Lewis. His school period was brief, but he adopted a faithful system of self-education and by hard study qualified himself to fill some of the most responsible positions in his business. Deciding to become a mechanical engineer he made, as his first effort in that direction, copies of the machinery of the mill in which he toiled. He went to Pittsburgh, Pa., with his father, in 1838, where he was employed by Lorenz & Cuddy, and for eight years was engaged in puddling and shingling. In 1846, under the management of James E. Brown, he started the great mill for the Kittanning Iron Co., at Kittanning, Pa. In the same year, with his father and others, Mr. Williams bought the iron mills at Hanging Rock, O., and operated that plant until 1852, at which time he built a mill at Portsmouth, O., running it until 1856, when he left to take charge of the Girty's Run iron works of Lawrence Stewart & Co., where he continued until 1860. In 1862 he entered the employ of Graff, Bennett & Co., of Pittsburgh, Pa., and remained with them until 1878, when he purchased an interest in the Keystone rolling mill in Pittsburgh. Upon the expiration of the third year of this enterprise he sold his interest to Lindsay and McEnteehon, removing from Pittsburgh to Youngstown in 1882, where he had the management of the Brown-Bonnell Iron Co., up to 1899. Mr. Williams is the inventor of a number of improvements for the perfecting of the manufacture of iron, notably the Danks rotary puddling furnace, the three high plate mill, and the angle reducing finishing mills. The two first mentioned he introduced at the Graff, Bennett & Co. establishment, and the last at the Brown-Bonnell & Co. plant. He has at various periods of his life worked on all the different rolls used in the mills, and has devoted some time to roll turning and the drafting of mills and machinery. He is, in addition to his connection with the iron trade, president of the Dollar Savings and Trust Co. Bank, of Youngstown. He was married, in 1845, to E. Winterburn, of Pittsburgh, who died childless, and in 18 to Emma Tompkins, of the same city, by whom he has two sons and one daughter living.

NICHOLSON, Alfred Osborn Pope, jurist and senator, was born in Williamson county, Tenn., Aug. 31, 1808. He received his education at Chapel Hill, N. C., where he was graduated at the University of North Carolina in 1827; he then studied medicine at Columbia, Tenn., and Philadelphia, Pa. In 1829, however, he abandoned medicine for the law, was admitted to the bar in 1831, and began practice at Columbia. In 1833 he was elected to the state legislature, serving by re-election until 1839, and upon the death of Sen. Felix Grundy, in 1840, he was appointed to the U. S. senate by Gov. James K. Polk, holding his seat from Jan. 11, 1841, until March 3, 1843. In the latter year he was elected to the state senate, and on retiring from that body in 1845 removed to Nashville, becoming a director of the Bank of Tennessee, and subsequently its president. In 1850 he returned to Columbia, and was appointed by Gov. Tronsdale to the office of chancellor, though he resigned this post at the end of a year. An eloquent address was delivered by him at the Nashville convention of 1850, favoring the compromise propositions at that time before congress. In 1852 he was a member of the national Democratic convention, and for his services in the campaign Pres. Pierce offered him a cabinet appointment, but he declined the honor. He again became a member of the U. S. senate on Dec. 5, 1859, serving until the disruption of the Union in 1861, and though he

quietly retired on March 3d was not formally expelled until July. He was twice arrested during the civil war as a sympathizer with the Southern cause, and was imprisoned for a time at Nashville. In 1870 he was elected a member of the convention which revised the constitution of Tennessee, and during the same year accepted an election as one of the six judges of the state supreme court. His associates then chose him as chief justice, in which capacity he served until his death. He was elected printer of the house by the 33d congress, and printer of the senate by the 34th congress. Judge Nicholson was editor of "The Western Mercury," a Columbia newspaper, from 1832 to 1835; the Nashville "Union" (1833-56), and the Washington "Daily Union" (1853-56). He was the author of the famous "Nicholson Letter," an open epistle written in 1848 to aspirants for the presidency. He died at Columbia, Tenn., March 23, 1876.

BURBRIDGE, Stephen Gano, soldier, was born at Georgetown, Scott co., Ky., Aug. 19, 1831, son of Robert Burbridge. He received his education at the Georgetown College, and at the Frankfort Military Institute. He turned successively from law to mercantile pursuits and farming. At the outbreak of the civil war he was the owner of a big plantation in Logan county, Ky., and among his own hands and those of his neighbors he raised the 26th Kentucky regiment of infantry; he was commissioned its colonel on Aug. 27, 1861. He distinguished himself at the battle of Shiloh, and was made a brigadier-general of volunteers on June 9, 1862. When Bragg invaded Kentucky, in 1862, Burbridge was sent to that state, and served through several engagements until the Confederate army was driven out. He was in the expedition sent against Vicksburg, and participated in several actions. As commander of the 1st brigade in the 1st division of the 13th corps, army of the Mississippi, he led the charge on the Arkansas Post, and Gen. A. G. Smith complimented him by handing him the flag, which Burbridge planted upon the captured fort. Later he was one of the first officers to enter Port Gibson after its capture. On July 4, 1864, he was brevetted major-general of volunteers for "gallant and distinguished services in the repulse of John Morgan's recent invasion of Kentucky." He also received the thanks of Pres. Lincoln for driving Morgan out of Kentucky. Gen. Burbridge resigned from the army on Dec. 1, 1865, and retired to Kentucky. Afterwards he went to live in Brooklyn, N. Y.; he died at his home there, Dec. 1, 1894.

GRAHAM, John, diplomat, was born at Dumfries, Prince William co., Va., in 1774, brother of George Graham, acting secretary of war under Madison and Monroe. He was graduated at Columbian University in 1790, and emigrated to Kentucky, where he represented Lewis county in the legislature. Pres. Jefferson sent him to the territory of Orleans as secretary, and he subsequently occupied a similar position in the American legation at Spain. When Madison was secretary of state Mr. Graham was chief clerk under him. In 1818 he went with a commission to Buenos Ayres, where he obtained political information which he embodied in an exhaustive report, which was printed by the state department. In 1819 he was appointed minister plenipotentiary to the court of Brazil. The climate proved too severe, and he returned to Washington, where he died, Aug. 6, 1820.

NEWTON, John Brockenbrough, P. E. coadjutor bishop of Virginia, was born at Westmoreland, Va., Feb. 7, 1839. He came of an old and distinguished family, settled for several generations in Virginia. He received his preliminary education at the Episcopal High School, near Alexandria, Va. As a young man his inclinations turned toward the practice of medicine, and he was graduated at the Medical College of Virginia. He served as a surgeon with the Confederate army during the civil war; at its close he practiced medicine for a few years and then turned to the ministry. He was ordered deacon on June 25, 1871, and was advanced to the priesthood a year later by Bishop Whittle. Upon his ordination he took charge of South Farnham parish, which includes St. John's Church, Tappahannock, whence he subsequently went to St. Luke's Church, Norfolk. He remained for eight years at St. Luke's, and then answered a call to the Monumental Church, Richmond, where he remained for nine years, until chosen bishop coadjutor of Virginia. He was consecrated in his parish church at Richmond, on Jan. 31, 1894, by Bishops Whittle, Dudley, Jackson and Capers. He died suddenly at his residence from heart disease, May 28, 1897.

HINMAN, George Wheeler, journalist, was born at Mount Morris, Livingston co., N. Y., Nov. 19, 1863, son of Wheeler and Lydia (Seymour) Hinman.

He was educated at Mount Morris Academy, and entering Hamilton College, Clinton, N. Y., was graduated in 1884 as salutatorian of his class. He then went to Germany and pursued studies in international law, civil government and political economy at the universities of Leipsic, Berlin and Heidelberg, receiving the degrees of Ph. D. and A. M. at the latter in 1888. On his return to the United States he entered upon his journalistic career in the office of the New York "Sun," beginning

as a reporter and working his way through the usual gradations until 1897, when he was invited to become editor of the Chicago "Inter-Ocean." While in the office of the "Sun" he contributed constantly to magazines and other periodicals and to Chicago newspapers. In his present position he has charge of the organization and policy of one of the largest daily newspapers in the United States. In editorial writing he devotes a large part of his attention to questions of national and international politics. On Jan. 28, 1891, he was married to Maude Marie, daughter of James Sturtevant, of New York city.

STEVENS, Enos, meteorologist and inventor, was born at Barnet, Caledonia co., Vt., Jan. 22, 1816, son of Henry Stevens, and brother of the noted bibliographers, Henry and Benjamin Franklin Stevens. His father, a celebrated antiquarian (b. Dec. 13, 1791; d. July 30, 1861), was educated at Peacham Academy, Vermont. He made a large collection of manuscripts, tracts and newspapers, which furnished data for several volumes relating to American history, and especially that of Vermont. The most valuable part of this collection, unfortunately, was burned, in 1857, with the state house at Montpelier, where it had been placed for safe-keeping. Mr. Stevens was the founder and first president of the Vermont historical

society. He also attained some prominence in politics, being for two terms a member of the legislature. The son was graduated at Middlebury College in 1838, and going to Paradise, Pa., taught there until 1845. In 1847-48 he assisted Dr. Samuel G. Howe in investigating the condition of the idiots of Massachusetts, and then returned to Barnet, where he engaged in farming. Having a taste for invention he devised, among other appliances, an instrument for phrenological measurements; a legislative teller, adopted by congress in 1853, and an apparatus for automatically recording atmospheric changes. He was also the originator of an astronomical theory of weather indications, and published pamphlets and papers on agriculture, astronomy, music and phrenology. He died at Barnet, Vt., Jan. 31, 1877.

STEVENS, Henry, bibliographer, was born at Barnet, Vt., Aug. 24, 1819, son of Henry Stevens, the antiquary. First educated at the school of his native place, he later attended Lyndon Academy (1836), and Middlebury College, teaching at intervals and serving for some time as a clerk in the treasury department at Washington. During 1841-43 he studied at Yale, and upon graduation went to Cambridge, Mass., where he studied law. He meanwhile became interested in early colonial history and the historical relations between the states and England, and, at the instigation of his antiquarian friends, went to London with the object of searching for "Americana" (1845). There he spent the rest of his life. A letter from Jared Sparks introduced him to Sir Anthony Panizzi, and he soon became engaged as an agent of the British Museum for procuring North and South American books of all kinds, including state and national laws, journals and documents, in which the museum was very deficient. Through his acquaintance with collectors of rare books and manuscripts he was also enabled to supply many American libraries with valuable material bearing on the history of this country. He turned his attention to early editions of the English Bible and to early voyages and travels relating to America. In these two branches he became one of the highest authorities, and as such was largely instrumental in gathering the library of James Lenox, of New York city. He also formed a large collection of documents relating to Benjamin Franklin, which was purchased by the U. S. government. In 1852 Henry Stevens was made a fellow of the Society of Antiquaries; in 1877 became a member of the Librarians' Association, and the same time was a member of the committee for promoting the Caxton exhibition, and catalogued the exhibit of Bibles. His principal publications are: "Catalogue of My English Library" (1853); "American Bibliographer" (1854); "Catalogue of a Library of Works Relating to America" (1854); "Catalogue Raisonné of English Bibles" (1855); "Catalogue of American Books in the Library of the British Museum" (1857); "Analytical Index to Colonial Documents of New Jersey in the State Paper Offices of England" (1858); "Catalogue of Mexican and other Spanish American and West Indian Books in the British Museum" (1859); "Catalogue of Canadian Books in the British Museum" (1859); "Catalogue of American Maps in the British Museum" (1859); "Bibliotheca Americana" (1861); "Historical Nuggets" (1862); "The Humboldt Library" (1863); "Historical and Geographical Notes on the Earliest Discoveries in America" (1869); "Sebastian Cabot—John Cabot=0" (1870); "Bibliotheca Historica" (1870); "Schedule of 2,000 American Historical Nuggets" (1870); "Bibliotheca Geographica et Historica" 1 (1872); "American Books with Tails to 'Em" (1873); "Bibles in the Caxton Exhibition" (1878); "Photo-Bibliography" (1878); "History of the Oxford Caxton Memorial Bible" (1878); "Historical Collections," 2 vols. (1881-86);

"Who Spoils Our New English Books?" (1885); "Recollections of James Lenox" (1886). Besides he left unpublished some investigations on Columbus, a supplement to Louis Fagan's "Life of Panizzi," containing anecdotes relating to the British Museum, and edited some works on American history, among them being "The Dawn of British Trade to the East Indies" (1886). Henry Stevens died at his home, in South Hampstead, England, Feb. 28, 1886.

STEVENS, Benjamin Franklin, bibliographer, was born at Barret, Caledonia co., Vt., Feb. 19, 1833, another son of Henry Stevens, the antiquary. In 1853 he entered the University of Vermont, but left it before graduation owing to ill health. Seven years later he went to London to join his brother, Henry, in the bookselling business. After the death of the London printer, Charles Whittingham, he had charge of the Chiswick press, and later became U. S. despatch agent in London, also acting as purchasing agent for American libraries. For more than thirty years Mr. Stevens has been engaged with a staff of assistants in compiling unpublished manuscript papers pertaining to different phases of American colonial history. He has published the following works: "American Manuscripts in European Archives" (1887); "The Campaign in Virginia in 1781: An Exact Reprint of Six Rare Pamphlets on the Clinton-Cornwallis Controversy, with Unpublished Manuscript Notes by Sir Henry Clinton" (2 vols., 1888); "Facsimiles of Manuscripts in European Archives Relating to America, 1773-1783" (25 vols., 1889-98), and an "Introduction to the Calendar of American Papers in the Earl of Dartmouth's Collection" (1895). The facsimile (photographed from the original MS. Codex Columbus in the foreign office, Paris), "His Own Book of Privileges, 1502, with English Translation, etc." (1893), and "Gen. Sir William Howe's Orderly Book at Charlestown, Boston and Halifax, from June 17, 1775, to May 26, 1776," with an abstract of the correspondence with the English government (1896) were edited by Mr. Stevens. He published in January, 1901, a facsimile of the unpublished British headquarters' colored map of New York and environs (1782), ten feet by four, which he recently discovered in the war office in London. He is a fellow of the Society of Arts; Society of Antiquarians, and of the Royal Historical Society and a member of the Société d'Histoire Diplomatique. He was married, in London, Jan. 28, 1865, to Charlotte, daughter of Charles Whittingham, the printer.

CANONICUS, Narragansett chief, was born about 1565. After the Pilgrims landed at Plymouth, he was one of the first Indians with whom they came in contact. His attitude towards the English was at the beginning very hostile, and seemed to threaten war, which might have been fatal to the young colony, as Canonicus had about 3,000 warriors at his disposal. To test the English he sent to Gov. Bradford a bundle of arrow-tied with a snake-skin as a token of his intention (1622). The skin was returned to Canonicus filled with powder and bullets, thus defying him and accepting his challenge. It produced the desired effect, and the Indians began negotiations that resulted in the establishment of a lasting peace. When Roger Williams and his company were compelled to leave the colony at Massachusetts bay, and go to Narragansett, Canonicus accorded them a welcome reception, and afterwards granted them the tract of land now occupied by the city of Providence, R. I. In 1637 he received an embassy from Massachusetts in a lodge fifty feet wide, made of poles, and covered with mats, and there gave them a feast, consisting among other things of boiled chestnuts and Indian pudding stuffed with "blackberries, somewhat like currants." He was at war

with the Pequots and other Indian tribes, but his peaceful relations with the whites were never interrupted. This was largely due to the influence of Roger Williams, who was his intimate friend, and who fifty years later testified to the generosity and friendliness of the Indian chief in these words: "I declare to posterity that were it not for the favor that God gave me with Canonicus, none of these parts, nor, Rhode Island, had been purchased." On April 19, 1641, Canonicus made a formal treaty acknowledging the sovereignty of England. He died June 1, 1647.

JOHNSON, George Henry Trust, physician and surgeon, was born near Mt. Vernon, Ill., Oct. 15, 1842, son of James R. and Lydia (Criele) Johnson. He is descended from the Connecticut Johnsons, who were prominent in colonial history. His paternal grandfather was killed in the war of 1812. He attended the public schools until the age of nineteen, when he enlisted in the 110th Illinois regiment, August, 1862, under Col. T. S. Casey. In the fall of 1862 he was with Gen. Buell in the Kentucky campaign, and with Gen. Rosecrans in the battles of Stone river, Chickamauga and Missionary ridge. He also served under Sherman during the 100 days' fighting on the advance on Atlanta, and was with him on the march to the sea, at the battle at Bentonville, N. C., and at Gen. Joseph Johnston's surrender of the Confederate army. He was discharged at Washington, in June, 1865. After the war Dr. Johnson attended the Homoeopathic Medical College, St. Louis, Mo., and was graduated in February, 1869. He went to Atchison, Kan., where he has practiced medicine ever since. He was a member of the state board of health in 1885-93, being president for eight years. For two terms he was president of the State Homoeopathic Medical Society, and was F. S. pension examiner during the administrations of Prosser, Arthur, Harrison and McKinley, also being president of the board of examining surgeons at Atchison since 1897. He is commander of the John A. Martin G. A. R. Post of Atchison, and a Mason, an Odd Fellow, and a member of the A. O. U. W. Dr. Johnson was married, June 2, 1868, to Lucille Bowman, of Atchison, Kan. His only son, Dr. Chas. H. Johnson, has been associated with him in practice since 1897.

WISE, John Sergeant, lawyer, was born in Rio de Janeiro, Brazil, Dec. 27, 1846, son of Henry Alexander and Sarah (Sergeant) Wise. His father was a member of congress, U. S. minister to Brazil, and governor of Virginia; his mother was a daughter of Hon. John Sergeant, a prominent lawyer, congressman and statesman, active in procuring the passage of the Missouri compromise, candidate for vice-president, and a member of one of the leading families of Pennsylvania. After preparatory training in private schools at Richmond, Va., and in Goodland and Princess Anne counties Mr. Wise, in 1862, entered the Virginia Military Institute, Lexington, Va., and there remained for two years. In the famous charge of the cadets at the battle of New Market, in May, 1864, he was slightly wounded. Soon afterward, receiving a lieutenant's commission, he served in various positions until the close of the war. On the return of peace he entered the Law School of the University of Virginia, and after his graduation in 1867 began practice in Richmond. In 1869 he formed a partnership with his

father, which continued until the latter's death in 1876, and for several years thereafter he devoted himself almost exclusively to his profession, taking a leading position at the Virginia bar. His political views made him renounce allegiance to the Democratic party, and he thenceforth espoused the principles of Republicanism. In 1880 he was the unsuccessful candidate for congress on an independent ticket, but in 1882, having accepted the Republican and coalition nomination for congressman-at-large against John E. Massey, Democrat, he was elected by a large majority. Meanwhile, in 1881-82, he had

Geo. W. Wise

served as U. S. attorney for the eastern district of Virginia, by appointment of Pres. Arthur. In 1885, as Republican candidate for governor, he was defeated by Fitzhugh Lee, and in June, 1888, he was chairman of the Virginia delegation to the Republican national convention at Chicago, which nominated Benjamin Harrison for president. Mr. Wise removed to New York city in September, 1888, and has since been engaged in practice as counsel for the Sprague, Edison and General Electric companies, as well as other large corporations and reorganization committees. He has appeared before the courts of twenty-seven states in suits involving the rights of trolley and telephone companies and other important litigation concerning railways and corporations, and has become a widely recognized authority on electrical law. His address delivered before the State Bar Association at Albany on "Electricity in the Highways," attracted general attention, and was translated and used before the German Reichstag in the discussions over the statutes granting franchises to electrical companies in the highways, and used as a text-book in American and foreign universities. Mr. Wise went to England as counsel for the General Electric Co. in 1893 for consultation with the solicitor-general, Sir John Rigby, Mr. Bousfield, Q. C., and others, in the important litigation pending there between the National Telephone Co. and the Leeds tramways. He has also represented the United States in important litigations. Like his illustrious father, Mr. Wise is a powerful and pleasing orator, and is possessed of great vigor of mind and intense devotion to principle. His pleasing manners and many graces of character have won him a multitude of friends in all parts of the country. When but twenty-seven years of age he became seriously embarrassed through indorsements, involving him in indebtedness which it required years to discharge. This trial, however, like all other defeats and disappointments, Mr. Wise met and overcame with a calm and cheerful courage that has made him remarkable in the eyes of all who know him. Mr. Wise is also known in the field of authorship through his "The End of an Era," describing the last fifteen years of the slave period, and his "Diomed: The Autobiography of a Dog." On Nov. 3, 1869, Mr. Wise was married to Eva, daughter of Hugh Douglas, of Nashville, Tenn. They have five sons and two daughters; of the three eldest, Capt. Hugh D. Wise, a graduate of West Point, is in the 9th U. S. infantry, regulars, and Maj. Henry A. Wise and Lieut. John S. Wise, Jr., both of the 4th U. S. volunteer infantry, enlisted on the outbreak of hostilities for the war with Spain. Capt. Hugh Wise distinguished himself for gallantry in the assault on San Juan heights at Santiago and in service in the Philippines.

PUGH, Evan, chemist, was born at Jordan Bank, Chester co., Pa., Feb. 29, 1828, son of Lewis and Mary (Hutton) Pugh. His earliest American ancestor was John Pugh, who, with his wife, Jane, came from Wales, and settled at East Nottingham, Chester co., Pa. Their son, William, was married to Mary Brown, and their son, Jesse, was married to Elizabeth Hutton, the grandparents of Evan Pugh. His ancestors were members of the Society of Friends. A blacksmith's apprentice at nineteen, he bought out the residue of his time, and supported himself by manual labor while he received a year's instruction at the Manual Labor School, Whitestown, N. Y. He had fallen heir to a small estate, including a small academy in his native place, which he conducted successfully for about two years. At this time he took great interest in educational reform, and was an ardent advocate of phonetic spelling. In 1853 he sold his estate and academy in order to secure for himself a European course of scientific instruction. He went to Germany in 1853 and spent four years in the universities of Leipzig, Göttingen, and Heidelberg, and in Paris. He received the degree of Ph. D. in March, 1856, at Göttingen. He mastered the highest mathematics, besides making a number of chemical investigations of no slight importance, which form the subject of his principal contributions to science, viz.: "Hannfinsäure und Iodwasserstoffsäure"; "Inaugural Dissertation, Göttingen, 1856"; "On a New Method of Estimating Nitric Acid," and "On the Sources of the Nitrogen of Vegetation," in collaboration with Messrs. Lawes and Gilbert (1861). With Mr. J. B. Lawes, the English agriculturist, he investigated the question as to the assimilation of free nitrogen by vegetation in the former's laboratory in 1857. Dr. Pugh proved that plants do not assimilate free nitrogen, a conclusion reached by Boussengault in France after seventeen years of experimenting. Another French chemist, M. Georges Ville, had, from a series of researches, made in 1849-52, reached the opposite conclusion, and he was supported by a commission appointed by the French Academy to investigate the subject. Dr. Pugh devoted two years of nearly con-

stant labor to the reinvestigation of the whole question with such precision that the conclusions he established have never since been questioned. Besides supporting M. Boussengault, these investigations supplied a great amount of evidence in relation to rotation of crops, etc., of vast importance to agricultural science, and opened a rich field of inquiry in vegetable physiology. Being offered the presidency of the Agricultural College of Pennsylvania, by its trustees, who had heard of his ability, he returned home in the autumn of 1859 to assume the position offered him. Renouncing the brilliant career that lay before him, he recognized the duty he owed his country. It was a controlling idea with him that to be a benefactor to his race the student must be the medium through which he should operate upon the great world around him. When Dr. Pugh assumed the presidency of the Pennsylvania Agricultural College, all previous attempts to combine manual labor with study in an institution of learning had failed, but he undertook to demonstrate its practicability. He had previously visited and studied the chief agricultural academies and schools in Europe, and with characteristic energy he organized a system of instruction, planned the erection of the college buildings, se-

cured endowments, and, besides taking the general guidance of the institution, gave instruction in chemistry, scientific agriculture, mineralogy and geology. He had just succeeded in establishing a thoroughly scientific institution upon a broad and enduring basis when death cut short his work. Few American teachers of chemical science have attained a nobler fame than Dr. Pugh. On Feb. 4, 1861, he was married at Bellefonte, Pa., to Rebecca Miles, daughter of Abram Sharpless Valentine. He died at his home in Bellefonte, Pa., April 29, 1861.

TOWLE, Jeremiah, was born at Chester, N. H., May 22, 1800, son of Jeremiah and Susannah (Wilson) Towle. His father (1758-1837) was a revolutionary soldier and fought at Trenton, Monmouth, White Plains, Yorktown and Stillwater; was with Washington at Valley Forge and Yorktown, and was detailed by him to be present at the execution of Maj. André. He was a descendant of Philip Towle, who emigrated from England to Hampton, Mass., in 1640, and whose brother, Roger Towle, sailed in the Mayflower. The former settled in New York city in 1822, and there received a grant of land. The mother of Jeremiah Towle was the daughter of Robert Wilson, who was a member of the first Continental congress, and the great-granddaughter of James Wilson and of Robert Aiken, founders of the Aiken and Wilson Londonderry colony, by which the towns of Chester and Londonderry, N. H., were settled in 1732. James Wilson was a Scotch nobleman who took an active part in the rebellion of 1715 on the side of the Stuarts, and after their defeat fled to Ireland, but later emigrated to America and selected land for the colony mentioned. Capt. Jonathan Wilson was in command of the minutemen at the battle of Lexington. Jeremiah Towle spent his boyhood in Monmouth, N. H., whence his parents had removed from Chester shortly after the son's birth. He was educated at Monmouth Academy, and when twenty-two years of age went to New York city, where he soon rose to a prominent position in municipal affairs, taking an active part in the development of the city. He was one of the aldermen instrumental in the passage of the bill of 1832, providing for a water supply which became the forerunner of the present elaborate system of New York. About 1854 he was one of the first commissioners of Central Park, choosing the present site, and as commissioner of education assisted in founding the present school system about 1845. By the expenditure of much time and money he succeeded in establishing the first ward

school in Odell's Hotel, corner of Third avenue and Forty-ninth street, which was the beginning of public education as now conducted. Its first principal was Prof. Kettle. Under Pres. Tyler Mr. Towle also served as naval officer of New York. He was a member of the peace commission of 1861. He studied the sciences of medicine and law, receiving degrees in both, and though never practicing these professions, used his knowledge on many occasions for the advancement of the public works of the city. He spent much time in the collection of books and paintings, and at the time of his death left a large library and many pictures by the old masters. Mr. Towle was married

Vol. XI.—21.

in New York city, in 1829, to Jane, daughter of John H. and Phoebe (May) Abeel, and a descendant of one of the first settlers of New Amsterdam. They had six children. He died in New York, Dec. 2, 1880.

TOWLE, Stevenson, civil engineer, was born in New York city, July 29, 1837, son of Jeremiah and Jane (Abeel) Towle. His father removed from New Hampshire to New York city in 1822; became prominent in the municipal affairs; selected and planned the present water supply; was commissioner of charities and schools for many years, and was mainly instrumental in establishing the present park and ward school systems. The son was educated in the public schools of New York, being among the first registered pupils in the first ward school, and continued his studies at the Free Academy, now the College of the City of New York. Becoming a civil engineer, he was appointed city surveyor of New York in 1857, and in 1860 the mayor appointed him to examine the sewer systems of European cities, for the purpose of obtaining the information on which the present sewer laws of the city are based. He was chief engineer of the New York sewers from 1870 to 1886; in 1871 he served with Gens. McClellan and Franklin on a commission appointed to lay out Long Island City; he planned and built the first cable road in New York city (Tenth avenue) in 1883; in 1886 he became consulting engineer of the Broadway Arcade Rapid Transit railroad, and in the following year was appointed by Mayor Hewitt a member of the rapid transit commission. In 1887 Mayor Hewitt appointed him to visit Europe and personally investigate the question of improved pavement throughout the European cities. He was made a park commissioner in 1888, and in 1889 became consulting engineer for the department of public works, with special charge of improved street pavements, introducing a system that is now used extensively throughout the United States. He held this position until April, 1897, when he was appointed consulting engineer of sewerage, in connection with the city rapid transit tunnel. Mr. Towle has been an extensive traveler, having visited and made investigations on all the continents. He is a director of the Institute of the Deaf and Dumb; a member of the Scotch Irish Society, and one of the original members of the American Society of Civil Engineers, having been elected in 1868. He was married in New York city, Oct. 12, 1863, to Mary Stewart, daughter of Henry B. and Jane (Stewart) Brevoort, who was a member of one of the oldest Knickerbocker families in that city.

TRUMBULL, Benjamin, clergyman and historical writer, was born at Hebron, Tolland co., Conn., Dec. 19, 1735, son of Benoni Trumbull. His ancestor, John Trumble—the name was thus spelled until 1766—came from Newcastle-on-Tyne, England, to Essex county, Mass., in 1639. His son, John Trumble, Benjamin's grandfather, removed about 1690 to Suffield, Conn. Benjamin was graduated at Yale in 1759. He studied theology under Rev. Eleazer Wheelock, and was ordained pastor at North Haven in 1760, continuing in that charge for nearly sixty years. During the revolutionary war he served for a time as army chaplain and also as a private. In 1776 he published a

pamphlet, "Plea in Vindication of the Connecticut Title to the Contested Lands," in which he sustained the claim of his state to the Susquehanna purchase, which conduced to the decision of congress as to its validity. In 1796 he received the degree of D.D. from Yale College. Beside the aforementioned pamphlet, he published: "Twelve Discourses on the Divine Origin of the Holy Scriptures" (1790); "General History of the United States of America," left incomplete at the time of his death (3 vols., 1810), and a "Complete History of Connecticut from 1630 until 1713" (2 vols., 1797). The manuscript collections employed in the preparation of this history are in the Yale library. Dr. Trumbull died at North Haven, Conn., Feb. 2, 1820.

BROWNE, Irving, lawyer and author, was born at Marshall, Oneida co., N. Y., Sept. 14, 1835, son of Rev. Lewis C. and Harriet (Hand) Browne. He was educated in Nashua, N. H., and Norwich, Conn., and at the age of fourteen he began to study printing and telegraphy. In the spring of 1853 he found employment in a telegraph office in Boston, but soon afterwards gave up the position in order to begin the study of law. He spent three years as a student in the law office of Theodore Miller, at Hudson, N. Y., and then entered the Albany Law School, where he was graduated in 1857. On being admitted to the bar in that year he formed a partnership in Troy, N. Y., with Rufus M. and Martin I. Townsend, under the firm name of Townsends & Browne, which was continued until 1878. After the dissolution of the firm Mr. Browne remained in Troy and practiced his profession alone until the fall of 1879. He was successful as a lawyer, winning a reputation by his arguments in several noted cases, the chief of which was that of *Mency vs. Mency*, in which he established the right of a man to the fair use of his family name as a rival in the same occupation pursued by his brothers, who claimed a monopoly of the family name in that business by gift of the business and its good-will by the last will of the father. In 1879 he removed to Albany, N. Y., and assumed editorial control of the "Albany Law Journal" and the "American Reports." As a legal journalist he has been a persistent advocate of a general codification and of the amelioration of the law of evidence and of married women. His literary powers and humor have combined with his legal knowledge so happily that the "Law Journal," under his management, became widely known for the technical information it contained and its general readable verse as well. He has published a large number of works, legal and humorous, and has frequently contributed to magazines other than his own publications. His chief works are: an English translation of Racine's comedy, "Les Plaideurs" (1871); "Humorous Phases of the Law" (1875); "Our Best Society," a parlor comedy (1876); "Short Studies of Great Lawyers" (1878); "Judicial Interpretation of Common Words and Phrases" (1883); "Law and Lawyers in Literature" (1883); "Iconoclasm and Whitewash, and Other Papers" (1885); "Rhyminiscences of Travel," verse (1891); "Parole Evidence" (1893); "Sales" (1894); "Bailments" (1896); "Short Studies in Evidence" (1897); "The Character of the Nurse's Deceased Husband in Romeo and Juliet"; a sketch of the "Judicial History of New York"; "The House of the Heart," verse (1897), and "In the Track of the Book Worm" (1897). He has lectured at the Albany, Boston, Cornell and Buffalo law schools, and conducts a department in the Boston "Green Bag," a legal magazine, under the title of "The Lawyer's Easy Chair." He is custodian of the branch of the state law library at Buffalo, and a member of the state commission on uniformity of law. His style in writing is clear, concise and forcible. He

strikes vigorously, without fear or favor, and at the same time with perfect honesty and impartiality. He was married; first, in 1858, to Delia, daughter of Richard P. Clark, of Hudson, N. Y.; second, in 1894, to Lizzie B. Ferris, daughter of Frederick Buell, of Buffalo, N. Y.

MAYFIELD, Reuben Newton, physician, was born near Bedford, Ind., June 13, 1859, son of Alexander Campbell and Winney (Short) Mayfield. His grandfather, Milton Short, was a Disciples' Christian preacher, and at one time the owner of a large number of slaves, whom he voluntarily freed before the civil war. His paternal grandmother was a cousin of Daniel Boone, the Kentucky pioneer. Through his mother he is a descendant of Col. Robert Tate, of Kentucky, a distinguished soldier in the war of 1812, in which campaign his paternal grandfather, Reuben Mayfield, a Kentuckian by birth, also participated; ancestors on both sides served in the revolutionary war. At the age of fourteen he was graduated at the High School of Springville, and immediately began to teach in the public schools of the district. After following this calling for a few years he studied medicine, first at the Kentucky School of Medicine and afterwards at the Long Island Hospital College, New York, being graduated there in 1880, and subsequently at Rush College, Chicago, Ill. He also pursued several special courses in medicine at other institutions. On completing his studies he accepted a position as lecturer on pathology and clinical medicine at the University of Colorado; while holding this position he also established himself as a practicing physician and a specialist in throat, lung and stomach troubles. He was major and surgeon for many years in the 1st Colorado regiment, and acting brigade surgeon in the campaign of Cripple Creek in 1894, and that of Leadville in 1896. He also served during a part of his residence in Colorado as president of the board of medical examiners of the state. For about five years he was a surgeon of the Union Pacific railway system. In 1897 Dr. Mayfield removed to New York city, and there continued to practice in his special subjects. He has had unusual success in the treatment of what are commonly called incurable diseases, and has published, in pamphlet form, the results of his investigations along original lines. Besides the societies already mentioned, which he served as officer, Dr. Mayfield is enrolled as a member of the Association of Military Surgeons of the United States, and of the New York Medico-Legal Society; he was also a member of the Colorado State Medical Society. He is an official member of several secret orders. Dr. Mayfield was married, in Denver, Col., Feb. 14, 1889, to Ada E., daughter of John A. Thomas, of Chicago, who is of English ancestry, and has one son, Kay T. Mayfield.

McKEAN, Samuel, senator, was born in Huntington county, Pa., in 1790. He became identified with the Democratic party, and in 1822 was elected to the 18th congress, and was re-elected to the 19th and 20th congresses, serving from Dec. 1, 1823, to March 3, 1829. In 1833 he was elected to the U. S. senate for the full term of six years. He was a man of much talent, and wielded a wide influence in his community. He died in McKean county, Pa., June 23, 1840.

R. N. Mayfield

JACKSON, John, pioneer. The exact date of his birth is unknown, but he was baptized in the parish of Stepney, London, England, June 6, 1692, son of Christopher Jackson, of London. In 1639 he came to America and settled in Cambridge village, which was the original name of Newton, the place being a part of Cambridge. He brought a good estate with him, and purchased a dwelling house and eighteen acres of land situated on the line which now divides Newton from Brighton. He thus became the first permanent settler of the place. There may have been some transient dwellers before he came, but they were not known and left no descendants there. In 1641 he took the freeman's oath, and was one of the first deacons of the church. He gave one acre of land for the church and a burial place, on which the first meeting house was erected in 1660, and which now constitutes the oldest part of the old cemetery on Centre-street. He had labored long and earnestly, by petitioning the general court and otherwise, to have Cambridge village made an independent town, but did not live to see it accomplished. He had two wives and five sons and ten daughters, and at the time of his death about fifty grandchildren. He died on Jan. 30, 1674 or 1675, leaving 863 acres of land. His widow, Margaret, died Aug. 28, 1684, aged sixty. His son, Edward, was killed by the Indians at Medfield in their attack upon and burning of that town, Feb. 21, 1676. Abraham Jackson was the only one of his sons who reared a family. This son gave one acre of land adjoining that given by his father for the church and burial place. He or his father is said to have planted the pear trees on their premises which survived for over two centuries, being the oldest trees of their kind in New England. Abraham Jackson was married to Elizabeth Bisco, and was grandfather of Ephraim Williams, the founder of Williams College. Cambridge village was made a separate township in 1691 and named New Town; gradually it was altered to one word, Newtown, until in 1766 the town clerk dropped the "w" and it was spelled Newton.

WALKER, John, senator, was born at Castle Hill, Albemarle co., Va., Feb. 13, 1744, son of Thomas and Mildred (Thornton) Walker. His mother was the daughter of Col. John and Mildred (Gregory) Thornton, the latter being the daughter of Roger and Mildred (Washington) Gregory, a sister of Gen. George Washington. The first American ancestor on his father's side was Thomas Walker, who emigrated from Staffordshire, England, about 1650, settling in Virginia, where he represented the county of Gloucester in the colonial assembly of 1662. His grandson, who was also named Thomas, was married to Susannah Peachy. Their son (1715-94), the senator's father, served in Braddock's army as commissary-general of Virginia troops under Washington; was a Virginia commissioner to the Indians at Fort Stanwix, N. Y., a member of the Virginia house of burgesses and of the general committee of safety, and became the president of the board of commissioners who determined the boundary between Virginia and North Carolina in 1778. The son received a careful education and settled at Belvoir, Albemarle co., where he engaged in the occupation of a planter. In 1777 he was commissioned with his father to make special terms with the Indians of Pittsburgh, Pa., so as to retain their friendship throughout the revolution. During this war he served as an extra aid on the staff of Gen. Washington with the rank of colonel. The latter wrote to Patrick Henry, Feb. 24, 1777, commending the ability, honor and prudence of Col. Walker and affirming that his post was one of great trust and importance. The governor of Virginia appointed him to the U. S. senate, where he filled the vacancy made by the death of William

Grayson, serving from May 4, 1790, until a successor was regularly elected by the legislature. His seat was thus relinquished to James Monroe on December 6th of the same year. While a member of that body he voted for the removal of the seat of government to the Potomac river. He was married, in 1764, to Elizabeth, daughter of Bernard Moore, of Chelsea, Va., and a granddaughter of Gov. Alexander Spotswood. They had one daughter, Mildred. He died in Orange county, Va., Dec. 2, 1809.

HELPS, Elisha, was born at Simsbury, Hartford co., Conn., in November, 1779. He was graduated at Yale College in 1800, and studied law at Litchfield. He was one of the proprietors of a carding factory at Simsbury, Conn. He was engaged in the private practice of his profession at Simsbury and Hartford from 1805 to 1817, and was a judge of the county court of Hartford. He was several times a member of the house of representatives and of the senate of his native state; was speaker of the house of representatives in the legislature in 1821 and 1829; was a representative in congress from Connecticut from 1819 to 1821, and also from 1825 to 1829, was comptroller of the state from 1830 to 1831, and in 1835 was appointed one of the commissioners to revise the statutes of Connecticut. He died at Simsbury, in April, 1817.

PLAYER, John, inventor, was born at Woolwich, England, March 5, 1817, son of John and Mary (Hook) Player. He was educated at the elementary schools of his native country, studied engineering at the Woolwich Arsenal and in 1873 came to America. He secured a position as machinist with the Iowa Central railroad, was soon appointed foreman, and for nine years was master mechanic. From 1887 to 1890 he was superintendent of motive power on the Wisconsin Central railroad, but during the latter year removed to Topeka, Kan., to take charge of the mechanical department of the Atchison, Topeka and Santa Fe railroad, being in 1897 appointed mechanical superintendent of the entire system.

Mr. Player's inventions are: the Player cast steel truck, compound engines, and a marine boiler. He is a 32d degree Mason. In December, 1866, he was married to Charlotte Jacobs, of England, and has six children.

MCCHENEY, William J., naval officer, was born in Pennsylvania in 1796. He was appointed midshipman, Jan. 1, 1812, and as such participated in the action between the Wasp and the Frolic, Oct. 18, 1812. He was promoted lieutenant, April 1, 1818; commander, Dec. 9, 1839, and captain, Oct. 13, 1851. He accompanied Com. Perry's expedition to Japan in 1856, in command of the Powhatan; after which he was employed in supervising the construction of the Stevens battery at New York, and from 1858 to 1860 was in command of the Atlantic squadron. In 1862 he was retired with the rank of commodore. He died in Brooklyn, N. Y., Feb. 11, 1864.

SIMKINS, Eldred, lawyer and congressman, was born in Edgefield district, S. C., Aug. 29, 1779, son of Arthur Simkins, jurist, and for twenty years after the revolutionary war a member of the general assembly. Eldred was educated for the bar at Litchfield, Conn., and was admitted to the bar of South Carolina in 1805, beginning to practice at Edgefield court house in the following year. In

1812 he was elected lieutenant-governor of South Carolina, and in 1817-21 was a representative in congress, succeeding John C. Calhoun, who had become a member of Pres. Monroe's cabinet. He refused to be nominated for a third term, and retired in favor of his law partner, George McDuffie, the distinguished orator, who was afterward governor of South Carolina. He was repeatedly a member of the legislature, and as a lawyer was employed in many important cases, but his health was always delicate, and during his later years he was unable to practice continuously. He was a general of militia. His death occurred at Edgefield, S. C., in 1832.

BLEECKER, Harmanus, lawyer and congressman, was born in Albany, N. Y., Oct. 19, 1779. He entered Union College, but before his course was completed was admitted to the bar in Albany, where for many years he practiced in partnership with Theodore Sedgwick. He was a member of congress from New York in 1811-13, and took a strong stand in opposition to the war of 1812. He was appointed by Pres. Van Buren, in 1839, chargé d'affaires at the Hague, where he remained until 1842. In 1822-34 he was a regent of the University of New York, and received from it the degree of LL. D. He died in Albany, N. Y., July 19, 1849.

GIBSON, Robert Williams, architect, was born at Essex, England, Nov. 17, 1834, son of Samuel Lodwick and Eliza (Williams) Gibson, and

descendant of a long line of Yeomen. He was admitted to the architectural school of the Royal Academy of Arts in 1875; took silver medals for architectural drawing in 1877 and 1878, and was graduated in 1879, taking the traveling studentship. During the year 1880 he traveled in Spain, France and Italy, making numerous studies and sketches, and contributing articles on technical subjects to various magazines. In 1881 he came to the United States and in 1887 was naturalized. His home in 1881-88 was in Albany, and he became the architect of the Protestant Episcopal Cathedral in that city, having submitted a design in competition. Private and public buildings in other parts of the city were erected by him, and success in the instance of the Commercial Bank led him to make a special study of bank buildings. He removed to New York city in 1888, having been appointed in competition architect of the United States Trust Co.'s building on

Wall street. In the same city he designed and erected the Fifth Avenue and Greenwich Savings banks, the Clearing House, the Coffee Exchange, the New York Eye and Ear Infirmary, the New York Botanical Garden Museum building, St. Michael's Church, and the Collegiate Reformed Church, West End avenue, not to mention many other buildings, public and private, which show the usual diversified character of an architect's work. Among structures elsewhere are club houses for the Seawanhaka-Corinthian Yacht Club at Oyster Bay, Long Island; the Rhode Island Hospital Trust Co.'s building, Providence, R. I.; the Norwich Savings Bank, Norwich, Conn.; Bank of Buffalo, Buffalo, N. Y.; Onondaga County Savings Bank, Syracuse, N. Y.; Savings Bank of Utica, Utica, N. Y.; The Merchants and Mechanics Bank of Scranton, Pa.; Hearst School for Girls, Washington, D. C.; Cathedral Church of St. Paul, Buffalo, N. Y.; Episcopal churches at Olean, Sing Sing, Corning and Mechanicsville, New York state, and at Plainfield, N. J.; St. John's Church, Northampton, Mass.; Randall Memorial Church, Sailor's Snug Harbor, N. Y., and Sailor's Snug Harbor Music Hall. Mr. Gibson was a director of the American Institute of Architects, and served for two terms as president of the Architectural League. He is also a member of the Chamber of Commerce of the State of New York; the Century Association of New York city; the National Arts Club; the Botanical Gardens Society, and the Seawanhaka-Corinthian Yacht Club. He is an occasional contributor to magazines upon technical subjects. He was married in New York city, Sept. 1, 1900, to Caroline, daughter of D. S. Hammond, and has four children.

BEMAN, Solon S., architect, was born in Brooklyn, N. Y., Oct. 1, 1853. He was educated in the public schools of Brooklyn. He determined to study architecture, and entered the office of Richard M. Upjohn. He removed to Chicago, Ill., in 1879, began the practice of his profession, and has acquired a reputation as one of the leading and most prominent architects of the United States. He designed all of the buildings that compose the town of Pullman, Ill., now a part of Chicago, as well as those of Ivorydale, near Cincinnati, O., and the extensive works for Messrs. Procter & Gamble, near Cincinnati, O. Among the other prominent buildings designed by him are: the Pullman building, Studebaker building, Fine Arts building, Grand Central railway station, and many churches and large residences in Chicago; the Pioneer Trust building, St. Paul; the "Bee" building, Omaha; the mining buildings for the World's Columbian exposition and the Omaha exposition; the Pabst building, the Northwestern Mutual Life building, of Milwaukee, and the Michigan Trust Co.'s building at Grand Rapids. He was married, April 30, 1888, to Mary H., daughter of H. R. Miller, of New York.

VAN BRUNT, Henry, architect, was born in Boston, Mass., Sept. 5, 1832, the son of Com. Gershom J. Van Brunt, of the U. S. navy, and Elizabeth Bradlee, his wife. Henry was graduated at Harvard University in 1854, and for two years studied architecture in the office of George Snell, of Boston, on the English system, and afterward enjoyed the advantages of a course of instruction according to the system of the École des Beaux-Arts

under Richard M. Hunt, of New York. The civil war breaking out shortly after this, Mr. Van Brunt entered the naval service on the staff of Adm. Goldsborough, and later of Adm. Lee, commanding the north Atlantic squadron. After his return he entered into partnership with Wm. R. Ware, in 1863, under the style of Ware & Van Brunt, and practiced architecture with him in Boston for eighteen years, during which the principal works of this office were the memorial hall of Harvard University, Weld Hall, the new library, the medical school and other works connected with that institution, all the buildings of the Episcopal Theological School at Cambridge, the library of the University of Michigan, Stone Hall of the sanitarium, and other buildings of Wellesley College, and several town libraries in various parts of New England; the First Church, in Boston; St. Stephen's, in Lynn; Grace Church, in New Bedford, and many others, including also dwelling houses and mercantile buildings. After Mr. Ware became professor of architecture in the school of mines, Columbia College, Mr. Van Brunt in 1881 formed a new partnership with F. M. Howe, who had previously had a long connection with the office of Ware & Van Brunt. This partnership still continues in active practice, and the field of its operation having been widely extended in the West, Mr. Howe for several years represented the firm in its western office in Kansas City, Mo. The practice in that part of the country increasing widely, Mr. Van Brunt finally removed to Kansas City, where the principal office of the firm is now located. Their practice has here been mainly in railroad and commercial buildings, throughout nearly all the western and in some of the middle states. Among these buildings are the great warehouses in Kansas City for Bullens, Moore, Emery & Co.; for the Robert Keith Furniture and Carpet Co., and many other mercantile and domestic buildings; the Union passenger stations at Ogden, Utah; at Sioux City, Ia.; at Portland, Ore., and at Omaha, Neb., where also the firm has erected several banking, office and other commercial buildings and dwelling houses. Among their works is a series of railway stations on the lines of the Union Pacific railroad. They have also built office buildings at Baltimore, Md.; at Augusta, Ga., and elsewhere, and the libraries of the city of Cambridge and the town of Dedham, Mass. In 1891 this firm had the honor of being invited to form one of the board of five architects, chosen outside the city of Chicago, to represent at the World's Columbian exposition the interests of the nation in architecture. The designing of the five buildings around the great court of the exposition was entrusted to this board, and the electricity building fell to the share of Van Brunt & Howe. The principal architects of Chicago were employed on the great buildings outside of this court. Mr. Van Brunt in 1875 completed a translation of the "Entrée des" of Viollet-le-Duc, and it was published under the title of "Discourses on Architecture," with an essay. He has been a frequent contributor to the "Atlantic Monthly," "The Nation," and to several professional publications on architectural subjects, and in 1892 a series of papers by him on the architecture of the Columbian exposition was printed with illustrations in the "Century Magazine." In 1894 Houghton & Mifflin published a volume of architectural essays by Mr. Van Brunt, entitled "Greek Lines." In 1898 he was elected president of the American Institute of Architects.

CARRERE, John Merven, architect, was born in Rio Janeiro, Brazil, Nov. 9, 1858, son of John Merven and Anna Louisa (Maxwell) Carrere, both Americans. His paternal ancestors, natives of Libourne,

France, came to the United States during the French revolution and settled in Baltimore. He is related to the Walshes, Calhouns and Buchanans. His mother was a daughter of Joseph Maxwell, prominent merchant and founder of the house of Maxwell, Wright & Co., of Rio and Baltimore, of which subsequently John M. Carrere, Sr., became senior partner. The son was educated at the public schools in Lausanne, Switzerland, and at the Institute of Biedenstein, Greuchen. In 1877 he entered the Ecole des Beaux-Arts in Paris and remained until 1882, his studies being conducted under the special direction of Prof. Victor Ruprich Robert, inspector-general of historical monuments in France, and Leon Gimain, architect of the School of Medicine and of the Museum Galliera and member of the Institute of France. On his return to the United States he devoted a year to the construction of the first panoramas in New York and Chicago. In 1883 he entered the office of McKim, Mead & White and worked principally under Mr. Mead and Mr. McKim. In the spring of 1885 he began the practice of architecture, having formed a partnership with Thomas Hastings, a fellow student in Paris and later a fellow draughtsman in the office of McKim, Mead & White. Their first important work was started in the summer of 1885, and was the Ponce de Leon Hotel at St. Augustine, Fla., followed by the Alcazar, the Methodist Church and the Presbyterian Memorial Church in the same city. Their practice has been general in its character and comprises important private residences, churches, public buildings and other works, besides participation by request in a great many prominent competitions, notably, the competition for the Cathedral of St. John the Divine, in New York city. The principal buildings designed by Mr. Carrere and Mr. Hastings, besides those mentioned above, are the following: The Jefferson Hotel, at Richmond, Va.; Laurel in the Pines, at Lakewood, N. J.; Central Congregational Church, Providence, R. I.; residences of Henry T. Shane, F. B. Hoffman, C. A. Berter, R. M. Hoe, W. D. Sloane, in New York city; John Pitcairn, Bethayres, Pa.; C. H. Tenny, Methuen, Mass.; Walter Jennings, Cold Spring harbor; Giraud Foster, Lenox, Mass.; E. C. Benedict, Indian harbor, Greenwich, Conn.; "Mall and Express" building, in New York city; Paterson city hall, Paterson, N. J.; Rome High School, Rome, N. Y.; St. John's park, Hudson street, New York city; Hamilton

John Merven Carrere

Fish park, Houston street, New York city; buildings for Craig colony for epileptics at Sonyea for the state of New York; Branch Brook park, Essex co., for the state of New Jersey, and many other less important works. Being built at present, as the successful result of two notable competitions, are the New York Public Library, on Fifth avenue, New York city, and the National Academy of Design, on Cathedral heights, New York city. Mr. Carrere has participated in many reform movements, notably, in connection with the office of supervising architect of the government. He was the candidate of the

profession under Mr. Cleveland's second administration for that office, but declined the honor. He is chairman of the board of architects of the Pan-American exposition at Buffalo, and the designer of the block plan, all the landscape features, and of the triumphal entrance bridge. He is a member of the New York chapter of the American Institute of Architects, being president of the same for two terms; Beaux-Arts Society of New York, of which he was a founder and the president for two terms; delegate to the Fine Arts Federation; is a member of the Players', Century and City clubs, and the Architectural League of New York, and one of the founders of the Richmond County Good Government Club; also one of the founders of the Staten Island Club, being president for three terms. Mr. Carrere was married, in 1886, to Marion, daughter of Col. Charles Dell, of Jacksonville, Fla., and Amanda C. Bryan, of Savannah, Ga. They have two daughters, Anna and Marion Dell.

HASTINGS, Thomas, architect, was born in New York city, March 11, 1860, son of Thomas Samuel and Fanny (de Groot) Hastings. His father is a well-known Presbyterian clergyman, who for nine years was president of Union Theological Seminary, New York city; his grandfather was Dr. Thomas Hastings, a prolific composer of church music, while his first American ancestor was Thomas

Hastings, lawyer, who emigrated from England to the Massachusetts Bay colony in 1640. His ancestors on his mother's side were Dutch and French (Huguenots), her father being William de Groot, a merchant and writer on law, whose family name, in old times, was sometimes written in Latinized form, Grotius. One of his sons, De Groot, served in the Federal army during the civil war. Thomas Hastings was educated chiefly in private schools. He took a special course under tutors for two years for the distinct purpose of studying in the Ecole des Beaux-Arts, at Paris; in 1880 entered that institution, and

in 1884 was graduated. He there met John M. Carrere, a fellow countryman, and on his return to New York city was again associated with him in the office of McKim, Mead & White, where Mr. Hastings spent eighteen months. In 1885 Mr. Hastings and Mr. Carrere formed a partnership, and in the summer of that year began the erection of the Ponce de Leon Hotel at St. Augustine. The large scale on which it was projected, and the boldness of the young architects in departing from the conventional, excited great interest in the profession, and the appropriateness of the style of architecture used—the Spanish—was generally conceded. This was followed by the Aleazar, the Methodist Church and the Presbyterian Memorial Church in the same city. Carrere & Hastings also erected the Jefferson Hotel, Richmond, Va.; the hotel called Laurel in the Pines, Lakewood, N. J.; city hall, Paterson, N. J.; Union Congregational Church, Providence, R. I.; the "Life" and "Mail and Express" buildings, New York city; the house of E. C. Benedict at Indian harbor, Greenwich, Conn.; that of Girard Foster, Lenox, Mass.; of John Pitcairn, Bethayres, Pa.; of Dr. C. A. Hertz, Richard M. Hoe and Henry T. Sloane, New York city. In the competition for designs for the New York public library and the National Academy of Design, to be erected on Morningside Heights, they were suc-

cessful, and the library alone is sufficient to constitute a memorial to their talent. These examples show the wide range of their work, which includes also the decoration of pleasure grounds, such as St. John's Park, in New York city. Mr. Hastings gave a course of lectures on architecture at Harvard University in 1897. He has published articles in "Harper's Monthly Magazine" and in several technical journals. He has been a director in the Fine Arts Federation, the National Sculpture Society, the Société des Beaux-Arts, and the American Institute of Architects. He is a member of the Century Association and the Players' and City clubs, all of New York city. Mr. Hastings was married at Greenwich, Conn., April 30, 1900, to a daughter of E. C. Benedict.

STONE, Alfred, architect, was born at East Machias, Washington co., Me., July 29, 1834, son of Thomas Treadwell and Laura (Poor) Stone. His father was a Unitarian clergyman; his mother was a daughter of Sylvanus Poor, a farmer, of Andover, Me. He was educated at Washington Academy, East Machias, and at the English High School, Salem, Mass., whither he had removed with his parents in 1846. After studying architecture and drawing, at the completion of his high school course he entered an architect's office in Boston in 1852 and began practice by himself in 1856, after having served an apprenticeship in several offices in Boston. He designed the Hotel Pelham, the first French flat building erected in that city, in 1857-58, and in 1859 removed to Providence, R. I., where he formed an association with Alpheus C. Morse, continuing the relation until the outbreak of the civil war (1861). In 1864 he opened an office for himself in Providence, and still conducts an active practice under the firm name of Stone, Carpenter & Willson. During its forty years of business life, his firm has designed a very large number of both private and public buildings, among the latter of which may be named the Thayer street school; the Providence county court house; the Rhode Island state prison; Rhode Island state almshouse; Providence public library; the pumping station for the Providence water-works; the southwest pavilion of the Rhode Island Hospital; the New York, New Haven and Hartford railroad station, and other buildings connected therewith in Providence; the Lyman Gymnasium, Slater Hall, Pembroke Hall, The Brunonia, Ladd Observatory of Brown University, and many business blocks, among them the Union Trust Co., Industrial Trust, Lauderdale, Francis and Conrad buildings. Mr. Stone has always taken an interest in municipal affairs, and served in the common council during 1885-88, and was president of Providence Commercial Club. He is a prominent member of the American Institute of Architects; has served upon its board of directors, and for six years (1893-99) was its secretary; was one of the founders of the Rhode Island chapter of the American Institute of Architects, and for many years its presiding officer. Descended from several persons who served in the war of the revolution, he is a member of the Rhode Island chapter of the Sons of the American Revolution, having served both as its president and historian. He is president of the Providence Atheneum, an active member of the Rhode Island Historical Society and the Providence Art Club, and is a non-resident member of the Architectural League of New York.

McKIM, Charles Follen, architect, was born in Chester county, Pa., Aug. 24, 1847, son of James Miller and Sarah (Allibone) McKim. His father was a Presbyterian clergyman, and one of the founders of the American Anti-Slavery Society. The son studied at the Harvard Scientific School during the term 1866-67, and then went to Paris, where he en-

Thomas Hastings

tered the École des Beaux-Arts, and took the architectural course of three years under Daubigny. After a period of travel and study in European countries (1867-70) he returned to America and settled in New York, where in conjunction with William R. Mead and Stanford White he formed the architectural firm of McKim, Mead & White. The firm rapidly sprang into prominence, until now it is regarded as one of the leading firms of architects in America. It has produced work remarkable for variety, and has designed buildings in many cities of importance in the United States. This work consists of cottages

C. T. Gilbert

erected in Newport, Lenox and other summer resorts; the Boston Public Library, Madison Square Garden, New York; New York Life Insurance Co.'s buildings in Omaha and Kansas City, and the Tiffany house on Madison avenue, New York, which is Rhinish in style, and is pronounced by some authorities to be the finest example of architecture in America; St. Paul's Church, Stockbridge, Mass.; St. Peter's Church, Morristown, N. J.; the American Safe Deposit Co.'s buildings, New York; the Casinos at Newport and Narragansett Pier; the Music Hall at Short Hills, N. J.; the Golet building, on the cor-

ner of Twentieth street and Broadway, New York; the Algonquin club-house, of Boston; the Freundschafft club-house, of New York, and the Villard block of houses on Madison avenue, New York. In addition to these and a number of fine residences, theatres and public buildings, Messrs. McKim, Mead & White have designed many monuments and memorials, their most recent being the Washington statue in Paris. Mr. McKim is a member of the American Institute of Architects; the Architectural League; the Society of Mural Painters (honorary), and the National Academy of Design. He received the gold medal at the Paris exposition of 1900. He is keenly interested in the future of art and architecture in America, and founded the American Academy at Rome.

WHITE, Stafford, architect, was born in New York city, Nov. 9, 1853, son of Richard Grant and Alexina B. Meise) White. His father, was the famous critic, journalist, essayist, and for twenty years (1858-78) served as chief of the U. S. revenue marine bureau for the district of New York. His mother was a daughter of Charles Bruton Mease, of New York city. The original ancestor of the family was John White, who in 1632 came from England in the ship Lion, and settling at Cambridge, Mass., became a freeman in 1633 and 1634-35 was a salesman of the town. He removed to Connecticut with Pastor Hooker's company in 1836, becoming one of the founders and proprietors of Hartford, and later settling at Hadley, Mass., which he represented in the general court in 1664 and 1669, died there in 1683. From John White the line of descent runs through his son, Nathaniel White (1629-1711), of Middletown, Conn., which he frequently represented in the general court. His great-grandfather was Calvin White (1763-1853) for many years rector of St. James' P. E. Church, Derby, Conn., but in his latter years a Roman Catholic layman. His grandfather was Richard Mansfield White, a shipping merchant of New York city, and father of Richard Grant White. Stafford White was educated at private schools of New York and by tutors and received the degrees of A.M. from the New York University in 1883. He made his architectural studies in the office of Charles T. Gabriell and Henry

H. Richardson, being the latter's chief assistant in the construction of Trinity Church, Boston. During 1878-80 he traveled and studied in Europe and on his return in 1881 formed a partnership with Charles F. McKim and William R. Mead under the style of McKim, Mead & White. The name of this firm is associated with some of the most notable architecture of the country, many examples being from Mr. White's own designs. He was the architect of the Villard house, on Madison avenue, New York, now the property of Whitelaw Reid, of the Madison Square Garden; the Century and Metropolitan club houses; the Washington arch, on Washington square, New York; the building of the New York University, University heights, New York; the University of Virginia, and many private residences throughout the Union. Among his most conspicuous special works are the architectural features for the sculptures of Augustus St. Gauden's, notably the pedestal of the Farragut statue, Madison square, New York city; the pedestal for the Chapin statue, Springfield, Mass.; the pedestals for the Lincoln and Logan statues, and the Adams tomb, Washington, D. C. In designs for interiors he has done some excellent work, shown in the Players' and Metropolitan club houses, the Villard residence, the Church of St. Paul the Apostle, and the Church of the Ascension, New York city. Mr. White is a member of the Institute of Architects, of the Metropolitan, University, Grollier, Players, Century and Medowbrook clubs of New York city, as well as numerous artistic and literary organizations. In 1884 he was married to Bessie, daughter of Judge J. Lawrence Smith, of New York, a descendant of Col. Richard Smith, the original patentee of Smithtown, Long Island, and of Gen. Nathaniel Woodhull, who fell at the battle of Long Island. They have one son, Lawrence White Grant.

GILBERT, Cass, architect, was born at Zanesville, Muskingum co., O., Nov. 28, 1859, son of Samuel A. and Elizabeth (Wheeler) Gilbert, and grandson of Charles Champion Gilbert, first mayor of Zanesville, and a native of Connecticut. His father (18—) was an officer in the U. S. coast survey, who in the civil war was lieutenant colonel of the 24th Ohio volunteer infantry, colonel of the 4th Ohio volunteer infantry, and subsequently brigadier general. His mother was the daughter of Benjamin Wheeler, of Zanesville. She was a woman of exceptional courage and distinguished character and ability. Mr. Gilbert's parents removed

to St. Paul in 1868 and he was educated in that city and at the Massachusetts Institute of Technology, Boston. He left the institute in 1879, receiving the American Institute of Architects' prize for the year. He served during the ensuing season on the U. S. coast survey and traveled and studied in Europe. Returning to New York city he entered the office of McKim, Mead & White and remained with them for several years. He opened an office in St. Paul, Minn., Jan. 1, 1883, and has been steadily engaged in practice since. He was a member of the national jury of selection at the Columbian exposition in Chicago.

1893; a member of the jury on the selection of the design for the New York public library, 1897, and the architect of the new state capitol at St. Paul, which work was awarded him in competition in October, 1895. He designed the Brazer building, Boston, Mass.; the Broadway Chambers, New York; the Endicott building, St. Paul; the Dayton Avenue Church, and St. Clement's Episcopal Church in the same city and a number of other churches and business buildings in different parts of the United States. Mr. Gilbert was married in Milwaukee, Wis., in 1897, to Julia Tappan, daughter of Hon. H. M. Finch, of that city, and has one son and three daughters.

LORING, George Fullington, architect, was born in Boston, Mass., March 26, 1851, son of George and Harriet A. (Stoodley) Loring, and a descendant of Thomas Loring, an original settler of Hingham, Mass. His father and grandfather were sea captains by occupation. His maternal grandfather, William F. Stoodley, was prominently connected with the political affairs of New Hampshire, and held the position of fish commissioner at Portsmouth, N. H. George Fullington Loring was educated in the schools of Boston. He paid special attention to all studies tending to prepare him for the architectural profession. From 1868 to 1882 he was employed in the city surveyor's office in Boston. After serving in an architect's office, in 1884 he opened an office on his own account. In 1888 he formed a partnership with Sanford Phipps, under the firm name of Loring & Phipps. This is recognized as one of the leading architectural firms of New England. They have erected hundreds of buildings, among which the following are worthy of special mention: Masonic Temple of Boston; buildings for Henry O. Havemeyer, at Greenwich, Conn.; High School at Montclair, N. J., and schools for Brookline, Somerville, Everett, Braintree, Mass.; Lakeville, Conn.; preparatory schools for Yale, and they have built schools and office buildings throughout New England. They have erected about fifty public buildings and many of the private residences in Newton and the suburbs of Boston. Mr. Loring's architectural designs are conspicuous on account of originality and artistic merit. He possesses the rare faculty of combining beauty with inexpensiveness of construction. He was married to Sarah F., daughter of John B. and Sarah A. (Poor) Johnson, a lineal descendant of Capt.

Edward Johnson, of Woburn, Mass., author of the "Wonder Workings of Providence in New England." His children are: Ernest Johnson, Ralph Stoodley, Gladys and Marjorie Loring.

EYRE, Wilson, architect, was born in Florence, Italy, Oct. 30, 1858, son of Wilson and Louisa (Lear) Eyre. His father, a native of Philadelphia and a man of means, has spent many years of his life abroad. His mother is a daughter of Benjamin Lincoln Lear, of Washington, D. C. He began his education in Italy, and coming to America in 1870, attended school in Philadelphia, Pa., and Newport, R. I., for a year each, then at Bishop's College School, Lenoxville, Canada (1873-74), completing his preparation for college at Woburn, Mass. (1875). In 1876 he entered the Massachusetts Institute of

Technology, Boston, and took a year's course in architecture, after which he completed his professional studies in the office of Joseph P. Sims, in Philadelphia. On the death of Mr. Sims, in 1881, he opened an office for himself, and has since continued with increasing reputation and success. He has designed many buildings of a public and private character, not only in Pennsylvania, but in New York, Michigan, Maryland, Louisiana, Maine, Rhode Island and other states. Among the best specimens of his skill are the City Trust and Safe Deposit Co., Philadelphia, and the Detroit Club. Mr. Eyre is gifted with high artistic talent, and besides being thoroughly equipped as an architect, is a fine painter and musician. He is a member of the Philadelphia, Art, T Square, Pegasus and Melody clubs, and the Archaeological Society, all of Philadelphia, and of the Art League, of New York city.

MARSHALL, Henry Rutgers, architect and author, was born in New York city, July 22, 1852, son of Henry Perry and Cornelia E. (Conrad) Marshall. His descent is traced from Edward Marshall, who removed from Barbadoes, West Indies, to New York city late in the seventeenth century, and in 1703 was buried in the old vault in Trinity church yard. His son, John, was married to Elsie Rutgers, and their son, John Rutgers Marshall (1743-1789), was a Protestant Episcopal clergyman, in Woodbury, Conn.; he was active in the councils of his church, and it was in his house that the first Protestant Episcopal convention in America was held. He was married to Sarah Bryan, and their son, John Panet, was Mr. Marshall's grandfather; he was married to Julia Perry. Henry Rutgers Marshall was prepared in private schools, and was graduated at Columbia College in 1873, receiving the degree of A.M. two years later. After engaging in business for a year he studied architecture, and in 1878 entered upon that profession. He has acquired a large and varied practice, spread over a wide area of the United States. Among his more notable examples are the country houses for H. R. Kunhardt, at Bernardsville, N. J.; for Helen M. Gould, at University Heights, N. Y., and for Rudyard Kipling, at Brattleboro, Vt.; the Congregational church, Colorado Springs, Col.; the Storm King club-house, Cornwall, N. Y.; the Terry Memorial Gymnasium, Norfolk, Conn.; the Bryn Mawr School, Baltimore, Md.; the Tarrant building, New York. Mr. Marshall has given much attention to psychology and philosophy, and is a recognized authority in Europe and America in aesthetics and psychology. As honorary lecturer he delivered in 1894 a series of lectures at Columbia University upon aesthetics, and he has also lectured at Harvard University; before the Nineteenth Century Club of New York City, in 1895; the Contemporary Club of Philadelphia, in 1898, and before other colleges and philosophical societies. In the winter of 1899-1900 he lectured in the Yale Art School on "Expression in Architecture." He is a member of the Society of Colonial Wars, the Century Association, and the University Club of New York city. He has been prominent in the councils of artistic societies, and was a member of the special committee of the Fine Arts Federation, which formulated the section of the new charter of New York city creating the Municipal Art Commission. The establishment of this commission led to the appointment of similar bodies in many other cities of the United States. In 1901 he was a member of the jury of awards for architecture at the Pan-American exposition. Mr. Marshall has written many articles relating to the nature of emotion, desire, pleasure

George F. Loring

and pain, evolution, religious instinct and expression, besides those concerning strictly architectural topics, for "Mind" (London); the "Philosophical Review" (New York); the "Psychological Review" (New York and London); the "American Journal of Psychology"; the "Journal of Nervous and Mental Diseases" (New York); the "Architectural Review" (Boston); "Scribner's Magazine"; "International Journal of Ethics"; the "Century Magazine," and the "Dictionary of Architecture." He has published "Pain, Pleasure and Esthetics" (1894); "Esthetic Principles" (1895), and "Instinct and Reason" (1898). He was married, May 18, 1881, to Julia R., daughter of Winthrop S. Gilman. She died in 1887, leaving one daughter, Serena Gilman Marshall.

HARDENBERGH, Henry Janeway, architect, was born at New Brunswick, N. J., Feb. 6, 1847, son of John Pool and Frances Eliza (Eddy) Hardenbergh. His first ancestor in this country on his father's side, it is supposed, was Jan van Hardenbergh, who came over in 1644 from Amsterdam. Maj. Johannes Hardenbergh, grandson of Jan van Hardenbergh, born about 1670 at Albany, was high sheriff of Ulster county, N. Y., in 1690, under commission of Gov. Lovelace; was again appointed in 1709 under Gov. Lovelace; was trustee of the town of Kingston 1707-09-12; a major of the Ulster county militia in the regiment of Col. Jacob Rutsen, 1728, and afterwards colonel of the same regiment. He was principal proprietor of the great Hardenbergh patent, embracing 2,000,000 acres of land in the counties of Ulster, Orange, Green, Sullivan and Delaware, in the state of New York. This patent was obtained by purchase from the Indians in 1706, and was confirmed by Queen Anne, April 23, 1708. Col. Joannes (or Johannes) Hardenbergh, son of Maj. Johannes Hardenbergh, was born at Kingston, Ulster co., N. Y., June 1, 1706, and died Aug. 20, 1786. He was a member of the colonial assembly in 1743-50 and a member of the state legislature in 1781-82. He was a member of the first provincial congress, by which he was commissioned a colonel in the regular army, Oct. 25, 1775.

His son, Rev. Jacob Rutsen Hardenbergh (1736-90), D.D., S.T.D., was largely instrumental in securing the charter for Queens, now Rutgers, College, New Jersey, and became first president of the same in 1785. From this scholar and divine Henry Janeway Hardenbergh is fourth in descent. The latter's mother was a native of Providence, R. I., and was descended from Samuel Eddy, son of Rev. William Eddy, of Crambrook, Kent, England. In 1630 Samuel Eddy settled in Plymouth, Mass., whence he or some of his descendants removed to Rhode Island, there intermarrying with the family of Roger Williams. Henry J. Hardenbergh received a thorough grammar school education, and in the year 1863 entered the office of Detlef Lienau, in New York, where he studied architecture for seven years. He then opened an office of his own, and has been steadily engaged ever since. The following is a partial list of buildings erected from his designs and under his direction in New York city: Vaneorleart apartment house (1878); Hotel Albert (1883); Dakota Hotel, Central Park west (1884); Western Union buildings at Twenty-third and at Broad streets (1884-85); Astor (office) building, Wall street (1885); London and

Lancashire Insurance Co. (office) building, William street (1890); addition to Western Union building, Dey street (1891); Waldorf Hotel, Fifth avenue (1891); American Fine Arts Society building, Fifty-seventh street (1892); Manhattan Hotel, Forty-second street (1895); Astoria Hotel, Fifth avenue (1896); and Hotel Martinique, Thirty-third street (1897). Among buildings in other places are the Clark museum, Williams College, Massachusetts (1881); the Gould Memorial Church, Roxbury, N. Y. (1894); and the Hotel Raleigh, Washington, D. C. (1898). Mr. Hardenbergh was one of the founders of the American Fine Arts Society and the Municipal Art Society, being secretary of the former for several years; is a member of the American Institute of Architects, and was at one time vice-president of the New York chapter, and is a member of the Architectural League, National Sculpture Society, and the Grolier, Century, Players', Church and Riding clubs. He was married in New York city, July 27, 1893, to Emily Irene, daughter of John W. Leeds, of Stamford, Conn., a direct descendant of Miles Standish.

TILTON, Edward Lippincott, architect, was born in New York city, Oct. 19, 1861, son of Benjamin W. and Mary (Baker) Tilton. He attended Chappqua Institute, Westchester county, N. Y., for a few years, and at the age of sixteen entered the banking office of Corlies, Macy & Co., but the profession of architecture being more to his taste, he worked as draughtsman for McKim, Meade & White for a year. In 1887 Mr. Tilton went to Paris and entered the Ecole des Beaux-Arts. Here he studied for three years, part of the time being spent in traveling through France, Spain and Italy with his fellow-student, William A. Boring, with whom, in 1890, he formed a partnership in New York city, under the firm name of Boring & Tilton. Among their important buildings is the immigrant station for the U. S. government, on Ellis Island, New York harbor, which was awarded them in competition with five other prominent architects. This was the first application of the Tarsney act, under which the secretary of the treasury is empowered to invite architects to compete for government work. In 1895 Mr. Tilton was selected by the American Institute of Archaeology to go to Greece, with the object of studying the remains of the famous Heraeum near Argos, lately excavated by the American School of

Edw. L. Tilton

Classical Studies at Athens. Mr. Tilton is president of the Society of Beaux Arts Architects and a member of the American Institute of Architects; the Architectural League; National Sculpture Society; New York Historical Society, and American Geographical Society, and is recognized as one of the most prominent younger members of the new school of American architects, whose achievements are astonishing the world. Mr. Tilton was married on June 5, 1901, to Mary Eastman, daughter of Charles C. Bigelow, of Mount Vernon, N. Y.

H. J. Hardenbergh

LORD, Austin Willard, architect, was born at Rolling Stone, Winona co., Minn., June 27, 1869, son of Orville Morrell and Martha Elizabeth (Deming) Lord, and grandson of Stephen Sherman Lord, a native of Saratoga county, N. Y., who was the eldest son of Freedom and Eunice (Pritchard) Lord, natives of Connecticut, who settled in Saratoga county, N. Y. Freedom Lord was the fourth son of Joseph Lord, a soldier in the revolutionary war, who was born near Hartford, and died in 1833, aged 104. Mr. Lord was educated in the public and normal schools of Winona, and was then employed in architects' offices in St. Paul and Minneapolis. In 1888 he entered the Massachusetts Institute of Technology, where he took the special architectural course founded by Prof. Ware, and at the end of one year entered the office of Rotch & Tilden, of Boston. In 1888 he was awarded the Rotch traveling scholarship offered to any draughtsman of two years' experience in a Massachusetts architect's office, and, going abroad, spent one year in Paris in the atelier of Daumet Girault, and another in travel and further study. On his return he entered the office of McKim, Mead & White, where he remained until the autumn of 1894. In that year he was appointed director of the American School of Architecture in Rome, and held the position for two years. During his stay

with McKim, Mead & White he was engaged upon such important work as the new Columbia University buildings, the Brooklyn Institute of Arts and Sciences buildings, and the Metropolitan Club of New York city. In 1894, prior to going abroad, he entered into partnership with James M. Hewlett and Washington Hull, under the name of Lord, Hewlett & Hull, a firm which still continues and holds a high place in New York city and throughout the country. Mr. Lord is a member of the Architectural League and the Beaux Arts Society. He was married,

Jan. 4, 1887, to Margaret Elizabeth, daughter of A. W. and Christiana E. Gages of Winona, Minn. They have one son and two daughters.

HEWLETT, James Monroe, architect, was born at Lawrence, Long Island, N. Y., Aug. 1, 1868, son of James Augustus and Mary Elizabeth (Sanderson) Hewlett. He was prepared for college at the Polytechnic Institute, Brooklyn, and in 1886 entered the Columbia School of Mines, where he took a full course in architecture under Prof. William R. Ware, and was graduated in 1890. He entered the office of McKim, Mead & White, architects, and after a year and a half in their employ went to Paris for two years' study under Pierre Victor Galland, the celebrated French architect and decorator. Returning to America in the spring of 1893, he was again employed by McKim, Mead & White, and in the autumn of 1894 formed the firm of Lord, Hewlett & Hull. In addition to regular architectural work, Mr. Hewlett has given much attention to interior decoration. Among the many buildings designed by this firm are the reading room of Grace Episcopal Church, Brooklyn; the Rockaway Hunt Club house, Cedarhurst, Long Island; public school houses at Stapleton and Mount Vernon; elaborate country residences at Cedarhurst and Lawrence, Long Island, Bernardsville, N. J., and other places; the elegant residence of William A. Clark, at Fifth avenue and Seventy-seventh street, New York, and Mr. Clark's mausoleum at Woodlawn cemetery.

The firm also won the second prize in competition for designs for the Museum of Fine Arts building, Philadelphia, Pa., in 1895, and one of the ten equal prizes out of eighty-eight designs offered in competition for the great New York public library in 1897. Mr. Hewlett is a fellow of the American Institute of Architects; a member of the New York Architectural League; of the Brooklyn Institute of Arts and Sciences; the Alpha Delta Phi Club of New York, and the Crescent Athletic, of Brooklyn. He was married, March 29, 1894, to Anna, daughter of Edward Bowne Willets, of Brooklyn, and has two sons and two daughters.

McDOUGALL, James Alexander, senator, was born at Bethlehem, Albany co., N. Y., Nov. 19, 1817. He was educated in the Albany Grammar School and became an assistant engaged on the survey for the Albany and Schenectady railroad, the first ever built in America. Later he studied law, adopted the profession and settled in Cook county, Ill., in 1837. He was one of the most brilliant men ever connected with the Chicago bar, of which he was termed one of the pioneers. In 1842 he was chosen attorney-general of Illinois and was re-elected to the office in 1844. Upon the outbreak of the gold craze, in 1849, he organized an exploring expedition and accompanied it to Rio del Norte, the Gila, and Colorado, but afterwards emigrated to California. He lost his way among the mountains, wandering about for a long time and barely escaping starvation, and upon finally reaching San Francisco, was clothed in skins and rags. The hospitality of a former client was tendered him, however, and he was soon afterward given a number of cases in court, thus establishing a practice. In 1850 he was elected attorney-general of California, and in 1853 became a Democratic representative in congress, serving until 1855, when he declined a re-nomination. He was later elected a senator in congress, serving from 1861 to 1867, and acting as a member of the committees on finance and naval affairs, and as chairman of the committee on the Pacific railroad. As a war Democrat he was a delegate to the Chicago convention that nominated McClellan for the presidency in 1864, and to the national union convention held at Philadelphia in 1866. An eloquent and effective speaker, he was gifted both as an orator and as a statesman; but his career was cut short by intemperance. Upon the expiration of his senatorial term he retired to Albany, N. Y., where his death occurred, Sept. 3, 1867.

WILLIAMS, John S., lawyer, was born at Lockport, Niagara co., N. Y., Dec. 14, 1825, son of George and Elizabeth (Haynes) Williams. His earliest American ancestor, John Williams, an architect, was born in Shropshire, England, and after emigrating to this country settled in Boston. After receiving a liberal education he studied law, was admitted to the bar, and engaged in the practice of law. In 1853 he removed to Lafayette, Ind., where he continued the practice of his profession, and in 1856 was elected mayor of that town, being re-elected in 1858. After retiring from office he resumed the practice of law, and was for some time editor of the Lafayette "Daily American." In the fall of 1861 he was authorized by Gov. Morton to recruit the 63d regiment of Indiana volunteers, and was commissioned colonel of the regiment. He was present with the 1st battalion of his regiment at the second battle of Bull run, but in July, 1863, was compelled by ill-health to resign his commission. He returned to the practice of his profession, and in 1866 was appointed by Pres. Johnson collector of internal revenue for the 8th district of Indiana, holding the office until the beginning of a new administration in 1869. Subsequently he be-

Austin W. Lord.

came the publisher of the Lafayette "Sunday Times." In April, 1855, he was appointed third auditor of the U. S. treasury department.

WILLIAMS, George Burchell, financier, was born at Lockport, Niagara co., N. Y., Dec. 5, 1842, son of George and Elizabeth (Haynes) Williams, and brother of John S. Williams. He was educated at the Lockport Union Academy, and in 1858 removed to Lafayette, Ind., where he engaged in banking and mercantile pursuits. In 1861 he served as an officer in the Federal army under a special call for troops from the governor of Indiana and the president. In 1868 he was appointed supervisor of internal revenue for the state, an office created by congress to check the political power of Pres. Johnson, and in 1869 was appointed by Pres. Grant deputy commissioner of internal revenue at Washington. In 1871 Pres. Grant was requested by the emperor of Japan to recommend some person to assist his ministers of finance in the reorganization of the fiscal system of the empire, and he chose Mr. Williams. The latter proceeded to Japan, where he was commissioned financial adviser to the Japanese government, which position he occupied for about five years. In 1872 and again in 1875 he was a special commissioner of Japan to Europe in connection with financial affairs; resigned the office in November, 1875, and returned to the United States in 1876. In 1884 he was a delegate to the Republican national convention at Chicago. Since 1886 Mr. Williams has resided in Washington, but has frequently visited Japan and Europe in connection with fiscal matters. He is a member of the Metropolitan Club and the National Geographical Society, Washington, D. C., and the Strollers and New York Yacht clubs, New York city. In 1873 he was married, in Paris, France, to a daughter of Gen. Lauren Upson, of Sacramento, Cal.

DeWITT, William Cantine, lawyer, was born at Paterson, N. J., Jan. 25, 1840, son of Moses Edwards and Lydia Ann (Miller) DeWitt. His father was a prosperous merchant of Paterson, and his mother a daughter of David Miller and sister of Jacob W. Miller, attorney-general of New Jersey and later U. S. senator. His earliest American ancestor was Tjerk Claason DeWitt, cousin of John DeWitt, grand pensionary of Holland; his great-grandfather, Charles DeWitt, a member of the Continental congress, prepared the original draft of the New York state constitution, and his grandfather, John DeWitt, was lieutenant-colonel of the Ulster volunteers in the revolutionary war. Gov. DeWitt Clinton was a near relative of the family. Mr. DeWitt settled in Brooklyn in 1845. He received his education at Fort Plain and Claverack seminaries and then studying law, first with James R. Whiting and afterwards with Ambrose L. Jordan, was admitted to the bar at the general term of the supreme court at Poughkeepsie in June, 1861. In the same year he began to practice in Brooklyn for himself, and became particularly interested in the law of corporations. A Democrat in politics, his natural ability soon brought him general recognition among the leaders of his party, while his speeches in state conventions and other political gatherings demonstrated his remarkable ability as an orator. Mr. DeWitt held the office of corporation counsel of Brooklyn for six successive terms (1869-83). When, in 1883, Judge Tracy resigned from the bench of the court of appeals the firm of Tracy & DeWitt was formed by himself and Mr. DeWitt, and this connection continued until its dissolution in 1885. Since that date Mr. DeWitt has practiced alone. Mr. DeWitt was appointed on the commission to draft a charter for Greater New York by Gov. Morton on June 9, 1896. He was made chairman of the com-

mittee on draft, and as such drew up a complete charter for the new city. His powers as an orator have brought him wide reputation, as have also his graceful methods of expression in his numerous writings. He has published "Opinions of William C. DeWitt" (1881), a volume which attracted general attention and was widely read, and "William Swinton," an address (1892). Mr. DeWitt enjoys a wide social popularity and is a member of the Brooklyn, Hamilton, Crescent, Cullton and Germanic clubs and Institute of Arts and Sciences, all of Brooklyn.

WHITEHOUSE, Henry John, second P. E. bishop of Illinois, and fifty-fifth in the succession of American bishops, was born in New York city, Aug. 19, 1803. He was graduated at Columbia College in 1821, and at the General Theological Seminary in New York city in 1824. He was made deacon in Grace Church, New York city, on Oct. 10, 1824, and was ordained a priest by Bishop White in Christ Church, Philadelphia, Aug. 26, 1827. He immediately entered upon the charge of Christ Church, Reading, Pa., of which he remained rector until 1830. In that year he assumed the rectorship of St. Luke's parish, Rochester, N. Y., an office he held for fifteen years. In 1844 he was called to the charge of St. Thomas, New York, and was connected with that church until 1851, when he was elected assistant bishop of Illinois as coadjutor to the aged Bishop Philander Chase (q. v.), who was first bishop of Ohio and first of Illinois. He was consecrated Nov. 20, 1851, and upon the death of Bishop Chase in the following year he succeeded to the see. In 1867 he went to England, and, as a compliment to the active part he took in the preliminary measures attending the Lambeth Pan-Anglican conference, he was invited to deliver the opening sermon, Oxford, England, conferred upon him the degree of D. D.; Cambridge, England, gave him that of LL. D., and in 1865 Columbia also made him LL. D.

Bishop Whitehouse was one of the most eloquent prelates of the church, and he played a large part in what is known as the Cheney case, which led to the formation of the Reformed Episcopal church. Command of words and a precision of diction marked his oratory, and his views held great weight with his brother bishops and with foreign communions. He was responsible for the adoption of the cathedral system in this country, being its first advocate, and founded the SS. Peter and Paul's Cathedral, Chicago. His annual addresses are contained in the journals of the diocese of Illinois during the time of his occupancy of the see. He was married to Evelina Harriet, only daughter of Matthias Bruen, of Raritan house, Perth Amboy, N. J. He died in Chicago, Ill., Aug. 10, 1874.

McLAREN, William Edward, third P. E. bishop of Chicago, and 114th in the succession of American bishops, was born at Geneva, N. Y., Dec. 13, 1831, son of Rev. John Finlay and Mary (McKay) McLaren, and grandson of Finlay McLaren, of Callander, Scotland, who migrated to the United States about 1793, and settled in Albany, N. Y. His father (1803-83) was a Presbyterian divine; was for some years president of the University of Western Pennsylvania, and from 1862 to 1865 chaplain of the 10th Pennsylvania reserves, army of the Potomac. He was brought up in his father's faith. He was educated at the Western University of Pennsylvania, and at Jefferson College, Washington, Pa., where

he was graduated in 1851. He received the degrees of A. M. from Jefferson, in 1854, D. D. from Racine College in 1873, and D. C. L. from the University of the South in 1882. After leaving school he engaged in teaching and editorial work in Cleveland, O., and Pittsburgh, Pa., but in 1857 entered the Presbyterian Seminary at Pittsburgh, with a view to becoming a missionary to the Chinese. In 1860 he was ordained to the Presbyterian ministry, and went to Bogota, South America, instead of to China, as he originally intended. Failing health called him back in 1862, and for the next nine years he officiated at various places in Pennsylvania, Illinois and Michigan. In 1871 he entered the Episcopal church, and was ordered a deacon in St. John's Church, Detroit, Mich., on July 29, 1872. His rise in the Episcopal church was rapid. He was advanced to the priesthood in October of the same year, and three years later was consecrated bishop of Illinois, in the Cathedral Church of St. Peter and Paul, Chicago. In 1877 two new sees were created in Illinois, but Bishop McLaren retained the original diocese and title. The name of the see was changed to Chicago in 1883. The Western Theological Seminary of Chicago was founded by Dr. McLaren.

In 1881, and in 1885 he established the Waterman Hall for girls at Sycamore. He is president of both these institutions, also is president of St. Mary's School, Knoxville, Ill., and was for a time warden of Racine College. He is primate of the province of Illinois. Bishop McLaren is an accomplished theologian, and in the church is regarded as an authoritative and effective writer. He has published: "Catholic Dogma: An Antidote of Doubt" (1883); "Refutation of Pantheism" (1884); "Inner Proofs of God" (1884); "The Practice of the Interior Life" (1897); "The Holy Priest" (1900), and "The Essence of Prayer" (1901). He was married, in 1860, to Mary, daughter of Peter Fiske, of Clinton, N. Y., and has one son and two daughters.

LOGMIS, Dwight, jurist, was born at Columbia, Tolland co., Conn., July 27, 1821. He was educated in the public schools, completing his classical course at the Monson and Amherst academies in Massachusetts. He then engaged in teaching for five years, and in 1844 began the study of law at Ellington, Conn., continuing it in the Yale Law School. He was admitted to the bar in 1847 and began the practice of law at Rockville and Ellington in company with John H. Brockway, who had just closed a four years' term in congress, which continued until 1855. Afterward he was associated in practice with B. H. Bill, of Rockville, for three years, and from that time conducted an independent practice. In 1851 he represented the town of Vernon in the state legislature; in 1856 was a delegate to the People's party convention in Philadelphia, and in 1857 was a member of the state senate, where he was chairman of the judiciary committee. In 1859 he represented the first congressional district in the 36th congress, and being re-elected in 1861 to the 37th congress, served until 1863, during which time he was a member of the committees on mileage, the treasury, agriculture and elections, the latter an exceptionally important committee at that period. During the spring of 1864 he was appointed a judge of the superior court, and in 1875 was advanced to the supreme court. After twenty-seven years of judicial service he retired in 1891 from the supreme court and returned to the practice of law, his age

disqualifying him for further service on the supreme bench, according to state law. In the same year he was elected to a professorship in the Yale Law School, serving there for two years; but, in 1893, he was appointed state referee, and the press of duties caused his retirement from the educational office.

DILLINGHAM, Benjamin Franklin, railroad and plantation promoter, was born at West Brewster, Mass., Sept. 4, 1844, son of Benjamin Clark and Lydia Sears (Howes) Dillingham. The Dillinghams were among the early settlers of Massachusetts Bay colony, their first American ancestor being John Dillingham, who emigrated from Bitteswell, Leicestershire, England, and settled in Harwich, Mass., about 1630. Benjamin was educated in Southborough and Worcester, Mass. When young he went to sea, and after serving an apprenticeship was third officer of the clipper ship Southern Cross, which was captured and burned at sea by the Confederate cruiser Florida on June 6, 1863. The officers were transferred to the bark Fleur de Para, bound for Brazil, and from there worked their way back to New York. He then became second mate of the ship Aureola, which he afterward left at San Francisco, and sailed as first mate on the bark Whistler, plying between the latter port and Honolulu. While in the city of Honolulu, in July, 1865, he met with a severe accident, which forced him to abandon the sea, and he engaged with the mercantile firm of H. Diamond & Son, dealers in hardware and general merchandise. Three years later he bought them out, and conducted the business as Dillingham & Co., until 1884, when it was incorporated under the name of the Pacific Hardware Co., and it is today one of the most substantial corporations of the island and the oldest commercial house west of the Rocky mountains. In 1888, foreseeing the great future of the sugar industry on the island of Oahu, and realizing that to develop it extensively better communication was a necessity, he secured a franchise from the legislature and commenced to build the first railroad on that island, having organized the Oahu Railway and Land Co. The road was first operated in July, 1890, and now has more than seventy-two miles of line and numerous branches and spurs. It taps the richest plantations in the Hawaiian group, and is extremely successful, showing a constantly increasing profit account. When construction commenced the territory adjacent to the proposed line was barren, but as it was the best of sugar land Mr. Dillingham directed his energies to securing leaseholds and acreage in fee simple, and obtaining capital with which to develop plantations. It is not an overstatement to say that his enterprise in this direction has been a great factor in the making of industrial Oahu. The great Ewa sugar plantation, which was promoted by him, is a fair sample of the increasing value of other large sugar estates which he has since organized along the line of his railroad. Its original \$100 shares are now worth \$800 in open market, and the railroad and other properties of which he was promoter, costing originally \$13,000,000, are to day worth \$30,000,000, and are paying large dividends on the latter amount. In connection with M. P. Robinson, Lorrin A. Thurston and others he is now establishing on the island of Hawaii a standard-gauge road, incorporated under

B. F. Dillingham

the name of the Hilo Railroad Co.; also two of the largest sugar estates in the territory, known as Olan Sugar Co., Ltd., and Puna Sugar Co., Ltd. All these enterprises give promise of great financial success. Mr. Dillingham was married, in April, 1869, to Emma Louise, daughter of Rev. Lowell Smith, of Greenfield, Mass., who was one of the early missionaries to the Hawaiian Islands, and for thirty years pastor of the Kaunakapili Church in Honolulu. They have four children.

GERARD, James Watson, Sr., lawyer and philanthropist, was born in New York city, in 1791, son of William and Christina (Glass) Gerard. His paternal ancestors were prominent citizens of France, but the family emigrated to Scotland in the time of the troubles of the reign of Louis XV., and his father was born near Banff, Scotland, in 1746. For a time the latter resided in Gibraltar, from which place he removed to New York city about 1780. He became a prominent merchant, and did a very large business until his premature death by drowning, Jan. 27, 1802. He left a widow and seven children. Two of his sons were in the auction business on Wall street, under the name of Glass & Gerard. The third son, James W., was graduated at Columbia in 1811, and in 1812 was enrolled as a member of a volunteer company called the Iron Grays, which was raised for the defense of New York harbor in the war with Great Britain. He also studied law at this time in the office of George Griffin, a distinguished member of the bar, and in 1816 he took the degree of M. A. at Columbia College, and was admitted to the bar. He rose to distinction in the law, and continued in active practice until 1869. He became a member of the Society for the Suppression of Pauperism in 1823, and at once urged upon the public the establishment of the House of Refuge for Juvenile Delinquents, the incorporation of which he and others procured in March, 1824. This was the first institution of its kind in the United States. Mr. Gerard was the first to publicly advocate uniforms

for the police. He wore the new uniform at a fancy dress ball given by Mrs. Coventry Wadell, and by letters, addresses and persistent action so impressed upon the community the importance of the change that uniforms were finally decided upon. Opposed to slavery, he took an active part in 1854 in the public meetings held to protest against the repeal of the Missouri compromise. Mr. Gerard gave largely of his time and means to charitable organizations and movements, and in the last twenty years of his life devoted much time to the cause of public education, holding for most of that period the office of school trustee or inspector.

He invariably declined to be a candidate for any other office. He was married, Oct. 3, 1820, to Elizabeth, daughter of Increase Sumner, chief justice of the supreme court and governor of Massachusetts, and Elizabeth (Hyslop), his wife. They had two sons and two daughters. Mr. Gerard died in New York city, Feb. 7, 1874.

GERARD, James Watson, Jr., lawyer and author, was born in New York city, June 20, 1823, son of James Watson and Elizabeth (Sumner) Gerard. His early education was received in the public schools, and in 1843 he was graduated at Columbia

College, with the honors of valedictorian. He then studied law in his father's office, and was admitted to the bar in 1846. He was an able advocate in the courts, and became a recognized authority on real estate and corporation law. He gave much attention to the interests of the public schools of New York city, and was successively school trustee, school inspector and school commissioner, holding the office of commissioner for two terms, beginning with 1890. Mr. Gerard was a member of the state senate in 1876-77 for the 7th district. In 1880 he was the Democratic candidate for congress against Levi P. Morton in the 11th New York district, but was defeated. Pres. Grover Cleveland, in his second term, offered Mr. Gerard the office of special commissioner to the Hawaiian Islands, but, on account of ill health, the office was declined. Mr. Gerard was a member of the Union, Players' and Tuxedo clubs, and of the St. Nicholas and New York Historical societies. He wrote many historical papers, and delivered several addresses on the early colonial history of New York. He was the author of several minor satirical works, both in prose and verse, the most important being "Ostrac; or, the Loves of the Oyster" (1857); "Aquarelles" (1858); "The Pelican Papers" (1879), etc., and two volumes of verse. The second was published over the name of "Samuel Sombre," and was pronounced "one of the rarest books of fun and humor that have appeared for a long time." He also published two legal works, "Title of the Corporation and Others to Streets, Wharves, Lands and Franchises in the City of New York" (1872); "Titles to Real Estate in the State of New York" (1873), the latter being regarded still as the authority on the subject, and an historical work "The Peace of Utrecht" (1885), which is not only a history of the peace, but a complete presentation of the European policy which culminated in that event. Mr. Gerard was married, Oct. 31, 1866, to Jennie, daughter of Benjamin F. Angel, of Genesee, N. Y., who was U. S. minister to Norway and Sweden under Pres. James Buchanan's administration. They had three sons. He died in New York city, Jan. 28, 1900.

McKEEVER, Isaac, naval officer, was born in Philadelphia, Pa., April 6, 1794, son of Capt. James and Jane (Edward) McKeever. His father, who emigrated from Scotland before the revolution and settled in Philadelphia, was the first of the name in this country. He was interested in the development of steam navigation, and conceived the idea of towing vessels up the Mississippi by means of steam tugs, a venture that proved unsuccessful. Comr. Isaac McKeever was educated partly in his native city and partly in New Orleans, La., whither he removed with his parents at an early age. In 1809 he was appointed midshipman in the U. S. navy, and was promoted to a lieutenantcy in 1814. He was in command of one of the five U. S. gunboats under Capt. Thomas C. Jones, which, with twenty-five guns and 172 men, met a British force of forty-two launches and about 1,000 men, at Lake Borgne, La., in December, 1814. In spite of the fact that the Americans were at a hopeless disadvantage, this engagement was one of the fiercest of the war and was won by the

James Watson Gerard

James W. Gerard

British only on account of their superior force. The enemy lost ninety-four men, killed and wounded, and the Americans forty-one men. Lieut. McKeever's command was the last to capitulate, and he himself and most of his officers were severely wounded. His conduct on this occasion attracted the attention of Gen. Jackson, who became his lifelong friend, and at whose particular request he co-operated in the capture of Pensacola four years later. In his general orders dated May 29, 1818, Jackson wrote: "Capt. McKeever of the navy, merits (as he has on several other occasions) the warmest thanks of the general, for his zealous co-operation and activity in landing two of his guns and gallantly offering to lay his vessel before the water battery, in the event of storming the upper works." In 1825, in command of the Sea Gull, he did efficient service in pursuit of pirate crafts, in West Indian waters. In 1828 he was stationed on the receiving ship at Baltimore, and later in the same year commanded a vessel cruising along the coast of Labrador for the protection of American fisheries. He received the rank of master commandant with the title of captain in 1830. During the Argentine revolution, in 1833, he was acting representative of the government at Buenos Ayres, in command of the Lexington.

M'Keever

In 1838, while on a cruise to the Pacific, in command of the U. S. S. Falmouth, he was commissioned captain. He returned home in 1840, and after several years of shore duty and minor assignments, he was placed in command of the corvette St. Louis, of the East India squadron. In 1845 he rescued a number of missionaries, their families and other Christians from the hands of savages at the Bay of Islands, Kororaraka, and transported them (150 in all) to Auckland, New Zealand, on his own vessel. Comr. McKeever was commander of the Brooklyn navy yard for three years; was in command of the frigate Congress, of the Brazil squadron, and in 1855 became commander of the Norfolk navy yard. There, shortly after his arrival, yellow fever became epidemic, and he fell a victim to the scourge. In January, 1827, he was married to Mary Flower, daughter of Lieut. Joseph and Mary (Thomson) Gamble, of Philadelphia, Pa. They had two sons and two daughters; Isaac Chauncey, colonel and brevet brigadier-general of the U. S. army; James Laurence, a prominent New York banker; Marion, wife of William Speiden, a customs officer of New York city, and Caroline, wife of Leon Rosenplanter, of Russia. Comr. McKeever died at Portsmouth, Va., April 1, 1856.

LYON, Lucius, senator, was born at Shelburne, Chittenden co., Vt., Feb. 20, 1800, eldest son of Asa and Sarah (Atwater) Lyon. His father, a farmer, was esteemed for his strong common sense, and was constantly consulted by his fellow-townsmen on matters affecting the public welfare. At the age of eighteen the son left the farm, and spent more than two years in Burlington in the office of a civil engineer, pursuing other studies as well, to supplement the meagre store of knowledge acquired in a district school. In 1821 he removed to the territory of Michigan, and in the following year, being then at Detroit, executed contracts made with the United States for the survey of public lands. For several years he was engaged in various parts of Michigan and elsewhere. He established the northern boundary of Illinois in 1823. In June of that year he was elected as a territorial delegate to the 23d congress

as a Democrat, serving until March 3, 1835. He was a member of the convention which framed the state constitution of Michigan in 1835, and in November was chosen to represent Michigan in the national senate, but action was delayed on account of a boundary dispute with Ohio, and Mr. Lyon did not take his seat until Jan. 26, 1837. Mainly through his efforts Michigan secured the peninsula that forms the northern part of her domain. His senatorial term expired March 4, 1839, and in 1843 he was returned to congress as a representative, serving as such until March 3, 1845, when he declined a re-nomination. In 1845 Pres. Polk tendered him the appointment of surveyor-general for Ohio, Indiana and Michigan, removing the office from Cincinnati to Detroit for his convenience, and this position he held until 1850. He was a delegate to the Democratic national convention in Baltimore in 1848. Mr. Lyon became the owner of real estate in many parts of Michigan, as well as beyond the limits of the state. At his own expense he made a survey of the harbor of St. Joseph, and secured government appropriations for its improvement. He was part owner of the water supply plant at Detroit. At Bronson, Schoolcraft and Lyons he had large farms which he kept under a high state of cultivation. He was a member of the first board of regents of the University of Michigan (1837-39). He died unmarried at Detroit, Sept. 25, 1851.

PHELPS, Sheffield, lawyer and journalist, was born in New Haven, Conn., July 24, 1864, son of William Walter and Eleanor (Sheffield) Phelps, and grandson of John Jay Phelps, the organizer of the Delaware, Lackawanna and Western railroad, and of Joseph E. Sheffield, founder of the Sheffield Scientific School of Yale University. His father was an eminent diplomat and jurist. He was educated at Siglar's Preparatory School, Newburgh, N. Y., the Hopkins Grammar School, New Haven, Conn., and Yale University, where he was graduated in 1886. During the next four years he was acting editor of the Colorado Springs "Gazette," and having studied law was admitted to the bar of that state. In 1890 he settled in New York city and became connected with the "World" as its New England correspondent. In 1892 he obtained a position on the "Mail and Express," where he began as telegraph editor, rapidly rising to the position of foreign editor, editorial writer and managing editor, all during the short space of about two years. He then bought a large interest in the "Evening Journal" of Jersey City, and was its editor until 1899, when he disposed of his share and went to Europe for an extended tour. Returning in 1900, he devoted his time to wielding a political influence in his native state, which derives strength from the support given by his father's many friends, and from his social position. While he has never accepted any office he is considered by his party eminently eligible, and there are strong indications that he will follow in the footsteps of his father. He is a member of the Union League and University clubs of New York city. He was married, June 1, 1892, to Claudia Wright, daughter of Preston Lea, capitalist and banker, of Wilmington, Del. They have three children: William Walter, Claudia Lea and Eleanor Sheffield.

Sheffield Phelps

PONCE DE LEON, Juan, explorer, was born in Leon, Spain, about 1460. In his youth he served as page to Don Fernan, afterwards Ferdinand V. He took part in the Moorish wars, and, according to some authorities, sailed with Columbus on his second voyage in 1493. In 1509 he conquered the island of Porto Rico, where he became governor and acquired great wealth. On March 3, 1513, he sailed from Porto Rico on his famous voyage in search of the island, Bimini, with its miraculous fountain of youth, and discovered land March 27th, and, being Easter Sunday, which is called by the Spaniards Pascua de Flores, or because of the abundance of flowers, it was named by him Florida. On April 8th he landed on a spot recorded as 30° 8' north, which would locate it near the present site of Fernandina. He took possession of it in the name of Spain and after exploring the coast he returned to Spain in the following year. In 1514 he led an expedition against the Caribs and another voyage was made two years later. Having been appointed governor of Florida and directed by the king to conquer and colonize the island, as it was believed to be, he made another voyage in 1521. He was repelled by the Indians and received a wound from an arrow which caused his death in Cuba shortly afterwards.

ELMORE, Franklin Harper, senator and financier, was born in Laurens district, S. C., Jan. 16, 1799, second son of John A. Elmore, a revolutionary general. He entered South Carolina College in November, 1817, and was graduated there in 1819. He studied law, was admitted to the bar in 1821, and in 1822 was elected solicitor of the southern circuit, in which office he was continued by re-election until 1837. He was appointed aid to Gov. Manning in 1824, with the rank of colonel. In 1836 he was elected to the national house of representatives, and served in that body until 1839. Having been selected by the congressional delegation of 1838 to secure authentic information of the anti-slavery movement, he wrote to James G. Birney a number of letters which were published under the title of the "Elmore Correspondence." In 1839 he was elected president of the Bank of South Carolina, which office he held by annual re-election until his appointment to the U. S. senate in April, 1850. In the upper house he filled the vacancy occasioned by the death of John C. Calhoun; yet his voice was heard but once in the senate, for his own death occurred twenty-eight days later. He was appointed trustee of his alma mater. Sen. Elmore died in Washington, D. C., May 29, 1850. His brother, Rush, who was born in Alabama about 1810, and died during the civil war, served in the war with Mexico, and in 1854 received an appointment as associate justice of the Federal court of Kansas.

MELLEN, Prentiss, jurist and senator, was born at Sterling, Mass., Oct. 11, 1764, son of John Mellen, a prominent Unitarian clergyman, of Massachusetts. He was graduated at Harvard in 1784, after which he studied law, was admitted to the bar in 1786, and commenced the practice of his profession at Bridgewater, Mass. He removed to Biddeford, Me., in 1792, and in 1806 to Portland. He served on the executive council of Massachusetts in 1808, 1809 and again in 1817. In 1818 he was elected to represent Massachusetts in the U. S. senate, taking the place of Eli P. Ashmun, resigned, and he served until May 15, 1820. In that year Maine was organized and admitted as a separate state, and Sen. Mellen's resignation was tendered in consequence of this change. He was the first chief-justice of Maine (1820-34), retiring when he reached the age limit of seventy years. In the first eleven volumes of the "Maine Reports" were included his judicial decisions. He served as a trustee of Bow-

doin College from 1817 to 1836, and in 1828 received from that institution the degree of LL.D. After his judicial retirement he renewed the practice of law at Portland, Me., where his death occurred, Dec. 31, 1840. Both as a judge and a lawyer he held high rank. His son, Grenville Mellen, was a gifted poet.

RUGGLES, Charles Herman, jurist, was born in Litchfield county, Conn., Feb. 10, 1789, cousin of Samuel Bulkley Ruggles. After receiving a good general education he adopted the profession of the law and began to practice at Kingston, N. Y. He was a member of the New York legislature in 1820 and was a representative in congress in 1821-23. For many years he was a judge of the circuit court and made a reputation as a jurist. After leaving this office he served for a second term in the state legislature, and in 1851 was made a judge of the court of appeals, being presiding judge from 1853 until his resignation in 1855. He was a delegate to the constitutional congress of 1846. His death occurred at Poughkeepsie, N. Y., June 16, 1865.

BALLINGER, Richard Achilles, lawyer, was born at Boonsboro, Pa., July 9, 1858, son of Richard Henry and Mary E. (Norton) Ballinger. His ancestors on both sides participated in the revolutionary war and the war of 1812. His father studied law in Abraham Lincoln's office and became a prominent lawyer of Illinois. He was an Abolitionist, and upon the outbreak of the civil war enlisted in the 51 Illinois cavalry, and served until the close. Richard prepared for college in the public schools, Washburn College, Topeka, Kan., and also at the State University of Kansas. After graduation at Williams College in 1884 he went to Chicago, studied law, and in 1886 was admitted to the bar of Illinois. He practiced for three years at Kankakee, Ill., and for two years at Decatur,

Ala., and in 1890 removed to Port Townsend, Wash. In 1892 he was elected judge of the superior court, and after serving a term of four years he removed to Seattle, Wash., and formed a partnership with Hon. J. T. Ronald and Alfred Battle, under the firm name of Ballinger, Ronald & Battle, which has become one of the leading firms of the state. Judge Ballinger is author of "Ballinger on Community Property" (1895), and "Ballinger's Annotated Codes and Statute of Washington" (1897), which latter work has been recognized as the official code by the state legislature. He is prominent in politics and the social life of the state. He was married, in 1886, to Julia A., daughter of Geo. Bradley, of Lee, Mass., and has two children.

PARKER, Richard Elliott, senator and jurist, was born in Westmoreland county, Va., Dec. 27, 1783. He received a public school education, and after studying law was admitted to the bar, and for many years practiced that profession in his native county. He attained popularity in early life, and was elected a member of the Virginia house of delegates. For many years he served as a judge of the general and circuit courts of Virginia. In 1836 he was elected to the U. S. senate as a Democrat, succeeding Benjamin Watkins Lee, and taking his seat Dec. 15th, but on Feb. 13th of the following year resigned to accept a position as judge of the supreme court of appeals, having been elected in place of Dabney Carr, deceased. He died in Richmond, Va., Sept. 9, 1840.

MITCHELL, James Tyndale, jurist, was born at Belleville, Ill., Nov. 9, 1834, son of Edward P. and Elizabeth (Tyndale) Mitchell. His great-grandfather, Edward Mitchell, was a captain in the Virginia line, and served in the campaign of 1780-81. He was educated in Philadelphia, and at Harvard College, where he was graduated in 1855. He studied law at the University of Pennsylvania, was admitted to the bar in 1857, and began the practice of his profession in Philadelphia, where he was assistant city solicitor for three years. He was elected a judge of the city district court in 1871; transferred to that of common pleas in 1875; re-elected in 1881, being the candidate of both parties, and in 1888 elected to the supreme court by a majority of over 80,000, the largest ever received by a judicial candidate in Pennsylvania. He served in the state militia in the emergencies of 1862 and 1863; was one of the earliest members of the Union League of Philadelphia, and is a member of the state Society of Sons of the Revolution, of the Loyal Legion, and an honorary member of the Order of the Cincinnati. His tastes run largely to historical studies; he has been for some years president of the council of the Pennsylvania Historical Society, and possesses what is believed to be the largest collection of engraved historical portraits in the country. He is vice-provost of the Philadelphia Law Academy, and was one of the commissioners to report upon and publish (in 1886-88) acts of the colonial assembly not previously printed. He conducted the "American Law Register" from 1861 to 1889; edited "Williams on Real Property," and has written a "History of the District Court" (1875); a work on "Motions and Rules" (1879); an "Address on Fidelity to Court and Client" in criminal cases, before the Pennsylvania State Bar Association (1899) and an "Address on John Marshall" before the Law Association of Philadelphia (1901). He received the degree of LL.D. from Jefferson Medical College in 1872. He is unmarried.

GREEN, John Cleve, merchant, was born in Lawrenceville, Mercer co., N.J., April 14, 1800. He received an academic education, and in early manhood entered a counting-house in New York city. From 1833 to 1833 he went as supercargo to South America and China, and while in Canton became a

member of the firm of Russell & Co., and was eminently successful in business. In 1839 he returned to New York with a large fortune, settling there and continuing his connection with the Chinese trade. Most of his time was devoted to Christian and charitable enterprises. He was a trustee of the New York Hospital, Deaf and Dumb Asylum, president of the board of directors of the Home for Cripples, and for many years financial agent and trustee of Princeton Theological Seminary. He endowed the Princeton Seminary with the Helena professorship of history, built one of the professor's houses, renovated the chapel, remodeled the dining-hall and bequeathed the institution \$50,000. Mr. Green also founded the John C. Green School of Science at Princeton, and was liberal in his gifts to New York University. A Green memorial alcove containing his portrait was added to the New York Society Library by his widow, who gave \$50,000 for that object. Mr. Green died in New York, April 28, 1875.

BRUCE, William Stebbing, manufacturer, was born in Philadelphia, Pa., Nov. 1, 1819, son of William and Mary (Stebbing) Bruce. His father was a native of Northampton, England, the family

having originally migrated from Scotland, and coming to America, he settled in Philadelphia in 1818. During his infancy Mr. Bruce's parents removed to Ohio, where he spent his boyhood working on his father's farm and attending the public schools. In 1835 he went to Cincinnati, O., and entered the employ of Ephraim Morgan, in the book-binding business. After remaining in that situation some time, he was employed by I. & B. Bruce, and learned the carriage painter's trade. On completing his apprenticeship with them he went to Madison, Ind., where he followed his trade with a Mr. Newell, a leading carriage builder of that city. In 1843 he returned to Cincinnati, but finally settled in Memphis, Tenn., where he cut down the trees on the site of his shop, which he located on Main street, opposite the Peabody Hotel. He did business there for a number of years. His two brothers, Noble and Joseph, were associated with him, and by industry and integrity they built up a lucrative business. In 1847 the first five-story brick building ever erected in the state of Tennessee was built in Memphis by the Bruces. The building was burned, and in 1873 the building which still stands was erected, and the business is to-day in a prosperous condition, the name of Bruce having been prominent in their line of trade in Memphis ever since William first established the name there in 1843. Mr. Bruce was one of those men of sound mind, sound body and sturdy principles who never fail to impress their personality upon the place in which they live. He was for many years president of the Leath Orphan Asylum, and also a member of the board of education. He was one of the oldest and most influential Odd Fellows in the state, was high in the councils of the order, and did much to further its interests. He was married to Elizabeth Worland, of Memphis, Tenn., in 1848, and had four children. He died in Memphis, Tenn., Aug. 24, 1896.

STORER, David Humphreys, physician, naturalist, was born in Portland, Me., March 26, 1804, son of Woodbury and Margaret (Boyd) Storer. His father (1760-1825), was a ship-owner and merchant and U. S. collector of customs at Portland. He also was an overseer of Bowdoin College and judge of the court of sessions. The earliest American ancestor was Augustine Storer, of Lincolnshire, England, who came to America in 1629, and was married to Susanna Hutchinson. The line of descent runs through their son, William, who was married to Sarah Starbuck; their son, Joseph, who was married to Hannah Hill; their son, John, who was married to Elizabeth Hill; their son, John. He was married to Mary Langdon, and they were the grandparents of the subject of this sketch. David H. Storer was graduated at Bowdoin College, in 1822, and then studied medicine with Dr. John C. Warren, and was graduated at the Harvard Medical School in 1825. He immediately commenced practice in Boston and continued thus engaged until 1888. In 1837, with Jacob Bigelow, Edward Reynolds and Oliver Wendell Holmes, he organized the Tremont St. Medical School, which was carried on very successfully until it was merged in the medical department of Harvard University. In 1854 he was called to the chair of obstetrics and medical jurisprudence in the Harvard school, and remained until 1868, serving as dean of the medical school from 1855 to 1864. In 1849-58 he was physician to the Massachusetts General Hospital. In 1837 he was given the departments of zoölogy and herpetology in the Massachusetts geological survey. He helped found, and was an early member of, the Boston Society of Natural History; was a member of many medical and scientific societies in the United States; was a corresponding member of nearly every medical society in the United States and several in Europe; was president of the American Medical Association

in 1866, and was a member of the Boston Society for Medical Improvement, the American Academy of Arts and Sciences and the American Philosophical Society. He was a frequent contributor to their "Transactions" on scientific subjects. In 1866 he became president of the American Medical Association. Dr. Storer was a warm-hearted, high-toned and conscientious man, and was very successful both as a physician and professor. He was no respecter of persons; all had his care alike. He took a personal interest in his students and was a warm friend to young physicians. He lived a long, busy and useful life, honored and loved by his own profession and the community in which he lived and labored. He was a hater of shams, an honest man, who adorned his profession by his skill, personal dignity, manliness and worth. He was the author of: "Report on the Ichthyology and Herpetology of Massachusetts" (1839); "Synopsis of the Fishes of North America" (1846), and "History of the Fishes of Massachusetts" (1853-57), and translated Louis Kieners' "Genera, Species and Iconography of Recent Shells," in 1837. His contributions to the natural history of Massachusetts will remain a monument to his memory. His "History of the Fishes of Massachusetts" is a classic in North American ichthyology that will serve as a basis for the future histories of New England fishes. He received the degree of LL.D. from Bowdoin in 1876. Dr. Storer was married in Boston, in 1829, to Abby Jane, daughter of Thomas Brewer. They had five children: Horatio Robinson, Francis Humphreys, Abby M., Mary G., and Robert W. Dr. Storer died in Boston, Mass., in 1891.

STORER, Horatio Robinson, physician, was born in Boston, Mass., Feb. 27, 1830, the son of Dr. David Humphreys and Abby Jane (Brewer) Storer. His father was professor of obstetrics and medical jurisprudence in Harvard University and president of the American Medical Association. He attended the Boston Latin School from 1840 to 1844, then entered Harvard University, where he was graduated in 1850. In college he showed a marked inclination towards the natural sciences, was president of the Harvard Natural History Society, and a pupil of Agassiz and Asa Gray. With his brother he accompanied Jeffries Wyman on a trip to Labrador, and published, "Observations on the Fishes of Nova Scotia and Labrador, with Descriptions of New Species" (1850). These had previously been studied only by Sir John Richardson. In this Dr. Storer gave evidence of the training he had received from his father, whose celebrated works on the fishes of Massachusetts and North America were published by the American Academy of Arts and Sciences. While still an undergraduate he spent a summer in Russia. His medical studies were under the direction of his father and his associates in the Tremont Medical School of Boston and in the medical department of Harvard College, where he received his degree of M.D. in 1853. He then spent two years in study in Paris, London and Edinburgh, during one year of which he was an assistant in private practice to Sir James Y. Simpson. In 1855 he opened an office in Boston, where he speedily acquired a remunerative practice. In 1853 he became a member of the Massachusetts Medical Society; in 1865 he was elected to the chair of obstetrics and medical jurisprudence in the Berkshire Medical College. In 1866-68 he attended the Harvard Law School, to better fit himself for teaching medical jurisprudence, receiving the degree of LL.B. Dr. Storer was the first in this country to teach gynecology proper, as contradistinguished from obstetrics or midwifery, his separate course upon the diseases of women unconnected with gestation, childhood or the puerperal state, comprising no less

than sixty lectures. For several years he gave at Boston a semi-annual course to medical graduates upon the surgical diseases of women. These lectures were attended by physicians from all parts of the country. In 1872 his health failed, and he went to Europe, remaining five years, during which he took occasion to study practically, on an extended scale, the fevers of southern Italy. His contributions to medical literature were early marked by original thought and earnestness of purpose. In 1856 he represented the Boston Lying-in Hospital in the American Medical Association, and thus became a member of that body at the outset of his professional career. He attended its meeting at San Francisco in May, 1871, and was detained in California by professional engagements until October. His professional life has been extremely active. He was physician to the Boston Lying-in Hospital; to St. Elizabeth's Hospital for Women, and to St. Joseph's Home; consulting surgeon to Carney General Hospital; surgeon to the New England Hospital for Women and Children; and is now consulting surgeon to the Newport (R. I.) Hospital and president of its medical staff. In addition to the duties incident to these positions, he has been an active member of no less than eighteen medical societies in Europe and America. Dr. Storer

was also editor for four years of the "Journal of the Gynecological Society of Boston." He has published many professional essays, communications, reports, etc. Since returning to America, in 1877, Dr. Storer has made his home at Newport, R. I., on account of its comparatively mild winter climate, and is now engaged on a book upon the medals, jetons and tokens illustrating the science of medicine, of which he has, perhaps, the most complete collection in existence.

STORER, Francis Humphreys, chemist, was born in Boston, Mass., March 27, 1832, second son of David Humphreys and Abby J. (Brewer) Storer. He was educated in the schools of Boston, and the Lawrence Scientific School of Harvard University, where he made a speciality of chemistry under Prof. Josiah P. Cooke, becoming his assistant in 1851. He remained two years in Prof. Cooke's laboratory at Cambridge and in the Harvard Medical School at Boston, where he had a private class in chemical analysis. In 1853 he was appointed chemist to the United States exploring expedition to the North Pacific, during which he visited the principal islands of the Atlantic and Pacific oceans. On his return he completed his course in the Lawrence Scientific School, and was graduated in 1855. He then went to Europe and studied with Bunsen at Heidelberg, with Richter at Freiberg; Stoeckhardt in Tharand, and Emile Kopp in Paris. Returning in 1857, he became chemist to the Boston Gas Light Co., at the same time carrying on a private laboratory and acting as consulting chemist. It was during this time that he conducted with Cyrus M. Warren the researches upon hydrocarbons, that have become classical. In 1865 he was appointed professor of general and industrial chemistry at the Massachusetts Institute of Technology. While here, together with Charles W. Eliot, he developed methods and principles of teaching chemistry as applied to the art and as a means of mental training in education; also to the instruction of students in large classes by experimental methods. The work published by these collaborators, entitled "Manual of Inorganic Chemistry" (1868), in which those

methods and principles were duly set forth, became an epoch-making work, and led in a few years to a revolution in the teaching of general chemistry by experimental and laboratory exercises. In 1867 he spent several months abroad at the Paris exposition in the study of manufacturing chemistry in Europe. In 1870 he was appointed professor of agricultural chemistry at Harvard University, and since then he has been dean of the Bussey Institution. In 1870 he received the honorary degree of A.M. from Harvard University. He is a member of the American Academy of Arts and Sciences and many other scientific societies, and is the author of many scientific papers. He was for some time the American editor of the "Repertoire de Chemie Appliquée," and is the editor of the "Bulletin" of the Bussey Institution. He has published "A Dictionary of Solubilities of Chemical Substances" (Cambridge, 1864); "A Cyclopaedia of Quantitative Analysis" (2 parts, 1870-75), and "Agriculture in Some of its Relations with Chemistry" (3 vols., 1897). Prof. Storer was married, in 1871, to Catharine A., daughter of Samuel Akins Eliot, of Boston.

STORER, Bellamy, lawyer and jurist, was born in Portland, Me., March 26, 1796, eldest son of Woodburn and Margaret (Boyd) Storer and brother of David Humphreys Storer, physician and naturalist. He was prepared for college under Dr. Edward Payson and Ebenezer Adams, late of Dartmouth, and entered Bowdoin College at the age of thirteen. Without graduating, however, he left to study law under Chief-Justice Parker, of Boston, and was admitted to the bar there in 1817. Removing to Cincinnati, O., shortly afterwards, he commenced the practice of his profession, and soon attained a prominent position among the leading men of the city. In 1824 he edited the "Crisis," in which was advocated the election of John Quincy Adams to the presidency. In 1834 he was elected to congress on the Whig ticket, serving in the 24th congress. He rendered effective assistance in the election of his friend, Gen. Harrison, to the presidency. At the expiration of his term in congress he returned to Cincinnati, but continued to take an active interest in all public movements. He was presidential elector on the Whig ticket in 1844. In 1854 he was elected judge of the superior court of Cincinnati, his colleagues being Judges O. M. Spencer and William Y. Gholson. He was continuously re-elected until 1872, when he resigned. During this period he established a degree of professional and personal popularity rarely won by a lawyer.

He became professor in the Cincinnati Law School in 1855, a position he held for many years, and in 1874 was made professor emeritus. In the latter years of his life Bellamy Storer, Jr., was associated with him in law under the name of Storer, Goodman & Storer. He received the degree of LL.D. from Bowdoin College in 1821. On May 17, 1845, he was married to Elizabeth, daughter of Joseph D. and Louisa (Bartow) Drinker, of Philadelphia, and had one son and one daughter. He died in Cincinnati, O., June 1, 1875.

STORER, Bellamy, lawyer and diplomat, was born in Cincinnati, O., Aug. 28, 1847, son of Bellamy and Elizabeth (Drinker) Storer. His father

was a prominent jurist of Cincinnati; his mother, a native of Philadelphia, was a direct descendant of

William Penn. He went to Harvard College, where he was graduated in 1867. He then studied law at the Cincinnati Law School, in which his father was a teacher, graduating there in 1869, and was admitted to the bar in April of that year. He at once entered upon the practice of his profession, and became a member of the firm of Storer, Goodman & Storer. In 1869 he was appointed assistant U. S. district attorney for the southern district of Ohio. He served one term as trustee of the Cincinnati University, and for a number of years was president of the Ohio Humane Society. After the death of his father the firm style became Goodman & Storer, and in 1878 was changed to Storer & Harrison, the partnership lasting ten years. In 1890 he received the Republican nomination for congress, and was elected, receiving 16,661 votes against 14,373 for Otway J. Cosgrove, and at the expiration of his term was re-elected. He was appointed U. S. minister to Belgium by Pres. McKinley, and occupied that position two years. When diplomatic relations with Spain were resumed, on April 15, 1899, he was appointed U. S. minister to Madrid, a position he still holds. On March 20, 1886, he was married to Maria, daughter of Joseph Longworth, of Cincinnati. Mrs. Storer is the originator of the beautiful Rookwood pottery.

STORER, Maria Longworth, artist, was born in Cincinnati, O., March 20, 1849, daughter of Joseph and Annie (Reeves) Longworth, and granddaughter of Nicholas Longworth, one of the founders of that city. Her father was much interested

in art, having made a fine collection of pictures, and having given an endowment to the Cincinnati Art School of \$300,000. Through his influence, the daughter became interested in decorative art. She began painting on china in 1874, and shortly afterwards an art club of ladies, organized by her, began original experiments in clay, glaze and color at the Dallas pottery near her home. In 1880 her father obtained for her an old school building in which to continue her work, which was named "Rookwood," after his country place at Walnut hills, Cincinnati. She gathered skilled workmen and artists about her, and began producing vases and other articles remarkable for fineness of glaze, richness of color and variety of form and of decoration. In 1889 Mrs. Storer received a gold medal at the Paris exposition, and America awoke to the extraordinary merit of the Rookwood ware. The following year the Rookwood Pottery Co. was formed, with William W. Taylor as president and Bellamy Storer as vice-president, and upon the summit of Mt. Adams, overlooking Cincinnati, was constructed one of the most ornamental and strikingly original buildings of the city. In 1891 she presented the pottery and all her patents to her friend, Mr. Taylor, who is still the head. She continued to devote herself to artistic designing until her husband's appointment as U. S. minister to Belgium, in 1897. During their first winter in Brussels Mrs. Storer sent to Cincinnati for a Japanese artist, Asano, residing there, and a studio was arranged

for working in bronze. Upon her husband's appointment as U. S. minister to Spain, in 1899, the studio was removed to Madrid, and her work in metal mountings for the pottery and also in bronze vases and plaques was continued. She was awarded a gold medal at the Paris exposition, in 1900, in the department of varied industries. The Rookwood pottery was awarded a grand prize. On March 20, 1886, she was married to Bellamy Storer, a lawyer and diplomat, of Cincinnati.

LONGWORTH, Nicholas, lawyer and land-owner, was born in Newark, N. J., Jan. 16, 1782, son of Thomas and Apphia (Van der pool) Longworth. His father remained loyal to the British crown during the revolutionary war, and his property, in consequence, was confiscated. His grandfather, Nicholas, was a justice of the peace, which in New Jersey compared with the office of king's justice in the other colonies. At the age of nineteen he began the study of law. In 1803, the year in which Ohio became a state, he removed to Cincinnati, and entered the office of Judge Jacob Burnet as a law student. His first case after his admission to the bar in 1804, was the defense of a horse thief, and the fee he received was two copper whiskey-stills. These he bartered for thirty-three acres of land, then in the woods—what is now Central avenue, Cincinnati, then the town limit on the west. Before he died this land was worth \$2,000,000. He soon acquired a profitable law business, which increased with the growth of the town. He lived simply, saved money, and these savings were invested in real estate in the suburbs of Cincinnati, where lots could then be purchased at \$10 each. His conviction that Cincinnati would eventually become a populous and great commercial centre, though laughed at by the elderly men of the time, determined all his actions. While a student in Judge Burnet's office he offered to purchase the latter's cow pasture, and in the hope of obtaining it on long credit proposed to pay \$5,000 for it. The judge reproved him sharply for assuming such a debt for so worthless an investment; but Mr. Longworth lived to see that cow pasture valued at \$1,500,000. In 1850 his taxes were over \$17,000, and the same year the Astor taxes in New York amounted to only about half as much more. He lived to see the population of Cincinnati grow from 800, in 1802, to 171,293, in 1860. In 1819 he retired from the practice of the law, and devoted himself to the management of his property. He had always been an enthusiast in horticultural matters, and having an idea that the climate and soil of the Ohio valley were peculiarly adapted to the production of grapes, he made experiments in that direction. He planted 200 acres of grape vines, using foreign varieties until 1828, when he began experimenting with the Catawba grape, which had been discovered in 1801 growing on the Catawba river in North Carolina. He became an extensive producer of wines, making many experiments, and bringing to this country cellarmen to establish the manufacture. Although for some years his outlay was greater than his income, he at length reaped a steady and increasing profit in his wine trade. He was also interested in the culture of strawberries, and it is from him that the celebrated "Longworth Prolific" derives its name. He published "Buchanan's Treatise on the Grape, with an Appendix on Strawberry Culture" (1856). In course of years his property became very valuable, and his rent-roll afforded him a large income. He conducted his business in a systematic manner, selling his land to poor tenants on long time, and often deeding to widows of tenants half of the property leased by their husbands. In this way he was always ready to encourage the industrious poor, and others who,

showing ability, struggled with circumstances calculated to keep them impoverished. In politics Mr. Longworth was a life-long Whig. At the time of his death his property was valued at \$15,000,000.

He lived in a magnificent mansion in the midst of his vineyards, where he had gathered together a fine library and a valuable collection of paintings, statuary and other art treasures. He was married at Cincinnati in 1807, to Susan Howell, daughter of Capt. Silas Howell, of the New Jersey continental line, and had four children. He died in Cincinnati, Feb. 10, 1863.

POLLARD, Edward Alfred, journalist, was born in Nelson county, Va., Feb. 27, 1831, son of Maj. Richard and Pauline (Cabell) Pollard, and a direct descendant of Col. William Cabell, of Union hill, who was on the committee of safety during the revolutionary war. He was also a nephew of Hon. Alexander Rives. After attending Hampden Sidney College and then the University of Virginia, where he was graduated in 1849, he began law studies at William and Mary College, and completed them in Baltimore. He spent a number of years in travel, visiting California, northern Mexico and Nicaragua, Europe, China and Japan, during which he won considerable fame as a journalist. He held the office of clerk of the judiciary committee in the house of representatives during Pres. Buchanan's administration. Influenced by his friend and connection, Bishop Mead, and under deep depression from the death of a young and lovely wife, he studied for the ministry of the Protestant Episcopal church. Journalism soon reclaimed him, however, and through the columns of the Richmond "Examiner," of which he was co-editor in 1861-67, he became a much celebrated supporter of the Confederate cause. In order to promote the sale of his own writings, Mr. Pollard, toward the close of the war, sailed for England, but was captured and imprisoned eight months at Fort Warren and Fortress Monroe. Released on parole, he established the "Southern Opinion" in 1867 and the "The Political Pamphlet," neither of which lasted over two years. Mr. Pollard's literary laurels were chiefly won in his service during the civil war, when he was undoubtedly the ablest writer in behalf of the Confederacy. His position in this respect was, moreover, somewhat unique, as he was a ruthless denunciator of Jefferson Davis. The later years of Mr. Pollard's life were spent in New York city and Brooklyn. His publications included: "Black Diamonds in the Darky Homes of the South" (1859); "Letters of the Southern Spy in Washington and Elsewhere" (1861); "Southern History of the War" (1862-66, published in various forms and at various dates in Richmond, New York and London); "Observations in the North, Eight Months in Prison and Parole" (1865); "The Lost Cause, A New Southern History of the War of the Confederates" (1866); "Lee and His Lieutenants" (1867); "The Lost Cause Regained" (1868); "Life of Jefferson Davis, with the Secret History of the Southern Confederacy" (1869), and "The Virginia Tourist" (1870). Mr. Pollard died at Lynchburg, Va., Dec. 12, 1872.

MAYNARD EDWARD, dental surgeon and inventor, was born at Madison, N. Y., April 26, 1813, son of Moses and Chloe (Butler) Maynard. His father was a farmer, a sheriff of Madison county, and one of the members of the New York legislature who promoted the building of the Chenango canal.

Edward A. Pollard

The earliest American ancestor was John Maynard, who came from England in 1630, and settled in Sudbury, Mass. Edward Maynard was prepared at Hamilton Academy for the Military Academy at West Point, entering that institution in 1831. The drill duty there being too exacting for his delicate health he resigned the same year and gave his attention to civil engineering and the study of anatomy. He settled in Washington, D. C., in 1836, and practiced dentistry with short intervals until March, 1890. His inventions in instruments and modes of using them in his profession have been numerous, and many of them have become well known and generally adopted. His discovery of the great diversity of situation, form, and capacity of the maxillary antra was made known to the faculty of Baltimore College of Dental Surgery in 1846, and from that time has been regarded as of great importance in the treatment of disease of the superior maxillaries. His announcement in 1836 of the existence of dental febriles, based upon his discovery that sensitive dentine could be cut with less pain in particular directions than in opposite ones was discussed and the discussion was reported in the "Transactions" of the American Society of Dental Surgeons before any announcement of the discovery of such febriles was made by the aid of the microscope. He was the first, in 1838, to successfully practice the filling of the nerve cavity with gold foil, including the nerve canals, in molar and bicuspid teeth, an operation he introduced in Europe in 1845. In 1857 he accepted the chair of theory and practice in the Baltimore College of Dental Surgery, and held a like position in the faculty of the dental department of the National University of Washington. His practice was among the higher classes: several presidents, cabinet ministers, senators, representatives, officers of the army and navy, and foreign ministers. He received the honorary degrees of A. M., M. D. and D. D. S., and was an honor-

ary member of the American Academy of Dental Science; European Society of American Dentists, and was a member of the international medical congress in 1857. In 1845 Dr. Maynard patented a system of priming for fire-arms to supersede the percussion-cap. Coiled and protected in a recess of the lock was a waterproof, incombustible, tape-like paper strip having on one side fifty lozenge-like elevations at equal distances apart. Each elevation contained a charge of fulminate. When the hammer was cocked, one charge was automatically projected over the nipple. When the hammer descended, it cut off and fired the charge. The U. S. government purchased the right to use this invention and applied it to about 30,000 rifles and muskets. It was adopted in Europe also, the king of Belgium complimenting the inventor in person, the king of Prussia making him a chevalier of the military order of the Red Eagle, and the king of Sweden giving him the great medal of merit—an honor rarely given to a foreigner. In 1851 he patented a breech-loading rifle known throughout the world as the Maynard rifle. His later improvements on the mechanism of this weapon (those patented in 1850) adapted the arm to the use of his invention in metallic ammunition patented 1856, in which a truncated cylinder-conoidal projectile is tightly set in a cylindrical metallic cartridge, holding firmly the axis

of the projectile in the axis of the cartridge; thus in the act of loading a gun, placing the axis of the projectile precisely in the line of the axis of the bore of the gun and holding it in that line until it, in the act of firing, has fully entered the bore. This invention resulted in a very great increase in precision, and on frontier trials proved its ability to withstand all the casualties of rough service. It was adopted by the U. S. government, by all the American manufacturers of breech-loading arms, and is now in use by nearly all nations for military purposes, and by riflemen in all countries. He patented a method of converting muzzle-loading arms into breech-loaders in 1860. The principal claim in this patent is a device for relieving the hinge of the recoil-block from the strain by compelling all the rearward pressure to come against the breech-pin or other solid rear end of the barrel. In 1868 he patented the joining together of two rifle or shot barrels by a device that would allow either barrel to expand or contract endwise independently of the other. This idea proved valuable in double rifles, inasmuch as by the old method of joining the barrels immovably either barrel may be so heated by a single shot that it will become measurably longer than the one not heated, resulting in both barrels being made crooked and kept so until the heat is equalized by connection. In 1886 he patented an invention for indicating the number of cartridges in the magazine of a repeating fire-arm at any time. The value of the idea was readily appreciated by military men, to whom it was of prime importance that they should be able to see at a glance to what extent the magazine was supplied before going into action, and by hunters for a similar reason. Many other patents were granted Dr. Maynard, and his influence on dentistry and modern gunnery is incalculable. He was married twice: in 1839, at Sherburne, N. Y., to Ellen Sophia, daughter of Moses Doty, by whom he had seven children, and in 1869, to Nellie Long, of Savannah, Ga., by whom he had one child. He died in Washington, May 4, 1891.

KNABE, William, manufacturer, was born in Kreutzburg, in the duchy of Saxe-Weimar, June 3, 1803. At an early age he was apprenticed to a cabinet-maker, and after learning that trade he apprenticed himself to a piano manufacturer at Gotha, and acquired a reputation as an excellent piano-maker. He emigrated to America in 1833, settling in Baltimore, Md., where he immediately went to work in the shop of Henry Hartje, the original inventor of iron piano frames. By industry and economy, in a few years he accumulated sufficient capital to begin business for himself, and in 1839 he formed a partnership with H. Gaeble, under the firm name of Knabe & Gaeble. Their business was successful from the first, and in 1851 they had two large establishments in Baltimore. The instruments made by this house soon became widely known for their superior qualities. In 1854 the partnership was dissolved, and Mr. Knabe succeeding to the privileges and rights of the former firm continued the business under the name of William Knabe & Co. Important improvements were introduced in the "scaling"; the finest machinery and the best workmen were employed, until finally they manufactured every part of the piano, including their own action and hammers. As early as 1855 Mr. Knabe commenced to compete for the prizes offered by the Maryland Institute for the best piano exhibited at its fair, and from more than twenty competitors he won the gold medal. In 1854 he was married to Christina Rütz, also a native of Germany, by whom he had two sons, William and Ernest, who, in partnership with Charles Keidel, a relative by marriage, continued the business. Mr. Knabe, Sr., died in Baltimore, May 21, 1864, and his son, William, at Aiken, S. C., in January, 1889.

POLK, Thomas, revolutionary soldier, was born in Maryland, about 1721, son of William and Priscilla (Roberts) Polk, and great-grandson of Robert and Magdeline (Tasker) Pollock, natives of Ireland, Robert Pollock, on coming to this country, settled in Maryland, and received from Lord Baltimore a grant of land on the eastern shore of that state. He afterwards changed or contracted his name to Polk, and from him are descended all the Polks of America. The estate thus granted to Robert Pollock, or Polk, retains its name of "Polk's Folly" to the present day, and is still in the possession of the family. In 1753 the subject of this sketch left home, and finally settled in Mecklenburg county, N. C., where he acquired a tract of land and raised a large family. He was chosen a member of the provincial assembly in 1769, and he was the author of an act to establish Queen's College in the town of Charlotte, N. C., which later became known as the "Southern Cradle of Liberty." He was re-elected in 1771, and from that time onward he took an active part in the movements that led up to the revolutionary war. It is said that he dictated the famous Mecklenburg Declaration of Independence, although it was drawn up by his son-in-law, Dr. Ephraim Brevard, who was clerk of the committee. Considerable controversy has arisen over the date and wording of this "declaration," and in 1830 the legislature of North Carolina appointed a committee to investigate it. In 1838 Peter Force, compiling his "American Archives," came upon an abbreviated copy of the genuine resolutions, dated May 31, 1775, and in 1847 Dr. Joseph Johnson found the entire series of resolutions in the "South Carolina Gazette" of June 13, 1775. A copy of this paper was sent to Earl Dartmouth, the secretary of state for the colonies, by Gov. Wright, of Georgia, immediately after its publication, and is still in the state paper office, London. The resolutions, in twenty articles, denounced the action of parliament; declared the tie of Great Britain severed; enjoined obedience of the laws as of colonial authority, and invested the delegates and militia officers with authority to keep the peace. After being adopted by the committee they were read by Col. Polk to his fellow citizens from the steps of the county court house, May 31, 1775. He was subsequently a member of the committee that on Aug. 24th prepared a plan for securing the internal peace and safety of the provinces. He thoroughly organized the militia of the county, compelling contributions of men and munitions from each and every district. He was soon afterwards appointed colonel of a battalion of minute men in the Salisbury district. In 1776 he was made colonel of the 4th regiment, and joined Washington's army. He was a warm personal friend of Gen. Washington, and took part with him in the battle of Brandywine and shared in the hardships of Valley Forge. When the British were advancing upon Philadelphia he removed the liberty bell to Bethlehem. In November, 1779, he went with the North Carolina troops to reinforce the Southern army under Gen. Lincoln at Charleston. After the fall of this city he became commissary-general for the state of North Carolina and commissary of purchase for the army. He attained the rank of brigadier-general. After the revolution he engaged in the purchase of land warrants for wild lands in Tennessee, that had been issued to the disbanded soldiers by the state for their services. In 1753 he was married to Susan, daughter of Thomas Spratt, and had nine children. He died in Charlotte, N. C., Jan. 26, 1794.

POLK, William, revolutionary soldier, was born in Charlotte, Mecklenburg co., N. C., July 9, 1758, son of Thomas and Susan (Spratt) Polk. He attended Queen's College, Charlotte, N. C., until the breaking out of the revolutionary war. In April,

1775, while still a student, he was appointed second lieutenant, and assigned to the 3d South Carolina regiment. His first service was a commission to watch some Tories in South Carolina, and a treacherous guide led him into an ambush, where he received a bullet through the shoulder. In November, 1776, he was elected major of the 9th regiment of North Carolina troops, and joined the army under Gen. Washington. He took part in the battles of Brandywine and Germantown, in 1777, being wounded in the jaw at the latter. In March, 1778, he returned to the South, and was placed on the staff of Gen. Caswell. He was present at the battle of Camden, and subsequently fought under Gen. Davidson, being shortly afterwards promoted lieutenant colonel, 11th South Carolina horse, in Gen. Sumter's brigade. He was at the hard fought battle of Eutaw Springs, in September, 1781, and remained on duty in that section until the end of the war. In 1783 he became surveyor-general of what is now a part of Tennessee. In 1787 he was elected to the general assembly from his native county, which he continued to represent until he became supervisor of the district of North Carolina. This last position he held for seventeen years. Removing to Raleigh, he became director, and later president, of the State bank of North Carolina, resigning so as to devote more attention to his private estate. In March, 1812, Pres. Madison appointed him brigadier-general in the regular army. He was a member of the Society of the Cincinnati. He was twice married, his first wife being Griselda Gilchrist, by whom he had two sons; the eldest son, Thomas, was a general in the North Carolina line and a state senator. His second wife was Sarah, daughter of Col. Philemon Hawkins, by whom he had six sons and two daughters. His fourth son, Leonidas, became bishop of Louisiana. Another son was Thomas Gilchrist Polk, a prominent lawyer of Mecklenburg county, N. C. Col. William Polk died in Raleigh, N. C., Jan. 4, 1834, survived by seven sons and two daughters.

POLK, Leonidas, soldier, first P. E. bishop of Louisiana, and 23d in succession in the American episcopate, was born in Raleigh, N. C., April 10, 1806, son of William and Sarah (Hawkins) Polk. He was educated at the University of North Carolina, and as his father wished him to become a soldier he entered the West Point Military Academy, where he was graduated in 1827, and immediately brevetted second lieutenant of artillery. While here he was baptized by Rev. Charles P. McIlvaine, chaplain at the academy and afterwards bishop of Ohio, who induced him to follow the ministry, and he accordingly resigned his commission the following December. He began the study of theology, and in 1830 was made deacon in the Protestant Episcopal church by Bishop Moore, and in the following May he was ordained priest by the same bishop. He served in the Monumental Church, Richmond, as assistant rector for about a year, when he went to Europe to recuperate his health. Upon his return he removed to Tennessee, and became rector of St. Peter's Church, Columbia, in 1833. He was a deputy to the general convention in 1835, and also a member of the standing committee of the diocese. On Sept. 15, 1838, he was elected missionary bishop of the southwest, and was consecrated in Cincinnati, O., the following December. During his missionary episcopate he had charge of Arkansas, Indian Territory, Texas, Louisiana, Mis-

Mississippi and Alabama. He was elected bishop of Louisiana Oct. 16, 1841, and resigning the position of missionary bishop, he entered upon the discharge of his duties in his new office the following January. He was tireless in all missionary work, and before long had planted the standard of his church at Shreveport, along the coast of the Red river, at Plaquemine, at Opelousas, along the Teche and La Fourche, at Thibodaux, Napoleonville and Donaldson. His pioneer work was fraught with many perils by land and by water. Travel was slow and fatiguing, and his journal records many instances of his having to swim several streams before reaching his destination. During his episcopate Bishop Polk made sixteen deacons and ordained nineteen priests, and the number of churches increased from three to thirty-three. In 1856 he initiated the movement to establish the University of the South at Sewanee, Tenn., in connection with Bishop Stephen Elliott. On the outbreak of the civil war his sympathies were by birth and education drawn to the South, and entering heartily into all the plans of the leaders for establishing a Southern Confederacy, he urged upon the Confederate authorities the importance of fortifying strategic points for defensive and offensive operation. In June, 1861, he accepted a commission as major-general offered by Pres. Davis, and was placed in command of all that territory extending from the mouth of the Red river on both sides of the Mississippi, to Cairo, on the Ohio, with headquarters at Memphis, Tenn. The works at New Madrid and Fort Pillow, Columbus (Ky.), Island No. 10, Memphis and other points were constructed under his supervision. Gen. Polk commanded in person the Confederate troops at the battle of Belmont, fought Nov. 7, 1861. In 1862 he was ordered to join the army of Gens. Albert S. Johnston and Beauregard at Corinth, Miss., and as commander of the 1st corps he took part in the battle of Shiloh and in the subsequent operations that ended with the evacuation of Corinth. He was in command at the battle of Perryville, and he commanded the armies of Kentucky and Mississippi, conducting the Confederate retreat from the former state. He was promoted to the rank of lieutenant-general in October, 1862. Through alleged disobedience of orders at Chickamauga, he was relieved from his command and ordered to Atlanta. Pres. Davis dismissed the charges and offered to reinstate him in his command; but he declined, and was then placed in charge of the paroled prisoners of Vicksburg and Port Hudson at Enterprise, Miss., until December, 1863, when he was assigned to the department of Alabama, Mississippi and East Louisiana, in place of Gen. Johnston, who had superseded Gen. Bragg in the command of the army of the Tennessee. While reconnoitering on Pine mountain, near Marietta, Ga., he was killed by a cannon ball, June 14, 1864. In 1830 he was married to Frances Ann, daughter

of John Deveraux, of Raleigh, N. C., and left eight children. His son, Dr. W. M. Polk, is a prominent physician in New York city.

WILMER, Joseph Pere Bell, second P. E. bishop of Louisiana, and 80th in succession in the American episcopate, was born in Kent county, Md., Feb. 11, 1812, son of Rev. Simon Wilmer, whose first American ancestor, Simon Wilmer, settled in America in 1660. A brother of his grandfather, by the name of James Jones Wilmer, was a clergyman before and after the revolutionary war; was secretary of the first meeting of the clergy in 1783, and, upon

his motion at that meeting, the Church of England in the United States adopted the name of the Protestant Episcopal church. Bishop Wilmer was graduated at the University of Virginia in 1831, and at Kenyon College in 1833, after which he studied at the Protestant Episcopal Theological Seminary at Alexandria, Va. He was ordered deacon in July, 1834, and was ordained priest in May, 1838. After serving a few months as chaplain in the University of Virginia, he was appointed chaplain of the U. S. army in 1839. Resigning this position in 1843, he took charge of Hungar's parish, in Northampton county, Va., and later of St. Paul's parish, in Goochland county, Va. In 1848 he became rector of St. Mark's Church in Philadelphia. At the beginning of the civil war he resigned, and settled on his plantation in Albemarle county, Va. In 1863 he went to England to purchase Bibles for the Confederate army, and upon his return was captured and held prisoner in Washington, D. C. In November, 1866, he became bishop of Louisiana, a diocese at that time in a very unsettled condition; but he devoted himself with great energy to erecting churches that had been destroyed during the war and to filling vacant pulpits, and he was very successful in restoring them to a prosperous condition. Bishop Wilmer was noted as an eloquent speaker and public orator. The degree of D. D. was conferred upon him by Union College in 1857. He died in New Orleans, Dec. 2, 1878.

GALLEHER, John Nicholas, third P. E. bishop of the diocese of Louisiana and 124th in succession in the American episcopate, was born in Washington, Mason co., Ky., Feb. 17, 1839. His father was a merchant, and destined his son to follow the legal profession. His early education was received at the schools in the vicinity of Maysville, and at the age of sixteen he entered the University of Virginia, where he remained two terms, 1856-58. He had just begun to teach in Lake Providence, La., when the civil war broke out, and he immediately returned to Kentucky, and enlisted as a private under Gen. S. B. Buckner. His close attention to duty and undaunted courage soon attracted Gen. Buckner's attention, and he was promoted assistant in the adjutant-general's department. He was subsequently made the general's inspector, and upon the promotion of Gen. Geo. Crosby, Capt. Galleher was made a chief of staff. One of the members of the staff has said of him: "He was as gallant a man as ever lived. I do not believe he ever felt afraid in his life. There was only one thing about him in the campaign which none of us could understand, and that was his predilection for the ministry. But there was something about him as a soldier that made men respect him as a man of God." During the war Col. Galleher first met Col. Robert Wooley, with whom he afterwards studied law, and was duly admitted to the bar. He subsequently took a post-graduate course under Judge Brockinborough, at Lexington, Va., and upon his return to Louisville made a partnership with Col. Wooley, and continued to practice for eighteen months, at the expiration of which time he decided, as he said, "to stop trying to save people's money, and instead to save their souls." He accordingly began his theological studies, and at the end of a year was admitted to the order of the diaconate. In less than a month after he was made a deacon. Mr. Galleher was called to take charge of Old Trinity Church in New Orleans,

La., then the foremost parish in the South. He remained there until 1871, when he was called to the Johns Memorial Church in Baltimore, and from that parish went to Zion Church, New York city, where he remained until he was elevated to the episcopate, in November, 1879, about a year after the death of Bishop Wilmer. He assumed charge of the diocese Feb. 5, 1880. His work in Louisiana was laborious, and the privations he endured in attending to the duties of his office so impaired his health, that for three years prior to his death he was a constant sufferer. Bishop Galleher was married, in 1868, to Lottie, daughter of John Barbee, of Louisville, Ky. She was considered at that time the handsomest woman in the state. He had five children: John, who was an engineer; Lottie, Paul, Clarkson and Alice, the wife of the present bishop of Louisiana. Bishop Galleher stood high in the church, both as an orator and a theologian. He was classed among the broad churchmen, and had a powerful influence in the house of bishops. A man of kindly, graceful manner, wise, generous and just in his dealings, he was dear to all who knew him. He died in New Orleans, La., Dec. 7, 1891.

SESSUMS, Davis, fourth P. E. bishop of the diocese of Louisiana and 157th in the order of the American episcopate, was born in Houston, Tex., July 7, 1858, son of Alexander and Mary (Rumels) Sessums. After a preparatory education in the schools at home, he went to the University of the South, Sewanee, Tenn., where he was graduated with the degree of A. M. in 1878. He was ordered deacon in 1882, and ordained priest a few months later. He became minister of Grace Church in Galveston, Tex., and in 1883 was made assistant rector of Calvary Church, Memphis, Tenn., soon after becoming rector. In 1887 he became rector of Christ Church, New Orleans. In consequence of the poor health and infirmities of his predecessor, Bishop Galleher, the convention of the diocese was called upon to elect an assistant. The request was granted, and the choice of the convention was Mr. Sessums, who was duly elected in April, 1891, and was consecrated June 25th following. He then assumed full charge of that diocese, with the right to succeed to the full title and authority of the office. Bishop Sessums received the degree of D. D. from the University of the South in 1891. He was married, in 1890, to Alice C., daughter of his predecessor, Bishop Galleher.

GRANT, Frederick Dent, soldier and ambassador, was born in St. Louis, Mo., May 30, 1850, eldest son of Ulysses S. and Julia (Dent) Grant. His father was the eighteenth president of the United States. He attended the public schools until the outbreak of the civil war, when he joined his father at several places when it was convenient for the General to have his family with him. Young Grant witnessed the capture of Forts Henry and Donelson, and went with his father's command through the Virginia campaign. He was also present and saw the fights at Corinth, Vicksburg, Nashville, City point and Petersburg. He was also with his father in Washington when he received his commission as secretary of war from Pres. Johnson. After the war he entered West Point, and was graduated in 1871. On leaving the Military Academy he obtained leave of absence, and accepted a position as civil engineer for the Union Pacific railway, and assisted in various surveys across the continent. In 1873 he made a trip to Europe with Gen. Sherman. On his return, in 1873, he joined his regiment in Texas, and assisted in making the preliminary surveys for the Texas and Pacific railway. He was then assigned to the staff of Gen. Sheridan as aid-de-camp, and was with him in his campaigns on the frontier against the Indians. During the Yellowstone expedition he acted on the staff of Brevet Maj.-Gen. Stanley, and in 1874

accompanied the Black Hills expedition, after which he obtained leave of absence and accompanied his father around the world. Col. Grant resigned his commission in the army in 1881, and engaged in business in New York. In 1887 he was nominated for the office of secretary of state, but, owing to the political complications of that year, failed of an election; but in 1888 was appointed by Pres. Harrison minister to Austria, where his success in securing the admission of American products and in protecting American citizens from military duty won for him the highest commendation, and on Mr. Cleveland's election to the presidency he was informed that, unless he insisted, his resignation would not be accepted. He did insist, however, and returned to the United States in 1893, since which time he has resided in New York. Under the reform administration of Mayor Strong (1897) he served as one of New York's police commissioners. At the outbreak of war with Spain (1898) he became colonel of the 144th New York volunteers, and on May 27, 1898, was appointed brigadier general of U. S. volunteers. He served in Porto Rico, and after the war commanded the military district of San Juan. He was married in Chicago, in October, 1874, to Ida, daughter of H. H. Honoré, of Chicago, by whom he has two children.

MITCHELL, Neal, physician, was born in Jacksonville, Fla., Oct. 21, 1855, son of Joseph Davis and Myra H. (Chase) Mitchell. His father, a physician, was born in Penfield, Me., in 1823, and moving to Florida in 1852, practiced his profession there until the outbreak of the civil war, when he returned to his native state and offered his services to the Federal army. He was made surgeon of the 8th Maine infantry, and subsequently of the 31st regiment, serving until the close of the war. He returned to Florida in 1865, settled in Jacksonville, and successfully practiced his profession up to the time of his death in July, 1893. His mother was a daughter of Mark Chase, at one time a noted shipbuilder, of West Newfield, Me. The son was educated at private schools and at Lapham Institute, North Scituate, R. I. He was graduated at Amherst College in 1879. He entered Bellevue Hospital Medical College, New York, in 1879, to take his first course in medicine. He pursued his second at the Long Island Medical College, Brooklyn, N. Y., in 1880, and after graduation he began the practice of his profession at Jacksonville, Fla. Dr. Mitchell was appointed president of the board of health of the state in 1882, and held the position for seven years, being brought prominently before the public by his heroic conduct and thorough mastery of the epidemic of yellow fever that visited Jacksonville in 1888. In 1890 he took a post-graduate course in the Berlin University, remaining in Europe for one year. In the practice of his profession he makes no branch a specialty, being thoroughly conversant with all classes of disease. He, however, has been pre-eminently successful in gynecology, and in that branch has the largest practice of any physician in the state. Dr. Mitchell is president of the Duval County Medical Association, and a member of the State and of the American Medical associations. He is a Mason and a member of the Presbyterian church. His success as a physician and surgeon is due to thorough preparatory training, a determined will and a conscientious desire to give to humanity the full benefit of his scientific and practical knowledge.

MITCHELL, Sollace, physician, was born in Jacksonville, Fla., Sept. 15, 1858, son of Joseph Davis and Myra Hobbs (Chase) Mitchell. His mother was daughter of Mark Chase, of West Newfield, Me. He was educated at Williston Seminary, East Hampton, Mass., and was graduated at Harvard College in 1883. His professional studies were made at Bellevue Hospital Medical College, New York city, where he received the degree of M.D. in 1885, and for eighteen months thereafter he was interne in the third surgical division of the hospital. In October, 1886, he entered on the general practice of his profession at Jacksonville, where he has since resided. He was chief surgeon of the Jacksonville, Tampa and Key West railroad for twelve years (1887-99); has been surgeon of the East Coast railroad since 1896, and is consulting surgeon of the Plant system of railroads and steamships. During the yellow fever epidemic of 1888 he was physician in charge of the Sand Hills Hospital, Jacksonville, Fla., and in 1891 was chief of the medical staff of the Schumacher Hospital, Jacksonville, and consulting surgeon of the South Florida Sanitarium, Sanford, Fla. Dr. Mitchell devotes the summer months of

Sollace Mitchell

every other year to travel and study, at home and abroad, and has thus been able to pursue extended courses at Berlin, London and Edinburgh. He is a member and ex-president of the Duval County Medical Society; a member of the Florida State Medical Association and of the Bellevue Hospital Alumni Association. Articles and discussions of noted cases from his pen have frequently appeared in the medical periodicals. In 1899 he was married to Florence, daughter of Frank H. Terry, of Lockport, N. Y.

DUGDALE, Richard L., social economist, was born in Paris, France, in 1840, of English parents. In 1848 his parents removed to London, where Richard was placed in the government drawing school at Somerset House. In 1851 the family came to New York, where he attended a public school for a few years. At the age of fourteen he was employed by a sculptor, and did very creditable artistic work. But his health was already impaired, and he retired to a farm purchased by his father in Indiana. In 1860 he returned to New York. Desiring to devote himself to the study of social science, he attended the night classes of the Cooper Union, and later he embarked in mercantile enterprises, that he might support himself and procure the means of pursuing the investigations and studies which were the first object of his existence. He became a member of the executive committee of the Prison Association of New York in 1868, and spent much of his time in visiting prisons and poorhouses, in order to discover the origin of crimes, and the influences, hereditary and social, which had surrounded the many criminals with whom he made personal acquaintance. The result of these investigations was given in his famous book, "The Jukes: A Study in Crime, Pauperism, Disease and Heredity" (New York, 1877; 3d ed., same year; new ed., 1884). The following criticism of this work may be found in the "Nation," XXV, 60: "Mr. Dugdale has studied a large number of town loafers from a somewhat unusual point of view; namely, the genealogical. . . and has recorded here the lineage, the relationships, and the main facts in the edifying careers of seven hundred members and more of this misbegotten family, to which he gives the pseudonym of 'The

Jukes.'" This was followed by "Further Studies of Criminals" (1877), and by a number of articles on sociological subjects in the "Westminster Review," the "North American Review," the "Atlantic Monthly" and other periodicals. In 1880 he was made first secretary of the Society for Political Education, the interests of which he had very much at heart. He was also secretary of the section on sociology of the New York Association for the Advancement of Science and the Arts; secretary of the New York Social Science Society and of the New York Sociology Club; treasurer of the New York Liberal Club; vice-president of the Society for the Prevention of Street Accidents; secretary of the Civil Service Reform Association; an active member of the American Social Science Association and of the American Public Health Association, and a member of the American Free Trade League, of the chamber of commerce, and of the American Institute. He died in New York city, July 23, 1883.

SHINN, William Powell, civil engineer, was born at Burlington, N. J., May 4, 1834. His father was a carpenter and builder. He was educated in the Burlington schools, and when just eighteen years of age began his engineering career as rodman in a party engaged in the location of the Ohio and Pennsylvania railroad near Pittsburgh, Pa. The intelligence and energy he displayed caused his rapid advancement to positions of responsibility, and the ability he displayed in the management of accounts led to his being placed in control, first of the freight, then of the passenger, and finally of all the accounts of the Pittsburgh, Fort Wayne and Chicago railroad. For fifteen years, 1856-71, he was connected with this important railroad, being for the last five years the general freight agent. About this time the Pennsylvania Railroad Co. was negotiating for the lease of the railroads between Philadelphia and New York, which had been consolidated under the title of The United Railroads of New Jersey, and Mr. Shinn was commissioned to report upon their condition and prospects. His report, which was very clear and exhaustive, is said to have been largely instrumental in determining the lease of these vast properties, including lines of railroad, canal and river transportation and ferries and transfer vessels, to the Pennsylvania Railroad Co., and the adoption of a number of important changes and improvements recommended by him. In 1871 the Pennsylvania Co. was organized for the control of western railroads tributary to the Pennsylvania railroad, and Mr. Shinn was made the general agent and intrusted with important duties in the investigation of the financial condition of numerous roads as well as their physical condition. In the same year he was made the treasurer of the Granite Improvement Co., of Pittsburgh, and also built for this company the Ash-tabula, Youngstown and Pittsburgh railroad. In 1873 he, as managing partner of Carnegie, McCandless & Co., built the Edgar Thompson steel works at Braddock, Pa., and managed them until 1879, when he retired and reorganized the Vulcan Steel Co. of St. Louis, rebuilding and managing the works until 1881. Between 1874 and 1880 he also reorganized the Allegheny Valley Railroad Co., which had become involved financially, and on his retirement from office left the affairs of the company in a greatly improved condition. From 1881 to 1887 he was vice-president of the New York Steam Co., for the distribution of steam for the heating of buildings by pipes through the streets of New York city. In 1886-91 he was vice-

Wm. Shinn

president and general manager of the New York and New England Railroad Co., and also president of the Norwich and New York Transportation Co. In 1891 he organized the United States Glass Co., a consolidation of sixteen glass manufactories, with a capital of \$4,000,000. Mr. Shinn became a member of the American Society of Civil Engineers in 1869, and was its president in 1890. He contributed a number of valuable papers to the "Transactions" of the society, and took an active part in the discussion of technical subjects as well as in the management of the society. He was also a member of the American Institute of Mining Engineers, and its president in 1880. Several papers were contributed by him to its "Transactions." His administrative ability and practical experience in conducting transportation contributed largely to the success of the visit of the members of the Iron and Steel Institute of Great Britain to the United States, in 1890, as the guests of the Institute of Mining Engineers and other technical societies, when, under his management as chairman of the transportation committee, more than five hundred persons were carried on excursions over several thousand miles of railroads, through eighteen states, for a full month, without delay or accident, promptly on time. The visiting societies expressed their appreciation of his attentions by valuable memorials of exquisite design. He was made a member of the Iron and Steel Institute of Great Britain on Feb. 3, 1891. He was married, in July, 1856, to Sallie Templeton, daughter of Thomas Farley, of Allegheny, Pa. She died Sept. 16, 1890. Mr. Shinn always maintained his residence in Pittsburgh, and died there on May 15, 1892.

BIRDSELL, John Comly, farmer, inventor and manufacturer, was born in Westchester county, N. Y., March 31, 1815, son of Benjamin and Charity (Carpenter) Birdsell. When he was seven years old his parents removed to a farm in Monroe county, N. Y. His early education was obtained in the district schools and in the academy at West Henrietta, Monroe co. He taught school for a time, but in 1836 he rented a farm near Mendon, Monroe co., N. Y., and began his career as an agriculturist. In 1839 he purchased a farm in Rush township, Monroe co., where he lived for twenty-five years. He was accustomed for many years to thresh seed and grain for neighboring farmers, and he was led in this way to invent the combined clover threshing and hulling machine, now in general use. The separation of the seed from clover hulls and grass seeds was a slow and expensive process at that time. Clover seed sold before 1855 for about \$28 a bushel; very little was raised, and the value of the plant as a fertilizer was little known. His inventions led to an increased clover acreage, and have been of great advantage to farmers. The clover seed exported yearly is valued at about \$6,000,000, and thousands of acres of farm lands in the United States have been enriched by the cultivation of the grass. Mr. Birdsell's first machine was constructed in 1855, but his agents in Washington failed to lay the drawings and models before the commissioner of patents until May, 1858. He built two or three machines while waiting for his patent, and in 1858 obtained premiums at the state fairs in Ohio, Michigan and New York. He erected a factory at West Henrietta in 1859, and there he manufactured his machines for seven or eight years, but with little financial profit. He had few sales, and at one time offered his patent to Cornelius Aultman, the Canton manufacturer, for \$1,000; but he declined it on the ground that its field of usefulness was too small. Mr. Birdsell continued to improve the machine, and its success soon brought infringers of his rights into the field. These he drove out of business, after several years of litigation and the expenditure of about \$180,000. In 1863

he started small shops at South Bend, Ind., and in 1861 removed with his family to that town. He organized a stock company in 1870, composed of himself and his sons, to carry on the business he had founded, and of this company he became president. In 1879 he secured patents on a new clover huller. He was married, June 7, 1838, to Harriet, daughter of Joseph Lunt. She died in April, 1869, leaving four sons, Yarnum O., Joseph Benjamin, Byron A. and John C. Birdsell. He died July 13, 1894.

VERPLANCK, Gulian, merchant, was born in New York city in 1751. The first American of the name, Abraham Isaac Ver Planck, emigrated from Holland about 1633 and settled at or near the present site of Jersey City, then known as Pavonia, in 1638. At the time the settlement was destroyed by the Indians he fled to New Amsterdam, and he was among the 272 residents who swore allegiance to the English in 1664. His son, Gulian, one of the founders of the town of Fishkill, N. Y., and a prominent merchant of New York, was appointed alderman of the city in December, 1683. Gulian's grandson, Philip, was married to Gertrude Van Cortlandt, and represented the manor of Cortlandt in the colonial assembly in 1731-68, and in 1746 was one of the commissioners to confer with the other colonies upon the French and Indian war. The subject of this sketch was graduated at King's College (Columbia) in 1768, went to Holland to complete his education, and, returning, carried on an extensive trade with that country for many years. He was a member of the New York state assembly, 1788-89 and 1796-97, on both occasions being elected speaker, a position at that time of great dignity and influence. He was regent of the University of New York State (1790-99). On March 21, 1791, the Bank of New York was incorporated, and the 18th of the following May Gulian Verplanck was elected to its presidency, the directors being Isaac Roosevelt, William Maxwell, Thomas Randall, Daniel McCormick, Nicholas Low, William Constable, Joshua Wadlington, Samuel Franklin, Comfort Sands, Robert Browne, Gulian Verplanck, John Murray, William Edgar and Rufus King. He was also a founder of the Tontine Association, which was formed about 1794 by a number of merchants. His residence stood at the foot of Nassau street. A man of literary tastes, he once scratched on the window of an English inn an original poem, prophesying America's coming greatness and freedom, to which he signed his name and the date, 1775. He died in New York city, in 1799, survived by a son, Johnson Verplanck, for many years a prominent editor of New York and an active Federalist politician.

DODGE, Grenville Mellen, civil engineer and soldier, was born at Danvers, Mass., April 12, 1831, son of Sylvanus and Julia T. (Phillips) Dodge. His grandfather, Capt. Solomon Dodge, of Rowley, Mass., was descended from one of two brothers who emigrated from England and settled in Salem, Essex co., Mass., in 1630. He was educated in a New Hampshire academy and the Military University, Norwich, Vt., and was graduated at the latter in 1850 as a civil engineer. The following year he went West, and began his experience in practical surveying in the employ of the Illinois Central and Chicago and Rock Island railroads. In 1853 he was appointed assistant engineer of the Mississippi and Missouri, now the Chicago, Rock Island and Pacific railroad. He also surveyed, during 1853 and 1854, from Davenport, Ia., to Council Bluffs, and into the Indian country as far as the Platte river, thus beginning the surveys for the first Pacific railroad system. In 1854 he took up a claim in Nebraska, but was so much harassed by the Indians that he was obliged to return to Council Bluffs, and he opened a banking and real estate office

there in 1855. Upon the outbreak of the civil war he went to Washington for the governor of Iowa, to arrange for the arming and equipping of the troops of that state. Succeeding in this, he returned to Iowa, raised the 4th regiment of Iowa volunteers, and was made colonel. His first active service was with Gen. Fremont in Missouri, and later he was placed in command of a brigade, which saw heavy fighting in the Southwest, capturing Springfield, Feb. 13, 1862, and otherwise opening the way for the advance movement which Gen. Curtis made into Arkansas that year. He distinguished himself at the battle of Pea ridge, holding with his brigade the right wing of the Federal army. Here he had three horses shot under him, and was severely wounded, and for his gallantry on that field was made brigadier-general of volunteers March 31, 1862. During the following summer he was in command of the district of the Mississippi, and here his engineering skill came into play in superintending the construction of the Mississippi and Ohio railroad. He became noted for his effective raids on the Confederates during the campaign before Vicksburg, and so assisted Gen. Grant in protecting his flank that the latter strongly recommended him for promotion. This soon reached him, and he was made major-general of volunteers June 7, 1864, particularly for his gallant conduct in the battle of Sugar valley (May 9) and Resaca (May 14 and 15), 1864. During Sherman's celebrated march through Georgia Gen. Dodge commanded the 16th army corps, and at Atlanta, July 22d, fought an entire Confederate corps with eleven regiments, successfully withstanding their attacks. During the siege of Atlanta he was severely wounded (Aug. 19th), so much so that for some time he was incapacitated for active service. In December, 1864, he was appointed to succeed Gen. Rosecrans as commander of the department of Missouri, to which command that of Kansas and the territories was added in February, 1865. During that year he conducted a successful campaign against the hostile Indians. In May, 1866, Gen. Dodge resigned from the army, and was at once appointed chief engineer of the Union Pacific railroad, for whose construction he had done so much early surveying. While performing his duties in this connection he was elected to congress from the 5th congressional district of Iowa, and served in 1867-69; being offered a renomination, he refused it, and continued his work on the Union Pacific until 1871, becoming soon after director of the road. During 1872 and 1873 he joined Col. Thomas A. Scott, of the Pennsylvania railroad, in constructing the Texas and Pacific railroad, of which he was chief engineer. He was chief engineer of the Pacific Railway Improvement Co., the American Railway Improvement Co. and the International Railway Improvement Co., all three organized in 1880; the Missouri, Kansas and Texas Railway Co., of which he was president in 1880; the Texas and Colorado Railway Construction Co., organized in 1881. He built the railroad from Denver, Col., to Fort Worth, Tex., in 1884, and was appointed its agent in 1883, with full authority to take entire charge of its management. In 1889 he was elected director and vice-president, and in 1896 was elected president. Other enterprises with which Gen. Dodge has been prominently identified are: the Oriental Construction Co., organized in 1882, of which he was also president; the St. Louis, Des Moines and

Northern Railway Co., of which he was elected president in 1884; the Des Moines Union Railway Co.; the Colorado and Texas Construction Co., organized in 1887; the Denver, Texas and Fort Worth Railroad Co., of which he was president until the date of its consolidation, in April, 1890; the Des Moines and Northern Railway Co., of which he was president for two years; the Western Industrial Co., of which he is still the president; the Wichita Valley Railway Co., of which he has been president since 1897; the Union Pacific, Denver and Gulf Railway Co., of which he was president in 1891 and 1892; and the Colorado and Southern Railway Co., of whose board he was chairman in 1899. Gen. Dodge was a delegate to the national Republican conventions of 1868 and 1876. He was president of the commission which investigated the conduct of the Spanish war, and succeeded Gen. Sherman as president of the Society of the Army of the Tennessee; he was also vice-president of the Grant Monument Association, which owed very much of the success which attended its work to his personal efforts. On the memorable occasion of the transfer by this association of the Grant monument to the city of New York, April 27, 1897, Gen. Dodge acted as grand marshal. Gen. Dodge is a member of the Grand Army of the Republic; commander of the Loyal Legion of the state of New York, and member of the Union League, United Service and other prominent New York clubs. His well recognized ability and reputation in railroad projection and construction have brought him into close business connection with the leading capitalists and railroad men of America.

NEAL, John, author, was born in Portland, Me., Aug. 25, 1793, of Quaker parentage. He was self-taught. After serving a short time as clerk in a Boston office he removed to Baltimore, Md., in 1816, where he opened a dry-goods establishment in partnership with John Pierpont. Within a year the firm failed, and Neal at once turned his attention to law and literature. In 1817 he published his first novel, "Keep Cool." He was an earnest advocate of physical training, and was said to be the originator of athletic gymnasiums in America. In 1823 he went to London, England, being attracted there by the warm reception given his works of fiction. He was known in England as "Yankee Neal," and contributed to "Blackwood's" and other British quarterlies upon American subjects, with a view to correcting prevailing opinions of social and political conditions in the United States. Returning to America in 1827 he first went to Baltimore, but soon after returned to his birthplace, Portland. Here on Jan. 1, 1828, he began the editorship of "The Yankee." He also wrote many poems, a collection of which was published during his residence in Baltimore. Two poems, "Men of the North" and "Music of the Night," are preserved in Steadman's "American Anthology." His best novel is "Seventy-Six" (1821), and he also wrote: "The Battle of Niagara," by "Jehu O'Caract" (1819); "Goldan" (1819); "Logan" (1821); "Errata" (1822); "Randolph" (1823); "Brother Jonathan" (1825); "Rachel Dyer" (1828); "Benjamin's Morals and Legislation" (1830); "Downcasters" (1833); "One Word More" (1854); "True Womanhood" (1859); "Wandering Recollections of a Somewhat Busy Life" (1869), and "Great Mysteries and Little Plagues" (1870). In his novel, "Randolph," he sketched with trenchant and caustic pen some of the notables of the time. One of these was the eminent statesman, William Pinkney, which resulted in a challenge by Edward C. Pinkney. Neal, who still wore the Quaker dress, declined to fight, and he was posted by young Pinkney, according to the fashion of those days. He was an earnest opponent of capital punishment, particularly

deducted a successful campaign against the hostile Indians. In May, 1866, Gen. Dodge resigned from the army, and was at once appointed chief engineer of the Union Pacific railroad, for whose construction he had done so much early surveying. While performing his duties in this connection he was elected to congress from the 5th congressional district of Iowa, and served in 1867-69; being offered a renomination, he refused it, and continued his work on the Union Pacific until 1871, becoming soon after director of the road. During 1872 and 1873 he joined Col. Thomas A. Scott, of the Pennsylvania railroad, in constructing the Texas and Pacific railroad, of which he was chief engineer. He was chief engineer of the Pacific Railway Improvement Co., the American Railway Improvement Co. and the International Railway Improvement Co., all three organized in 1880; the Missouri, Kansas and Texas Railway Co., of which he was president in 1880; the Texas and Colorado Railway Construction Co., organized in 1881. He built the railroad from Denver, Col., to Fort Worth, Tex., in 1884, and was appointed its agent in 1883, with full authority to take entire charge of its management. In 1889 he was elected director and vice-president, and in 1896 was elected president. Other enterprises with which Gen. Dodge has been prominently identified are: the Oriental Construction Co., organized in 1882, of which he was also president; the St. Louis, Des Moines and

public executions, and in a Fourth of July oration in 1838 he was the first advocate of woman's rights, popularly so called. He died in Portland, Me., June 21, 1876.

SALM-SALM, Prince Felix J. N. M., soldier, was born in Anholt, Prussia, Dec. 25, 1828. He was educated at a military school in Berlin; was an officer in the Prussian cavalry, and afterwards joined the Austrian army. At the outbreak of the civil war he came to the United States, and enlisted in the Federal army as colonel and chief-of-staff of Brig.-Gen. Louis Blenker. On Aug. 30, 1862, he was married, in Washington, D. C., to Agnes, daughter of William Leclercq and Julia (Willard) Joy. In November, 1862, he was commissioned colonel of the 8th New York volunteers, and from June, 1861, commanded the 68th New York volunteers, under Gen. Sherman. On April 13, 1865, he was brevetted brigadier-general of volunteers, and was afterwards military governor of the district of Atlanta. In 1866 he joined the foreign forces in Mexico, where Maximilian made him his personal aid, with the rank of colonel. The prince was captured at Queretaro, and was condemned to death with Maximilian; but his life was spared through the entreaties of his wife, who, disregarding hardships and personal danger, rode day and night between his prison and the Liberal headquarters, and, on her knees, besought Juarez to spare the emperor and her husband. For her efforts in his behalf Maximilian decorated her with the Grand Cordón of the Order of San Carlos (the last he ever bestowed); his mother, the Archduchess Sophie, gave her his miniature, set in an emerald bracelet, and the emperor of Austria pensioned her. In July, 1870, undaunted by the rigor of Prussian military discipline, she obtained from Gen. von Steinmetz the permission—never before granted to a woman—to accompany his staff with the army of invasion, and both before and after the death of her husband she exerted herself to the utmost, organizing hospitals and distributing supplies and delicacies among the sick and wounded. She was recommended for the Order of the Iron Cross (an honor reserved for men), and received the Prussian medal of honor, made from captured cannon. Her book, "Ten Years of My Life," is an entertaining narrative of her experiences in the United States, Mexico and Europe from 1861 to 1871. In 1899 she revisited America for the purpose of restoring the flags of her husband's regiments—the 8th and 68th New York—to the survivors, who granted her honorary membership in the Blenker Veteran Association. She was elected, in 1899, an honorary member of the New York Chapter, Daughters of the American Revolution. In 1900 she was again in this country in the interest of raising funds to equip an ambulance corps for the relief of the wounded in the South African war. After Maximilian's execution Prince Salm-Salm returned to Europe, re-entered the Prussian army as major of the Queen Augusta regiment of the guards, and was killed at the battle of Gravelotte, Aug. 18, 1870. He published a diary of his experiences in Mexico in 1868.

KIRTLAND, Jared Potter, naturalist, was born at Wallingford, New Haven co., Conn., Nov. 10, 1793, son of Turhand and Mary (Potter) Kirtland, and grandson of Dr. Jared Potter, a distinguished physician, of Wallingford. His father, who became general agent of the Connecticut Land Co., removed in 1803 to Ohio, where the lands of the company lay; but the son remained with his grandfather, who had adopted him. He received his early education at the academies of Wallingford and Cheshire. His scientific tastes developed themselves while he was yet a boy; he devoted much time to the cultivation of fruits and flowers, took up the study of botany, and while aiding his cousins in rearing silk-worms

discovered that the female silk-worm secluded from the male could lay fertile eggs, and thus anticipated by half a century the experiments of Siebold and Steenstrup, which resulted in the demonstration of parthenogenesis in insects. In 1810 he went to his father's home at Poland, O., and on the way, at Buffalo, made a careful study of the fish fauna of Lake Erie, there laying the groundwork of a monograph of the fresh-water fishes of the West, published not long afterward. He remained for a year at Poland, teaching school, studying the fauna and flora of that section and raising and experimenting upon bees, an occupation which he pursued for sixty-five years, becoming one of the great authorities in the theory and an important contributor to the practice of this industry. Returning to Wallingford, he continued his studies there and at Hartford, giving particular attention to chemistry. It was his grandfather's desire that he should enter the medical school of the University of Edinburgh; but owing to the breaking out of the war with Great Britain he was unable to do so, and instead entered the medical department of Yale College. At the end of a year he abandoned his books for a time for the sake of his health, and then entered the medical school of the University of Pennsylvania, at Philadelphia; but in 1815 returned to Yale College and was graduated there. After practising at Wallingford for two years and a half he, in 1818, determined to remove to Ohio, but was induced to settle in Durlam, Conn., and there spent five years, continuing the cultivation of the natural sciences while practising. In 1823 Dr. Kirtland became a resident of Poland, O., where he found a wider field opened to him. In 1828 he was elected to the legislature to represent Trumbull county and served three terms, securing the adoption of important measures, especially the substitution of active labor for solitary confinement to which inmates of penitentiaries were condemned. He practised at Poland until 1837, and then became professor of the theory and practice of medicine in the Ohio Medical College at Cincinnati. In 1837, also, he was appointed an assistant on the geological survey of Ohio, under Prof. William W. Mather, and prepared a report on the geology of the state, which was published in the second annual report of the survey. An elaborate exposition of the geology of Ohio had been projected by him, and to this end the fishes and mollusks had received particular attention. His descriptions and drawings of the fishes were subsequently published in the journal of the Boston Society of Natural History. In 1829, in studying the naudes, he discovered sexual differences in them, and showed that the male and female could be distinguished by the forms of the shells, as well as by their internal anatomy. The truth of his statements was confirmed by Agassiz in 1851, and is now universally accepted. In 1827 he purchased a fruit farm at Rockport, a little west of Cleveland, and here built a handsome residence. In 1812 he resigned his position at Cincinnati, and in 1843 became one of the founders of the Cleveland Medical College, in which he occupied the chair of theory and practice for twenty years. During the civil war, when sixty-nine years of age, he offered his services to the governor of his state, and for several months acted as examining surgeon for recruits at Columbus and Cleveland. The compensation received was patriotically given to the bounty fund and the Sol-

Jared P. Kirtland

diers' Aid Society of Northern Ohio. He was the first and only president of the Cleveland Academy of Sciences, formed in 1845, and held office until 1865, when, in compliment to his part in founding it and to his services, its name was changed to that of Kirtland Society of Natural History. To it he donated his collections, including one of birds, mounted by himself, the finest in the state. He was at one time president of the State Medical Society; was an officer of several organizations of agriculturists and fruit growers, and a member of many learned societies. The degree of LL.D. was conferred upon him by Williams College in 1861. Dr. Kirtland's contributions to periodical literature were numerous, and many of them appeared in the "American Journal of Science" and the "Journal of the Boston Society of Natural History." The value of his work in promoting agriculture, especially pomology and horticulture, and in extending an interest in natural history in Ohio, is inestimable. He imparted to every one who heard him lecture or converse his own enthusiasm in the pursuit of knowledge, and attached to himself by personal magnetism and a captivating cheerfulness of disposition the young as well as the old. Dr. Kirtland was twice married; first, at Wallingford, Conn., in 1815, to Caroline Atwater. She died in 1833, leaving a daughter. His second marriage, in 1835, was to Hannah F. Toncey, who died in 1837. He died in Cleveland, O., Dec. 10, 1877.

LLOYD, Edward, colonist, was born on the Wye river, in Wales, in the early part of the seventeenth century. The Wye and the Severn rivers of Maryland are said to have been named by him in honor of his native land.

He first settled in the Puritan colony in Virginia, and removed with that colony, in 1649, to Maryland, settling at Providence, where the city of Annapolis now stands. He was engaged as land surveyor. In 1650 Gov. Stone appointed Edward Lloyd "to be Commander of Anne Arundel County until the lord proprietary shall signify to the contrary." In 1654 Gov. Stone, instigated by Lord Baltimore, proceeded, with a company of about two hundred armed men, to force the Puritans of Anne Arundel to submit to the proprietary; but the Puritans, resolving that "they would rather die like men than live like slaves," repelled the invaders and took Gov. Stone prisoner. They were not again molested in their rights, Lord Baltimore signing an agreement by which they were protected in their religion. Later, with many others, Edward Lloyd settled in Talbot county, where he patented a large landed estate, which remained in possession of the family for many generations. Lloyd returned to London in 1668, where he became a merchant, and died in 1695. He left a son, Philemon, whose descendants have been distinguished in state affairs in every generation.

STEINER, Lewis Henry, physician and librarian, was born at Frederick City, Md., May 4, 1827, son of Christian and Rebecca (Weltzheimer) Steiner. His earliest American ancestor, of German descent, settled in Frederick county in 1733, and his great-grandfather, John Steiner, commanded a company of militia and was a member of the county committee of observation in 1775. He was educated at the Frederick Academy and at Marshall College, Pennsylvania, where he was graduated in 1846. Taking up the study of medicine at the University of Pennsylvania, he was graduated M. D. in 1849, and immediately entered upon the practice of his profession at Frederick. Removing to Baltimore in 1852, he began lecturing on chemistry and toxicol-

ogy in the private medical institute of Dr. John R. W. Dunbar. He was also professor of chemistry and natural history in Columbian College, Washington, D. C.; professor of chemistry and pharmacy in the National Medical College, and professor of chemistry in the Maryland College of Pharmacy, Baltimore. He was also lecturer on chemistry and physics in the College of St. James. At the outbreak of the civil war he was appointed chief inspector of the U. S. sanitary commission for the army of the Potomac. In this service he labored indefatigably and without compensation until near the close of the war. Having been made president of the school board of Frederick county in 1865, he reorganized the public schools of the county, holding his place at the head of the board until 1868. In 1871 he was elected by the Republicans to the state senate, and was re-elected in 1875 and 1879. In November, 1884, he was chosen the first librarian of the Enoch Pratt Free Library at Baltimore. Dr. Steiner's contributions to literature and science were constant from 1851, including a large number of pamphlets, addresses and translations contributed to the periodicals. He was also assistant editor of the "American Medical Monthly" from 1858 to 1861. In 1852 he became a member of the American Medical Association, and in 1853 a fellow of the Medical and Chirurgical Faculty of Maryland and of the American Association for the Advancement of Science. He was correspondent of the Philadelphia Academy of Natural Sciences, and Maryland Academy of Sciences, and in 1876 he was a member of the international medical congress in Philadelphia. He was one of the founders of the American Public Health Association and the American Academy of Medicine. In 1866 Dr. Steiner was married to Sarah Spencer, daughter of Judge Ralph D. Smith, of Guilford, Conn., and had six children. His son, Bernard C., succeeded him as librarian of the Enoch Pratt Library of Baltimore. He died suddenly on Feb. 18, 1892.

BIDDLE, Horace Porter, lawyer, poet and scientist, was born at Lancaster, Hocking co., O., March 24, 1811, son of Benjamin and Abigail (Converse) Biddle. His first American ancestor was John Biddle, who settled in Hartford, Conn., in 1639. The family name has been variously spelled as Biddell, Beadle, Bedell and Bidwell. He was the youngest of nine children, and lived on his father's farm until he was twenty-five years old, when he began the study of law under H. H. Hunter, of Lancaster. He was admitted to the bar in 1839; located at Logansport in 1839, and six years later was elected judge of the 8th circuit court. In October, 1857, he was elected to the supreme bench; but the court held that there was no vacancy. In 1874 he was re-elected judge of the supreme court by a majority of 33,000, and held that office for twelve years. He never spent a day in a college, and his scholarly attainments were secured wholly by self-education. In January, 1881, a few weeks before he arrived at the age of seventy, Mr. Biddle retired from active life, and during the first year of his retirement published almost all of his literary works. He is author of "The Musical Scale" (1867), a work which caused wide comment in musical circles; it is purely scientific, every disputed question being demonstrated. The author shows the harmonic series; what harmonies can co-exist and what cannot; their relation to the fundamental note on which they rest; that the true scale does not comply with the harmonic series except in the first, second, the major, third, fifth and seventh tone; that all besides these are discords to every tone in the scale. He shows the mode by which two tones produce a third resultant tone, which is not a harmonic; gives the analysis of harmony and the scale of the bell. He

also shows the exact imperfections of the tempered scale compared with the true scale. In these views he points out wherein he differs from Helmholtz, Tyndall and previous writers; also with certain articles in "The Dictionary of Music," published in London, edited by Sir George Grove. His poetical productions are: "A Few Poems"; "Glances at the World"; "American Boyhood"; "Last Poems," and "Amatories by an Amateur." He published in pamphlet form: "A Discourse on Art"; "The Definition of Poetry"; "The Analysis of Rhyme"; "An Essay on Russian Literature," and "Prof. Tyndall's Work on Sound"; also "Elements of Knowledge" and "Prose Miscellany." His poetical works were highly complimented by Irving, Longfellow, Charles Mackay and other notable men. He died at Logansport, Ind., May 13, 1900.

SERVISS, Garrett Putnam, author and lecturer, was born at Sharon Springs, N. Y., March 24, 1851, son of Garrett P. and Katherine (Shelp) Serviss. His ancestors were prerevolutionary settlers in the Mohawk valley, one of his paternal ancestors having been killed in the Schenectady massacre of 1690; another ancestor, Capt. Garrett Putnam, was in the war of the revolution. He received his education in Johnstown Academy, and was graduated at Cornell University in 1872. Although receiving the degree of LL. B. from Columbia University, he never practiced law. In 1882-92 he filled the position of night editor on the New York "Sun," and was called the "Sun's Astronomer," on account of many popular articles he wrote while in this position, which had a general circulation. In 1892 Mr. Serviss entered the lecture field, and for two or three years he delivered in New York and other cities the "Urania lectures," which course was an enterprise backed by Andrew Carnegie for popularizing science. Since then he has been giving continuously lectures on astronomy, travel and history. He has contributed many articles to magazines, and is the author of "Astronomy with an Opera-glass" (1888), which has passed through many editions, and "Pleasures of the Telescope" (1901). He also wrote a semi-scientific romance, "Edison's Conquest of Mars," published simultaneously in many leading American newspapers in 1898. Mr. Serviss knows how to treat a scientific subject in a popular and fascinating way, and his lectures and books have done much toward interesting the layman in astronomy. He is president of the department of astronomy in the Brooklyn Institute, and is a member of Cornell University Club of New York city. He was married, June 19, 1875, to Eleonore, daughter of King D. Betts, of Ithaca.

TAYLER, John, acting governor of New York, was born in New York city, July 4, 1742. He received his education at a classical school, and at the age of seventeen both his parents died. In 1760 he removed to Lake George and established a provision business, supplying troops with stores. Subsequently he resided in Oswego, where he acquired a knowledge of the Indian dialect, and was a leading member of the councils held between the whites and Indians. Without a commission he commanded the first regiment of New York troops in 1775, the field officers of which had all returned unfit for duty, and in 1776, after his return from Canada, he was elected a member of the provincial congress. He was declared by such men as Jay, Morris, Livingston, Benson and others to be a man of an "acute, discriminating mind, capable of taking a prospective view of every subject in debate, and to trace it through its most intricate and remote consequences." He was a member of the council of safety in 1777, and as such showed great diplomatic ability. The following anecdote is related of him in this connection: He had discovered that the wife of Sir John Johnson was in reg-

ular correspondence with her husband in Canada, by which means the most important intelligence was conveyed to the enemy. The council accordingly, upon Tayler's motion, adopted a resolution to remove the fair correspondent from the country, and his assuming to see the task carried into execution excited Johnson's resentment to such an extent that the latter sent Tayler a message, assuring him that whenever he caught him he would immediately deliver him up to the fury of the savages. Tayler's reply to this barbarous threat was that "If Mr. Tayler should be so fortunate as to have Sir John Johnson in his power he would most assuredly treat him as a gentleman." In 1813 he was elected lieutenant-governor, continuing in office nine years, and when Gov. Tompkins resigned in 1817, he discharged the duties of governor. He was an intimate friend of Alexander Hamilton, and it was at his table that Hamilton made the comments on Burr's life and character which Burr made the pretext of his challenge. He was married, in 1771, to Margaret Van Valkenburgh, of Albany, by whom he had no issue; but upon the death of her favorite sister, in 1773, he adopted her infant daughter. Mr. Tayler died in Albany, N. Y., April 19, 1829.

ZEILIN, Jacob, naval officer, was born in Philadelphia, Pa., July 16, 1806. He was commissioned second lieutenant Oct. 1, 1831, and during that year was stationed successively at Washington, Philadelphia and Gosport, Va. In March, 1832, he was placed on board the sloop Erie; was promoted to be first lieutenant Sept. 12, 1836, and after doing shore duty until 1842 he joined the frigate Columbus of the Brazil squadron, cruising in her until 1845. In that year he was stationed at Washington and Philadelphia until he was ordered on board the frigate Congress, in September, participating in operations along the Pacific coast throughout the Mexican war. He fought in the defense of Monterey, July 15, 1846, in the capture of Los Angeles, Aug. 13, 1846, and the action on the La Mesa, Jan. 13, 1847. He was commissioned captain Sept. 14, 1847, and for gallantry in action at the crossing of San Gabriel river, Jan. 9, 1847, was brevetted major. In the same year he was appointed military commandant of San Diego, and Sept. 20th participated in the bombardment of Guaymas. He took part in the fight at St. Joseph's, Sept. 30th, and in the occupation of Mazatlan in October, where he continued skirmishing with the Mexicans until June of the following year, when peace was ratified. He was stationed at Gosport, Va., from 1849 to 1852, when he was recalled to Washington and ordered to the frigate Mississippi of the East India Squadron, accompanying Com. Matthew C. Perry's cruise to Japan. He was transferred to the frigate Susquehanna in May, 1853, being placed in command of a battalion of marines at the landing effected on July 14th, and again transferred to the sloop Saratoga in March, 1854. On returning he was stationed at Gosport (1854-57) and at Washington during 1857, there commanding the first company of marines sent out to quell the riot in Baltimore on June 1st. He next performed duty on the frigate Wabash of the Mediterranean squadron (1858-59), and on his return he spent some time in the Norfolk navy yard before becoming commanding officer at Philadelphia (1860). The following year he was ordered to Washington to

command a company of marines in the battalion which co-operated with the army at the battle of Bull Run. He was slightly wounded in the action, and five days later was commissioned major (July 26). In November he was made commanding officer at New York, where he remained until he was given command of a marine battalion at Port Royal, S. C., in August of the following year, participating in the operations of the south Atlantic blockading squadron under Adm. Dahlgren. Returning to the North he took command of the marine barracks at Portsmouth, N. H., in March, 1864, and on June 30 was commissioned colonel-commandant of the United States marine corps, assuming command at Washington in July. He received the commission of brigadier-general commandant March 2, 1867, and was retired Nov. 1, 1876, on account of long and faithful service. He died in Washington, D. C., Nov. 18, 1880.

SHERWIN, Thomas, educator, was born at Westmoreland, (Cheshire co., N. H.) March 26, 1799, only son of David Sherwin, who had served in the war of the revolution, and Hannah (Pritchard) Sherwin. His parents were natives of Exford, Mass. In September, 1813, he was apprenticed to a firm of cloth-dressers at Groton, Mass., where, while working at his trade, he devoted his evenings and all the intervals which his duties permitted to study. After

six years of this employment he took charge of a district school at Harvard, Mass., and, after brief terms of preparation at the Academy at Groton and the New Ipswich (N. H.) Academy, he entered Harvard College. He was graduated with high honors in 1825. He was principal of the academy at Lexington, Mass., in 1825-26, and during the next year was a tutor in mathematics at Harvard College. He then entered upon the profession of civil engineering; was engaged upon the dry-docks and other works at the Charlestown and Portsmouth navy yards, and had begun the survey for the Boston and Providence railroad,

as assistant engineer, when ill-health compelled him to relinquish that occupation. In 1828 Mr. Sherwin opened a private school for boys in Boston, and in the following year was elected sub-master of the English High School, which had been established by vote of the citizens of Boston in 1821, to furnish young men not intending to enter college a business education. For more than forty years Mr. Sherwin was connected with the English High School. During thirty years he was its head master, and under his administration the school attained and held the leading position among the public institutions of learning of its class in this country. Within that time 3,937 boys came under his direction and influence, and most of them under his personal instruction. The teacher's work he regarded as "second to none in importance; inferior to none in its bearing upon the destinies of the world"; admitting of "no compromise with evil, no sacrifice of duty," and the best part of his work was the impress of his own character which he made upon the character of his pupils. Mr. Sherwin was one of the originators, in 1830, of the American Institute of Instruction, and in 1853-54 was its president; at various times he delivered able addresses upon the subject of education, and for thirty years he was one of its most efficient members. He took a leading part in the organization of the Massachusetts State Teach-

ers' Association, of which he was the earliest vice-president and third president, and in 1847 helped to establish the "Massachusetts Teacher," an educational journal. In 1836 he was elected a member of the American Academy of Arts and Sciences; in 1868 a member of the New England Historic-Genealogical Society. From the first organization of the Massachusetts Institute of Technology he was a director, and until his death labored earnestly for its advancement. He was distinguished as a mathematician and published two works on algebra which for many years held their place in the schools as the standard text-books on that subject. Mr. Sherwin was married, June 10, 1836, to Mary King, daughter of Daniel L. and Mary (King) Gibbens, of Boston. Their children were Henry, Thomas and Edward Sherwin, who are still living. Two of their sons were in the navy during the civil war; the third was an officer of the 22d Massachusetts, was in more than twenty battles, and rose to be lieutenant-colonel and was afterward brevetted brigadier-general. Mr. Sherwin died at Dedham, Mass., July 23, 1869.

GOESSMANN, Charles Anthony, chemist, was born in Naumburg, Hesse-Cassel, Germany, June 13, 1827, son of Heinrich and Helena (Boediger) Goessmann. He was educated in the gymnasium at Fritzlar and at the University of Göttingen, where he was graduated with the degree of Ph. D. in 1852. In 1852-57 he served as assistant in the university laboratory of Göttingen under F. Wöller. In 1855 he was appointed a privat-docent in the philosophical faculty of the university. Taking a leave of absence to study the industries of France, England and America, he came here in 1857, and became chemist and manager of a sugar refinery in Philadelphia, Pa. In 1862 he went to Onondaga, N. Y., and for seven years was chemist to a salt company there. In 1866 he was made professor of chemistry in the Rensselaer Polytechnic Institute at Troy, N. Y., and since 1869 has held the same position in the Massachusetts Agricultural State College. He was a director of the Massachusetts agricultural experiment station at Amherst in 1882-95. He has also been chemist to the state board of health since 1886. He is a member of the Physico-Medical Society of the University of Erlangen, Germany; honorary member of the New York State Agricultural Society; fellow of the American Association for the Advancement of Science, and member of the American Chemical Society, of which he was president in 1886; and he is the author of many valuable papers on American salt resources, sugar, commercial fertilizers, and other chemical subjects relating to agriculture. In 1888 Amherst College conferred upon him the honorary degree of LL. D. In 1862 he was married to Mary A. C., daughter of Edward Kinney, of Syracuse, N. Y., and he has two sons and three daughters.

COLEMAN, William, journalist, was born in Boston, Mass., Feb. 14, 1766. After receiving a classical education he studied law, was admitted to the bar, and began practicing his profession in Greenfield, Mass. He occasionally contributed to the Greenfield "Gazette," and he came into local prominence during Shays' rebellion, having been one of the leaders against the insurgents. He was also a representative in the state legislature for two years. Removing to New York city about 1794, he became a law partner of Aaron Burr, and was for a short period reporter of the New York supreme court, but lost that position on the defeat of the Federalists in 1800. Shortly after his removal Alexander Hamilton established, with the help of some friends, the "Evening Post," and installed Coleman, his personal friend, as its editor. The first issue was that of Nov. 16, 1801. In his first editorial

Thomas Sherwin

Coleman said his intention was to keep the paper clear of "personal virulence, low sarcasm and verbal contentions with printers and editors," and with the desire of "inculcating just principles in religion and politics as well as in morals." He always remained a staunch supporter of the Federal party, and the "Post" had not been long in existence before he was involved in many political and personal disputes, and soon became one of the most pungent, caustic, and bitterly partisan writers of the day. On one occasion, in 1804, a dispute with James Cheetham, editor of the "American Citizen," resulted in a challenge from the latter and the subsequent arrest of the principals, who were bound over to keep the peace. Because this duel did not take place, Capt. Thompson accused Coleman of a lack of personal courage. Thompson was called out by Coleman, and was mortally wounded. In 1805 he entered into partnership with Michael Burnham, who became the publisher of the "Post." It was while the "Post" was under the editorial supervision of Coleman that the celebrated satirical odes of Drake and Halleck appeared, in 1819, and their publication added greatly to the reputation of the journal. He remained its editor until his death, which occurred suddenly in New York city, July 13, 1829.

HALE, Salma, historian, was born at Alstead, Cheshire co., N. H., March 7, 1787, son of David and Hannah (Emerson) Hale. His father, Capt. David Hale, joined the revolutionary forces after the battle of Lexington, and served with them throughout the war. Salma Hale acquired a rudimentary education, and at the age of thirteen was apprenticed to a printer at Walpole, N. H. He was studious, early evinced a desire to write, and at an age when boys are usually occupied with the study of grammar he prepared and published a "New Grammar of the English Language" (1804, revised in 1831). In 1805 he became editor of the "Political Observer," an influential Republican paper published at Walpole, N. H. After serving as clerk of the court of common pleas in Cheshire county, he removed to Keene, N. H., in 1813, where he was clerk of the supreme judicial court and of its successor, the supreme court of judicature (1817-34). In 1834 he was admitted to the bar of New Hampshire. He was elected a representative to congress on the Republican ticket in 1816, and was prominent as an opposer of the Missouri compromise. He was a member of the New Hampshire house of representatives in 1828, and again in 1844, and of the state senate in 1824. In 1845 he became secretary to the commission chosen to determine the northeastern boundary line of the United States. He participated in the inauguration and establishment of the first agricultural society in New Hampshire, and was actively interested in the temperance, abolition and Unitarian movements, and in all measures tending to advance the educational interests of the state. He was a trustee of Dartmouth College in 1816, and of the University of Vermont in 1823, both of which conferred upon him honorary degrees. He was a member of the New Hampshire Historical Society, and wrote a "History of the United States" (1821), for which he was awarded a gold medal and \$400 by the American Academy of Belles Lettres. Many editions were subsequently published. The following are his other publications: "Annals of the Town of Keene, N. H., from its First Settlement in 1731 to 1790" (1826; 2d ed., 1851); "The Administration of John Q. Adams, and the Opposition by Abner Sidney" (1826); "Conspiracy of the Spaniards Against Venice, translated from Abbé Real, and of John Lewis Fieschi Against Genoa, translated from Cardinal de Retz" (1828). An address delivered before the New Hampshire Historical Society in 1828 was published in 1832, and one on "The Con-

nection of Chemistry and Agriculture," delivered at Keene, N. H., in 1848, was published in 1870. Mr. Hale died at Somerville, Mass., Nov. 19, 1866.

BROWN, James Salisbury, manufacturer and inventor, was born in Pawtucket, R. I., Dec. 23, 1802, son of Sylvanus Brown. His father, son of Philip Brown, was descended from one of four brothers who emigrated from Wales and settled in Cumberland, R. I. He was a millwright and also an inventor; was master of arms on a flagship in the war of the revolution. In 1792 he invented and used the first slide-lathes for turning rolls, by which they were made straight and of uniform size; he designed the first machinery for S. Slater, and also built machines for turning rolls, which were of great advantage to the business. James S. Brown attended school until his fifteenth year, when he was employed by David Wilkinson, a manufacturer of cotton machinery at Pawtucket. In 1819 he worked in the shop of Pitcher & Gay, Pawtucket, and when Mr. Gay withdrew from the business, in 1821, Mr. Brown took his place in the firm, the style of which was changed to Pitcher & Brown. In 1842 he bought Mr. Pitcher's interest, and continued the business alone until 1850. In 1816 he put up a furnace and foundry for making his own castings, and in 1819 erected a large building, which has since received other additions. Nearly all the machines used in the establishment were built by Mr. Brown, many of them with improvements of his own invention. In 1820 he invented the slide rest used in turning-lathes, by which the height of the tool can be adjusted while the lathe is in motion. His machine for cutting bevel-gears was invented in 1830; he patented, in 1838, a machine for boring the passage for roving through the arm of the long flyer roving machine, and his lathe for longitudinally turning bodies of irregular forms was patented in 1842. He also devised an improvement in planing machines, so that sixteen rolls, instead of four, may be used. He applied the turning-lathe to the cutting of large screws, six to eight inches long, for clothing, and in 1874 he patented a new machine for spindle-grinding. Besides inventions and improvements designed for use in his own business, he made improvements in various machines used in other manufactures in which he was engaged. He simplified and perfected Sharpe & Roberts' self acting mule, which was introduced into this country in 1839 by Bradford Durtce, of Fall River. In January, 1857, he took out a patent for his improvement in the American speeder, which he made superior to the English fly-frame introduced about that time, and the demand on him for these machines was very great. He was employed, in 1862, by some capitalists of Baltimore to build the M. Bennett's machine for cutting files, and after introducing some modifications, built nine, and put them into successful operation. He also invented a machine for grinding file-blanks and a furnace for hardening files. During the civil war his improved turning-lathe, originally designed for the turning of rolls for cotton machinery, was employed in turning gun barrels; this, for a time, to a large extent superseded all other work in his shops. In 1864 Mr. Brown associated his son, James Brown, and his son-in-law, Charles A. Warland, with him, and the firm became James S. Brown & Sons. After the war he manufactured the so called Parke, Curtis & Madley mule, an English machine, which met with much favor among manufacturers. In this

mule he made important and valuable improvements, for which he secured patents. In the latter part of his life he was much interested in the manufacture of malleable iron, for which he constructed a foundry near his machine shop, at great expense. Mr. Brown was married, Feb. 23, 1829, to Sarah Phillips Gridley, of Boston, by whom he had three daughters and one son. The latter is still living in Pawtucket. He died in Pawtucket, R. I., Dec. 29, 1879.

THOMAS, Lorenzo, soldier, was born at New Castle, Del., Oct. 26, 1804. He was of Welsh ancestry and came of a fighting family, his father, Evan Thomas, having served as a militiaman during the war of 1812, and his uncle having been a revolutionary officer and a favorite of Gen. Washington. Though originally designed for mercantile life, he obtained an appointment to the U. S. Military Academy, West Point, and upon his graduation there, in 1823, was attached to the 4th infantry, serving in Florida until 1831. He was promoted to the rank of captain Sept. 23, 1836, and after serving through the Florida war (1836-37) became a major and was detailed for staff duty. On July 7, 1838, he was appointed assistant adjutant-general at Washington, serving in this capacity until the outbreak of the Mexican war, during which he was chief of staff of Gen. William O. Butler, of the army of Mexico

(1846-48). At the battle of Monterey he displayed unusual gallantry, for which he was brevetted lieutenant-colonel.

When the war closed he was made adjutant-general and stationed at army headquarters, Washington, until 1853, when he became chief of staff to Gen. Winfield Scott. Upon entering active service in the civil war his advancement was more rapid. On May 7, 1861, he was brevetted brigadier-general, and Aug. 31 of the same year was raised to the full rank of brigadier-general, in which capacity he served until 1863, being then intrusted with the enlistment and organization of colored

troops in the South, conducting the work for two years. In recognition of faithful services during the war he was brevetted major-general March 12, 1865. On Feb. 21, 1868, he was appointed by Pres. Johnson secretary of war *ad interim*, to replace Edwin M. Stanton, whom the president desired to remove; but, the effort being unsuccessful, Gen. Thomas did not enter upon the active duties of the office. One year later, Feb. 22, he was retired from the army, having passed the age limit. He died in Washington, D. C., March 2, 1875.

PASTORIUS, Francis Daniel, colonist, was born at Sommerhausen, Franconia, Germany, Sept. 26, 1651. He was educated in the classical and modern languages, and all the science of his age, and entered upon the practice of law at Frankfurt. Having much sympathy with the Pietists, he concerted with some of them a plan for emigrating to Pennsylvania, and as their agent purchased 23,000 acres, but they abandoned the intention of colonizing the land themselves. Pastorius had formed the acquaintance of William Penn in England, but he was not then a Quaker nor even a Pietist. He was also engaged by some merchants of Crefeld, who had secured 18,000 acres, to conduct a colony of German and Dutch Mennonites and Quakers to Pennsylvania. He arrived on August 20, 1683. The Crefelders, the first German emigrants to America, arrived on the Concord, Oct. 6th, and on Oct. 24th began to lay out Germantown. Two years later he was married and had two sons. He

was until his death a man of influence among the colonists, was the first bailiff, and devised the town seal, which consisted of a clover leaf, on one of whose lobes was a bunch of grapes, on another a flax-covered spindle, and on the third a weaver's spool, with the motto, "Vinum, Linum, et Textrinum." In 1687 he was elected a member of the assembly. In 1688 he was one of the signers of a protest to the Friends' yearly meeting at Burlington against buying and selling slaves, or holding men in slavery, which was declared to be "an act irreconcilable with the precepts of the Christian religion." This protest began the struggle against that institution in this country, and is the subject of John G. Whittier's poem, "The Pennsylvania Pilgrim." For many years he taught in Germantown and Philadelphia, and many of the deeds and letters required by the German settlers were written by him. He published a pamphlet, consisting in part of letters to his father, and containing a description of the commonwealth and its government, and advice to emigrants, entitled "Umständige Geographische Beschreibung der Allerletzten Erfundenen Provinz Pennsylvania" (Frankfort-on-Main, 1700). Several volumes were left by him in manuscript, containing philosophical reflections, poems, and notes on theological, medical and legal subjects. His prologue to the Germantown book of records, "Hail to Posterity," is given in the "Pennsylvania Pilgrim," translated by Whittier. He died at Germantown, Pa., Sept. 27, 1719.

WOOLSEY, Sarah Chaucey (Susan Coolidge), author, was born in Cleveland, O., Jan. 29, 1845, daughter of John Mumford and Jane (Andrews) Woolsey, and niece of Dr. Theodore Woolsey, ex-president of Yale College. Her father was a son of William W. Woolsey, a merchant of New York city, and a descendant of George Woolsey, who came to America about 1620. She is also a descendant of the famous Jonathan Edwards, and through him of the Winthrop, one of his ancestors being Lucy, sister of the first Gov. Winthrop. She received a careful education, but her literary work did not begin until 1871. She contributed many excellent poems and prose sketches to the newspapers and magazines, which were widely quoted. Her poems have been published in "Verses" (1880); "A Few More Verses" (1889). "Rhymes and Ballads" (1892); and two selections are preserved in "Stedman's American Anthology" (1900). Miss Woolsey will be better remembered as a favorite writer of books for children, the most popular of which compose her famous "Katy Did" series, begun in 1872. Her other publications are: "The New Year's Bargain" (1871); "Mischievous Thanksgiving, and Other Stories" (1874); "Nine Little Goslings" (1875); "For Summer Afternoons" (1876); "Eyebright" (1879); "A Guernsey Lily" (1881); "Crosspatch" (1881); "A Round Dozen" (1883); "A Little Country Girl" (1885); "Ballads of Romance and History, With Others" (1887); "Clover" (1888); "The Barbary Bush, and Other Stories" (1893); "Old Convent School of Paris" (1895). She translated "My Household of Pets," by Theophile Gautier (1882), and "One Day in a Baby's Life," by M. Arnaud (1886), and edited and abridged the "Autobiography and Correspondence of Mrs. Delaney" (1879) and the "Diary and Letters of Frances Burney" (1880). In 1874 Miss Woolsey removed to Newport, R. I., where she still resides, writing constantly for the press, both in prose and verse. Her personality is marked by sincerity and simplicity, and a tender womanliness prevails in all of her writings.

LEWIS, Zachariah, journalist, was born in Wilton, Conn., Jan. 1, 1773, son of Isaac Lewis, a Congregational clergyman. He studied at Yale College, and after graduation there, in 1794, acted as

tutor until 1799. He then took up the study of theology at Philadelphia, under Rev. Ashbel Green, and was licensed to preach; but he did not continue in the ministry, on account of poor health. In 1803 he purchased from Noah Webster the "Commercial Advertiser," of New York, which the latter had been conducting in the name of his nephew, Ebenezer Belden. Lewis continued to be the chief editor until April, 1820, when he sold the paper to Col. William L. Stone and Francis Hall, the former assuming the editorship and the latter becoming the publisher. During this period Lewis was acting as corresponding secretary of the New York Religious Tract Society, which afterwards became the American Tract Society. In 1820 he began the publication of the "American Missionary Register," and at the same time took charge of the domestic correspondence of the United Foreign Missionary Society. He retired from active business life in 1825. He published "Remarks on a Subterranean Wall in North Carolina" (1800) and "Annual Reports of the New York Religious Tract Society from 1815 till 1820." His twin brother, Isaac Lewis, was an eminent clergyman of the Presbyterian church, and was the author of a number of essays and sermons. Zachariah Lewis died in Brooklyn, N. Y., Nov. 14, 1840.

HALE, John, clergyman, was born at Charlestown, Mass., June 3, 1636, son of Deacon Robert and Jane (or Joanna) Hale. After graduating at Harvard in 1657, he studied divinity, and began to preach about 1664, at Bass-riverside, Salem, now Beverly, Mass. In 1657 he was ordained as the first pastor of the new Church of Christ at Bass river, where he remained until his death. In 1690 he was appointed one of the chaplains to accompany Phipps' expedition against Canada. He served from June to November, acting also as interpreter, his son, Robert, conducting parochial affairs during his absence, and for these services 300 acres of land were granted by the legislature to his grandson, Robert, in 1734. Mr. Hale was prominent in the early prosecutions for witchcraft, being the minister who, when Mrs. Morse was brought before the magistrates, opened the meeting with prayer. He himself acknowledges that he was present at several examinations and trials, and knew sundry of those who suffered; four of his parishioners were among those condemned, but a manuscript note of Bentley, in a copy of "Hale's Modest Inquiry," informs us that he "was the first to suspect the proceedings against witchcraft." In October, 1692, his wife was accused, and the storm he had helped to raise threatened to engulf his own home. Up to that time it had been believed that those who were accused of witchcraft were certainly in league with the devil; but Mr. Hale now gave a new turn to the prosecutions by declaring that "the devil might and did make use of the true Christian, in afflicting others, who would accuse the instrument he made use of, against their will, of his own diabolical acts." The change of sentiment thus produced caused Mr. Hale to write his "Modest Inquiry into the Nature of Witchcraft" (1697), in which he excuses the prosecution and deprecates the "errors and mistakes that have been made in the year 1692," and the part that he had himself taken in them. Aside from the witchcraft mania, he appears to have been exceptionally liberal for his day. He was three times married; first, to Rebecca Byley, in 1664; second, to Sarah Noyes in 1684, and third, to Elizabeth Sonnerby, widow of Henry Clark, in 1698. His grandson, Robert, son of Robert Hale, was born at Beverly, Mass., Feb. 12, 1703. He was graduated at Harvard in 1721, studied medicine, and practiced as a physician at Beverly, Mass. He participated in the capture of Louisburg, under Sir William Pepperell, in 1745; in 1747 he was a commissioner to New York to adopt measures for

the general defense, and, in 1755, acted on a commission to concert measures against the French, in New Hampshire. He was for a long period a member of the state legislature, and was sheriff of Essex county in 1761. He died at Beverly, March 20, 1767. John Hale died at Beverly, Mass., May 15, 1700.

DELANO, Amasa, sailor, was born at Duxbury, Mass., Feb. 21, 1763, son of Samuel Delano, who served in the old French wars and as a patriot in 1776. Amasa enlisted in the army in 1777, but his father refused to permit him to serve on account of his tenderage. He was for a short time in the merchant service, 1781-83, and later worked under his father at ship-building, 1783-86; he made his first voyage as commander in a vessel belonging to an uncle, in 1786, and subsequently cruised to all parts of the world. For a supposed infraction of the revenue laws, the authorities of St. Bartholomew, W. I., attempted to seize his ship, the *Perseverance*; but he sailed out of port under fire of their batteries. He published a work, entitled "A Narrative of Voyages and Travels" (1817). He died in Boston, Mass., April 21, 1823.

COCK, Thomas, physician, was born at Glen Cove, L. I., in 1782. After studying medicine in the office of Dr. Valentine Seaman, and in company with Dr. Valentine Mott, he became the partner of the former and settled in New York city. In 1812 he was elected to the chair of anatomy and physiology in Queen's (now Rutgers) College, N. J., serving for four years. From 1819 to 1834 he was visiting physician to the New York Hospital, and from the latter year still served as consulting physician. He first became connected with the College of Physicians and Surgeons in 1820, was a fellow for seven years, when he was elected vice-president; served in this capacity until 1855, and as president from 1855 to 1858. In 1822 he fought the yellow fever epidemic with great energy, and during the cholera of 1832 was again brought into prominence by his energetic action, in recognition of which the city presented him a service of silver. He was president of the New York Academy of Medicine in 1852; was long an active member of the American Bible Society, and at his death its vice-president. He abandoned his practice on account of infirmity, and a few years later, June 14, 1869, he died in New York city.

BOATWRIGHT, Frederick William, educator, was born at White Sulphur Springs, W. Va., Jan. 28, 1868, son of Reuben B. and Maria E. (Woodruff) Boatwright. He was educated at Richmond College, graduating in 1888 with the degree of A. M. During the last year at this college he was tutor of Greek, and after graduation became assistant professor in the same study, at the same time acting as director of the gymnasium. Going to Europe in 1889, he took a post-graduate course at the universities of Leipzig and Halle and at the Sorbonne, Paris. On his return, in 1890, he became professor of modern languages in his alma mater, a position he continues to hold. In December, 1895, he was elected president of Richmond College, as the successor of Prof. Puryeur. He is a member of the Modern Language Association of America, and is the author of "Syllabus of German Literature and of French Literature in the Seventeenth Century" (1893). In December, 1890, he was married to Nellie M., daughter of John V. and Virginia (Moore) Thomas. They have one son.

Thomas P. Clark

RYLAND, Robert, clergyman and first president of Richmond College, was born in King and Queen county, Va., March 14, 1805, son of Josiah and Catherine (Peachey) Ryland. He was licensed to preach by the Brington Baptist Church in 1825, and was ordained in 1827. After studying in classical schools, he entered Columbian College (now Columbian University), Washington, D. C., and was graduated in 1826. In the year following he became pastor of a church at Lynchburg, Va., and filled the position for five years. In 1832 he took charge of the Manual Labor School at Richmond, Va., known as the Virginia Baptist Seminary for the education of young ministers, and when that school was chartered in 1840, becoming Richmond College, he was made president of the same. Meanwhile, during 1834-36, he was chaplain of the University of Virginia. During his administration Richmond College prospered in means and members until the outbreak of the civil war. In 1866 he resigned, and was succeeded by Rev. T. G. Jones, D.D., who held the position until 1869, when the office of president was abolished, and the head was called the chairman of the faculty. Dr. Ryland was made pastor of the First African Baptist Church in Richmond, where he served for twenty-five years, during which he baptized 3,800 persons, and developed a model church out of crude material. In 1868 he removed to Shelbyville, and later to Lexington and New Castle, Ky., where he conducted female schools and preached in several country churches. Dr. Ryland was eminent in mind and character, a pioneer educator of his day, and was successful in his teaching and the administration of the institutions over which he presided. He received the degree of D.D. from Shurtleff College in 1845. He was first married, in 1830, to Josephine Norwell, who bore him nine children, and died in 1846. On June 8, 1848, he was married to Bettie P. Thornton, who survived him, with three daughters. His son, William S. Ryland, is a clergyman of note, who was president of Lexington Female College, 1877-80, and president of Bethel College, 1889-98. Dr. Ryland died in Lexington, Ky., April 23, 1899.

PURYEAR, Bennett, educator, was born in Mecklenburg county, Va., July 23, 1826, son of Thomas and Elizabeth Puryear. He was graduated at Randolph-Macon College, then located near Boydton, in 1847. After teaching one year in Alabama and spending one year as a student at the University of Virginia, he was appointed tutor in Richmond College in the summer of 1850, and the next year he was elected to a full professorship and given the chair of natural science. Richmond College was closed during the years of the civil war. It was reopened in 1866 with an entirely new faculty, except Prof. Puryear, who was recalled to the chair of natural science. Two years later the office of president was abolished, and a "chairman of the faculty" substituted in its place. In the new arrangement the work was done in co-ordinate and independent schools by professors of equal rank, one of whom was chosen by his colleagues as chairman. The chairman was the agent of the faculty in the exercise of discipline, and at the same time the representative of the college before the general public. This plan of organization had already been tried with most satisfactory results at the University of Virginia, and it has proved no less satisfactory at

Richmond. Prof. Puryear was chosen as first chairman, and was re-elected for seventeen consecutive years. Then, after an interval of four years, he was again chosen, and held this office continuously until July, 1895. He had the cooperation of an exceptionally able faculty, but it was largely owing to his efficient administration that the college has had a career of uninterrupted and constantly increasing prosperity. From 1873 Prof. Puryear held the chair of chemistry, and at times he also had classes in mathematics, Latin, Greek, and in English, and whatever the subject he has taught it with clearness and force. He has taken much interest in public affairs, and has been a frequent contributor to the newspaper and periodical press. He has published articles on "The Theory of Vegetable Growth: The Relation of Chemistry to Agriculture"; on "The Public School"; "The Public School in Relation to the Negro"; "The Virginia State Debt"; "The Tariff," and on other subjects. In 1878 Georgetown College, Kentucky, and Howard College, Alabama, simultaneously conferred on him the degree of LL.D.

WALES, John, U. S. senator, was born at New Haven, Conn., July 31, 1783, son of Rev. Samuel and Catherine (Miles) Wales. Nathaniel Wales emigrated from England with his two brothers in 1635, settling in Boston, Mass. His son and grandson, both of whom bore the name Nathaniel, were prominent in the circles of the church, the former being a deacon, and the latter, in 1700, a presiding elder at Braintree, Mass., to which town he had removed from Boston. John, the next in line (b. 1700; d. 1765), was the pastor of the First Congregational Church of Raynham, Mass., for thirty-four years. He was married to a great-granddaughter of James Leonard, who emigrated from England in 1652, settling at Raynham, where he established the first iron foundry in America. Their son, Samuel Wales, was born at Raynham, Mass., March 2, 1747; was an accomplished scholar and an able and eloquent preacher, being a graduate of Yale College in 1767, and pastor of the First Church of Milford, Conn. (1770-82), and a professor in the Theological School at New Haven from 1782 until his death, Feb. 18, 1794. His son, John, was graduated at Yale in 1801. With the legal profession in view, he studied in the office of Seth P. Staples, his brother-in-law, and securing admission to the bar, commenced to practice in his native state. A few years later he settled in Baltimore, where he practiced for two years. Forming a partnership with James M. Broom, under the name of Broom & Wales, in 1815 he opened an office in Wilmington, Del., and was enrolled as a member of the Delaware bar on Oct. 30th. This partnership continued until 1819, when the senior member removed to Philadelphia, Pa. Mr. Wales continued to practice in Wilmington, however, and there gained a high reputation in his profession. He was appointed state secretary in 1845, and in 1849 was elected to the U. S. senate, to fill the unexpired term of John M. Clayton. On March 4, 1851, he was succeeded by James A. Bayard, the Democrats having obtained a majority in the legislature. Besides being an able lawyer and conducting a large practice for nearly thirty years, he was active in local enterprises, serving as president of the national banks of Wilmington and Brandywine, and engaging with the very first in the work of establishing Delaware College. He was married at Dover, Del., June 12, 1820, to Anne, daughter of Maj. John Patten. Their children were Leonard E., John P., Catherine B., Matilda C. and Josephine Wales. He died in Wilmington, Del., Dec. 3, 1863.

WALES, Leonard Eugene, jurist, was born in Wilmington, Del., Nov. 26, 1823, son of John and Anne (Patten) Wales. After a preparatory course at

B. Puryear.

the Hopkins Grammar School, New Haven, Conn., he entered Yale University, and was graduated in 1845, thereafter pursuing legal studies under the direction of his father, and securing admission to the bar on May 8, 1848. He then became associated with his father in the profession, gradually assuming the burden of practice as the health of the latter began to fail. In July, 1853, he was elected city solicitor, and was re-elected in the following year. He had been appointed clerk of the U. S. district and circuit courts by Judge Willard Hall, in May, 1849, and continued to act in this capacity until Sep-

tember 13, 1864, when he resigned to accept the associate judgeship of the superior court of Delaware, under a commission from Gov. Philip Cannon. He enlisted in the civil war, and was one of the commissioners of the board of enrollment for Delaware; but resigned upon being appointed associate judge of the superior court of Delaware. During his term in the latter office he transacted considerable business in the orphan's court, of a very important character, and also sat with his associates in the court of errors and appeals, in the court of oyer and terminer, and in the court of general sessions of the peace and jail delivery, sharing the responsibility of the decisions, and fulfilling every ex-

pectation with honor to himself and the state. He was appointed by Pres. Arthur as U. S. district judge, March 24, 1884, and held this office until his death. In July, 1886, the U. S. district judge of the New Jersey district, John T. Nixon, having become disabled, Judge Wales was appointed his successor. Thus he performed for about three years the combined duties of both districts. Though burdened in this way with affairs of greater importance than formerly, so closely did he follow each case, that in this district every appeal to the supreme court from his decisions was dismissed. After the appointment of Judge Nixon's successor Judge Wales was given another extra burden in connection with the newly formed U. S. circuit court of appeals; judges of larger districts never being able to complete their entire tour of duty, he actually sat during some part or the whole of every term of the U. S. circuit court of appeals for his circuit, from its organization until his death. Judge Wales was one of the charter members of the Ferris Reform School; was prominent in the promotion of the West End Reading-room of Wilmington, Del.; was president of the Delaware branch of the Society of the Cincinnati; of the same branch of the Sons of the Revolution, and was also for many years president of the Historical Society of Delaware. He died, unmarried, at Wilmington, Del., Feb. 8, 1897.

HAWES, William Post, author, was born in New York city, Feb. 4, 1803, son of Peter and Nancy (Post) Hawes, and a descendant of Edward Hawes, who came from England to Dedham about 1635. His grandfather, Joseph Hawes, was a lieutenant in Capt. Asa Fairbanks' company, which, with four other companies, took part in the battles of Lexington, Concord and Bunker hill. His great-grandfather, Daniel Hawes, being nearly seventy years of age, on the breaking out of the French and Indian war, in 1755, enlisted with nine of his sons to defend his country. After graduating at Columbia College in 1821, he entered the office of John Anthon, a lawyer of great eminence, where he passed three years in study, and was admitted to the bar in 1824. He

settled in the practice of his profession in his native city, and achieved a considerable success. Mr. Hawes employed his leisure in literary pursuits, and contributed freely to the periodical press of the day. His writings exhibited large powers of observation and a great love of nature. His language was pure and dignified, and of one sketch, "Hymn Tunes and Graveyards," it has been said that it was "worthy of the genius of Charles Lamb." He contributed various articles to the New York "Mirror," the "American Monthly Magazine," and "The Spirit of the Times and Turf Register," sometimes using the pen-name "J. Cypress, Jr." A collection of his writings, was published after his death, entitled "Sporting Scenes and Sundry Sketches: Being the Miscellaneous Writings of J. Cypress, Jr.," with a memoir (2 vols., 1842). He died in New York city in 1842.

LOWELL, Charles, clergyman, was born in Boston, Mass., Aug. 15, 1782, son of John and Rebecca (Russell) Lowell, his father being a prominent jurist and statesman. The mother was a daughter of James and Katharine (Graves) Russell, of Charlestown, Mass. The first American ancestor was Percival Lowell, who, with his two sons, John and Richard, left England in 1639. The elder son, John, had a son of the same name who was married to Naomi Sylvester and became the father of Ebenezer, born in Boston, 1675. Ebenezer was married to Elizabeth Shaler, and these were the parents of John Lowell, pastor of the third parish of Newbury, which became upon the division of the town the first parish in Newburyport, where he officiated from 1726 to the time of his death, May 15, 1767. He was married to Sarah, daughter of Noah and Sarah (Turell) Champney, and their only son was the father of our subject. Charles Lowell was graduated at Harvard University in the year 1800, and though he engaged in the study of law, soon abandoned it for theology. He went abroad in 1802; studied in Edinburgh, Scotland, for two years, and then traveled on the continent of Europe, returning to the United States in 1805. On Jan. 1st of the following year he became pastor of the West Unitarian Church of Boston, and retained this charge until his death.

However, in 1837, his health being poor, Dr. Cyrus A. Bartol was made his associate in pastoral work and he was enabled to make an extended trip through Europe and the East, covering a period of about three years. Dr. Lowell was remarkable for the sweetness and benevolence of his nature. He was graceful and forceful as an orator, and strenuous in his opposition to slavery. He was greatly loved by his people, and though advancing years and failing health made his presence in the pulpit irregular, he was still retained as their pastor and adviser. He was a fellow of Harvard from 1818 to 1833, and the degree of D.D. was conferred upon him by that university in 1823. He was a member of various literary societies both in America and Europe, contributed many articles to periodical literature, and published a number of separate discourses, besides "Occasional Sermons" (1855); "Sermons, Chiefly Practical" (1855); "Meditations for the Afflicted, Sick and Dying," and "Devotional Exercises for Communicants." Dr. Lowell was married, Oct. 2, 1806, to Harriet, daughter of Robert T. Spence, of Portsmouth, N. H., a U. S. naval officer. Their youngest son was the well-known poet, James Russell Lowell. Dr. Charles Lowell died at Cambridge, Mass., Jan. 20, 1864.

FINCH, Francis Miles, jurist, was born at Ithaca, N. Y., June 9, 1827, son of Miles and Tryphena (Farling) Finch, of New England extraction. He received a good school education, and was graduated at Yale College with honors in 1849. During his university course he was one of the editors of the "Yale Literary Magazine," and he delivered an oration at graduation. His early tendency was entirely towards literature, and at college, where he was exceedingly popular, he was very felicitous in making impromptu speeches and in writing college songs. Among these, still remembered at Yale are: "Gather, Ye Smiles," "Linonia," and "Smoking Song."

Francis Miles Finch

At the centennial celebration of the Linonian Society of Yale, in 1853, he read a poem in which several lyrics were introduced, including one on Nathan Hale, but the one that will be longest remembered is the "Blue and the Gray," written and published in the "Atlantic Monthly" in 1867. After graduation he returned to Ithaca, where he began to study law, and in little over a year was admitted to the bar. Proving himself a laborious student, clear and persuasive in his reasoning powers, wise and reliable as a counsellor and conscientious in the highest degree in fulfilling

his duty to his clients, his practice grew rapidly, and he gained ascendancy and popularity among his professional associates. Early in Gen. Grant's first presidential term he was appointed collector of internal revenue for the 26th district of New York, which office he held for four years and then resigned. He was warmly interested in the organization of Cornell University, was one of its first trustees, and its counsel and friendly adviser through all its early troubles. In May, 1880, he was appointed judge of the court of appeals of the state of New York, to fill a vacancy of six months; the next year he was reappointed to fill a vacancy of one year, and in the autumn of 1881 was elected to a full term of fourteen years, to Dec. 31, 1885. Since 1891 he has served as dean of the Cornell Law School and in 1895 was chosen professor of the History and Evolution of Law. The honorary degree of LL. D. was conferred on him by Hamilton College in 1885 and by Yale in 1892. Mr Finch was married, May 25, 1853, to Elizabeth A., daughter of Robert May Brooke, of Philadelphia, and has one son, Robert Brooke, and two daughters, Mary Sibley and Helen Elizabeth.

JONES, John, vocalist, was born in London, England, in 1796. He first sang in public, in 1816, at the London Adelphi Theatre, in the "Conjuror," and for several years was heard in the British metropolis and some of the provincial cities. He removed to the United States in 1828, settling in New York city, where he appeared in musical plays and concerts at Niblo's Garden, and soon afterward was engaged as operatic tenor at the Park Theatre. In 1831 he was heard for a single season at the Chestnut Street Theatre, in Philadelphia, but later returned to the Park Theatre, New York city, where he effected an enduring engagement, covering many years. In 1835 he made a short visit to Europe, and, after twenty-eight years of successful singing, retired, in 1844, on account of a partial loss of voice. His later days were spent in several New England towns and in New York city as a teacher of singing and the pianoforte. Some years before his death he was awarded a life annuity by a dramatic benevolent association. He was a reliable, painstaking artist, and

though his acting was indifferent and his range limited, the beautiful tenor-robusto quality of his voice, combined with his skill as a musician, made full atonement. In "La Dame Blanche," "Norma" and "Cinderella" he was especially pleasing. Several popular songs were composed by him, the most noted being "The Mellow Horn," which he sometimes sang in costume. He died in New York city, Nov. 2, 1861.

HINMAN, Benjamin, soldier, was born at Woodbury, Conn., in 1720, son of Benjamin and Sarah (Sherman) Hinman; grandson of Benjamin and Elizabeth (Lamb) Hinman; great-grandson of Sergt. Edward Hinman, who came from England about 1645 and was married to Hannah, daughter of Francis Stiles, of Windsor. He held a warrant as a master of a troop of horse in the 13th regiment, and served in Canada against the French in 1651. He received, April 19, 1775, a commission as captain in a regiment raised for the defence of His Majesty's territories against the French by Elizur Goodrich, who was his colonel. This regiment defended Crown Point and vicinity. Capt. Hinman's promotion during this war was rapid, and at its close he ranked as lieutenant-colonel and was promoted to a colonelcy of horse in the 13th regiment. On the outbreak of the revolution he was commissioned as colonel of the 4th regiment of colonial troops by Gov. Trumbull. He was in command of his regiment at Ticonderoga; was present at New York when it was captured by the British, and remained in active service until 1777, when failing health obliged him to return home. He represented Woodbury in the legislature for twenty sessions, and after the incorporation of Southbury he also represented that town. He was also a member of the state convention which ratified the constitution of the United States. His wife was Molly Stiles. He died at Southbury, Conn., March 22, 1810.

HINMAN, Elisha, naval officer, was born at Woodbury, Conn., March 10, 1734, son of Andrew and Mary (Noble) Hinman, grandson of Capt. Titus and Hannah (Coe) Hinman; great-grandson of Sergt. Edward and Hannah (Stiles) Hinman, the first American ancestor. At fourteen years of age he took to a seafaring life, and before he had reached his twentieth year he was the captain of a merchantman trading with Europe and the Indies. With two of his brothers he removed to New London, and there he amassed property which he lost when that town

was taken by the British. He was one of the first captains of the navy appointed by congress, and commanded the Cabot, a Continental brig fitted out in New London in 1776. Later he succeeded Paul Jones as captain of the Alfred, which was captured by the Ariadne and Ceres while on her way home from France March 9, 1778. He was carried as a prisoner to England, but succeeded in escaping to France, whence he returned home, and engaged for a time in privateering. In 1779 he commanded the Hancock, a privateer sloop owned by Thomas Mumford, and had a run

of exceptionally brilliant successes. He was honorably acquitted of all blame for the loss of the *Alfred*, and in 1780 took command of the gunboat *Dean*. In 1780 Capts. Hinman and Havens in their sloops the *Hancock* and the *Beaver* captured the *Lady Erskine*, a brig of ten guns, one of a fleet of twenty-one sailing vessels, which was passing New London, under the convoy of the *Thames*, a frigate of thirty-one guns. He commanded several other vessels, and at the close of the war returned to the merchant service. In 1794 Pres. Adams offered him the command of the Constitution, but he felt compelled to decline by reason of his advanced age. From 1798 to 1802 he was in the revenue service. He died at New London, Aug. 29, 1807.

HINMAN, Royal Ralph, lawyer and author, was born at Southbury, Conn., June 5, 1785, son of Gen. Ephraim and Sylvia (French) Hinman; grandson of Deacon David and Sarah (Hinman) Hinman, and great-grandson of Benjamin and Sarah (Sherman) Hinman. His father, Gen. Ephraim Hinman, was a man of very original character and an officer of great distinction in the revolutionary, and later in the United States army. The subject of this sketch was graduated at Yale College in 1804. He acquired his legal knowledge under the tuition of Hon. D. S. Boardman, Hon. Nash B. Benedict and Judge Reeve, at the Litchfield Law School; was admitted to the bar and settled in the profession at Roxbury, Conn. He was admitted as a counsellor in the supreme court of the state of New York, at Albany, at the February term, 1827. Mr. Hinman represented his town in the state legislature, and in 1835 was elected secretary of state, being re-elected each year, until 1842. In 1835 he was also appointed chairman of the committee to revise the public statutes of the state, and in 1835 filled the same office on a similar committee. In 1844 he received the appointment as collector of customs for the port of New Haven, and later was postmaster at Hartford. He gave much time to historical and antiquarian research, published several admirable genealogical works, and in 1854 removed to New York, where he was wholly occupied with employment of a literary nature. He published: "Official Letters between the Kings and Queens of England and the Early Governors of Connecticut in 1635-79" (1836); "Historical Collections of Connecticut in the American Revolution" (1842); "Catalogue of the First Puritan Settlers of the Colony of Connecticut" (1852-58); "A Family record of the Descendants of Sergeant Edward Hinman" (1856). Several volumes of statutes and of public and private acts, were compiled and published under his direction. He was married to Lydia, daughter of Gen. John Ashley, of Sheffield, Mass. He died in New York city, Oct. 16, 1868.

HINMAN, Joel, jurist, was born at Southbury, Conn., Jan. 27, 1802, son of Col. Joel and Sarah (Curtiss) Hinman and grandson of Col. Benjamin Hinman. He was admitted to the New Haven county bar about 1827, and while practicing his profession at Cheshire, Conn., was elected a judge of the superior court in 1842 and rapidly rose to eminence. His decisions were noted for their clear, practical common sense. He was a judge of the supreme court, 1851-61, and became chief-justice in the latter year. Twenty volumes of the Connecticut reports contain decisions rendered by Judge Hinman. He was married to a Miss Scovill, of Waterbury, Conn. He died at Cheshire, Conn., Feb. 21, 1870.

HEWIT, Nathaniel, clergyman and author, was born at New London, Conn., Aug. 28, 1788, son of Nathaniel and Sarah (Avery) Hewit, of New London, Conn., and a descendant of Thomas Hewit, an English mariner, who settled in New London, Conn., during the latter part of the seventeenth century. He was graduated at Yale College in 1808,

and began the study of law, but, deciding to enter the ministry, he obtained a situation as teacher in the Plainfield, Conn., Academy, and pursued at the same time his theological studies under Rev. Joel Benedict, D.D., of that town. He was licensed to preach by the New London County Association, Sept. 24, 1811, and supplied various congregations in Vermont and elsewhere. Mr. Hewit studied for about six months at Andover Theological Seminary, graduating with the class of 1814, and was ordained to the Presbyterian ministry. He was pastor of the Presbyterian church at Plattsburg, N. Y. (1815-17), and of the First Congregational Church at Fairfield, Conn., succeeding the Rev. Dr. Heman Humphrey (1818-27). In 1827 his labors on behalf of the American Temperance Society, founded in 1826, were so earnest and extensive that he was invited by that body to undertake a three years' mission. His efforts were eminently successful, and won for him the sobriquet, "Luther of the early Temperance Reformation." In 1830 he became pastor of the Second Congregational Church at Bridgeport, Conn., and in 1831 he went to London and Paris, under the auspices of the American Temperance Society. In 1833 Dr. Hewit was actively instrumental in the establishment of the East Windsor, now the Hartford Theological Institute. In 1853 he withdrew from his pastorate on account of a division of the congregation in regard to supplying the pastor with an assistant, and an old-school Presbyterian church was formed, to which he ministered until 1858. Amherst College conferred upon him the degree of D.D. in 1830. He was twice married; first, to Rebecca Woolsey, daughter of Hon. James Hillhouse, of New Haven, Conn.; second, to Susan, daughter of Rev. Andrew Eliot. His son, Nathaniel Augustus, became eminent in the Roman Catholic church. He died at Bridgeport, Conn., Feb. 3, 1867.

HEWIT, Henry Stewart, physician, was born at Fairfield, Conn., Dec. 26, 1825, son of Rev. Nathaniel and Rebecca W. (Hillhouse) Hewit and brother of Father Augustine Francis Hewit. He attended Yale College, but did not graduate. He studied medicine with Drs. Mott and Van Buren, and was graduated at the New York College of Physicians and Surgeons in 1847. He then entered the U. S. army as acting assistant surgeon, and rendered efficient service during the scourge of yellow fever which attacked Vera Cruz—where he was stationed—during the latter part of the Mexican war. Dr. Hewit was commissioned assistant surgeon in 1849, after which he was on duty at Fort Yuma, Cal., and accompanied Capt. Warner as surgeon in the famous exploring expedition in which that officer lost his life. In 1852 he resigned his commission in the army and established himself in practice at San Francisco; but removed to New York in 1855, and attained eminence in his profession. In 1861 he offered his services to the government and was commissioned brigade-surgeon of volunteers and was stationed at Paducah under Gen. C. F. Smith; later he was medical director on Gen. Grant's staff. In 1865 he received the brevet rank of colonel for meritorious conduct throughout the war. Dr. Hewit in 1855 followed his brother's example and entered the Roman Catholic church. He was deeply and actively interested in the benevolent work of the church, and after the close of the war was physician in charge of the House of the Good Shepherd, and also filled the same office at St. Stephen's Orphan Asylum. He was a member of the New York Academy of Medicine and of numerous other medical societies, and was president of the medical board of the Charity Hospital and school trustee of the 21st ward of New York city at the time of his death. He died in New York city, Aug. 19, 1873.

HEWIT, Augustine Francis, R. C. clergyman, was born in Fairfield, Conn., Nov. 27, 1820, son of Rev. Nathaniel Hewit, at that time pastor of the Congregational church in Fairfield, and a descendant of Thomas Hewit, an English mariner who came to New London, Conn., during the latter part of the seventeenth century. His mother was Rebecca Woobsey Hillhouse, youngest daughter of Hon. James Hillhouse, of New Haven. His Christian name was Nathaniel Augustine, but upon entering the Redeemptorist order he changed it to Augustine Francis. He was educated at Phillips Academy, Andover, Mass., and after graduating at Amherst College in 1839 he studied at the Theological Seminary, East Windsor, Conn., for two years. Removing to Baltimore, Md., he continued his ecclesiastical studies under the direction of Bishop Whittingham, by whom he was ordained deacon in 1841. The winter of 1845-46 was passed on a plantation near Newbern, N. C., and in the following spring he went to Charleston, S. C., where he was received into the Roman Catholic church. On March 25, 1847, he was ordained priest by Bishop Reynolds two years after Cardinal Newman became a Roman Catholic, and on account of this change of faith and his profound theological learning he was called the "Newman of America." During the next three years his principal occupation was teaching in the

collegiate institute attached to the cathedral and editing the works of Bishop England. Having been sent to Philadelphia to superintend their publication, after finishing this work he joined the order of Redeemptorists at Baltimore, and was employed in their missions until 1858, when he united with Father Hecker and others in founding the new congregation of St. Paul the Apostle. After several more years spent in the same missionary work he became a professor in the Paullist seminary in New York, which was removed to Washington in 1889 and established in the college of St. Thomas Aquinas, affiliated to the Catholic University of America, which was

opened in that year. After the death of Father Hecker, December, 1888, Father Hewit was elected superior general of the congregation, and also held the office of rector of St. Thomas' College. He published several works, including "Life of Rev. Francis A. Baker, C.S.P.," "Problems of the Age"; "The King's Highway"; "Light in Darkness," and many articles in the Catholic reviews. Besides articles written for the reviews, Father Hewit contributed a paper to the first International Catholic Scientific Congress at Paris, another to the Parliament of Religions at Chicago, 1893, also one to the Congress of Psychology at the same time and place, and has given several of the lectures in the public courses in the Catholic University in Washington. He received the honorary degree of D.D. from Pope Leo XIII., which was also conferred by Amherst College. He celebrated his golden jubilee March 25, 1897, and died in New York city, July 3d, following.

WINANS, Ross, inventor, was born at Vernon, N. J., in October, 1796. Nothing is told of his early life or education; but he became a farmer and displayed inventive talent by making a new plow. From this time he devoted himself to the study of mechanism—more particularly that of railroads. He invented the friction wheel for cars and the outside bearing on axles, now used altogether by the railways of

this country. He also invented the eight-wheel car system. In 1830 he removed to Baltimore, Md., and subsequently the Baltimore and Ohio Railroad Co., recognizing his ability, sent him to England under instructions to study the railway systems of that country. He remained a year, gaining information which proved of the greatest importance, not only to the Baltimore and Ohio Co. but to railroad enterprise in general throughout the country. He constructed the first locomotive which was successfully used by the Baltimore and Ohio railroad, and he invented the style of locomotive known as the "camel back." He organized the great railway machine shops of Baltimore, the largest in the country, and, with the assistance of his sons, managed them with great success. Being invited by the Russian government to build the rolling stock for the Moscow and St. Petersburg railroad in 1843, he declined the proposition in favor of his two sons. In 1858 he and his son, Thomas, constructed the first of so-called cigar steamers. In a circular issued at this time, this was described as being wholly of iron, and the length "is more than eleven times its breadth of beam, being sixteen feet broad and one hundred and eighty feet long." Others were built in England by his son, but they were not successful. Mr. Winans was an active Democrat and in favor of the Confederacy during the civil war, and in 1861 he represented Baltimore in the extra session of the Maryland legislature. For a time he was imprisoned in Fort McHenry. He made a number of selections from the works of eminent writers on scientific topics, and himself published a number of pamphlets on religious subjects. His wife, Julia, died May 24, 1850. His two sons, Thomas DeKay and William L. Winans, inherited his mechanical genius. He died in Baltimore, April 11, 1877.

LORIMER, George Claude, clergyman and author, was born in Edinburgh, Scotland, June 4, 1838. At the age of ten he ran away from home and went to sea as cabin boy. After one voyage he landed in London penniless and soon became supernumerary in a theater, being advanced after a time to speaking parts. In 1857 he came to the United States with a theatrical company and for some time was a member of a stock company in Louisville, Ky. While there he became a convert to Baptist principles and decided to leave the stage and enter the ministry. He entered Georgetown, Ky., college, where he fitted himself for his calling, and in 1859 was ordained a minister. His first charge was at Harrodsburg, Ky., where he speedily distinguished himself as a speaker of great eloquence and zeal. In 1860 he was called to Paducah, Ky.; in 1868 he became pastor of the First Baptist Church, of Albany, N. Y.; in 1870 he was summoned to the pastorate of the Shawmut Avenue Church, of Boston, and three years later took charge of Tremont Temple, succeeding Justin D. Fulton. He added greatly to the revenues and membership of the Temple, his sermons attracting large audiences, and became a pulpit orator of national fame. In 1879 he transferred his services to the First Baptist Church, of Chicago, Ill., and shortly after was made pastor of Immanuel Baptist Church in that city, where he repeated in increased measure the success which he had achieved in Boston. In 1890, his health failing, he resigned the pastorate of Immanuel Church and went abroad for rest and recuperation. Upon his return, in April, 1891, he received and accepted a second call to Tremont Temple. He ranks as one of the most eloquent and impassioned preachers of his time, and is also a man of ripe culture, broad information and catholic views. He edited "The Watchman" in 1876, and he is the author of "Under the Evergreens" (1872); "The Great Conflict" (1876); "Isms, Old and New"

A. F. Hewit

(1882); "Jesus, the World's Savior" (1884), and "Studies in Social Life" (1886). He was married to Belle C. Buford and has four children, one son and three daughters, two of whom are married.

PHELPS, Almira (Hart) Lincoln, educator and author, was born at Berlin, Hartford co., Conn., July 15, 1793, daughter of Samuel and Lydia (Hinsdale) Hart. She was descended from Stephen Hart, who was deacon of the first church of Hartford and deputy to the general court of Connecticut, and also a descendant of Thomas Hooker, minister of the same church and founder of Hartford. She was the youngest of seventeen children, and was a sister of the reformer and educator, Mrs. Emma Willard, by whom she was educated. She began teaching at an early age, first in her father's house, and afterward at the Sandy Hill (New York) Female Academy. After the death of her first husband she was associated with her sister, Emma Willard, at the famous seminary in Troy, and in 1838 she took charge of a seminary in West Chester, Pa. Her reputation as a successful educator attracted the attention of the trustees of the Patapsco Female Institute, of which Hon. Thomas B. Dorsey, chief-justice of Maryland, was president, and upon their invitation she removed to Elliott City, Md., in 1841, to assume charge of that institution, which soon attained a high reputation. She was the author of a series of elementary treatises, which were for many years widely used as text-books, and was the second woman elected a member of the American Association for the Advancement of Science. Her publications are: "Familiar Lectures on Botany" (1829); "Dictionary of Chemistry" (1830); "Botany for Beginners" (1831); "Geology for Beginners" (1832); "Female Student, or, Fireside Friend" (1833); "Chemistry for Beginners" (1834); "Lectures on Natural Philosophy" (1835); "Lectures on Chemistry" (1837); "Natural Philosophy for Beginners" (1837), and "Hours With My Pupils" (1869). She also wrote the tales: "Caroline Westley" (1833); "Ida Norman" (1850), and "Christian Household" (1860), and edited "Our Country in Its Relation to the Past, Present and Future" (1868), for the benefit of the Christian and sanitary commissions. In 1847 she was married to Simeon Lincoln, of Hartford, Conn., who died in 1823, and in 1831 she was married to Judge John Phelps, of Vermont. She was the mother of three daughters and one son, Charles E. Phelps, who commanded a Maryland regiment in the civil war, served two terms in congress, and was twice elected judge. She died in Baltimore, Md., July 15, 1884.

PHELPS, Charles Edward, lawyer, was born at Guilford, Vt., May 1, 1833, son of John and Almira Hart (Lincoln) Phelps. He is descended in the eighth generation from William Phelps, who emigrated from England to Massachusetts in 1630. He removed with his parents to Pennsylvania in 1838, and to Maryland in 1841. He was educated in private schools, and was graduated at Princeton in 1852. He studied law in the office of Robert J. Brent, in Baltimore, Md., and at the Harvard Law School. After traveling abroad he commenced the practice of his profession in Baltimore. He was one of the originators of the Maryland guard, becoming captain of a company, and afterwards major. In 1860 he was elected to the reform city council. In August, 1862, he accepted the lieutenant colonelcy of the 7th Maryland volunteers (Federal), and soon afterward became colonel. He was severely wounded at Laurel hill while temporarily commanding a division of the 5th army corps, during which he had two horses killed under him, and was captured. He received the brevet of brigadier-general of volunteers and was awarded a medal of honor for gallant con-

duct in the battle of Spottsylvania. He was elected to congress in 1864, and served on the committees on naval affairs and on the militia. He was re-elected in 1866, and served on the committee on appropriations. He served for a number of years as a member of the board of school commissioners of Baltimore, and in 1876 was president of the board. During the strike riots of 1877 he served as colonel of the 8th Maryland regiment. In 1882 he was elected associate judge of the supreme bench of Baltimore, as the result of an independent movement, for a term of fifteen years, and at the expiration of his term, in 1897, he was nominated by the Democratic, Republican and Prohibition parties, and re-elected without opposition. In 1868 he was married to Martha, daughter of William Woodward, of Baltimore, by whom he had four sons and two daughters. He is a law professor in the University of Maryland, and is the author of "Phelps's Juridical Equity" and of "Palstaff and Equity."

COMSTOCK, Charles Carter, manufacturer, was born at Sullivan, Cheshire co., N. H., March 5, 1818, son of William and Ruth (Crane) Comstock. He acquired his education in the public schools during the winter months and helped his father on the farm in summer until his eighteenth year. He then induced

his father to sell the farm of 100 acres for \$2,300 and buy another of 280 acres with first-class improvements for \$5,000. Through his help and good management the farm had almost doubled in value when the son attained his majority. In 1842 he became interested in lumbering and soon owned several mills. His family removed to Grand Rapids, Mich., in 1853, when the population of that city was about 4,000, and there engaged in the lumbering business, forming a partnership, the firm being known as E. F. Ward & Co. They took to Grand Rapids the first machinery ever used there in the manufacture of doors, window-sashes, frames and blinds. In 1857 he purchased the furniture factory of E. and S. A. Winchester. The financial reversions of that year embarrassed him, but with persistent determination he rallied and during the next four years paid his debts in full and was once more in the full tide of successful business. Having sold his interest in this firm in 1866, he built a large brick factory at the corner of Canal and Newberry streets, stocking it with new and improved machinery, and making it the largest wooden-ware factory at that time in the country, consuming, on an average, 10,000,000 feet of lumber annually. In 1863-64 he was mayor of Grand Rapids, in 1870 was nominated for governor by the Democratic party; and in 1872 was nominated for congress by the People's party. While mayor he was active in matters of public improvements and was one of the early advisers in the effort to perfect the system of water-works. In 1878 he was a candidate for congress on the Greenback ticket, and in 1881 was elected representative for the 5th Michigan district for congress on what was termed the fusion ticket—Democratic and Greenback. He was prominent in organizing the Grand Rapids Chair Co., incorporated, in 1872, of which he was president until his death. He built the North Park Street railway and pavilion in 1890, expending nearly \$100,000 for that purpose. Comstock park, of ninety-nine acres, upon which the state fair is held annually, was given by him to

the West Michigan Fair Association. Through his enterprise the Michigan Soldiers' Home was located on its present site in Grand Rapids. He was married twice: in 1840, to Mary Winchester, by whom he had four children; and in 1865, to Cornelia Davis, by whom he had two children. He died at Grand Rapids, Feb. 20, 1900.

CONWAY, Mrs. Frederick B. (Sarah G. Crocker), actress, was born at Ridgefield, Conn., in 1834, daughter of an Episcopal minister of that town. When she was an infant her family removed to New York, where she received her education, and also formed a taste for the stage, with which her sister was already connected. At the age of fifteen she entered the profession, making her debut in a small theatre in Brooklyn. From there she went to Baltimore, Md., and became a member of the company of which John E. Owens was manager, making her first appearance there in 1849. In 1850 she joined the company at Purdy's National Theatre, Chatham street, New York, where she played one season, when she met Mr. Conway, and was married to him, while fulfilling an engagement at the Brooklyn Theatre. In 1852 Mrs. Conway joined J. W. Wallack's company, in which she succeeded Laura Keane as leading lady. This company, at the time one of the finest ever brought together in New York, included James W. Wallack, Jr., Lester Wallack, John Wyatt, F. Chippendale, William R. Blake and Mrs. Hill. Mrs. Conway distinguished herself in the part of Beatrice in "Much Ado About Nothing," and during the season became a great favorite among audiences with critical ideas at Wallack's Theatre. From New York she went to Philadelphia, where William Wheatley had leased the Arch Street Theatre, and where both Mr. and Mrs. Conway were engaged, in company with her sister, Mrs. D. P. Bowers, John Drew, Mrs. Charles Richards, George Boufface and other

prominent actors. During the next season Mr. and Mrs. Conway were at the Walnut Street Theatre, Philadelphia, and from that time, for the next ten years, they traveled through the country as stars, being considered by managers among the most remunerative actors at that time before the public. In 1864 they settled in Brooklyn, and took the management of the Park Theatre, where they became at length very successful, and accumulated a fortune. Her sister, mentioned above, was Elizabeth, born in Stamford, Conn., March 12, 1830, who was married to David P. Bowers, March 4, 1847. She became popular at the Arch Street Theatre, Philadelphia, where she remained until her husband's death in June, 1857. Subsequently she leased the Philadelphia Academy of Music. Mrs. Conway played for two seasons in England, and returning in 1863, acted for a few seasons in New York, when she retired from the stage. In 1866 she organized a dramatic company, which visited the principal cities throughout the United States, and played her old and favorite characters. Mrs. Conway died in Brooklyn, N. Y., April 28, 1874.

DUNLOP, James, jurist and author, was born at Chambersburg, Pa., in 1795, son of Andrew and Sarah Bella (Chambers) Dunlop. His grandfather was James Dunlop, who was present as a colonel at the battle of Brandywine; his great-grandfather was Benjamin Dunlop, who came from Antrim, Ireland, about 1726, and was the founder of Chambersburg.

James was graduated at Yale in 1812; studied law with his father, and was admitted to the bar of Chambersburg. He practiced his profession with success; but finding the emoluments of a country lawyer too small for his ambition, he engaged in commercial enterprises, such as the manufacture of edge-tools. He was a member of the state senate when he prepared his paper on the boundary question, and in 1838 was a member of the convention to reform the constitution of the state, and distinguished himself by the learning and ability he displayed in the debates. He was a member of the Democratic party until the spoliation of the United States Bank by Jackson, when he became a Republican. He was esteemed at college as "a wit, with a vein of satire, yet always amiable," and he left a curious memento of this phase of his character in a sixteen-page pamphlet, entitled "Forensic Tour in the United States, by the Hon. John Philip Refalo, Sergeant-at-Law of Grey's Inn, London, in a Series of Sixteen Letters to His Friend in Liverpool," in which he lampooned certain peculiarities of the members of the supreme bench of that day. He prepared and published a digest of the "Laws of Pennsylvania, 1700-1853, Chronologically Arranged, With Notes and References to All the Decisions of the Supreme Court of Pennsylvania, Giving Construction to Said Laws, With a Copious Index" (3d ed., Philadelphia, 1858). This work was very highly commended by Hon. Judges Rogers, Grier, Coulter and others; he also published a "Digest of the General Laws of the United States" and "Memoir on the Controversy Between William Penn and Lord Baltimore, Respecting the Boundaries of Pennsylvania and Maryland" (in "Historical Society of Pennsylvania Memoirs," Vol. I.). He died while visiting in Baltimore, Md., April 9, 1856.

MURRAY, William Vans, statesman, was born at Cambridge, Somerset co., Md., in 1762. He received a classical education, and upon its completion, in 1783, went to London for the purpose of studying law. He took up his studies in the Temple, where he remained three years. Returning to America in 1786, he commenced the practice of his profession in his native state, and was elected a member of its legislature. In 1791 he was elected to congress by the Federalists, and served until 1797, bearing a prominent part in the legislation of the period, and displaying a combination of erudition, eloquence, wit, judgment and skill in debate seldom surpassed. Washington appointed him minister to the Netherlands in 1797, and in 1799 Pres. Adams made him envoy to France. Although associated in the latter mission with Oliver Ellsworth and William R. Davie, it was mainly owing to the work of Mr. Murray that the impending difficulties between France and the United States were dispelled, and the convention finally signed at Paris, Sept. 30, 1800. He was then returned to his former post at the Hague, where he remained until December, 1801. A pamphlet published by him, entitled "The Constitution and Laws of the United States," gained much commendation. He died in the town of his birth, Dec. 11, 1803.

WOOD, Jethro, inventor, was born at Dartmouth, Bristol co., Mass., March 16, 1774, only son of John and Dinah (Hussey) Wood, who were members of the Society of Friends. He was born in comparative affluence, and received a good education. From an early age his mind was occupied with the discovery of a new form of plow, and he experimented a long while by carving wood and raw potatoes to get what he thought the exact curve. He was residing at Scipio, Cayuga co., N. Y., in 1814, when he took out his first patent. Although a decided improvement, the plow was not entirely satisfactory, and on Sept. 1, 1819, he obtained another patent consisting

of an improved mold-board and a cast-iron standard for connecting it with the wooden beam. The entire substitution of cast iron for wrought iron occasioned a great deal of hostility to the original Wood plow; but after a severe test its advantages and general superiority were acknowledged. This was the first plow in which the parts most exposed to wear could be renewed in the field by the substitution of cast pieces. Wood continued to manufacture and sell his plows until his death, the patent being renewed in 1833 for fourteen more years. His son, Benjamin, succeeded to the business, which was considerably interfered with by the infringements of rival manufacturers until the validity of the patent was tested in the courts in 1845. After three days' trial a decision was rendered that the improvements were due to Jethro Wood, and that all manufacturers must pay his heirs for the privilege of making these plows. Jethro Wood was married, Jan. 1, 1793, at White Creek, N. Y., to Sylvia Howland, and had two sons and four daughters. He died about 1840.

DORSEY, Anna Hanson, author, was born at Georgetown, D. C., Dec. 12, 1815, daughter of Rev. William McKenney, one of the first chaplains in the navy. Her maternal grandfather, Nicholas Lingan, a kinsman of Charles Carroll, was the first man to issue manumission papers in the District of Columbia. In 1837 Miss McKenney was married to Lorenzo Dorsey, a son of Judge Owen Dorsey, of Baltimore. After her marriage she was converted to the Roman Catholic faith, and devoted her talents almost exclusively to the writing of Roman Catholic stories. Her first story was a delightfully delicate and tender one, entitled, "The Student of Blenheim Forest," and her "Coana: The Rose of the Algonquins," notable for its spirit of purity and devotion, was twice dramatized, and was translated into the German and Hindii languages. Her pen was very fluent, and her published works are voluminous. Her only son entered the Federal army and was mortally wounded while planting the colors on the ramparts at Fort Hell. Mrs. Dorsey contributed to the literature of the civil war two ballads: "They're Coming, Granddaddy!" and "Men of the Land." Her writings brought her the friendship and commendation of many prominent Catholics, in England and Europe as well as in America. Pope Leo twice sent her his blessing, and the University of Notre Dame conferred upon her the Lactaria medal. Some of her publications are: "The Student of Blenheim Forest" (1847); "Flowers of Love and Memory" (1849); "Guy, the Leper" (1850); "Woolreave Manor" (1852); "May Brook" (1856); "The Oriental Pearl" (1857); "Coana: The Rose of the Algonquins" (1868); "Mona, the Vestal" (1869); "The Old Gray Rosary" (1870); "Tangled Paths" (1879); "The Old House at Glenarra" (1886); "Palms" (1887); "Warp and Woof" (1887); "A Brave Girl"; "Zoe's Daughter," and many others. She spent the last years of her life at Washington with her children, and died there Dec. 26, 1896.

HUSSEY, Obed, inventor, was born in New England in the year 1791 of Nantucket Quaker stock. His youth, like that of most Nantucket boys, was spent partly at sea. He was educated, cultured and refined; he was a philosopher as well as writer of both poetry and prose, and withal a man of more than ordinary ability. He was an ingenious mechanic and a skillful draftsman. He invented a machine for the manufacture of hooks and eyes, a mill for crushing cane, an artificial-ice machine, a steam plow and many other devices and machines. His most successful invention, however, was a mowing and reaping machine, having for the first time a raker's stand, a hinged and removable platform, a jointed bar and a reciprocating saw-toothed cutter sliding within double guard fingers, the guards

forming double bearings above and below the saw, whereby the cutting was made sure whether with a sharp or dull edge, and at the same time acting as a protection to the saw. The first public trial of his machine was made July 2, 1833, near Carthage, O., before the Hamilton County Agricultural Society, and was entirely successful. He obtained his first patent Dec. 31, 1833. He began manufacturing these machines in Cincinnati, O., and the following year introduced them in Illinois, New York and Missouri. In 1836 he was invited to exhibit his reaper before the Maryland Agricultural Society, which reported that "It may justly be denominated perfect, as it cuts every spear of grain, collects it in bunches of proper size for sheaves, and lays it straight and even for the binders." He then located in Baltimore, Md., where he devoted all his time to the manufacture and sale of his reapers. Meanwhile, competition sprang up, and the originality of the invention was claimed by C. H. McCormick (q. v.). In a suit for infringement of patent McCormick set up the defense of prior invention, but the courts decided against him, and he was forced to settle with Hussey. Subsequently the question was thoroughly investigated by the patent office when McCormick applied for an extension, and the following official letter embodies the conclusion arrived at: "Patent Office, Jan. 22, 1848.—Sir: In compliance with your requisition, I have examined the patent of Cyrus H. McCormick, dated 21st June, 1831, and found that the principal features embraced in said patent, viz.: the cutting-knife and mode of operating it, the finger to guide the grain and the revolving rack for gathering the grain, were not new at the time of granting said letters patent. The knife, fingers and general arrangement and operation of the cutting apparatus were found in the reaping machine of O. Hussey, patented Dec. 31st, 1833. The revolving rack presents novelty chiefly in form, as its operation is similar to the revolving frame of James Ten Eyck, patented 2d November, 1825. Respectfully submitted, Charles G. Page, Examiner. To Hon. Edmund Burke, Com'r of Patents." On Aug. 17, 1847, Hussey received a patent for an improvement in his cutting apparatus. This consisted in opening the rearmost portion of the upper part of the guard fingers, permitting the sheaflets of grass to escape, and was considered so valuable that the patent was sold for \$200,000 when it had only two years more to run. The Hussey cutting apparatus was revolutionary in the history of harvesting machines. A reaping machine had been invented by Rev. Patrick Bell, of Scotland, in 1826, which delivered the grain to the ground automatically, and which had been successfully used in England from the year 1827; but Hussey's device for cutting the grain involved a new principle, and was entirely different from every previous cutter, and from its appearance dates the success of the reaping machine. It was adopted by all manufacturers at the expiration of the patent, which was not renewed, and it continues to be used to this day practically as Hussey made it. McCormick himself was compelled to adopt the Hussey cutter for his machines. During the official tests at the exhibition of reaping machines in England in 1851, Hussey being absent, his machine was not properly operated, and a gold medal was awarded to the McCormick reaper; but upon Hussey's arrival further tests were demanded, and at a later trial the

Obed Hussey

jury decided in favor of Hussey's machine in every one of the points considered. His sympathetic nature is shown by the fact that he lost his life while getting a drink of water for a crying child, a total stranger. He was journeying from Baltimore to New England with his wife and daughter, in 1859, and when stepping upon the car the train started and he was thrown and killed.

PALMER, Thomas Withereil, senator, was born in Detroit, Mich., Jan. 25, 1830, son of Thomas and Mary A. (Withereil) Palmer. He attended private schools, studied at an academy at St. Clair, Mich., and entered the University of Michigan, which he was compelled to leave by failing health towards the end of his sophomore year. Going abroad, he traveled through Spain on foot; went from there to South America, and returned home by way of New Orleans. He became clerk of a transportation company operating between Green Bay and Strong's Landing, Wis.; after eighteen months engaged in the mercantile business at Appleton, Wis., returning to Detroit about a year later. In 1853 he commenced operations in real estate, two years later forming a partnership with Charles Merrill, which continued until the latter's death in 1872. In 1873 he was elected a member of the first board of estimates from the city at large, and in 1878 was made state senator, introducing a bill which created the Girls' Reform School, and, with the assistance of E. W. Cottrell, securing the passage of his bill providing for a boulevard about the city of Detroit. He was chairman of the caucus which nominated Zachariah Chandler for the U. S. senate, and in 1883 was himself elected U. S. senator, to succeed Thomas W. Ferry, serving the full term of six years, and acting as a member of the committees on post-offices and post roads, education, labor, fisheries, agriculture, and rivers and harbors; was also president of the waterways convention held at Sault Ste. Marie, in August, 1887. In 1889 he was appointed by Pres.

J. W. Palmer

Harrison minister to Spain, but resigned after one year's service, and in the following year became commissioner-at-large for the Columbian exposition, and was elected by acclamation president of the commission. Mr. Palmer is an able debater and forceful speaker, his public utterances showing sound judgment and great vigor of thought. He has been an important factor in financial and business enterprises, having been stockholder or director in the American Exchange National Bank; the Wayne County Savings Bank; the Security and Safe Deposit Co. of Detroit; the Detroit Steam Navigation Co.; the Michigan Lake Navigation Co.; the Frontier Iron Works; the Michigan Mutual Life Insurance Co.; president of the Preston National Bank of Detroit, and of the Percheron Navigation Co. He was for many years president of the Society for the Prevention of Cruelty to Animals. He suggested the soldiers' monument of Detroit, and became secretary of the organization that secured its erection. In 1893 he donated 130 acres of land to the city for a park, later named for him. Mr. Palmer was married, Oct. 16, 1855, to Elizabeth P., daughter of Charles Merrill, of Detroit. They have no children of their own, but have adopted three.

COOPER, Daniel C., pioneer and surveyor, was born at Long Hill, Morris co., N. J., Nov. 20, 1773. Attracted by the prospect of making some profitable

land speculations, he removed to Ohio at an early age. In 1795 the site of the present city of Dayton, O., was selected by Gen. Arthur St. Clair, governor of the territory; Jonathan Dayton, soldier and congressman; Gen. James Wilkinson and Israel Ludlow, and they contracted for the purchase and settlement of the land known as the seventh and eighth ranges, between the Mad and Little Miami rivers, from John C. Symmes, who had obtained a grant from the government in 1788. Cooper and other surveyors were employed to run the boundaries of the new purchase, and on Nov. 4, 1795, the town was laid out, and was named Dayton, after Jonathan Dayton, who is mentioned above. Symmes found himself unable to complete his payments, and the land accordingly reverted to the government. Subsequently Cooper became the proprietor of the town location, and he laid it out again on a grand and liberal scale. To encourage the settlement of the town, he donated lots to mechanics and erected mills and otherwise fostered the growth of the town. He was a member of the state legislature. He died at Dayton, O., July 13, 1818.

ARENS, Franz Xavier, musician, was born at Neef, Rhenish Prussia, Oct. 26, 1856. At the age of seven he began taking his father's place as church organist, and for some time held the position of soloist in the choir. Coming to the United States in 1866, he was appointed organist and chorister in a suburb of Cleveland, and three years later entered a Wisconsin normal school to study music. He entered the School of Music at St. Francis, Wis.; went to Munich for two years in 1887, and then entered the Royal Conservatory of Music, Dresden, to take up composition and conducting, graduating there in 1884 with the diploma of honor, the highest award given. Returning, he was made conductor of a German singing society, and also of the Philharmonic Orchestra in Cleveland, O. From 1889 to 1892 he took a special course in vocal studies in Berlin. Meanwhile, he gave a series of orchestral concerts in the principal cities of Germany, presenting for the first time to European audiences a programme devoted entirely to the works of prominent American composers, such as MacDowell, Paine, Chadwick, Herbert, Van der Stucken, Shelley and others. In 1892 he became the conductor of the Indianapolis May musical festivals, a position he held for four years, during which he was appointed president and principal of the vocal department in the newly-founded School of Music in that city. He went to New York city in 1897; became conductor of the New York Manuscript Society; in 1900 he organized the People's Symphony Concert, of which he is the conductor, and teaches singing for concert and the opera. Mr. Arens has composed a symphonic fantasia, a string quartet, a Latin mass, a cantata for male chorus, tenor solo and orchestra, and numerous sacred and secular quartets and songs. He was married at Canal Dover, O., May 20, 1885, to Emma L., daughter of John Huegel, of Canal Dover, O.

CONANT, Roger, pioneer, was born in Budleigh, Devonshire co., England, in April, 1591. He arrived in Plymouth, Mass., in 1623, and two years later removed to Nantasket, occupying the house that had been built by Miles Standish a year or two previously. He removed to Cape Ann shortly afterwards, where he organized the first Puritan church. He was the overseer or agent of a small colony of settlers that had been sent out from Dorchester, England, of which Rev. John White, the minister of that place, was the moving spirit. The experiment at Cape Ann was not a success; most of the people were sent back to England, and Conant, White and some of their associates removed to Nantkeag, or Nahumkeik, in 1626, where, it is said, he erected the

first house. They were encouraged by the new location to send for more colonists and cattle, and on March 4, 1628, a patent was procured from the New England Company, granting to Sir Henry Roswell, Sir John Young, Thomas Southcote, John Humphrey, John Endicott and Simon Whitecomb a tract of land from three miles south of the Charles river to three miles north of the Merrimack. In May, 1632, Conant was chosen one of a committee to confer on the subject of raising a general stock for purposes of trade, and in 1636 he was appointed to examine and mark all the Salem canoes. He was a representative in the first court held in 1634, and was appointed justice of the quarterly court in what afterwards became Essex county, in 1637. The name of the settlement was changed to Salem in 1629, a name, according to Mather, of Hebrew origin, meaning "peace." Conant's son, also named Roger, was the first white child born in Salem, and in consequence received a grant of twenty acres in 1640. Roger Conant died at Beverly, Mass., Nov. 19, 1679.

HEWITT, John Henry, poet and journalist, was born in New York, July 11, 1801. He was the son of a musician, and afterwards became proficient in the art, which enabled him in after life to earn a livelihood. In 1818 he entered West Point, but was not graduated, owing to a dispute with the commandant. While there he wrote the words and music of "The Minstrel's Return from the War," which became one of the most admired ballads of the day. Removing to Baltimore, Md., in 1825, he began his literary and musical career by contributing to various papers and composing songs and ballads, and became identified with several literary ventures, such as the "Emerald," the "Minerva" and the "Saturday Visitor." In competition with Edgar Allan Poe for a prize for the best poem, the award was given to Hewitt for his "Song of the Winds." Poe's poem was "The Coliseum." Hewitt composed the music to which his verses were set, and has been called the "Father of American Ballad Poetry." He also wrote the oratorio, "Jephtha's Daughter"; "Flora's Festival"; "The Seasons," and "The Fairy Bridal"; the melodrama, "Rip Van Winkle"; "the military opera, "Vivandiere"; the comedy, "The Governess," and the allegorical drama, "Washington." A volume of his poems was published in 1838, and a more complete collection appeared in 1877, under the name "Shadows on the Wall." The creations of his mind were pure and simple. He sang of love and patriotism to the comprehension of the people. Often he descended from his serious strain, and, under the *nom de plume* of Jenks, wrote for the rural press verses on every-day topics. Some of his most admired songs were published under the name of "Eugene Raymond." He was twice married: first, to Estelle Maugin, who died in 1860, leaving seven children. His second wife was Aletia Smith, who survived him. He died in Baltimore, Md., Oct. 7, 1890.

WILDEY, Thomas, a founder of the order of Odd Fellows in the United States, was born in London, England, Jan. 15, 1782. He was a coach-spring maker by trade. In 1817 he emigrated to the United States, settling in Baltimore, Md. He had been connected with the order of Odd Fellows in England, and in 1819 he published a notice calling for a meeting of such Odd Fellows as might be in Baltimore. On April 13th five persons, one of whom was Wildey, held a preliminary meeting, and on April 26, 1819, the Washington lodge, No. 1, of the Independent Order of Odd Fellows in the United States was organized. It gradually grew in favor, and when he had retired from office as grand sire in 1833 he had instituted four lodges in Maryland, had organized the grand lodge of Maryland and of the United States, and had originated the Patriarchal

order. He had also extended the institution to Massachusetts, New York, Pennsylvania, Ohio, Louisiana, Kentucky, Delaware and the District of Columbia, and he saw them all united under their present grand lodge of the United States. In 1826 Wildey visited England and obtained a charter from the Manchester Unity, giving the new order independence, character and power. He died in Baltimore, Md., Oct. 19, 1861, and a monument was erected to his memory in that city in 1865.

TECUMSEH, Shawnee chief, was born near the junction of the Miami and Mad rivers, Ohio, about 1768. His father, Pukusheno, was killed in his childhood. He was the uncompromising foe of the whites, but had a creditable aversion to the Indian practice of torturing and burning captives. He bore a part in the warfare which preceded Wayne's treaty, made at Greenville, in August, 1795, ceding the land thereto to the United States. Ten years later he elaborated his vast plan for the union of all the Indians to resist American aggression. With his brother, Elskwatawa, "the prophet" (1771-1834), he visited the tribes from the Lakes to the Gulf, and by May, 1807, gathered 700 braves in a camp near Greenville. In August, 1810, in a conference with William H. Harrison, then governor of the Northwest Territory, he avowed his plan, denied the equity or binding force of the treaties, and demanded the restitution of the ceded lands. After another council, in July 1811, Harrison wrote to Washington that if he were further from the whites Tecumseh might "be the founder of an empire that would rival in glory Mexico or Peru." For the attainment of such an end, however, not only a great leader was necessary, but men capable of being led. The scheme was brought to naught by Harrison's victory at Tippecanoe, won Oct. 29, 1811, while the chief was carrying on his propaganda in the South. In June, 1812, he joined the British in Canada, took part in the fight at Raisin river, was present at Hull's surrender, and was commissioned brigadier. At the siege of Fort Meigs, May, 1813, he led 2,000 warriors, stopped the massacre of prisoners, and showed a nobler mind than Gen. Proctor, whom he told to "go and put on petticoats." He lost faith in the British before Perry's victory of Sept. 10th, and was prevented from leaving them only by his fidelity to the allies whom he had enlisted. Before the battle of the Thames he laid aside his uniform, put on his Indian costume, and predicted his death. This battle was won for the Americans, Oct. 5, 1813, by Col. Richard M. Johnson, who may have killed Tecumseh; but this is uncertain. A Canadian historian ascribes to him and his followers the preservation of Canada, and his biographers credit him with all the savage virtues and some of the civilized ones—temperance, chastity, humanity. His eloquence transcended Indian models; the interpreters said they could not translate his impassioned harangues. His manners were impressive, his spirit lofty and unbending. "You are Proctor, I am Tecumseh," he said to his English colleague; and to Harrison, who asked him to sit near his "father"; "The sun is my father, the earth my mother." Though he labored for an impossible cause against manifest destiny, the splendor of his scheme showed the greatness of his mind. His "Life," with that of his brother, the prophet, was written by B. Drake (1841), and by E. Eggleston and L. E. Selye (1878).

PATTERSON, James Willis, educator and senator, was born at Henniker, N. H., July 2, 1823, son of William and Frances Mary (Shepard) Patterson. Alexander Patterson, the first American ancestor, was born at Bush Mills, Ireland, in 1714, and, emigrating to the United States, settled in Londonderry, N. H. He was married to Elizabeth Arbuckle, and their son, Joseph, became a soldier in the revolution, and was wounded at the battle of White Plains. The latter was married to Susannah Duncan, who became the grandmother of the subject of this sketch. William Patterson (b. 1784; d. 1862), was a farmer and a militia captain; "an active, energetic man, and highly respected." His wife, Frances Blary (b. 1795; d. 1858), was the daughter of Jane (Blair) Shepard. The son was educated at the Henniker Academy and at Dartmouth College, where he was graduated in 1848. Upon graduation he at once commenced to teach in the academy at Woodstock, Conn., and continued there two years, when he entered the Theological Seminary at New Haven, Conn. In 1852 he was appointed tutor in Dartmouth College, was advanced to the chair of mathematics in 1854, and to that of astronomy and meteorology in 1859, in which capacity he remained until 1865. In addition to his duties as professor he found work in the cause of education outside, teaching and lecturing in teachers' institutes as early as 1854, and serving as school commissioner of Grafton county and as secretary of the state board of education (1858-62). He was a member of the state legislature in 1862, and was elected a representative from New Hampshire to the 38th congress (1863-65), serving on the committee on expenditures in the treasury department, and for the District of Columbia. In 1864 he was appointed a regent of the Smithsonian Institution, and was re-appointed to this office in 1865. He was re-elected to the 39th congress (1865-67), in which he was a member of the committee on foreign affairs, the special

committees on the death of Pres. Lincoln, and on a bureau of education and free schools in the District of Columbia. He was a delegate to the Philadelphia loyalists' convention of 1866; he was elected senator to the 40th congress (1867-73), serving on the committees on foreign relations, District of Columbia, and enrolled bills. In 1877 he was returned to the state legislature, and in 1881 was appointed state superintendent of education for New Hampshire, serving until 1893. He was the author of numerous speeches, lectures, addresses and orations, a few of which may be mentioned: Oration at the dedication of the soldiers' monument in Manchester, N. H., Sept. 11, 1879; address at the quarto-centennial celebration of the College for the Deaf, Washington, D. C., May 8, 1889; oration at the unveiling of the statue of Gen. John Stark in the state house yard, Concord, N. H., Oct. 23, 1890; address before the International Congregational Council of the City Temple, London, England, upon "Arbitration or a Code of International Law, the Basis of Peace," July 17, 1891; address before the Congregational Club, of Boston, Forerunners' Day, Dec. 21, 1891; speech in state legislature in 1862 on Federal relations; speech on the consular service in congress, and others on the civil service, the constitutional amendments and the Freedmen's Bureau. He was appointed to the chair of oratory at Dartmouth shortly before his death. The degree of LL.D. was

conferred upon him by Iowa College, Grinnell, Ia., 1868. Mr. Patterson was married, Dec. 24, 1854, to Sarah P., daughter of Thomas and Abby (Parker) Wilder, of Laconia, N. H. He died at Hanover, N. H., May 4, 1893, survived by one son, George Willis (b. 1857).

MELVILL, Thomas, merchant and soldier, was born in Boston, Mass., June 16, 1751, son of Allan and Jean (Cargill) Melvill, and grandson of Thomas Melvill, minister of Scoonie parish, Fifehire, Scotland. Left an orphan when ten years of age, he had was educated by his maternal grandmother, Mrs. Mary Cargill, who is said to have been a relative of the celebrated and eccentric Dr. Abernethy. He was graduated at the College of New Jersey (Princeton) in 1769, later receiving the degree of A.M. from his alma mater and from Harvard. He visited Scotland in 1771, and on his return to Boston in 1773 entered with spirit into the patriotic movements of the time. He was a member of the Long Room Club; was in sympathy with the Sons of Liberty, and was one of the "Indians" who actively participated in the Boston tea party on the night of Dec. 16, 1773; some of the tea taken from his shoes that night is still preserved by the family. In 1774 he was married to Priscilla, daughter of John Scollay, a prominent Boston merchant, and among his descendants was Herman Melville, the author. Melvill was appointed aid to Gen. Warren before the battle of Bunker hill, and later was a captain in Col. Craft's regiment of artillery. He commanded a detachment of artillery sent to Nantasket to watch the movements of the British fleet, and he served in the Rhode Island campaigns of 1777 and 1779, having been promoted major. Early in the latter year Melvill returned to his commercial avocation in Boston, for there is a record of his attendance at a meeting of merchants held in Faneuil Hall, June 16, 1779, to take measures for reducing and regulating the price of merchandise and of enhancing the value of the Continental or paper money. In the same year he was elected fireward, and when he resigned in 1825 the fire board passed a vote of thanks to "Thos. Melvill, Esq., for the zeal, intrepidity and judgment, with which he has on all occasions discharged his duty as a fireward for forty-six years in succession, and for twenty-five as chairman of the board." When the custom house was established in Boston, in 1786, he was appointed surveyor; in 1789 was made inspector, and upon the death of James Lovell, in 1814, he was appointed naval officer of the port. The last named position he held until 1829. He was in the state legislature in 1832. Melvill was the last man in Boston to wear the cocked hat and small clothes of the revolutionary period, and his quaint and picturesque figure inspired Oliver Wendell Holmes to write his poem, "The Last Leaf," in which the following stanza occurs:

"I know it is a sin
For me to sit and grin
At him here;
But the old-three cornered hat,
And the breeches and all that
Are so queer!"

"His aspect among the crowds of a later generation," wrote Dr. Holmes, "reminded me of a withered leaf which has held to its stem through the storms of autumn and winter, and finds itself still clinging to its bough, while the new growths of spring are bursting their buds and spreading their foliage around it." Maj. Melvill died in Boston, Sept. 16, 1832.

BEALE, Edward Fitzgerald, U. S. minister to Austria, was born in Washington, D. C., Feb. 4, 1822. His father and grandfather were U. S. naval officers, and both received medals of honor from congress. Edward's education was begun in George-

town College, from which he went to the U. S. Naval Academy, where he was graduated in 1812. During the war with Mexico he was distinguished by conspicuous gallantry and was presented with a sword by his brother officers for bearing dispatches through the enemy's lines. Resigning his commission at the close of the war, he was appointed superintendent of Indian affairs for New Mexico and California, and was commissioned brigadier-general, being deputed to terminate an Indian war in California. For ten years he conducted many important explorations in the far West, and in 1861 was appointed surveyor-general of California by Pres. Lincoln, but as soon as the war of secession began offered his services in a military capacity. In 1875 he was appointed U. S. minister to Austria by Pres. Grant, but resigned in 1877, and returned to southern California, where he devoted himself to the interests of his large sheep and cattle ranch.

MUNCH, Friedrich, author and politician, was born at Neider-Gutinden, Upper Hesse, Germany, June 25, 1799. He passed his early years in the country, occupying himself with agricultural work until he was seventeen, when, in compliance with the desire of his parents, he entered the University of Giessen to study theology. His preference, however, was for politics, and though he completed the course and took up the duties of a pastor, he did not remit his interest in public affairs nor abandon his dreams of a public career. The political conditions of Germany at that period were such that Munch saw no possibility of gratifying his desires, and he conceived the plan of emigrating to the United States with others of his countrymen. In 1838 he sailed at the head of an emigrant party, and having heard of the fertility of Missouri proceeded to that state, being one of the first settlers of German birth. Here he took up farming, and gradually prospered, though he had to contend with various obstacles, including illnesses, and here, with liberty to express his opinions fully, he entered the field of politics and eventually was elected to the state senate. This honor came to him during the period of the civil war, and about the same time he lost a son, who fell on the field of battle. Under the pseudonym "Far West," Mr. Munch published a series of political, historical and philosophical essays, and a number of works. The latter are: "Ceber Religion und Christenthum" (Boston, 1847); "Der Staat Missouri" (New York, 1859; 2d ed., 1866); "Amerikanische Weinbauschule" (St. Louis, 3d ed., 1867); "Die Sinnliche und die geistige Lebensansicht oder Materialismus und Dualismus, beleuchtet von beutigen Standpunkt der Wissenschaft" (Philadelphia, 1871); "Geisteslehre für die heranreifende Jugend" (St. Louis, 1872); "Erinnerungen aus Deutschland's trübster zeit. Dargestellt in den Lebensbildern von Karl Follen, Paul Follen und Friedrich Münch" (St. Louis, 1873); "Fünf Reden über Religion, Aberglauben, und vernünftiges Menschenthum" (St. Louis, 1876). Friedrich Münch wrote also German poetry. In his declining years he devoted himself to vine culture. He died at Dutzow, near Washington, Mo., Dec. 14, 1881.

LONG, Stephen Harriman, engineer, was born at Hopkinton, N. H., Dec. 30, 1784, son of Moses and Luey (Harriman) Long. He was graduated at Dartmouth College in 1809, and taught for some time. In December, 1814, he entered the corps of engineers of the U. S. army as second lieutenant, and in the following year became assistant professor of mathematics at the U. S. Military Academy at West Point, which post he held until April, 1816. He was then transferred to the topographical engineers, with the brevet rank of major; in 1818-23, he supervised the explorations made between the

Mississippi river and the Rocky mountains, and in 1823-24, of the sources of the Mississippi, whereupon he was made brevet lieutenant colonel of topographical engineers (1826). The highest summit of the Rocky mountains was named after him, Long's peak. In 1827-30 he was engaged in surveying the Baltimore and Ohio railroad, and subsequently became engineer in chief of the Western and Atlantic railroad in Georgia (1834-40). In the latter capacity he introduced a system of curves in the location of roads, and a new species of truss bridges, afterwards generally adopted in the United States, and called by his name. In 1838 Long became major in the organization of topographical engineers, and in 1861 chief of that body with the rank of colonel. He retired from active service June 1, 1863. Col. Long was a member of the American Philosophical Society and of several other literary and scientific bodies. He published, in 1829, a "Railroad Manual," which was the first original treatise of the kind in America. Besides, there appeared, in 1823, an account of his first expedition to the Rocky mountains in 1819-20, from the notes of Maj. Long and others, published in Philadelphia by Edwin James, and in 1824, "Long's Expedition to the Source of St. Peter's River, Lake of the Woods, etc.," by William H. Keating (2 vols.). He was married in Philadelphia, Pa., March 3, 1819, to Martha Hotchkiss. Their son, Henry Clay Long, became well known as a civil engineer. Stephen Harriman Long died at Alton, Ill., Sept. 4, 1864.

HATHEWAY, Samuel Gilbert, legislator, was born at Freetown, Bristol co., Mass., July 18, 1780. He was a descendant of Sir Humphrey Gilbert, the famous navigator. He was educated at the common schools and later went to sea, though he was soon cured of his boyish liking for a sailor's life, and settled as a farmer in Cortland county, N. Y., where he acquired large landed possessions. He was for eight years a justice of the peace, and from 1814 to 1818 was a member of the lower house of the legislature, being elected in 1822 to the state senate. He was a representative from New York to the 23d congress (1833-35), to which he was elected as a Democrat; in 1854 served as a presidential elector; in 1856 was a delegate to the Cincinnati convention, and in 1860 to the national Democratic convention at Charleston, S. C. Deeply interested in military affairs, he attached himself to the militia, in which he attained the rank of major-general. He was a public-spirited and popular citizen, and besides filling a variety of local offices held in his control nearly every office in his district. Andrew Jackson and Martin Van Buren were among his personal friends. He died at Solon, Cortland co., N. Y., May 2, 1857. A memoir of Mr. Hatheway was published by Henry S. Randall in that year.

HATHEWAY, Samuel Gilbert, 2d, soldier and lawyer, was born at Freetown, Mass., Jan. 18, 1810, son of Samuel G. Hatheway. He received a liberal education, was graduated at Union College in 1831; after the usual course of legal study was admitted to the bar, and in 1833 settled in practice at Elmira, N. Y. He was a member of the state assembly, 1842-43, but, declining a re-nomination in 1844, returned to the law. He then for some years devoted himself exclusively to his profession, acquiring a considerable practice; however, in 1856, and again in 1862, he ventured into the political arena as a candidate for congress, but was unsuccessful. In 1863 he enlisted in the Federal army and later became colonel of the 14th New York regiment. He was for a time acting brigadier-general in command of Abercrombie's brigade. His health obliged him to re-sign from the army a few months before his death, which occurred at Solon, N. Y., April 16, 1864.

WOOLLEY, Jacob Benjamin, merchant, was born near Shrewsbury, N. J., Nov. 13, 1840, son of Jacob and Letitia (Kirby) Woolley. His earliest American ancestor was Emanuel Woolley, who, with his wife Elizabeth, emigrated to Newport, R. I., in the middle of the seventeenth century. He was made freeman of the town in 1653, and was a member of the company formed at Gravesend, Long Island, which received the Monmouth patent, to buy land of the Indians in East Jersey. From Emanuel Woolley the descent runs through his son, John, and his wife, Mary Potter; through their son, John, and his wife, Patience Lippitt; through their son, Benjamin, and his wife, Catharine Cook; through their son, Jacob, and his wife, Elizabeth Tucker, who were Mr. Woolley's grandparents. After a common school

education he removed to New York city, and entered the employ of a dry-goods merchant. In 1871 he went to Washington, and was appointed store-keeper of the bureau of engraving and printing, a position he held for five years. On returning to New York he began the business of importing Oriental works of art, and is recognized as an authority on the subject.

Mr. Woolley is a member of the Society of Friends, and, in addition to his regular business, he has been collecting the records of the Friends' Meeting houses in Shrewsbury, N. J., and Newport, R. I. Those of

births, marriages and deaths have been copied for preservation. He has for many years been compiling the annals of the Woolley family in America, which are soon to be published, and he is the founder of the Friends' Library at Shrewsbury, to which he has donated many rare volumes. On Jan. 5, 1865, he was married to Susan L., daughter of John Du Gan, and has two daughters.

COBB, Stephen Alonzo, lawyer and congressman, was born at Madison, Somerset co., Me., June 17, 1823. He received a common school education, and in 1850 accompanied his father to Minnesota, where he worked in the lumbering business for four years, meanwhile preparing for college. He entered Beloit College in 1854, and spent two years there, going in 1856 to Brown University, at which he was graduated in 1858. In the following year he settled in Wyandotte, Kan., and commenced the practice of the law. In 1862 he was a state senator, but entered the army, and served through the war, rising to the rank of lieutenant-colonel. He was mayor of Wyandotte in 1862 and 1868, and again a member of the state senate in 1869 and 1870, and speaker of the house in 1872. In the same year he was elected to the 43d congress, where he served on the committees on post roads and the state department. He died in August, 1878.

LYMAN, Joseph Bardwell, agriculturist, was born at Chester, Hampden co., Mass., Oct. 6, 1829. Upon graduation at Yale College in 1850 he taught for three years, and then entered the law school of the University of Louisiana. Having graduated there in 1856 he practiced for five years (until 1861) in New Orleans, and then removed to Stamford, Conn., where he engaged in horticulture, and where he, together with his wife, wrote "The Philosophy of Housekeeping" (1867). Subsequently Lyman settled in New York city, and in 1864 became agricultural editor of the "World," writing also for the "Agriculturist." Later (1868), he became managing editor of "Hearth and Home," and a few

months afterward joined the "Tribune," serving on its editorial staff until his death. He was an honorary member of several horticultural and agricultural associations, and was active as one of the managers of the American Institute, and as a member of the Farmers' and Rural clubs. Besides the aforementioned book and several agricultural works left unfinished, he published "Resources of the Pacific States" (1865); "Women of the War" (1866), and "Cotton Culture" (1867). Joseph Bardwell Lyman died at Richmond Hill, L. I., Jan. 28, 1872. His wife, Laura Elizabeth Baker, to whom he was married July 14, 1858, also distinguished herself as a journalist. She was born at Kent's hill, Kennebec co., Me., April 2, 1831, and was graduated at Wesleyan Academy, Wilbraham, Mass., in 1849. In 1850 she contributed a series of articles to "Hearth and Home" under the pen-name of "Kate Humabee." Subsequently (1869-87) she edited the "Home Interest" department of the New York "Tribune," and for some time also (1876-77) the "Dining-Room Magazine." In 1875 Mrs. Lyman was elected president of the Woman's Physiological Society, of Brooklyu, N. Y.

CARMICHAEL, William, diplomatist, was born in Maryland. He was a man of wealth, and resided in London at the outbreak of the revolutionary war. While on his way to America in 1776 with despatches from Arthur Lee he was detained in Paris by illness, and remained for more than a year, assisting Mr. Deane, the American minister at Paris, in his correspondence. He went to Berlin to communicate to the King of Prussia intelligence concerning American commerce, and later aided the American commissioners in Paris. After returning to America he was a delegate to the Continental congress from 1778 to 1780. During Mr. Jay's mission to Spain he was secretary of legation, and remained as chargé d'affaires after Mr. Jay left Spain, in 1782, receiving a commission in 1793, and retaining the office for about fifteen years. In 1792 he was authorized, with William Short, to negotiate with Spain concerning the free navigation of the Mississippi river, but they were unable to accomplish their object. Mr. Carmichael returned to the United States in 1794, and died in February, 1795. His letters were published in Sparks' "Diplomatic Correspondence."

BURRILL, James, senator, was born in Providence, R. I., April 25, 1772, son of James and Elizabeth (Rawson) Burrill. He was descended from George Burrill, one of the early settlers of the town of Lynn, Mass., and a wealthy landholder in that place, who died in 1653. He pursued his preparatory studies in the school of Mr. William Wilkinson, and was graduated at Brown University in 1788. He was admitted to the bar in 1791, and rose rapidly to distinction. In 1797 he was chosen attorney-general of Rhode Island, and was in office from October, 1797, to May, 1814. He was speaker of the house in the general assembly from May, 1814, to October, 1816. In 1816 he was elected chief-justice of the supreme court of Rhode Island, but resigned in the following year to become a member of the U. S. senate, where he won for himself very high rank, serving on the committees on the judiciary, commerce, manufactures and accounts. "To the Senate of the United States," said a journalist, "there perhaps has never belonged a more useful legislator or a more practical statesman. All who knew Mr. Burrill marveled at his resources and at his power to command them at pleasure. He was always judicious, luminous and forcible, master of an infinite variety of facts and principles, and ever ready in applying them." The bill for the admission of Missouri into the Union contained a clause prohibiting the introduction of slaves into the new

J. B. Woolley

state, and in support of this clause Mr. Burrill made a speech which the Hon. William Pinkney, who was opposed to the passage of the bill, said "was distinguished for its ability, and for an admirable force of reasoning, as well as by the moderation and mildness of its spirit." He was considered an able scholar and a wise judge. Mr. Burrill was married, Oct. 8, 1797, to Sally Arnold. He died in Washington, D. C., Dec. 25, 1820, before the expiration of his senatorial term.

KEEN, Morris Longstreth, inventor, was born in Philadelphia, Pa., May 21, 1820, son of Joseph Swift and Ann (Longstreth) Keen. His mother was a daughter of Benjamin Longstreth, founder of Phoenixville, Pa., son of Bartholomew Longstreth, of Longstreth Dale, deanery of Craven, Yorkshire, England. The first American ancestor, Jöran Kyn (George Keen), was a soldier who accompanied Gov. Johan Printz from Sweden to the Swedish colony on the Delaware, known as New Sweden, in 1633, and after residing with the governor for some years on Tinicum island, finally settled at Upland, now Chester, Pa. He had a son, Hans, who married Wilenka — and their son, Matthias (b. 1667; d. 1714), was elected to the assembly (1713-14), served as vestryman of the Swedish Lutheran congregation of Gloria Dei, being chairman of the committee which erected the church building, now the oldest in Philadelphia. He was married to Henrieka, daughter of Jan Classon, of Bucks county, Pa., and had a son named John, who was married to Susannah, daughter of James Steelman, of Great Egg harbor, N. J. The second Matthias, son of John, was married to Mary Swift, sister of John Swift, collector of the port of Philadelphia under George III., and their son, John, who was married to Mildred, daughter of James Cooke, of London, England, served in Gen. John Cadwalader's division of Pennsylvania troops at the battles of Trenton and Princeton, in the latter of which he received a wound. Morris L. Keen, who received his early education at private schools, became an apprentice in the Norris locomotive works, and later, with his younger brother, Joseph, established a foundry in West Philadelphia for the manufacture of flat-irons on a principle of his own invention. He received more than forty patents in many departments of machinery and manufacture; but the most notable among them was that on a process for obtaining paper from wood, practically the same as used to-day. The object had been attained before by a very expensive chemical method; but his object was to obtain a cheaper method. In an old engine-house of the Wilmington and Philadelphia railroad, at Gray's ferry in West Philadelphia, he first made his experiments, and succeeded in preparing paper by boiling wood in water under pressure, perfecting the process in a paper mill at Royer's ford, Chester co., Pa., in 1854. In 1863 the American Wood-paper Co. was formed, with patent-rights for the United States and foreign countries. He died at Highland Grove, near Stroudsburg, Pa., Nov. 2, 1883.

KEEN, Gregory Bernard, librarian, was born in Philadelphia, Pa., March 3, 1844, son of Joseph Swift and Lucy Ann (Hutton) Keen, and a half brother of Morris Longstreth Keen. After attending a Philadelphia private school taught by Prof. Ephraim D. Saunders, in 1857 he entered the University of Pennsylvania, where he was graduated A. B. in 1861 with the valedictory, and in 1864 received the degree of A. M. From 1863 until 1866 he studied in the Protestant Episcopal Divinity School, Philadelphia, was graduated in the latter year, and ordained a deacon in the Protestant Episcopal church. He then officiated as assistant minister at Grace Church, Philadelphia, and during a prolonged illness of the principal of the Protestant Epis-

copal mission school performed some of the duties of that office also. In 1868 he resigned from the Episcopal ministry and joined the Roman Catholic Church. During 1869-70 he traveled in Europe, accompanying the Right Rev. James F. Wood, D. D., bishop of Philadelphia, to the council of the Vatican, and on his return attended lectures in the medical department of the University of Pennsylvania. (1870-71). He then became professor of mathematics in the theological seminary of St. Charles Borromeo, at Overbrook, Pa. (1871-72), and for several years devoted himself to the study of Greek literature. In 1880 he was elected corresponding secretary of the Historical Society of Pennsylvania, which office he held until 1898, and in 1887 he was chosen librarian of the University of Pennsylvania. During his administration of this office the library quadrupled in size and a magnificent building was erected. Resigning in 1898, he became librarian of the Historical Society of Pennsylvania, and still (1901) holds this office. He edited the "Pennsylvania Magazine of History and Biography" (1883-84), contributing translations of various Dutch and Swedish manuscripts relating to the early Swedish colony on the Delaware, as well as a series of articles on "The Descendants of Jöran Kyn, the Founder of Upland." In the "Narrative and Critical History of America," edited by Justin Winsor, are chapters by him on "New Sweden" and "New Albion." He was a delegate to the Columbian Catholic congress at Chicago in 1893; is now the historiographer of the Alumni Society of the college department of the University of Pennsylvania; a member of the Phi Beta Kappa fraternity; a member of the American Philosophical Society; the American Catholic Historical Society; the Society of Colonial Wars; the Pennsylvania Society of Sons of the Revolution; the Society of the War of 1812, and is registrar of the Colonial Society of Pennsylvania. He was married in Philadelphia, Pa., June 29, 1885, to Stella Maria, daughter of John Marshall and Hanna Martina (Gunwalsen) Watson, of New York city. Their children are: Lucia Maria, John Francis Gregory and Joseph Bernard Keen.

KEEN, William Williams, physician, was born in Philadelphia, Pa., Jan. 19, 1837, son of William Williams and Susan (Budd) Keen. His father, a merchant, was the son of Joseph, who was the son of Matthias Keen by his second wife, Margaret Thomas. The subject of this sketch received his early education at the Central High School, Philadelphia, where he was graduated in 1853. He then entered Brown University, was graduated there in 1859, and at the Jefferson Medical College in 1862. Entering the U. S. army in May of the latter year, he served as a surgeon until July, 1864, during which period he was in charge of the Ascension and Eighth Street general hospitals, at Washington, D. C., and of the U. S. Army Hospital for Nervous Diseases at Turner's lane, Philadelphia, Pa. Going abroad, he studied in the leading medical schools of Europe for two years, returning in 1866 to take up private practice in Philadelphia, and to become lecturer on pathological anatomy in Jefferson Medical College, which position he held for nine years. He also conducted the Philadelphia School of Anatomy with great success, lecturing to the largest private classes ever held in America (1866-75). From 1876 to 1890

Gregory B. Keen

he was professor of artistic anatomy in the Pennsylvania Academy of Fine Arts, and in 1884 was appointed professor of surgery in the Woman's Medical College of Philadelphia, serving for five years. Since 1889 he has been professor of the principles of surgery in the Jefferson Medical College. He is a fellow of the Royal College of Surgeons of England; member of the Surgical Society of Paris; honorary member of the Belgian Surgical Society; the College of Physicians; the Pennsylvania Academy of Natural Sciences; the Pathological Society, serving as its secretary from 1869 to 1872; was elected a trustee of the Crozer Theological Seminary in 1867; of Brown University in 1873, and a manager of the American Baptist Publication Society in 1872. The degree of LL. D. was conferred upon him by Brown University in 1891. Besides contributing extensively to the periodicals of his profession he has published a number of standard medical works, among them being "Gunshot Wounds and Other Injuries of Nerves" (1864); "Reflex Paralysis" (1864); "Clinical Charts of the Human Body" (1872); "Complications and Sequels of Continued Fevers" (1876); "Early History of Practical Anatomy" (1875); "Surgical Complications and Sequels of Typhoid Fever" (1898); "History of the First Baptist Church, Philadelphia" (1898); "American Text Book of Surgery" (1900), and over 200 contributions to medical journals. "Gray's Anatomy" was edited by him (1887). Dr. Keen was married, Dec. 11, 1867, to Emma Corisina, daughter of Jefferson Borden, of Fall River, Mass., and had four daughters.

WHITE, Edward Douglas, jurist and senator, was born on his father's plantation in La Fourche parish, La., Nov. 3, 1845, son of Edward Douglas and Catharine S. (Ringgold) White. His father was the seventh governor of Louisiana; his grandfather, James White, emigrated to the territory of Louisiana before it was ceded to the United States, and after its purchase from Napoleon became the first parish judge of the Attakapas region in southwestern Louisiana. His maternal grandmother was a Mrs. Wilcox, of Pennsylvania. Young White received his early education at Mount St. Mary's College, Emmettsburg, Md., and subsequently at the Georgetown College in Georgetown, D. C. On the outbreak of the civil war he was withdrawn from that college and finished his education at the Jesuit College in New Orleans. He afterwards entered the Confederate army. After the war he entered the law office of Hon. Edward Bernudez, who subsequently became chief justice of Louisiana. Mr. White was admitted to the bar in 1868 and at once began practice in New Orleans. He took an interest in politics and in 1874 was elected state senator for four years. Gov. Nichols, in 1878, appointed him associate justice of the supreme court of Louisiana, a position which he occupied until the adoption of a new constitution creating a new court (1891). He was elected to the U. S. senate as a Democrat to succeed James B. Eustis, receiving 119 votes against 11 for H. C. Warmoth, Republican, and before the expiration of his term he was appointed (Feb. 19, 1894) associate justice of the U. S. supreme court.

JONES, William Palmer, physician, was born in Adair county, Ky., Oct. 17, 1819, son of William and Mary B. (Powell) Jones. His great grandfather, David Jones, a native of Wales, emigrated to Maryland, where his son, David, was born. David's grandson, William, served in the war of 1812, and fought in the battle of New Orleans under Gen. Jackson. William Palmer Jones studied while not working on his father's farm, and at the age of twenty entered the Louisville Medical Institute, subsequently receiving the degree of M. D. from the Medical College

of Ohio, at Cincinnati, and from the Memphis Medical College. He practiced at Edmington and Bowling Green, Ky., removing again to Nashville, Tenn., in 1849. In 1852 he established the "Parlour Visitor," and in 1853 became one of the editors of the "Southern Journal of Medical and Physical Sciences," retaining these connections for several years. In 1858 he founded, with other physicians, the Shelby Medical College, becoming professor of materia medica. Later he was given charge of the Academy Hospital, the first Federal hospital established in Nashville after the beginning of the war, and in 1862 was elected superintendent of the Tennessee Hospital for the Insane. He assisted in securing an appropriation for the erection of a separate suitable hospital for insane negroes, and was one of a committee of the county court to build a hospital for the insane and a home for the poor of Davison county. He was also one of a committee of the general assembly for a similar purpose. In 1873 he was a member of the state senate, and, being chairman of the committee on public schools, introduced bills leading to the enactment of the present public school law, the building of two additional institutions for the insane, and the establishment of state normal schools. Dr. Jones was postmaster of Nashville for eight years; president of the city council; director of the First National Bank, of the Capital City Bank, and of the state prison; a member of the state board of education; trustee of three universities; professor of psychological medicine and mental hygiene in the University of Tennessee, serving for more than twenty years as president of the faculty. He was a member of the American Medical Association; the Association of Medical Superintendents of American Institutions for the Insane; the American Association for the Advancement of Science, and the Tennessee State Medical Society. He was married at Nashville, Oct. 27, 1851, to Elizabeth Jane, daughter of Robert B. and Jane G. (Owen) Currey, of Nashville, and had nine children. He died Sept. 25, 1897.

BATTLE, William Horn, jurist and educator, was born in Edgecombe county, N. C., Oct. 17, 1802. He was graduated at the University of North Carolina in 1820; studied law, was admitted to the bar in 1824, and settled in Louisburg, N. C. In 1833 and 1834 he was elected to the assembly from Franklin county, although it was opposed to him in politics. In 1834 he was associated with Thomas P. Devereux as reporter of the supreme court of the state. He continued this work until 1840, and as such assisted in publishing four volumes of law and two of equity decisions. In August, 1840, he was appointed by Gov. Dudley a judge of the superior court, and in November was elected to the same position by the assembly. He removed to Chapel Hill, N. C., in 1843, and was elected in 1845 professor of law in the University of North Carolina, but without salary. He opened a law school, which continued until 1866, and many of the leading lawyers of the state received their professional training under him. In 1848 he was transferred to the supreme court to fill a vacancy caused by the death of Joseph John Daniel. He failed to be confirmed in this position, but was returned to the superior court bench, where he served until 1852, and was then elected to the supreme court bench to fill a vacancy. He occupied this place until 1865, when all offices were declared vacant; was immediately re-elected, and served until 1868. In 1876 he was elected president of the Raleigh National Bank, but returned to Chapel Hill the next year, and was again elected to the professorship of law in the university. Besides the supreme court reports already mentioned, Judge Battle published, in 1832, a second edition of "Haywood's Reports" in two volumes, annotated, and this was followed by reprints of other volumes of the early

reports. In 1833 he was appointed, with Gov. Iredell and Judge Nash, to collate, revise and digest all the public statute laws of the state, beginning with the earliest colonial times. This work was published in two volumes, under the title of "Revised Statutes of North Carolina" (Raleigh, 1837). He published also a "Digest of the Decisions of the Supreme Court of North Carolina," in three volumes (1866), and a "Revisal of the Laws" (Raleigh, 1873). In 1833 the degree of LL.D. was conferred on him by the University of North Carolina. Judge Battle was married in June, 1825, to Lucy Martin, daughter of Kemp Plummer, a prominent lawyer, of Warrenton. They had eight children. Two of their sons died in battle during the civil war. Hon. Kemp P. Battle, professor in the University of North Carolina; Richard H. Battle, of Raleigh, a lawyer, and president of the State Agricultural Society, and Dr. W. H. Battle, of Anson county, are his sons. He died at Chapel Hill, N. C., March 14, 1879.

CREIGHTON, John Andrew, capitalist, was born in Licking county, O., Oct. 15, 1831, son of James and Bridget (Hughes) Creighton. His father, a native of Ireland, came to America in 1805, settling in Ohio in 1813. The son was educated at St. Joseph's Dominican school, near Somerset, Perry co., O., and in 1854 left this institution to engage with his brother in the construction of a telegraph line between Toledo and Cleveland. He also assisted in constructing the North Missouri railway, since part of the Wabash system. After a brief employment in Omaha, Neb., he made two trading trips to Denver, Col., and in 1861 he joined his brother, Edward, in Fort Laramie, Wyo., to construct a telegraph line from Omaha to Salt Lake. In the following spring he purchased 1,000 sacks of flour and other merchandise for trade among the miners along the Salmon river, but heavy rains had made the rivers unfordable, and he then sold his goods to Brigham Young for \$10,000 in gold and a draft of equal value, and went to Omaha, where he purchased a large outfit. In the spring of 1863 he set out with thirty five teams of six yokes of cattle each for Bannack, Mont., where gold had just been discovered. After a journey of 117 days, during which sixty-five of his cattle died, he reached his destination, Virginia City. This venture was exceedingly successful, and within thirty days his cousin, James, who was also his partner in the enterprise, returned to Omaha with \$33,000 in gold. In 1865 Mr. Creighton returned to Omaha. In 1866 he built a telegraph line from Salt Lake to Virginia City, extending it in the following year 120 miles further to Helena. In 1868 he entered into a co-partnership with Francis C. Morgan in the grocery business at Omaha, but in 1873 disposed of his interest in this concern, and embarked at Corinne, Utah, in the business of forwarding merchandise to Montana. Two years later he sold his cattle interests in Wyoming for \$700,000, investing it largely in bank stock and mining properties at Butte City, Montana, and in real estate at Omaha. Mr. Creighton is president of the State Savings Bank at Butte City, and of the Union Stock Yard National Bank at South Omaha, Neb., and is vice-president of the First National Bank of Omaha. He has distributed upwards of half a million of dollars among various religious and charitable institutions in Omaha and its vicinity, and in 1895 Pope Leo XIII. conferred on him the title of Count of the Papal court, a distinction which only one American had previously received. On a former occasion Mr. Creighton had been created a Knight of St. Gregory. In 1900 the University of Notre Dame, Indiana, conferred upon him the Laureate medal. Mr. Creighton was married in Omaha, June 8, 1868, to Sarah E., daughter of David and Emily Wareham.

Vol. XI.—24.

HAUN, Henry P., senator, was born in Scott county, Ky., Jan. 18, 1815. He received an academic education, and applied himself to the study of law at Transylvania University, Kentucky, and was admitted to the bar of that state in 1836. He established himself in the practice of his profession, and was elected attorney for Scott county. In 1845 he removed to Iowa, where he was chosen a member of the convention which framed the constitution of the state in 1846. Four years later he removed to California, where he resided during the remainder of his life, becoming prominent in legal and political circles. He was elected a county judge in 1851, and in 1859 became a member of the U. S. senate, filling the unexpired term of Senator Broderick, deceased. He was a member of the committees on Indian affairs and on territories, serving from Dec. 5, 1859, until March 5, 1860. Mr. Haun was a Democrat, and on that ticket was defeated as the nominee for the governorship of California. He died at Maysville, Cal., May 6, 1860.

CONNES, John, senator, was born in Ireland, Sept. 20, 1821. He emigrated to New York city when only thirteen years of age, learned the trade of piano-maker, and pursued that occupation until the discovery of gold in California, when, in 1849, he removed to that territory with the first emigration. There he engaged in mining and mercantile pursuits, but when the attempt was made by southern men to change the free institutions of the young state and to dominate opinion by strategy and force, Conness joined his efforts to those of Broderick in favor of freedom on the Pacific coast. This, and not personal ambition, brought him to the centre of political action, where he was an important factor up to the period of the civil war. He was a member of the state legislature in 1853, and was re-elected three times. In 1859 he was a candidate for lieutenant-governor, and in 1861 polled 30,944 votes for the office of governor against the 32,751 received by Breckinridge, the winning candidate. Mr. Conness was elected to the U. S. senate in 1863, where he charged himself, first of all, with the support of measures necessary to maintain the national power, and, thereafter, with the changes needed in the fundamental and statute law to maintain the new order of things resulting from the triumph of the national cause. He gave his persistent attention to legislation for the benefit of his state, which had been neglected through the period of bitter controversy since the admission of California into the Union. He served as a member of the committees on finance, the Pacific railroad, post-office and post roads; as chairman of the committee on mines and mining, and was also a delegate to the Philadelphia loyalists' convention of 1866. Immediately after the expiration of his senatorial term in 1869, he made his home in the suburbs of Boston, Mass.

OGDEN, Francis Barber, inventor, was born at Bounton, N. J., March 3, 1783, son of Matthias Ogden (1754-91), and brother of Aaron Ogden (1756-1839), soldiers. At the battle of New Orleans (Jan. 8, 1815), he served as aid-de-camp under Gen. Andrew Jackson. Previously he had studied mechanical science, and is said to have been the first who applied the important principles of the expansive power of steam, and who employed right-angular cranks in marine engines. In 1817 he built, in Leeds, Yorkshire, the first low-pressure

condensing engine with two cylinders, in which the steam worked expansively and the cranks were adjusted at right angles. He had secured a patent for engines constructed on this principle as early as 1813. James Watt declared, upon examination of a model submitted to him by Ogden at Soho, that the combination was certainly original, and that "a beautiful engine" could be made according to the plans. In May, 1837, John Ericsson launched on the Thames the Francis B. Ogden, the first screw-propeller that was introduced into practical use. This towed the American packet-ship Toronto at the rate of five miles an hour. The first screw-propeller used in the United States, the Robert F. Stockton, was an iron boat built at Liverpool under the superintendence of Ogden. Francis B. Ogden was U. S. consul at Liverpool in 1829-40, and then at Bristol from 1840 until his death, which occurred there July 4, 1857.

BANGS, Francis Nehemiah, lawyer, was born in New York city, Feb. 23, 1878, son of Nathan Bangs, a distinguished Methodist divine, who took special care in his early education, supervising it himself until the son entered Wesleyan University, Middletown, Conn. Subsequently he entered the University of the City of New York, at which he was graduated in 1845. After continuing his studies at Yale in 1850, he was admitted to the bar of New York, and with John Sedgwick opened a law office, soon achieving a wide reputation and securing

a large practice in bankruptcy cases. In 1871 his partner was appointed to the bench and retired from the firm, which afterwards became a railroad law firm, and had charge of some of the most important international cases. In the celebrated Czesnola suits and the Havemeyer suits Mr. Bangs achieved considerable prominence, as also in the Grant and Ward failure litigation. He was an indefatigable worker and devoted himself with remarkable assiduity to the interests of his clients. Mr. Bangs was president of the Bar Association of New

York in 1882 and 1883, and was one of its original members. He took a prominent part in the impeachment of Judges Barnard and Cardozo, taking the witness stand against Judge Barnard, who was convicted upon every count upon which Mr. Bangs testified. Mr. Bangs was a fearless advocate and resisted the acts of the judges during the ring misrule. He was a Republican, and a prominent and active member of the Union League Club of New York, of which he was one of the original members. His health failed from overwork, and he sought rest at Ocala, Fla., where he died Nov. 13, 1885.

HAWKINS, John Henry Willis, reformer, was born in Baltimore, Md., Sept. 28, 1797, son of John and Elizabeth (Dorsey) Hawkins, and grandson of John and Susannah (Brown) Hawkins, who came to America in 1773 with their ten children, settling in Baltimore. John H. W. Hawkins was apprenticed to a hatter named Cox, and speedily became a skilled artisan, but the pernicious habit of dealing out spirituous liquors to apprentices which prevailed at that time in hat-making establishments laid the foundation for habits of inebriety which caused him much suffering in later life. In 1814, when the British landed at North point, a few miles from Baltimore, under Gen. Ross, John Hawkins joined the volunteer forces under Gen. Striker, and participated in the struggle which ensued. During the years 1819-21 he visited the West, obtaining employment at various places in

Kentucky, Ohio and Indiana. In 1821 he returned to Baltimore, and in 1822 was married to Rachel, a daughter of Joseph Thompson, of Baltimore. In 1828 he removed to Wheeling, Va., to engage in the manufacture of hats, but was unsuccessful and returned to his native city in 1830-31. In 1832 Mrs. Hawkins died, and two years later he was married to Mrs. Ann Ruth Gibson. Early in 1840 he associated himself with the Washington Temperance Society, originated at Baltimore in the same year, and immediately began to work earnestly in behalf of temperance. He developed a great power of influencing an audience, and so successful were his efforts in the work of reformation that he gave himself wholly to it. In March, 1841, a delegation of the Baltimore Society, of which Mr. Hawkins was one, visited New York, by invitation, to help to arouse the citizens of that place in the cause of temperance. The first meeting was held at the Methodist church in Greene street, Anson J. Phelps presiding. Thousands flocked to the meetings which followed during the space of six weeks, and hundreds of the most debased drunkards were reformed. His next destination was Boston and the surrounding towns, where he accomplished as much good. Later in the same year he attended and addressed the state temperance convention in Maine. His influence was brought to bear on all classes of the community, and his efforts in the cause were indefatigable until the day of his death. His memoir has been published by his son, William George Hawkins. He died at Pequea, Pa., Aug. 26, 1858. His son by his first wife, William George Hawkins, was born in Baltimore, Oct. 22, 1823. He was educated at Wilbraham Academy and at Wesleyan University, where he was graduated in 1848. Desiring to enter the Episcopal ministry, he pursued his divinity course at the Protestant Episcopal Seminary at Alexandria, Va., 1848-51; in the latter year he was made priest, and held rectorships in Maryland, Massachusetts, Pennsylvania, New York and Nebraska. He was editor of the "National Freedman," 1863-66, and later served as chaplain of the Inebriate Asylum at Binghamton, N. Y.; he was also actively interested in domestic missions. In 1885 he was appointed rector of the English and classical school at Beatrice, Gage co., Neb. He has contributed to periodical literature, and has published the "Life of John H. W. Hawkins" (1859); "Lemsford Lane; or, Another Helper from North Carolina" (1863); "History of the New York National Freedman's Association" (1868).

GOODE, John, lawyer and congressman, was born in Bedford county, Va., May 27, 1829, son of John and Ann M. Goode, of English descent. He was educated at the New London Academy and at Emory and Henry College. He studied law with Hon. John W. Brockenbrough, at Lexington, Va., during the winters of 1849-50 and 1850-51, and was admitted to the bar in April, 1851. At the age of twenty-two he was elected to represent Bedford county in the general assembly of Virginia. As a member of the convention of 1861 he voted for the ordinance of secession after the failure of the peace conference at Washington. Volunteering at the outbreak of the civil war, he participated in the first battle of Manassas, and was afterwards assigned to duty on the staff of Gen. Jubal A. Early. His military career, however, was brief; for on Feb. 22, 1862, he took his seat in the Confederate congress, remaining a member of that body until the termination of the war. In the winter of 1865 he opened a law office at Norfolk, Va., and was soon elected to represent that city in the Virginia house of delegates. In 1874 he was elected a representative from Virginia to the 44th congress, and being subse-

quently re-elected to the 45th and 46th congresses, served as chairman of the committee on education, and retired March 3, 1884. He was a presidential elector on the Democratic ticket in 1852, 1856 and 1884, and in the latter year served as president of the electoral college. He was a member of the national Democratic convention in 1868, 1872, 1883 and 1892, and served on the national Democratic committee during 1868-76. He has been a member of the board of visitors of the University of Virginia, William and Mary College, and the Virginia Agricultural and Mechanical College. From May, 1885, until August, 1886, he was solicitor-general of the United States, and in 1893 served as a member of the U. S. and Chilean claims commission, organized under the treaty of Aug. 7, 1892. In July, 1898, he was elected president of the Virginia State Bar Association; in 1901 was unanimously elected president of the Virginia constitutional convention of that year. He was married, in 1855, to Sallie, daughter of R. A. Urquhart, of Isle of Wight, Va., and has four children.

ZÜNDT, Ernest Anton, poet and playwright, was born at Georgenberg, near Mindelheim, in Swabia, Germany, Jan. 12, 1819. Upon graduation at the classical gymnasium, he entered the University of Munich, where he studied philosophy and jurisprudence. Dissatisfied with political and social conditions in Germany, he emigrated in 1857 to the United States and founded in Green Bay, Wis., the Green Bay "Post." The journal was discontinued after ten months, and Zündt removed to Milwaukee, where he became a private teacher, and for one season held the position of stage manager at the City Theatre. Subsequently he succeeded Otto Ruppins as editor of the "Gradua"; worked for the "Herold" and "Banner"; and then served for three years as a teacher in the public schools. Unable to secure a permanent situation, he went to St. Louis and worked there for three years as assistant editor on the "Westliche Post." In 1868 he removed to Jefferson City, Mo., and until 1876 was instructor in German in the public schools. He then returned to St. Louis, and was employed in various smaller official capacities, having to contend against diseases and hardships of various kinds. In 1886-88 he was engaged in editing the "Freie Presse," of Minneapolis, and has since lived with his son in Jefferson City. The numerous poetical productions of Ernst Anton Zündt display a great variety of subjects. He is at his best in his epic-didactical poems, all of which are conceived with considerable broadness and force. His lyrics, often containing political allusions, occasionally recall those of Heine, by their fine irony, graceful, popular style and biting sarcasm. No less successful are his dramas and remodelings of English poems. Zündt published: "Einsame Stunden," poems (1843); "Lucretia," a German rendering of Ponsard's tragedy (1842); "Die Gensensjäger" (1854); "Lyrische und Dramatische Dichtungen," containing: "Jugurtha," a tragedy in five acts, German recasts of Milford's "Rienzi" and of Ponsard's "Galilei" (1871); "Dornröschen," "Aschenbrödel," "Eisfee" (1879); the festival plays: "Lasst uns Frieden Haben," "Columbia am Rhein," "Im Olymp," and others.

ADLER, Cyrus, librarian, was born at Van Buren, Ark., Sept. 13, 1863, son of Samuel and Sarah (Sulzberger) Adler. He was educated at the Philadelphia High School, University of Pennsylvania (B. A., 1883; M. A., 1886) and Johns Hopkins University, where he obtained the degree of Ph. D. (1887), and was consecutively fellow (1885-87) instructor (1887) and associate (1892) in Semitic languages. In 1888 he became honorary assistant curator in the department of Oriental antiquities in the U. S. National Museum

in Washington, and a year later custodian of the section of historic religious ceremonies, which department was subsequently developed by him. In 1892 Adler was made librarian of the Smithsonian Institution. He went to the Orient as special commissioner for the World's Columbian exposition in Chicago, visiting Turkey, Egypt, Tunis, Algiers and Morocco, and also participated in the organization of the U. S. government exhibits at the exposition at Cincinnati (1888), at Chicago (1893), and at Atlanta (1895). For six years (1892-98) he acted as secretary of the American Jewish Historical Society, originated by him, and is now its president. A member of many learned societies, he fulfilled various official duties in some of them, having acted as vice president of the Anthropological Society of Washington, as vice president of the Philosophical Society of Washington, and as trustee of the American Jewish Publication Society. He is a trustee of Gratz College, and was elected, in 1899, a member of the American Philosophical Society. Dr. Adler has assisted in the organization of the international catalogue of scientific literature, having been delegated by the U. S. government to the conference on this subject held in London in 1898. Besides an illustrated catalogue of Biblical antiquities at the Atlanta exposition, published in the "Report of the U. S. National Museum for 1896" (pp. 943-1023, with forty-six plates), and of the Lenquist collection in the National Museum in conjunction with Dr. I. M. Casanovicz, and other papers on Semitic philology, Assyriology, etc., in the journals of the learned societies of which he is a member, he has contributed "Progress of Oriental Science in America during 1888" and "The Shofar: Its Use and Origin" to the Smithsonian publications; has published, with Allan Ramsay, a series of folk-tales, collected in Constantinople, under the title "Told in the Coffee House" (1898), and since 1899 has edited the "American Jewish Year Book." Dr. Adler has charge of the departments of Post-Biblical Antiquities and of the Jews of America in the "Jewish Encyclopedia."

HAVEN, Solomon George, lawyer and congressman, was born in Chenango county, N. Y., Nov. 27, 1810. He was the son of Asa and Sarah (Billings) Haven. His first American ancestor was Richard Haven, who, with his wife, Susanna, emigrated from the western part of England, settling at Lynn, Mass., in 1645. Their son, Moses, was married to Mary Ballou, and had a son named Joseph, who was married to Martha. The next in line, Josiah, was married to Esther Streeter, and his son, Asa, was the grandfather of Solomon. The latter spent his early life on his father's farm, and was educated in the common schools. Afterward he received instruction from a private tutor and began the study of medicine, but abandoned it to gratify his preference for the law. He paid the expenses of his course of study by teaching, and read law during the summer vacations in the office of Gov. John Young, of Genesee, N. Y. In 1835 this arrangement was interrupted by his removal to Buffalo, where he resumed his studies in the office of Fillmore & Hall. He was admitted to the bar in the latter part of 1835, and in the following year became a partner in the firm of Fillmore, Hall & Haven, continuing in this connection for some years. Mr. Haven attained eminence as a lawyer and was prominent in public affairs. He was commissioner of deeds; district attorney of Erie county, N. Y., and mayor of Buffalo. He was a prominent and influential member of the Whig party, by whom he was elected to the U. S. congress three times, serving from 1851 to 1857. He died at Buffalo, N. Y., Dec. 24, 1861.

BAYLIES, Francis, lawyer, was born at Taunton, Bristol co., Mass., Oct. 16, 1783, son of William Baylies, who was born at Uxbridge, Mass., Dec. 5, 1743; was graduated at Harvard in 1760, studied medicine and practiced at Dighton. He was a member of the provincial congress of Massachusetts in 1775 and also of the state convention that adopted the Federal constitution. In 1783 he was a state senator; in 1801 was a member of the electoral college, and in 1805-9 represented Massachusetts in congress. Dr. Baylies was one of the founders of the Massachusetts Medical Society, and a member of the Academy of Arts and Sciences, and of the State Historical Society. The son studied law in the office of his brother, William, and was admitted to the bar. In 1812-20 he was register of probate in Bristol county, Mass.; in 1821-27 a representative in congress from Massachusetts; from 1827 to 1832 a member of the state legislature, and also in 1835. It is said that the only electoral vote for Andrew Jackson from New England was cast by him. In 1832 he was appointed chargé d'affaires to Buenos Ayres. He was the author of "A History of the Plymouth Colony" (2 vols., 1839; new ed., 1866). He died at Taunton, Mass., Oct. 28, 1852.

HANNEGAN, Edward A., senator and diplomat, was born in Ohio, of Irish descent. He received a good education in Kentucky, in which state (at Lexington) his boyhood was passed; was admitted to the bar in his twenty-fourth year, and settled in Covington, Ind. He was frequently elected to the state legislature, and from 1833 to 1837 served in the U. S. congress as a representative from Indiana, being elected on the Democratic ticket. In 1842 he was elected to the senate, and served in that body from 1843 to 1849, during part of that time officiating as chairman of the committee on roads and canals and on enrolled bills. Upon his retirement from the senate he was appointed minister to Prussia, occupying this post from March 22, 1849, until Jan. 13, 1850, when he was recalled. Though eloquent and

brilliant, he was erratic, and in May, 1852, while his brain was befogged by liquor, he killed his brother-in-law, Capt. Duncan. He was never indicted, public sentiment being in his favor. He left the state, settling in St. Louis in 1857, where he died Jan. 25, 1859.

JASTROW, Marcus rabbi, Hebrew scholar and educator, was born at Rogasen, Posen, Prussian Poland, June 5, 1829, son of Abraham and Yetta Jastrow. His father was a merchant, well versed in Hebrew lore, and gave his son a good educational training. Marcus Jastrow first studied under Rabbi Moses Feilchenfeld, taking up religion and Hebrew literature, and then, at the gymnasium of his native city, pursuing a regular course. He afterward entered the University of Berlin, and upon graduation (1855) continued his studies in the University of Halle, where he received the degree of Ph.D. Having for some time served as teacher in a religious school in Berlin, he was, in 1857, called to the ministry as assistant rabbi of a congregation in Warsaw; but his liberal political views aroused the suspicion of the Russian government, and he was expelled from Russia in 1861. Although the edict of banishment was subsequently repealed, Jastrow, who meanwhile became rabbi at Mannheim, in Baden, Germany, did not return until 1863. On the eve of the Polish insurrection, which broke out in 1863, he again left Warsaw, this time forever, and accepted a call from a large congregation at Worms, Hesse-Darmstadt, where he stayed until

1866. In this year he received an invitation to become rabbi of the Rodef Shalom congregation of Philadelphia, which shortly after his arrival elected him its preacher for life. In this capacity he introduced some innovations in the service and a ritual compiled by him. He filled this office until December, 1892, when he retired and was elected rabbi-emeritus. He also held the chair of Talmud, Hebrew philosophy and Jewish history and literature at the Maimonides College (1868-72), and took active part in the educational and charitable affairs of the community. He is a member of many institutions, such as the publication committee of the Jewish Publication Society of America; is one of the vice-presidents of the Jewish Theological Seminary Association of America, and chief editor of the department of the Talmud of the "Jewish Encyclopedia." Jastrow's reputation as a Talmudical scholar and writer extends over the United States as well as abroad, his principal work being "A Dictionary of the Targumim, the Talmud Babil (Babylonian) and Yerushalmi (called Jerusalem), and the Midrashic Literature" (begun in 1886 and issued in parts). He also published "Four Centuries of Jewish History" (German), "The History and the Future of the Text of the Talmud" ("Graz College Publications," 1897), and a number of pamphlets and magazine articles. He was married in Berlin, in 1858, to Bertha Wolffsohn, and has two sons (Profs. Joseph and Morris Jastrow) and three daughters.

JASTROW, Morris, philologist and author, was born in Warsaw, Russian Poland, Aug. 13, 1861, son of Rev. Dr. Marcus and Bertha (Wolffsohn) Jastrow, who emigrated to America in 1866. After a thorough preparatory training in private schools, Morris Jastrow entered the University of Pennsylvania (Sept. 15, 1877), where he was graduated in 1881 with the degree of A. B. The next three years he spent in Germany pursuing rabbinical, philosophical, philological and theological studies at Breslau, Leipzig and Strassburg. Having received the degrees of A. M. and Ph. D. from the University of Leipzig (July 18, 1884) he spent another year in Paris attending courses at the College de France, the École des Hautes Etudes and École des Langues Orientales Vivantes. In 1885 he returned to Philadelphia, and was appointed lecturer in Semitic languages in the University of Pennsylvania; also assistant preacher to the congregation Rodef Shalom. He retired from the pulpit in 1886 and has since devoted himself exclusively to Semitic philology and archaeology. In 1887 he was elected to the chair of Arabic and of rabbinical literature in the University of Pennsylvania, and some years later to that of Semitic languages, which he still (1901) holds. In 1888-98 he was also assistant librarian, and since 1898 has been chief librarian. Prof. Jastrow is chief editor of the department of the Bible of the "Jewish Encyclopedia." Since 1886 he has been an active member of the American Oriental Society, and in 1897 was elected secretary of its newly founded section for the historical study of religions, being elected in the same year also a member of the American Philosophical Society. Prof. Jastrow has contributed about 100 papers of a philological, archaeological and historical nature to the "Proceedings" and "Journals" of the American Oriental Society, "The American Journal of Semitic Languages," "Zeitschrift für Assyriologie," "The American Journal of Theology," "The Century Magazine," "Zeitschrift für alt-Testamentliche Wissenschaft," "The Journal of Biblical Literature," and other periodicals. His chief larger works published separately are: "The Arabic Text of the Grammatical Treatises of Abu Zakariyya Yahyah of Dawyud Hayyug" (1897); "The Religion of Babylon and Assyria" (1898); forming Vol. II of the

series of "Handbooks in the History of Religions" edited by him; "A Fragment of the Babylonian, Dibbarra Epic" (1891), in a series published by the University of Pennsylvania. He is also the contributor of the volume on the book of "Lamentations" to the new "Polychrome Bible," edited by Prof. Paul Haupt, of Johns Hopkins, and of a work on the "Study of Religion" (1901), in the "Contemporary Science Series," edited by Havelock Ellis. Prof. Jastrow was married, Feb. 28, 1893, to Helen, daughter of Herman F. Bachman, of Philadelphia.

JASTROW, Joseph, psychologist, was born in Warsaw, Russian Poland, Jan. 30, 1863, son of Rev. Dr. Marcus M. and Bertha (Wolfsohn) Jastrow, German Jews. When he was three years old the Jastrow family came to America, and settled in Philadelphia. Here he attended private schools and the Rugby Academy. Later (September, 1878), he entered the University of Pennsylvania, and in 1882 was graduated, having taken the mental science prize, with the degree of A.B. He then entered Johns Hopkins University as graduate student of psychology, logic and philosophy, received the degree of A.M. in 1885 and that of Ph.D. in 1886, and was there fellow in psychology (1885-86). After two years he accepted the chair of experimental and comparative psychology in the University of Wisconsin, which position he has since then held. In 1893 he had charge of the official department of psychology at the World's Columbian exposition, and arranged an exhibit of apparatus suitable for psychological investigation, and a working laboratory for the taking of mental tests. This was the first exhibit of its kind, and was awarded a medal. Joseph Jastrow was one of the founders and first secretary of the American Psychological Association, fellow and presiding officer of the anthropological section of the American Association for the Advancement of Science (1891), and is associate editor of the "Psychological Review." He has contributed a large number of essays, papers and psychological treatises of a popular character to special as well as to general periodicals, including the "Popular Science Monthly," "Harpers' Monthly," "Educational Review," "Science," "Dial," "American Journal of Psychology," and "Mind." In addition, he has published: "Time Relations of Mental Phenomena" (1890), and "Fact and Fable in Psychology" (1900). The first is an inquiry into the nature and duration of psychological phenomena. The second is virtually a reprint of a number of essays, most of which originally appeared in the "Popular Science Monthly," with some alterations. The book is an arraignment of all "occult sciences," such as theosophy, spiritualism, palmistry, Christian science and psychical research. Prof. Jastrow was married in Baltimore, Md., Aug. 2, 1888, to Rachel, daughter of Rev. Dr. Benjamin Szold.

HEMMEYER, John Cohn, physician, was born in Baltimore, Md., April 25, 1863, son of John and Mathilde (Ziegler) Hemmeyer, who emigrated from Germany to the United States in 1853, settling in Baltimore. The son attended the public schools of his native city, and after he was graduated at the Baltimore City College in 1881, went to Wiesbaden, Germany, where he became a pupil at the Kaiserliches Gymnasium, also studying at the Fresenius Chemical Laboratory. On returning to America in 1882 he entered the University of Maryland Medical School; was graduated in 1884, and began in the same year to practice in Baltimore. From 1885 until 1888 he served as physician in charge of Bay View Hospital. Since 1899 he has been professor of medicine at the University of Maryland Medical School and director of the clinical labora-

tory. He is also consulting physician to the university and other hospitals. Dr. Hemmeyer's clinical and experimental researches in regard to diseases of the digestive organs have made his name familiar throughout the medical world, his numerous papers on this subject appearing in American, French and German medical and scientific journals. Among his more important contributions to medicine are those relating to the pathological-anatomic histology of gastric hyperacidity, which was formerly considered a pure neurosis of the stomach, certain forms of which he has proved are due to an increased number of acid cells in the peptic ducts, there being an atrophy of the cells in subacidity. He originated and introduced a method of intubating the duodenum, by which it is possible to investigate directly the upper part of the small intestine, and his researches concerning the early diagnosis of cancer of the stomach are of great value to physicians and have been confirmed by German clinicians. He is the associate editor of the "Archiv für Verdauungs Krankheiten," published in Berlin. His published works are: "The Special Pathology and Treatment of Organic Diseases of the Stomach" (1897); "Diseases of the Stomach" (1897; new ed., 1898), concerning which Prof. Boas, of Berlin, says: "It is the best contemporary treatise on diseases of the stomach which we possess, not only in America but in the whole world"; "Diseases of the Intestines," in two volumes (1901); a monograph on the "Physiological Effects of Ergot and its Clinical Applications" (1889); a biography of Theodore Billroth and a review of this author's work on the "Psychology of Music" (1901), besides some forty papers published in Europe and America, and numerous contributions to medical journals. While in Wiesbaden Dr. Hemmeyer studied the theory and harmony of music with H. Jahm, director of the Imperial Opera, and he has since written many numbers for the piano and voice, as well as for full orchestra and mixed chorus. His cantata entitled "Hygiene," for full orchestra and male chorus, was first produced in Baltimore at a convention of the American Medical Association in 1896. He has also composed a musical setting for the 33d Psalm for full orchestra and chorus. Dr. Hemmeyer received the degree of Ph.D. from Johns Hopkins University in 1890. He is a member of the University, Johns Hopkins and Germania clubs, of Baltimore; of the Medical-Chirurgical Faculty of Maryland; of the Baltimore Medical and Surgical, Maryland Clinical and Johns Hopkins medical societies, and of the Baltimore Medical Journal Club; honorary member of the Tri-State Medical Association of the Carolinas and Virginia; president of the American Gastro-Enterological Association; also honorary member of several musical societies. He was married, Jan. 18, 1893, to Helene E., daughter of Charles Hilgenberg, of Baltimore.

J. C. Hemmeyer

PITKIN, Timothy, lawyer, was born at Farmington, Hartford co., Conn., Jan. 21, 1766, son of Timothy Pitkin, who was pastor of the Congregational Church in that town. His grandfather, William Pitkin, was governor of Connecticut in 1766-69; his uncle, also named William, was major in the expedition against Canada in 1758; a congressman in 1784, and was chief justice of the supreme court of Connecticut for nineteen years. Timothy was grad-

PITKIN, Timothy, lawyer, was born at Farmington, Hartford co., Conn., Jan. 21, 1766, son of Timothy Pitkin, who was pastor of the Congregational Church in that town. His grandfather, William Pitkin, was governor of Connecticut in 1766-69; his uncle, also named William, was major in the expedition against Canada in 1758; a congressman in 1784, and was chief justice of the supreme court of Connecticut for nineteen years. Timothy was grad-

uated at Yale College in 1785, devoted much time to the study of astronomy, and calculated the eclipses of 1800. He studied law and was admitted to the bar; in connection with his practice, he engaged early in political life; was for several years a member of the state legislature, and was speaker of the house during five sessions. He was a representative in congress from 1805 to 1819, and during his term was considered an authority on the political history of the United States. On leaving congress he was again elected to the state legislature. In 1829 Yale conferred on him the degree of LL.D. He was the author of "Statistical View of the Commerce of the United States" (1816; 3d ed., 1835), and "A Political and Civil History of the United States" (2 vols., 1828). He died Dec. 18, 1847, at the home of his son, Hon. Timothy Pitkin, in New Haven, Conn.

BURBANK, Luther, horticulturist, was born at Lancaster, Worcester co., Mass., March 7, 1819, son of Samuel W. Burbank, a farmer and manufacturer, whose ancestors emigrated to Massachusetts from the north of England before the revolutionary war. His mother, Olive Ross, was of Scotch descent and was a native of the adjoining town of Sterling. Luther Burbank was educated at Lancaster Academy. At the age of eighteen he went to Worcester, Mass., to learn wood turning and pattern making in the shops of the Ames Plow Co., and for three years was

in the employ of that company, but found the work increasingly distasteful and too confining for one accustomed to living in the open air. He had been a lover of nature from his childhood, and the study of horticulture had had especial attractions for him. Naturally, therefore, on changing his occupation he turned to one that was wholly congenial, and buying a twenty-acre farm at Lunenburg, Mass., he began experiments with fruits, vegetables and flowers, with the object of producing new species and varieties. The well-known Burbank potato was one result of his efforts in this direction. A warmer climate than that of New England being essential to continuous work, Mr. Burbank removed to Santa Rosa, Cal., in 1878, establishing his principal experimental grounds near Sebastopol in the same county (Sonoma), where every condition of soil and climate best suited to the work of propagation was found. Here fruits, flowers, vegetables, grains, trees, shrubs and grasses have been developed or created; such wonderful results being secured within a short period of time that Mr. Burbank is not inaptly called the wizard of horticulture. Many new chestnuts and walnuts have been added to the lists of those trees; among the latter a Persian walnut that bears nuts of superior quality when only four years old. A plum-tree, the Delaware, has been produced, bush-like in form and only a few feet high, and an improved beach plum with fruit disposed like huckleberries along the branches. Another plum, the Burbank, is so well adapted to various climates that it is now well known in many lands, and has supplanted most other varieties in New Zealand and South Africa, where it ripens in February. Among the many varieties of plum that owe their origin to him are one five or six times as large as the French prune from which it was developed; a golden plum twelve times the size of the original; the Wickson, as large as a turkey's egg; another, the flesh and skin of which as well as the leaves

and twigs of the tree are blood-red; a seedless plum, and still more remarkable a Plum-cot, combining the flavor and characteristics of a plum and an apricot. Many hybrids have been obtained by crossing with Japanese and eastern American varieties. From the Siberian raspberry and the Californian dewberry, which is a hybrid, the "Primms," has been evolved; from the common raspberry and blackberry a red hybrid; still another fruit is a white blackberry. Many of Mr. Burbank's most remarkable results have been obtained with flowers. By crossing the common American field daisy with a common European species, and the result with a Japanese species he developed by rigid selection for a number of years the Shasta daisy, with several rows of petals and with flowers over four inches across. An amaryllis nearly a foot in diameter, a perennial sweet pea, improved roses, cannas and poppies a calla lily three feet in circumference, and another only one inch in diameter, and many other flowers bear further witness by their unusual coloring, size or fragrance to Mr. Burbank's skill. His extensive gardens, whose fame has become worldwide, constitute one of the chief attractions of that part of the state, and at one time 80,000 lilies, representing a value of \$250,000, were to be seen there in full bloom. No horticulturist has ever worked on so vast a scale nor in so scientific a manner in this line as he. The benefits he has conferred upon mankind will be better appreciated a generation later, for the life of one man is too short to show the full results. He is unmarried.

CAMPBELL, Francis Joseph, instructor of the blind, was born in Franklin county, Tenn., Oct. 9, 1832, son of James and Linda C. (Robinson) Campbell. While at play one day in early childhood a thorn pierced his eye-ball and the accident resulted in his total blindness. He learned to help his father about the farm, but did not go to school until he was nearly twelve years old, when he was placed in an institution for the blind just opened at Nashville. Joseph learned rapidly, and though at first unable to tell one tune from another, took the first prize for piano playing after fifteen months of study, and when eighteen years of age was appointed teacher of music in the Tennessee State Institution for the Blind; while holding this position he took private lessons at the Nashville University. Subsequently he entered the Normal School at Bridgewater, Mass., to study improved methods of teaching, afterward going to the Wisconsin Institution for the Blind, where he taught music. Mr. Campbell returned to Tennessee, but was boycotted for being an abolitionist; consequently he went back to Massachusetts and was appointed professor of music at the Perkins Institute, South Boston. Here he was very successful, but his strength became overtaxed, and through the kindness of Dr. Howe, of the Perkins Institute, and others, a two years' trip to Europe was planned. The musicians of Boston united to give him a farewell orchestral concert, from which a handsome sum was realized. He went first to the conservatory in Leipzig, and afterwards studied with both Kullak and Tausig. While attending a meeting of the blind in London, in 1871, at which Dr. Campbell was deeply impressed by the fact that most of the persons present were objects of charity, because they had not been taught to help themselves, he decided to remain in that city and do something for these unfortunates. After conferring with Dr. Armitage, the founder of the British and Foreign Association for Promoting the Education of the Blind, who contributed £1,000, an experimental school was opened, March 1, 1872. Dr. Campbell succeeded in so interesting the marquis (afterwards duke) of Westminster in the work

mate than that of New England being essential to continuous work, Mr. Burbank removed to Santa Rosa, Cal., in 1878, establishing his principal experimental grounds near Sebastopol in the same county (Sonoma), where every condition of soil and climate best suited to the work of propagation was found. Here fruits, flowers, vegetables, grains, trees, shrubs and grasses have been developed or created; such wonderful results being secured within a short period of time that Mr. Burbank is not inaptly called the wizard of horticulture. Many new chestnuts and walnuts have been added to the lists of those trees; among the latter a Persian walnut that bears nuts of superior quality when only four years old. A plum-tree, the Delaware, has been produced, bush-like in form and only a few feet high, and an improved beach plum with fruit disposed like huckleberries along the branches. Another plum, the Burbank, is so well adapted to various climates that it is now well known in many lands, and has supplanted most other varieties in New Zealand and South Africa, where it ripens in February. Among the many varieties of plum that owe their origin to him are one five or six times as large as the French prune from which it was developed; a golden plum twelve times the size of the original; the Wickson, as large as a turkey's egg; another, the flesh and skin of which as well as the leaves

that he gave £1,000 towards founding a school at Mount street, Westow, Upper Norwood, London. Others joined in the effort, and by October the pupils were removed to the new location. The enlarged institution has become celebrated throughout the world, under the name of the Royal Normal College for the Blind. It embraces a preparatory, a grammar and a high school, a technical school and an academy of music. The course of instruction includes gymnastics, dancing, military drill, swimming, skating, rowing, cycling and other sports. The training in each of the five schools is directed toward preparing the blind for self-support. Dr. Campbell is hampered little by his loss of sight, as is shown by the fact that he made a successful ascent of Mont Blanc; he has also climbed the Jungfrau and Eiger, and even attacked the Matterhorn being the first blind man to accomplish that feat. He is a fellow of the Society of Arts; of the Royal Geographical Society; LL.D. of Glasgow University; officer of the French Academy. He was married, in 1856, to Mary F. Bond, of Bridgewater, Mass. His wife died in England in 1873. He was married, a second time, to Sophia E. Faulkner, of South Acton, in 1875.

ARNOLD, Isaac Newton, lawyer, congressman and historian, was born at Hartwick, Otsego co., N. Y., Nov. 30, 1813, son of George Washington and Sophia (Mason) Arnold. His earliest ancestor in America, Thomas Arnold, came from Melcombe, England, and settled in Rhode Island. From him the line of descent runs through John, Jonathan and Thomas, who was Mr. Arnold's grandfather. His parents were born in Rhode Island, but about 1800 removed to western New York, where his father was a physician in good standing. The son attended the Hartwick Seminary until he was fifteen years of age, when he divided his time between teaching in a district school and studying law in the office of Richard Cooper, and later of Judge Morehouse, both of Cooperstown, N. Y. After he was admitted to the bar, in 1835, he practiced law in partnership with Judge Morehouse for a short time. In 1836 he removed to Chicago, Ill., where he was associated with Mahlon D. Ogden as a law partner, and in 1841 was admitted to the bar of the supreme court of Illinois. In 1837 he was elected city clerk. Becoming actively interested in politics, he strongly opposed the policy of repudiating the state debt, which had been incurred in connection with the Illinois and Michigan canal, then only partly completed; and on his election to the state legislature, in 1842, he succeeded in having the canal bill passed; as chairman of the committee on finance making an elaborate report advocating taxation. In 1844 he was a presidential elector on the Polk ticket, and in the same year was re-elected to the legislature, returning to the practice of his profession in 1846. In 1848 he was a delegate to the Buffalo convention, and helped to organize the Free-soil movement, with four others calling a state convention at Ottawa, Ill., which nominated a Van Buren and Adams electoral ticket, and opened the first formidable anti-slavery campaign in Illinois. In 1855 he was again elected to the legislature and in 1860 to the 37th congress, where he was honored during his first session by being chosen to pronounce the eulogy on Stephen A. Douglas after the latter's death. Mr. Arnold's first speech of a political nature advocated the confiscation of the secessionists' property and the liberation of slaves. He voted for the bill abolishing slavery in the District of Columbia, and in March, 1862, introduced a bill prohibiting slavery in every place under national control, which was passed after much opposition. In February, 1864, he introduced a resolution confirming Pres.

Lincoln's emancipation proclamation, and declaring that the constitution should be so amended as to prohibit slavery. This was the first step taken by congress in favor of the abolition of slavery. The bill passed both houses Feb. 1, 1865. At the battle of Bull run Mr. Arnold was aid to Col. Hunter, and was active in caring for the wounded. While in congress he served as chairman of the committees on the defenses and fortification of the Great lakes and rivers, and on manufactures. He declined a re-nomination in 1861, but in 1865 accepted the appointment from Pres. Johnson as auditor of the treasury of the post-office department, residence in Washington affording him ready access to documents necessary in the preparation of his work, "The History of Abraham Lincoln and the Overthrow of Slavery in the United States." Differing with Pres. Johnson as to the latter's policy, he resigned in 1867 and returned to Chicago, where he completed his book. In 1873 he resumed practice, but after two or three years was compelled by failing health to retire, and from that time turned his attention entirely to historical literature. In 1880 he published his "Life of Benedict Arnold; His Patriotism and His Treason," actuated by the desire to make known Arnold's "patriotic services, his sufferings, his heroism, and the wrongs which drove him to a desperate action." Family letters and manuscripts gave him material for the last twenty years of Arnold's life. Beside these works and his "Recollections of the Early Illinois Bar" (1880), he published many interesting and valuable historical sketches. He was one of the founders of the Chicago Historical Society; was its vice-president for many years, and its president from 1876 until his death. Among the treasures of the society was the original manuscript of the emancipation proclamation, given to Mr. Arnold by Pres. Lincoln. This was destroyed by the great fire of 1871. Mr. Arnold was married: first, to Catherine E. Dorrance, of Pittsfield, Mass.; second, to her sister, Harriet Augusta Dorrance, by whom he had nine children. He died in Chicago, April 24, 1884.

HAVILAND, John, architect and civil engineer, was born near Taunton, England, Dec. 15, 1792. He studied his profession with Elmes, the eminent writer upon architecture. In 1815, by invitation of his uncle, Count Mordwinoff, minister of marine to the Czar Alexander, he entered the Russian imperial corps of engineers, but meeting there Admiral Sontag, an American, then in the Russian service, he was induced to emigrate to the United States in 1816, where he attained eminence as an architect. He introduced the radiating form in the construction of prisons, and first applied this form of architecture to the Pittsburgh Penitentiary. Later he built the Eastern Penitentiary at Cherry hill, Philadelphia, which became the model for all subsequent buildings of a like nature. His plans were highly commended by commissioners from England, France, Russia and Prussia, deputed by their governments to examine structures which were attracting the attention of the civilized world. Among the public buildings constructed from plans made by Mr. Haviland were the Hall of Justice, at New York; the United States Naval Asylum, at Norfolk; the New Jersey State Penitentiary; the state penitentiaries of Rhode Island and Missouri, the Albany, Lancaster, Berks county, Pa., and many other jails; the Deaf and Dumb Asylum, Philadelphia, Pa.; the State Insane Asylum, Harrisburg, Pa.; the United States mint, Philadelphia; the county hall, Newark, and hall of justice, New York, as well as many churches and private residences. He published, with Hugh Bridgeport, the "Builders' Assistant, for the Use of Carpenters and Others" (1818). He died in Philadelphia, Pa., March 12, 1852.

JACKSON, Andrew, first territorial governor of Florida (1821) and seventh president of the United States. (See Vol. V., p. 289.) Spain ceded Florida to the United States, Feb. 22, 1819, and Pres. Monroe appointed him governor in 1821, but he held the office only a few weeks.

DU VAL, William Pope, second territorial governor of Florida (1822-34), was born at Mt. Comfort, near Richmond, Va., in 1784, son of William and Ann (Pope) DuVal. The first American ancestor was Mars Marin DuVal, a Huguenot refugee who emigrated from France about 1645 or 1650, settling in Maryland. His son, Daniel, removed to Virginia, and was one of the first settlers of Manakin Town. Daniel's son, Samuel, who became a general of minute-men in the revolution, was married to Lucy Claiborne, the fifth in descent from William Claiborne, who emigrated from England to Virginia with Gov. Sir Francis Wyatt in 1621. Their son, the father of Gov. DuVal, was an able lawyer, who became associated with Patrick Henry in the conduct of the famous British debt cases; and as a patriot he accompanied the earliest troops to Williamsburg, Va., in 1775. He attained the rank of captain, and later became a major of riflemen, in which capacity he captured a British vessel by firing down upon her decks from the bluffs above, while she was becalmed on the James river. His wife, Ann, was the daughter of John Pope, and the great-granddaughter of Nathaniel Pope, of Pope's creek, Va., whose daughter, Anne, was married to Maj. John Washington, the ancestor of Pres. Washington. William Pope DuVal received his early education in his native place; but, finding his home life unhappy, obtained the reluctant consent of his father, and at the age of fourteen set out afoot for the frontier, declaring that he would not return until he could do so as a congressman from Kentucky. After a wild life in the woods he finally settled at Bardstown, where he studied law, and was admitted to the bar when not quite twenty. Though starting with the poorest of circumstances, he soon gained legal success, and the intense humor of his nature brought him into wide popularity. He served as a captain of mounted rangers in 1812, soon after which he was elected to the 13th congress (1813-15), as a representative from Kentucky. After his congressional term he returned to Bardstown, and resumed practice. He was a member of a club called the Bardstown Pleiades, the others being George Wickliffe, Ben Hardin, Ben Chapeze, Felix Grundy and Hays. In 1822 he was appointed governor of Florida territory by Pres. Monroe. Being reappointed to this office by presidents Adams and Jackson, he served continuously until 1834. He won the

admiration and confidence of the Florida Indians, by whom he was regarded as a sort of William Penn; but he exercised a greater decision in dealing with them, and never hesitated to punish any whites who infringed the rights of the Indian. So completely had he won the confidence of the savage race that at one time during the Seminole war the Indians agreed to sign a certain treaty and move to Indian territory, provided they could have the personal reassurances of Gov. DuVal. In 1848 he removed to Texas, which was his home at the time of his death. He was a personal friend of Washington Irving, who wrote the romance of his early life as "Ralph Ringwood." James K. Pauling also wrote of him, as "Nimrod Wildfire." A county in the state perpetuates his name. He was married, in 1804, to Nancy, daughter of Col. Wm. R. Hynes. She died in 1841, leaving seven children: Elizabeth, Harrison, Thomas Howard, John Crittenden, Marcia, Mary, Laura and Florida. Burr and John C. DuVal were captured with Fannin's entire command of 500 men during the Texan war, and Burr was killed in the massacre of Goliad that followed, March 27, 1836. Burr DuVal had had considerable experience hunting with the Florida Indians, and he begged Col. Fannin not to surrender, but leave the prairie and push on to the woods near by, for there, he said, he could whip the whole Mexican force with his Kentucky riflemen alone. On Fannin's signing the capitulation, Burr said: "Sir! you have not only signed your death warrant, but the death warrants of all of us." It turned out so. The Mexicans played a treacherous trick and shot all but John C. DuVal and two others, who escaped by swimming across the Colorado river. Thomas DuVal was for many years U. S. district judge. Gov. DuVal died in Washington, D. C., while on a visit to that city, March 19, 1854.

EATON, John Henry, third territorial governor of Florida (1834-35) and secretary of war under Jackson. (See Vol. V., p. 295).

CALL, Richard Keith, fourth and sixth territorial governor of Florida (1835-40; 1841-44), was born at Pittsfield, Prince George co., Va., in 1791, son of Capt. William and Helen Meade (Walker) Call, and nephew of Maj. Richard Keith Call, who served in the revolutionary army and was one of seven men who cut their way through the British cavalry at Charleston, May 6, 1780. Capt. William Call was also a revolutionary soldier. His son, Richard, was educated at the old Fields' School and at Mt. Pleasant Academy. When the Creek war broke out he left the latter school to join the military force commanded by Gen. Jackson, and took part in every action of that campaign. It was

impossible to keep the men properly provisioned in that frontier wilderness, and they were often mutinous from hunger. Call was almost the only one who remained on duty continuously, and when the trouble was over Gen. Jackson showed his appreciation by sending the young man back to school. On July 15, 1814, Jackson secured him the appointment as first lieutenant in the 44th infantry, U. S. army. He was promoted to brevet captain on Nov. 7th of the same year. At the battle of New Orleans he was special aid to Gen. Jackson, and was volunteer aid to him in April, 1818. In July, 1818, he was made captain and served until May 1, 1822, when he resigned, having fought side by side with Gen. Jackson through every battle in which the latter participated. He settled in Pensacola and entered upon the practice of law. In April, 1822, he was a member of the legislative council of Florida; in 1823-25 he served as a delegate to congress, and in 1825 he was receiver of the west Florida land office. In January, 1823, he became brigadier-general of the west Florida militia. In 1835 he was appointed governor of Florida. The war with the Seminoles breaking out, he devoted himself to raising troops for defense, and was commander-in-chief from Dec. 6, 1835, to Dec. 6, 1836. Gen. Call defeated the Indians and routed them from Withlacoochee in the second and third battles of Wahoo swamp, and it is said that he personally saved Gen. Clinch and his command from being cut to pieces. His persistent appeals to the Federal government for help to subdue the hostile Indians brought him into conflict with Joel R. Poinsett, secretary of war in Van Buren's cabinet, and the controversy led to his removal from office in 1839. Though a Democrat, he at once began canvassing in the North for Harrison, then a presidential candidate, and he was largely instrumental in securing the latter's election. In return Pres. Harrison reappointed him as governor in 1841, and he held this position until 1844. In the following year, when Florida became a state, he was a candidate for governor, but his part in the election of a Whig president influenced the people against him, and he was defeated despite the sacrifices he had made to protect the citizens of Florida during the Seminole war. From July 1 to Dec. 8, 1846, he was major-general of state militia. In the development of Florida he took the greatest interest. He built the third railroad in the United States, from Tallahassee to St. Marks on the Gulf of Mexico, and he also founded the town of Port Leon, which was eventually destroyed by a cyclone. From the first Gov. Call fought secession, looking on it as treason, and lent his eloquence and fortune to prevent the separation, though he defended the institution of slavery. He was married at the Hermitage (Gen. Jackson's home), near Nashville, Tenn., in 1824, to Mary Letitia Kirkman, of Nashville, Tenn. Their daughter, Ellen Call Long, who has had exceptional opportunities for acquiring historical information about her native state, is the author of a comprehensive history of Florida not yet published. Gov. Call died at Tallahassee, Fla., Sept. 14, 1862.

REID, Robert Raymond, fifth territorial governor of Florida (1840-41), was born in Prince William parish, S. C., Sept. 8, 1789. His early education was received in the schools of Augusta, Ga., and upon completing this course he entered Columbia College, later studying law and practicing it in Georgia. Before he was nineteen years of age he was selected to deliver a public address in Augusta, on the anniversary of Franklin's birthday, Jan. 16, 1808, and the manuscript of this speech shows the solid order of his abilities and the maturity of his style, though still a minor. In 1813 he delivered an Independence Day address, which was published at the re-

quest of the citizens of Augusta. At the early age of twenty-seven he was appointed judge of the Burke county superior court, and retained this office until 1819, when he took his seat in the 16th congress as a representative from Georgia, being re-elected for the following term, thus serving until 1823. While in the house of representatives a notable speech was delivered by him, Jan. 28, 1820, on "the restriction of slavery in Missouri," fully anticipating the controversy which later developed. Soon after his retirement from congress he was again appointed to the bench, this time as a judge of the middle circuit, and remained in this charge until a change in the state legislature in 1825, when he resumed the practice of his profession, appearing in many important cases. In February, 1827, he was appointed presiding judge of the court of Augusta, was re-elected by the legislature in November, 1829, and continued in that office until May, 1832, when he received a commission as U. S. judge for the district of East Florida from Pres. Jackson, for whom he had voted as presidential elector in 1828. This commission was renewed in 1836, and he continued to hold the office until December, 1839, when he was appointed by Pres. Van Buren governor of the territory of Florida. In this latter office he served until 1841, and as governor presided at the convention which formulated the state constitution. Gov. Reid was not only a jurist of profound legal and oratorical talent, but a man of high moral sense and tender sympathies. He was married, in 1811, to Anna Margaretha McLaws, who died, Sept. 7, 1825, leaving two sons and three daughters; and he was married the second time, May 8, 1829, to Elizabeth Napier Delphia Virginia Randolph, of Columbia county, Fla. Gov. Reid died in Leon county, near Tallahassee, Fla., July 1, 1841.

BURANCH, John, seventh territorial governor of Florida (1844) and secretary of the navy under Pres. Jackson. (See Vol. V., p. 295.)

MOSELEY, William Dunn, first state governor of Florida (1845-49), was born at the family homestead, Moseley Hall, Lenoir co., N. C., Feb. 1, 1795, son of Matthew and Elizabeth (Herring) Dunn. His earliest ancestor, William Moseley, came to this country in 1649, and settled in Princess Anne county, Va. From him the line of descent runs through his son, Arthur; his son, Edward, and his son, Tully, who was Gov. Moseley's grandfather. His father removed from Virginia to Lenoir county, N. C., where he was a planter. The son, after obtaining a fairly good English education at a neighboring academy, worked on his father's farm for several years. At the age of eighteen, desiring a collegiate education, he taught a small school near his home, and his earnings, together with some assistance, enabled him to enter the University of North Carolina. Among his classmates were James K. Polk, William M. Green (afterward bishop of Mississippi), John Y. Mason and W. H. Morrison, but at the end of the first year young Moseley received the highest honors over these clever students. His funds gave out at the close of his junior year, but Dr. Caldwell offered him a tutorship in the college, and he finished his course, being graduated in 1818. In 1819 he began the study of law at Wilmington, N. C., was admitted to the bar, and began to practice there. He soon became active in political affairs, and in 1829 was elected, without opposition, as a member of the state senate, where he served by re-

elections until 1836. On account of his ability as a parliamentarian he became president of the senate in 1832, and remained as such during his service in that body. In 1834 the Democratic party nominated him for governor of North Carolina, but David L. Swaine defeated him by three votes. In 1835 he bought a plantation on Micosoukie lake, Jefferson county, Fla., and resided there until 1851, except when called away by public duties. In 1840 he was elected a representative in the territorial legislature, and in 1844 to the state senate, receiving the largest vote ever given a candidate at that time. In 1845, while the legislature was in session, Florida was admitted to the Union, and each party nominated its ablest man for governor. Mr. Moseley was the Democratic candidate in opposition to Richard Keith Call, who had been territorial governor in 1841-44. After a vigorous campaign, Moseley was elected, and was inaugurated in June,

1845. He remained in this office until October, 1849. As the state law prohibited re-election, he then retired from public life, and returned to his plantation, which he cultivated until 1851, when he removed to Palatka, Fla. He was married, in 1822, to Susan, daughter of Col. Thomas H. Hill, of Wilmington, N. C., by whom he had six children. She died in 1842. Gov. Moseley's death occurred at Palatka, Fla., Jan. 4, 1863.

BROWN, Thomas, second governor of Florida (1849-53), was born in Westmoreland county, Va., Oct. 24, 1785, son of William and Margaret (Templeman) Brown. His great-grandfather, Edward Brown, came from England to Virginia with John Smith in 1606. Edward's son, William, removed to Westmoreland county, and was the grandfather of Thomas Brown. His maternal grandfather, Capt. Templeman, was the commander of a ship sailing from White Haven, England, and was engaged in the American trade. Thomas attended school for a short time at Alexandria, and afterward at Charlestown, Jefferson co., Va., until 1812, when he enlisted in the army. He was aid to Gen. John P. Hungerford during the occupation of Washington city and Alexandria, and served through the war until the army was disbanded in 1814. He first entered the mercantile business with a brother at Alexandria, and subsequently became chief clerk in the post-office at Richmond, Va. In 1817 he was elected to the Virginia legislature, where he represented Fauquier county. In 1828 he removed to Florida with his family, and settled in Tallahassee, which became his permanent home. He owned a large number of slaves, and his kindness to them is remembered to this day by such of the old family servants as still survive. In 1845 he was elected a member of the state legislature, and in 1849 he became the second governor of Florida after the state was admitted to the Union. He held the executive office for the full term of four years. For more than sixty years Gov. Brown was an active Mason, attaining the thirty-third degree, and filling the position of grand secretary in the Tallahassee lodge for a long period. He compiled a valuable and interesting book on Masonry. He was married, in 1809, to Elizabeth, daughter of Thomas Simpson, of Westmoreland county, Va. She was born at Newcastle-on-Tyne, England, and when a small child was brought to this country by her parents. Gov. Brown had by her seven children, of whom one

daughter, Elizabeth Brown Douglas, is now (1901) living at the age of eighty-four. He died in Tallahassee, Fla., Aug. 24, 1867.

BROOME, James E., third governor of Florida (1853-57), was born at Hamburg, Aiken co., S. C., Dec. 15, 1808, son of John and Jeanette (Witherspoon) Broome. His father was born in England, Jan. 5, 1774, and came to this country in 1785. His mother was a near relative of John Witherspoon, signer of the Declaration of Independence. In 1837 James Broome removed to Tallahassee, Fla., where he engaged in the mercantile business until about 1841, when he retired. Such was his reputation for honesty and ability, that in 1843 he was appointed judge of the probate court of Leon county by Gov. Richard K. Call, although the latter was of an opposing political party; he held this office until 1848, when he voluntarily resigned it. In 1852 he was nominated for governor by the Democratic party, and while the state was controlled by the Whigs at that time, by his earnestness as a speaker and his thorough acquaintance with the tariff, then the main issue, he defeated Col. George T. Ward, the Whig candidate. Gov. Broome was an ardent supporter of the doctrine of states-rights, being a secessionist as early as 1850. He was known as the "veto governor" of Florida, because he vetoed more bills than any of his predecessors, every veto being sustained. His veto to abolish the supreme court of the state is said to be the most masterly effort of the kind that ever left the executive office. When the stirring days of actual secession began, his counsel was needed, and the Democrats of Nassau county elected him to the state senate, where he served for four years to the entire satisfaction of his constituents. He had one of the largest plantations in the state, and devoted much of his time to its interests; he was also at one period engaged in wholesale mercantile business. In 1865 he removed to New York city, residing there and in Brooklyn the remainder of his life. Gov. Brown was married five times. He died while on a visit to his son, at Deland, Fla., Nov. 23, 1883. He left three children.

PERRY, Madison S., fourth governor of Florida (1857-61). On Nov. 26, 1860, the legislature of Florida met in regular session, and on the same day Gov. Perry addressed a message to the two houses, declaring his opinion that the election of Lincoln and Hamlin, viewed in connection with the circumstances that led to it, made the only hope of the southern states for domestic peace and safety, future respectability and prosperity, dependent upon their immediate secession from the Union.

MILTON, John, fifth governor of Florida (1861-65), was born near Louisville, Jefferson co., Ga., April 20, 1807, son of Gen. Homer Virgil and Elizabeth (Robinson) Milton. His great-grandfather, John Milton, settled in Halifax county, N. C., about 1730. Family tradition says that he was a lineal descendant of Judge Christopher Milton, brother of John Milton, the poet. Capt. John Milton, Gov. Milton's grandfather, was a patriot and a soldier in the revolution. At the surrender of Fort Mower he was taken as a hostage and was confined for many months in the old Spanish fort at St. Augustine. He was a charter member of the Society of the Cincinnati; was the first secretary of Georgia, and served for several terms, and received the vote of Georgia for first president of the United States. The grandson received a good English education at the Louisville Academy, studied law under Roger L. Gamble, and began to practice at Louisville. After a year or two he removed to Columbus, Ga., and there ran for congress on the nullification question, but was defeated. Later he had a large legal practice in Mo-

bile, Ala., and during the Seminole war in Florida served from 1835 to 1837 as captain of a volunteer company. He afterward practiced at Marion, Ala., and in New Orleans. In 1846 he removed to Jackson county, Fla., where he settled on a farm, only appearing in court occasionally. Entering politics, he became a leader of the Democratic party in that state. He was a presidential elector in 1848, and spoke in every part of Florida, becoming known to the people as an orator and a statesman. In 1849 he was elected to the state senate. He wielded a powerful influence in every election from 1846 to 1860, and in the latter year was elected by a large majority governor of Florida for the term of four years. He favored a Confederacy, not only for the protection of state

rights, but to preserve the rights of property in slaves, and when the civil war began he gave it support and material aid. In January, 1861, he seized the U. S. arsenal at Apalachicola, forts Marion and Augustine, and the navy yard at Pensacola. At a state convention held Jan. 12th it was voted that Florida secede from the Union, and she was the third state to do so. During 1862 Ferdinandina was captured by the Dupont expedition, and shortly afterward St. Augustine surrendered without a struggle, followed by the surrender of Jacksonville and

John M. Davis

Apalachicola. In 1864-65 repeated calls for men and provisions were made on the Confederate states, almost draining them of these resources. Through the influence of Gov. Milton, and without regard to age or exemption, the citizens of Florida enlisted, leaving barely enough men at home to guard the state from invasion. Tallahassee was an objective point, and in March, 1865, the Federal troops landed at St. Marks, but were repulsed at the Natural Bridge and were forced to re-embark. Similar attempts were made elsewhere, and these attacks, together with the knowledge that the Confederacy was growing weaker, greatly distressed Gov. Milton. This constant care, aggravated by mental work, produced softening of the brain and caused his death eight days before the surrender of Gen. Lee. Gov. Milton's rare social qualities, seconded by his tact and sympathy, contributed much to his popularity. His conversation was full of wisdom and wit, while his knowledge of state and national measures was prodigious. By descent he was a member of the Society of the Cincinnati. He was married: first, to Susan Amanda Cobb, of Athens, Ga., by whom he had one son and two daughters; second, to Caroline Howze, of Marion, Ala., by whom he had two sons and seven daughters. He died at his home, near Marianna, Fla., April 1, 1865.

MARVIN, William, sixth (provisional) governor of Florida (1865), was born at Fairfield, Herkimer co., N. Y., April 14, 1808, son of Selden and Charlotte (Pratt) Marvin. His earliest ancestor in America, Reinold Marvin, emigrated from England to Lyme, Conn., in 1638, where his descendants were well-to-do farmers. William Marvin spent his boyhood on his father's farm in Tompkins county, N. Y., and was educated in the district school and at Homer Academy. At the age of fifteen he began to teach school, studying law as opportunity offered. He was admitted to the bar of the supreme court and court of chancery of New York state in 1833, and opened a law office at Phelps, N. Y. In 1835 he was appointed, by Pres. Jackson, U. S. district-attorney for the southern district of Florida,

and removed to Key West. He was appointed judge by Pres. Van Buren in 1839, and in 1849, after Florida had been admitted into the Union, Pres. Polk appointed him judge of the district, which office he held until 1863, when he resigned it on account of impaired health. He was twice elected a member of the legislative council of the territory, and he was a delegate to the first constitutional convention of Florida, held at St. Joseph in 1838. Florida was without a governor from the date of Gov. Milton's death, April 1, 1865, until July, 1865, when Pres. Johnson appointed Judge Marvin provisional governor for the purpose of re-establishing the state government. On Oct. 28, 1865, a state convention at Tallahassee adopted a new constitution, organized a legislature, repealed the ordinance of secession, and established new courts. The constitution secured all civil rights to the negro but withheld the elective franchise from him, and on Gov. Marvin's election as a Democrat to the U. S. senate in 1866, though Mr. Sumner and other senators praised his administration, he was refused a seat, because of this measure, congress having made the negro's enfranchisement a condition of representation of Confederate states in either house. In pursuance of this policy, congress passed laws providing for the reconstruction of governments in the seceded states, based on both the negro and white votes, whereupon Gov. Marvin refused to be a candidate for any elective office under the new régime and retired to private life. In 1867 he removed to Skaneateles, N. Y., where he thereafter resided. He was the author of "Laws of Wreck and Salvage," and "The Authorship of the Four Gospels." He was married, first, in 1846, to Harriet Newell, daughter of Judge Elisha Foote, of Cooperstown, N. Y., and had one daughter, Harriet, who was married to Col. Marshall L. Ludington, U. S. A., afterward quartermaster-general; second, in 1867, to Mrs. Elizabeth Riddle Jewett, of Skaneateles, N. Y. Judge Marvin's brother, Richard Pratt Marvin, was born at Fairfield, N. Y., Dec. 23, 1803. He was admitted to the New York state bar in 1820, and afterward settled at Jamestown, N. Y. In 1835 he was elected to the assembly, and in 1836 and 1838 was chosen to represent the 31st district in congress; while in Washington he was admitted to practice in the U. S. supreme court. In 1846 he was a member of the constitutional convention. He was elected a justice of the supreme court in 1847, and in January, 1855, was appointed to the court of appeals; in November of the same year he was re-elected to the supreme court, and again in 1863, serving until 1873; his judicial career extended over a period of more than twenty-four years. He was one of the best jurists in the state. He died at Jamestown, N. Y., Jan. 11, 1892.

WALKER, David Shelby, seventh governor of Florida (1865-68), was born near Russellville, Logan co., Ky., May 2, 1815, son of David and Mary (Barbour) Walker. His father represented Kentucky in congress from 1817 to his death in 1820. The latter was the son of Jacob Walker, who was the son of George and Mary (Meade) Walker. Mary Meade was the daughter of David and Susannah (Everard) Meade, and granddaughter of

Wm Marvin

Sir Richard Everard, proprietary governor of North Carolina in 1725. David Meade was the son of Andrew and Mary (Latham) Meade. "Honest Andrew" came from Kerry, Ireland, toward the end of the seventeenth century, and settled in Virginia, where he served for many years in the house of burgesses, was a county judge and a colonel of militia. Gov. Walker was educated in private schools of Kentucky and Tennessee, after which he studied law with his elder brother, George K. Walker. In 1837 he settled in Leon county, Fla., and subsequently took an important part in the forming of the state government. He was mayor of Tallahassee from 1848 to 1852; was a senator in the first state legislature, representing Leon and Wakulla counties, and was the first official in charge of the state land office. In 1858 he became a judge of the supreme court, holding the position until 1865, when he was elected governor of Florida. By his courtesy toward those who differed from him politically, at a period which was perhaps the most trying in Florida's history, and by his tact for ready adaptation to all circumstances he made a calm, dispassioned and sagacious administrator. He was prevented, however, from serving out his full term of office by the enforcement of the "ironclad oath," which as a loyal Southerner he could not take. In 1868 he returned to the practice of law, which he continued until in 1876 he was appointed by Gov. Drew judge of the 2d judicial district, which position he held until his death. He served for many years as superintendent of public instruction, trustee of the Agricultural College and of the Southern Florida Seminary. Through his influence a law was passed giving to the city of Tallahassee the first free school ever established in the South. He originated the idea of a public library at Tallahassee, for which he donated a building in 1883, and he founded the University Library, becoming its president. In religion he was an Episcopalian, serving as vestryman in that church for over twenty years. Gov. Walker was married, in 1842, to Philoclea, daughter of Col. Robert W. Alston, and by this marriage had six children. In 1875 he was married the second time to Elizabeth, daughter of Rev. E. B. Duncan, and by her had one daughter. Honest and generous in thought as well as action, he possessed a charm of manner, a genial hospitality, and that crowning virtue, charity. He died at Tallahassee, Fla., July 20, 1891.

REED, Harrison, eighth governor of Florida (1868-72), was born at Littleton, Middlesex co., Mass., Aug. 26, 1813, son of Seth Harrison and Rhoda (Finney) Reed. His parents removed to Tyngsboro, on the Merrimac, and later to Castleton, Vt., where his father kept a hotel, and the son attended the academy. At the age of sixteen he was apprenticed to the printing business, in the office of the "Statesman," and after three years' service, owing to failing health, his indentures were cancelled, and he entered service in a mercantile establishment at Troy, N. Y. In 1836 he removed to Milwaukee, Wis., where he opened the first store of general merchandise and organized the first Sunday-school. In the financial crash of 1837 he failed in business, and joined his father and brothers in settling Summit, Waukesha co. Soon after entering upon his work as a farmer he was called upon to take charge of the Milwaukee "Sentinel," then just established by John O'Rourke (under the auspices of Solomon Juneau), who was taken sick and died within six weeks. Here as printer, publisher and editor, he worked for five years in laying the foundation of the first Whig newspaper in the territory west of Lake Michigan, to-day the most influential Whig paper of the Northwest. On the organization of Wisconsin territory Mr. Reed left the "Sentinel,"

which was afterwards managed by Rufus King, and removed to Madison to take charge of the Wisconsin "Enquirer," the organ of the administration. On the retirement of Gov. Doty in 1843, Mr. Reed removed to Winnebago county, purchased the abandoned mills and water-power constructed for the Menominee Indians, and laid out the town of Neenah (Indian for "Falling Water"), and for eighteen years labored to establish the leading manufacturing city of the Fox river valley. He was chairman of the first board of county commissioners of Winnebago county, and in 1848 was elected as a Whig to represent the counties of Winnebago and Marquette in the convention to form the state constitution. At the first Whig state convention he was nominated with Gen. Rufus King as elector at large on the Taylor and Fillmore ticket. He established at Neenah "The Conservator," a Whig journal, and conducted it for five years, until 1858, when he removed again to Madison. Here he became associated with Messrs. Atwood and Reebie on the "State Journal," the official state paper. In 1861 Mr. Reed removed to Washington, D. C., and secured a position in the treasury department, and subsequently was appointed on the board of commissioners for the collection of taxes in Florida. Removing to Fernandina, he entered upon the duties of his office, but resigned in 1865; was appointed special agent of the post-office department of Alabama and Florida, which position he held until he was elected governor of Florida, under the new state constitution of 1868, in the formation of which he had taken an active part. In that year Gen. Meade turned the state over to the civil authorities (July 14th). On Aug. 10, 1869, he was married to Chloe, daughter of Susbanus Merriek, of Syracuse, N. Y. At the outbreak of the war she had been sent South by the Freedmen's Aid Society of that place, under the direction of Samuel J. May, and was appointed by Gen. Saxton, the military commander, to take charge of the fugitive slaves, "Contrabands," in Florida. In 1862 she established schools for them at Fernandina and St. Augustine, and afterward at Columbia, S. C., and at Wilmington, N. C., at which last place she was married and went to Florida to reside over the executive mansion at Tallahassee. She was appointed an alternate to represent Florida at the World's Fair at Chicago. On the eve of her "silver wedding," Aug. 5, 1897, she died suddenly, leaving one son to honor her memory. At the expiration of his term Gov. Reed returned to his farm on the St. John's river, and in 1875 became the editor of "The Semi-Tropical," a monthly magazine devoted to southern literary, social and industrial development, which lived a life of three years of usefulness. He was postmaster of Tallahassee, Fla., 1889-93.

HART, Ossian Bingley, ninth governor of Florida (1873-74), was born in Jacksonville, Fla., Jan. 17, 1821, son of Isaiah David and Nancy (Nelson) Hart, of English descent. His grandfather, William Hart, was a Virginian by birth, and in 1801 removed from Georgia to Florida. Isaiah David Hart removed to the bank of the St. John's river in 1821, bought a large tract of land, and laid out a town which he named after Gen. Andrew Jackson. He built the first house in Jacksonville, and opened a village store, at the same time looking after his large plantation and slaves. The plot of land on which the present St. James Park is located, was given to the city by him, and some of the streets of Jacksonville still bear the names of his children: Lanra, Julia and Ossian, the last being changed to Ocean. Until the time of his death Mr. Hart held various public offices of importance in the rapidly growing city. Ossian B. Hart's early years were passed in the town or on the plantation until he was

sixteen, when he was sent to Washington, where his education was completed. On his return home, after studying law for two years, he was admitted to the bar, and began to practice in Jacksonville. In 1843, allured by the attractions of the Indian river country, he took up a grant of land near Fort Pierce, and joining a small party, removed therewith his wife. They remained there for three years, enduring many privations while clearing and cultivating the land. In 1844 he was elected to the state legislature by the few voters in St. Lucie county, entirely on his personal merits, as the Whig party to

which he belonged was in the minority. In 1846, finding the hardships of pioneer life too great, he removed to Key West, where he practiced law for ten years, going from there to Tampa in 1856. From the first outbreak of the disunion element, though born and bred in the environment of slavery, Mr. Hart took a firm stand against secession, and drew upon himself and family the bitterest persecution. At the close of the war he returned to Jacksonville, and took an active part in the reconstruction of state government and rebuilding the damaged city.

In 1868 he was appointed associate judge of the supreme court of Florida, and his ability as a jurist is thus recorded by his fellow judges: "He was called upon to engage in the decision of some of the most delicate and important political, as well as legal questions ever presented to any court in this state, in all of which he sought to hold the scales of justice with an even hand, and administer impartially to all alike." In the first campaign, after the reorganization of the national government was accomplished in 1870, Judge Hart was nominated by the Republicans as a representative in congress, and after an exciting canvass was declared elected. The vote, however, was so close that this was disputed by the other side, and both candidates went to Washington, where the returns were examined and decided to be in favor of the Democratic candidate. Judge Hart's ready acceptance of this verdict so increased the number of his friends that in 1872 he was nominated as governor of Florida, and was elected by an unquestioned majority. He was inaugurated in January, 1873, but he did not complete his term. The campaign had been unusually severe, and brought on an attack of pneumonia, resulting in his death. Gov. Hart was married, Oct. 2, 1843, to Catherine Smith, daughter of Abner Campbell, of Newark, N. J. He died at his home in Jacksonville, March 18, 1874.

STEARNS, Marcellus Lovejoy, tenth state governor of Florida (1874-76), was born at Lovell, Oxford co., Me., April 29, 1829, son of Caleb and Eliza W. (Russell) Stearns. His father was a merchant and farmer, and his mother, daughter of George Russell, was a descendant of Maj. Russell, who edited the first newspaper ever published in Boston, Mass. He prepared for college at Waterville Academy (now Coburn Classical Institute), Waterville, Me., under the instruction of Rev. Isaac Hamblen, and during his vacations taught school to support himself. In 1859 he entered Waterville College (now Colby University), and though he was never graduated the honorary degree of A.B. was conferred upon him by his alma mater in 1877. He left college during his junior year, and enlisted as a private in the 12th regiment of Maine volunteers;

became orderly sergeant at the organization of the regiment; was promoted second lieutenant in 1862 and first lieutenant in 1863. He was one of the "forlorn hope" at the siege of Fort Hudson, on the Red river expedition, under Gen. N. P. Banks, and lost an arm at the battle of Winchester. On March 25, 1865, he was commissioned second lieutenant in the 20th regiment of the veteran reserve corps, and while stationed in Maine studied law in the office of Josiah H. Drummond at Portland, until transferred to the Freedman's bureau, under Gen. O. O. Howard, and sent to Wheeling, W. Va. Afterwards he went to Quincy, Fla., where he was mustered out of service Jan. 1, 1868. He continued to reside at Quincy, however, and became active in organizing the negroes of Florida into the Republican party. In 1868 he was a member of the convention which drafted the new constitution for the state of Florida, and during the same year was elected to the state legislature, becoming speaker of the lower house. In 1869 he was appointed U. S. surveyor general of Florida by Pres. Grant, and held this office until 1873. In 1872 he was elected lieutenant governor of the state, and upon the death of Gov. Hart in 1874 was inaugurated as governor, filling the office for three years. In 1876 Gov. Stearns was renominated by the Republicans, but defeated. In January, 1877, he was appointed U. S. commissioner at Hot Springs, serving until 1880, and after an extended tour of the Pacific states was commissioned by the secretary of the interior to inspect certain public works in Florida. In 1886 he traveled through Europe with Mrs. Stearns, and on his return in August, 1887, made his home in Atlantic, Ia., where he was engaged in the banking business for three years. Gov. Stearns was married, Dec. 12, 1878, to Ellen Austin, daughter of Rev. Honore D. Walker, of Bridgewater, Mass. He died at Palatine Bridge, N. Y., Dec. 8, 1891, and was buried at Lovell, Me.

DREW, George Franklin, eleventh governor of Florida (1877-80), was born at Alton, N. H., Aug. 6, 1827, son of John and Charlotte (Davis) Drew, of English descent, the family originally coming from Cornwall. He was educated in the common schools of his native place, and at the Gilmanton Academy, going at the age of seventeen to Lowell, Mass., where he learned the machinist's trade, and removing in 1846 to Cohoes, N. Y. After remaining there for a year he went to Columbus, Ga., and opened a machine shop; in 1854 he removed to Doherty county, Ga., subsequently going to Lee county, where he engaged in the saw-mill business on a large scale, and finally settling at Ellanville, Madison co., Fla., in 1865. There he built a saw-mill which was the largest in the state, and from which lumber was shipped to all parts of the world, the trade with the West Indies and with New York city being especially important. In 1876 he was elected governor of Florida by a large Democratic majority, and by careful management of the finances of Florida, succeeded in raising its credit, which had been very low, to an equality with that of New York or Massachusetts. On retiring from office in 1880, he engaged in the lumber business again, and in 1883 organized a stock company in connection with the

O. B. Hart.

George F. Drew

sale of hardware at Jacksonville. His lumber interests are the most extensive in Florida, keeping eleven saw-mills running in different parts of the state, and furnishing employment to a large number of people. In 1854 he was married to Amelia Dicken, of Columbus, Ga., and has two sons and two daughters.

BLOXHAM, William Dunnington, twelfth and sixteenth governor of Florida (1881-84; 1897-1901), was born in Leon county, Fla., July 9, 1835, son of William and Martha (Williams) Bloxham. The Bloxhams are of English descent. His grandfather, who owned ships running between Virginia and England, suffered heavy financial losses during the war of 1812. His father was a planter, born in Alexandria, Va., who removed to Florida in 1825 and settled in Leon county, then a wilderness inhabited chiefly by Indians, with few white settlers; subsequently he served in the Seminole wars that devastated Florida for a series of years; he died in Tallahassee in 1862. William, at the age of thirteen, was sent to a preparatory school in Virginia, and afterward to William and Mary College, where he was graduated in 1855. He was also graduated in the law course of that venerable institution, but his health failing, his profession was given up for the more active life of a planter. His fondness for politics was early manifested, and, notwithstanding his youth, he took an active part in his county in the election of Buchanan. In 1861 he was elected to the legislature without opposition. In 1862 he organized a company of infantry from Leon county and commanded it until the close of the civil war. He opposed the reconstruction measures of congress and during the turbulent political period immediately succeeding the war, known in the South as the "Carpet Bag era," Mr. Bloxham was in the front rank of the leaders of the Democratic party of Florida, and, being a popular speaker, was a prominent figure on the platform. He was a presidential elector in 1868.

In 1870 he was unanimously nominated by the Democratic convention to fill a vacancy then existing in the position of lieutenant-governor of the state; his election, after a spirited canvass, being the first Democratic triumph in Florida after the war. In 1872 he was nominated for governor without opposition, but owing to a severe storm that swept the peninsular part of the state on the day of election, a small vote was polled, and the ticket was defeated. In 1876 he served as a member of the state Democratic executive committee, and took an active part in the campaign that resulted in the election of Hon. Geo. F. Drew as governor. Mr. Bloxham was appointed secretary of state under the new administration, which position he resigned in the summer of 1880, when he was again nominated for governor. He made an active canvass of the state; was elected by over 5,000 majority, and served as governor from Jan. 4, 1881, until Jan. 6, 1885. During his administration, with Hons. George P. Ramey as attorney-general; W. D. Barnes, comptroller; Hugh A. Corley, commissioner of lands, and H. A. L'Engle, treasurer, constituting the trustees of the internal improvement fund of Florida, Gov. Bloxham made the celebrated "Disston Land Sale." This sale practically relieved the landed fund of the state of a debt of \$1,000,000, and gave an impetus to railroad building without a parallel in the South. Capital and population followed, and the results not only demonstrated the wisdom of the sale, but made it

the most important event in the political and financial history of the state. The convention that nominated his successor pronounced it the "most brilliant in the history of the commonwealth." In May, 1885, Pres. Cleveland appointed Gov. Bloxham minister to Bolivia, but he declined the position, and in November of the same year accepted the appointment of U. S. surveyor-general for the district of Florida, which he held until December, 1889. A vacancy occurring in the position of comptroller of the state on May 1, 1890, Gov. F. P. Fleming appointed ex-Gov. Bloxham to fill it; in August he was unanimously nominated for the same position by the Democratic state convention, and almost unopposedly elected, receiving 29,176 votes to his opponent's 4,637 votes. In June, 1892, he was again nominated, without dissent, at the state Democratic convention for comptroller, and was elected by an overwhelming majority, to a four years' term of office. In 1896 he was elected governor of Florida for the second time, and was inaugurated in 1897, his term expiring in January, 1901. Gov. Bloxham was married, in 1856, to Mary, daughter of Dr. William David, of Lynchburg, Va.

PERRY, Edward Aylesworth, thirteenth governor of Florida (1885-89), was born at Richmond, Mass., March 15, 1831, son of Asa and Philura (Aylesworth) Perry, and a descendant of Arthur Perry, a member of an artillery company in Boston in 1638. His son, Arthur, was married to Anna Judson; their son, Joshua, was married to Mary Leavenworth; and their son, David, was married to Jerusha Lord, who were the parents of Asa Perry. Edward A. Perry received his early education in Lee Academy, at Richmond, Mass., and pursued his studies still further at Yale. Later he removed to Pensacola, Fla., where he studied law under Judge Richard L. Campbell, securing admission to the bar in 1853. At the beginning of the civil war, he enlisted as a private in the Confederate army, but was made a captain before going into battle. After rendering active service at the battles of Bethel Church and Seven Pines he was made colonel of the 2d Florida regiment, and was later engaged in all the battles fought on the peninsula, as well as those around Richmond, Va., where he was first wounded. He was then appointed brigadier-general, in command of the entire division of Florida troops. After participating in the seven days' fight of the Wilderness about Fredericksburg, and the engagement at Spotsylvania Court House, he received a wound which incapacitated him for further service, though he stuck to his saddle all day before giving up his command. In 1884 he was elected governor of Florida, remaining in office from 1885 to 1889. He was a member of several literary clubs at Yale, and later became president of the Osceola Club, of Pensacola, Fla., serving as such from its organization to the time of his death. Gov. Perry was married, Feb. 1, 1859, to Wathen Herbert, daughter of Hubbard Bonner Taylor, of Greenville, Ala. One son and four daughters were born of this union: Genevieve Catherine, Ellen Herbert, Edward Wathen, Frances Taylor and Ruby Aylesworth. Gov. Perry died at Pensacola, Fla., in October, 1889.

FLEMING, Francis Philip, fourteenth governor of Florida (1889-93), was born at Panama, Duval co., Fla., Sept. 28, 1841, son of Lewis and Margaret (Seton) Fleming, both natives of Florida. His father was a planter, who owned an estate on the bank of the St. John's river. The son was educated by tutors, and previous to the secession of his state was engaged in active business pursuits. At the beginning of the civil war he enlisted as a private in a company of Florida volunteers, which soon after was incorporated into the famous 2d Florida regiment. His

faithful service on the battle grounds of Virginia earned for him promotion to the rank of first lieutenant, in which capacity he served until the close of the war, being in the last year of the struggle on duty in Tennessee and in northern Georgia. On

leaving the army he studied law, and in 1868 was admitted to the bar, soon afterwards becoming a member of the law firm of Fleming & Daniel, with which he was connected until the death of one of its members, earning for himself not merely a local, but a state reputation as an able advocate. He was elected governor of Florida in 1888, and was inaugurated Jan. 8, 1889, for a term of four years. Throughout his career, while devoting himself strictly to his profession, he has exhibited a lively interest in all matters connected with the welfare and advancement of the

state. He was married, May 23, 1871, to Florida Lydia Pearson.

MITCHELL, Henry Lawrence, fifteenth governor of Florida (1893-95), was born in Jefferson county, near Birmingham, Ala., Sept. 3, 1831. He was educated in the common schools of Alabama and continued in Jacksonville, Fla., where he removed at the age of fifteen. He studied law in the office of Judge James Gettis, and after being admitted to the bar in 1849 he formed a partnership with his preceptor, with whom he practiced under the name of Gettis & Mitchell until the beginning of the civil war. He at that time held the position of state's attorney of the 6th circuit, which he immediately resigned, and enlisted in the Confederate army, serving throughout the war as captain and gaining a highly creditable record. He was for two terms a member of the state legislature, and in 1875 he was appointed judge of the circuit court for the 6th circuit, remaining on the bench until he was elected governor of Florida in 1892. During Gov. Mitchell's administration many improvements were made throughout the state.

Capital had begun to find its way to the peninsula, and industries sprung up on every hand. His determined stand against prize fighting attracted considerable attention when a contest between James J. Corbett and Charley Mitchell took place in Jacksonville in 1895, contrary to his direction and in violation of the state law. The participants were afterwards arrested and punished. Immediately upon his retirement from the gubernatorial chair, Gov. Mitchell was elected

clerk of the circuit court of his home county, Hillsboro, which he held for four years, retiring in January, 1901.

JENNINGS, William Sherman, seventeenth governor of Florida (1901-05), was born near Walnut Hill, Ill., March 24, 1863, son of Joseph W. and Amanda (Conch) Jennings, and a cousin of William Jennings Bryan. His father was a successful fruit-grower, stock-raiser and grain-producer of Illinois, the son of Charles W. and Maria W. Jennings, and grandson of Israel and Irene Jennings. Her son received

his early education in the public schools of Marion county, and in 1879 entered the Normal University at Carbondale, completing his course in 1883. He then studied law at the Union College of Law, in Chicago (1884-85), and completed his legal studies under the direction of his brother, Charles E. Jennings, who was the state attorney for Marion county. Removing to Florida in November, 1885, he secured his admission to the bar in 1886, and entered upon the practice of his profession at Brooksville. In the following year he was appointed commissioner of the circuit court, which position he resigned a year later, to become judge of Hernando county; and in the latter office he continued to officiate from May, 1888, to January, 1893, when he resigned to accept an election to the state legislature. From 1893 to 1895 he remained a member of the Florida house of representatives, during the latter year serving as speaker; and, his ability being recognized, he was appointed a member of several important committees, as well as chairman of that on rules and regulations. He accepted a post on the public health committee, at the special request of the governor. In 1889 he was appointed colonel of the 35th Florida regiment of the state militia, by Gov. Fleming; in 1896 he served as a presidential elector on the Democratic ticket, and for ten years he was president of the Brooksville town council. He was chairman of the Democratic committee in 1898. He was elected governor of Florida in 1905. He was married, March 5, 1890, to Corinne Jordan, who died a few months later; and he was married again in Tallahassee, May 12, 1891, to May, daughter of Sen. Austin S. Mann, of Florida. He has one son, Sherman Bryan Jennings, born in 1894.

William S. Jennings

McCAFFREY, John, clergyman, was born at Emmetsburg, Md., Sept. 6, 1806. He studied theology at Emmetsburg and Baltimore and was consecrated to the priesthood in 1838. He was appointed president of Mount St. Mary's College and did much to enlarge its influence and increase its prosperity. He was a man of much learning and high literary taste and delivered several series of lectures on philosophical and literary topics, both in his collegiate capacity and before the Roman Catholic Association of Baltimore. An especially admired address delivered by Father McCaffrey was "The Landing of the Pilgrims." He also published a series of catechisms. He died in Baltimore, Md., Sept. 25, 1882.

LAW, Lyman, lawyer and congressman, was born at New London, Conn., Aug. 19, 1770, son of Richard and Ann (Prentiss) Law, and descended through his mother from William Brewster, who came to this country on the Mayflower in 1620. He received his education at Yale College, and after being graduated there in 1791, studied law under the direction of his father. Upon his admission to the bar, he established a practice at New London, and became an eminent counsellor of that town. He was elected to the legislature of Connecticut, and during one session served as speaker of that body. His ability being recognized, he was placed on the Federalist ticket as a candidate for the national legislature, and was elected, serving from 1811 to 1817 in the 12th, 13th and 14th congresses. He died in the town of his birth, Feb. 3, 1842.

SALISBURY, Albert, educator, was born at Lima, Rock co., Wis., Jan. 24, 1842, son of Oliver and Emily (Crawth) Salisbury. He was educated in the district schools and was graduated at Milton College in 1870. His college course was interrupted by his enlistment, in 1863, as a private in the 13th Wisconsin infantry, which served chiefly in the army of the Cumberland. In 1870 he was appointed principal of the public schools at Brodhead, Wis., and in 1873 he became professor of history and conductor of teachers' institutes in the Whitewater State Normal School, where he remained for ten years. He had a large share in organizing the system of teachers' institutes for which Wisconsin is noted. In 1883 he was appointed superintendent of schools for the American Missionary Association, in its work among the freedmen and the Indians, with headquarters at Atlanta, Ga. For three years he traveled about 30,000 miles yearly, inspecting and supervising educational institutions which were scattered from the Atlantic and Gulf coasts to the Rocky mountains. He has been president of the Whitewater (Wis.) Normal School since 1885, and has greatly enlarged the school, improved its equipment, introduced new departments of work, and helped to put the normal school system of the state on a better financial and professional basis. Mr. Salis-

Albert Salisbury

bury is also profoundly interested in the provision for the proper care and training of the feeble-minded, and carried on a campaign of several years' duration, which finally resulted in the establishment of the State Home for Feeble-Minded at Chippewa Falls, Wis. He was president of the Wisconsin Teachers' Association, a member of the state board of examiners, and a trustee of the State School for the Deaf at Delavan. He is the author of "The Geography of Wisconsin" (1876); "Historical Sketch of Normal Instruction in Wisconsin" (1876), and another work under the same title in 1893; "History of the Wisconsin Teachers' Association" (1878); "Orthoepy and Phonology" (1879); "The Duty of the State to the Feeble-Minded" (1890); "First Quarter Century of the Whitewater Normal School" (1893), and two reports on "The Rural School Problem" (1897-98), with numerous other papers and addresses. In 1866 he was married to Abba A. Maxson, of Allegheny county, N. Y., who died in 1881, leaving four children; and again, in 1883, to Agnes Hosford, who was superintendent of schools in Eau Claire county, Wis. They have one son.

MAKEMIE, Francis, clergyman, was born at Ramelton, county Donegal, Ireland, about 1658. That his father was a man of some substance is proved by the excellence of his education. At the age of fourteen he became interested in religious matters through the instrumentality of a pious schoolmaster, and as Presbyterian boys were denied the privilege of college education in Ireland, he went to Glasgow, Scotland, in the winter of 1675, and entered the University of St. Mungo, where he remained for five years, becoming a well read man, an excellent Greek and Hebrew scholar, and an authority on church history. He was licensed to preach in 1681, and an appeal having been made by Col. Stevens, of Lord Baltimore's council, for ministers to be sent to Maryland and Virginia, he was

ordained and sailed for the new world. Whether he first went to the island of Barbadoes, where he preached for a time, or to Maryland, is not definitely known, nor is the date of his arrival in America, though it was probably in 1682. He is generally regarded as the first Presbyterian minister in this country, but there is a record of one, Richard Denton, who preached at Hempstead, Long Island, in 1657; and Makemie, in a letter to Increase Mather, dated at Elizabeth river, Va., July 25, 1684, mentions a dissenting minister from Ireland who had been stationed at the parish of Lynnhaven, Lower Norfolk co., Va., "until the Lord was pleased to remove him by death," the previous August. Makemie had then been in North Carolina, Maryland and Virginia long enough to obtain considerable knowledge of that part of the country. In 1683 or 1684 he organized the first Presbyterian church in America at Snow Hill, Somerset co., Md., subsequently removing to Virginia himself. It was not long before a number of congregations were gathered in the region through which he continued to travel, and which extended along the eastern shore from Maryland to South Carolina. In 1691 he went to England and applied to the Independent and Presbyterian ministers of London for aid. After his return in July, 1692, he was visited by George Keith, who had separated from the Society of Quakers, and was traveling through the southern provinces forming a society of his own. Keith then wrote an examination of the "Catechism," published in 1691 by Makemie, who immediately replied in "An Answer to George Keith's Libel" (Boston, 1692), which Increase Mather and other Boston clergymen praised as "the work of a reverend and judicious minister." In the same year he organized a church in Philadelphia. His preaching in Virginia finally incensed the clergymen of that province so much that he was seized and carried before the governor at Williamsburg, but was vindicated and licensed to preach throughout the colony, the license being confirmed by the toleration act of 1699. While on his way to New England in 1707 he preached at a private house in Pearl lane, New York, being forbidden the use of the Dutch church by Lord Cornbury, deputy governor, and was arrested and imprisoned for two months; but the statutes of William and Mary permitted freedom of worship, and he was acquitted, though forced to pay heavy costs. After his release he narrowly escaped arrest for a similar offense in New Jersey. Going to Boston soon afterward he published a "Narrative" of the affair, which was reprinted in 1755 by Hugh Gaige in New York, and also in Force's "Tracts." In 1704 he visited Ireland and Scotland to beg the churches for aid, and his appeal drew many fellow-workers to this country. On his return he set about the organization of the new presbytery, which had its seat in Philadelphia, and of which he was moderator. The leaf on which the date was recorded has been destroyed, but it was about 1705. The "Apostle of the Accomac," as he was called, is described as a "man of eminent piety and strong intellectual powers, adding to force of talents a fascinating address." Beside the works already mentioned, he published "Truths in a New Light" (Edinburgh, 1699); "A Plain and Loving Persuasive to the Inhabitants of Virginia" (London, 1704), and a "Letter to Lord Cornbury" (Boston, 1707). He was married, not long after he settled in Virginia, to Naomi, daughter of William Anderson, a merchant of Accomac county, and left two daughters. He died at his home in Virginia in 1708.

CONRIED, Heinrich, theatrical manager, was born in Beilitz, Austria, Sept. 13, 1855. He was educated by private tutors and was graduated at the Shoofield College in 1869. He first learned the trade of a weaver, but having a natural fondness

for the stage he decided to follow that profession, and made his debut as an actor at the Imperial Court Theatre, Vienna, on Feb 23, 1853. He rapidly attained high rank in his new calling. In 1858 he came to the United States, and obtained a position as stage manager of the Germania Theatre, New York city. The following year he made a tour of the German theatres throughout the country as a star, and then became associated with the New York Casino. Still later he organized the Conried Opera Co., which gave performances in all the great cities and became very popular. In 1892 Mr. Conried became manager of the Irving Place Theatre, New York, which is devoted entirely to German drama, and which under his able direction has attained great distinction. For more than a decade Mr. Conried has devoted his best energies to the elevation of the American stage, being convinced that the university, the church and the stage are the three great educational forces of national life. He has established for the German population of New York city a permanent theatrical organization, representing the traditions of the true histrionic art—thoughtfulness, refinement and culture. He has brought to America such great artists as Sonnenthal, Künz, Possart and Agnes Sorna, and he has produced the modern plays of Hauptman, Sudermann and others, as well as works of the best dramatists of the past. Mr. Conried is an indefatigable worker, already in his short career having staged over 1,000 plays, and has crossed the Atlantic over eighty times in the interests of his profession. He has delivered lectures on the drama at Yale and Columbia universities and the University of Pennsylvania, and his company gave a performance of Goethe's "Iphigenie" at Harvard University, the entire proceeds of which he donated to the fund for building the new Germanic Museum in Cambridge. He was married, in 1884, to Augusta, daughter of E. M. Spurling, of New York city, and has one son, Richard Conried. He has received the order of knighthood from Emperor Franz Joseph, of Austria, and the gold medal of science and art from the king of Belgium.

KLEIN, Bruno Oscar, composer, was born in Osnabruck, Germany, June, 6, 1858, son of Carl Klein, a musical director and organist at the cathedral there. The boy's musical talent showed itself at an early age and was carefully directed by the father. He attended the gymnasium of his native town, where he won special distinction in the classics and literature, and was graduated with honors in 1875, after which he was sent to the Königliche Musikschule in Munich. In 1878 he came to America to visit an older brother, and was so much pleased with this country that he determined to settle here. In 1884 he was appointed organist of St. Francis Xavier's Church in New York city and head of the piano department at the convent of the Sacred Heart in Manhattanville. Upon the recommendation of Rafael Joseffy he was called to the National Conservatory in 1888 to teach the branches of counterpoint and composition, and in a few years won recognition as an organist. In 1894 he resigned his position as organist of St. Francis Xavier's. He produced his opera, "Kenilworth," in Hamburg, Germany, Feb. 13, 1895, with Katharina Klafsky as Amy Robsart, and at the same time the composer added to his reputation as a virtuoso by the interpretation of his own works. He returned to New York in the spring of 1895, and resumed his work at the convent of the Sacred Heart. His other compositions are: A serenade for string orchestra, a romance for violin and orchestra; two overtures; a concerto for piano and orchestra, E minor; a suite for violoncello and orchestra; "Ingeborg's

Lament," dramatic aria for voices and orchestra; "Messe Solenne," D major; a large number of pieces of chamber music and pieces for the piano-forte, and of songs and part songs; also masses, motets, duets, etc., for church services. He has published "Erinnerungen aus der Jugendzeit" (ten pieces), op. 53; "A Book of New Piano Music" (eight pieces), op. 54; "Album for Young Pianists" (eight pieces), op. 56. Mr. Klein is a member of the Manuscript Society of New York city.

CUDAHY, Michael, merchant and manufacturer, was born at Callan, county Kilkenny, Ireland, Dec. 7, 1811, eldest son of Patrick and Elizabeth (Shaw) Cudahy. His father brought his family of four sons and one daughter to America in 1849, and settled in Milwaukee, Wis. The son attended the public schools until he was fourteen years of age, when he obtained employment with Layton & Plankington, packers, Milwaukee. He accepted a position with Edward Roddis in 1859, and remained with the latter until 1866, when he went into business for himself, but disposed of it later to enter the employ of Layton & Co as private meat inspector, at the instance of Frederick Layton, who also secured for him the position of meat inspector on the Milwaukee board of trade. He made a thorough, scientific study of the preservation of meats, and to him belongs the credit of the present high standard of quality. In 1869 he accepted a position with Plankinton & Armour, Milwaukee, Wis., and became superintendent of their packing-house. He was so successful in the management of this business that in 1873 Philip D. Armour offered him a partnership in the firm of Armour & Co., of Chicago, which he accepted. Equipped with a thoroughly practical knowledge of the business, Mr. Cudahy took entire control of the packing-house and stock-yard end of the enterprise, and he was the ruling spirit in its management until his withdrawal from the firm in 1900.

In 1897, with his brother, Edward A., and Mr. Armour, he formed the Armour Cudahy Packing Co., at South Omaha, Neb. In 1890 he sold his interest in the Armour Co. to Mr. Armour and purchased the latter's interest in the Omaha business, which has since been known as the Cudahy Packing Co., one of the largest concerns of its kind in existence, with distributing agencies throughout the civilized world. Mr. Cudahy is a trustee of the Catholic University of America, to which he has lately contributed \$50,000. He was chairman of the committee formed to collect subscriptions from the packers for the Columbian exposition. In politics he is a Democrat. He is president of the North American Transportation and Trading Co. In 1866 he was married to Catherine, daughter of John Sullivan, of Milwaukee, Wis. They have had seven children. The oldest daughter, Elizabeth, is the wife of William P. Nelson, of Chicago.

CUDAHY, John, merchant, was born at Callan, county Kilkenny, Ireland, Nov. 2, 1843, second son of Patrick and Elizabeth (Shaw) Cudahy. In 1849 his father came to America, and, after a short time

Michael Cudahy

spent in the East, removed to Milwaukee, where John Cudahy received his education in the public schools. He entered the packing house of Edward Reddis in 1857, where he remained until he was about nineteen, when he entered the employ of John Plankinton (afterward of Plankinton & Armour). When twenty-one years of age he engaged as foreman in the nursery of Thomas Gryune, Milwaukee, dealer in ornamental and fruit trees, purchasing the business in 1867 and continuing it until 1870. This venture was successful. Returning to the packing industry, he was employed by Layton & Co. for

three years, during which time he was appointed board of trade provision inspector for the city, afterward being for two years foreman and inspector for Van Kirk & McGough. In July, 1875, he removed to Chicago, forming a partnership with E. D. Chapin, under the firm name of Chapin & Co., packers, and so remained for two years, when the firm name was changed to Chapin & Cudahy. In 1880 Mr. Chapin withdrew, since which time Mr. Cudahy has continued the business alone, being also in partnership with his brother, Patrick (Cudahy Bros., Milwaukee), who had succeeded to the business of John Parkin-

ton in 1889. Mr. Cudahy is a member of the Washington Park Club, the Union League Club, and the Chicago Club. He has been twice married; first, Oct. 1, 1873, to Mary, daughter of Nolan, of Bridgeport, Conn., by whom he had four daughters, and, second, in 1882, to Margaret F., daughter of John O'Neill, of Chicago.

CUDAHY, Edward Aloysius, merchant and manufacturer, was born in Milwaukee, Wis., Feb. 1, 1859, third son of Patrick and Elizabeth (Shaw) Cudahy, of Irish descent. He attended the public schools of his native city, and in 1875 went to Chicago, where he obtained employment in the Armour Packing Company. Having mastered the details of the business, he went to Omaha, Neb., in 1887, and, with his brother Michael, established the Armour-Cudahy Packing Co. at South Omaha, which became the Cudahy Packing Co. upon the withdrawal of Mr. Armour. It has become one of the largest, if not the largest, operating plants of its kind in the United States. The "Rex" brand of hams and extract of beef are prepared by the Cudahy Packing Co. The establishment at South Omaha occupies ninety acres of floor space, and there are branches at Sioux City, Ia.; Kansas City, Mo., and Los Angeles, Cal. Mr. Cudahy was married in Milwaukee, Wis., in 1884, to Elizabeth, daughter of Murphy, and has five children: Edward, Eugenia, Helen, Florence and Alice.

MARKS, Amasa A., prosthetist and inventor, was born at Waterbury, Conn., April 3, 1825, son of Levi Merwin and Esther Tolles (Tuttle) Marks. He is descended, through the Eaton, Tolles and Tuttle families, from the early Pilgrim Fathers. He was brought up on his father's farm, and received his early education in the common schools of Waterbury and Bethany, whence the family removed when he was eleven years old. At the age of sixteen he left the farm, and devoted himself to woodturning, making vehicle hubs, spokes and other wooden work for a number of years. Removing to New York city in 1851, he engaged in the manufacture of artificial limbs, in partnership with his elder brother, D. B.

Marks. The latter, on March 7, 1854, obtained a patent for a new artificial leg, increasing the range of articulation in the knee and ankle joints, which was considered a great improvement at that time. The new firm met with little recognition, however, and his brother became so discouraged at the prospect that he soon withdrew. Mr. Marks busied himself devising and perfecting improvements; inventing and constructing artificial legs, arms, hands and feet; visiting hospitals and prominent surgeons to study physiology and the anatomy of the extremities until he won the distinction of being the head and leader of his work. His first invention, patented March 7, 1854, contained intricate mechanism, which was improved and simplified in 1856. Further improvements, in 1866, resulted in a leg with knee articulation; a rubber foot, enabling the wearer to run, jump, dance, skate, ride a bicycle, and apparently do everything a normal person is capable of. In 1861 his attention was directed to the utilization of sponge rubber in the manufacture of artificial feet and hands, the first patent being dated Dec. 1, 1863, and experiments in this direction were so successful as to encourage him to push the invention to perfection, the final improvement being patented Sept. 17, 1895. In 1884 his sons, George E. and William L. Marks, were admitted to the firm, and he retired from active management. He was married, Aug. 22, 1850, in New York city, to Lucy Anne, daughter of Charles Platt, of New York city. They have had seven children, four of whom are living: a daughter, Anna; two sons above mentioned, and Charles A. Marks, an Episcopal clergyman.

ENDICOTT, Henry, manufacturer, was born at Canton, Norfolk co., Mass., Nov. 14, 1824, son of Elijah and Cynthia (Childs) Endicott. His branch of the Endicott family, one of the oldest in Massachusetts, settled at Canton in 1700. His boyhood was spent on his father's farm, with intervals of attendance at the district school, where he made the most of every opportunity, to be supplemented in after years by night study. In 1843 he went to Boston, where he learned the machinist trade. In 1847, in partnership with Caleb C. Allen, he established the firm of Allen & Endicott, for the manufacture of steam engines, boilers and other machinery. Here many men were employed, and the products were sent to all parts of America. In 1850 he removed with his wife and one daughter to Cambridge, where he has since resided. As a director of the Cambridge Gas Light Co. and the First National Bank of Cambridge and a trustee of the Cambridgeport Savings Bank, Mr. Endicott has been a most useful citizen. He retired from an active business life in 1873, although still maintaining a lively interest in all practical and progressive affairs. For many years he has been a loyal member of the Masonic fraternity, and has occupied successive positions of responsibility in their various organizations. For three years he held the highest office it is in the power of Masons in Massachusetts to bestow, that of grand master of the grand lodge. He retired in 1889, receiving many evidences of the esteem and admiration in which he was held. Although such honors have several times been open to him, Mr. Endicott has never held political office. During later years his life has been troubled by many severe illnesses, but in spite of these afflictions he still preserves the serenity and sweetness of char-

John Cudahy

Henry Endicott

acter that have endeared him to all. He was married, May 4, 1847, to Miriam J. Smith, who died in 1849. He was married, second, Sept. 2, 1851, to Abby H. Browning, of Petersham. They had four children, only one of whom, a daughter, is living.

MOORE, Charles Leonard, poet, was born in Philadelphia, Pa., March 16, 1854, son of Joseph and Mary Elizabeth Moore. He is of English, Welsh and Swedish descent. His father was for many years a member of the Pennsylvania legislature, and a major in the Union army during the civil war; John Hart, a signer of the Declaration of Independence, was a great-uncle on his father's side. His father's family were natives of Lewes, Del. Our subject received his education in the public and high schools of Philadelphia, and at seventeen years of age adopted railroad building as a means of livelihood. He was one of the managers of an unsuccessful expedition from Philadelphia to build a railroad between Bolivia and Brazil, and during its operations, in 1878-79, served as U. S. consul at San Antonio, Brazil. He published "Atlas" (1882); "Poems, Antique and Modern" (1883); "Day Dreams" (1888); "Banquet of Palacios" (1889); "Odes" (1896), and "Ghost of Rosalys," a play (1900). He has published many critical articles in the "Dial" and other periodicals.

FALLOWS, Edward Huntington, assemblyman, was born at Appleton, Wis., Aug. 15, 1865, son of Samuel and Lucy (Huntington) Fallows. His father is a well-known educator and a bishop of the Reformed Episcopal church. He was educated in the Brooklyn and Chicago public schools and high schools, and was graduated at Amherst College in 1886, *summa cum laude*. He taught in Phillips Exeter Academy for one year, and in the Adelphi Academy of Brooklyn the following year, when he took a year's post-graduate course at Yale, finishing it in the summer of 1890 with the degree of M. A. He then entered Columbia Law School, teaching at the same time in Adelphi Academy, and two years later, in 1892, was admitted to the bar. He has practiced

Edward Fallows

in New York city, giving his attention to general law, although his specialty is corporation and surrogate practice. In 1898 he was elected to the New York state assembly from the 21st district in New York city, and was re-elected in 1899 by a large majority. His record has been a remarkably good one. He is a member of the Loyal Legion; the City Club; the Yale Club; the Bar Association; the Republican Club; Sons of the American Revolution; Lafayette Camp of the Sons of Veterans; the Medico-Legal Society; the West Side Republican Club; the Albion Lodge of Freemasons; the

Alpha Delta Phi and the Phi Delta Phi. He was married in Boston, June 14, 1893, to Julia Haughton, daughter of William P. and Annie Richards (Kittredge), of that city, and has one child.

BLAKE, George Fordyce, inventor and manufacturer, was born at Farmington, Me., May 20, 1819, son of Thomas Dawes Blake, and a descendant in the seventh generation of William Blake, who came from Little Braddow, Essex, England, in 1630, and settled in Dorchester, Mass. After attending the common schools of his native place, at the age of fourteen he

became an apprentice to a house carpenter, and for about thirteen years worked at this trade. Having settled in Medford, Mass., he engaged with Peter Hubbell, a brick manufacturer, of Cambridge, as a mechanical engineer, and to take general charge of his works. In November, 1861, he patented a machine for pulverizing not only the peculiar Medford clay, but other clay for bricks. About the same time he invented a water meter, patents for which were granted April 1, 1852, March 23, 1865, and Sept. 12, 1865. The brickyard business, in 1864, both at Cambridge and at Medford, having passed into the hands of the Bay State Brick Co., Mr. Blake, though retaining the position of directing engineer, became associated with Peter Hubbell and Job A. Turner, under the firm name of George F. Blake & Co., in the manufacture of water meters and steam pumps, and for this purpose they purchased a building on Province street, Boston. The steam-pumps were manufactured under Mr. Blake's patent, granted April 12, 1864. The interest of Mr. Hubbell was soon after bought by Messrs. Blake and Turner, and their sons, Thomas D. Blake and Edward C. Turner, became members of the firm; finally the business was organized as a joint stock company, under the style of the George F. Blake Manufacturing Co.

After the issue of his first patent on a steam-pump in April, 1864, his attention was directed to further improvements, for which numerous patents were granted him, his aim being to adapt the various pumps built by him to the special work which each had to perform, including the pumping of liquids, from the lightest to the heaviest gravity. He was married, in 18 , to Martha J. Skinner, of Lynnfield. His son, George F. Blake, became a prominent manufacturer of Worcester, Mass. He died

Geo. F. Blake

STONE, William Leete, editor and author, was born in New York city, April 4, 1835, son of William Leete and Susannah P. (Wayland) Stone. His earliest American ancestor was John Stone, who came over in 1629 in the same ship with William Leete, his great great-grandfather, who was afterwards royal governor of Connecticut, and hid the regicides, Goffe and Whalley. His mother was a sister of the late Pres. Wayland, of Brown University. Mr. Stone received a thorough classical education, his college course at Brown University being interrupted for a trip to Germany. He was graduated at Brown University in 1857. He then took up the study of law, and after being admitted to the bar practiced in Saratoga Springs, N. Y., in 1860-62. In 1863 he was the owner and editor of the "College Review." In 1864 he became city editor of the "New York Journal of Commerce," and held that position for two years. Mr. Stone has contributed many addresses and papers upon historical subjects. He is a member of the Oneida Historical Society; Chicago Historical Society; Maine Historical Society; Vermont Historical Society; Buffalo Historical Society; New Haven Colony Historical Society; Johnstown Historical Society; New Hampshire Historical Society; Rhode Island Historical Society; Wisconsin Historical Society; Trinity Historical Society, Dallas, Tex.; American Historical Association; Rutland Society of Natural Sciences; Saratoga Rowing Association; Musical and Dramatic Society of Athens, Greece; the Cosmos Club, Jersey City, N. J.; New Jersey Historical Society; Brown University Club, and the American Authors' Guild, and is also corresponding member of many other associations. He is the author

of: "The Life and Times of Sir William Johnson, Bart." (1865); "Revolutionary Letters" (1891); "Pausan's Journal" (1886); "Burgoyne's Campaign and St. Leger's Expedition" (1877); "Life and Military Journals of Maj. Gen. Riedesel" (1868); "Letters and Journals of Mrs. Gen. Riedesel" (1867); "History of New York City" (1872); "Life and Writings of Col. William L. Stone" (1891); "Reminiscences of Saratoga and Ballston" (1875); "The Saratoga Battle Grounds" (1895); "Ballads of the Burgoyne Campaign" (1893); "Sir John Johnson's Orderly Book" (1882); "Historical Guide-Book to Saratoga Springs and Vicinity" (1863); "History of the Centennial Celebration of Burgoyne's Surrender" (1877); "Third Supplement to Dowling's History of Romanism" (1881); "The Starin Genealogy" (1892); "The Stone Genealogy" (1888); "History of Washington County, N. Y., the Classic Ground of the Revolution" (1891); "Life of George Clinton" (in press), etc. On June 1, 1879, he was married to Harriet D., daughter of Jonathan Gillette, of Cleveland, O. They have three sons and one daughter.

MUDGE, Henry Uri, railroad manager, was born at Minden, Mich., June 9, 1856, son of John and Sarah (Getty) Mudge. He received a common school education, and in 1872 removed with his father to Sterling, Kan., where he became employed as a water carrier on the Atchison, Topeka and Santa Fe railroad. He studied telegraphy during his spare time until 1874, when he was appointed telegrapher at Sterling, and for the following two years served in this capacity at various depots. In 1876 he became a brakeman, and later conductor. Until 1884 he served as conductor and train despatcher, when he was appointed roadmaster of the New Mexico division; in 1887 was appointed trainmaster, and in 1889 superintendent of the Rio Grande division. In 1893 Mr. Mudge was transferred to the western division, at Pueblo, Colo., and in May was appointed general superintendent of the western division. In June,

1894, he was transferred to the eastern division, and in 1896 was appointed general superintendent of the entire system. He was made manager of the road in 1900. Mr. Mudge is president of the Kansas City Belt Railway Co., Pecos Valley Railway Co., Southern Kansas Railway Co., of Texas, and of several town and land companies. He was married, July 11, 1878, to Arwilde, daughter of Capt. Isaac Morris, of Topeka, Kan., and has four children.

KELLEY, Edgar Stillman, composer, was born at Sparta, Wis., April 14, 1857, son of Hiram Edgar and Mary Clarinda (Bingham) Kelley. He is a descendant of William Kelley, a native of Rhode Island and a Presbyterian deacon, who served in the Continental army during the revolution, and his wife, Rebecca Tripp, whose family settled in Rhode Island as early as 1639. On his mother's side he is the eleventh in line from William Rockwell, of Dorchester, England, a deacon of the first Puritan church that settled as a body in this country at Dorchester, Mass., in 1630. His mother is also descended from Thomas Bingham, of Sheffield, England, who settled at Windham, Conn., in 1642; it is through this branch of the family, who were nearly all musicians, that Mr. Kelley inherits his musical talent. He received his first instruction on the piano from his mother, when he was eight years old. During 1874-76 he studied

pianoforte in Chicago under N. Ledochowski and counterpoint with Clarence Eddy. In 18 he went to Germany to continue his work and remained four years in Stuttgart, studying the piano under Krüger and Spiehl; the organ under Frederick Fink; and theory and orchestration under Max Seifriz. It was while he was studying with Seifriz that his first compositions were completed: Opus 1, theme and variations for string quartet; Opus 2, three pieces for pianoforte, the "Flower Seekers," "Confluentia," and the "Headless Horseman." In 1880 he went to California, where he spent six years, composing during this period Opus 3, a "Nuptial Ode" for tenor solo, male chorus, and orchestra, and the music for "Mabel," the overture of which was performed by Theodore Thomas in Chicago, in 1883, and the whole work later in San Francisco. The success of this worked to its repetition in concert form the next year in Boston, New York, and Brooklyn. The production of his operetta, "Puritania," at the Tremont Theatre, Boston, in 1892, which Mr. Kelley himself superintended, greatly increased his reputation. This work (Opus 4) had a successful run of a hundred performances and was afterward received with favor in other cities. For some years Mr. Kelley lived at San Rafael, Cal., where he composed his suite, "Aladdin," founded on sketches of Chinese music. This has been twice given under his direction at the San Francisco Symphony concerts; the first movement was played at a concert of the Manuscript Society, New York, in April 1891, and later by Seidl's orchestra. Other works of his are a series of four-hand piano pieces, Opus 5, "Phases of Love," six songs; Opus 6, settings of poems by Poe; Eldorado and Israel, the latter arranged with orchestral accompaniment; Opus 8. Resuming his labors in New York he produced his entire "Aladdin" suite and a movement from a new symphony at the orchestral concert of the Manuscript Society in April, 1896; the former was afterward given twice by Anton Seidl. Later he composed the music for "Prometheus Bound" of Eschylus, a quintette for piano and strings, and a humorous symphony, "Gulliver." Mr. Kelley contributes frequently to the leading musical journals of this country and is actively engaged in university extension work, having studied foreign music with a thoroughness that enables him to lecture authoritatively. He is remarkable as a composer for his originality, and although he makes considerable use of classic forms his point of view is always novel. His knowledge of Chinese music, shown in the suite "Aladdin," is especially remarkable, but he also knows well ancient Greek, Egyptian, and Arabian methods; in his incidental music for the remarkable stage production of "Ben Hur," he has made superb use of these latter schools. He is a member of the Society of American Musicians and Composers and of the American National Institute of Arts and Letters. In 1901 he accepted a professorship in the department of music, Yale University. He was married, July 23, 1891, to Jessie M., daughter of Andrew K. Gregg, of San Francisco. His wife is an accomplished pianist and singer.

GILBERT, Rufus Henry, physician and inventor, was born at Guilford, N. Y., Jan. 26, 1832, son of William Dwight Gilbert, one of the associate judges of Steuben county. He received only a rudimentary education and began life as a clerk in a drug store; but he had mechanical tastes and succeeded in obtaining a position in a manufactory. He remained in this situation for six years; then went to Corning, N. Y., where he began the study of medicine. After the preparatory course he entered the College of Physicians and Surgeons in New York city in 18—-. After attending a course of lectures he returned to Corning, where for about two years

he worked in the office of a practicing physician in order to accumulate funds. He then completed his medical course in New York city, and after graduation embarked on the practice of his profession at Corning. On account of having performed several difficult operations, his fame spread, and success was assured; but his health became impaired, and his wife having died he abandoned practice and visited Europe. Dr. Gilbert's intention was to study hospital systems, but while abroad he became interested in the problem of rapid transit in large cities. The civil war breaking out soon after his return to the United States, he enlisted as surgeon in the Duran Zouaves. He saw action at the battle of Big Bethel, and it was here that he performed the first amputation under fire made during the war. In 18— he was medical inspector at Baltimore, and in 18— medical director at Fortress Monroe, and at various periods was attached to the staffs of Gens. Dix, Thomas and Palmer. He was also medical director and superintendent of the U. S. army hospitals, a position he held until the close of the war, when he resigned and returned to Corning. In 1865 he became assistant superintendent of the Central railroad of New Jersey, and again pursued his study of rapid transit. Resigning from the employ of the Jersey Central in 1867, he devoted all his thought and energy to the problem of rapid transit in New York. He first invented a pneumatic system, but abandoned it as impracticable. He then invented the elevated railway, although not as finally constructed. He agitated the subject continually, educating the people up to the idea, and finally a charter was granted by the state legislature of 1871-72 for a road through Sixth and Second avenues. His patent covered an arch thrown from one side of the street to the other, upon which a local and a through train were to run on independent tracks, and which would afford support for telegraph wires. His unremitting efforts, both in this country and Europe, finally created confidence in his plan, and the funds were obtained. The structure on Sixth avenue was then begun, and on May 1, 1878, the first car was run from Trinity Church to Fifty-ninth street, in sixteen minutes. On June 6, 1878, the Gilbert Elevated Road was opened to the public, and on June 7th application was made to have the name changed to that of the Metropolitan Transit Co. on the grounds that this would induce capitalists to invest and securities would not be affected by the death of Dr. Gilbert, though he was still retained as chief inspecting engineer of the road and held a large block of stock. Besides his talent as a physician, Dr. Gilbert possessed ability as a lecturer, and was widely known in that capacity. He was married, first, to a daughter of Chief-Justice Maynard, of the supreme court of —. She died childless, and he was married the second time to the daughter of J. W. Price, of New York city, who bore him two children. He died in New York city, July 10, 1885.

DONIPHAN, Alexander William, soldier, was born in Mason county, Ky., July 9, 1808, son of Joseph Doniphan, who had removed there from Eastern Virginia in 1790. He was graduated at Augusta College with distinction at the age of eighteen, and then began the study of law. On being admitted to the bar, in 1830, he began practice at Lexington, Mo.; but in 1833 he removed to Liberty, Clay co., where he continued to reside for thirty years, winning for himself a foremost place among the lawyers of Missouri by his eloquence, forensic ability and exalted character. He represented Clay county in the general assembly of Missouri in 1836, 1840 and 1854. He devoted himself with much zeal to military studies, and was brigadier-general in command of the 1st brigade of state militia when, in

1838, the governor ordered out the militia to drive the Mormons from the state. He marched with a part of his brigade to the Mormon encampment, where Joseph Smith acceded to his terms, giving up the arms of his followers, and promising to leave the state. At the outbreak of the Mexican war, in 1846, he became colonel of the 1st regiment of Missouri mounted volunteers, and joining the army of the west, took up the line of march June 26th, under Gen. Stephen W. Kearny. After taking peaceable possession of New Mexico, Gen. Kearny left him in command at Santa Fé, and started for California. He subdued a warlike outbreak of the Navajo Indians, and left Valverde Dec. 11th to report to Gen. Wool at Chihuahua, by order of Gen. Kearny. On Dec. 25th he met a superior force of 4,200 Mexicans at Braico river, and, after a sharp fight, they fled, leaving sixty three dead and 150 wounded, his own loss being seven wounded. He entered El Paso, without resistance, Dec. 27th. After a weary march of 250 miles, during which many of his animals died of exhaustion on the deserts, he encountered a force of 4,000 Mexicans strongly entrenched at the pass of the Sacramento, and, with only 924 men, he succeeded in routing the enemy and capturing all their artillery, large supplies of ammunition and many wagons. His loss was one killed and seven wounded; while the Mexicans left 304 dead upon the field. This laid the whole state of Chihuahua at his feet, and on the next day, March 1, 1847, he entered the capital, an opulent city of 30,000 inhabitants. He then went to Saltillo; but as his men's term of service had almost expired, and Taylor's campaign had been finished, Col. Doniphan was ordered to take his men to Brazos Santiago, and embark for New Orleans, where his force was subsequently mustered out. He then returned to Liberty, Mo., and resumed the practice of law. He was sent as a commissioner to the peace conference at Washington in 1861, and labored with much zeal and eloquence to prevent the coming conflict. He subsequently removed to Richmond, Mo., where he died Aug. 8, 1887.

ANTHONY, William Arnold, scientist, was born at Coventry, R. I., Nov. 17, 1835, son of William H. and Hannah Whipple (Arnold) Anthony, and a descendant of John Anthony, who came, with his wife, to this country about 1646. He was educated in Washington village, R. I.; the Friends' School, Providence, and the Providence Conference Seminary at East Greenwich, R. I. He entered the scientific school of Yale College, and was graduated at the head of his class, with the degree of Ph. B., in 1856. For a short time following his graduation he was principal of the public schools in Crompton, R. I., and he taught for a year in the Providence Conference Seminary. He spent a year in a cotton machinery manufactory, to acquire a thorough practical knowledge of tools and their uses, and then resumed teaching, first at the Delaware Literary Institute, Franklin, N. Y.; later at Antioch College, Ohio. He next went to the Iowa State Agricultural College, at Ames, Ia., as professor of mechanics and physics, and in 1872 he was called to fill the chair of physics at Cornell University. During the fifteen years there he did much to originate and develop a course of study in electrical engineering, which to-day is one of the most important in the university. In 1887 he accepted the position of con-

sulting engineer of the Mather Electric Co., at Manchester, Conn., a position he resigned in 1893, to open an office in New York city as consulting electrical engineer and electrical expert, which he still continues (1901). In 1894 Prof. Anthony became connected with the Cooper Union night school of science as professor of physics, where he continues to teach. In connection with Prof. Brackett, of Princeton University, he published "Elementary Text-book of Physics" (1887), and in 1898 he published "Lecture Notes on the Theory of Electrical Measurements." He has been for many years a regular contributor to scientific journals and magazines. Prof. Anthony is a member of the American Association for the Advancement of Science; the American Institute of Electrical Engineers, and the Franklin Institute, of Philadelphia, Pa. In 1861 he was married to Eliza Mathilda, daughter of James and Caroline (Remington) Girven, and has one son, Charles C. Anthony.

SMITH, Charles Ferguson, soldier, was born in Philadelphia, Pa., April 24, 1807, son of Samuel Blair and Mary (Ferguson) Smith, and grandson of John Blair Smith, the second president of Hampden-Sidney College. His maternal grandfather, Ebenezer Ferguson, was a colonel in the Continental army, and his father was an assistant surgeon in the U. S. army. He was graduated at the U. S. Military Academy in 1825, became second lieutenant in the 2d artillery, was promoted first lieutenant in 1832 and captain of the same regiment in 1838. In 1829-31 he served as assistant instructor of infantry tactics, in 1831-38 as adjutant and as commandant of cadets and instructor of infantry tactics in 1838-42. During the military occupation of Texas in 1845-46 he commanded four companies of artillery, which acted as infantry, becoming famous as "Smith's light battalion"; this battalion formed the advance, when in March, 1846, Gen. Taylor crossed the Colorado river, the passage of which, it was believed, would be disputed by the Mexicans. For gallant and distinguished conduct at the battles of Palo Alto and Resaca de la Palma he was brevetted major. He was in command of the party which stormed Loma Federacion, advancing steadily in the face of a plunging artillery fire until they climbed over the parapet and turned the guns on the flying Mexicans. For his conduct in the several conflicts at Monterey he received the brevet of major. He was present at the battles of Vera Cruz, Cerro Gordo, San Antonio and Churubusco, and Aug. 20, 1847, was brevetted colonel for his conduct at Churubusco and Contreras. At Contreras his battalion was at the front, supported by Cadwallader's brigade, and in the attack upon the enemy's intrenchments cut off the retreat of the Mexicans northward, taking many prisoners. He took part in the storming of Chapultepec and the capture of the city of Mexico, again receiving honorable mention in despatches. In 1849-51 he was a member of a board of officers to devise a system of instruction for siege, garrison, sea-coast, and mountain artillery, which was adopted May 10, 1851. In 1854 he was promoted major of the 1st artillery, and in 1855 lieutenant-colonel of the 10th regiment of infantry. He engaged in the Utah expedition in 1857-61, and was in command of the department of Utah for a time. At the beginning of the disturbances that preceded the civil war, he was placed in charge of the city and department

C. F. Smith

of Washington, D. C. In August, 1861, he was appointed brigadier general of volunteers and ordered to Kentucky; in November he was placed in command of the national forces at Paducah, as colonel of the 3d U. S. infantry. He acquired reputation as an adroit tactician in the operations about forts Henry and Donelson, at the latter place commanding, under Grant, the division that held the left of the investing lines, and leading it in person, he stormed and captured all the high ground on the Confederate right. Upon the order of Gen. Halleck, Grant turned over the command of the Tennessee expedition to Gen. Smith, who conducted the movement up the Tennessee river, arrived at Savannah with a large fleet about March 13th, took command of that city and prepared the advance upon Shiloh, being promoted major-general of volunteers on March 23d. In stepping on board the boat at Fort Donelson, he received a scratch, and, gangrene setting in, he died at Savannah, April 25, 1862. Gen. Sherman says of him in his "Memoirs": "He was a very handsome and soldierly man, of great experience, and at the battle of Donelson had acted with so much personal bravery that to him many attributed the success of the assault."

BURTON, Richard Eugene, author and educator, was born in Hartford, Conn., March 14, 1859, son of Rev. Dr. Nathaniel J. and Rachel (Chase) Burton. His branch of the Burton family settled in Connecticut in the seventeenth century, and his stock has been clerical for several generations. His father, for many years pastor of the Park Congregational Church, was a successor to Horace Bushnell, whom he resembled in the originality of his thought and his vigorous and poetic language, but surpassed in eloquence. Broad sympathy, irrepresible tenderness of heart and infectious humor, also characterized Dr. Burton, a glimpse of whose social side is afforded in Charles Dudley Warner's "Backlog Studies," in which he figures. The son received his early education at the "Gumery," a school at Washington, Conn., described in Dr. Holland's "Arthur Bonnicastle," and located in a region whose beauty stimulates the imagination. He next entered Amherst College, but at the end of a year was obliged to leave on account of ill-health, and, returning to Hartford, studied at Trinity College, where he was graduated in 1883. Philology and literature had especial charms for him, and these branches occupied him for four years at Johns Hopkins University, where he received the degree of Ph.D. for original investigation. A year of residence in New York city followed, during which he was managing editor of "The Churchman"; another year was spent in travel in Europe, and then, in 1890, he became literary editor of the Hartford "Courant," contributing to that journal editorials on music, art and literature. He held this position for seven years, during which he was a member of the Monday Evening Club and the Twilight Club. In 1897-98 he was an assistant editor on the Warner "Library of the World's Best Literature"; in 1898 he lectured at Johns Hopkins University, and in the same year was appointed professor of English literature at the University of Minnesota. Dr. Burton has done considerable work as a lecturer, and in that capacity has traveled from Connecticut to California; he is a contributor of prose and of verse to various periodicals, and has published a number of volumes. His prose works include "Dogs and Dog Literature" (1895); "Literary Likings" (1895), and "John G. Whittier," a biography (1901). He also edited his father's "Lectures on Preaching," delivered at Yale. His volumes of verse include: "Dumb in June" (1895); "Memorial Day and Other Poems" (1897), and "Lyrics of Brotherhood" (1900). Of his "Memorial Day" Hamilton W. Mabie said:

of Washington, D. C. In August, 1861, he was appointed brigadier general of volunteers and ordered to Kentucky; in November he was placed in command of the national forces at Paducah, as colonel of the 3d U. S. infantry. He acquired reputation as an adroit tactician in the operations about forts Henry and Donelson, at the latter place commanding, under Grant, the division that held the left of the investing lines, and leading it in person, he stormed and captured all the high ground on the Confederate right. Upon the order of Gen. Halleck, Grant turned over the command of the Tennessee expedition to Gen. Smith, who conducted the movement up the Tennessee river, arrived at Savannah with a large fleet about March 13th, took command of that city and prepared the advance upon Shiloh, being promoted major-general of volunteers on March 23d. In stepping on board the boat at Fort Donelson, he received a scratch, and, gangrene setting in, he died at Savannah, April 25, 1862. Gen. Sherman says of him in his "Memoirs": "He was a very handsome and soldierly man, of great experience, and at the battle of Donelson had acted with so much personal bravery that to him many attributed the success of the assault."

"His note is clear and resonant; whatever its qualities may be, it is his own. He is somewhat lacking in that facility which soon, in so many cases, becomes fatal to all real utterance. He is sometimes a little too indifferent to the grace which lies within his reach; but this is the fault of a genuine nature, and it often predicts balanced strength and a workmanship which gets its vitality not from instinct, but from intelligence. The spontaneity, freshness and individuality of a good deal of Mr. Burton's verse carry with them the conviction that he is not making lines, but giving form to real poetic insights and experiences." Dr. Burton is a member of the Authors' Club and Players' Club, New York city. He was married in London, England, Aug. 7, 1889, to Mrs. A. R. Parkhurst, daughter of the late Albert Tingley, of Providence, R. I.

SALTER, Richard, clergyman, was born in Boston, Mass., in 1723. He was graduated at Harvard College in 1739, after which he studied medicine, but relinquished it for theology, in which he qualified himself for the ministry, and for some time supplied a pulpit in Boston. His first and only settled pastorate was that of the Congregational church at Mansfield, Conn., to which he was called in 1744. He was ordained there on June 27th of that year, and remained until his death. He became actively interested in Yale, especially the department of Greek, Hebrew and Oriental languages, in which he was a proficient scholar, and gave to the college a farm in 1781, which was sold for \$2,000, the proceeds to be devoted to the study of these languages. The degree of D. D. was conferred upon him by Yale in 1782, and for ten years from 1771 he was a fellow of the Yale corporation. He published an "Election Sermon" (1768). Dr. Salter died in Mansfield, April 14, 1787.

CLAIBORNE, John Francis Hamtramck, congressman and author, was born at Natchez, Miss., April 24, 1809, son of Ferdinand Leigh Claiborne and nephew of Sen. William C. C. Claiborne. He was educated in Virginia, studied law, and was admitted to the bar of that state. He did not practice, however, but, having become interested in politics while still a young man, was chosen a member of the legislature of the state of Mississippi, and was twice re-elected to the same position. In 1835 he was elected Democratic congressman from Mississippi, and continued a member of the house of representatives until Jan. 31, 1838. Returning to Natchez, Mr. Claiborne became the editor of the "Fair Trader." In 1844 he settled in New Orleans, and there, still continuing in journalism, he edited consecutively the "Jeffersonian," the "Statesman," and the "Louisiana Courier." Pres. Pierce appointed Mr. Claiborne U. S. timber agent for Louisiana and Mississippi, and in this employment he made a fortune, with which he purchased a plantation near Natchez, called Dunbarton, where he resided during the latter part of his life, devoting himself to literature. He was quite a voluminous writer, contributing largely to the current magazines, and was the author of "Life and Correspondence of Gen. John A. Quitman," a work in 2 vols. (1860), "Life and Times of Gen. Sam. Dale" (1869), and "Mississippi, as a Province, a Territory and a State" (1850). His death occurred at Natchez, Miss., May 17, 1884.

OUTHWAITE, Joseph H., congressman, was born in Cleveland, O., Dec. 5, 1841, son of George and Harriett (Hodgson) Outhwaite, both of English parentage. When quite young, his family removed to Zanesville, O., where he was educated. He taught for two years in the Zanesville High School, and for three years in the North Grammar School, Columbus, meanwhile studying law. He was admitted to the bar in 1866, and removing to Osceola, Mo.,

practiced law, and attained prominence as a leader of the liberal movement, which restored the franchise to ex-Confederates, and bestowed it upon the negro. In 1871 he returned to Ohio, and in 1874 and 1876 was elected prosecuting attorney of Franklin county, without opposition. From 1879 until 1883 he was a trustee of the county Children's Home, and in the last year a trustee of the sinking fund of the city of Columbus, being reappointed one year later for five years. In 1884 he was elected to the 49th congress, and by re-election served for four terms more. Mr. Outhwaite's business capacity was shown particularly as a member of the 49th congress, and as chairman in the 50th of the committee on Pacific railroads, in the bill bearing his name, to secure the indebtedness of the Union Pacific to the government. Mr. Outhwaite was also a member of the select committee to inquire into the causes of the great strike upon the Southwestern railroad system, and in the 49th congress served on the committee for revision of laws, and in the 50th and 51st, upon the committee on elections. In the 52d and 53d he was chairman of the committee on military affairs. He took an active part in the discussion on the Mills' bill, making several speeches during its consideration by the house. In the 53d congress he was a member of the committee on rules, that important committee to which is submitted all questions relating to the rules of procedure and the order of business of the house. While in congress he was recognized as an active, painstaking and industrious worker, an able debater, and a prominent leader of the Democracy in that body, as well as in his own state. Upon retiring from congress in March, 1895, he was appointed by Pres. Cleveland civilian member of the board of ordnance and fortification, on which he continued to serve during the succeeding administration. In 1896 he was one of the originators of the sound money Democratic movement, and took an earnest and active part in promoting its cause. He was the delegate-at-large from the state of Ohio to the Indianapolis convention of the National Democracy, which nominated John M. Palmer, and zealously advocated its principles during the whole of the campaign. He was a trustee of the Ohio State University in 1897. He was married, in June, 1870, to Ellen R. Peabody, of Zanesville, O., niece of the philanthropist, George Peabody. They have two sons.

SOPER, Henry Marlin, educator and orator, was born at Aiken, McHenry co., Ill., March 17, 1850, son of Isaiah W. and Polly L. (Trowbridge) Soper. His paternal ancestors took an active part in the wars of the revolution and of 1812. One, Jerome Soper, was memorialized by congress for special gallantry at the battle of Platt-burg. His mother's father, Daniel J. Trowbridge, was a drummer boy in the latter war. He was educated at Wadsworth and Sharon academies and other private schools of his native state and at the Illinois State Normal University. During the intervals of study he worked on his father's farm, and at the age of eighteen began his career as a teacher in a country school. From a very early age his interest in oratory and public speaking was marked, and after a few years as a practical

educator in public and high schools, he entered on a course in oratory in Philadelphia. Later he studied privately with Mark Bailey, of Yale College, and other eminent masters of the art. From 1876 to 1877 he taught oratory in Shortridge Academy, Media, Pa. Going to Chicago in September, 1877, he organized his first independent class, which was the beginning of the Soper School of Oratory, of which he is now president. Meantime he was special instructor in several academies and seminaries in and about Chicago, notably the Morgan Park Theological Seminary, Lake Forest University and the

University of Chicago. Mr. Soper has written for "Music and Drama," of Chicago, and other elocutionary periodicals.

He has also delivered papers and addresses before the National Association of Elocutionists, of which he was unanimously re-elected president in June, 1900, and has compiled a series entitled "Scrap-Book Recitations." In 1892 he was one of the founders of the Illinois Association of Elocutionists, of which he was president and secretary for several terms.

He was a member of the committee on permanent organization of the National Association of Elocutionists in 1892, and after holding nearly every other

office, was, at the annual convention in 1899, elected president. Prof. Soper is a member of the Methodist Episcopal church, of which he is a generous supporter, and is an active worker in the temperance cause and in behalf of the Republican party. He was married, July 6, 1880, to Dora, daughter of Jacob P. and Patience S. Schoonmaker, of Champlain, Ill. Her family is of Dutch descent, and was originally settled in New York state. She was a Methodist missionary in Tokio, Japan, for five years. They have one son, Dunne S. Soper.

HURLBUT, Jesse Lyman, editor and clergyman, was born in New York city, Feb. 15, 1843, son of Samuel and Evelina (Proff) Hurlbut, and eighth in descent from Thomas Hurlbut, a native of Scotland, who settled in Connecticut in 1635. Thomas Hurlbut took part in the Pequot war under Lion Gardiner, and for his services in having saved a number of his companions from slaughter received a grant of 200 acres of land in what is now the town of Wethersfield, Conn., which was for several generations the family homestead. The line of descent runs through (1) Thomas, (2) Joseph, (3) John, (4) Salmon, (5) Samuel, and (6) Abiram, Dr. Hurlbut's grandfather. He was graduated at the Wesleyan University, Middletown, Conn., in 1864, and after teaching one year in the Pennington (N. J.) Seminary, he was received into the Newark conference of the Methodist Episcopal church. For fourteen years he was engaged in pastoral work, and in 1879 he became assistant to Dr. J. H. Vincent, editor and secretary of Sunday-school work in the Methodist Episcopal Church, a position to which Dr. Hurlbut succeeded in 1888, as well as that of corresponding secretary of the Sunday-school Union and Tract Society. Dr. Hurlbut was one of the founders of the Epworth League of the Methodist Episcopal Church, and was its first secretary from 1889 until 1892. Since 1875 he has been connected with the Chautauqua Assembly, as secretary of the Sunday-school normal department for the training of teachers during the entire period, and since 1882 principal of the Chautauqua Literary and Scientific Circle. In 1900 he left editorial and secretarial work, and in 1901 became pastor of the

Methodist Episcopal church in Morristown, N. J. In 1880 he received the degree of D. D. from Syracuse University. For several years he assisted Dr. J. H. Vincent in the preparation of uniform Sunday-school lesson papers, and wrote with him several books on Sunday-school lessons. Dr. Hurlbut is the author of the "Berean Lesson and Question Books for 1884-88"; "American History" (1884); "Manual of Biblical Geography" (1882); "Outline Normal Lessons" (1883); "Supplemental Lessons for the Sunday School" (1887); "Studies in the Four Gospels" (1889); "Outlines in Old Testament History" (1890); "Revised Normal Lessons" (1893), and, with an assistant, prepared, from 1891 to 1900, the annual volume, "Illustrative Notes on the International Sunday-school Lessons." He has been in charge of the Ottawa (Kan.) Chautauqua Assembly since 1881, and for a number of years was in charge of similar assemblies at Madison, Wis., and South Framingham, Mass. He was married, March 5, 1867, to Mary M., daughter of Lucius A. Chase, of Boston, and afterward of New York city. They have had seven children, of whom a son, Charles C., and two daughters, Mary E. and Bertha G., are living.

STEARNS, Irving Ariel, mining engineer, was born at Rushville, Ontario co., N. Y., Sept. 12, 1845, son of George Washington and Miranda (Tufts) Stearns, and descendant of Charles Stearns, an Englishman, who was admitted a freeman at Watertown, Mass., May 6, 1646. The line of descent runs through his son, John, who was married to Judith Lawrence; through their son, George, and his wife, Hannah Sanderson; through their son, Jonathan, and his wife, Beulah Chadwick; through their son, Ebenezer, and his wife, Rebecca Lakely, and through their son, Ariel, and his wife, Analine Mapes, who were Mr. Stearns' grandparents. His parents removed to Michigan when he was about twenty years of age, and for a number of years his father was editor and proprietor of the Coldwater "Republican." Irving A. Stearns was educated at Rushville Academy, Benedict's Collegiate Institute, Rochester, N. Y., and Rensselaer Polytechnic Institute, Troy, N. Y., where he was graduated in 1868. He remained at Troy for a year as assistant professor of analytical chemistry, and then removed to Wilkes-Barre, where he spent two years as an assistant in general engineering. He was superintendent of the McNeal Coal and Iron Co., 1871-72; was engaged in general engineering in 1872-85; was manager of the coal companies of the Pennsylvania railroad in 1885-97; president of Cox Bros. & Co., Inc., and the Delaware, Susquehanna & Schuylkill Railroad Co. since 1897. He is president of the Penn Mining Co., of Wyoming, and vice-president of the People's Telephone Co., of Wilkes-Barre; director of the Wyoming National Bank, Vulcan Iron Works, Gas Co. of Luzerne county, Wyoming Valley Electric Light Co., all of Wilkes-Barre, and of the Standard Trust Co. and Hubbard-Rodman-Ely Safe Co., of New York city, and of the Lehigh Valley Railroad Co.; a trustee of the Wilkes-Barre Armory Association, and has been a director of the Harry Hillman Academy and of the City Hospital; and a member of the Westmoreland Club, all of Wilkes-Barre. He is a member of the Wyoming

Henry M. Soper

Irving A. Stearns

Historical and Geological Society, of Wilkes Barre; the Union League clubs of Philadelphia and New York city; the University, Lawyers', Engineers' and National Arts clubs, New York city; the American Society of Civil Engineers; the American Institute of Mining Engineers; the Wyoming Valley Country Club, of Wilkes Barre, and the Garden City (Long Island) Golf Club. He was married at Wilkes Barre, Nov. 20, 1872, to Florida, daughter of Lazarus D. and Esther (Wadhams) Shoemaker. She bore him two sons, now deceased, and a daughter.

DODGE, Walter Phelps, lawyer and author, was born at Beirut, Syria, June 13, 1839, son of David Stuart and Ellen Ada (Phelps) Dodge, and nephew of William Walter Phelps, the statesman. His first American ancestor was William Dodge, of Dodgeford, Somerset, England, who settled at Salem, Mass., about 1629. His paternal great-grandfather, Lieut. Thomas Phelps, of Simsbury, Conn., fought in the revolutionary war, as did also his mother's grandfather, Capt. David Phelps, also of Simsbury. The Phelps family have been settled in this part of Connecticut for 250 years, and here Mr. Dodge, following family traditions, continues to make his home when in the United States. Through the interest his grandfather, William Earl Dodge, took in foreign missions, David Stuart Dodge went to Syria, where he assisted in founding the Syrian Protestant College at Beirut. He was president of the Board of Home Missions of the Presbyterian Church for many years. In 1859 Yale University conferred upon him the degree of D. D. His son, Walter Phelps Dodge, spent two years studying in Greece and Germany under private tutors; on his return to America he entered the class of 1861 at Yale, but left it before graduation, and went to Oxford to continue his studies. He spent about three years in travel in the south of Europe—mainly in Italy, Sardinia and Corsica. About this time he decided to study English law, and in June, 1868, he was called to the bar by the Middle Temple, London, where his ancestor, John Phelps, had been called in 1841. Mr. Dodge makes a speciality of international law. He continues to practice in London as well as in the United States, dividing his time about equally between the two places. He is the author

of several volumes of short stories: "Three Greek Tales," (1892); "As the Crow Flies," (1893); "A Strong Man Armed" (1896); "Sea of Love" (1898), and a standard work on the reign of Edward II., entitled "Piers Gaveston: A Chapter of Early Constitutional History" (1899). He is a fellow of the Royal Geographical Society; a member of the Reform and Wellington clubs, London, and a member of the Sons of the Revolution and the Authors' Club, New York. In politics he is a Republican. In 1888 he was married to Ida Nelson Cooke, of Edinburgh, Scot-

land, a daughter of Alfred Gololphin Cooke, of Manningham Hall, Yorkshire, England. They have a son, Stuart Phelps, and a daughter, Ellen Ada Phelps Dodge.

ENLOE, Benjamin Augustine, was born near Clarkburg, Carroll co., Tenn., Jan. 18, 1848, son of Benjamin F. and Nancy O. (Shepherd) Enloe. His family is of Scotch descent and was originally settled in Charleston, S. C., whence his immediate ancestors removed to North Carolina, and from there to Tennessee. The name is well represented in Kentucky, Illinois and Missouri. The Shepherds also are

well known throughout the South, one of Mr. Enloe's great-uncles, Augustine H. Shepherd, of Surry county, having been congressman from North Carolina for many years. Benjamin A. Enloe was educated in the schools of his native county, at Bethel College, McMoresville (now McKenzie), Tenn., and at Cumberland University, Lebanon, Tenn. He studied law at Lebanon, where he was graduated in January, 1873. Meantime (1869) he was elected to the Tennessee legislature under the old constitution, and again in 1870 under the new one. He practiced law until 1875, when he established the Jackson (Tenn.)

"Sun," of which he was editor and proprietor for ten years. He was elected on the Tilden and Hendricks ticket in 1876, and was appointed a commissioner to negotiate a settlement of the state debt by Gov. Marks in 1878. During 1880-82 he was a member of the Democratic state executive committee, and was president of the state Democratic convention and a delegate to the national Democratic convention in Cincinnati, both in 1880. In 1886 he was elected to the 50th congress from the 8th congressional district of Tennessee, and was re-elected by large majorities to the 51st, 52d and 53d congresses. During his last two terms he was chairman of the house committee on education and a member of the committee on war claims. Meantime, in 1883-84, he was president of the Tennessee Press Association, and after his resignation from congress, on April 18, 1897, he established the Louisville "Daily Dispatch," of which he has since been editor and general manager. He was married, April 5, 1870, to Fannie Ashworth, of Lebanon, Tenn. They have three daughters and one son.

B. A. Enloe

ANDREWS, Christopher Columbus, soldier and diplomat, was born at Hillsborough Upper Village, N. H., Oct. 27, 1829, son of Luther and Nabby (Beard) Andrews. His ancestors were among the earliest settlers of Massachusetts, and his great-grandfather, Ammi Andrews, was a lieutenant in the revolutionary war. His maternal grandfather, Elijah Beard, made his home in Hillsborough, N. H., shortly after the revolution, removing there from Wilmington, Middlesex co., Mass., and was a member of the state legislature for six or seven years. He was educated at the Franconia (N. H.) Academy, and during the winter of 1846 taught a district school. Early in 1847 he commenced legal studies under Hon. Samuel H. Ayer, in his native town, and continued them at the Harvard Law School and in the office of Brigham & Loring, Boston, being admitted to the bar in 1850. He began his professional duties at Newton, Mass., where he was a member of the school board in 1851-52; but in 1853 he removed to Boston, and in the following year to Kansas. After serving in the treasury department he settled in the practice of law at St. Cloud, Minn., in 1857. He was a regular correspondent from there of the Boston "Post"; of the "World," for one year, and of the New York "Evening Post" for several years; was elected to the state senate in 1859, and served on the judiciary committee; was a candidate for presidential elector on the Douglas Democratic ticket in 1860, and delivered thirty addresses with his Republican opponent. The

Walter Phelps Dodge

following year he assisted in establishing the "Minnesota Union," of which he was editor for a time; was elected captain of company I, helped recruit it, and in the civil war, as lieutenant colonel of the 3d Minnesota infantry, assisted in the Vicksburg operations. In July, 1863, he was made colonel of his regiment, and later participated in the campaign which led to the capture of Little Rock, Ark. Here he was placed in command of the post. On April 1, 1864, he commanded the forces in the battle of Fitzhugh's woods, near Augusta, Ark., and led the charge which decided the action; he was appointed brigadier-general, to date from Jan. 4, 1864; and on March 9, 1865, Pres. Lincoln commissioned him major-general by brevet. On the 11th, with over 5,000 men under his command, he began the advance movement of Steele's column to Port Blakely, in the investment and siege of which (April 24 to 9th), his division was in the centre. For a short time he was in command of Selma, Ala.; on May 27, was placed in command of the district of Mobile, and on July 8 assumed command of a district in Texas, with headquarters at Houston, where his speeches and influence did much toward establishing a more stable public opinion. Being relieved in the fall of 1865, he proceeded to his home in Minnesota, and was there mustered out Jan. 15, 1866. In 1869 he was appointed minister to Norway and Sweden, and during the eight and a half years he retained this charge sent many valuable reports on important subjects, including civil service, forestry, education, finance, labor and wages, which were published by the government in "Foreign Relations" and "Commercial Relations of the United States." During the year 1880 he acted as supervisor of the U. S. census in the 3d district of Minnesota, and for a year was editor and principal owner of the St. Paul "Dispatch." In 1882 he was appointed by Pres. Arthur consul-general to Brazil, but was recalled by Pres. Cleveland in 1885. He was appointed chief forest-fire

warden of Minnesota in 1895, and continues (1901) to hold that office. Mr. Andrews published the following works: "Minnesota and Dakota" (1856); "Digest of the Opinions of the Attorneys General of the United States" (1857); "Practical Treatise on the Revenue Laws of the United States" (1858); "Hints to Company Officers on Their Military Duties" (1863); "A History of the Campaign of Mobile" (1867); "Brazil" (1888); "Administrative Reform" (1888), as well as frequent articles in periodicals. He was married, in December, 1868, to Mary Frances, daughter of Enos K. Baxter, and has one child.

BRUCE, Blanche K., senator, was born in Prince Edward county, Va., March 1, 1841. He was born a slave, and, it is said, was given, when quite young, by his master to a son, of about the same age, to be his constant attendant. He received his first education from his young master's tutor, being as well taught as most white youths in the ordinary conditions of life. When he was nineteen years old the civil war began, and his master went into the Confederate army. Then he left the plantation and taught school for a while in Missouri, after which he removed to Oberlin, O., and spent such money as he had saved in receiving an education. After the war he removed to Mississippi, where he engaged in planting with much success. After serving as sergeant-at-arms of the state legislature, a member of

the Mississippi levee board, sheriff and tax collector of Bolivar county, and county superintendent of education, in 1875 he was elected to the U. S. senate. He was the first colored member of that body, and when he came to be sworn into office, he was somewhat embarrassed by the fact that his colleague, James L. Alcorn, who, by custom, was required to conduct him to the presiding officer, was deeply engrossed in a newspaper. Bruce had no acquaintance with the other senators, and he now saw that if he would "go to the front" he must go alone. He, therefore, arose, and was proceeding alone down the aisle, when Roscoe Conkling, seeing his predicament, stepped forward and said: "Excuse me, Mr. Bruce; I did not until just now see that you were without an escort. Permit me"—and he thereupon gave his arm to Bruce, leading him to the vice-president's desk. After the oath was administered Conkling escorted Bruce back to his seat, and later in the day, when the committees were being formed, he asked Bruce if any one was watching out for his interests. Bruce replied that he knew nothing about it, and that he did not even know what his rights were. Conkling volunteered to attend to the matter, and the result was that Bruce was put on some of the more desirable committees, and not long after received a chairmanship. In 1881, soon after the expiration of his term in the U. S. senate, he was appointed by Pres. Garfield register of the treasury, resigning in 1885; and in 1890 he was appointed by Pres. Harrison recorder of deeds for the District of Columbia. He was again appointed register of the treasury, Dec. 3, 1897, retaining the office until his death. He was reputed to be the wealthiest colored man in the country and was also a man of fine culture. He kept up his studies through life, and was especially well read in all subjects relating to his race, having written a number of magazine articles in regard to its future in this country, and also a lecture, which he frequently delivered. His death occurred in Washington, D. C., March 17, 1898.

HART, Albert Bushnell, educator, was born at Charlesville, Mercer co., Pa., July 1, 1854, son of Albert Gaillard and Mary Crosby (Hornell) Hart. His earliest ancestor in America was Stephen Hart, who lived at Cambridge, Mass., from about 1630 to 1638, going from there to Connecticut. His mother was of Swedish descent. The son received his early education at Humiston's Cleveland Institute and at the West High School of Cleveland, and after spending the years from 1874 to 1875 in business in that city, entered Harvard College, at which he was graduated in 1880. He then went abroad to study at L'École des Sciences Politiques, Paris, and at the universities of Berlin and Freiburg, receiving the degree of Ph.D. from the latter in 1883. In the same year he was appointed instructor in history in Harvard University; in 1884 became assistant professor, and in 1897 full professor. During his connection with this institution, by his methods of original research, he has done much to develop the new school of historical study. He is the university editor of the "Harvard Graduates' Magazine," and joint editor of the "American Historical Review," having been connected as such with these periodicals since 1894 and 1895 respectively. He is the author of "Introduction to the Study of Federal Government" (1890); "Epoch Maps, Illustrating American History" (1891); "Formation of the Union" (1892); "Report on History, Civil Government and Political Economy," in collaboration with nine others, and "Practical Essays on American Government" (1893); "Studies in American Education" and "Revised Suggestions on the Study of History and Government of the United States" (1895); "Guide to the Study of American History," conjointly with Edward Channing (1897); "American History Told by

C. Andrews

Contemporaries," in four volumes (1898-1901), and "The Study of History in Schools," with six other authors; "Source-Book of American History"; a life of Salmon P. Chase (1899), and "Foundations of American Foreign Policy" (1901). He has also edited and introduced various works, and is a contributor to the "Forum," "Atlantic Monthly," "Harper's Magazine," "Nation," "Outlook," "Political Science Quarterly," "Quarterly Journal of Economics," "International Monthly," and many other periodicals. He is a member of the Colonial Club of Cambridge, the Papyrus, Cambridge, Examiner, and Schoolmasters' clubs of Boston, and the Century Association of New York city. He has also been a member of the Cambridge school committee and the commission of the Massachusetts Nautical Training School. Prof Hart was married at Manchester, N. H., July 11, 1889, to Mary Hurd, daughter of Horace B. Putnam, and has two sons, Albert Bushnell and Adrian Putnam.

BETTS, Samuel Rossiter, jurist, was born at Richmond, Berkshire co., Mass., June 8, 1786, son of Uriah and Sarah (Rossiter) Betts. His father and grandfather were soldiers in the revolutionary war. He was educated at the Lenox Academy, Lenox, Mass., being the first student entering a college from that school, and in 1806 was graduated at Williams College. He then studied law at Hudson, N. Y., was admitted to the bar in 1809, and began practice at Monticello, N. Y., where he soon gained a favorable reputation. He enlisted in the war of 1812, and after he had acted for a time with the troops gathered for the defense of New York harbor, his legal abilities were called into service by Gov. Tompkins, who appointed him judge advocate. He was elected to the 14th congress (1815-17); declined a re-election, and returned to the practice of his profession at Newburgh, N. Y., where he was appointed district-attorney for Orange county. In 1823 he was appointed circuit judge of the supreme court of New York, and in 1826 was appointed by Pres. John Quincy Adams judge of the U. S. district court for the southern district of New York. He resigned in May, 1867, and retired to private life. With such dignity, courtesy, profundity of legal knowledge and patience of investigation did he preside during his entire term of service that his decisions finally came to be regarded as almost infallible. The maritime laws of the United States were to a great degree formulated and codified by him, evolving into a well-ordered system the complicated rules of salvage, general average, wages of seamen, freighting contracts, charters, insurance and prizes. For twenty years there was not a single appeal from his decisions in the district court, and on maritime and patent questions his opinions were uniformly upheld. He also had charge of the trials of all kinds of infringements of the U. S. laws, and the civil war brought before him a distinctly new phase of this class of questions, affecting not only national but international rights. But, in spite of his advanced age at this time, Judge Betts studied so closely the new conditions that his decisions involving the neutrality laws, the slave trade and the laws of prize, etc., became notable examples of constitutional reasoning and argument. The degree of LL. D. was conferred upon him by his alma mater in 1830. He was the author of "Betts' Admiralty Practice" (1838), and supervised the preparation of his opinions published in the reports of Blatchford & Howland. He was a member of the council of New York University (1830-35). He died at New Haven, Conn., Nov. 3, 1868.

STORRS, Henry Randolph, lawyer and congressman, was born at Middletown, Middlesex co., Conn., Sept. 3, 1757. He was graduated at Yale

College in 1801; studied law; was admitted to the bar in 1807, and practiced law for some years at Champion, Whitestone and Utica, N. Y. During his residence at the latter place he was judge of Oneida county for five years. He was a representative in congress from 1819 to 1821, and from 1823 to 1831, attaining high rank as an eloquent debater. He afterwards established himself in the city of New York, where he became eminent, being possessed of extensive and varied acquirements, uncommon powers of discrimination, great logical exactness, and a ready and powerful elocution. He died at New Haven, Conn., July 29, 1837.

WHITE, Hugh Lawson, jurist and congressman, was born in Iredell county, N. C., Oct. 30, 1773, son of James White, a revolutionary soldier. He removed with his father to Knox county, Tenn., in 1786. A war with the Cherokees breaking out, he volunteered under Gen. Sevier in 1792, and at Etowah shot and mortally wounded the Cherokee chief, Kingfisher, thus ending the battle. In 1794 he pursued a course of mathematical studies in Philadelphia, then went to Lancaster, Pa., and studied law, beginning to practice at Knoxville in 1796. In 1801 he was appointed judge of the supreme court of the state of Tennessee, and served until 1807; in 1808 he was appointed district-attorney, and in 1809 was elected to the state senate, in the same year being appointed as judge of the supreme court, serving for six years. During the Creek war, 1813-14, he served as a soldier. In 1815 he was chosen president of the State Bank of Tennessee; in 1820 was again a member of the state senate, and about that time was appointed by Pres. Monroe a commissioner to adjust the claims of our citizens against Spain. During the session of 1807 he compiled the land laws of the state, and in 1817 drafted the act against duelling. He was elected a senator in congress from 1825 to 1835, and from 1836 to 1840, and served on one occasion as president *pro tem.* of the senate. At the election for president of the United States in 1836 he received all the votes (twenty-six) of Georgia and Tennessee for that office. He resigned his seat in the senate in 1839, having received instructions which would oblige him to vote against his own judgment. He died in Knoxville, April 10, 1840.

BIDDLE, Charles John, soldier and journalist, was born in Philadelphia, Pa., in 1819, son of Nicholas Biddle, the noted financier. After graduating at Princeton University in 1837, he studied law and was admitted to the bar in 1840. During the Mexican war he served as a captain of the Voltigeurs, U. S. army, and was in action at Contreras, Churubusco, Molino del Rey, Chapultepec and the capture of Mexico city, receiving the brevet of major for gallant and meritorious services. After the war he returned to the practice of his profession in Philadelphia, being thus engaged until 1861, when he was appointed a colonel in the Pennsylvania volunteers. During October of that year, while on military duty in Virginia, he was elected a representative from Pennsylvania to the 37th congress, to fill the seat made vacant by the resignation of Edward J. Morris, and though tendered a commission of brigadier-general in the army, declined it in preference for the civil office. Shortly after the close of the war he became one of the proprietors as well as editor-in-chief of the Philadelphia "Age," a leading Democratic paper which he conducted with great ability throughout the remainder of his life. Although his literary

work was mainly on this journal, yet he published a separate work entitled "The Case of Major André," which was first read in the form of an essay before the Pennsylvania Historical Society, in answer to that portion of Lord Mahon's "History of England" decrying André's execution as a dark blot on the record of George Washington. Even the English press finally acknowledged his arguments, the London "Critic" pronouncing his essay a fair refutation of Lord Mahon's obnoxious charge. Mr. Biddle died in the city of his birth, Sept. 28, 1873.

HOPKINS, Albert J., congressman and lawyer, was born in De Kalb county, Ill., Aug. 15,

1846. He was graduated at Hillsdale College, Michigan, in 1870, and returning to Illinois studied law. Immediately after his admission to the bar he began practice at Aurora, where he has since resided. In 1872 he was made state's attorney for Kane county, and held this position for four years. In 1878 he became a member of the Republican state central committee, serving until 1880. In 1884 he was a presidential elector, in the same year was elected to the 49th congress, and has been re-elected to every

congress since that time, his present term expiring in 1903. At various times he has been a member of the committees on elections, militia, post-office, civil service, merchant marine and fisheries, and ways and means.

NORTON, Daniel Sheldon, senator, was born at Mount Vernon, Knox co., O., April 12, 1829, was educated at Kenyon College, and served one year in the war with Mexico in the 2d Ohio regiment. He commenced the study of law in 1848 at Mount Vernon, but in 1850 went across the plains to California. A part of that and of the following year was spent in Nicaragua. Returning to Ohio, he resumed the study of law, and was called to the bar in 1852. In 1855 he removed to Minnesota, and in 1857 was elected to the state senate, declining re-election in 1859. He was returned in 1860, and also in 1863 and 1864. Mr. Norton was elected U. S. senator to succeed Morton S. Wilkinson, and served from 1866 until his death. He was a delegate to the Philadelphia national union convention in 1866. He died in Washington, D. C., July 14, 1870.

CHANDLER, Joseph Ripley, journalist, congressman and diplomat, was born at Kingston, Plymouth co., Mass., Aug. 25, 1792. Though his early education was limited to a common school course, after he became clerk in a Boston store he took every opportunity to read and study. He was married to Mary R. Ward, of Salem, Mass., and about 1815, removing to Philadelphia, Pa., conducted a seminary, aided by his wife. In 1822, becoming editor and proprietor of the "United States Gazette," a Philadelphia paper, which was then in a very unpromising condition, he aided in its rapid up-building, and in 1826 discontinued his school in order to give his entire attention to journalism. Under his direction the "Gazette" became a prominent Whig paper, and he conducted it in the advocacy of national and local progress until 1847, when, owing to ill-health, he sold it. This journal then was amalgamated with its bitter rival, the "North American." After having served as a member of the city council from 1832 until 1848, and as a delegate to the state constitutional convention of 1836,

in 1848 he was elected, on the Whig ticket, a representative from Pennsylvania to the 31st congress (1849-51), being subsequently re-elected to the 32d and 33d congresses. Retiring in 1855, he spent much time in travel until 1858, when he was appointed by Pres. Buchanan minister to Naples, where he witnessed the expulsion of the Bourbons, remaining at this post until November, 1861, when he returned to Philadelphia. He was an inspector of a prison; was prominent as a member of the Philadelphia Society for the Relief of Public Prisons, and published many essays, addresses and pamphlets on prison discipline. He was also the author of a "Grammar of the English Language" (1821) and a number of essays on subjects connected with social life and literature. At one time he was grand master of Masons. He died in Philadelphia, Pa., July 10, 1880.

EVANS, Charles Evan, actor and manager, was born in Rochester, N. Y., Sept. 6, 1836, son of Evan and Lydia Ann (Paddock) Evans. His father, a manufacturer, was of Welsh origin; his mother was of English descent. Charles, after attending private schools and the academy of his native town, began his career as an actor at the age of thirteen, playing the part of Bob, the Bootblack, with Frank Mayo in "The Streets of New York." His first serious professional appearance was in 1872, in a sketch with James Niles. Niles and Evans continued in partnership for eleven years, playing in the principal theatres in vaudeville and minstrel performances. Mr. Evans' first appearance in New York was at Tony Pastor's Theatre, then on the Bowery, in 1873. In 1882 Niles and Evans combined with Bryant and Hoey, and formed a company which toured for two years, presenting high-class vaudeville, terminating with a farce called "The Book Agent," which was elaborated by Charles H. Hoyt into the famous play, "A Parlor Match," and was presented by Evans and Hoey in 1884. This play was of a character now known as farce comedy, and had the longest life of any production of that kind presented for eleven years. Mr. Evans played the part of McCorker over 3,500 times, missing only one performance. In 1894 Mr. Evans became proprietor of the Herald Square Theatre, New York city. The policy he adopted and executed was the production of important works on a large scale suitable for long runs. The theatre opened under his management with Richard Mansfield in "Arms and the Man," by Bernard Shaw. This was followed by the great production of Smith and DeKoven's "Rob Roy," and following this came "Puddin' Head Wilson," dramatized from Mark Twain's novel by Frank Mayo, who played the leading rôle. Other original productions have been Lorimer Stoddard's "Napoleon Bonaparte"; Belasco's "Heart of Maryland"; "The Girl from Paris"; "The French Maid"; "The Mandarin"; "The Rev. Griffith Davenport"; "Hotel Topsy Turvy"; "The Children of the Ghetto"; "The Only Way," and "Naughty Anthony." He is a member of the New York Athletic Club. He was married in New York city, May 9, 1882, to Minnie Alice, daughter of Charles French. She died in 1899, leaving two sons.

VAN DER POEL, Arent (or Aaron), congressman and jurist, was born at Kinderhook, Columbia co., N. Y., Feb. 5, 1799, son of Isaac and Moyca (Huyck) Van der Poel, and younger brother

of James Van der Poel, of Albany, circuit judge of the third judicial district of the state, who died in 1845. The first American ancestor was Wymant Gerrits Van der Poel, of Dordrecht, Holland, who emigrated with his wife, Tryntje (Melgert), and settled at Albany in 1647. Their son, Melgert (b. 1646), was married to Anaantje Verplanck, and their son, also named Melgert (b. 1674), was married to Catharine van Alen, and had a son, Johannes (b. 1705), who was married to Annatje Staats, becoming the grandfather of the subject of this sketch. Judge Van der Poel was educated with care, adopted the profession of law, and secured his admission to the bar of his native town in 1820, where he pursued his practice. He was elected to the legislature of New York state, and served two terms, from 1825 to 1829. He was three times elected a representative in congress on the Democratic ticket, serving from 1833 to 1837, and from 1839 to 1841, when he retired to private practice in New York city. Here, however, he was appointed a judge of the superior court in 1843, and held the office until 1850. While in congress his vigorous style and powerful voice gained him the humorous sobriquet of "the Kinderhook roarer." He was a member of the Century Association and the Manhattan Club of New York city. Judge Van der Poel was married, Sept. 3, 1821, to Harriet Baldwin, who died in 1837, leaving no children; and second, to Ellen, daughter of James McBride. His three sons were James McBride (b. 1840; d. 1860), John (b. 1842; d. 1866), and Aaron Ernest (b. 1846; d. 1898). Judge Van der Poel died in New York city, July 18, 1870.

SOPER, Augustus, physician, was born at Dereham, Canada, April 30, 1852, son of Augustus and Charlotte (Veder) Soper. His father, who was a farmer, was born at Augusta, Oneida co., N. Y.; his mother was a daughter of Cornelius Veder, who lost his life as a soldier in the war of 1812. He obtained his early education in the public schools of Canada, attended the Galt Collegiate Institute in 1871, and in 1872 entered the University of Michigan, where he remained for one year. Returning to Canada, he studied medicine in the Trinity Medical School from 1877 to 1879, serving in the wards of the General and Lying in hospitals of that city. He was graduated at the College of Physicians and Surgeons, Toronto, May 20, 1880, his degree being indorsed by the Bellevue Hospital Medical College, New York city, Nov. 20, 1886, and the Medico-Chirurgical College, Philadelphia, Pa., Nov. 26, 1887. The list of hospitals he has attended in England, Scotland, Ireland, France, Switzerland, Belgium and Italy numbers over twenty-five, and he holds certificates of registration and qualification from medical boards in nearly every

state in the Union; also in Mexico, Central America and South America. Dr. Soper resides in Pittsburgh, Pa., and has a large practice. He was married, in 1873, to Marion E., daughter of Henry McCrum, of Galt, Canada. They have one child.

OSTRANDER, Dempster, lawyer, underwriter and author, was born near Syracuse, N. Y., Nov. 20, 1834, son of James Hooper and Asenath (Sheffield) Ostrander. In 1842 the family removed to a farm in Wisconsin territory. He was educated in the public schools and the State University at Mad-

ison, but ill health prevented him from completing the course, and he engaged in manufacturing and mercantile business at Jefferson, Wis., where he still retains an interest. He studied law meanwhile, and was admitted to the bar in 1861. In 1861 he was appointed by the Wisconsin legislature inspector and relief officer for the soldiers of that state engaged in the civil war, and was sent to the front on the James and Potomac rivers. At the close of the war he resumed manufacturing in Wisconsin, but his legal knowledge and business talent soon became recognized, and in 1868 led to an appointment in connection with fire insurance. He has since been chiefly identified with this business, taking the legal rather than the underwriting side of insurance. He wrote, "The Law of Fire Insurance Contract" (1886); "The Law of Fire Insurance" (1892); "Social Growth" (1895); "The Social Crisis" (1898), and "Problem of Life," a poem (1900). As outgrowths of his practical thinking and observation, the last two give evidence of sympathetic comprehension of the poor man's rights. In these respects they come nearer portraying Mr. Ostrander's character than his publications on law. To the attributes of the student, he adds the temperament of the poet, a quality particularly noticeable in his treatment of the problems of life, and throwing his whole energy into his work he is able to accomplish most creditable results. In 1856 Mr. Ostrander was married to Sarah Ettie Manville, of Jefferson, Wis. Their three children were Frank, who at the time of his death in 1890 was a banker residing in Wisconsin; Minnie, wife of Hon. W. H. Myron, Wisconsin; and Belle, wife of Col. Theobald Starratt, New York city.

POTTS, Richard, member of the Continental congress, was born at Upper Marlborough, Prince George co., Md., in July, 1753. He studied law at Annapolis and afterward removed to Frederick county, where he practiced until his death. He was clerk of the county committee of observation in 1776; clerk of the county court in 1777, and member of the house of delegates in 1779-80 and 1787-88. He was a delegate to the Continental congress in 1781 and 1782, also being governor of Maryland during the same years. He became state attorney for Frederick, Montgomery and Washington counties, Md., in 1784, was a member of the Maryland convention of 1788 that ratified the U. S. constitution, and in 1789 was commissioned by Gen. Washington U. S. attorney for Maryland. He was made chief justice of the county courts of the 5th judicial district in 1791, and was a senator in congress from 1792 to 1796, when he resigned. From 1801 until 1804 he was associate-justice of the Maryland court of appeals. Princeton College conferred the degree of LL. D. upon him in 1805. He died in Frederick county, Md., Nov. 26, 1808.

STURGES, Jonathan, lawyer and jurist, was born at Fairfield, Conn., Aug. 23, 1740. He was graduated at Yale College in 1759, and became a lawyer, practicing at Fairfield. In 1775 he was chosen a delegate to congress, where he supported the cause of independence, and from 1789 to 1793 was a representative in congress. In 1793-1805 he was a judge of the supreme court of Connecticut. He was a presidential elector in 1797 and 1805. The degree of LL. D. was conferred upon him by Yale in 1806. He died at Fairfield, Oct. 4, 1819. The prominent merchant of New York, bearing the same name, was his grandson.

D. Ostrander

A. Soper

RAINEY, Joseph H., congressman, was born at Georgetown, S. C., June 21, 1832. He was born a slave, but acquired a good education, and improved his mind by observation and travel. His father was a barber, and he followed that occupation in Charleston until 1862, when, being forced to work on Confederate fortifications, he escaped to the West Indies, where he remained until the close of the war. He returned to his native town, and was elected a delegate to the state constitutional convention of 1868. After serving as a member of the state senate of South Carolina, he was elected a representative from South Carolina to the 41st, 42d, 43d and 44th congresses, serving from 1869 to 1876. He was a member of the committees on freedmen's affairs and Indian affairs, and took part in the debate on the civil rights bill.

HUTZLER, Moses, merchant, was born at Hagenbach, Bavaria, Nov. 28, 1800, son of Gabriel and Benleh (Baer) Hutzler. He was educated in the schools of his native city, and learned the tailoring and dry-goods business. In 1838 he emigrated to the United States and located in Baltimore with the intention of adopting the avocation of ladies' tailor, but failing in that line, which was then an entirely new one in this country, he removed to Frederick, Md., and became a dry-goods merchant. During the Mexican war he returned to Baltimore, where

he opened a dry-goods store, and continued in active business for nearly thirty years. In 1858 he formed the firm of M. Hutzler & Son with his oldest son, Abram G. Hutzler. Some years later his other sons, Charles G. and David Hutzler, were admitted to the firm, the style of which then became Hutzler Bros. In 1869 two of his sons engaged in the wholesale dry-goods business on Baltimore street, near Hanover, leaving David in charge of the retail store. The new venture, however, was discontinued at the end of twenty years on account of the unusually rapid growth of the retail branch.

which required the constant attention of all members of the firm. In 1886 they bought three houses adjoining their business, and on the site erected their present warehouse, which is one of the most commodious in the city. In 1829 Mr. Hutzler was married to Caroline, daughter of Eli B. Neuberger, a prominent merchant of Fürth, Bavaria. Of their ten children, three daughters and three sons are living. He died in 1889.

FROTHINGHAM, Richard, historian and journalist, was born at Charlestown, Mass., Jan. 31, 1812, son of Richard and Mary (Thompson) Frothingham. His earliest ancestor in America was William Frothingham, who came from Yorkshire, England, with Winthrop's fleet in 1630. He was educated in the Charlestown schools, and was a school trustee in 1839 and mayor of the city in 1851-53. Early becoming known as a political writer, he was for many years proprietor of the Boston "Post," being its managing editor and chief contributor from 1852 to 1865. He served in the state legislature in 1839, 1840, 1842, 1849, 1850; was a delegate to the national Democratic conventions of 1851, 1852 and 1876, and to the convention of 1853, which met to revise the state constitution. His reputation, however, is based chiefly upon his numerous historical writings. Edward Everett called him the "accurate and judicious historian of Charlestown," and agreed with Bancroft in commending his contributions to historic literature as im-

partial monographs. Mr. Frothingham said that he "was led to historical research, having in view the one clear and distinct object of tracing the development of the national life; a theme separate from the ordinary course of civil and military transactions and requiring events to be selected from their principles and traced to their causes." His works are: "History of Charlestown" (1848); "History of the Siege of Boston" (1849), and of the "Battles of Lexington, Concord and Bunker Hill" (1850); "Life and Times of Gen. Joseph Warren" (1865); "Tribute to Thomas Starr King" (1865), and "The Rise of the Republic of the United States" (1871; 2d ed., 1873); also numerous pamphlets and addresses. The degree of A.M. was conferred upon him by Harvard in 1858, and L.L.D. by Tufts in 1874. He was a member of the Massachusetts Historical Society and for thirty years its treasurer. He was married, in 1833, to Vrylena, daughter of Isaac Blanchard, and had five children. He died at Charlestown, Mass., Jan. 29, 1880.

ROBERTS, Charles George Douglas, author and editor, was born at Douglas, York co., New Brunswick, Jan. 10, 1860, son of Rev. G. Goodridge and Emma Wetmore (Bliss) Roberts, and cousin of Bliss Carman, the poet. A number of his ancestors were professors in English universities; his father was a canon of the cathedral at Fredericton. Until he was fourteen years of age Charles Roberts lived on the coast of the Bay of Fundy. He then entered the collegiate school at Fredericton, from which he passed to the University of New Brunswick, where he was graduated in 1879, after taking honors in mental and moral science, Latin and Greek, and also a gold medal for Latin prose. The degree of M.A. was conferred upon him in 1880. From 1879 to 1883 he was successively principal of the Grammar School at Clatham, N.B., and of the York Street School at Fredericton; in 1883-84 he was associated with Goldwin Smith in editing "The Week" at Toronto, a periodical started by them, returning to teaching in 1885, as professor of English and French literature at King's College, Windsor, Nova Scotia, and later of English and economics in the same institution. In 1895 he resigned to devote himself to literary work, and in 1897 removed to New York city to become associate editor of the "Illustrated American." Both in prose and verse he has attained distinction. His best known works are: "Earth's Enigmas" (1896); "Around the Camp Fire" (1896); "The Forge in the Forest" (1897); a "History of Canada" (1897), and "The Heart of the Ancient Wood" (1900), all in prose, and "Orion and Other Poems" (1880); "In Diverse Tones" (1886); "Ave: An Ode for the Shelley Centenary" (1892); "Songs of the Common Day" (1893); "The Book of the Native" (1897); "New York Nocturns" (1898), and "A Sister to Evangeline" (1898). Minor works include a guide-book to Canada (Appleton's), some translations from the French and two stories for boys. Mr. Roberts is a fellow of the Royal Society of Canada, member and late president of the Haliburton Society, and is connected with many other social and literary organizations. He is an enthusiastic lover of outdoor sports, especially of canoeing, tennis playing and cycling. He was married, at Fredericton, in 1880, to Mary Isabel, daughter of G. E. Fenety, Esq., queen's printer to the province of New Brunswick and a leader of the reform movement.

POLK, William Hawkins, lawyer and congressman, was born in Maury county, Tenn., May 24, 1815, son of Samuel and Jane (Knox) Polk, of Scotch-Irish ancestry, and brother of Pres. Polk. His maternal grandfather, James Knox, of Iredell county, N. C., was a captain in the war of the revolution. His father removed from Mecklenburg county, N. C., in the autumn of 1806 to the

Moses Hutzler

fertile valley of Duck river, a tributary of the Tennessee, where he cultivated a large tract of land, and at intervals followed the occupation of a surveyor, acquiring such fortune as he needed; he died in 1827. The son, William, was educated at Chapel Hill, N. C., and at the University of Tennessee; he studied law, was admitted to the bar in 1839, and began to practice at Columbia, Maury co., Tenn. In 1841, and again in 1843, he was elected to the legislature. In 1855 he was appointed U. S. minister to Naples, Italy, where he negotiated a treaty with the two Sicilies. He returned in August, 1847, and served in the Mexican war as a major of dragoons. He was a delegate to the Nashville convention in 1850, and a representative in the 32d congress from Tennessee from 1851 to 1853. Maj. Polk was strongly opposed to secession in 1861. He died in Nashville, Tenn., Dec. 16, 1862.

TAYLOR, George Boardman, clergyman and author, was born in Richmond, Va., Dec. 27, 1832, son of James Barnett and Mary (Williams) Taylor. His father, a native of Burton-on-Humber, England, was brought to America by his parents when an infant; he resided in Richmond, Va., as pastor successively of two churches, and for twenty-six years, until his death, as corresponding secretary of the foreign mission board of the Southern Baptist convention. His mother was born in Maine, daughter of Elisha Williams, a revolutionary soldier and pastor, mentioned in Sprague's "Annals." Dr. Taylor was graduated at Richmond College in 1850; he taught school for a year; studied law, and spent two years at the University of Virginia, where he was graduated in 1854. During this period he was ordained to the Baptist ministry in Charlottesville, and began to serve two churches some twenty miles distant. He was called to the Franklin Square Baptist Church, Baltimore, as its first pastor in 1854-55, remaining in that pastorate for two years. In the civil war he acted as chaplain in Stonewall Jackson's command, being granted leave of absence by the Baptist Church, Staunton, Va., of which he was pastor. He was also post-chaplain. He remained in that pastorate until 1873. In that year he left America to take charge of the Italian mission in Rome, Italy, for the foreign mission board, Southern Baptist convention, and since that time has directed this mission, except that two years were granted him to become for a second time chaplain to the University of Virginia. In 1859-65 he published "The Oakland Stories," four volumes, and from 1865 to 1872 "Coster Grew"; "Roger Bernard"; "Walter Ennis," three religious novels, the last based on the Baptist struggle in Virginia for religious liberty. In 1872 he published the biography of his father, "Life and Times of James B. Taylor." In 1898 appeared his "Italy and the Italians." Other works from his pen are in course of preparation. He received the degree of D. D. simultaneously from Richmond College and the University of Chicago as originally organized. He was married in Richmond, in 1858, to Susan Spotswood, daughter of Carter Braxton. She had eight children, of whom four survive; she died in Rome in 1884. One son, James Spotswood Taylor, is assistant surgeon in the U. S. navy, and a daughter, Mary Argyle Taylor, has contributed numerous articles to the "Atlantic Monthly" and to English periodicals.

PRINCE, Oliver Hillhouse, senator and lawyer, was born in Connecticut about 1787. Removing to Georgia, he studied law and was admitted to the bar in 1806. He was one of five commissioners who laid out the town of Macon, and there he began his law practice. He was a senator in congress from Georgia during the years 1828 and 1829. Mr. Prince was the author of many humorous sketches, one of which, giving an account of a Georgia militia mus-

ter, was translated into several languages. He also published a "Digest of the Laws of Georgia" in 1822 (2d ed., 1837). Mr. Prince was lost at sea Oct. 9, 1837, in the steamer Home, off the coast of North Carolina.

REED, William, philanthropist, was born at Marblehead, Mass., June 6, 1776. He was an eminent merchant, was highly esteemed for his benevolent and religious character, and was a member of congress from Massachusetts in 1811-15. He was president of the Sabbath school Union of Massachusetts, and of the American Tract Society, and vice-president of the American Education Society. He was also a member of the board of visitors of the Theological Seminary at Andover, and of the board of trustees of Dartmouth College. Besides liberal bequests to heirs and relatives, he left \$68,000 to benevolent objects, of which \$17,000 were to Dartmouth College, \$10,000 to Amherst College, \$10,000 to the Board of Commissioners for Foreign Missions, \$9,000 to the First Church and Society in Marblehead, \$7,000 to the Second Congregational Church in Marblehead, and \$5,000 to the library of the Theological Seminary at Andover. His wife was Hannah Hooper, a native of Marblehead. He died at Marblehead, Mass., Feb. 22, 1857.

STOUGHTON, William Lewis, lawyer, was born in New York city, March 20, 1827. He studied law, and, on coming to the bar, settled at Sturges, Mich., in 1851. From 1856 to 1860 he was prosecuting attorney. In 1861 he was appointed by Pres. Lincoln U. S. district attorney for Michigan, which office he soon resigned to enter the army as lieutenant-colonel of the 11th Michigan volunteers. He was promoted colonel at Stone river, and commanded in all the operations of his regiment until wounded at Atlanta. He was brevetted a brigadier general for "gallantry on the field," and after the war was brevetted a major general. He had the credit of firing the last gun at Chickamauga; commanded a brigade at Mission ridge and in the Atlanta campaign, and lost a leg by a cannon ball at Rapps' station in front of Atlanta. In 1866 Gen. Stoughton was elected attorney-general of Michigan, and in 1868 was elected a representative from that state to the 41st congress, serving on the committees on military affairs and revolutionary pensions. He was re-elected to the 42d congress, and served on important committees. He died at Sturges, Mich., June 6, 1888.

PRESTON, William, soldier, was born in county Donegal, Ireland, Dec. 25, 1729, and emigrated to this country with his father, John Preston, in 1755. Becoming a resident of Augusta county, Va., he was elected its deputy sheriff in 1750, and a short time afterward represented it in the house of burgesses. In 1757 he aided in making a treaty with the Delaware and Shawnee Indians, and by negotiations with the chief, Coru-talk, secured a temporary peace along the Western frontiers. He resided for several years at Greenfield, near Amsterdam, Botetourt co., whence he removed to Montgomery county, which he had surveyed in 1771. In 1775 he aided in recruiting troops for the revolutionary war, and was made colonel of a regiment, which he led at the battle of Guilford court-house, March 15, 1781, under the hero, Col. William Campbell. In that encounter he received wounds, from which he died in Montgomery county, July 28, 1781.

PRESTON, Francis, congressman, was born at Greenfield, Botetourt co., Va., Aug. 2, 1765, son of William Preston, who became a colonel in the revolutionary army. He was graduated at William and Mary College in 1783, and having studied law at that institution under George Wythe he was soon admitted to the bar. He practiced in Montgomery, Washington and other counties until 1793, when he entered congress. After serving for two terms, until March, 1797, he declined a re-election, and retired to his home at Abingdon, Va. At the beginning of the war of 1812 he enlisted, was appointed colonel of volunteers, and marched with his regiment to Norfolk. Subsequently he was appointed brigadier-general and major-general of militia. He was frequently elected to the Virginia house of delegates and to the senate, and was greatly admired for his eloquence and for ability in debate. Gen. Preston was married, in 1792, to Sarah, daughter of Col. William Campbell, who distinguished himself in the battle of King's mountain. Her mother was Elizabeth Russell. Their sons, William Campbell, John Smith and Thomas Lewis, became prominent, the first as a legislator and educator; the second as an orator; the third as a legislator and soldier. Gen. Preston died while on a visit to his son William, at Columbia, S. C., May 25, 1835.

PRESTON, Thomas Lewis, legislator and soldier, was born in Botetourt county, Va., Nov. 28, 1812, son of Francis and Sarah (Campbell) Preston. He was graduated at the University of Virginia, then attended law lectures at that institution and was admitted to the bar, but never practiced. He engaged in planting and as a manufacturer of salt, in Washington and Smith counties. He was twice elected to the state legislature; was a visitor of the University of Virginia for many years, and twice served as its rector. In 1861-62 he was on the staff of Gen. Joseph E. Johnston as captain, and was his aide-de-camp at the first battle of Manassas, or Bull run, remaining in the Confederate army until the war closed. He published, in 1880, "Life of Elizabeth Russell, Wife of Gen. William Campbell, of King's Mountain."

McNEAL, Thomas Allen, journalist, was born in Marion county, O., Oct. 14, 1853, son of Allen and Rachel (Brownlee) McNeal. His paternal grandfather came from county Down, Ireland, about 1801, and settled in Pennsylvania. On his mother's side his ancestors were Huguenots, who emigrated to Scotland during the time of persecution. His father, who was a farmer, was a leading abolitionist, distinguished by independence of thought and steady adherence to principle. The son was educated at the Ohio Central College, Iberia, O.; Oberlin College and Hillsdale College. In 1879 he went to Kansas and engaged in publishing the Medicine Lodge "Cresset," successor to the Barber county "Mail." In 1884 he was elected to the Kansas legislature, and in 1886 was re-elected. Mr. McNeal was at one time mayor of Medicine Lodge. He started the publication of the Kansas "Breeze" in 1891, which was consolidated with the Topeka "Mail" in 1895, and called the "Mail and Breeze." Since that time he has been its associate editor. He is the author of "McNeal's Fables." He was married, Aug. 26, 1884, to Anna Belle, daughter of Peter McPherson, of Caledonia, Monroe co., N. Y. They have two children, Louise and Allen McNeal.

ANDERSON, Alexander, senator, was born in Jefferson county, Tenn., Nov. 10, 1794. He was elected by the Democratic party to congress from the Knoxville district, Tennessee, serving in 1840 and 1841, part of a term, and was a member of the committee on the militia. He afterward went to California, where he was a legislator and judge, and framed the state constitution. He died at Knoxville, Tenn., May 23, 1869.

HAMILTON, Alexander, lawyer, was born at Williamsborough, N. C., March 18, 1851, son of Robert Alston and Sarah Caroline (Alexander) Hamilton, and grandson of Patrick Hamilton, of Park-Head, Scotland, who came to America about 1810, and settled in Granville county, N. C., where he became eminently successful as a merchant. He was graduated at the Virginia Military Institute in 1871, and during the next two years was assistant professor of Latin and tactics in that school. During one of these years he also took the law course at Washington and Lee University, Lexington, Va., under the instruction of Hon. John Randolph Tucker and Judge John W. Brockenbrough, and was graduated in 1873. Mr. Hamilton began practice in Richmond, Va., but in 1874 removed to Petersburg, Va., where he became a partner of Alexander Donnan, so continuing until the latter's death in 1892. In 1894 Bernard Mann, of Petersburg, became his partner in the practice of law, and their firm, under the name of Hamilton & Mann, still continues in general practice, although making a speciality of corporation law. Mr. Hamilton is president and general counsel of the Atlantic Coast Line Railroad Co. of Virginia; president and general counsel of the Petersburg Savings and Insurance Co., a large banking and insurance corporation, and president of the board of visitors of the Virginia Military Institute. He was a member of the constitutional convention of Virginia of 1901. He was married, first to Mary Stuart Donnan, then to Kate M. Venable, then to Helen Leslie McGill, all of Petersburg, and has children by each marriage.

Alexander Hamilton

PERCIVAL, John, naval officer, was born at Barnstable, Mass., April 3, 1779. When seven years of age he shipped below the mast in a merchant vessel, and was impressed into the British navy, and tradition says he was captain of the fore-top in Nelson's flag-ship at Trafalgar in 1805. He entered the U. S. navy as sailing-master in 1809; was promoted to be lieutenant in 1814, and was in several important actions during that year of the war with England, namely, the capture of the British tender Eagle, off New York harbor, and in the capture of the British brig-sloop Epervier, by the Peacock. He became master in 1831, and captain in 1841. His last cruise was in command of the famous Constitution, which sailed from New York, April, 1844, for a voyage around the world, returning in 1846. As illustrating the generosity of the American sailor, it is related that, learning from Capt. Percival while at Canton, China, the particulars of the loss and suffering caused by the great fire in Pittsburgh, Pa., April 10, 1845, every officer and man subscribed something, and \$1,950 was sent home by a draft on Boston. He was a popular commander, but his rough and eccentric manners won for him the sobriquet of "Mad Jack" in the navy. He retired in 1848. He died at Roxbury, Mass., Sept. 17, 1862.

MACLENNAN, Frank P., editor, was born at Springfield, O., March 1, 1855, son of Kenneth and Adelia M. (Bliss) MacLennan. His parents removed to Emporia, Kan., in 1870, and in 1871 he entered the University of Kansas, where he was graduated in 1875, later receiving the degree of M.S. from the same institution. In 1877 he became connected with the Emporia "News," acquiring a proprietary interest in the daily and weekly "News" in 1880. He sold the same in October, 1885, and a few weeks

later bought the Topeka "State Journal" at public auction, this property having just gone through the hands of two receivers. From a circulation of 800 and an insignificant plant, the paper has been built up to a circulation whose daily average exceeds 13,000 copies; it has the full Associated Press report, a fine building for its exclusive use and a complete and modern newspaper equipment with fast web-perfecting printing press and linotypes. Mr. MacLennan was married, May 29, 1890, to Anna, daughter of Eliza and Mary C. Goddard. They have one daughter, Mary.

GORDON, George Angier, clergyman, was born in Aberdeenshire, Scotland, Jan. 2, 1853, son of George and Catherine (Hutchins) Gordon. He was educated in the public schools of Scotland, and at the age of eighteen came to America, working for three years at various occupations in the neighborhood of Boston. In 1874 he entered Bangor Theological Seminary, where he was graduated in 1877. The following year he spent in preaching at Temple, Me., but desirous of a complete education, entered Harvard College as a special student, and was graduated with the class of 1881. He was at once called to the pastorate of the Congregational Church, Greenwich, Conn., where he preached for three years with great acceptance. In 1884 Old South Church, Boston, extended Mr. Gordon a call. He at first refused, but finally yielded to repeated solicitations, and in April, 1884, was inducted into the pastorate of this famous church. The occasion was historic and will long be remembered in Congregational circles. He has since then had a remarkably successful pastorate. In 1893 he published "The Witness to Immortality," and in 1895 appeared "The Christ of To-day." In 1897 he published "Immortality and the New Theology." Dr. Gordon is a man of profound convictions, and his sermons are weighty with thought and luminous in expression. He is liberal in his views and popular not only with his church, but with many active thinkers of various denominations; in fact, few ministers are so strongly established in the hearts of the people or are so eloquent in discussing the vital questions of our age. In 1900 he was one of the Lowell Institute lecturers, his subject being "The New Epoch for Faith." He received the degree of D. D. from Bowdoin and Yale, 1893; and from Harvard, 1895. In 1890 he was married to Susan Huntington, daughter of Rev. Jacob M. Manning, D. D., for many years pastor of the Old South Church, and has one child, Ruth M. Gordon.

Geo. A. Gordon.

ROCKWELL, Julius, senator, was born at Colebrook, Litchfield co., Conn., April 26, 1805. He was graduated at Yale College in 1826; then studied in the school of law there, and was admitted to the bar in 1829. The following year he removed to Pittsfield, Mass., where he established himself permanently. He was a member of the state legislature in 1834-38, being speaker of the house for three years. Three years later he was bank commissioner of the state, when he was elected to congress by the Whig party, serving from 1845-51. He was a delegate to the Massachusetts constitutional convention in 1853, and

Vol. XI.—26.

the following year, upon the resignation of Edward Everett as U. S. senator, he was appointed to fill the vacancy. In 1853-57 he was a member of the board of overseers of Harvard College. Upon the dissolution of the Whig party Rockwell allied himself with the Republicans and was a presidential elector on the first national ticket in 1856. He served one more term in the state legislature in 1858; was chosen speaker, and in 1859 was made a justice of the superior court. Resigning his seat in 1886, he retired to his home in Lenox, Mass., where he died May 19, 1888.

GILMOR, Robert, merchant and soldier, was born at Paisley, Scotland, Nov. 10, 1748, son of Gavin and Janet (Spier) Gilmor. He began his business career in his father's counting house in Glasgow, and on a voyage, in 1767, to the shores of the Chesapeake, he disposed advantageously of a cargo of merchandise. This success tempted him to cross the ocean on another venture in 1769, when, deciding to remain in America, he settled in St. Mary's county, Md. On the outbreak of the revolution he enlisted with the militia of his county, serving until 1778. In the same year he removed to Baltimore, and entered mercantile business in co-partnership with William Bingham and Samuel Inglis, of Philadelphia, under the style of Bingham, Inglis & Gilmor. In 1782 he went to Amsterdam, Holland, to represent a firm, which included Thomas Willing and the well-known financier, Robert Morris, who, anticipating a treaty of peace after the surrender of Cornwallis, were desirous of forming an establishment in that city for the purpose of exporting more largely the staple products of Maryland and Virginia. Deeming Mr. Gilmor a suitable person to represent the concern abroad, they offered him a co-partnership, which was accepted. Accordingly Mr. Gilmor made his home in Amsterdam for a number of years. He took with him letters of introduction from John Adams to the Willinks, the American bankers, in Holland, and thus was formed the commercial connection between the Gilmors and Willinks, which continued from father to son for several generations. Upon the death of Mr. Inglis he continued his business relations with Mr. Bingham, under the name of Gilmor & Co. Returning to America, he made Baltimore his permanent home. He may be considered the founder of the East India trade in this country. In 1799 he dissolved partnership with Mr. Bingham, and admitted his sons, William and Robert, into the business, under the name of Robert Gilmor & Sons. Among the early citizens of Baltimore few were called upon to fill more positions of importance and trust than he. He was associated with William Patterson and others in founding the first bank in Baltimore, which, under the name of the Bank of Maryland, received its charter in 1790. Being the first institution of the kind south of Philadelphia, this bank proved a profitable investment to its shareholders. His name again appears with that of William Patterson, when, with David Stewart, Robert Oliver and others, he was appointed to raise funds for the completion of the fortification on Whetstone point, known to the present generation as Fort M'Henry. In 1793, when the French refugees arrived from Cape Francois, he was one of the committee to provide for their relief. In the following

Robt Gilmor

year he became interested in forming a collection of standard books for the Library Co., of Baltimore (since merged into the Maryland Historical Society). He was president of the chamber of commerce and St. Andrew's Society, of Baltimore, being annually re-elected until his death. He was married, in 1771, to Louisa, daughter of Rev. Thomas Airy, of Dorchester county, Md., and had two sons and two daughters. He died in Baltimore, Md., in January, 1822.

GILMOR, Robert, merchant, was born in St. Mary's county, Md., Sept. 24, 1774, son of Robert and Louisa (Airy) Gilmore. He was educated in Baltimore, Md., and Amsterdam, Netherlands, and afterwards at Marseilles, France, and was a partner in the shipping house of Robert Gilmore & Sons from 1799 to 1830, when he retired from active business. He was a liberal patron of art and artists, and his collection of paintings, engravings, and statuary was considered at the time to be the finest in the country. Mr. Gilmore was president of the Maryland Academy of Science and Literature in 1822. He traveled much in Europe, but when he was at home in Baltimore, his house was the centre of social life in that city.

His acquaintance was prized by many leading men in the United States and Europe, for he was a man of high intellectual gifts. He was president of the Washington Monument Association, which laid the foundation for the Washington monument in Baltimore, July 4, 1815, and completed the work Nov. 26, 1829. He was married, April 9, 1807, to Sarah Reeve, daughter of James and Judith (Smith) Ludson, of Charleston, S. C. She died childless. Mr. Gilmore died in Baltimore, in November, 1848.

GILMOR, Robert, capitalist, was born in Baltimore, Md., May 8, 1808, son of William and Marianne (Smith) Drysdale Gilmore. He was a grandson of the first Robert Gilmore (1798-1822), and nephew of the second Robert. His father was a gentleman of means and culture. His mother was a daughter of Isaac and Elizabeth Custis (Teackle) Smith, of Northampton county, Va., and was the young widow of Dr. Drysdale, of that county, when she was married to his father in 1798.

Robert Gilmore obtained his early education in Baltimore, and was graduated at Harvard College in 1828. In 1829-32 he was attaché of the U. S. legation in Paris, where William C. Rives negotiated the indemnity treaty between France and the United States in 1831. He spent several days at Abbotsford, in 1830, as the guest of Sir Walter Scott, an interesting account of the visit being preserved in his private journal, and his country home in Baltimore county, Glen-Ellen, was planned after Abbotsford. Mr. Gilmore was a member of the Maryland Club of

Baltimore, and was a prominent figure in the city's social life. He was married, in May, 1832, to Ellen, daughter of Judge William H. and Maria (Reading) Ward, of Baltimore, Md. They had seven sons and two daughters; Judge Robert Gilmore, of Baltimore; William Gilmore, who is prominently identified with railroad development in Maryland, and is the owner of the fine estate known as Summerfield, Baltimore county; Charles Gilmore, Col. Harry Gilmore, Confederate soldier and author; Richard Tilghman, Meredith, and Graham Gilmore; Ellen, wife of

Alexander McTavish, and after his death the wife of Dr. G. Halstead Boyland, of Paris; and Mary, wife of William Young. Mrs. Gilmore died in September, 1880. Mr. Gilmore died in Baltimore, in November, 1874.

GILMOR, Robert, lawyer and judge, was born in Baltimore, Md., March 8, 1823, eldest son of Robert and Ellen (Ward) Gilmore. He was educated by private tutors, and taking up the study of law in the office of John Glenn, later judge of the U. S. court in the Baltimore district, was admitted to the bar in 1853.

He met with much success in his law practice, but at the outbreak of the civil war his business prospects were, like those of many others similarly situated in the border states, seriously impaired. Mr. Gilmore was a non-combatant, refraining from all active participation in the contest between the northern and southern states, and labored with those who sought from the U. S. government a liberal policy in the treatment of the states which had seceded; meeting Pres. Johnson in person, and urging a temperate course toward the southern people. He engaged zealously in the effort in the reconstruction period to bring about the ascendancy of the Democratic-Conservative party in Maryland, which movement was successful. A new state constitution was adopted by a very large popular vote in 1867, and the judiciary of the state was remodelled. Under this constitution Mr. Gilmore was elected to a seat on the bench of the supreme court of Baltimore by a very handsome vote.

Throughout his term as judge, he gave great satisfaction, particularly while presiding in the equity court and filling the position of chancellor. He also presided over each of the courts of the system. Since returning to the practice of his profession at the conclusion of his judicial term in 1882, Judge Gilmore has taken no active part in public life, confining himself to private and professional occupations, except when holding the position of corporation counsel for the city of Baltimore, to which office he was for a period assigned. Judge Gilmore was married, Feb. 21, 1867, to Casilda Emannalla, daughter of Benjamin M., Jr., and Casilda (Stewart) Hodges, of Baltimore. Mrs. Gilmore died May 27, 1871, leaving one son and two daughters. Judge Gilmore was married again, April 23, 1878, to Josephine Augusta, daughter of Augustus J. and Frances (Taylor) Albert, of Baltimore. They have one son and four daughters.

BROWN, John Carter, philanthropist, was born in Providence, R. I., Aug. 28, 1797, second son of Nicholas and Ann (Carter) Brown. He was graduated at Brown University in the class of 1816, and in 1832 became a partner in the house of Brown & Ives. In 1841, by the decease of his father, he came into possession of an ample estate, and guided by his peculiar tastes, he became a traveler, not only through many sections of his own country, but in the different countries of Europe. He lived abroad for several years. Early in life he began to develop a love for rare and curious books, and with unwearied pains and at great expense he collected one of the best libraries, if not the best library, of American history in this country. Eminent men from other states, and even from Europe, have visited Providence to consult or to study some work which they could find nowhere else. Mr. Brown was chosen

Gilmore

Robert Gilmore

Robert Gilmore

a trustee of Brown University in 1828, and a fellow in 1842. His gifts to the university were numerous and costly, and include additions to its library, its buildings, and its real estate, amounting to nearly \$175,000 and his name stands thus far in the front rank of the benefactors of Brown University, his father's name only taking precedence of his. Since his death the entire remainder of his famous library was given to his alma mater by his son, John, with an endowment fund, house and cases for it. Mr. Brown was one of the original corporators of the Butler Hospital for the Insane, and contributed generously to its support. He also helped in the founding of the Rhode Island Hospital, to which he contributed over \$81,000. For a year or more he was president of the New England Emigrant Aid Society, whose object it was to assist emigrants who wished to settle in Kansas and make out of that territory a free state. During the civil war he was a warm patriot, responding to every proper call made upon him for sympathy and pecuniary aid. In May, 1859, he was married to Sophia Augusta, daughter of Hon. Patrick Browne, of New Providence, W. L., and had three children, John Nicholas, Harold, and Sophia A. Brown. He died in Providence, R. I., June 10, 1874.

NOTT, Abraham, jurist, was born at Saybrook, Conn., in 1768, grandson of Abraham Nott, pastor of the Congregational church at Saybrook for thirty-four years. He was graduated at Yale College in 1787 and studied for the ministry, but did not take orders. In 1788 he taught school in Georgia for a year, then studied law in Camden, S. C., and was admitted to the bar in 1791. In 1794 he settled on the Pacolet river, and continued the practice of his profession. He was a representative in congress from 1799 to 1801, when he was elected a judge of the court of appeals and judge of the superior court. His sons, Henry Junius and Josiah Clark Nott, were both celebrated; the former was a successful lecturer and a popular and finished essayist, and was a professor in South Carolina College; the latter was a physician and a writer on ethnology. He died at Fairfield, S. C., June 19, 1830.

PUTNAM, George Lansing, merchant, was born in Ontario county, N. Y., March 9, 1844, son of George Lansing and Sarah A. (Chrysler) Putnam. He first engaged in business as a member of the wholesale dry-goods firm of J. M. Wentz & Co., 388 Broadway, becoming a member of the firm of Tefft, Griswold & Co., 322, 324 and 326 Broadway, in 1878. Since 1884 he has been a member of the firm of Sweetser, Penbrook & Co., 374, 376 and 378 Broadway. He has been chairman of the advisory committee of the Merchants' Association of New York since the association was organized, and is a member of the chamber of commerce of the state of New York. He is a life member of the New England Society, St. John's Guild and the Society for the

Prevention of Cruelty to Children, and a member of the Metropolitan Museum of Art; the American Museum of Natural History; the American Geographical Society, and the Society for the Prevention of Cruelty to Animals. In 1875 Mr. Putnam was married in New York city to Althea Virginia Wyckoff, by whom he has two daughters, Althea Flower (Putnam) Palmer and Sara Whiting Putnam.

HENDERSON, David Bremner, congressman, was born at Old Deer, Aberdeenshire, Scotland, March 14, 1810, son of Thomas and Barbara (Bremner) Henderson. He came to the United States with his parents in 1816. They settled first in Illinois and three years later in Iowa, and in the latter state he received his education in the common schools and at Upper Iowa University. He served in the civil war in the 12th and the 46th Iowa infantry, but having lost a leg at Corinth, Tenn., was discharged as colonel Feb. 25, 1863. He served as commissioner of the board of enrollment of the 3d district of Iowa, until June, 1864, when he re-enlisted as colonel of the 46th Iowa regiment, with which he served until the end of the war. After his second discharge he studied law in the office of Bissel & Shiras, of Dubuque, and was admitted to the bar in the fall of 1865. Shortly after, he was appointed collector of internal revenue for the 3d district of Iowa, resigning in 1869, to become a member of

the firm of Shiras, Van Duzee & Henderson, with which he was connected for two years. Meantime he was U. S. district attorney for the northern district of Iowa for two years, and in 1878 became a member of the firm of Henderson, Hurd, Lenchen & Kiesel. In 1880 he was elected to congress from the 3d district of Iowa, and was continuously re-elected by a large majority until 1899, when he was elected speaker of the house of representatives, as successor to Hon. Thomas B. Reed. Speaker Henderson enjoys a wide and well-merited popularity, and a reputation for strong powers of debate and faithfulness in the discharge of official duties. He has been frequently mentioned as a possible Republican candidate for governor of Iowa. He is a member of the Round Table, a literary organization, and the Key City Club, both of Dubuque, Ia.; of the Army and Navy Club, Washington, D. C., and the Chicago Club of Chicago. He was married, March 4, 1866, to Augusta A., daughter of Aionzo H. Fox, of West Union, Fayette co., Ia.

OAKLEY, Thomas Jackson, jurist, was born in Dutchess county, N. Y., in 1782. He was graduated at Yale College in 1801; studied law, was admitted to the bar in 1804, and entered upon the practice of his profession at Poughkeepsie, N. Y. In 1810 he was appointed surrogate of Dutchess county; in 1815 was elected a representative in congress and re-elected in 1815; in 1817 he resumed his profession, and was elected a member of the assembly. He was appointed attorney-general of the state of New York in 1821. In 1827 he was again elected to congress, but resigned his seat in 1828, when the superior court of New York city was organized, and was appointed one of its judges. His first associates were Samuel Jones and Joseph Ozden Hoffman. Judge Jones, who had been chancellor, was chosen chief-justice and continued in that capacity until 1847, when Judge Oakley succeeded him, retaining that position until his death. He was employed as counsel in many important cases before he went on the bench. In the celebrated controversy concerning the exclusive right of navigating the waters of New York by steam, granted to Robert Fulton and his patron, Chancellor Livingston, Mr. Oakley advocated

the rights of New York state, his associate in this suit being Thomas Addis Emmet, with Webster and Wirt as opponents. He was also conspicuous in the litigations that sprang up in New York on the well-known manor grants question. The duties of the various stations to which he was called he discharged with fidelity and marked ability. The opinions he delivered made the superior court an authority on subjects of commercial law. The degree of LL.D. was conferred on him by Union College in 1833. He died in New York city, May 11, 1857.

STRONG, Selah Brewster, jurist, was born at Setauket, Suffolk co., N. Y., May 1, 1792, son of

Thomas S. Strong, who was chief-justice of the common pleas for his county in 1810-1823. His grandfather, Selah Strong, was born in Setauket, Dec. 27, 1737; was a delegate to the provincial congress in 1775; served as a captain in the revolution; was a state senator in 1792-96 and chief-justice of the county court of common pleas from 1783 until 1793. Selah B. Strong was graduated at Yale College in 1811; studied law and was admitted to the bar in 1814. He was district attorney for Suffolk county from 1821 to 1841, and a representative in congress from 1843 to 1845. In 1847 he was appointed a judge of the supreme court of New York, and gained a high reputation by his able opinions.

ins. In 1867 he was a member of the state constitutional congress. He died at Setauket, Nov. 29, 1872.

ROPES, John Codman, lawyer and author, was born April 28, 1836, in St. Petersburg, Russia, son of William and Mary Ann (Codman) Ropes. His father, a Boston merchant, resided in St. Petersburg for several years. He was a descendant of George Ropes, who settled at Salem, Mass., in 1637, one of whose relatives, also named George, was slain by the Indians in the battle of "Bloody brook," in 1675. John C. Ropes was graduated at Harvard College in the class of 1857, and at the Harvard Law School in 1861, in the same year securing the Bowdoin prize. In 1878 the firm of Ropes, Gray & Loring was organized, of which he was the head until his death. Many of his classmates entered the Federal army on the breaking out of the civil war, and he was anxious to accompany them, being peculiarly fitted, it is said, for a staff officer, by his coolness, his quickness of judgment and his natural sense of topography. Disqualified from going to the front, for physical reasons, he nevertheless performed invaluable work at home, caring for the wounded in the hospitals, and assisting soldiers' families. Foreseeing the need of an impartial military history of the great conflict, he began collecting material while the armies were still in the field, and formed the largest private library of books, pamphlets and maps to be found in the United States. This was deced by him to the Massachusetts Military Historical Society. It was largely due to him that the national government undertook the systematic collection of printed and written information relating to the civil war, obtaining the material from southern as well as northern participants. Besides frequent contributions to periodicals, he published "The Army Under Pope" (1881), in the series, "Campaigns of the Civil War"; "The First Napoleon: A Sketch, Political and Military" (1885); "The Campaign of Waterloo," and an "Atlas of Waterloo," and two volumes (1894-99) of a series of four, entitled "Story of the Civil War." With Mr. Ropes impartially was a matter of instinct and habit, and no partisanship under

the guise of patriotism was permitted to color his historical judgment. His elaborate monograph on the campaign of Waterloo is accepted in England as authoritative. His excursions into the military history of the other Napoleonic campaigns sufficed to secure for him an international reputation. They would of themselves have constituted a remarkable achievement for a man engaged as he was in the highly successful practice of the profession of the law, but they were in fact excursions only; his chief historical work was in connection with the civil war. His profession would have been sufficient to engross the energies of a very able man. His achievement in the difficult and complex field of literature that he chose was the more admirable. He organized the Military Historical Society of Massachusetts, the first of its kind; was a member of the American Historical Association; the Massachusetts Historical Society, the Royal Historical Society of London; the United States Cavalry Association, and the Loyal Legion of the United States. The degree of LL.D. was conferred on him by Harvard College in 1897. He died in Boston, Mass., Oct. 27, 1899.

GEIGER, Jacob, physician, was born in Wurtemberg, Germany, July 25, 1818, son of Anton and Marie Gliowa (Eierhardt) Geiger. His two elder brothers having emigrated to America in 1854, the rest of the family followed two years later, joining them in Champaign county, Ill., where Jacob attended the district schools. During the winter of 1863-64 he studied at the Homer Seminary, and he pursued a course of study at Bryant's Business College, at St. Joseph. In 1866 he began the study of medicine in the office of Galen F. Bishop, of St. Joseph, who secured him a position in a drug store in the following year. In 1868 he commenced practice under the supervision of his preceptor, and entering the medical department of the University of Louisville (Ky.), he was graduated in 1872. He opened an office in St. Joseph, and soon acquired a large practice. In 1877 he organized a medical class, with the view of establishing a college of medicine; and before the end of the year the St. Joseph Hospital Medical College was formed. He was elected to the chair of anatomy, but in 1879 resigned to assist in the founding of the College of Physicians and Surgeons, in which he became secretary of the faculty and professor of surgery. In 1884 these two colleges were united as the St. Joseph Medical College, the name being changed in 1887 to Ensworth Medical College, on account of a bequest by Samuel Ensworth. He is now (1901) dean of the college, and still holds the chair of surgery. In 1890, being instrumental in the organization of the Marion Sims College of Medicine, in St. Louis, he became professor of surgery there, and still holds it, making the trip between St. Joseph and St. Louis once a week. In 1884 he founded the "Medical Herald," of St. Joseph, with which he has been associated ever since as editor of the surgical department, besides being the contributor of numerous valuable articles on surgery and allied sciences. He has read many essays before large medical bodies, and is recognized as one of the foremost surgeons in the state. He is president of the St. Joseph Medical Society; member of the Tri State Medical, Mississippi Valley Medical, Grand River Medical and Northern Kansas Medical

associations, and of the Western Association of Surgeons and Obstetricians, and the American Medical Association. He is consulting surgeon of the Ensworth Deaconess' Hospital of St. Joseph, and the Rebecca and City Hospitals of St. Louis. He received the degree of LL. D. from Park College, Missouri, in 1897. He was married, April 12, 1887, to Louise, daughter of Robert and Katherine (Wittle) Kollatz, of St. Joseph.

JEFFREY, Rosa Vertner (Griffith), author, was born at Natchez, Miss., in 1828, daughter of John Y. Griffith, who gained a reputation as a writer of tales and poems. When she was nine months old her mother died, leaving her in the care of her maternal aunt, whose name she received. Her early childhood was passed in Burlington, Miss. In 1838 her adopted parents removed to Lexington, Ky., where she was educated in the Episcopal Seminary. In 1845 she was married to Claude M. Johnson, a wealthy citizen of Lexington, and at once became a leader in society. After her husband's death, in 1861, she removed with her children to Rochester, N. Y., and remained there during the civil war. In 1863 she became the wife of Alexander Jeffrey, of Edinburgh, Scotland. She began her literary career early; at the age of fifteen wrote the "Legend of the Opal," and in 1850 became a contributor to the Louisville (Ky.) "Journal," under the pen-name of "Rosa." In 1857 she published "Poems, by Rosa." This was followed by "Florence Vale"; "Woodburn," a novel (1864); "Daisy Dare and Baby Power," poems (1871); "The Crimson Hand, and Other Poems" (1881), and "Marah," a novel (1884). She was also the author of several dramas. She died in Edinburgh, Scotland, in 1894.

TAYLOR, Alfred Alexander, lawyer and congressman, was born near Elizabethton, Carter co., Tenn., Aug. 6, 1849, son of Nathaniel Greene and Emmeline (Haynes) Taylor. He was educated at Edge Hill under Profs. White and Cattell, and at Pennington, N. J., under Profs. Knowles and Hanlon. He read law, and was admitted to the bar in 1870. In 1875 he was elected to the legislature from Carter and Johnson counties, and in 1876 canvassed the 1st congressional district against Judge Henry H. Ingersoll as candidate for elector on the Hayes and Wheeler ticket. He was a candidate for elector for the state at large on the Garfield and Arthur ticket in 1880, and canvassed the state against

Judge Andrew B. Martin. Mr. Taylor was called into the campaign of the state, in 1882, by the state central committee, and canvassed in joint discussion with Sen. Isham G. Harris. The Republicans nominated him for governor in 1886, but he was defeated by his brother, Robert L. Taylor, who was the Democratic nominee. He was a delegate to the Republican national convention in 1888. He was elected to the 51st congress in 1889, as a Republican, and was re-elected to the 52d and 53d congresses. Mr. Taylor retired from politics in 1894 to raise the platform as a lecturer. He was married, in June, 1861, to Jennie Anderson, and has seven children, all sons.

DOW, Daniel, clergyman and author, was born at Ashford, Conn., Feb. 19, 1772. He was graduated at Yale with honors in 1793; supported himself during his theological course by teaching psalmody; was ordained to the Congregational ministry, April

20, 1796, and was settled as pastor of the Congregational Church at Thompson, Conn., where he remained throughout his life, and attained high reputation as a preacher. His sermons, though forcible, clear and logical, were never published, as Mr. Dow for a period of twenty years preached entirely without notes. He was a member of the corporation of Yale College, and he published "Familiar Letters to the Rev. John Sherman" (1806); "The Pelobaptist Catechism" (1807); a "Dissertation on the Sinaitic and Abrahamic Covenants" (1811), and "Free Inquiry Recommended on the Subject of Freemasonry" (1820). Williams College conferred upon him the degree of D. D. in 1840. He was married to a daughter of Deacon Jesse Bolles, of Woodstock. He died at Thompson, Conn., July 19, 1849.

BUBERL, Caspar, sculptor, was born in Königsberg, Bohemia, Sept. 22, 1832, son of Simon and Margaret Buberl. His father was a sculptor, and under him he received his early education. In 1850-52 he studied in Prague and Vienna, after which he traveled in the German states. Arriving in Bremen in 1854, he took passage on a sailing ship for America, and after a trip of fifty days arrived in New York city, where he resided until his death. In 1858 he studied under Robert E. Launitz, a pupil of Thorwaldsen, and worked under him for twelve years. He established his own studio in 1881, and there finished his "Farewell to the Mountains," which took the first prize at the Palette Club, New York. Among other works are a colossal group for the National Museum at Washington, D. C. (1884); statue of the Duke of Buckingham, for the Hotel Buckingham, New York city (1885); medallion of Commander Gorrige, U. S. N. (1883); "The Newshoy" (1884); statues and a bronze relief for the soldiers' and sailors' monument at Buffalo (1886); frieze for the soldiers' and sailors' monument at Hartford, Conn.; "The Muses," at the Metropolitan Opera House (1887); an allegorical group, "Electricity and Magnetism," for the Patent Office (1884); five bas-relief panels for the Garfield monument in Cleveland (1883); statuary, bas-reliefs, etc., for monuments on Gettysburg battle-field, and many other minor works of great excellence. He was one of the sculptors who offered their services for the production of the Dewey arch in New York city, his contribution being a medallion bas-relief of Com. Dahlgren. His last work was a statue of Adm. Raphael Semmes, erected in Mobile, Ala. Mr. Buberl was married, in 1856, to Anna Stubner, of Königsberg, and had nine children, only one of whom is living. He died in New York city, Aug. 22, 1899.

C. Buberl

REVELS, Hiram R., senator, was born at Fayetteville, Cumberland co., N. C., Sept. 1, 1822, of African descent. Desiring to obtain an education, he removed to Indiana, in 1844, where he spent sometime at the Quaker Seminary at Liberty, Union co., and at the Clark County Seminary. After studying at Knox College, Illinois, he was ordained a minister in the Methodist Episcopal church in 1847, and began preaching and lecturing among the colored people of Ohio, Illinois, Indiana and Missouri. He settled in Baltimore, O., as a minister and principal of the high school for colored students. At the breaking out of the war he assisted in the organization of the first colored regiments in Maryland and Missouri, going

as chaplain to Vicksburg, where he aided the provost-marshal in establishing order and industry among the freedmen. He followed the army to Jackson, Miss., organizing churches and speaking in public. He spent the next two years in Kansas and Missouri, preaching and lecturing. On his return to Mississippi he settled at Natchez, where he was chosen a member of the city council. When the state government was reconstructed, he was elected by a large majority to be Gen. Adelbert Ames' colleague as U. S. senator from Mississippi, serving from February, 1870, to March, 1871, and being the first of his race elected to such a position. He was subsequently pastor of a church at Holly Springs, Miss., and from 1871 to 1883 was president of Alcorn Agricultural University, Rodney, Miss. Afterward removing to Indiana, he took charge of the Methodist Episcopal church at Richmond. He died at

RAMSEY, David Marshall, clergyman, was born in Greenville county, S. C., Oct. 10, 1857, son of Andrew and Martha (Gaines) Ramsey, of Scotch descent—Ramseys of Scotland—although his grandfather came to America from the north of Ireland in 1819. He was graduated at Richmond College,

Richmond, Va., in 1884, and at the Southern Baptist Theological Seminary, Louisville, Ky., in 1887. While yet a student at the seminary and for a few months after graduation he was pastor of the Glens creek and Hillsboro churches in Woodford county, Ky. In May, 1888, he accepted the pastorate of the Baptist Church at Tuscaloosa, Ala. Resigning this charge in 1882, he became pastor of the Citadel Square Baptist Church in Charleston, S. C., where he now (1901) labors. This church originally cost \$75,000, and during the pastorate of Dr. Ramsey valuable additions of a material kind have been made, while the membership has greatly increased. His executive talent

is marked. The former pastors were: Dr. J. R. Kendrick, Lucius Cutlbert, Edwin T. Winkler, J. C. Chambliss, Charles A. Stukely, J. H. Ford and E. C. Dargan. As president of the board of trustees of Furman University, and as a trustee of the Southern Baptist Theological Seminary, he has been singularly successful in every way. He has contributed to the literature of the day pamphlets, sermons and addresses, as well as articles for magazines. He was married, Feb. 9, 1888, to Mary R., daughter of Dr. Joseph Woolfolk, of Versailles, Ky., and has one child. The leading minister of Charleston to day, Dr. Ramsey enjoys the respect and the admiration of the entire city, while no other preacher in South Carolina has a wider or more enviable reputation.

BARTLETT, Sidney, lawyer, was born at Plymouth, Mass., Feb. 13, 1799, son of Zachæus and Hannah (Jackson) Bartlett, and sixth in lineal descent from Robert Bartlett, who came to Plymouth in 1623, and in 1628 was married to Mary, daughter of Richard Warren, one of the Mayflower pilgrims of 1620. His father was a successful physician at Plymouth, where the son received his preparatory education. Sidney Bartlett was graduated at Harvard in 1818; taught school for a short time at Sci-

uate, Mass., and afterward studied law for a year with Nathaniel Morton Davis, of Plymouth. On Sept. 15, 1820, he entered the office of Lemuel Shaw, in Boston; in 1821 was admitted to the bar of the court of common pleas; in 1824 to the bar of the supreme judicial court, and in 1854 to the bar of the U. S. supreme court. He began to practice in 1821, and formed a partnership with Mr. Shaw, which continued until the latter became chief-justice of the Massachusetts supreme judicial court in 1830. His entire professional life was spent in Boston, where he was considered a lawyer of great learning and fine mental acquirements. In 1851 he was a member of the Massachusetts house of representatives and in 1853 of the constitutional convention; but, with these exceptions, he avoided public life. Though urged to accept appointments to the bench he invariably refused them, and it is not too much to say that for many years the highest judicial positions in the land were within his reach. In his college days he belonged to the Harvard Washington corps, and while a law student he was a member of the Standish guards. Later he was captain of the Boston rifle rangers. He was one of the founders and the first president (1876-77) of the Boston Bar Association. In 1858 Harvard conferred upon him the honorary degree of LL.D. Mr. Bartlett was married, Oct. 8, 1828, to Caroline, daughter of John and Mary (Tewksbury) Pratt, of Boston. They had two sons and two daughters. He died in Boston, March 6, 1890.

GUTHRIE, Samuel, physician and chemist, was born at Brimfield, Hampden co., Mass., in 1782, son of Samuel and Sarah Guthrie. John Guthrie emigrated from Scotland to America in 1661, settling first in Boston, and later in Litchfield county, Conn. His son, of the same name, was married to Abigail Coe, in 1727, and their son, James (b. 1732; d. 1804), was married to Abigail Betts in 1755. James drew up and signed many important documents pertaining to revolutionary affairs, among them the "Covenant," signed at Lenox, Mass., in 1774, and was a soldier in the American army, enlisting with his sons, Samuel and Joseph, father and uncle of Dr. Guthrie. Samuel Guthrie, Jr., studied medicine with his father, a physician, and upon obtaining the degree of M.D., began the practice of his profession at Sherburne, Chenango co., N. Y. He was one of the pioneers in the introduction of vaccination, having become convinced of its possibilities before his medical studies were completed. During the winter of 1810-11 he attended a course of medical lectures in New York city, and later at the University of Pennsylvania, becoming, upon the outbreak of the war of 1812, an examining surgeon in the army. Shortly after the close of the war he established a vinegar manufactory at Sacket Harbor, Jefferson co., N. Y., for supplying the Madison barracks; and in 1817 he removed to that town. There he conducted experiments in the manufacture of gunpowder, and though meeting with many serious accidents from explosion, succeeded in producing the first successful percussion powder. This he placed on the market in 1826, and it sprang into almost universal use throughout the United States and Canada. He also invented the "punch-lock," which superseded the flint-lock musket, and was not itself replaced by the percussion cap until after Dr. Guthrie's death. In 1830 he invented a process for the rapid conversion of potato starch into sugar, and shortly afterward succeeded in producing what is now known as chloroform, by distilling a mixture of alcohol and chloride of lime. There is no doubt that he discovered this anæsthetic before either Soubeiran or Liebig, for though these French and German scientists claim to have published accounts of their discoveries in October and November, respectively, of the year 1831, Dr. Guthrie wrote an article in July, describing his experience in

David M. Ramsey

the use of the preparation during the previous six months, the description being published shortly afterward in the "American Journal of Science and Arts," which had two agencies in Paris at the time. Dr. Guthrie's chloroform, which he termed "chloric ether," was distributed for general use, actually administered in a case of pulmonary disease by Dr. Eli Ives, of New Haven, and the process repeated and verified at Yale College, during 1841, while Soubeiran's and Liebig's discoveries did not actually reach the public until January and March, 1832. During the latter year the Medico-Chirurgical Society of Edinburgh awarded Dr. Guthrie the credit of having first published an account of the therapeutic effects of the preparation as a diffusible stimulant; but the exact composition of this "spirituous solution of chloric ether" was not known until its analysis by Dumas in 1834, when it was given the present name of chloroform. Dr. Guthrie was one of the first American investigators in practical chemistry and contributed frequent descriptions of the results obtained to the "American Journal of Science," among them being articles on "A Mode of Obtaining Chloric Ether," "The Manufacture of Chlorate of Potash and Percussion Powder," "Sugar from Potato Starch," and "Pulmonic Acid and Fulminates." He was a member of the American Philosophical Society; a stockholder in one of the first woolen mills established in Watertown, N. Y., and assisted in founding the Houndsfield Library, becoming one of its trustees. Dr. Guthrie was married, in 1804, to Sybil, daughter of Elijah and Sybil (Spencer) Sexton, and had two sons, Alfred and Edwin, and two daughters. Dr. Samuel Guthrie died at Sacket Harbor, N. Y., Oct. 19, 1848. Edwin Guthrie (1806-47) was captain of a company of Iowa volunteers during the Mexican war, was wounded in the knee, and died after two amputations. Guthrie county, Ia., was named in his honor.

GUTHRIE, Alfred, physician and mechanical engineer, was born at Sherburne, N. Y., March 31, 1805, son of Dr. Samuel and Sybil (Sexton) Guthrie. With his parents he removed to Sacket Harbor in 1817, and under the direction of his father studied medicine and chemistry, assisting in his father's laboratory at the time of the latter's investigations into "chloric ether," or chloroform. After practicing the profession of medicine for ten years the inventive talent inherited from his father seemed to call for a more promising field of operation, and he engaged in mechanical engineering. Removing to Chicago in 1846, he there designed the hydraulic works of the Illinois and Michigan canal, thus supplying the summit level of the canal with water from Lake Michigan. The plant was the most powerful of the kind then in existence, and was in successful operation from 1848 to 1871, for many years under his personal supervision. Its surplus capacity was used for lifting the sewage of the city of Chicago to the canal, by which it was carried to the Mississippi river and into the Gulf of Mexico. The many appalling disasters on river steamboats during 1851 convinced him of the necessity of national legislation to control the construction and management of these craft, and to this end he examined at his own expense about two hundred vessels, taking notes of unskillful management, and methods of engineers during exciting races, and making drawings of faulty apparatus and defective parts. The complete results were embodied in a memorial to congress, and accompanied with the notes and drawings. He then drafted a bill to cover the requirements, and, though strenuously opposed by steamboat owners, his work had been so thoroughly done as to leave no doubt of the necessity for a law. His bill was passed without material change in 1852. Since the creation of this law the loss of life and property by river dis-

asters has decreased in a very remarkable degree. He was appointed supervising inspector of steamboats by Pres. Fillmore, and was reappointed by Pres. Lincoln. Dr. Guthrie was married, Oct. 2, 1823, to Nancy, daughter of Thomas and Hepzibah (Jewett) Piper. She died July 10, 1855, having borne him three sons and two daughters. He was married the second time, March 31, 1857, to Phoebe A., daughter of Chauncey and Eliza (Dunn) Guthrie, and granddaughter of Joseph Guthrie, his grandfather. Three sons were born to them. Dr. Alfred Guthrie died in Chicago, Ill., Aug. 17, 1882.

HAYES, Thomas Gordon, senator, was born at Tracy's Landing, Anne Arundel co., Md., Jan. 5, 1814, son of Rev. Thomas C. and Juliana (Gordon) Hayes. At the commencement of the civil war he enlisted in the Confederate army, and served through the war. Returning to Baltimore, he entered a mercantile house, and later he returned to the Virginia Military Institute, Lexington, Va., where he was graduated in 1867. He became at once assistant professor of mathematics in his alma mater, and shortly afterwards was elected to the chair of natural science in the Kentucky Military Institute, Frankfort, Ky., where he remained for four years. While in Kentucky he studied law, and was admitted to practice in the courts of that state. In 1872 he returned to Baltimore to practice his profession. His first appearance

in public life was as a member of the house of delegates from Baltimore in 1880. His course in that body was marked by strong convictions and thorough independence on all the important questions which arose during that session. In 1883 Mr. Hayes was elected to the senate of Maryland, and served during the sessions of 1884 and 1886 as chairman of the judiciary committee. In the former he introduced and had passed a labor bill which allowed workmen to form trade unions and other associations for their protection; and a law exempting from execution or attachment \$100 of clerks' and working-men's wages. In 1892 and 1894 he was again elected to the state senate. Pres. Cleveland appointed him U. S. district attorney of Maryland for four years, 1886-90. The performance of the duties of that responsible office was marked by the same honest effort to discharge his whole duty as had been his characteristic while in the general assembly. In 1899 he was elected mayor of Baltimore for a term of four years. Mr. Hayes is a member of the Methodist Episcopal church, South.

Thomas G. Hayes.

PERRY, Nehemiah, merchant and congressman, was born at Ridgefield, Fairfield co., Conn., March 30, 1816, son of David Perry. He received a good education at the West Lane Seminary, and at the age of seventeen entered as clerk the dry-goods store of George St. John, at Norwalk, Conn. In 1834 he went to New York city, where he found employment in the clothing store of Charles Hall, 80 Vesey street, and there remained until 1836, when he opened a clothing store in Newark, N. J. The business increased rapidly, and branches were established at St. Louis, Cincinnati, Nashville, Memphis and other large cities. Always active in politics, he was for many years a member of the Newark common council, and its president for one term. In 1854 he was elected as the Whig representative from

his district to the state legislature, and again in 1855, at the former session serving as chairman of the committee of ways and means, and in the latter receiving the caucus nomination of his party associates for speaker of the house. He later identified himself with the Democratic party, and was appointed chairman of the state executive committee. In 1860 he was elected to congress, representing the 5th congressional district, and was re-elected in 1862, serving on the committees on revolutionary claims, expenditures on public buildings, and the committee on commerce. He was a director of the United railroads of New Jersey, of the Mutual Benefit Life Insurance Co.; of the Newark City Bank, and of various other institutions. In 1838 he was married to Emeline N. Gould, of Caldwell, N. J., and had two sons and two daughters.

KIECKHEFER, Ferdinand A. W., manufacturer, was born in Milwaukee, Wis., Feb. 10, 1852, son of Charles and Justine Kieckhefer. He was educated in the Lutheran parish schools of his city, and after completing his studies engaged as assistant book-keeper with John Pritzlaff, a wholesale hardware merchant, with whom he remained for five years. In 1872 he opened a retail hardware business for himself, and in 1876 took his brother William into partnership. They sold out in 1880, and engaged in the manufac-

ture of tinware, which was a success from its inception. Mr. Kieckhefer was the originator of the business, and has always been its leading spirit. It was incorporated in 1892 as the Kieckhefer Bros. Co., with a capital of \$1,000,000, with Mr. F. Kieckhefer as president and general manager. It is one of the largest and best equipped industries of its kind in the world. The articles manufactured consist of plain, retinned, galvanized, japanned and enameled tin ware, sheet-steel and iron goods. They also manufacture many of the machines used in the works. The value of the yearly product exceeds

\$2,000,000. Mr. F. Kieckhefer purchased the interests of his brother and other partner in 1899 for \$1,000,000. Later in the year he consolidated with four other large concerns, located in St. Louis, New York and Baltimore, under the style of the National Enameling and Stamping Co., with a capital of \$30,000,000, of which he is vice-president and one of the largest stockholders. He is also general manager of the Milwaukee branch of the business. Mr. Kieckhefer is a Republican; a member of the German and Milwaukee clubs, and is a communicant of the German Lutheran church. On May 13, 1875, he was married to Minnie, daughter of Frederick Kueteneyer, of Milwaukee, Wis. They have three daughters and two sons.

BOND, Hugh Lenox, jurist, was born in Baltimore, Md., Dec. 16, 1828, son of the Rev. Thomas Emerson and Christiana () Bond. His father was the editor of the New York "Christian Advocate." In early life he removed with his parents to New York city and was there educated, being graduated at the University of the City of New York in 1848. He then returned to Baltimore, studied law, was admitted to the bar in 1851, and commenced practice in that city. Mr. Bond became affiliated with the Know-nothing party, whose platform was a kind of compromise between secession and abolition, and in 1860 was appointed by the

governor judge of the Baltimore criminal court. To this position he was elected by the people on Nov. 5th of the following year, and served until 1868. Throughout the civil war, though stationed at a point where North and South were constantly clashing, he acted fearlessly up to all his convictions of right, thus receiving high commendation and approval. He was a prominent advocate of the enlistment of slaves in the army. When national soldiers were massacred, he instructed the grand jury to find indictments against the participants in the riots; and when the police forbade the display of any flag, he discharged those arrested for raising the national emblem. On the other hand, when a military commission held court in Baltimore to try persons for offences against the United States, he charged the jury to indict the commissioners, claiming that as the city was not under martial law, such a court could have no legal jurisdiction over persons not in the army. Gov. Swann had assumed the right to remove the Baltimore police commissioners, but seeing that he would have to use force, instructed his newly appointed commissioners to do so, calling upon Pres. Johnson to furnish the assistance of Federal troops. Gen. Grant, coming to investigate the trouble, was told by Judge Bond that while the *de facto* commissioners would obey any written order from the president brought by a soldier bearing the United States flag, they would not otherwise allow themselves to be removed; and upon the refusal of the Federal authorities to interfere in the matter, Judge Bond proceeded to arrest the usurping commissioners and placed them under bonds to keep the peace. He also showed his independence of spirit by releasing, on habeas corpus, all negro children brought before him who had been imposed upon and apprenticed to former slave holders under an old law. He was prominent in the education of the colored race, and induced Sec. Stanton to transfer all the Federal barracks in Maryland for use as school buildings, thus establishing schools in every county; these he frequently visited, delivering many speeches in an effort to dispel the prejudice of the people against negro education. Finally, when the Democratic party gained the ascendancy, he was retired from the bench and resumed the practice of his profession in Baltimore. Pres. Grant appointed him judge of the 4th circuit of the U. S. court, on July 13, 1870, the circuit including, besides his own state, both Virginia and Carolinas. In the following year he was called upon to conduct the trials of many members of the Ku Klux Klan, a secret society which persecuted negroes and interfered generally with the efforts of the North toward cementing the union, and over 100 of these conspirators were sentenced by him to the penitentiary. In 1876 he decided the famous case where the South Carolina supreme court had arrested the presidential electors of the state, and released the prisoners on the ground that they were not amenable to state law while acting in a Federal capacity. Later he became chief judge of the U. S. circuit court, retaining the office until his death. He was married, in 1856, to Annie, daughter of William Penniman, and had three sons: Nicholas P., Hugh L., and Summerfield Bond. Judge Bond died in Baltimore, Md., Oct. 25, 1893.

McKENZIE, Alexander, clergyman, was born at New Bedford, Mass., Dec. 14, 1830, son of Daniel and Phoebe (Smith) McKenzie. After some years as a clerk, in Boston, he entered Phillips Academy, Andover, in 1853, and Harvard College in 1855, graduating there in 1859 and at Andover Theological Seminary in 1861. Entering the Congregational ministry he became pastor of the South Church, Augusta, Me., in 1861, and in 1867 was called to the First Church in Cambridge, Mass., where

Ferdinand A. W. Kieckhefer

A. M. Byers
—
"

he still remains. He received the degree of D.D. from Amherst and Harvard in 1879. The list of minor posts and offices which he has held bears witness to his repute and influence: Trustee of Bowdoin College (1866-68); member of Cambridge school committee (1868-74); overseer of Harvard College (1872-84), and secretary of the overseers since 1875; trustee of Phillips Academy, Andover, and of the Sunday there since 1876; president of the Congregational Club of Boston (1880); member of Massachusetts Historical Society since 1881; lecturer at Andover Theological Seminary (1881-82), and at Harvard Divinity School (1882); trustee of Hampton Institute, Virginia, and of Wellesley College, both from 1883; preacher at Harvard University (1886-89); president of the Boston Seamen's Friend Society from 1886. He has published a "History of the First Church in Cambridge" (1873); "Cambridge Sermons" (1883); "Some Things Abroad" (1887); "A Door Opened"; Lowell Institute lectures, and many addresses, orations and sermons. He is esteemed one of the chief pulpit orators of New England. Dr. McKenzie was married at Pittsburg, Mass., Jan. 25, 1865, to Ellen H., daughter of John Henry and Martha (Hohman) Eveleth. They have a son and a daughter.

COCKE, William, senator, was born in Virginia, probably in 1740, and in his youth was sent to England, where he was educated. Returning to this country, he began the practice of law. He was elected to the Virginia legislature, and during the revolution joined the state militia, in which he rose to colonel; afterwards, in Tennessee, he was promoted to brigadier-general. When Tennessee was admitted into the Union in 1796, Mr. Cocke was one of the first U. S. senators from that state. He was elected in 1796, and served from Dec. 5th of that year to 1797, and being re-elected, continued in the same office from 1799 to March 3, 1805. From this time he was out of public office until 1813, when he was elected a member of the Virginia state legislature. Later, he became a judge of the circuit court, and in 1814 Pres. Madison appointed him Indian agent of the Chickasaw nation. The date of his death is not on record.

COCKE, John, soldier and legislator, was born at Brunswick, Nottaway co., Va., in 1772, son of William Cocke, U. S. senator. Having gone with his father to Tennessee in his boyhood, he there took up the profession of law, after obtaining a common-school education. He was elected a member of the first legislature of Virginia in 1796, served for many years as speaker of the house, and some years later was elected to the Virginia senate. On the outbreak of the war of 1812 he volunteered his services, becoming major-general of Tennessee volunteers, Sept. 25, 1813. He fought in the Creek war, and served under Jackson at New Orleans. In 1818 he was elected a representative from Tennessee to the 16th congress (1819-21), and being re-elected to the 17th, 18th and 19th congresses, served until March 3, 1827, when he retired from public life, devoting himself to the care of his plantation. Gen. Cocke died at Rutledge, Granger co., Tenn., Feb. 16, 1854.

BYERS, Alexander McBurney, manufacturer, was born at Greenfield, Mercer co., Pa., Sept. 6, 1827, eldest son of Daniel Cannon and Maria (McBurney) Byers, of Scotch descent. His boyhood was spent on a farm. He was first employed at Henry Clay furnace, one of the oldest blast-furnaces in the state, and remained there until 1854, when he removed to Cleveland, O., to take charge of the house of Spang & Co. In 1857 he became connected with Spang & Co.'s house at Pittsburg, Pa., and the following year formed a partnership in the same business, the firm name being Spang, Chalfant & Co.

Six years later he withdrew from this firm and built the mills operated by A. M. Byers & Co., manufacturers of wrought iron pipe. Prosperity attended this undertaking, and their mills on the south side of the Monongahela, at Pittsburg, became well known throughout the country for their large output. Mr. Byers did not join the National Tube Co. on its formation; but it was understood that his plant was to be operated in harmony with the trust as to prices and output. It is still operated as A. M. Byers & Co., Mr. Byers having been its president, and his son, Dallas C. Byers, being secretary. In 1870 Mr. Byers started a furnace at Girard, O., of which he was sole owner, and this is still in operation. He was also one of the largest individual stockholders of the Philadelphia Co., before its purchase by Alexander Brown & Sons, of Baltimore. He had been one of the organizers of this company with George Westinghouse, and was at one time one of its directors. At the time of his death Mr. Byers was president of the Iron City National Bank, and during his connection with it was its head in fact, as well as in name, few, if any, men in Pittsburg having a higher reputation for knowledge of finance. He was also a director of the Westinghouse Air Brake Co., of the Westinghouse Electric and Manufacturing Co., and director of the Union Switch and Signal Co., another Westinghouse interest. His name will ever be connected with that of Carnegie and Westinghouse

in the history of iron and steel manufacture in this country. Mr. Byers built for himself a palatial residence in Allegheny, opposite Pittsburg, and filled it with works of art selected by himself. His gallery of paintings by native and foreign artists is considered to be one of the finest in this country. Mr. Byers was married in Allegheny, December, 1864, to Martha, daughter of Cochran and Sarah Fleming, of Pittsburg. A daughter and four sons were born

to them: Maude, now the wife of J. Denniston Lyon; Alexander McB., Dallas C., Eben M. and J. Frederic. The death of his son, Alexander, in December, 1899, had a serious effect upon the health of Mr. Byers, which was already failing, and a sojourn at Watch Hill, R. I., in the summer of the following year improved his condition but slightly. On his journey back to Pittsburg he spent several days in New York city, and there died Sept. 19, 1900.

PECKHAM, Rufus Wheeler, jurist, was born at Rensselaerville, Albany co., N. Y., Dec. 20, 1809, fifth son of Peleg and Desire (Watson) Peckham. The first American ancestor, John Peckham (d. 1681), was married to Mary Clarke; their son, John (b. 1645, d. 1712), was married to Sarah Newport; their son, Benjamin (b. 1684, d. 1761), was married to Mary Carr, Sept. 23, 1708, and their son, Benjamin (b. 1715, d. 1792), was married to Mary Hazard, March 2, 1737, who became the grandmother of the subject of this sketch. His father, a farmer of great integrity, removed to Otsego county, near Cooperstown, N. Y., in 18. Mr. Peckham attended Hartwick Seminary and Union College, where he was graduated in 1827. He then removed to Utica and read law in the office of G. C. Bronson and Samuel Beardsley, subsequently chief-justices of the supreme court of New York. Mr. Peckham was admitted to the bar in 1830, and entered into partnership with his brother, George, in Albany, N. Y.

In 1839 he was appointed by Gov. Marcy district-attorney of the county of Albany, in which capacity he served until 1841. He was elected to the 33d congress in 1852. On the expiration of his term he resumed practice in Albany, taking into partnership Lyman Tremain; his brother, George, having removed to Milwaukee in the interim. In 1859 he spent a few months in European travel, and upon his return was elected justice of the supreme court. At the close of his first judicial term of eight years Judge Peckham was re-elected, no opposing candidate being named. In 1870, before the expiration of his second term, he was elected to the court of appeals.

On Nov. 15, 1873, Judge Peckham, accompanied by his wife, sailed for Europe on the steamer *Ville du Havre*, for the benefit of his health, intending to spend the winter in southern France. He was destined, however, never to arrive there, as the English iron ship *Loch Earn* collided with the *Ville du Havre* on Nov. 23d. She sank within twelve minutes of the time she was struck, Judge and Mrs. Peckham being carried down in the vortex. Just before the ship disappeared he said to his wife, "If we must go down, let us die bravely"—probably his last words. His first wife, Isabella Adeline, daughter of the Rev.

Rufus Peckham

Dr. William B. Lacey, rector of St. Peter's Church, Albany, N. Y., to whom he was married in 1832, died in 1848. In February, 1862, he was again married to Mary Elizabeth, daughter of Israel Foote. He had three sons, Wheeler Hazard, Joseph Henry and Rufus William Peckham.

PECKHAM, Wheeler Hazard, lawyer, was born in Albany, N. Y., Jan. 1, 1833, son of Rufus Wheeler and Isabella A. (Lacey) Peckham. He received his early education at the Albany Academy, and afterwards went to Union College, Schenectady, but left before graduation on account of poor health. He then took up the study of law, and was admitted to the bar in 1856. For two years he practiced in that city with his father and Lyman Tremain. His health not improving, he spent a year in Europe, and on returning to the United States went to St. Paul, where he resided until the latter part of 1862. In February, 1864, he settled in New York city. He became particularly noted for his knowledge on important points of municipal and constitutional law; had an extensive practice in the U. S. supreme court, and achieved a special reputation through his argument on the constitutionality of the practice of taxing greenbacks. In that argument Mr. Peckham was opposed by Charles O'Connor, of New York city, who stated that Mr. Peckham's effort was as able as any he had ever heard. During the excitement following the exposure of the Tweed "ring" in New York, the attorney-general of the state appointed Charles O'Connor special deputy attorney-general, with power to prosecute the men guilty or suspected of the "ring" frauds. Mr. O'Connor immediately requested Mr. Peckham to act with him in the performance of this duty, and for several years the latter gave up almost his whole time to this business. His ability as a lawyer and his force in argument were important factors in the grand result of the exposure, prosecution and flight or imprisonment of the chief criminals. Mr. Peckham was counsel in important litigation against the state of Louisiana by holders of the state bonds, the case, however, being decided adversely to them by the U. S. supreme court. Besides this, he was permanently employed as counsel by the Union Trust Co., New York. In

1881 he was appointed district-attorney for the county of New York, but resigned after holding the office a few weeks. Mr. Peckham resumed his position as a member of the firm of Miller, Peckham & Dixon, in New York, of which he became a member in 1864.

PECKHAM, Rufus William, jurist, was born in Albany, N. Y., Nov. 8, 1838, youngest son of Hon. Rufus Wheeler (judge of the court of appeals of New York) and Isabella A. (Lacey) Peckham. He attended school at the Albany Academy and later in Philadelphia. In 1856 he went to Europe for a year, and on returning studied law in the offices of his father and of Lyman Tremain in Albany, in 1857, and was admitted to the bar in 1859. On Jan. 1, 1860, he formed a partnership with his father's partner, Mr. Tremain, which continued up to the time of the death of the latter in 1878. Mr. Peckham was elected district-attorney of Albany county in November, 1868, and served three years. It was during his term of office that the famous express robbery occurred on the railroad bridge at Albany, when the express messenger, Halpine, was left for dead in the car. The trial was one of the most exciting that ever took place in Albany county. It was conducted by Dist. Atty. Peckham with indefatigable effort and rare ability, and resulted in a conviction. Mr. Peckham was one of the counsel for the Albany and Susquehanna Railroad Co. in its fight with the Erie Railroad Co., controlled by Jay Gould and James Fisk, Jr. He also represented the attorney-general in many capital trials, and generally with success. Mr. Peckham was one of the representatives of his congressional district in the national convention held at St. Louis in 1876, and was an active supporter of Mr. Tilden for the presidency. He was also a representative in the Cincinnati convention in 1880, when Maj.-Gen. Hancock was nominated. In April, 1881, he was appointed corporation counsel of the city of Albany. From 1883 until 1886 he was justice of the supreme court of New York, when he was elected an associate justice of the court of appeals. In December, 1895, he was appointed associate justice of the U. S. supreme court at Washington, D. C. The degree of LL. D. was conferred upon him by Columbia in 1901. In 1866 he was married to Harriette M., daughter of D. H. Arnold, of New York, and has two sons.

SAWYER, John Talbott, clergyman, was born at Ann Arbor, Mich., Feb. 4, 1843, son of Hon. Franklin and Sarah Mathew (Loring) Sawyer, and a descendant of Thomas Sawyer, one of three brothers who came from Lincolnshire, England, to Massachusetts between 1640 and 1646. The records of the family in England show they bore arms "during the third crusade under Richard Cœur de Lion and Baldwin. His family and hereditary coat of arms were given in 1310 to Hugh Sawyer for distinguished services rendered his sovereign on the field of battle. The family came to England with William the Conqueror in 1066." His great-grandfather, Elisha Sawyer, served in the revolutionary war. His father was born at Cambridge, Mass., 1809; was graduated at Harvard in 1830; was a lawyer, educator and editor; served in the Massachusetts legislature; was the founder and first president of the Young Men's Society of Detroit, Mich.; was state superintendent of education in Michigan (1842-43), and was one of the originators of the University of

John J. Sawyer

Michigan. Dr. Sawyer was educated in New Orleans, and was graduated in the law department of Tulane University with the degree of LL.B. He, however, abandoned a good law practice for the ministry; was licensed to preach in July, 1873, and in 1874 became a member of the Louisiana conference of the Methodist Episcopal church, South. He has been successful in filling the most important charges in his conference; he has raised large sums for church purposes, and has built numerous churches. He received his degree of D.D. from Centenary College, of which for many years he has been a trustee, in 1892. He was corresponding editor of the New Orleans "Christian Advocate" for some years, and was at one time chairman of its publishing committee, of which he is still a member; has not only contributed frequently to its columns, but to those of other papers of his church, and to the secular press. Dr. Sawyer is the author of "The World in the Church" (1892). He was one of the organizers and most active workers of the Anti-Lottery League. For many years he has been secretary of the Louisiana conference, and has been three times sent to the general conference of his church, once at the head of his delegation. He is chaplain of the Louisiana chapter of the Sons of the American Revolution, and was the first president of the Young Men's Christian Association of New Orleans, after its reorganization in 1877. He is presiding elder of the Shreveport district (1901), one of the largest and most important in Louisiana, and president of the conference board of missions. Dr. Sawyer was a delegate to the great general conference of missions in New York city in April, 1890; and also chairman of the Louisiana delegation to the Southern Methodist missionary conference, in New Orleans, in April, 1901. For several years he has been president of the board of trustees of Mansfield (La.) Female College. Dr. Sawyer was married in New Orleans, La., July 10, 1877, to Elizabeth T., daughter of Col. Thomas and Elizabeth Thomas (Hearn) McKnight, and has three children.

LOVING, James Carroll, secretary, was born in Hopkins county, Ky., June 6, 1836, son of Oliver and Susan D. (Morgan) Loving. He acquired a common school education in his native county and in Collin county, Tex., to which place his father removed in 1845.

He was appointed secretary of the Cattle Raisers' Association of Texas in 1877, which position he has filled ever since, the headquarters being at Fort Worth. In 1882 he assisted in organizing the Loving Cattle Co., which owns 30,000 acres of land and 4,000 head of cattle. In political affiliation he is a Democrat, and he is a Royal Arch Mason. Mr. Loving is recognized as an authority on the cattle industry of Texas.

In 1857 he was married to Mary E., daughter of James B. and Elizabeth Willett, of Kentucky. He has two children living, a daughter and a son.

NATHAN, Adolph, merchant, was born at St. Goar, on the Rhine, Germany, May 8, 1814, son of Jacob and Helen (Schoir) Nathan. His father came to the United States after the revolution of 1848. His early years were spent on a farm at Lancaster, Wis., where he attended a district and high school. After a course at the Commercial College of Chicago, Ill., he began active life as a clerk in a grocery store at

Lancaster, and in 1863, on a borrowed capital of \$650, he entered the grocery business on his own account. In 1880 he organized the Kuhn, Nathan & Fischer Co., manufacturers of clothing and woolsens, of Chicago, and as its vice-president and treasurer from the beginning, has been largely instrumental in making it one of the largest manufacturing concerns in its line in the Union. While still engaged as a country trader he obtained \$400,000 capital to build the Chicago and Tomah Narrow Gauge railroad in southwest Wisconsin, now a branch of the Northwestern system. He became president of Street's Western Stable car line in 1885, raising the first \$500,000 required to put it on a permanent basis. In 1890 he was elected a member of the directory of the World's Columbian exposition, and served on the committees for machinery and electrical appliances, manufacturers and ways and means, and the adjustment committee. During 1895-98 Mr. Nathan was president of the civic federation of Chicago, which, with the co-operation of other political clubs and societies, accomplished the passage of the present equitable assessment law and the new primary election law, both innumerable improvements on the formerly existing system. He is a member and director of the National Association of Merchants and Travelers; a member of the finance committee of the Army and Navy League, which collected over \$60,000 for dependent families and sick soldiers and sailors during the war with Spain, and is one of the executive committees of the Associated Bureau of Charities. In the civil war he served in the Federal army as a private in the 41st Wisconsin volunteers, and special order clerk under Gen. Washburn in the department of Tennessee, at Memphis. He is also a member of the Union League, Washington Park and Standard clubs, of Chicago. In October, 1865, he was married, in New York city, to Rosa, daughter of Lazarus Schreiber, a native of Oppenheim, Germany.

BRECK, Daniel, jurist and congressman, was born at Topsfield, Essex co., Mass., Feb. 12, 1788, son of Rev. Daniel and Hannah (Porter) Breck. His father (b. 1748, d. 1845), a native of Boston and a graduate of Princeton, was a chaplain in the American army during the revolution, and, accompanying Col. Porter's regiment to Canada, was present at the battle of Quebec. Subsequently he preached at Topsfield and at Hartland, Vt. The son, though he obtained his education under difficulties, was graduated at Dartmouth College in 1812, delivering the philosophical oration, and secured his admission to the bar, entering on the practice of law at Richmond, Ky., in 1814. He rose rapidly in his profession, became judge of Richmond county, and served in the state legislature (1824-29 and again in 1834), originating important measures, among which were the present system of internal improvements and the Northern Bank. In 1835 he was elected president of the Richmond branch of the state bank, serving until 1843, when he was appointed judge of the supreme court of Kentucky. The latter office he held until 1849, and then resigned to accept an election as representative from Kentucky to the 31st congress (1849-51), where he was a member of the committee on manufactures. As presidential elector he served during the election of 1840. The rank of colonel was attained by him in the state militia, and the degree of LL.D. was conferred upon him by the Transylvania Uni-

Joseph Nathan

James C. Loving

versity in 1843. After his retirement from congress in 1851 he was again elected to the presidency of the Richmond Bank. During the civil war he was a pronounced Unionist. He was married, June 2, 1819, to Jane Briggs, daughter of Gen. Levi Todd, an early settler of Kentucky, and aunt of the wife of Pres. Lincoln. They had two sons and a daughter. He died Feb. 4, 1871.

WILSON, James Grant, author and editor, was born in Edinburgh, Scotland, April 28, 1832, son of William and Jane (Sibbald) Wilson. He received his early education at College Hill, Poughkeepsie, and continued to study the languages, music and drawing under private tutors. He then joined his father in business as a publisher, subsequently becoming a partner. Returning from a summer abroad in 1855, he established at Chicago the first literary journal of the Northwest, and soon became known as a public speaker. After conducting the Chicago "Record" with success until 1862, he disposed of his paper, having received a commission as major of the 15th Illinois cavalry. He served in the Vicksburg campaign; became acting colonel of his regiment, and participated in many battles. Accompanying Gen. Grant to New Orleans, in August, 1863, he there accepted, by his advice, the colonelcy of the 4th regiment of U. S. colored cavalry. He

was then assigned to the post of aide-de-camp on the staff of the general commanding the department of the Gulf, in this capacity taking part in the Teche, Texas and Red river campaigns, during the latter of which he cooperated with Lieut. Col. Joseph Bailey in the construction of the Red river dam, which saved Adm. Porter's fleet. About the same time he acted for nearly two years as military agent for New York state, in Louisiana. When Gen. Banks was relieved, April, 1865, Col. Wilson was brevetted brigadier general, and stationed at Port Hudson until July, a portion of the time being in command of the post. In the latter month he resigned, and

took up his residence in New York city, where he has since pursued a literary career, editing and writing many valuable biographical and historical publications. He has served as a delegate from St. James' Episcopal Church of New York to the diocesan conventions since 1874, and was also a member of the general convention which met in Richmond, Va., in 1859. He was appointed to the board of visitors to the U. S. Naval Academy in 1879, and to the board of visitors to the Military Academy in the following year, serving as secretary of both boards and delivering the address to the West Point cadets. In 1882 the governor of New York state appointed Gen. Wilson chairman of a committee for the collection of \$40,000 as the state's official contribution for the Garfield monument. He was instrumental in the erection of a monument over the grave of Fitz-Greene Halleck, at Guilford, Conn.; also of the statue of that poet in Central park, New York city, which was the first erected in honor of any American poet. In 1893 Gen. Wilson, in recognition of his having erected the noble bronze statue of Columbus in Central park, New York city, was, by the queen regent of Spain, decorated and appointed a Chevalier of the Order of Isabella, which carries with it the title of knight. He was president of the New York Genealogical and Biographical Society (1885-1900);

president of the Society of American Authors (1894-99); vice-president of the Association for the Reform and Codification of the Law of Nations" (1875-94), and is vice-president of the Society for the Prevention of Cruelty to Animals; vice-president of the American Ethnological Society, and an honorary member of many American and foreign historical and other societies. Among his published addresses may be mentioned those on Col. John Bayard, Com. Isaac Hull, Chief-Justice Kirkpatrick, Bishop Samuel Provoost, Abraham Lincoln and Gen. Grant. He has also contributed more than a hundred historical articles to the principal magazines of the United States; also to English and German periodicals, and has either edited or composed the following: "Biographical Sketches of Illinois Officers" (1862); "Love in Letters: Illustrated in the Correspondence of Eminent Persons" (1867); "Life of Gen. U. S. Grant" (1868; new ed., 1897); "Life and Letters of Fitz-Greene Halleck" (1869); "Life of John J. Audubon" (1870); "Sketches of Illustrious Soldiers" (1874); "Poets and Poetry of Scotland from the Earliest to the Present Time" (2 vols., 1876); "Memoirs of an American Lady," by Mrs. Anne Grant (1876); "Centennial History of the Diocese of New York, 1785-1885" (1886); "Bryant and His Friends" (1886); "Appletons' Cyclopaedia of American Biography" (6 vols., 1887-89); "Memorial History of the City of New York" (1892-93); "Great Commanders' Series" (16 vols., 1892-1901); "Appletons' Cyclopaedia of American Biography" (Vol. VII., 1901), and "Presidents of the United States" (1901). Gen. Wilson was married at New Brunswick, N. J., Nov. 4, 1869, to Jane Emily, daughter of Dr. Jonathan and Jane Endora (Kirkpatrick) Cogswell, and a descendant of Mme. Bayard, sister of Gov. Peter Stuyvesant. They have one daughter.

SANGER, George Partridge, jurist, was born at Dover, Norfolk co., Mass., Nov. 27, 1819, son of Ralph and Charlotte (Kingman) Sanger. His earliest American ancestor was Richard Sanger, who came from Hingham, England, to Hingham, Mass., in 1636. His grandfather, Zedekiah Sanger, was a distinguished classical scholar, teacher and clergyman. He was graduated at Harvard in 1771, and received the degree of D. D. from Brown University in 1807. Ralph Sanger was graduated at Harvard, in 1808, studied divinity, and was pastor at Dover, Mass., for more than fifty years. He was a member of the Massachusetts legislature; became chaplain of the state senate in 1838, and received the degree of D. D. from Harvard in 1857. The son was prepared for college by his father, and at the Bridgewater Academy in 1833-34. He taught in a district school at Dover in 1834, and at Sharon in 1835, in 1836 entering Harvard University, at which he was graduated in 1840. For two years following he taught a private school at Portsmouth, N. H., and in 1842 was appointed proctor at Harvard, where he also entered the law school, receiving the degrees of LL. B. and A. M. in course. In 1843 he became tutor in Latin, served as such until 1846, and was afterward for several years a member of the committee for examination of undergraduates in Latin. He was admitted to the Boston bar in 1846, and formed a partnership with Stephen H. Phillips, of Salem, Mass. In 1849 he became assistant U. S. district-attorney, continuing during the Taylor-Fillmore administration. In January, 1853, Gov. Clifford appointed him on his military staff, and in the following October he became district-attorney for the Suffolk district, this last appointment causing him to remove from Charlestown to Boston, where he resided until 1867, when he removed to Cambridge. While in Charlestown he served for two years on the board of aldermen. In the summer of 1854 he was appointed

James Grant Wilson

by Gov. Washburn as a judge of the court of common pleas, which position he filled with ability until that court was abolished in 1859, when he resumed the practice of law in Boston. From 1861 to 1869 he served again as district-attorney for Suffolk county, in 1860 being also a member of the Boston common council. He was president of the John Hancock Mutual Life Insurance Co. from the time of its organization until 1873. In 1873 he was a member of the lower house of the legislature, and in June of that year was appointed by Pres. Grant U. S. attorney for the district of Massachusetts; was re-appointed by Pres. Hayes in 1877 and by Pres. Arthur in 1882. At the expiration of his last term of service, in 1886, he returned to the general practice of law in Boston. Judge Sanger spent much time in writing on legal and other topics. From 1848 until 1862 he was editor of the "American Almanac and Repository of Useful Knowledge"; he was editor of the Boston "Law Reporter" for many years, and editor of the "Statutes at Large" from 1855 to 1873. In 1860 he and Judge Richardson were appointed by the state legislature to prepare and revise the publication of the "General Statutes," and this they did annually until 1882. Judge Sanger was married, Dec. 14, 1846, to Elizabeth Sherburne, daughter of Capt. William Whipple and Eleanor Sherburne (Blunt) Thompson, of Portsmouth, N. H. He died at the residence of his son, at Swampscott, Mass., July 3, 1890. Four sons survive him, all graduates of Harvard: John White, William Thompson, George Partridge, and Charles Robert Sanger.

BIDDLE, Richard, congressman and author, was born in Philadelphia, Pa., March 25, 1796. He was a brother of Nicholas Biddle, the financier, and a nephew of the naval officer who bore that name. Though still a youth, he enlisted for the war of 1812, and participated in the protection of Philadelphia. His education had been of a classical character, and after the war he studied law, securing admission to the bar and settling for the practice of his profession in Pittsburgh, Pa., where he attained high rank as a lawyer. Visiting England in 1827, he spent three years in that country, occupying himself mainly in historical investigations. On his return, in 1830, he resumed the practice of his profession, and was later elected a Whig representative from Pennsylvania to the 25th congress (1837-39), serving so efficiently that he was re-elected to the 26th congress (1839-41). His published writings include: "A Review of Captain Basil Hall's Travels in America," which he wrote while in England (1829), and "A Memoir of Sebastian Cabot, with a Review of the History of Maritime Discovery" (1831), which revealed many hidden though important facts concerning the discovery of America. He died in Pittsburgh, Pa., July 7, 1847.

JOHNSON, Clifton, author and illustrator, was born at Hadley, Hampshire co., Mass., Jan. 25, 1865, son of Chester L. and Jeannette (Reynolds) Johnson. As a boy he worked on his father's farm, and attended the Hadley grammar school and academy. At the age of fifteen he became a clerk in the book store of Bridgman & Childs, Northampton, where he remained for five years, returning then to the farm. The familiarity with books thus gained gave a literary bent to his mind, and in the intervals of farm work and school teaching he constantly employed himself in writing and drawing, occasionally going to New York city in the winter time to study in the art schools there. His work, both with pen and pencil, meeting with encouragement in that city and in Boston, he published his first book in 1892, "The New England Country," a realistic study in text and pictures of Yankee farm folk and their surroundings, that was immediately successful. For several years he has spent his summers abroad, gather-

ing much material in pictures and notes for works on old world country life. Besides the volume already mentioned, he is the author and illustrator of "The Country School" (1893); "The Farmer's Boy" (1894); "What They Say in New England" (1896); "Among English Hedge Rows" (1899), and "Along French Byways" (1900), besides frequent articles published in leading magazines. He has also illustrated the following for holiday editions: White's "Natural History of Scholone" (1895); Burroughs' "Year in the Fields" (1896); Barrie's "Window in Thrums" (1896); MacLaren's "Beside the Bonnie Brier Bush" (1896), and "In the Days of Auld Lang Syne" (1896); Jane Barlow's "Irish Idyls" (1897); Charles Dudley Warner's "Being a Boy" (1897); Dickens' "Child's History of England" (1898); Blackmore's "Lorna Doone" (1900), and Sally Pratt McLean's "Vesty of the Basin" (1900). Mr. Johnson was married, May 25, 1896, to Anna Tweed, daughter of John McQuestion, of Hadley, Mass., where they reside. They have two children, Margaret and Arthur Johnson.

COLLINS, Patrick Andrew, lawyer, congressman and U. S. consul general, was born near Fermoy, county Cork, Ireland, March 12, 1844, son of Bartholomew and Mary (Leahy) Collins. After the death of his father, in 1848,

he removed, with his mother, to Chelsea, Mass., where he was educated in the public schools. He apprenticed himself to the upholstering business, in 1859, with F. M. Holmes & Co., of Boston, and was later foreman of their establishment, and for E. H. Brabrook until October, 1867, when he began the study of law in the office of James M. Keith. Having always been an industrious student in a wide range of subjects, he was well fitted for the course in the Harvard Law School, where he was graduated in 1871. His professional career has been brilliant from the start, owing to his natural ability, great industry, perseverance and complete mastery of the law. He is particularly powerful with juries, owing to his ability to marshal facts in a comprehensive and convincing manner. His practice includes an extensive corporation and commercial business in both state and Federal courts, but he has never practiced in criminal law to any extent. In 1893 he formed a partnership with Judge John W. Corcoran, under the style of Collins & Corcoran, which still continues. He has also taken an active part in Democratic politics, and while still a student at law was a member of the state legislature (1868-69) and of the senate (1870-71). During his last year in the senate he was chairman of the committee on harbors, being the only Democratic chairman of any committee at that time. He was chairman of the city committee of Boston in 1874-75, and the Massachusetts state committee from 1884 to 1890; was a delegate at large from Massachusetts to the national conventions of 1876, 1880, 1888 and 1892, serving as permanent chairman in 1888. For four years he was judge advocate of the 1st brigade M. V. M., and in 1875 was judge advocate general on the staff of Gov. Gaston. He was representative in the 48th, 49th and 50th congresses, serving during the entire period on the judiciary committee, and in his last term on the committee on Pacific railroads also. His notable services

in regard to bankruptcy, copyright, French spoliation claims and Alabama claims bills gave him a national reputation. By appointment of Pres. Cleveland, in 1893, he became U. S. consul-general in London, and held the position until May, 1897. Personally as well as professionally Mr. Collins enjoys the high esteem of all who know him, his sterling character and varied talents having always served to make him a leader. He was an original member of the Boston Bar Association; is a member of the National Bar Association; member and former president of the Charitable Irish Society of Boston, the oldest civic organization in the country; member and founder of the Catholic Union, and a member of several New York and Boston clubs. He is officer in several financial corporations, notably the International Trust Co. and the Union Institute for Savings, of Boston. Mr. Collins was married, July 1, 1873, to Mary E. Carey, of Boston. They have two daughters and one son.

THAYER, Eli, educator, congressman, and inventor, was born at Mendon, Worcester co., Mass., June 11, 1819, son of Cushman and Miranda (Pond) Thayer. He was descended, in the sixth generation, from Thomas Thayer, of Braintree, Mass. (1640), and from John Alden through his paternal grandmother, Ruth Alden. After studying at the Bellingham Academy, the Amherst Academy, and the Worcester County Manual Labor High School (now Worcester Academy), he entered

Brown University, Rhode Island, and was graduated in 1845, delivering the salutatorian oration. He became an assistant teacher in the Worcester Academy, then its principal, and in 1848 he founded Oread Institute, a woman's college at Worcester, subsequently acting as its treasurer. After serving on the Worcester county school board (1852) and on the board of aldermen (1853), he was elected to the Massachusetts legislature (1853-54), where he originated the Bank of Mutual Redemption and the Union Emigration Society.

He was elected a representative to the 35th U. S. congress (1857-59), and was re-elected, serving as a member of the committee on militia, and as chairman of the committee on public lands, until 1861. His activity in promoting New England emigration to Kansas placed that state on the Federal side in the conflict of the civil war. In the spring of 1854 he organized the Massachusetts Emigrant Aid Co., with a capital stock of \$5,000,000, and obtained a charter on April 26th. This was affiliated with the Emigrant Aid Co. of New York and Connecticut, and the two were reorganized by him a year later, under the name of The New England Emigrant Aid Co., the objects being to encourage the emigration of free state advocates into the territory of Kansas, and to invest capital for the development of that region. Besides Mr. Thayer, the largest subscribers to its stock were Charles F. Adams, Amos Lawrence, J. M. S. Williams, W. B. Spooner and William M. Everts, about two hundred clergymen being also interested to a greater or less degree. The cause was so widely advertised through the New York "Tribune" and other papers that many were impelled to emigrate merely because others were doing so; but the methods of the company were to establish local leagues, whose members would emigrate to Kansas in a body, on the company's special low-rate tickets, settling in localities where the company had erected hotels for their accommodation and saw-mills to supply building

material. This work of encouraging emigration was carried on energetically until 1861, when the admission of Kansas as a free state, the primary object, was secured; but the business connections were continued in an effort to pay dividends on the capital invested. This, however, proved impossible, owing to an injudicious selection of financial agents; and though, in March, 1862, the company's property was worth over \$140,000, yet it was sold at auction in the following February for about \$16,000, barely paying outside claims and making any refund to subscribers impossible. The towns of Lawrence, Topeka, Manhattan and Osawatimie were settled under the auspices of this company; and "without these settlements," said Gov. Charles Robinson, "Kansas would have been a slave state without a struggle." Charles Sumner said he would rather have the credit due Eli Thayer for his Kansas work than be the hero of the battle of New Orleans. Mr. Thayer also founded the town of Ceredo in Virginia, a large number of Northern emigrants settling at that place; but the war broke out before he had time to prosecute his efforts far in this direction. During his second term in congress he was aggressive in favoring the admission of Oregon as a state; and in 1860 its citizens elected him their representative to the National Republican convention at Chicago, where he labored energetically for the nomination of Lincoln. But his policy in the support of Oregon was in opposition to the general views of the Republican party, and thus prevented his second re-election as a congressional representative from Massachusetts. During 1861-62 he was a U. S. treasury agent, and from 1864 until 1870 was connected with the Hannibal & St. Jo Railroad Co. as its land agent in New York city. He was also an expert in matters of invention, his services as a referee being highly valued; and his own inventions covered a wide field, among them being a sectional safety steam boiler, an automatic boiler cleaner for extracting the sediment (1860), and an hydraulic elevator (1879), used both in this country and Europe. He was a man of strong convictions, with unbounded faith in whatever he undertook; and as a scholar his abilities and attainments were high, his familiarity with English and classical literature being comprehensive and critical. A prominent member of the Baptist church, he possessed great benevolence of heart and believed in practical charity. He was the author of a volume of congressional speeches (1860); several lectures (1886); "The Kansas Crusade" (1889), and, besides being a member of the Worcester Society of Antiquity, was an honorary member of the Kansas State Historical Society. Mr. Thayer was married at Blackstone, Mass., Aug. 6, 1845, to Caroline M., daughter of Collins and Caroline (Silsby) Capron, and had two sons and five daughters, all of whom survived him. His death occurred in Worcester, Mass., after a brief illness, April 15, 1899.

EDWARDS, George Wharton, artist and author, was born at Fairhaven, Conn., in March, 1859, son of William A. and Margaret M. Edwards. He was educated in the public schools of his native town and early showed a decided talent for drawing. Removing to New York city, for a time he made decorative designing his specialty—a valuable preparation for illustrating, to which he soon turned his attention. In 1882 he studied in Antwerp, Belgium, and during the following year in Paris. He exhibited "Le Retour de la Pêche" at the Paris Salon of 1883 and "Etudes des Bateaux" in the Salon of 1884. During that sojourn in Europe he traveled through Belgium, Holland, England, France and Spain, the journey inspiring many clever illustrations and short stories. He has since spent three years in Holland and several summers in the less

frequented parts of France. He is perhaps best known by his paintings and illustrations of white capped Dutch girls, but he portrays the Brittany peasant, Uncle Remus, or the familiar figure of the "old settler" quite as skillfully. The subjects selected by him are generally simple in character, though often daring in treatment and composition. He has illustrated "The Last Leaf" (Holmes); "The Sun Dial" (Dobson); "The Epithalamium" (Spenser); "Old English Ballads" and other similar books. Since 1898 he has been director of the art department of "Collier's Weekly." Among his important paintings are: "Early Moonrise," Society of American Artists (1891); "An Interesting Subject" and "In the Dunes," World's Columbian exposition (1893); "The Fog Bell, Maine Coast," Academy of Design (1897). For paintings exhibited at the Massachusetts exhibition in Boston he was awarded a silver medal in 1884, and a bronze medal in 1890. Mr. Edwards is a member of the Authors' Club; American Water Color Society; New York Water Color Club; Sculpture Society; Grolier Club; National Arts Society; Aldine Club; Ex Libris Society of London, and the Society Amsterdamsch, of Amsterdam. He is the author of "Thumb-nail Sketches" (1893); "Pit Matinée Monotones" (1891); "The Rivalries of Long and Short Codiac" (1895); "Break of Day and Other Stories" (1896); "Talk No. 27" (1899), and "The Dollar Mark" (1901). He was married, in March, 1886, to Annie Johns, daughter of Gen. John C. Cox, of Quincy, Ill.

KIEFER, Hermann, physician, was born at Sulzburg, Baden, Germany, Nov. 19, 1825, only son of Conrad and Friederike (Schweyckert) Kiefer. His father was a physician; his mother was a daughter of the director of the Botanical Gardens, at Karlsruhe, Baden. His early education was obtained in the lycæums of Freiburg, Mannheim and Karlsruhe, and he then studied medicine in the universities of Freiburg, Heidelberg, Prague and Vienna. He received his license to practice May 13, 1849, and took part as a regimental surgeon in the revolution in Germany in that year, being present at the battles of Phillipsburg (June 20) and Upstadt (June 23). When the revolution was suppressed Dr. Kiefer fled to Strasburg, and thence to America, arriving in New York city Sept. 19, 1849. Removing to Detroit, Mich., the following month, he began the practice of medicine and soon took a prominent position. In 1860 he became city physician of Detroit. He has always taken a deep interest in educational matters, and was one of the founders, in 1861, of the German-American Seminary in Detroit, being first its treasurer and then its president in 1861-72. He was a member of the Detroit board of education in 1866-67, and of the Detroit public library commission, 1882-83. In March, 1889, he was elected a regent of the University of Michigan, and he still holds this position (1930), being chairman of the medical committee of the university. Dr. Kiefer joined the Republican party upon its organization in 1854, and was chairman in that year of the German Republican executive committee of Michigan. He was one of the presidential electors of Michigan in 1872; was a delegate in 1876 to the Republican national convention in Cincinnati, and was influential in inducing the Michigan delegation to give united support to Gen. Rutherford B. Hayes. He was a Republican speaker among the Germans of Michigan in every presidential campaign from 1851 to 1880. In July, 1883, he was appointed U. S. consul to Stettin, Germany, and held this position until Jan. 21, 1885. Dr. Kiefer made several valuable consular reports to the U. S. state department, including papers upon the beet sugar industry; the "Extension of European Trade in the Orient"; "American Trade

with Stettin"; "How Germany is Governed," and "Labor in Europe." He has contributed many articles to medical publications. He was a director of the Michigan Mutual Life Insurance Co. from 1883 to 1892, and vice president of the Wayne County Savings Bank, Detroit, in 1871-83. He is a member of the Michigan State Medical Society; American Medical Association; American Academy of Medicine; American Academy of Political and Social Science, and the American Historical Association. Dr. Kiefer was married in Detroit, July 21, 1850, to Francisca Kehle, daughter of Johannes and Catharina Kehle, of Bonndorf, Baden, Germany. They have five sons and one daughter.

SCOTT, Emily Maria (Spafard), artist, was born at Springwater, Livingston co., N. Y., Aug. 27, 1832, daughter of Thomas L. and Elvira (Baldwin) Spafard. Her father (1797-1888), a veteran of the Mexican war, was a lumber merchant. The daughter was educated in the public schools of Springwater, and at Ann Arbor, Mich., where she studied for two years. In 1871 she went to New York city to study at the National Academy of Design, and later entered the Art Students' League. In 1872 she went to Europe, spending two years in study in Paris, and in the cities of Italy and other countries. Since 1876 she has made her home in New York city, although she has made a number of trips to Europe since her first visit. Some of her most important works are. A large still life picture, exhibited in the Salon of Paris (1889); "Yellow Roses," which won a medal at Atlanta, Ga., and "Pink Roses," with which she won a medal at the Chicago exhibition (1893). Four of her paintings were sent to the Pan American exhibition, Buffalo, N. Y., 1901, by special request. Roses have been Mrs. Scott's favorite study, and she paints them with a tenderness and sentiment rarely seen in flower pictures, throwing on the canvas a lifelike reproduction that is difficult of description. She is a woman of broad development, beloved by a wide circle of friends; her opinions on art and on topics other than those connected with her profession

are original and stimulating, and for this reason she is often called upon to read papers before women's clubs throughout the country. Her studio in New York (filled with trophies from many countries) has become the rendezvous of literary men and women as well as artists. She was married at Ann Arbor, Mich., March 1, 1853, to Charles Scott, an attorney of Lyons, Ia., who died May 2, 1863. Mrs. Scott spends her summers at her beautiful country home at Quaker Hill, Dutchess co., N. Y.

BLEDSE, Jesse, senator, was born in Culpeper county, Va., April 6, 1776. In spite of delicate health and weakness of three eyes, he succeeded, by the most persevering industry, in acquiring a good education, and in time became one of the most eminent lawyers of the West. Having emigrated to Kentucky, he was elected repeatedly to the state legislature, and in 1808 was secretary of state under Gov. Charles Scott. In 1812 he was a member of the state legislature, and in the following year was elected to the U. S. senate, serving until 1815. He served as state senator from 1817 to 1820 and in 1822 was appointed circuit judge in the Lexington district, making his home in Lexington, where he was elected professor of law in the Transylvania University the same year. He retired to the practice

of his profession and in 1833 removed to Mississippi, two years later going to Texas, where he was engaged in collecting historical material at the time of his death. This occurred near Nacogdoches, June 20 or 30, 1837.

VOCKE, William, lawyer, was born in Minden, Westphalia, Germany, April 4, 1839, son of Wilhelm and Charlotte Vocke. He was apprenticed to an uncle in the mercantile trade for three years, during which he studied Latin and French. In 1858 he came to America, and made his way to Chicago, where he found employment in various minor positions. When the civil war broke out he enlisted as a private, and was present in every engagement of the army of the Cumberland, ranking as captain at the end of the war. Returning to Chicago, he became city editor of the "Staats Zeitung," and finally an editorial writer. He was admitted to the bar in 1867, and in 1870 was elected to the state legislature. At the extra session held shortly after the great fire of 1871 Mr. Vocke was instrumental in framing what is known as the "burnt record act." Among other measures, he also framed a life insurance bill, which was endorsed by the Chicago "Tribune" as "the soundest and most judicious measure ever proposed to a legislative body on that subject."

In 1873 Mr. Vocke formed a law partnership with Gen. Joseph B. Leake, which continued until the latter was appointed U. S. district attorney in 1879. In 1877-80 Mr. Vocke was a member of the Chicago board of education. For a number of years past he has been attorney for the imperial German consulate at Chicago, and has also held the presidency of the German Society for the Aid of Emigrants. As a lawyer, Mr. Vocke has risen to eminence. His clientele has always been extensive, and the legal interests intrusted to his care have been important. In 1868 he published a translation of the lyrics of Julius Rodenberg. He has also written a number of tracts on social, political and international topics, and is the author of "Handbuch der

Rechtspflege in den Vereinigten Staaten von Amerika," written in German, and published at Cologne in 1890. Mr. Vocke was married, in 1867, to Eliza, daughter of Leopold Wahl. They have six children.

JACKSON, Charles Loring, chemist and educator, was born in Boston, Mass., April 4, 1847, son of Patrick Tracy and Susan Mary (Loring) Jackson. His father's father, of the same name, was one of the principal founders of the town of Lowell, Mass., and his mother was the daughter of C. G. Loring, an eminent lawyer of Boston. He attended Sullivan's and Dixwell's private schools in his native city and was graduated at Harvard University in 1867. Immediately after he was appointed lecture assistant in chemistry, and in 1871 he became assistant professor. He went abroad in 1873, and studied chemistry for two years at Heidelberg under Bunsen and at Berlin under Hofmann; resumed his duties at Harvard in 1875, and was made full professor in 1881, and in 1894 Erving professor. Since 1874 Prof. Jackson has published annually one or more papers, chiefly on organic chemistry, in the "Proceedings" of the American Academy of Sciences and in "Reisen's American Chemical Journal." He has revealed the leading scientists of his time in the large number of minor discoveries, though impor-

tant, which he has made in chemistry. He is the author of a series of papers on "Substituted Benzyl Compounds," including a synthesis of "Anthracene" (18); a series of papers on the "Substances Contained in Turmeric" (18); a series on "The Action of Reagents on Nitrobenzols Containing Halogens" (18); a series on the "Colored Compounds Formed by Sodie Alcohols and Nitrobenzols" (18); as well as papers on the "Derivatives of Orthoquinone" (18); "Sodie Zincate" (18); "Benzol-tri-sulphuric Acid" (18); "Quinone," including the discovery of hemicetals, and various other subjects pertaining to his profession. Prof. Jackson is a member of the American Academy of Arts and Sciences, the National Academy of Science and an honorary member of the British Association for the Advancement of Science.

KELLY, Robert Morrow, lawyer and journalist, was born at Paris, Bourbon co., Ky., Sept. 22, 1836, the son of Thomas Owings and Cordelia (Morrow) Kelly. His grandfather, William Kelly, was an Irishman who came to the United States just after the revolutionary war, and after a short residence in Philadelphia and Baltimore settled at Paris, Ky., where he engaged in mercantile pursuits and banking. Mr. Kelly was educated in private schools and prepared to enter Yale, but did not do so. He spent two years in the employ of railroad surveying parties and taught school for several years. Meanwhile he studied law, being admitted to the bar in 1860. He took charge of the law office of his uncle, Hon. Garrett Davis, at Cynthiana, Ky., but the civil war was imminent, and he devoted that fall and spring to drilling and military matters. In the civil war he took part in the Mill Springs campaign and the other operations of the army of the Ohio and of the Cumberland. He was in the battle of Missionary ridge, the battles of Franklin and Nashville and in Wilson's cavalry raid through Alabama and Georgia. He was successively promoted major, lieutenant-colonel and colonel, commanding his regiment during and after the battle of Chickamauga. Returning to Paris, Ky., in 1865, he resumed the practice of law. The next year he was nominated by the Union men for county attorney, but before the election was appointed internal revenue collector for the 7th district of Kentucky, with headquarters at Lexington. He resigned that position early in 1870, to take charge as editor of the Louisville "Daily Commercial," just established, which position he held, except for a brief interval, until 1897. Col. Kelly was appointed pension agent in Kentucky in 1873, and held the place until he resigned in the spring of 1886. In anticipation of the coming of the national encampment of the Grand Army of the Republic to Louisville in 1895, he was elected commander of the department of Kentucky. After 1897 he was for a time editor of the Louisville (Ky.) "Critic," but is now editor-in-chief of the "Commercial." On June 27, 1867, he was married to Harriett Holley, daughter of E. N. Warfield, of Lexington, Ky.

NORVELL, John, senator, was born in Philadelphia, Pa., in 1790. He was a printer by trade, and for a time was the editor of a newspaper in Philadelphia, but afterward removed to Michigan, and became identified with the early history of that state. He was appointed by Pres. Jackson postmaster of Detroit in 1828, holding the office for two years; was subsequently U. S. district attorney, and on the admission of Michigan into the Union was elected, as a Democrat, one of the senators in congress from the new state, serving in that capacity from 1835 to 1841. He died of apoplexy, April 11, 1850. It is worthy of notice that he left seven sons, six of whom served in the Federal army during the civil war.

WINTERS, William Huffman, librarian, was born at Dayton, O., Feb. 16, 1848, son of David and Mary A. Winters. He was educated in the public schools, and at the central high school of that city, and was graduated at Miami University, Oxford, O., in 1863, with Calvin S. Brice and others who became eminent. In 1868 he received the degree of LL.B. from Harvard University, after a course in the Law School, and in the fall of that year entered the office of Hon. William M. Everts in New York city. He became librarian of the New York Law Institute in 1872, and still holds the position. He is the author of "History of the American States Legislation"; "Bibliography of Trusts, Combinations"; "Laws of Burial"; "Law Literature Relating to Theatres, Clubs, etc.," and the "History of the New York Law Institute" in the "Bench and Bar of New York" (1897), besides contributions to the Albany "Law Journal," "American Law Review," "Corporation Law Journal," and other periodicals. The New York Law Institute library, which was organized in 1828 by Chancellor James Kent, numbers over 51,000 volumes, and now ranks as the very first of its kind. It is located on the fourth and fifth floors of the post-office building. Its collections are practically complete in American and foreign reports, law periodicals, digests, trials and treatises, codes and statutes, and among its unique treasures, secured through gifts by Mr. Winters, are the cases and opinions of Charles O'Connor; Alexander Hamilton's "Law Record" 1795-1804; Washington's copy of the "Code de Louis XIII.," the old book of "Precedents," from which the prelude and profession of faith in Shakespeare's will was taken; the David Dudley Field copies of rare Codes and International Law societies' publications, and the Bradford edition of New Jersey laws, published in 1709. The presidents of the New York Law Institute have been: James Kent, John Anthon, James T. Brady, Charles O'Connor, Charles Tracy, Stephen P. Nash, Joseph H. Choate, Wheeler H. Peckham and Edward Patterson.

APPLETON, James, father of prohibition, was born at Ipswich, Mass., Feb. 14, 1786. His earliest American ancestor was Samuel Appleton, an Englishman, who settled at Ipswich in 1635, and who is the progenitor of all of that name in New England. At an early age he showed unusual talent for oratory, which was the means of his election to the legislature of Massachusetts. He was a colonel of the militia of his native state, and was made brigadier-general upon the close of the war of 1812. He removed from Marblehead to Portland, in 1823, where his public services procured for him an election to the legislature of Maine in 1836. He was several times a candidate for governor in the old Liberty party. Becoming interested in the subject of prohibition, he made speeches throughout the state, and contributed articles to the publications of the day upon total abstinence and the suppression of the liquor traffic. He was the first to advance the principle of statutory prohibition of the manufacture and sale of liquors, first by petition to the legislature of Massachusetts in 1831, and afterwards, in 1837, by a report to the Maine legislature, of which he was then a member. His report made a profound impression throughout the state, and culminated in the enactment

of the Maine liquor law. He returned to his native town, and died there Aug. 25, 1862.

APPLETON, Daniel Fuller, merchant, was born in Marblehead, Mass., Jan. 31, 1826, son of Gen. James and Sarah (Fuller) Appleton. His first American ancestor was Samuel Appleton, the ancestor of all of the name in New England. He was educated in the public schools of Portland, and was trained in the watch-making business by a brother. At the age of twenty one he went to New York city, where he entered the employ of Royal E. Robbins, an importer of watches, and after a few years a partnership was formed under the name of Robbins & Appleton. In 1857 the firm became the owners of the then new and small watch works at Waltham, Mass., and soon after organized and established the American Waltham Watch Co., which business they have conducted continuously ever since. The manufactory covers several acres on the Charles river, Waltham; employs 2,500 hands, and during the year 1900 manufactured 2,300 watches every business day. To the advancement and success of this business Mr. Appleton has given his constant attention, having continued in active business with Mr. Robbins and his younger brother, Henry A. Robbins, for fifty three years. It is to be noted that Mr. Appleton was content to begin and continue in the business of a watchmaker, and that he sought to develop it until his firm and the company which they managed became one of the greatest watchmakers in the world. Mr. Appleton, though he never sought office, has been at times active in the councils of the Republican party, to which he came by evolution from the old Liberty party. He was a member of the first national convention of that party, held in Philadelphia in 1858, when Gen. Fremont was nominated for the presidency, and has ever since given his active and earnest support to the party. He has been vice-president of the Union League Club, a member of the Century, Metropolitan, Grolier and other club organizations, and served as president of the New England Society of the city of New York in 1878-79. Mr. Appleton was twice married; first, in 1853, to Julia, daughter of Hon. Nicholas P. Randall, of Manlius, N. Y., and second, in 1889, to Susan, daughter of Rev. John P. Cowles, of Ipswich, Mass. He has three sons and two daughters; Francis Randall, Randolph Morgan and James Wadlingfield Appleton; Mrs. Gerald Livingston Hoyt, of New York city, and Mrs. Charles S. Tuckerman of Boston.

CALHOUN, William Barron, lawyer and congressman, was born in Boston, Mass., Dec. 29, 1796. He was graduated at Yale College in 1814, and chose the legal profession, in which his talents and worth soon won for him an enviable position. He was a member of the state legislature from 1825 to 1835, and was speaker for the last two years. In 1835-43 he was a representative in congress from his native state; was president of the state senate in 1846, secretary of state in 1848, bank commissioner in 1853; presidential elector in 1844, and mayor of Springfield in 1859. In 1871 he again served in the state legislature. For many years he was an occasional editorial writer for the Springfield "Republican," and a frequent contributor to its columns. In 1858 Amherst gave him the degree of LL.D. He died at Springfield, Mass., Nov. 8, 1865.

BAHNSON, George Frederic, Moravian bishop, was born at Christiansfeld, Schleswig, Denmark, Sept. 16, 1805, and was educated at Nisky and Gradenfeld. He was sent to Pennsylvania in 1829, and taught at Nazareth Hall until 1834. He was pastor at Lancaster, Pa., Salem, N. C., and elsewhere, and in 1860 was made a bishop, with charge of the southern district. He died at Salem, N. C., Sept. 11, 1869.

ELLIS, Ezekiel John, congressman, was born at Covington, La., Oct. 15, 1840, son of Ezekiel Parker and Tabitha Emily (Warner) Ellis. His father, who was a distinguished lawyer and judge, was a descendant of an old Virginia family, though a native of Georgia and long a resident of Louisiana. The mother of our subject was a descendant of several prominent colonial and revolutionary families, her father, Thomas C. Warner, being colonel of militia under Gen. Jackson at New Orleans, and for many years a probate judge in South Carolina. Ezekiel was educated in the public schools, at an academy in Clinton, La., and at Centenary College, Jackson, La. He studied law in his father's office and at the University of Louisiana (now Tulane), receiving the degree of B.L. in 1861. Becoming a lieutenant in the 16th Louisiana infantry, he served in the battle of Shiloh, was promoted captain, later took part in the battles of Perryville, Murfreesboro, Chickamauga and Missionary ridge; was captured in the last named engagement; he was held and remained a prisoner until the close of the war. On his return home he began law practice with his father; later formed a partnership with his brother, T. C. W. Ellis, and in 1869 removed to New Orleans. In 1868 he was an alternate elector on the ticket headed by Seymour and Blair. In November, 1874, he was elected to the 44th congress, serving, by re-election, until March, 1885, when he resigned, taking up the practice of his profession in Washington, D. C. He was chairman on the committee of the Mississippi levees, and was a member of those on appropriations, Indian affairs, elections and privileges. He made notable speeches on the levee system, Indian affairs, the negro question, the national quarantine and health bill, and on various subjects relating to fortifications, torpedoes and heavy ordnance. In 1880 he was chairman of the committee conducting the nomination of Gen. W. S. Hancock, and in the succeeding campaign addressed many audiences in northern and western cities. Although an active Democrat, he was in no sense a partisan. On June 29, 1869, he was married to Josephine, daughter of Henry Chamberlain, of Natchez, Miss., and a great-granddaughter of Thomas McKean, of Delaware, one of the signers of the Declaration of Independence. They had one daughter, Lillian, wife of John L. Emerson, of Titusville, Pa., and two sons, Thomas Stephen and Harry Eugene, both lawyers of New Orleans, the former a captain of infantry in the war with Spain. Mr. Ellis died in Washington, D. C., April 25, 1889.

WOLLENWEBER, Ludwig August, journalist and author, was born at Ixheim, near Zweibrücken, Rheinpfalz, Germany, Dec. 5, 1807. Bereft of his parents at a very early age, he was compelled to give up his hopes of obtaining an education, and became a printer. Upon the completion of his term of apprenticeship he traveled through Germany as a journeyman worker, and in 1832 arrived at Wirth in Hamburg, where he obtained employment on the "Deutsche Tribune." This journal, however, was soon suppressed by the German Diet, and Wollenweber, having become implicated

in the radical anti-government movement, left Germany in order to escape persecution, and went first to France, then to Rotterdam, Holland, whence he sailed for the United States. He landed in Philadelphia, but being unable to secure employment here began traveling through the state of Pennsylvania on foot. After many adventures he returned to Philadelphia and obtained work on Wesselhöft's journal "Die Schnellpost." Soon he established a journal of his own, "Der Freimüthige." This was after a short time discontinued, and Wollenweber acquired the Philadelphia "Demokrat," which was founded in 1838, as a weekly. Later it appeared twice a week, and at last became a daily journal. In 1853 he sold the Philadelphia "Demokrat" to his brother-in-law, Hoffmann, and engaged in various branches of business, but soon retired, and settled at Lebanon, Pa. From Lebanon he removed to Reading, Pa., where he spent the rest of his life, engaged in literary occupations. Wollenweber was one of the first to write in the so-called Pennsylvania Dutch—a German dialect. His works occupy themselves chiefly with the life, customs and manners of the early German colonists. The more important of them are: "Gila, das Indianermädchen oder die wiedergefundenen deutschen Kinder unter den Indianern," and "Freuden und Leiden in Amerika, oder die Lateiner am Schuylkill Canal," both plays; "Gemälde aus dem Pennsylvanischen Volksleben"; "General Peter Mühlengrün," a tale of the revolutionary war; "Sprache, Sitten und Gebräuche der Deutsch-Pennsylvanier"; "Aus Berks County schwerster Zeit," a tale of the pioneers of Berks county; "Die drei gräber auf dem Riethen Kirchhof"; "Die erste Mühle am Mühlbach," etc. Ludwig August Wollenweber died in Reading, Pa., in 1888.

JACOBS, Michael, clergyman and educator, was born near Waynesboro, Franklin co., Pa., Jan. 18, 1808, son of Henry and Anna Maria (Miller) Jacobs. His grandfather, Martin Jacob (spelled without the "s"), emigrated from Preussdorf, Alsace, in 1753, settling first in Frederick county, Md., but in 1761 removing to Washington county, near Jacob's church, so named from his gift of a tract of land for a church and school. His mother was a daughter of Henry Miller, of Washington township, Franklin co., Pa. (b. 1735; d. 1817), and of Elizabeth Heilman, of Heilmansdale, Lebanon co., Pa. (b. 1742; d. 1817), daughter of John Adam Heilman (b. 1715; d. 1770). The latter, a native of Zuzenhausen, in the Palatinate, Germany, emigrated to America, settling at North Annville, Lebanon co., Pa., in 1738. Michael Jacobs was graduated at Jefferson College, Canonsburg, Pa., in 1828, and after teaching for a few months in an academy at Belair, Md., became, in April of the following year, instructor in mathematics and natural sciences in the Gettysburg Gymnasium. When the latter institution was incorporated as Pennsylvania College, in 1832, he became a full professor, continuing in that capacity for thirty-four years, and was then, in 1866, made professor emeritus. He also entered the Lutheran ministry in 1832, was president of the West Pennsylvania synod for several years, and in 1858 received the degree of D. D. from both Wittenberg College, Springfield O., and his alma mater. About 1845 he invented the process of canning fruit which is now in universal use. He was a member of the American Association for the Advancement of Science, his most important scientific work being in the department of meteorology, and left a number of "Lectures on Meteorology," containing the results of his personal observations. Besides contributing to the "United States Service Magazine" and the "Evangelical Review," he was the editor of the "Literary Record" and the

E. J. Ellis

author of "The Rebel Invasion of Maryland and Pennsylvania and the Battle of Gettysburg" (1863). He also contributed largely to the publications of the Franklin Institute of Philadelphia, Pa., and the Smithsonian Institution of Washington, D. C. He was married, May 3, 1833, to Julianna M., daughter of Jacob Eyster, of Harrisburg, Pa., and a general of the U. S. army. Their son, Rev. Henry Eyster Jacobs, D.D., is a well known educator and author. Dr. Jacobs died at Gettysburg, Pa., July 23, 1871.

JACOBS, Henry Eyster, clergyman, author and educator, was born at Gettysburg, Pa., Nov. 10, 1844, son of Michael and Julianna Matilda (Eyster) Jacobs. His maternal grandfather, Jacob Eyster, was a state senator, and a brigadier general of Pennsylvania militia, serving in the defense of Baltimore during the war of 1812, while his great-grandfather, George Eyster, was a revolutionary soldier, captured at Fort Mifflin, and one of the few survivors of the prison-ship Jersey. His maternal ancestor in the seventh generation emigrated from Wurtemberg in 1718. Henry E. Jacobs was graduated at Pennsylvania College, Gettysburg, Pa., in 1862, and continued his theological studies at the Lutheran Seminary; after which he taught in the former during 1864-67. He was licensed to preach in 1866; served as home missionary in Pittsburgh, Pa. (1867-68), and in the latter year was ordained to the ministry. During 1868-70 he was principal of Thiel Hall, Phillipsburgh (now Thiel College at Greenville) Pa., and pastor of the Lutheran church there. He then returned to Pennsylvania College, where he filled the chair of Latin (1870-80), of ancient languages (1880-81), and of the Greek language and literature (1881-83). Since 1883 he has been professor of systematic theology at the Lutheran Seminary, Mt. Airy, Philadelphia, where he was appointed dean of the faculty in 1893. He was the projector of the general conference of Lutherans which met in Philadelphia,

Dec. 27, 1898, presided at the opening session, and was secretary of the committee that prepared the "Common Order of Service," adopted by all English-speaking Lutherans. He was a member of the first Lutheran diet, English recording secretary of the general council of the Lutheran church (1879-81), its corresponding secretary (1889-99); was vice-president of the American Society of Church History (1894-96), and is now vice-president of the Pennsylvania Bible Society, and a member of the American

Historical Association and the Pennsylvania German Society. The degree of D.D. was conferred upon him in 1877, and that of LL.D. in 1891, by Thiel College. He is the author of "A Question of Latinity" (1878); "Companion to the Book of Concord" (1883); "The Lutheran Movement in England" (1890); "Oversight in the Lutheran Church" (1892); "The Female Diaconate" (1892); "History of the Lutheran Church in America" (1893); "Elements of Religion" (1894); "Commentary on Romans" (1896); "Commentary on I. Corinthians" (1897); "Life of Martin Luther" (1898), and "German Emigration to Pennsylvania, 1709-40" (1899). With Rev. G. F. Spieker, D.D., he translated "Hutter's Compend of Lutheran Theology" (1868), and with Rev. C. A. Hay, D.D., "Schmid's Doctrinal Theology of the Lutheran Church" (1875); translated and edited the "Book of Concord; or, Symbolical Standards of the Lutheran Church"

(1882); edited the American edition of Meyer's commentaries on Galatians and Ephesians (1885); translated and edited Duesterdieck's "Commentary on the Revelation of St. John" (1887); edited "Taveler's Augsburg Confession" (1888), and a "Lutheran Cyclopaedia" (1899). He has contributed to theological periodicals and cyclopaedias of religious knowledge; was associate editor of "Johnson's Cyclopaedia," editor of the "Lutheran Commentary," and of the "Lutheran Church Review." He delivered lectures in course at the Union Theological Seminary, New York, during 1895, on "Christian Worship," which were published the year following. Dr. Jacobs was married, July 3, 1872, to Laura Hewes, daughter of George F. Downing, of Baltimore, Md., and a descendant in the fifth generation of Thomas Downing, after whom Downingtown, Pa., was named. They have two sons and two daughters.

QUITMAN, Frederick Henry, clergyman, was born in Westphalia, Aug. 7, 1760, on an island in the Rhine, afterwards destroyed by a flood. He was educated at the University of Halle, was tutor for a time to the young princes of Waldeck, received Lutheran orders at Amsterdam in 1781, and became pastor at Curaçoa in the Caribbean sea. Driven thence by a revolution in 1795, he took ship for New York, intending to return to Holland, but was persuaded to stay in the United States by reason of the death of Lutheran ministers. After two years at Scholastic, N. Y., he took charge of St. Peter's, on the old Albany post-road, between Rhinebeck and Red Hook, the mother church of that region. Here he remained through life, for many years ministering also to congregations in the adjoining villages and outlying country. A man of commanding character and presence, of fine powers and strong will, he was the master spirit of his denomination in the state. He was long president of the New York synod, chief compiler of its hymn book in 1811, and president of the trustees of Hartwick Seminary from its incorporation in 1816. He received the degree of D.D. from Harvard in 1814. Dr. Quitman published a "Treatise on Magic," (1810); a "Catechism" (1814), and "Sermons on the Reformation" (1817). He held the rationalistic views prevalent in Germany in his earlier days; when other doctrines came in, he was frankly in collision with them. At a certain ordination, after the candidate (as was then the custom) had preached the sermon, the president of the synod arose and prayed thus: "O Lord, we thank Thee that Thou art no such being as this young man has just been telling us." He was disabled in 1828, and died near Rhinebeck, N. Y., June 26, 1832. John Anthony Quitman, governor of Mississippi, was his son.

MCCRADY, John, soldier and educator, was born in Charleston, S. C., Oct. 15, 1831, eldest son of Edward and Louisa Rebecca (Lane) McCrady. He was graduated at Charleston College in 1850, and began the study of law under his father, but was diverted to the study of zoology by Dr. Edmund Ravenel. Afterward he studied under Agassiz, with whom he spent three summers on the coast of New England, and when he returned, in 1854, he was one of the few American naturalists who had been thoroughly trained by that scientist. In 1856 he became assistant professor of mathematics in Charleston College, but continued his scientific researches. He was an enthusiastic supporter of the Elliott Society; on its establishment being one of its curators. In the civil war he volunteered as an engineer and built the battery at Cumming's point, Morris island, and was in charge of the fortifications around Savannah. After the war he was re-elected professor of mathematics in Charleston College and filled that chair until 1873, when he was appointed

Henry E. Jacobs

assistant of Prof. Agassiz, at Harvard, and succeeded to the chair of zoology upon his death. In 1877 he became professor of biology and the relation of science and religion in the University of the South, Sewanee, Tenn., and the remainder of his life was spent at that institution. Here he applied himself to the perfecting of what he considered his life's task and the crown of his labors, the demonstration of the perfect harmony between the results of science and of revealed religion. During the winter of 1879-80 he delivered a series of lectures at Johns Hopkins University. In these he outlined his philosophical system, and one who heard him declared: "His genius came nearer to inspiration than anything I had ever heard before or read." He was held in the highest honor by his fellow professors in the various institutions he served, and was regarded with deep affection by his pupils. Prof. McCrady was married, Sept. 1, 1859, to Sarah, daughter of Paul Dismukes, of Tennessee, and had one son, Rev. Edward McCrady, rector of Trinity Church, Abbeville, S. C., and four daughters. He died in Nashville, Tenn., Oct. 16, 1881.

MCCRADY, Edward, lawyer, soldier and author, was born in Charleston, S. C., April 8, 1833, second son of Edward and Louisa Rebecca (Lane) McCrady. He was graduated at the College of Charleston in 1853, studied law in his father's office,

was admitted to the bar in 1855, and meanwhile had taken up the study of military science. In 1854 he was elected major of a battalion of rifles, and in the following year contributed to the press articles on the necessity of reforming the militia system of the state, which led (1859) to his appointment by the legislature on a commission upon that system. In the civil war he joined the 1st regiment, South Carolina volunteers, under Gen. Maxey Gregg; on Dec. 14th was promoted major, and on June 27, 1862, was commissioned lieutenant-colonel. He commanded his regiment at Cedar run, at second Manassas, where he was seriously

wounded, and at Fredericksburg. On Jan. 27, 1863, while in camp, he was permanently injured by a falling tree, and was placed in command of a camp of instruction at Madison, Fla. He practiced law in Charleston with his father from October, 1865, until the latter's death, in 1892, when the present firm of McCrady & Bacot was formed, the other parties being Col. McCrady's brother, Louis de B., and his brother-in-law, Thomas W. Bacot. In 1880-90 he served in the state legislature; was influential in the passage of the law prohibiting duelling; was the author of the famous eight box law, requiring an educational test of voters, the first attempt at ballot reform in the South, and the first application in this country of the principle of the Australian ballot system; he also introduced and secured the passage of a resolution indorsing civil service reform. He was chairman of the committee on privileges, elections; those on railroads and judiciary. Appointed in 1882 major-general of the state forces, he had much to do with bringing the militia of the coast region to a high state of efficiency. Gen. McCrady is a voluminous writer on legal, political and historical matters, his most important work being a "History of South Carolina," which corrected the errors of former authorities. He is president of the South Carolina Historical Society; a member of the Society of the Sons of the Revolution, of Camp Sumter of the United Con-

federate Veterans, and trustee of the Medical College of Charleston. He was married, in 1863, to Mary Fraser, daughter of Maj. Allen J. Davie, of North Carolina, and granddaughter of Gen. William R. Davie.

HARPER, William, jurist, was born on the island of Antigua, Jan. 17, 1790. He was the son of a missionary, who was sent out by the English Wesleyan Methodist Society to the island of Antigua, and who afterwards settled with his family in the United States. William attended school in Baltimore, Md., and in 1805 was taken by his father to Columbia, S. C. He was graduated at South Carolina College in 1808, pursued his legal studies, and was admitted to the bar in 1814, and practiced as a lawyer in Columbia, until 1818. In 1818 he was appointed a member of the board of trustees of South Carolina College. In 1818 Mr. Harper removed to Missouri territory, where he was appointed chancellor in 1819, and was a member of the state constitutional convention in 1821. In 1823 he returned to Columbia. He was supreme court reporter of the state during 1823-25, and filled a vacancy in the U. S. senate from March 28th to Dec. 7, 1826, which was caused by the death of John Gaillard. During the years 1827-28 he practiced law in Charleston, S. C., and was a representative in the state legislature and speaker of that body in 1828. He served as chancellor of the state of South Carolina from 1828 to 1830, and again from 1835 to 1847; was judge of the court of appeals, 1830-35; was a member of the convention which framed the nullification ordinance in 1832, and a member of that which met to rescind the same in 1833. His publications consist of an article on colonization in the "Southern Review"; a speech in congress on the "Panama Mission"; a "Eulogy on Chancellor de Saussure," and several speeches on the doctrine of nullification, of which he was an ardent and enthusiastic advocate. He died in Columbia, S. C., Oct. 10, 1847.

MITCHELL, William, astronomer, was born at Nantucket, Mass., Dec. 20, 1791. His parents were members of the Society of Friends. He was preparing for Harvard College when the war of 1812 broke out, and his plans being thereby disarranged, turned to teaching, which he followed for several years. His leisure hours were given to astronomical observations, with a rude telescope made by a clock-maker. Later he obtained the position of cashier of the Nantucket Pacific Bank, and was thus enabled to procure adequate instruments. He made systematic determinations in connection with the U. S. coast survey, and was for some years also overseer of Harvard University, serving as chairman of a committee appointed to visit the observatory of Cambridge. He received the degree of A. M. from Brown (1848) and Harvard (1860) universities; was a member of several scientific societies, and published a number of astronomical essays in the "American Journal of Science" and other periodicals. His daughter, Maria (1818-89), aided him in many of his observations, became eminent as an astronomer, and was a professor at Vassar College for many years. William Mitchell died at Poughkeepsie, N. Y., April 19, 1868.

HAY, George, jurist, was distinguished both as a lawyer and as a politician. He was a prominent member of the Virginia legislature, and was for many years U. S. district-attorney, in which capacity he prosecuted Aaron Burr. Later he became judge of the U. S. court for the eastern district of Virginia. He was married to Eliza, daughter of Pres. Monroe. A number of exceedingly clever political articles were published by him under the pen-name, "Hortensius," and he was the author of a "Treatise on Expatiation" (1814); a "Treatise Against the Usury Laws," and "The Life of John Thompson." He died in Richmond, Va., Sept. 21, 1830.

CLAIBORNE, William, colonist, was born in Westmoreland, England, about 1587, second son of Sir Edmond Claiborne, of Claiborne Hall, and Grace, daughter of Sir Alan Billingham, his wife. After receiving a liberal education, he was sent by the London Company to the plantations of Virginia in the capacity of surveyor. He is said to have crossed the ocean in the ship *George* in company with Sir Francis Wyatt, and to have reached Jamestown in October, 1621. He devoted himself with zeal to the duties of his office, and in two years' time collected materials for the first reliable map of the dominion. He became a landholder under the system which obtained at that time, and to the extent of nearly fifty thousand acres; and was able to engage in trade and to make voyages of discovery in the interests of the company. In 1625 he received the appointment of secretary of state for the colony from King Charles I., the charter of the Virginia Company in London having been pronounced null and void. Three years later he was instructed by the home authorities to extend the colonial possessions by exploration of the waters of Chesapeake bay and by trade with the Indians, and this commission was confirmed by a patent from King Charles I., dated as late as 1631. In pursuance of these instructions and authorizations, Claiborne discovered Palmer's Island, near the mouth of the Susquehanna, and Kent Island, at the mouth of the Chester river, and he established trading posts at both places. At the latter he planted a settlement of over 100 colonists, which he continued to hold as agent of a London house until 1637. During this period he was successful in gathering more settlers in his colony, and was eventually recognized as having a right to the territory, which he claimed as in opposition to the Calverts, who insisted that Claiborne's right was only a license to trade, and did not convey property in the soil. This issue was important, on account of the fact that it influenced the history of the colonies of Virginia and Maryland during a generation. In the beginning it was a conflict between the Roman Catholics settled in Maryland and the adherents of the Church of England settled in Virginia. Afterwards it became a quarrel between the Cavaliers and the Puritans; and not until Virginia, by her Bill of Rights of 1776, disclaimed all right to the territory of Maryland beyond the Potomac, was this question finally settled. By this conclusion also all the territory northwest of the Ohio river was conveyed to the United States. But, long before this agreement, the fight between the Calverts and Claiborne's people had grown to be an established fact of no little importance to the condition of the colonies. Claiborne appears to have met with great misfortune in his attempts to colonize the island of Kent. A fire there destroyed his warehouse of supplies, and it is stated that his colonists were reduced to the greatest extremities. At the same time it became necessary, as appears, for his partners in London to investigate his affairs; and this investigation forced Claiborne to return to London, where he was sued by his partners, the conclusion being that his property in Virginia and Maryland was seized as hostage for his alleged indebtedness. Eventually Claiborne admitted the authority of Lord Baltimore, as regarded his Maryland claims, and that of Leonard Calvert, in relation to the island of Kent—even conceding so much as to accept from Calvert the position of commander of that island. But Claiborne, having bought from the Indians Palmer's island, which he thought was outside of the grant to Lord Baltimore, he petitioned the king, accompanying the petition with an offer of an annual rent of £100 for other lands which he owned, and that Lord Baltimore be restrained from interfering with him. This application being referred to the proper officials, was refused, and with the result

that Gov. Calvert actually reduced the island of Kent by an expedition, which had the effect of a military attack. Claiborne, however, succeeded eventually in obtaining from the king the appointment of treasurer of the colony of Virginia for life; this being on April 6, 1643. When the monarchy declined, Claiborne became a partisan of the parliament. In 1643 the deputy governor of Maryland, Giles Brent, seized a ship commissioned by parliament, commanded by Richard Ingle, and imprudently tampered with the crew, and proclaimed Ingle a traitor. Capt. Ingle escaped to England, obtained a letter of marque, and as captain of the ship *Reformation* returned in 1643 to Maryland, and "did venture his life and fortune in landing his men and assisting the said well-affected Protestants against the said tyrannical government and the Papists and malignants. It pleased God to enable him to take divers places from them and to make him a support to the said well-affected." Finding "that all things were favorable for the recovery of his ancient possessions," Claiborne boldly seized upon Kent Island and drove Gov. Calvert out of Maryland. It is not recorded that he offered any violence to the trespassers upon his property. On June 3, 1650, he was appointed one of the council of Virginia, and on Jan. 29, 1651, received a patent for 50,000 acres of land for transporting 100 persons into the colony. On Sept. 26, 1651, he was appointed one of the commissioners for reducing Virginia and the inhabitants thereof to their due obedience to the commonwealth of England, and performed that duty with singular tact and moderation. The commissioner then went to Maryland, deposed Gov. Stone and overthrew the power of Lord Baltimore for the time being. In December, 1651, he received patents, which amounted to 44,000 acres of land. On April 20, 1652, he was unanimously appointed secretary of Virginia. On July 15, 1654, Claiborne again ap-

perred in Maryland in company with Richard Bennett, and by virtue of the former commission reduced that colony a second time. Commissioners under parliament retained control of Maryland until March 24, 1657, when the claim to Kent Island was finally surrendered to Lord Baltimore, after a heroic struggle of twenty-five years. Claiborne returned to Virginia, and at the restoration of Charles I., in his old age was again appointed secretary of state, and was one of the leading members of the Virginia legislature in 1653-66. He held a military command at the breaking out of the Bacon rebellion, and in January, 1676, was one of the court-martial on John Martin's ship. That was his last service and appearance in public life. He died soon after in New Kent county, Va. He was styled "the evil genius of Maryland" by an old writer, but his most persistent enemies found nothing to blemish his character or personal, knightly honor. He left three children, William, Thomas and Jane. His son, Thomas, was married to Ann Fox; and had a son, Nathaniel, who was married to Martha Cole, and had a son, Col. William Claiborne, who was married to Mary Leigh, daughter of Fernando Leigh, and sister of the celebrated Benjamin Watkins Leigh, of Virginia.

PATTERSON, James Kennedy, first president of the Agricultural and Mechanical College of Kentucky (1880-1901), was born in Glasgow, Scotland, March 26, 1833, son of Andrew and Janet (Kennedy) Patterson. In 1842 his parents emigrated to America and settled on a farm in Bartholomew county, Ind., where James lived until 1849, when he was sent to a school in Madison, Ind. After a year spent there, he taught for one year, keeping up his studies meanwhile, until in May, 1851, he entered Hanover College, Ind. There, during the whole course, he led his class in almost every subject. He was graduated in 1856, and in the fall became principal of the Presbyterian Academy at Greenville, Muhlenberg co., Ky. Three years later he was appointed principal of the preparatory department of Stewart College, of Clarksville, Tenn., and in the following year was elected professor of Latin and Greek in the same institution. When the civil war began, Stewart College suspended and did not reopen until the conflict ended. Prof. Patterson, however, became principal of the Transylvania High School in Lexington, Ky., in 1861, remaining as such until 1865, when the school was consolidated with the Kentucky University. In 1866 Prof. Patterson was called to the chair of history and metaphysics in the Agricultural and Mechanical College of the consolidated institution. In 1869 he was made its

president and still (1901) occupies this position. The connection of this college with the Kentucky University continued until 1878, when it was dissolved by the legislature, and two years later the Agricultural and Mechanical College was placed on an independent basis. After a long contest with the denominational institution, with which it had been previously incorporated, the persistent energy of the president brought the college victoriously through the struggle. It has since prospered and now has eight courses of study leading to a degree; there are sixteen professors and eight assistants in the faculty, while the property has increased in value more than \$500,000 since 1880. In 1875 Prof. Patterson was appointed by Gov. Leslie a delegate to represent Kentucky in the international congress of geographical sciences at Paris, France, and to the British Association for the Advancement of Science, which met at Bristol, England, in the same year. In 1890 a leave of absence was given him for one year, and he visited Belgium, France, Italy, Austria, Germany and Switzerland, and also took part as a delegate in the meeting of the British Association at Leeds. In 1859 he received the degree of A.M.; in 1875 that of Ph.D. from Hanover College; in 1880 was elected fellow of the Royal Historical Society of Great Britain and fellow of the Society of Antiquaries of Edinburgh, Scotland, and in 1896 the degree of LL.D. was conferred upon him by Lafayette College, Pennsylvania.

He is the author of a report of the proceedings of the geographical congress and of numerous articles on foreign affairs. Dr. Patterson was married, in 1859, to Lucelia, youngest daughter of Capt. Charles F. Irving, of Greenville, Ky.

ALEXANDER, Stephen, astronomer, was born at Schenectady, N. Y., Sept. 1, 1806, son of Alexander Stephenson and Maria (O'Connor) Alexander. His father was a native of Scotland, and died in 1809. His mother was born in New York state, and her father took part in the battle of Saratoga in the war of the revolution. He was educated at Union College, and after graduating in 1824 he taught in the Albany Academy until 1832, when he went to the College of New Jersey at Princeton. After teaching one year in the Theological seminary he became a tutor, and in 1834 adjunct professor of Mathematics. In 1840 he was appointed professor of astronomy. From 1845 to 1854 he also held the chair of mathematics; but from 1854 to 1878, when he retired, he was professor of astronomy only. He was emeritus professor until his death. Prof. Alexander was chief of the expedition to the coast of Labrador to observe the solar eclipse of August, 1869. He was the author of a great number of scientific papers, some of which have been translated. His principal writings are: "Physical Phenomena Attending Solar Eclipses," read before the American Philosophical Society in 1843; "On the Fundamental Principles of Mathematics," read before the American Association for the Advancement of Science in 1848; "On the Origin of Forms and Present Condition of Some of the Clusters of Stars and Several of the Nebulae," read before the American Association for the Advancement of Science in 1850; others on "Form and Equatorial Diameter of Some of the Asteroid Planets" and "Harmonies in the Arrangement of the Solar System," which seem to be confirmatory of the nebular hypothesis of La Place, were presented to the National Academy of Sciences, of which he was a member; "A Statement and Exposition of Certain Harmonies of the Solar System" was published by the Smithsonian Institution in 1873. Prof. Alexander's first wife was Louisa Meads, of Albany; he was married, Jan. 2, 1850, to Caroline Forman, of Princeton, N. J. He died in Princeton, N. J., June 25, 1883.

CHESTER, Albert Huntington, chemist and mineralogist, was born at Saratoga Springs, N. Y., Nov. 22, 1843, son of Albert Tracy and Elizabeth (Stanley) Chester, both natives of Connecticut. His great-great-grandfather, William Powell, served in the revolutionary war with Washington's army in New Jersey and at the battle of Bennington. Mr. Chester studied for two years at Union College, and then entered the Columbia College School of Mines, where he was graduated in 1868. The high distinction he had won as a student under Prof. Egleston, Chandler and Newberry opened the way for his election, in 1870, as professor of chemistry, mineralogy and metallurgy in Hamilton College, New York, to succeed Prof. E. W. Root. For over twenty years he discharged the duties of this professorship with fidelity, enthusiasm and the largest success, and in 1891 became professor of chemistry and mineralogy in Rutgers College, where he still remains. During the year 1882 he was chemist to the New York state board of health. Prof. Chester has published a number of scientific works, and has embodied the results of an examination of the iron deposits of the Vermilion district of Minnesota in the "Eleventh Annual Report of the Geology of Minnesota." In 1886 he published "A Catalogue of Minerals," and in 1896, "A Dictionary of the Names of Minerals." Prof. Chester was married, in 1869, to Aethia S., daughter of Joseph Rudd,

of New York city. In 1878 the degree of Ph D. in course was conferred upon him by Columbia College, and in 1891 the degree of Sc. D. by Hamilton College.

EWING, Finis, clergyman and author, was born in Bedford county, Va., June 10, 1773, of Scotch-Irish extraction. No facts are known concerning his early life, but he settled near Nashville, Tenn., became a Presbyterian, and removed to Kentucky. Deciding to enter the Presbyterian ministry, he was licensed to preach in 1800, and in 1803 was ordained to the ministry by the Cumberland Presbytery. The validity of his ordination was denied by the Kentucky synod, which was sustained by the general assembly. Mr. Ewing, with two others, in 1810 formed the nucleus of the new Cumberland Presbyterian church, which now has more than 180,000 communicants. A few years later he became pastor of a church at Lebanon, Ky., and in 1820 he went to Missouri, and there organized a congregation at New Lebanon, in Cooper co., which he preached to for nearly sixteen years. He then (1836) removed to Lexington, Lafayette co., Mo., and accepted a pastorate which he held until his death. He was the author of "Lectures on Divinity," which were an exposition of principles of the Cumberland Presbyterians, who halt midway between Calvinism and Arminianism. He was married to a daughter of Gen. William Davidson, of revolutionary fame. He died at Lexington, Mo., July 4, 1841.

STARKWEATHER, Henry Howard, lawyer, was born at Preston, New London co., Conn., April 29, 1826. After receiving a public school education he adopted the profession of the law. He served in the state legislature in 1856, and as a delegate to the Chicago convention of 1860. In 1861 he was appointed postmaster of Norwich, and was reappointed by Pres. Johnson, but resigned in 1866. He was subsequently made chairman of the Republican state committee, and also a member of the Republican national executive committee. In 1867 he was elected a representative from Connecticut to the 40th congress, and was reelected three times, serving until his death. While in that body he was a member of the committees on naval affairs, and expenditures in the treasury department, and chairman of the committee on the District of Columbia during the important improvements made in Washington. He died in Washington, D. C., Jan. 28, 1876.

EBERLE, John, physician and author, was born at Hagerstown, Md., Feb. 10, 1787. He was graduated M. D. at the University of Pennsylvania in 1809, and settled himself in the practice of his profession in Philadelphia, where he also edited a political paper, and in 1818-24 was editor of the "Medical Recorder." He assisted to found the Jefferson Medical College, of Philadelphia, in 1822, where he held the chair of physic, and later was professor of materia medica and theory and practice. He held the chair of materia medica at the Medical College of Ohio, 1831-37, and that of medicine at the Pennsylvania Medical School, 1837-38. He was associate editor of the "Western Medical Gazette," and of the "Ohio Medical Lyceum." He was the author of "Eberle's Therapeutics" (1822); "Notes of Lectures on the Theory and Practice of Medicine" (1844); "Eberle's Notes" and additions by George McClellan (1849); "Treatise on the Diseases and Physical Education of Children" (1819); "Botanical Terminology" (1818). He died at Lexington, Ky., Feb. 2, 1838.

SIMPSON, Edward, naval officer and author, was born in New York city, March 3, 1824. He was appointed midshipman Feb. 11, 1840. After serving on the Decatur and Potomac of the Brazil squadron he returned to the United States on the Constitution in 1841. In 1842-45 he was at-

tached to the frigate Congress, Mediterranean and Brazil squadrons. In 1845 he entered the Naval Academy, where he was graduated midshipman in 1846. His was the first class at Annapolis. During the Mexican war he was attached to the Vixen and was present at the attacks on the forts at Alvarado and Tolosaco, at the capture of Tampico, Tuxpan, Coahuacalcos and Laguna de Terminos, and at the bombardment and capture of Vera Cruz. In 1848-50 he was upon the coast survey, and in 1850-53 served as acting master on the frigate Congress, Brazilian squadron. After a year as assistant instructor in gunnery and infantry tactics at the Naval Academy, he was promoted master and was again assigned to coast survey duty. On April 18, 1855, he was commissioned lieutenant, and going to China in the Portsmouth, he participated in the capture of the barrier forts, near Canton, under Foote. From 1858 to 1862 he was instructor in the theory and practice of naval gunnery at the Naval Academy, and in the following year was commandant of midshipmen there. He was commissioned lieutenant commander in July, 1862, and on the Ironclad Passaic, in 1863-64, participated in two engagements with Fort Wagner, three with Fort Sumter, two with Fort Moultrie, and one with Battery Bee. He commanded the steamer Isonomia on the Wilmington blockade, in the east Gulf squadron, and on the Bahama banks in 1864. As fleet captain of the consolidated blockading squadron, in 1865-66, he was engaged in the operations before Mobile until the city capitulated. He was commissioned commander March 3, 1865, and was assigned to the north Pacific station. In 1868 he took charge of the hydrographic office, Washington, and afterward was assistant to the chief of bureau of ordinance, navy department. Becoming captain in August, 1870, he was sent to Europe on special duty relating to ordinance. In 1873 he was in command of the torpedo station at Newport. During the two succeeding years he commanded the steam frigate Franklin and the Wabash of the north Atlantic squadron. In 1874-75 he was again at Newport; in 1875-77 commanded the Omaha of the south Pacific station; and in 1877-78 was stationed at the New York navy yard. He was made commodore in April, 1878; commanded the naval station at New London for three years; was promoted rear-admiral in 1884, and was placed on the retired list March 3, 1886. Adm. Simpson was president of the advisory board and of the board of inspection and survey. He wrote many naval text-books, including: "Ordnance and Naval Gunnery" (1862); "The Naval Mission to Europe" (2 vols., 1873); "Report of the Gun Foundry Board" (1885), and several articles republished in "Modern Ships of War" (1887). He also published a translation of "Théorie du Pointage." He died in Washington, D. C., Dec. 1, 1888.

PEEBLES, James Martin, physician and author, was born at Whittingham, Windham co., Vt., March 23, 1822, son of James and Nancy (Brown) Peebles. The family originated in the ancient town of Peebles, Peebleshire, Scotland, and at an early date received titles making its members eligible to seats in the national parliament. In 1718 some who bore the name emigrated to New England, and under the Rev. Mr. Abercrombie began a settlement at Pelham, Mass. James Peebles, born at Whittingham, was a farmer, held several town offices, and was a captain in the southern division of the Vermont militia for a number of years. Nancy

Brown, daughter of Jonas Brown, of Whitingham, farmer and stockherd, was in early life a school teacher. James M. Peebles, after studying at a select school in Binghamton, N. Y., and at Oxford Academy in the same state, entered the Universalist ministry at twenty, and for several years preached in Oswego, Elmira, N. Y., and other cities. Leaving this profession he studied in the Philadelphia (Pa.) University of Medicine and Surgery, graduating as M.D. in 1876, receiving from the institution in 1877 the degree of M.A. In 1882 the Medical University of Chicago conferred on him the degree of Ph.D. He began medical practice in Philadelphia, and for some time had charge of a medical ward in the City Hospital. In 1892 he removed to San Diego, Cal., conducting a health-home sanitarium, and was at the same time president of the Los Angeles College of Science. In 1881 he was professor in an eclectic medical college, Cincinnati, O. In 1896 he removed to Battle Creek, Mich. He was a member of the Northwest congressional Indian peace commission, 1868; U. S. consul at Trebizonde, Turkey, in Asia, 1869, and represented the U. S. Arbitration League at the International peace commission of Europe, held in

James M. Peebles

Berlin in 1886. Dr. Peebles has been connected for years with the Freemasons, Odd Fellows, Sons of Temperance and Knight Templars, and was the first right worthy grand chaplain of the Independent Order of Good Templars, which order he helped to create. He is a fellow of the Anthropological Society, London; the Psychological Association, London; and the Academy of Arts and Sciences, Naples; member of the International Climatic Association; American Institute of Christian Philosophy; the Victoria Institute and Philosophical Society, Great Britain, and several other learned societies of less note. He is a communicant in the Episcopal church, and yet a spiritualist, and upon the matter of hygiene, is a rigid vegetarian, believing that life can be greatly prolonged by avoiding animal flesh and strictly obeying the hygienic laws of nature. He took an active part in the anti-slavery movement with Garrison, Phillips, Foster, Rev. Samuel J. May, Henry C. Wright, Lucretia Mott and others, and has lectured frequently upon the subject of temperance, woman suffrage and all the social reforms that have come before the people since 1840. He has three times circumnavigated the globe, spending much time in the Pacific islands, Egypt, India and Ceylon, and is a contributor to and an official in the Museus School for Buddhist Girls at Cinnamon Gardens, Colombo, Ceylon. He has presented and edited several newspapers. At the present time he is the editor and proprietor of the "Temple of Health and Psychic Review" and the "Better Life," having a combined circulation of fifty to sixty thousand, both monthlies, printed in Battle Creek, Mich. Besides twenty or more pamphlets issued in the United States, England and Australia, he has published: "Three Journeys Around the World" (1897); "The Seers of the Ages" (1866; eight editions; re-published in London and Calcutta, in Bengalese); "Immortality, and Our Future Homes" (1880; 7th ed., 1899); "How to Live a Century and Grow Old Gracefully" (1881; several editions; one, 20,000); "Death Defeated; or, The Psychic Secret of How to Keep Young" (1900); "Compulsory Vaccination a Menace to Health and Personal Liberty" (1900). He edited "The Christ

Question Settled" (1899), a symposium to which he contributed together with Rabbi I. M. Wise, Robert G. Ingersoll, Prof. J. R. Buchanan and others. Biographies of Dr. Peebles by Rev. J. O. Barrett and Prof. E. Whipple were published in Boston in 1871 and Battle Creek, Mich., in 1901. He was married at Canton, St. Lawrence co., N. Y., May 23, 1852, to Mary Mahala, daughter of Thomas H. Conkey, who, previous to her marriage, was a teacher in the Clinton Liberal Institute, Clinton, N. Y.

BISPHAM, David Scull, singer, was born in Philadelphia, Pa., Jan. 5, 1857, son of William D. and Jane (Scull) Bispham, and descendant of Joshua Bispham, who emigrated from Lancashire, England, and settled in New Jersey, near Philadelphia, Pa. The first musical sounds that attracted his childish ear were those of the fifes and drums of the soldiers passing to the field of war in the southern states. His father, a lawyer by profession, beguiled many of his hours of leisure by playing most beautifully upon the then fashionable flute. His mother, of that Scull family to whom William Penn owed much in the planning of the Quaker city, was possessed of a lovely though untrained voice. No piano or musical instrument other than the flute and a set of "bones," the possession of the youthful David, was allowed in the house until a guitar made its appearance, and duets between father and son were rare in the land. A present from an uncle of a zither still further retarded his musical education, which was not fostered at all during the four years of his life at Haverford College, the great Quaker institution near Philadelphia, from which David Bispham was graduated in the class of 1876. The beginning of his vocal career may be said to have been made there in the Glee Club, and though a business life was planned for the young man, and for several years assiduously pursued, music called him with a stronger voice, and many of his evenings were spent at the Oratorio Society and the Orpheus Club, of which he became a member. He also accepted an invitation to sing in the choir of Holy Trinity, and afterward at St. Mark's Church, Philadelphia. To

the late Michael Cross, the musical head of the first three of these, and to Minton Pyna, the organist of the last, Mr. Bispham owes his love for the highest and best in music. In 1885 Mr. Bispham went to Europe, and spent some time in Italy, where he studied with Vannuccini, the great master of singing in Florence, who decided in favor of an artistic career, as did also the celebrated Lamperti of Milan, and subsequently Shakespeare, of London, where, in 1890, Mr. Bispham made his first appearance in concerts. During that year some carefully prepared amateur theatricals in which he took part led to his engagement in "La Basoche" by Messenger at the newly founded royal English opera, and it is worthy of remark that a pronounced success both as singer and actor should have been made in an operatic debut at thirty-five, for Mr. Bispham reached that age a few weeks later. It is a curious fact that one of Quaker descent for many generations should make a name for himself in the world in that particular branch of art which had for more than two centuries been strictly excluded from the education of his forefathers, and that, though suddenly embarked, he should be successful from the beginning in a career

David Scull Bispham

in which he had had but the desultory training of an amateur of music. During the grand opera season at Covent Garden in 1822 he made his first appearance as Kurwenal to the *Tristan* of Max Alvary, and since that time has sung at that celebrated house and at the Metropolitan Opera in New York in fifty different parts in Italian, French, German and English, his principal success being the roles of Falstaff in Verdi's opera, Kurwenal in "*Tristan*," Wolfram in "*Famhäuser*," Telramund in "*Lohengrin*," Wotan in "*Die Walküre*," Beckmesser in "*Die Meistersinger*," and Alberich in the "*Nibelungen Ring*." His characterizations, apart from their vocal excellence, are marked by great originality, depth of thought and extraordinary care in the details of costume and make-up, which years of study and thought have brought to a point of unusual perfection, while his acting alone has commanded universal respect, and would, were he not a singer, lead him in the highest walks of the drama. As an oratorio singer and as an exponent of the songs of classical writers he holds an unrivalled position, both in America and in England. Mr. Bispham was married, in Philadelphia, April 28, 1855, to Caroline, daughter of the late Gen. Charles S. and Annie (Striker) Russell. They have one son and two daughters.

MARSEILLES, Charles, journalist, was born in Philadelphia, Pa., July 19, 1816, son of Peter and Eliza (Gilpin) Marsailles, of French Huguenot extraction. His first American ancestor was Peter Marsailles, who came from Holland about 1700, and settled near Greenbrook, N. J., where the family resided for many generations. Charles Marsailles acquired part of his education at the Phillips Academy, Exeter, N. H., entering that institution at the age of sixteen with his friend, Daniel Parry Lippincott. Mr. Marsailles and Mr. Lippincott were roommates until the latter enlisted for service in the U. S. navy. Mr. Marsailles returned to Philadelphia in 1863, and pursued his studies in the select schools of William Fewsmith and Dr. Robert H. Lobberton, and under a private tutor, Reginald H. Chase. In 1864 he entered the Norwich University (now at

Northfield), Vt., in order to obtain a military training. In the spring of 1865, when the war was ended, he went to Boston, Mass., and entered the employ of Ticknor & Fields. Twelve months later he purchased the *Exeter* (N. H.) "*News-Letter*," which had been established in 1831 by Capt. John S. Sleeper, who founded the Boston "*Journal*" in 1838. Under his management the "*News-Letter*" doubled its size and circulation, but Mr. Marsailles, far from being satisfied with its neutral position in politics, made it an unwavering advocate of

Republican principles, and during his proprietorship it became recognized as one of the ablest and most influential party newspapers in the United States. In September, 1878, he purchased the Kingston "*Daily Freeman*" and the "*Weekly Journal*," of New York state, of which he was the proprietor and editor for four years, when he retired from business. In national politics Mr. Marsailles supports the Republican party. Though he has not been an aspirant to official distinction, having repeatedly declined, like Thurlow Weed, nominations to high office, he has been a power in the realm of politics, assisting very

materially through the columns of his journals in the making or unmaking of presidents, governors, senators and other high officials of the state and nation. He has been called "*the second Thurlow Weed*," and few editors wield a more potent pen than he. He was married, Oct. 5, 1869, to Annie Mary Moses, daughter of Samuel W. Leavitt, of Exeter, N. H. They have no children. In their home is to be found one of the best private libraries in the state of New Hampshire.

YULEE, David Levy, U. S. senator, was born at St. Thomas, West Indies, in 1811, of Hebrew extraction. When he was quite young his parents removed to Virginia, where he received the rudiments of classical education. In 1831 he went to Florida. Here he took up the study of law, was admitted to the bar, and entered upon the practice of his profession, but his time was divided between that and the pursuits of agriculture. He was a Democratic delegate to congress from the territory of Florida from 1841-45. Originally called David Levy, he now changed his name to David Levy Yulee, by which he was afterward known exclusively. Under this name he was a delegate to the convention which formed the state constitution of Florida, and in 1845 was elected a senator to congress. He was chairman of the committee on post-offices and post-roads. He held his seat in congress until 1861, when he withdrew to take part in the civil war, and served throughout the war as a member of the Confederate congress. At the close of the war he was for some time confined in Fort Pulaski as a prisoner of state (1865). He was president of the Atlantic and Gulf railroad in Florida. He died in New York city, Oct. 10, 1886.

BUEL, Jesse, agricultural expert, was born in Coventry, Conn., Jan. 4, 1778. When he was twelve years of age his father removed to Rutland, Vt., and there, two years later, the boy, at his own request, was apprenticed to a printer. He remained in this office for four years, when he began work as a journeyman printer in New York city. Afterward he pursued his trade in Lansingburg and other towns in the state of New York, and in 1797 began the publication of the *Troy "Budget"*. In 1801 he started the Poughkeepsie "*Guardian*," which failed. Whereupon he settled in Kingston for a time, and there published a paper called the "*Plebeian*"; but in 1813 removed to Albany and established the "*Argus*," which he edited until 1821, and which is still one of the leading papers of the interior of the state. He also acted as state printer during part of his residence in Albany. Upon relinquishing the editorship of the "*Argus*," he settled on a small farm, near Albany, absolutely barren under existing systems of cultivation; but by means of subsoil plowing and the application of fertilizers he made it one of the best farms in the state. Here for nineteen years he was engaged in experiments in agriculture and horticulture. In 1823 Mr. Buel was a member of the state assembly. During his residence in Kingston he served for many years as a judge of the court of common pleas of Ulster county, and in 1836 was a candidate for governor of the state. In 1831 with a view of inducing others to adopt his novel agricultural system, Mr. Buel began the publication of the "*Cultivator*," under the auspices of the New York State Agricultural Society, and continued to conduct it with great ability and success until his death. Besides

Charles Marsailles.

writing freely in this paper he delivered many addresses before agricultural societies in the state of New York and elsewhere; and published the "Farmer's Instructor," in ten volumes, and the "Farmer's Companion; or, Essays on the Principles and Practice of American Husbandry" (1839). He was an honorary member of the Lower Canada Agricultural Society; the London Horticultural Society; the Royal and Central Society of Agriculture, and the Society of Universal Statistics, of Paris. He died at Danbury, Conn., Oct. 6, 1839.

ORR, Nathaniel, engraver, was born at London, Ont., March 26, 1822, son of Nathaniel and Mary Ann (Donaldson) Orr. His father, a native of Armagh county, Ireland, came to New York, Aug. 20, 1816. Mr. Orr received his education in the public schools of Buffalo, N. Y. He studied wood engraving at Albany under John H. Hall, a noted engraver in his day. Upon Hall's retirement from business he was succeeded by Mr. Orr, who conducted a large establishment in Albany for some years, but removed to New York city to take charge of the illustration department of Duyckinck's Shakespeare and Harper's Bible. Thereafter he remained in New York and his wood engravings were in most of the magazines and illustrated books for more than a generation. His large office at 52 John street became headquarters for many of the finest artists and designers, viz.: Stephens, White,

Sol Eytinge, Darley, Harry Fenn, McLennan and others, whose best work he engraved, so that for forty years his office was noted as the centre of book and magazine illustration. Mr. Orr finally retired from the business in 1888 with the reputation of having brought the art of wood engraving to its highest perfection, and the signature "Orr" cut in the block was always a sure guarantee of art excellence. During these years Mr. Orr accumulated a vast collection of prints, designs, sketches and books, that render his home a veritable art gallery and library of precious volumes. His residence is a fine

old Jersey manor house at Hohokus, N. J., in the lovely Saddle river valley, where his summers are spent, his winters being passed in his charming residence at Melrose, Fla. Mr. Orr was married, April 20, 1846, to Elisabeth, daughter of Beecher Holmes, Coeymans, Albany co., N. Y. Of his four children three survive, Sarah, wife of George E. Moore; Edie, wife of Walter W. Hamlyn, and Alice Trefwell.

LILIENTHAL, Max, rabbi, educator and author, was born in Munich, Bavaria, Nov. 6, 1815. He was educated from his early years for the Jewish pulpit. After concluding a high school course he entered the University of Munich to study philosophy and theology, and was graduated in 1837 with the degree of Ph. D. Highly recommended by the Russian embassy of his native city to the secretaries of the interior and of public instruction in St. Petersburg, he went, in 1839, to Russia, and was assigned at the city of Riga to a new school. Under his direction it made such progress that the imperial government, in order to widen the scope of his work, ordered him to travel through the western provinces of the empire to encourage his co-religionists in opening schools and prepare them for the plans of the government to inaugurate among them better secular instruction. He completed this important mission to the entire satisfaction of the minister of public instruction, who in appreciation of these services

called him to the capital as councillor in his department (1840-42). He continued his educational activity for the ensuing three years, but when Emperor Nicholas I. attempted the compulsory conversion of the Jews Lillenthal resigned from the Russian service, and emigrated with his family to the United States (1845). On arriving in New York city he was elected rabbi of three congregations, and spent here ten years, being also engaged for some time as superintendent of an educational institution. In June, 1855, he was called to Cincinnati, O., by the congregation Bene Israel, the pioneer Jewish congregation of the West. He soon gained wide renown as an able promoter of liberal ideas in the reforming of the old faith, and preached from the pulpit the doctrine of dividing church and state, civil and religious liberty, and advocated many radical innovations, with the view of bringing the Jewish religious life more in conformity with the age and surroundings. He also did much toward reconciling the old and new schools of Judaism and fostering a feeling of fraternity between Jews and Gentiles. He displayed a versatile activity out of the pulpit, and soon after his arrival in Cincinnati was elected a member of the board of education, which position he held until his death. In this capacity he introduced into the schools instruction in object lessons, published a manual upon that subject, and was the initiator of other improvements. In 1872 he was elected director of the board of Cincinnati University, and previously (1861) to that was made director of the city relief union. He founded the Rabbinical Literary Association—a body representing the Jewish clergy of the country, and was its president from its foundation. When the Hebrew Union College was established he volunteered his services as instructor, and was subsequently tendered the professorship of Jewish history and literature, which position he also occupied until his death, contributing his services gratuitously. In 1874 he founded the "Sabbath School Visitor," a paper devoted to Jewish instruction for juveniles. An easy and graceful writer, he largely contributed to the public press. His separate publications are confined to a post-Biblical history and a volume of poems, entitled "Freiheit, Frühling und Liebe" (1857). Other poems appeared in the Cincinnati "Volksblatt," "Volksfreund," and in "Debora." He wrote three dramas, which exist in manuscript only: "Die Strelitzen Mutter," "Rudolf von Habsburg" and "Der Einwanderer." Dr. Lillenthal was a member of many societies and a constant worker on behalf of the poor of all creeds, taking a very active part in all charitable affairs of the Jews as well as of the community at large. He died in Cincinnati, April 6, 1882.

MOSS, John Calvin, inventor, was born near Bentleyville, Washington co., Pa., Jan. 5, 1838, son of Alexander J. and Mary (Calvin) Moss. His father was a carpenter and cabinet maker; his mother was a woman of great devotional temperament, who designed her son for the Presbyterian ministry, and so named him John Calvin. The son received a common-school education, supplemented by a partial academic course, and subsequently learned the printer's trade. In 1856 he was married to Mary A. Bryant, who became a valuable assistant in all his experiments and inventions. Learning the art of photography, he engaged in that business at Monongahela, Pa., and in 1858, having read an account of the experiments of Prof. Grove in an effort to produce engraved plates by etching out the Daguerrean image, it occurred to him that, by using Prof. Grove's method, he could etch through the thin coating of silver on the Daguerreotype plate, and by changing the plate to another solution that would act on the copper without affecting the silver, he could obtain the required depth. Confid-

ing the plan to his wife, he was advised to try it at once; she even furnishing the necessary metals by destroying some of her household utensils. This was the beginning of the process, which involved years of privation and disappointment before the final success was reached. During 1859 he published a newspaper called the "Colleguer," at Washington, Pa.; but this proving unsuccessful, in 1860, he engaged as a journeyman printer in Philadelphia, still, however, devoting all available time to experimenting, often even abandoning his printing, when he and his wife would work day and night on the evolution of the process until every cent was exhausted. Though obliged to return to the printer's stick, his experiments were continued by his faithful wife; and they were finally enabled to execute orders for engraved plates. The original process was substantially as follows: the illustration was first drawn by an artist in pen and ink; the drawing was then photographed, and from the negative was made a mold. This mold was given to the stereotyper, who made from it the stereotyped plate used by the printer. The secret lay in the preparation of the negative for the mold and the production of the mold therefrom. Later a half-tone method was successfully evolved by the inventor. The mold feature, however, was superseded by etching. In 1863 he removed to New York city, and after still further eliminating the factors of failure, on Jan. 3, 1871, he founded the Actinic Engraving Co., and on May 2, 1872, he incorporated the Photo-Engraving Co., which is still in existence. In 1880 he sold his interest and established the Moss Engraving Co., of which he was elected president and superintendent. Although Mr. Moss never patented his chemical methods, it is conceded that he was not only the inventor of the "Moss process," the "Moss new process," and the "Moss-type process," but also the first man to make photo-engraving a practical business success, affording better results than wood engraving, at a smaller expense. Many mechanical devices were patented by him in connection with his work, among them being an elastic apparatus for suspending camera and copyholder, thus converting the vibrations of the building into a vertical motion that would not interfere with the focus. He died in New York city in 1892.

RAWLINS, Joseph Lafayette, lawyer and senator, was born in Salt Lake county, Utah, March 28, 1830, son of Joseph S. and Mary Rawlins, the former a native of Illinois, the latter of Tennessee. When Joseph was two years of age his parents removed to what was then known as Willow Creek, twenty miles south of Salt Lake City, where they settled upon a farm. The son attended the district school and worked at home until he was eighteen years old, and, being studious, made rapid progress compared with his meagre facilities. In 1868 he entered the University of Deseret, at Salt Lake City, and in July, 1871, the sophomore class of the State University of Indiana, Bloomington, where he completed the classical course. Upon his return to Salt Lake City he was appointed to a professorship of mathematics in the University of Deseret, where he remained two years. During this time his leisure moments were devoted to the study of law in the office of Messrs. Williams, Young & Sheeks, and in 1874 he was admitted to the bar of the supreme court of Utah. In 1875 he opened an office in partnership with Benjamin Sheeks, and soon took a leading position at the bar, participating in many important and celebrated cases, some of which he successfully argued in the supreme court of the United States. Politically he has always been a Democrat, and in 1884 he organized the Young Men's Democratic Club of Utah, becoming its first president. This organization opposed polygamy and

the interference of the church in politics. At a public meeting held under its auspices on Jackson day, in 1885, he delivered a speech which created a sensation throughout the territory, and attracted widespread attention, becoming the subject of editorial comment in the New York "Times" and other leading papers. In October, 1892, he was nominated by acclamation as Democratic candidate for delegate to the house of representatives from Utah territory, and the following canvass resulted in his election. In congress he at once took a high position, securing the enactment of many measures of value to his constituents, and delivering notable speeches on the silver question and on the admission of Utah, the latter of which gave him at once a national reputation. In 1891 he was defeated for the 54th congress by the Hon. Frank J. Cannon, but in 1897 was elected to the U. S. senate for the term ending March 3, 1903. He was married, in 1876, to Julia E. Davis, and has five children.

CLAYBERG, John Bertrand, lawyer, was born near Cuba, Ill., Oct. 8, 1853, son of George and Elizabeth (Baughman) Clayberg. He was graduated at the University of Michigan, law department, in 1875. During the last year of his college course he was appointed by Judge Cooley an assistant in completing "Cooley on Torts," and he collected data for "Cooley on Torts," and other important legal works. In 1875 he removed to Lansing, Mich., and formed a partnership with S. L. Kilborne for the practice of law, which terminated in the spring of 1877. In that year he associated with Robert J. Kelley, of Alpena, Mich., and in 1881 he removed to Helena, Mont., forming a partnership with the Hon. T. H. Carter, U. S. senator. In 1889 Judge N. W. McConnell retired from the supreme bench of Montana, and was admitted to the firm. Subsequently, Mr. Carter having been elected to congress, his interests were purchased by the remaining partners, who did business until the year 1896. In the following year Mr. Clayberg formed a partnership with Milton S. Gunn, of Helena, and Frank E. Corbett, of Butte, having offices in Butte and Helena. This firm continued until 1900, when Mr. Corbett withdrew from the firm, which is continued as Clayberg & Gunn. In 1889 he was attorney general of Montana, and since 1891 has been non-resident lecturer on mining law in the law department of the University of Michigan. He was married, Sept. 10, 1878, to Katheryn, daughter of C. Y. Edwards, of Lansing, Mich., and has two children.

John B. Clayberg

EVANS, Lewis, geographer and author, was born about 1700, probably in Pennsylvania, where he was a surveyor. He produced and published a chart of the middle British colonies in North America and of the Indian countries adjacent on the north and west (1749; second edition, with explanatory pamphlet, 1755). He also published a pamphlet in reply to some strictures on a statement questioning the English title to Fort Frontenac which had been appended to the second edition of his map (London, 1756); both appeared under the title of "Geographical, Historical, Political, Philosophical and Mechanical Essays." A new edition of his map, with large additions by Gov. Pownall, was published in 1776. He also published (1755) a pamphlet against Gov. Shirley, governor of Massachusetts. He died in June, 1756.

LUCAS, Robert, first territorial governor of Iowa (1838-41) was born at Shepherdstown, Jefferson co., Va., April 1, 1781. Paternally he was a descendant of William Penn, and on his mother's side was of Scotch ancestry. His father freed all his adult slaves, making humane provision for them, and removed to Chillicothe, O., becoming one of the first settlers of that state. The son was educated under a private tutor, and received a special training in mathematics. Becoming a skillful surveyor, he secured profitable employment before reaching his majority, and in 1804 was appointed surveyor of Scioto county. Two

years later he was commissioned justice of the peace for Union township in the same county. As a member of the Ohio militia he advanced through various grades to the rank of major-general. When accompanying Gen. Hull on the invasion of Canada, he became so popular with the other officers that many urged him to wrest the command from the unpopular general. By a strategy he avoided capture with the rest of the army at Detroit, and escaped to Cleveland, O., after which he was commissioned a captain in the regular army, and rose to the rank of colonel before

retirement to civil life. In 1816 he was elected a member of the Ohio legislature, and served for nineteen consecutive years in either house or senate. He acted as presidential elector in 1820 and 1828, and was chairman of the Democratic national convention which renominated Pres. Jackson at Baltimore in 1832. During the latter year he was elected governor of Ohio, to which office he was re-elected in 1834, and by his efforts the serious difficulties between Ohio and Michigan were peaceably settled. Upon the expiration of his second term he declined a renomination, and when the territory of Iowa was organized by congress, June 12, 1838, he was ap-

pointed by Pres. Van Buren as its first governor. Arriving at Burlington, Ia., on Aug. 16th, he assumed the administrative office, combined with the duties incurred as superintendent of Indian affairs, and though subsequently involved in many and serious political difficulties, maintained his position without the sacrifice of self-respect throughout his entire term. Iowa is indebted to him for much of her prosperity; the common school system was zealously advocated by him, and its support arranged for by the appropriation of public lands, and his efforts were against the gambler and the drunkard, his influence securing the prohibition of liquor traffic in Iowa. Gov. Lucas was married, in 1810, to Elizabeth Brown, who died in 1812, survived by one daughter, and in 1816 he was married to a Miss Sumner, who had emigrated with her parents a year or two previously from England. He died in Iowa City, Ia., Feb. 7, 1853.

CHAMBERS, John, second territorial governor of Iowa (1841-45), was born at Bronley Bridge, N. J., Oct. 6, 1780, son of Roland and Phoebe (Mullican) Chambers. In 1794, when John Chambers was but thirteen years of age, his father removed with his family to the state of Kentucky, which was then sparsely settled, and, owing to the conflicts which were constantly taking place between the settlers and the Indians, every cabin was a little fort. Here young Chambers grew to manhood, and no doubt at an early age became familiar with the weapons of defense, as every man and boy learned to use a rifle, not only to hunt game in the forests but to hunt and fight the Indians as well. He was educated in part at Transylvania Seminary, Lexington, Ky., but it is probable that he received his early training for the most part from his parents, and was otherwise self-taught. However that may be, he read law and entered upon the practice of his profession. That he was successful and rapidly rose in the estimation of the public is demonstrated by the fact that he was appointed or elected prosecuting attorney of his district. At this period the state was overrun by lawless characters, who were a terror to the people, but by forming a combina-

tion with other prosecuting officers Chambers soon established a vigorous system of enforcing the criminal laws, which made safe the lives and property of the citizens. He had early enlisted in the service of his country, and participated in the Indian war of 1811 and the war of 1812 with Great Britain, also in the battle of the Thames, serving on the staff of Gen. William Henry Harrison, who then commanded the American forces. As he advanced in years he became an active politician, and was part of that galaxy of Whig statesmen and orators which, headed by Henry Clay and John J. Crittenden, so long controlled the politics and swayed the destinies of Kentucky. While not the equal of those leaders as an orator, he was a strong and forcible speaker. In 1812, 1815, 1830 and 1832 he served in the Kentucky house of representatives. In 1835 he was appointed a judge of the court of appeals, but, resigned on his election to the 24th congress. In 1827 he was elected to congress, serving only one term. In 1835 he was again sent to congress, where he served for four years, and became the compeer of Thomas Corwin, ex Gov. Vance, of Ohio, and others. Col. Chambers was a great admirer of Mr. Clay and a devoted friend of Gen. Harrison. When, in 1839, the latter was nominated for the presidency, Col. Chambers took an active part in his support and was one of those who escorted the president-elect

from his home to the capitol of the nation, and witnessed his inauguration. Short as was the period of Pres. Harrison's administration, he was not forgetful of his friends, and one of his earliest appointments was that of John Chambers as governor of Iowa and superintendent of Indian affairs in that territory. He took the oath of office before Judge McLean of the U. S. supreme court, and that oath is now on file in the collection of the historical department of Iowa. Although Gov. Chambers had passed the age of sixty years when he became governor, and was broken in health, his constitution hav-

ing been impaired by his many previous hardships and experiences, he was faithful in the discharge of his duties and watched with jealous care over the interests of the territory. He remained in office throughout the administration of Pres. Tyler, but did not desert his principles for the sake of office as too many Whigs did. After James K. Polk became president, in 1845, Gov. Chambers returned to his home. In 1849 he was appointed by the Taylor administration a commissioner to negotiate a treaty with the Sioux Indians, in which he was successful. Gov. Chambers was an intense Whig and a bitter partisan, and although he made political enemies the hostility was partisan, not personal. He was a courteous, affable Kentucky gentleman of the old school, and was famous for his hospitality. Gov. Chambers was married first, to Margaret, daughter of Maj. Ignatius Taylor, of Hagerstown, Md., and afterward (1807) to Hannah Lee Taylor, a half sister of his first wife, all his children springing from his second marriage. He died at Paris, Ky., Sept. 21, 1852.

CLARK, James, third territorial governor of Iowa (1845-46), was born in Greensborough, Westmoreland co., Pa., in 1811, son of John Clark, who was prophethood of the county. When quite young he was apprenticed to the printing trade at Harrisburg, Pa. After mastering the art of printing and learning how to conduct a paper, he went West about

1835, and was made territorial printer of the first legislature of Wisconsin, which met at Belmont, Wis., in the fall of 1836. He established the "Gazette" in the town of Burlington, Ia., in 1837. He was appointed secretary of the territory of Iowa by Pres. Van Buren, and governor by Pres. Polk in 1845, being the last territorial governor of Iowa. Iowa was admitted into the Union, Dec. 28, 1846, and the first governor elected by the people was Ansel Briggs. Gov. Clarke edited the oldest and leading Democratic paper of the state, and thus exerted a commanding influence. He was married, in 1840, to Christiana, daughter of the late Gen. Henry Dodge, who occupied so many positions of honor and responsibility. In 1850 the town of Burlington was visited by the fearful epidemic of cholera brought by the boats up the Mississippi river from New Orleans. Gov. Clark's wife and child were two of the victims, and he was so completely prostrated by grief that he died two weeks after their death, at the age of thirty-nine. At the time of his decease he was just entering into the full maturity of his powers, and having honorably discharged all the high trusts that had been committed to him in the past, was eminently qualified to fill any other stations of honor to which he might have been called. He left three children.

BRIGGS, Ansel, first state governor of Iowa (1846-50), was born in Vermont, Feb. 3, 1806, son of Benjamin Ingley and Eleeta Briggs. His early education was acquired in the schools of his native place, and he afterwards spent three years at the Norwich (Conn.) Academy. In 1830 he removed with his parents to Cambridge, Guernsey co., O., where he engaged in commercial pursuits; twice was elected sheriff of Guernsey county, and competed with John Ferguson for the office of county auditor, but was defeated. In 1836 he removed to Iowa, settling first at Davenport, where he contracted with the post-office department for establishing mail routes and conveying the U. S. mails between Davenport and Dubuque and Iowa City, the last at that time, being the capital of Iowa. Later he removed to Andrew, became deputy treasurer of Jackson county, and in 1842 represented it in the territorial house of representatives. At the state convention held at Iowa City, Sept. 24, 1846, he was nominated for governor on the Democratic ticket, and was the first to be elected by the people. Under his administration the state government was organized, the boundary line between Iowa and Missouri was established, and the free and normal school system was put in operation. So ardent was he in the support of the school measure, that in order to put the system in operation he advanced out of his own pocket about \$2,000, which was afterwards restored to him by the state. He served as chief executive of Iowa until December, 1850. In 1851 he enrolled himself as one of the founders of Florence, and a member of its land company. This town, situated six miles above Council Bluffs, on the Nebraska side of the Missouri, was a successful rival of Omaha. He had large property interests also in Council Bluffs, Columbus and Bellevue, the last named being another rival of Omaha. Here Gov. Briggs was one of the founders of Nebraska Lodge No. 1, Free and Accepted Masons, which was removed from Bellevue to Omaha in 1858. From 1860 until 1865 he and his son, John Shannon, engaged in overland freighting to Colorado and Montana. In 1876-79 he resided at Council Bluffs, and for the remainder of his life at Omaha. He began his work of helpfulness as soon as he set foot upon the soil of Iowa, and the beginning of his term of office has marked an epoch in the state's history. In all departments of life he aimed to be true to his convictions of truth and right. He was a wise coun-

John Chambers

scholar, a man of strong will, but not tyrannical, plain and unostentatious, and of great kindness and benevolence. A writer at the time of his death said: "In honorable old age he lived to see the full realization of the desire he had expressed in his retiring message to the general assembly in 1830, that this, his adopted state, might ever be distinguished for virtue, intelligence and prosperity." Gov. Briggs was married, first, in Ohio, Nov. 11, 1830, to Nancy M., daughter of Maj. Dunlap, an officer in the war of 1812. They had eight children, two of whom lived to reach their majority, namely, John Shannon and Ansel Briggs, Jr. He was married, second, in Iowa, Oct. 29, 1849, to Mrs. Frances Carpenter. There were no children by this union. Gov. Briggs died at the residence of his son, John S. Briggs, in Omaha, Neb., May 5, 1881. Two brothers survive him, one of whom, Albert, is a prominent Republican politician of the state of Washington, represented Jefferson county in the territorial legislature in 1861-62 and 1863, and was probate judge of Jefferson county for fourteen years.

HEMPSTEAD, Stephen, second governor of Iowa (1850-54), was born at New London, Conn., Oct. 1, 1812, son of Joseph and Celinda (Hutchinson) Hempstead. The first American ancestor was Robert Hempstead, who emigrated from Wales, and became one of the nine original settlers of New London, Conn., in 1645. It is believed that he first settled at Hempstead, Long Island, but crossed the sound to escape from Dutch rule. He was married to Joanna Willie, and had a son named Joshua, who was married to Elizabeth Larrabee. Their son, Joshua, wrote a diary covering a period of fifty years, which has been frequently referred to by writers of New England history. Stephen Hempstead removed with his parents to St. Louis, Mo., in 1828, who settled on a farm near Bellefontaine in 1830, while he became a clerk at Galena, Ill. During the Black Hawk war in 1832 he served as an officer of an artillery company organized to protect the town from the Sac and Fox Indians, who, under their leader, Black Hawk, were threatening all the country near Rock river, and after the defeat of this renowned chieftain he studied for two years at Illinois College, later reading law with his uncle, Hon. Charles S. Hempstead, a prominent lawyer of Galena. In 1836 he was admitted to practice in all courts of Wisconsin (to which territory the Iowa district belonged), and settled in Dubuque, Ia., which he made his permanent home. Upon the organization of the territorial government of Iowa in July, 1838, he was elected to represent Dubuque and the adjoining counties in the legislative council, which assembled at Burlington in November of that year. He was a born leader, and always held a foremost position in that body. At the next session he was elected president of the council, filling the position most acceptably, and in 1845 was re-elected at the session held in Iowa City, then the capital of the territory. In 1848 he was appointed with Judge Mason, of Burlington, and Judge Woodward, of Muscatine, on the codifying commission which compiled "The Code of Iowa" of 1851. He was elected governor of Iowa in 1850, which position he honorably filled for four years (the term under the constitution of 1846 under which Iowa became a state). His oratory was forcible and eloquent, and his administration of affairs highly commendable.

S. Hempstead

In 1855 he was elected a county judge of Dubuque county, and held the office for a period of fourteen years. Upon the abolishment of the office in 1869, he was at once elected auditor of Dubuque county, serving by re-election until 1873, when his health having become impaired, he retired from public life; he was induced about a year before his death, however, to accept the office of justice of the peace. His decisions were considered equitable and just. He was married in Missouri, June 15, 1837, to Lavinia Moore, daughter of Dennis and Eliza (Moore) Lackland, of Baltimore, Md. They had three sons and three daughters. Gov. Hempstead died at Dubuque, Ia., Feb. 16, 1883.

GRIMES, James Wilson, third governor of Iowa (1854-58), was born at Deering, Hillsboro co., N. H., Oct. 20, 1816, son of John and Elizabeth (Wilson) Grimes. His ancestors were Scotch-Irish emigrants from the north of Ireland, who settled at Londonderry, N. H., in 1719. His father was a thrifty farmer of sterling integrity and worth. The son received his classical education at Hampton Academy and Dartmouth College. He studied law under James Walker, at Peterboro, N. H., and in May, 1836, began practice at Burlington, Ia., which was then a part of the Black Hawk purchase in Wisconsin territory. He was highly successful as a lawyer, and from 1841 to 1853

practiced in partnership with Henry W. Starr. His first public service was as secretary of the Indian commission at Rock Island, Sept. 27, 1836, where the Sacs and Foxes relinquished to the United States their lands along the Missouri river. During 1837-38 he was assistant-librarian in the Wisconsin library, and after the formation of Iowa territory represented Des Moines county in its legislature in 1838 and 1843, serving in the general assembly of the state in 1852. In August, 1854, he was elected by both Whig and Free-Soil Democratic parties as governor of Iowa. Though reared among Whig principles, his whole career was marked by freedom from party bias. During his administration he opposed the Missouri compromise and did much to foster Free-Soil sentiment throughout Iowa. In 1856 the capital of the state was changed from Iowa City to Des Moines. He served as a commissioner for founding the Insane Hospital at Mt. Pleasant, giving careful attention to the trust; and in July, 1856, he convened a special session of the general assembly to act on land grants received from congress for the construction of railroads. In August of the same year he addressed a remonstrance to Pres. Pierce against the treatment of Iowa settlers in Kansas. He relinquished his office as governor in January, 1858, and in the same year was elected to the U. S. senate for a term of six years. He served by re-election from March 4, 1859, until Dec. 6, 1869, when he resigned on account of ill-health. He was one of the founders of the Republican party, which he represented in the senate. Though seldom making a set speech, he was always a ready and vigorous debater. He was a prominent worker on the pensions, naval affairs, District of Columbia and other committees; and on July 4, 1861, he obtained an order from the secretary of war setting free the escaped slaves confined in the Washington jail, thus inaugurating the first official act of emancipation. He urged the building of iron-clads, and on March 13, 1862, spoke on the achievements of the western

naval flotilla, becoming a recognized authority in all matters pertaining to the navy. Among the works due largely to his advocacy were the return of the Naval Academy from Newport to Annapolis, the establishment of a national armory at Rock Island and of a navy yard at League Island. Politically he was remarkable for independence of character, and, though a Republican, opposed a high protective tariff and Pres. Lincoln's enlargement of the regular army. During the impeachment trial of Pres. Johnson, he considered himself in the light of a judge rather than a representative; and though his physical condition required severe fortitude to do so, he entered the senate and cast his vote for acquittal. Later he said: "Neither the honors nor the wealth of the world could have induced me to act otherwise than I did; and I have never for a moment regretted that I voted as I did. I shall always thank God that He gave me courage to stand firm in the midst of the clamor, and by my vote not only to save the Republican party, but prevent a precedent being established as would in the end have converted ours into a sort of South American republic, in which there would be a revolution whenever there happened to be an adverse majority in congress to the president for the time being." Though then greatly censured by his party, the New York "Times" said years afterward: "No braver or more faithful man ever sat in the senate than Mr. Grimes, who, almost alone, saved his party from an incalculable blunder. . . ." He founded a free library in Burlington, a professorship in Iowa College (Grinnell), and scholarships both at that college and Dartmouth. The degree of LL.D. was conferred upon him by both Dartmouth and Iowa colleges in 1865. He was married at Burlington, Ia., Nov. 9, 1846, to Elizabeth Sarah Nealley. After a two years' residence in Europe, with temporary intervals of improved health, he died suddenly at Burlington, Ia., Feb. 7, 1872.

LOWE, Ralph Phillips, fourth governor of Iowa (1858-60), was born in Warren county, O., Nov. 27, 1805, son of Jacob Derrick and Martha (Per-Lee) Lowe. His paternal American ancestors were immigrants from Holland, and early settlers of New Jersey. He received his early education in the schools of his native place, and entered Miami University in 1825. He went to Asheville, Ala., before being graduated and taught school and studied law. He formed a law partnership with his brother, Peter P. Lowe, at Dayton, O. In 1840 he removed to Bloomington (now Muscatine), Ia., where he practiced his profession and engaged in farming. He was a member of the first constitutional convention, district-attorney and district judge. In 1858 he was elected governor of Iowa, and served until 1860, when he was elected by the people judge of the supreme court; before this the election to this office had been made by the legislature. Gov. Lowe was conspicuous in his connection with the so-called "Five Per Cent. Claim." He held that the lands offered soldiers to enlist, in addition to a certain amount of pay per month, was "pay," and not "bounty"; that the lands were offered as cash is offered, and that they were earned; and, as between the United States and the state of Iowa, no other agreement is known than that the state should not tax lands for five years after being located, and the United States should pay the state five per cent. of the sales. Accordingly the state did not tax lands located under military warrants. If the claim were allowed, the United States would pay the state of Iowa over \$800,000. Judge Lowe left the supreme bench in 1868 to prosecute the claim. He was U. S. district-attorney for a few years, and for ten years he lived in Washington laboring to induce congress to pay the claim. He had associated

with him William M. Evarts, of New York; Allen G. Thurman, of Ohio; the late Senator McDonald, of Indiana, and Judge Shellbarger, of Washington, D. C. The court decided adversely (Miller and Field dissenting), and, knowing that Judge Lowe was fatally ill, withheld the announcement of the decision until after his death, that he might be spared the disappointment. He was married, in 1837, to Phoebe Carleton, the adopted daughter of her uncle, Dr. Fairchild, of Cincinnati, O. He died in Washington, D. C., Dec. 22, 1883.

KIRKWOOD, Samuel Jordan, fifth and ninth governor of Iowa (1860-61; 1876-77) and secretary of the interior under Pres. Garfield. See Vol. IV., p. 215.

STONE, William Milo, sixth governor of Iowa (1861-68), was born in Jefferson county, N. Y., Oct. 14, 1827, son of Truman and Lovina (North) Stone. His early educational advantages were limited. At sixteen years of age he was a driver for two seasons on the Ohio canal, and from seventeen until about twenty three years of age he was employed at the chairmaker's trade, in the meantime studying and reading during his leisure moments. He studied law, and, after being admitted to the bar in 1851, began practice in partnership with his first preceptor, Hon. James Mathews, at Coshocton. In 1854 he removed to Knoxville, Ia., followed by Mr. Mathews, and the partnership was continued until the election of Mr. Stone to the bench. In 1855 he became the editor of the Knoxville "Journal," and was a member of

the convention, which in February, 1856, organized the Republican party of the state. He was chosen judge of the 11th judicial district in April, 1857, and when the new constitution went into effect the following year, was elected judge of the 6th district. He was a delegate to the Chicago convention in 1860, and was an earnest supporter of Mr. Lincoln for the nomination. At the breaking out of the civil war he enlisted as a private and assisted in organizing company B of the 3d Iowa infantry, becoming captain of the company, and upon the organization of the regiment, its first major. In May, 1861, he was wounded in the battle of Blue Mills, Mo., and, at Shiloh, where he was in command of the regiment, he was taken prisoner. In 1862 he was appointed, by Gov. Kirkwood, colonel of the 22d Iowa, and with his command participated in the battles of Fort Gibson, Champion Hills, Black river, and the charge on the works at Vicksburg, May 22, 1863. At Fort Gibson he commanded the brigade, and at Vicksburg he was wounded in the left arm. In June, 1863, he was nominated for governor by the Republicans of Iowa, and in August resigned his commission in the army. In 1864 he was brevetted brigadier-general. He assumed the gubernatorial chair in January, 1864, holding the office for two terms. As one of the war governors he was several times called to Washington for conference with Mr. Lincoln, and was there for that purpose at the time of the assassination of the president, being a witness of the murder at Ford's Theatre. He was with the president constantly until his death, and was one of the pall bearers who accompanied the remains to Springfield, Ill., for burial. Gov. Stone retired from the executive chair in January, 1868, and resumed the practice of law at Knoxville, Ia., having for a partner his brother-in-law, Hon. O. B. Ayers. In 1877 he was elected to the lower house of the Iowa legislature, serving for one term. In 1880 he became

interested in mining operations in Arizona, and for several years took but little part in active practice. In 1882, having formed a partnership with Hon. T. J. Anderson, they removed to Pueblo, Col., but in 1885 Gov. Stone returned to Iowa, locating at Des Moines, as a member of the firm of Stone, Ayers & Gamble. He was elector for the state at large on the Harrison ticket in 1888, and was appointed assistant commissioner of the general land office by Pres. Harrison, becoming commissioner upon the resignation of Hon. Thomas Carter. At the close of his official term in 1893, Gov. Stone removed to Oklahoma City, O. T., and engaged in the practice of law, and also devoted some time to agriculture. He was married, in 1856, to Caroline, daughter of his former partner, Hon. James Mathews. Gov. Stone died at Oklahoma City, O. T., July 18, 1893, leaving a widow and one son.

MERRILL, Samuel, seventh governor of Iowa (1868-72), was born at Turner, Oxford co., Me., Aug. 7, 1822, son of Abel and Abigail Hill (Buxton) Merrill. He is of the eighth generation in descent from Nathaniel Merrill, who came from Salisbury, England, to Salisbury, Mass., in 1639. Two ancestors, Samuel and Abel Merrill, served in the revolutionary war, while Thomas, Samuel and the governor's father served in the war of 1812. Samuel Merrill was brought up on his father's farm, and received only a brief academic training. He began to teach in the common schools at seventeen years of age, and taught successfully for eight years; subsequently becoming superintendent of schools. He removed to Tanworth, N. H., in 1847, and engaged in merchandizing. He was a member of the New Hampshire legislature during the exciting years of the repeal of the Missouri compromise, participating in the celebrated election of John P. Hale and James Bell to the U. S. senate. He removed to Iowa in 1856, continuing as merchant and banker until the breaking out of the civil war, and was a member of the Iowa legislature. He was commissioned as colonel of the 21st Iowa infantry, and served in the western department with Gen. Grant, participating in the battles of Missouri. While commanding the forces in the battle of Hartsville, Mo., he was severely wounded. He resigned, however, before the close of the war because unable to endure the hardships of the service. Being granted a pension for his wounds, he donated the entire proceeds to a hospital in Des Moines, Ia., for sick and disabled soldiers. After the war he was engaged in merchandizing and banking until 1868, when he was elected governor of Iowa. In his first inaugural address he combated the the ory that U. S. bonds should be paid in depreciated paper issue, declaring the theory to be in every way vicious and dishonest. In 1868 an amendment to the state constitution was adopted by public vote, the word white being dropped from the qualification of electors. As governor he held the plough to break the ground for the state capitol. As chairman of the building commission he combated speculation and jobbers, and secured the construction of the building by honest day labor. He watched over the eleemosynary institutions of the state, introducing many reforms. Before receiving applications for pardons he required public notice to be given, and a written opinion of the judge, district attorney and jury before whom the case was tried, while before granting pardon in capital offences, he had a private interview with the prisoner. He organized a Sunday-school in the chapel of the prison, and secured the services of the justice of the supreme court to superintend the same. It proved a signal success. Retiring at the end of his second term in 1872, he returned to his occupation as a banker, and in 1889 removed to California, where he spent the last years of

his life. Gov. Merrill was married: first, in 1844, to Catherine Thomas, of Standish, Me., who died in June, 1845; second, in 1851, to Elizabeth D. Hill, of Buxton, Me., who died in California, March 6, 1888, and third, in March, 1895, to Mrs. Mary S. Greenwood, of Massachusetts. He died in Los Angeles, Cal., Aug. 31, 1899.

CARPENTER, Cyrus Clay, eighth governor of Iowa (1872-76), was born at Harford, Susquehanna co., Pa., Nov. 24, 1829, son of Asabel and Amanda (Thayer) Carpenter. Through his mother he was descended from Gen. Sylvanus Thayer, "Father of West Point Military Academy," and founder of the Thayer School of Civil Engineering, Dartmouth College. He was left an orphan before his twelfth year. In 1852 he started for the West, teaching for a time in Licking county, O., and arriving in Des Moines, Ia., in 1854. He taught the first school opened in Fort Dodge, and devoted much time to land surveying for the general government. He also opened a land agency on his own account, locating land-warrants, paying taxes for non-residents, and buying, selling and surveying lands. He was chosen to the Iowa house of representatives for the session of 1858. At the beginning of the civil war he enlisted as a private, but was at once commissioned as captain and commissary of subsistence, continuing in this office until the close of the war; in the meantime being advanced to the rank of lieutenant-colonel, and receiving a colonelcy by brevet. He served mostly on the staffs of Gen. Rosecrans, Thomas, Dodge and Logan. In 1866 he was elected register of the state land office in Iowa, and was re-elected two years later. At the Republican state convention, 1871, he was nominated for governor on the first ballot. He was elected by a large majority, and was re-elected in 1873. His administrations were distinguished by his support of the state university and the agricultural college. In his first inaugural address he advanced the proposition that the rates for freight and passenger fares on the railroads should be subject to state control, and this came more conspicuously to the front in the "granger law," which was affirmed by the supreme court of the United States in a suit carried up from Iowa. The legislature placed \$10,000 at the disposal of Gov. Carpenter for the prosecution of this suit; but he employed competent counsel and accomplished the work with an expenditure of but \$2,000. He appointed the first visiting committee to the hospital for the insane; and although this measure was bitterly fought in the legislature, it afterward became very popular. After completing his second term he was appointed second comptroller of the U. S. treasury department, and remained for fifteen months, resigning when appointed by Gov. Gear to the first board of railroad commissioners. Being soon after elected to congress, he resigned his office, and two years later he was re-elected. His congressional career was most successful, meeting the highest expectations of his constituency. He originated the policy of establishing experimental stations in connection with the agricultural colleges, but his bill did not pass until the next session, when the proposition was re-introduced by his successor. He also secured the passage of the bill dividing the state into two districts for the Federal courts. He was again chosen to the lower house of the Iowa state legislature in 1883. After returning from the army he devoted many years to cultivating his farm on the Des Moines

river, near Fort Dodge. He was married, in 1864, to Susan C. Burkholder, of Fort Dodge, Ia., who survived him. He died at Fort Dodge, May 29, 1898.

NEWBOLD, Joshua G., tenth governor of Iowa (1877-78), was born in Fayette county, Pa., May 12, 1830, of English descent. After receiving a common school education he removed to Iowa in 1851, settling in Hillsboro, Henry co., where he entered upon a mercantile career. In 1875 he was elected lieutenant-governor of the state of Iowa, and by virtue of this office succeeded to the chair of governor upon the resignation of Gov. Samuel J. Kirkwood in 1877. Upon the expiration of his term of office in 1878 he removed to Mt. Pleasant, Ia., and was mayor of that city in 1901.

GEAR, John Henry, eleventh governor of Iowa (1878-82), was born at Ithaca, N. Y., April 7, 1825, of Scotch descent. In 1836 his family removed to Galena, Ill., and in 1838 to Fort Snelling, which was then in Iowa territory though now in Minnesota. The son received a common-school education, and in 1843 engaged in merchandizing at Burlington, Ia. He was one of the first citizens of Iowa to join the ranks of the Republican party, and was elected by it mayor of Burlington in 1863. He was a member of the Iowa legislature for six years, and served as speaker of the lower house during four years. In 1878 he became governor of Iowa, and officiated in that capacity until 1882. He was a member of congress from 1887 to 1891 and again from 1893 to 1895. In

John H. Gear

1892-93 he was assistant secretary of the U. S. treasury and in 1894 he was elected to the U. S. senate as a Republican, serving from March 4, 1895, until his death, which occurred in Washington, D.C., July 14, 1900.

SHERMAN, Buren Robinson, twelfth governor of Iowa (1882-86), was born at Phelps, Ontario co., N. Y., May 28, 1836, son of Phineas L. and Eveline (Robinson) Sherman. His father was an axe maker by occupation, and a man of more than ordinary intelligence. The son's early education was in the public schools of his native place, and at the Elmira (N. Y.) Academy. He was admitted to the bar in 1859, and began practice at Vinton, Ia., with Hon. J. C. Traer. In the following year he was admitted to the supreme court of Iowa; in 1875 to the U. S. circuit court, and in 1879 to the supreme court of the United States. He enlisted in the Federal army at the outbreak of the civil war, served as second lieutenant, was promoted captain, and on April 6, 1862, at the battle of Shiloh was severely wounded. He remained in service, however, until April 17th, when, his wound preventing further active duty, he resigned. He was judge of Benton county (Iowa) during 1865-67; served as clerk of the district court from January, 1869, to December, 1874, and in October of the latter year was elected auditor of the state of Iowa, to which office he was twice re-elected, serving until 1881. He was elected governor of Iowa in October, 1881, and was inaugurated Jan. 12, 1882, serving by re-election until January, 1886, when he retired from politics. He held for many years a prominent place in the fraternal societies of the United States, and in 1862 became a Royal Arch Mason, in 1869 a Knight Templar, and in 1883 attained the 33d degree of the Scottish Rite Association, becoming an active member of its

Vol. XI.—28.

supreme council. The degree of LL.D. was conferred upon him in 1883 by the University of Iowa. He was married at Vinton, Ia., Aug. 29, 1862, to Lena, daughter of Benjamin Kendall, of that place.

LARRABEE, William, thirteenth governor of Iowa (1886-90), was born at Leeward, Conn., Jan. 20, 1832, son of Adam and Hannah Gallup (Lester) Larrabee. His father, a graduate of West Point Military Academy, was a captain of artillery in the war of 1812, and was severely wounded in the battle of La Cole Mills, Canada. The son was educated at the common schools of the neighborhood, and in 1853 removed to Iowa. During the first winter there he taught school in Hardin, Alamakee co.; afterward, for three years, running a farm near that place. He then became engaged in milling and manufacturing. In 1872 he engaged in banking, although still continuing his manufacturing interests, and by his well known capacity, integrity and financial standing, succeeded in building up an extensive business connection, aiding various commercial enterprises in the states and accumulating a comfortable competence. Mr. Larrabee was one of the founders of the Republican party in Iowa, and has always been an active and consistent supporter of its principles. In 1867 he was elected to the state senate and served continuously for eighteen years, being five times re-nominated by acclamation and as regularly re-elected. At the commencement of his second term he was appointed chairman of the committee on ways and means, thus becoming prominent in the management of the state moneys and other important trusts. He took an active part in the passage of the present excellent laws regarding railroads and

rapidly became a marked figure among the law-makers. In 1885, before the expiration of his last term, he was nominated for governor and was elected for two successive terms, declining a re-nomination in 1890. He was appointed chairman of the state board of control and continued to serve in that capacity for two years and resigned the office in February, 1900. He spent about six months in a visit to Palestine and various countries in Europe. He is the author of "The Railroad Question" (1893), which is recognized as an authority on the subject. He is the inventor of a grain separator, for which he has obtained letters patent. He was married, Sept. 12, 1861, to Ann M. Appelman, at Clermont, Ia. They have six children.

BOIES, Horace, fourteenth governor of Iowa (1890-94), was born near Aurora, Erie co., N. Y., Dec. 7, 1827. He was brought up on his father's farm, attending school during the winter seasons. As soon as his own earnings enabled him to pay the necessary charges, he began the study of law, and was admitted to the bar in 1849, in Erie county, N. Y. He began practice in Buffalo, where he continued to reside until 1867. He early identified himself with the Republican party, which elected him in 1857 to the lower house of the New York assembly. In 1864 he was a candidate for district attorney for Erie county, but was defeated by two votes, after which he retired from politics for some time. In 1867 he removed to Iowa, settling at Waterloo, Black Hawk co., where he still resides. He was soon recognized as one of the ablest lawyers of the state. When not actively engaged in his professional duties, he has devoted himself to the cultivation of a farm in Grundy county, of

W. Larrabee

which he has made a model. He opposed the prohibition movement in the ranks of the Republican party from the start, finding in this a reason for once more entering the political arena. With regret he severed his connection with that party and supported Mr. Cleveland in 1884, his convictions on the tariff issue being quite as pronounced as on the temperance question. Having fully identified himself

with the Democratic party, in 1889 he received the Democratic nomination for governor of Iowa. The campaign that followed centered about the state prohibition law. Mr. Boies attacked the existing statute from the platform in every section of the state. He was elected by a plurality of 7,000 votes, and was the first Democrat to be raised to the governorship in thirty-five years. He was re-elected in 1891, but was defeated for a third term in the election of 1893. In his administration of the affairs of the

state he won the confidence of the people, his energy and sincerity securing him the respect of even his political opponents. He has contributed ably and extensively to agricultural literature.

JACKSON, Frank Darr, fifteenth governor of Iowa (1894-96), was born at Arcade, Wyoming co., N. Y., Jan. 26, 1854. Both his father and mother entered the service of the Union during the civil war, the former holding the rank of first lieutenant of the 78th regiment New York volunteers and the latter being at the front for fourteen months as hospital nurse. At the close of the war his family removed to Jesup, Buchanan co., Ia., and in 1870 he entered the Iowa Agricultural College at Ames. Three years later he took up the study of law in the State University at Iowa City, where he was graduated in 1874. He was admitted to the bar in 1875, and at once began the practice of law at Independence, Ia. In 1880 he removed to Greene, Ia., where he was highly successful as a lawyer and

politician. He was secretary of the senate of the 19th general assembly, and was re-elected to that office in 1884. He was soon recognized as the leader of the young Republican element of the state, and in 1884 he was elected secretary of state by a large majority, being re-elected in 1886 and 1888. At the close of his third term, he, with others, formed the Royal Union Life Insurance Co. (of which he was made president), with headquarters at Des Moines. In 1893 he was nominated for governor, and carried the state by 33,000 plurality. He was inaugurated Jan. 11, 1894. In all emergencies Gov. Jackson acted with a firmness and energy which showed that he sympathized with

the laboring people of the state, still he would exhaust every resource if necessary to maintain law and order. In December, 1894, he declined to be a candidate for re-election and retired from public life at the close of his administration, to devote all his energies to his insurance company. Gov. Jackson was married, in 1877, to Anne F., daughter of Mrs. Jane Brock, of Council Bluffs, Ia. They have four sons, Graydon, Ernest, Frank and Louis.

Horace Boies

Frank Darr Jackson

DRAKE, Francis Marion, sixteenth governor of Iowa (1896-98), was born at Rushville, Ill., Dec. 30, 1830, son of John Adams and Harriet Jane (O'Neal) Drake. His parents removed to Davis county, Ia., in 1846, and founded the village of Drakeville, where Francis attended school until he was sixteen years of age. Becoming a clerk in his father's general merchandise store, he assisted in carrying on the business until 1852. At the age of twenty-two he led a train across the plains to California, fighting and defeating on the way a party of 300 Pawnee Indians, although his own force numbered but twenty men. Encouraged by the success of this venture he again crossed the plains in 1854, reaching Sacramento, Cal., with ninety-seven cows, five oxen and five horses, having lost on the way only three cows, a result which made the trip one of the most notable ever undertaken. Returning by sea, he was wrecked when the steamer Yankee Blade went down with a loss of several hundred lives. He then entered into partnership with his father and brother in a general mercantile business, the connection continuing until 1858, when he withdrew to engage in business for himself at Unionville, Ia. At the outbreak of the civil war he raised a company among his townsmen, and on the governor's order he joined the independent regiment of Iowa volunteers commanded by Col. Edwards. He was commissioned as major and commanded the Federal troops which defended the city of St. Joseph, Mo., against the Confederate Gen. Price. In 1862 Maj. Drake became lieutenant-colonel of the 36th Iowa infantry, with which he served for several years. At the battle of Elkin's Ford, Ark., in April, 1864, he defeated Gen. Marmaduke and his forces, gaining from his brigade commander the commendation, "Too much praise cannot be given Col. Drake for his distinguished gallantry and determined courage in this contest." A few weeks later, having been assigned to the command of the 3d brigade of Solomon's division, he set out with a large train to

gather supplies for the forces of Gen. Steele; the expedition was attacked by Confederate cavalry and Col. Drake wounded and taken prisoner, only to be at once released, the nature of his injury being such that recovery was thought to be impossible. He was away from his command but six months, returning to camp and active duty while still on crutches. He was now brevetted brigadier-general and served until the close of the war, when he returned to Centerville, Ia., and began the practice of law in partnership with Judge Amos Harris. Later he gave up law to engage in the development of railroads, supplying capital for five companies in his own state, among them the Albia and Centerville, of which he is president, and the Indiana, Illinois and Iowa. He is also president of the Centerville National Bank and the First National Bank of Albia. In 1895 he was elected governor of his state, and served one term. Drake University at Des Moines, Ia., an institution under the patronage of the Disciples of Christ, has been so named from his large gifts to it and Iowa College at Grinnell, and the Wesleyan College at Mt. Pleasant, Ia., have also enjoyed his beneficence. He was married, Dec. 24, 1855, to Mary Jane, daughter of William Lord, of Bloomfield, Ia., and had two sons and four daughters.

SHAW, Leslie Mortier, seventeenth governor of Iowa (1898-), was born at Morristown, Vt.,

F. M. Drake

Nov. 2, 1848, son of Boardman Oslas and Louisa (Spaulding) Shaw. His great-grandfather, Ebenezer Shaw, was one of the earliest settlers and first selectmen of Morrissetown. His mother was a daughter of Jason Spaulding, a teacher of some reputation in the eastern part of New York state. In early childhood his father removed to a farm in Stowe, Vt., where Leslie M. Shaw spent his minority. He received his early education in the common schools of his county and the People's Academy of Morrissetown, Vt., and having removed to Iowa in 1869, was graduated at Cornell College, Mt. Vernon, Ia., in 1874. He was dependent upon his own efforts in obtaining an education, but with characteristic persistence, by teaching school, selling nursery stock and working in the harvest fields he earned sufficient to complete his college and professional course, and was graduated at the Iowa College of Law in 1876. In the same year he settled at Denison, Ia., and from the start took high rank in his profession. He was the largest contributor towards the establishment of an academy and normal school at Denison and has held the position of president of the board of trustees from its organization. He is also a trustee of Cornell College, and for several years was president of the school board of Denison, Ia. He is president of the Bank of Denison, at Denison, and Bank of Manilla, at Manilla, Ia. Prior to 1896 he was never active in politics, although always prominent in local campaigns, speaking in defense of the principles of the Republican party. At the beginning of the memorable free silver controversy of that year he was requested by the adherents of the gold standard to reply to an address made in his town by William Jennings Bryan. From that date to the end of the campaign, which resulted in the election of Pres. McKinley, he was in constant demand, and proved one of the most efficient speakers in that notable canvass. This canvass brought his name prominently before the state, and when in 1897 Gov. Drake declined a renomination because of ill-health he was nominated by the Republican party for governor. He made a remarkable canvass, fighting distinctively for the gold standard without equivocation, and was elected by a plurality of 29,975. He was selected by the sound money commission to preside at the Indianapolis convention of 1898, where his address attracted national attention, as had his speeches in his preceding gubernatorial canvass. In June, 1898, Simpson College, of Indianola, Ia., conferred upon him the degree of LL.D. He was re-elected governor in 1899. On Dec. 6, 1877, he was married to Alice, daughter of James Crawshaw, a native of England, who settled in Clinton county, while Iowa was still a territory.

HOLDEN, Liberty Emery, publisher, was born in Raymond, Cumberland co., Me., June 20, 1833, son of Liberty and Sally Cox (Stearns) Holden. Richard Holden, his paternal ancestor, came to America from England in 1634, and settled at Watertown, Mass. The Holdens in Maine are nearly all descendants from Lieut. John Holden, a revolutionary soldier, who after the war emigrated to Otisfield, Me., where he died in 1806. He had a large family, among whom was Peter, grandfather of Liberty Emery Holden. Through his mother, who was a daughter of Levi Stearns, he is descended from Isaac Stearns, who came to America from England with Gov. John Winthrop, and settled at Watertown, Mass., in 1630. Through his grandfather, Lydia Cox Stearns, he is connected with the Joslyn, Peabody, Southworth and Alden families. He is thus, in direct lineage, connected with Elizabeth Alden, daughter of John Alden and Priscilla Mullen Alden, of the Mayflower. When a child his parents moved from Raymond to a farm in Sweden, Oxford co., Me. He attended the district school winters and

worked on the farm summers, and was prepared for college at Bethel, Me., under Dr. N. T. Trine. After teaching school in several towns he entered Waterville College, now Colby University, in 1854, where he remained two years, standing high as a scholar, and in his freshman year being class poet. He decided to make his home in the West, and after graduating at the University of Michigan, in 1858, he was elected professor of rhetoric and English literature in Kalamazoo College, Michigan, a chair he held for three years. In 1861 he was elected superintendent of public schools at Tillin, O., where he remained one year. During this year he was admitted to the bar, and in 1862 removed to East Cleveland, O., engaging in the real estate business. In 1872 he became interested in the iron mines of the Lake Superior district, and was manager of the Pittsburgh and Lake Angeline mines. Because of his interest in the silver-lead mines of Utah he removed to that territory in 1876. He was one of the founders of Salt Lake Academy, was its president for twelve years, and has given liberally toward its maintenance. He was frequently a delegate to mining conventions, and was the first chairman of the executive committee of the National Bimetallie League of the United States, organized in 1884. Under his direction data was collected and published, which created national interest in the free coinage of silver and gold. He removed to Cleveland, O., in 1880. Mr. Holden is a member of the Alta Club, of Salt Lake City; the Union Club; University Club; the Rowfant Club, of Cleveland; and the Society of Mayflower Descendants. He is a trustee of the Western Reserve University and Adelbert College; was a member of the board of park commissioners of Cleveland for three years, and was president of the school board of East Cleveland for nine years. He is president of the Western Reserve Historical Society; he is a member of the Unitarian church; he is president of the American Park and Out door Art Association. In 1898 he was president of the Western Reserve Chapter of the Sons of the American Revolution and of the New England Society of Cleveland. He was a delegate-at-large from Ohio to the Democratic national convention in 1888, and again in 1896, and was commissioner from Ohio to the World's Columbian exposition in 1893. Mr. Holden has been identified with the business interests of Cleveland and other parts of the country for many years. He is an excellent judge of mines, and his knowledge of geology and mineralogy gives him superior advantages in operating them. He has great confidence in the city of Cleveland, and

a large proportion of the earnings of his lifetime have been invested in buildings and enterprises in Cleveland. He has erected many large buildings in that city; among them the Hollenden Hotel. Most of his time is given to the Cleveland "Plain Dealer," which has grown under his ownership to be one of the largest, most liberal and influential papers in the United States. As a speaker and writer he is always forceful, decided and instructive. He was married to Delia E., daughter of Henry G. Bulkley, of Kalamazoo, Mich., and has had nine children. Among those living are Albert Fairchild, Delia Elizabeth, Liberty Dean, Roberta, Emerie, Guerdon and Gertrude.

PRENTISS, John H., was born at Worcester, Mass., April 17, 1784, son of Samuel and Lucretia (Holmes) Prentiss. His father (1759-1818), son of Col. Samuel and Phoebe (Billings) Prentiss, was a physician and assistant surgeon of the revolutionary war, who settled in Worcester, gained a large practice, and was a fellow of the state medical society. John was bred a printer, and was employed in the office of the New York "Post" until 1808, when he settled in Cooperstown, N. Y., where he established the "Federalist" and "Freeman's Journal." These he edited with ability and success until 1849. He was a representative from New York to the 25th and 26th congresses. He was vice-president and afterward president of the Bank of Cooperstown. He was a man of untiring industry, and in all matters affecting the welfare of his county he was much consulted and was usually an active participant. He was twice married: first, in 1815, to Catherine C., daughter of Gen. Jacob Morris (b. Dec. 28, 1755; d. June 10, 1844), of Otsego county. Gen. Morris, the son of Louis Morris, signer of the Declaration of Independence, served in the revolutionary war and took a distinguished part in the defense of Fort Mifflin. He was aide-de-camp to Gen. Charles Lee and was also attached to the staff of Gen. Nathaniel Green. He subsequently served in both branches of the state legislature. By this marriage Mr. Prentiss had two daughters. His second wife was Urilla Shankland, of Cooperstown. He died at Cooperstown, June 26, 1861.

BUCK, Charles Francis, lawyer and congressman, was born in the village of Durrheim, Black Forest, Germany, Nov. 5, 1841, son of Anton and Regina (Woorsthorn) Buck. His father emigrated with his wife and eight children to New Orleans, La., in 1852. Most of the family died of yellow fever, and Charles F. Buck, being left homeless, was obliged to do menial service for many years, getting his schooling when he could. In 1861 he was elected to a beneficiary cadetship in the Louisiana State University and Military Academy, Alexandria, where he remained until the school was permanently closed, in 1863. While there he was made assistant professor

of Latin and mathematics. He studied law in New Orleans under Christian Roselius, famous in the judicial annals of Louisiana; was admitted to the bar in 1865, and has enjoyed a lucrative practice. For many years he has been one of the leading men of the profession and is attorney for many private corporations. He has been prominently associated with many charitable and social organizations. He has been president of the German Protestant Orphan Asylum since 1880; has been a member of the board of school directors of the city of New Orleans, and is a prominent and highly honored Mason. In November, 1894, he was elected by the Democratic party of the 2d Louisiana district a member of congress. Mr. Buck was married, Oct. 11, 1870, in New Orleans, to Mary Anne Weidner. They have five children.

MORRISON, James Dow, first P. E. bishop of Duluth, was born at Waddington, St. Lawrence co., N. Y., Oct. 16, 1844, son of Rev. John and Mary (Dow) Morrison, who emigrated from Glas-

gow, Scotland, in 1837. His mother was a daughter of James Dow, of Keith, Scotland. He was educated, first, at a grammar school at Huntington, Canada, and at McGill University at Montreal, where he was graduated in 1865 with high honors, and at the same time winning the Logan gold medal for natural science. In 1868 he took the M. A. degree and in 1880 was made LL. D. The degree of D. D. he received from Union College, New York, in 1879. He was ordered deacon in the diocese of Quebec in 1869 by Bishop William Williams, and priest in the diocese of Montreal in 1870. His first charge was at Magog and St. Luke's Church, Hemmingford, Canada. In 1871 he was called to the rectorate of Christ Church, Herkimer, N. Y., and in 1875 was given the call to St. John's Church, Ogdensburg, N. Y. In 1878 he was appointed examining chaplain to the bishop of Albany and was elected archdeacon of the convocation of Ogdensburg in 1881. He was a member of the general convention in the years 1883, 1886, 1889, 1892, 1895, and 1898. The house of bishops unanimously elected him to the missionary jurisdiction of Duluth in October, 1896. He was consecrated on Feb. 2, 1897, in All Saints' Cathedral, Albany, N. Y. In 1869 he was married to Harriet M., youngest daughter of Rev. M. Townsend, canon of Christ Church Cathedral, Montreal, Canada.

STUART, Charles E., lawyer and senator, was born in Columbia county, N. Y., Nov. 25, 1810, son of Charles and Catherine (Parsons) Stuart, and a descendant of Daniel Stuart, who came to this country from Scotland before 1680, and settled on Martha's Vineyard. His father was a practicing physician, but lived on a farm at Waterloo, N. Y., where the son passed his boyhood. After obtaining a common school education he studied law, and was admitted to the bar of Seneca county. In 1834 he went to Kalamazoo, Mich., where he began to practice law, forming a partnership with Gov. Ransom. In 1841 he was elected to the state legislature and served until 1846. From Dec. 6, 1847, until March 3, 1849, he represented his state in congress, and was elected again in 1850. In 1853 he was chosen U. S. senator. During his term of six years in the senate he ranked high as a parliamentarian, and among the services he rendered to Michigan was that of establishing the Sault Ste. Marie canal. He was chairman of the committee on public lands, and he presided over the Charleston convention; also over the adjourned meeting which nominated Stephen A. Douglas for president. Douglas was a personal friend of Mr. Stuart, and after the latter's withdrawal from political life was often a guest at his home. Calhoun and Webster were also his intimate associates. Although a strong Democrat, upon the outbreak of the civil war Mr. Stuart raised and equipped the 13th Michigan regiment, of which he was made colonel, but severe illness prevented his going to the front. After leaving the senate he had resumed the practice of law until increasing ill-health made it necessary for him to retire from active work. He attended the national union convention in Philadelphia in 1866, but the remainder of his life was spent as an invalid in the old Stuart mansion, where, by the force of his intellect and his courtly manner, he drew about him the distinguished men of his time. Hon. Charles S. May said of him: "Col. Stuart was the best jury lawyer we have ever had in Michigan—and I do not forget that we have had many able men." Col. Stuart was married at Waterloo, N. Y., Nov. 3, 1835, to Sophia Streeter, daughter of George and Sophia (Lee) Parsons, and had by her three children: Marissa Jane, Charles Lee and Katherine Emma Stuart. He died at Kalamazoo, Mich., May 19, 1887.

Charles F. Buck

WARBURTON, Charles Edward, editor, was born at Leamington, England, March 2, 1836. When he was two years of age his parents removed to Philadelphia, Pa., where he was educated in the public schools, and in early life acquired a practical business training. In 1861 he joined his brother-in-law, J. Barclay Harding, in establishing "The Evening Telegraph," the first number of which was issued on Jan. 4th of that year. The excitement attending the war for the preservation of the Union and the anxiety for the latest news from the front rendered the time propitious for the establishment

of a newspaper conducted on enterprising and liberal lines. Mr. Harding was the son of Jasper Harding, for many years the proprietor and publisher of the old "Pennsylvania Enquirer," and had received a thorough and varied journalistic training, while Mr. Warburton brought to the new enterprise the knowledge of business methods which were essential to success. When Mr. Harding died, in October, 1865, Mr. Warburton became sole proprietor, publisher and editor-in-chief. The full reports of the Associated Press were supplemented by special telegraphic service from all the important news centres, varied correspondence from European capitals, copious extracts from the current literature of the world, unusually elaborate criticisms in all branches of literature, art, music and the drama, and a daily compendium of editorial opinion, under the title of "Spirit of the Press." When the long distance telephone between Philadelphia and New York was completed, in 1887, Mr. Warburton became its first wholesale customer, by securing a special circuit connecting the "Telegraph" with its New York correspondent, and the paper was thus the first journal in the world to utilize the new agency for the transmission of news. Mr. Warburton was always a Republican in politics, and his paper has followed the fortunes of that party from its establishment. But it has always taken the liberty to interpret Republican doctrines for itself, and to advocate such measures and candidates as it deems best for the welfare of the party and the country. He died Sept. 1, 1896, and was succeeded in the ownership of the "Telegraph" by his son, Barclay H. Warburton.

WELCH, John, jurist, was born in Harrison county, O., Oct. 29, 1805, son of Thomas and Martha (Daugherty) Welch, who were among the earliest of Ohio pioneers. He received his early education in the common schools, and in 1823 he entered Franklin College, New Athens, O., where, by the aid of proceeds from occasional teaching, he was graduated in 1828. In January, 1829, he commenced his legal studies under Joseph Dana, of Athens, O., and was admitted to the bar in 1833. He was a prosecuting attorney from 1834 to 1839, and in 1845 was elected to the state senate, serving until 1847; he also served one term in congress (1851-53) as the successor of S. F. Vinton, though failing in a re-election on account of a change in his district. In 1852 he was a delegate to the convention that nominated Gen. Winfield Scott for president, and in 1856 was a member of the electoral college that cast the vote of Ohio for John C. Fremont. He was elected, in 1862, judge of the court of common pleas, serving until 1865, when he became a supreme court judge, and in this office he held for thirteen years, resigning to take up private practice, in which he engaged for seven or eight years longer before he retired and devoted himself to literary pursuits. The degree of LL.D. was conferred upon him by Franklin College in 1867. He

invented a new method of computing interest, and wrote "Mathematical Curiosities" (1883); "Index-Digest of Ohio Decisions" (1886); lectures and essays on "Thomas Ewing," "Mob Law," "History of the Ohio University," and other subjects. Judge Welch was married at Athens, O., in 1829, to Martha, daughter of Capt. James Starr, a descendant of an old Connecticut family. They had two sons and two daughters. Johnson M. (b. 1832) was a major in the Federal army during the civil war, and at the present time (1894) is a prominent lawyer of Athens, O. Henry H. is secretary of the National Wood Preserving Co., of St. Louis, Mo.

HALL, William Whitty, physician and author, was born at Paris, Ky., in 1810, son of Stephen and Mary (Wooley) Hall. He was graduated at Centre College in 1830, and, studying medicine at Transylvania University, was graduated M.D. in 1836. He began the practice of his profession at New Orleans, afterwards removing to Cincinnati, O., and in 1851 to New York city, where he established "Hall's Journal of Health" in 1854, a periodical which he ably conducted for many years. He was married to Miss Hannah Matlock, of Cincinnati, O. He published a "Treatise on Cholera" (1852); "Bronchitis and Kindred Diseases" (1853); "Health and Disease as Affected by Constipation, and its Unmedicinal Cure" (1860); "Fun Better Than Physic"; "Consumption" (1857); "Sleep" (1864); "Guide-Board to Health, Peace and Competence" (1870); "Health by Good Living" (1870); "Works" (1876); "Coughs and Colds" (1871); "Health at Home" (1872); "How to Live Long" (1875), and "Dyspepsia and its Kindred Diseases" (1876). He died in New York city, May 10, 1876.

IDE, Henry Clay, jurist, was born at Barnett, Vt., Sept. 18, 1844, son of Jacob and Lodoska (Knight) Ide. The family in America was founded by Nicholas Ide, who emigrated from England in 1643, and settled in Rehoboth, R. I. He was educated at St. Johnsbury Academy, St. Johnsbury, Vt., and at Dartmouth College, where he was graduated as valedictorian of the class of 1866. From 1866 to 1868 he was principal of St. Johnsbury Academy, and of Cotting High School, Arlington, Mass., in 1868-69. He studied law with Judge B. H. Steele, being admitted to the Vermont bar in 1871, and to the bar of the U. S. supreme court in 1890. He was a member of the Vermont senate from 1882 to 1886, president of the Republican state committee in 1884, and delegate to the Republican national committee in 1888. In 1891 he went to Samoa as a U. S. commissioner, and in 1893 was appointed chief justice, jointly by England, Germany and this country, which office he held for four years. In February,

1900, Pres. McKinley appointed him as member of the commission to establish civil government in the Philippine islands. He is also a director of numerous banks and corporations. He was married, Oct. 26, 1871, to Mary M. Melcher, of Stoughton, Mass. She died April 13, 1892. Two children, Mary M. and Annie L., are living. Judge Ide's residence is at St. Johnsbury, Vt.

STONE, Michael Jenifer, jurist, was born in Charles county, Md., in 1717, third son of David and Elizabeth (Jenifer) Stone. He was a brother of Thomas Stone, who signed the Declaration of Inde-

pendence, and of John Haskins Stone, who was governor of Maryland. Judge Stone was a man of exquisite taste, versatile talents, refined wit, and was conscientious in the discharge of his duties. He was a member of the convention of Maryland which ratified the Constitution of the United States. He served in congress from 1789 to 1791. On Jan. 11, 1791, he was appointed chief-justice of the first judicial district of Maryland. He was one of those who voted to locate the seat of the national government on the Potomac. He was married to his cousin, Mary Hanson Briscoe, and left five children. He died in 1812.

HOLLAND, Edmund Milton, actor, was born in New York city, Sept. 7, 1848, son of George and Catherine (De Luce) Holland. His father, the well-known comedian, was the son of Henry Holland, a dancing teacher in London, and his mother was a daughter of Nathaniel De Luce, leader of the orchestra at the old Park Theatre, New York. His first public appearance was made when he was carried on the stage as a baby in the play "To Parents and Guardians," in which his father was then appearing. He attended the public schools in his native city until he was fifteen, when he was employed as "call boy" at Mrs. John Wood's Olympic Theatre, New York, where, among his other duties, he occasionally appeared on the stage. In 1866 he

became a member of the dramatic company at Barnum's Museum, and the following year he began his long connection with Wallace's Theatre, appearing in "A New Way to Pay Old Debts," "Road to Ruin," "Caste" and "School." His father did not wish him to use the name of Holland until he had proved his ability, and he took the stage name of E. Milton. After thirteen years' discipline at this house, he went to London in 1880-81 with McKee Rankin's company, which was then playing "The Danites," and made a tour

of England, Scotland and Ireland. He became a member of the Madison Square Theatre company in 1882, and during the five years there he appeared as the Tailor in "The Private Secretary"; the Lawyer in "Young Mrs. Winthrop"; Old Rogers in "Esmeralda," and created the parts of Captain Redwood, the detective, in "Jim, the Penman"; Mr. Gardner in "Captain Swift"; Uncle Gregory in "A Pair of Spectacles"; Colonel Moberley in "Alabama," and the title rôle of "Colonel Carter, of Cartersville." In 1895 he and his brother, Joseph, appeared as joint stars at the Garrick Theatre, New York, in "A Man With a Past," and then made a tour of the country in "The Social Highwayman." Since 1897 he has been a member of Charles Frohman's company. Following in his father's footsteps, Mr. Holland adopted the acting of character rôles, and he has become one of the best character actors America has produced. His impersonations stand out clear and individual; they are sharply drawn people, each presenting his appeal to the audience with precision and without the smallest meretricious obtrusion. His Captain Redwood was a revelation of forceful, consistent character drawing, the intonation of his first few phrases telling a life's history; and as Leopold Koltitz in "Hearts are Trumps" (1900), he displayed consummate skill as the scheming villain. He is a member of the Lambs' and Players' clubs, New York city. In September, 1875, he was mar-

ried to Mary E., daughter of Benjamin F. and Annie A. (Smith) Seward, of Southington, Conn., and has one son and one daughter.

FISKE, Samuel, clergyman, soldier and author, was born at Shelburne Falls, Mass., July 23, 1828, son of David and Laura (Severance) Fiske, and a descendant of William Fiske, who came to America in 1637. He was graduated at Amherst College in 1848, and at Andover Theological Seminary in 1851. He was a tutor at Amherst in 1852-55, and then spent two years in travel, visiting Europe, Egypt, Syria and Turkey, and contributing humorous letters to the Springfield "Republican," under the pseudonym Dunn Browne. These letters appeared in book form in 1857, with the title "Dunn Browne Abroad." In the same year he became pastor of the Congregational church, Madison, Conn. In 1862, with a number of his congregation, he enlisted in the 14th Connecticut volunteers, but before leaving for the seat of war was commissioned second lieutenant of company G; in December was promoted to first lieutenant, and in January, 1863, to captain. During the spring and summer of 1863 he was acting assistant inspector general on the staffs of Gen. Carroll and Gen. Alexander Hayes, 3d division, 2d corps. At the battle of Chancellorsville, May 31, he was captured, and was in Libby prison until June, when he was exchanged and returned to camp. At his own request, he again had command of company G; and distinguished himself in several battles; was fatally wounded in the battle of the Wilderness, May 6, 1864, and died at Fredericksburg, Va., May 22d. While in the field he continued his contributions to the Springfield "Republican." These appeared in a volume, "Dunn Browne in the Army," in 1896. He was married at East Charlemont, Mass., Feb. 15, 1859, to Elizabeth Leavitt, daughter of Rev. Aaron Foster, who after his death became the wife of Henry S. Kelsey, of Chicago. Mr. Fiske left two sons, George Foster and Arthur Severance Fiske. The latter, a graduate of Amherst in 1884, and of Hartford Theological Seminary in 1887, took high rank as a scholar, especially in oriental languages; was an able preacher, had rare talent as an artist, and was widely known as an ornithologist, many of his drawings being published by the Smithsonian Institution. He died at Meran, Austria, in 1891.

DYER, Mary, Quaker martyr, came to Boston from England in 1635. She was a conspicuous disciple of Mrs. Hutchinson, and being banished with her husband, William Dyer, took refuge in Rhode Island, where she embraced the tenets of the Quakers. In 1657 she reappeared in Boston. A law for the capital punishment of Quakers who returned to the colony after they had been expelled was enacted in Massachusetts in 1659. Marmaduke Stephenson, of Yorkshire; William Robinson, of London, and Mary Dyer were found guilty under this act and were sentenced to death. After witnessing the execution of her two companions she was relieved on the scaffold and set at liberty on petition of her son on condition of leaving the colony in forty-eight hours. "Moved by the Spirit" she returned again to "the bloody town of Boston" in March, 1660, where she suffered death by hanging, June 1, 1660.

WALKER, Amasa, political economist, was born at Woodstock, Windham co., Conn., May 4, 1799, son of Walter and Priscilla (Carpenter) Walker. The earliest American ancestor in a direct line was Samuel Walker (1614-84), who settled at Reading, Mass., but prior to 1661 removed to Woburn, where he established the first inn, and served as selectman. His great-grandson, Nathaniel (d. 1785), was born in Weston, but removed to Sturbridge, in the same state, during 1748. He was an enterprising and patriotic man, and a carpenter by trade, having

built in Sturbridge a house which in 1872 was still standing in good condition. He was married, March 8, 1731, to Submit Brewer, of Sturbridge. Their son, Phineas, became a resident of Woodstock, Conn., and there carried on the trade of a blacksmith, was prominent in various reforms, a strong temperance advocate, and a humble and devout Christian. He served in the French and Indian war and in the revolution, and died in 1829. Walter Walker (1773-1835), the father of Amasa, was the son of Phineas and Susanna (Hyde) Walker, and was born in Woodstock, Conn., but in 1800 removed to Brookfield, where he died. He was a prominent citizen of the town and a deacon of the second church in Brookfield (later the First Congregational Church of North Brookfield) from 1806 to his death. The son received his early education at the district schools and under the tutelage of the Rev. Dr. Snell, among his fellow pupils being William Cullen Bryant. Although he worked during vacations in stores and on his father's farm, his aim was to prepare for college; but his zeal in study outran his health, and he was compelled to abandon his project. From 1818 to 1820 he alternately taught school and worked on the farm, and in October of the latter year he formed a partnership with one Allen Newell for the purchase of a store in West Brookfield, continuing the business successfully until February, 1823, when he disposed of his interest. For two years following he was the agent for the Methuen Manufacturing Co., and in 1825 founded, with Charles G. Carleton, the firm of Carleton & Walker, of Boston. In 1829 Mr. Walker founded an independent business, and in the same year assisted in the organization of the Boston Lyceum, the earliest institution of the kind in Massachusetts. He was its first secretary, and in 1832 was elected its president. He was active in the movement against Masonry, which culminated in the nomination of William Wirt for the presidency in 1832. In the latter year he was elected a director of the Franklin Bank. He was a director of the Western railroad in 1833-37. About this time he became deeply interested in the cause of temperance, wrote for the press in its aid, and in 1839 was chosen president of the Boston Temperance Society. In 1840 he retired from commercial life, and in 1843 finally took up his residence on his father's estate at North Brookfield. In 1842-48 he delivered an annual course of lectures on political economy at Oberlin College, an institution which had been materially aided by him. In 1843 Mr. Walker was sent as a delegate to the first international peace congress, held in London, of which he was appointed a vice-president, and in 1849 he attended the peace congress in Paris, holding there a similar position. His long cherished anti-slavery convictions led to his taking an active part in the formation of the Free-soil party in 1848, and he was a member of the national convention at Buffalo which placed Van Buren in nomination for the presidency. In the fall of that year he was elected to the state house of representatives, and in the fall of 1849 to the state senate. He carried through a sealed-ballot law and a bill providing that "Webster's Dictionary" should be introduced into the schools of the state. For two years (1851-53) he was secretary of state, being elected by the united Free-soil and Democratic vote, and in 1852 became *ex officio* secretary of the Massachusetts Board of Agriculture. Mr. Walker was a member of the convention for revising the constitution of Massachusetts, and became chairman of the committee on suffrage. In 1853-60 he was one of the examiners in political economy at Harvard, and in 1859-60 lectured annually on that subject at Amherst College. In 1857 Mr. Walker began the publication in "Hunt's Merchants' Magazine" of a series of articles on political economy, and by the time the

financial panic of that year occurred the series had progressed far enough to give his views on money. He was present at a meeting of merchants held in Boston in October, intended to fortify the banks of that city in their determination to maintain specie payments, and declared that those banks could not possibly do that for more than two weeks; if they did not suspend payments at once the failure of the best merchants would follow. Within twelve days every bank in Boston failed, as well as great numbers of the large mercantile houses, and the striking fulfillment of Mr. Walker's prediction brought him into prominence as an authority on finance. He was elected a second time to the state legislature in 1859; took a prominent part in the revision of the laws relating to banking and the issuing of paper money, and served as chairman of a commission appointed to extirpate pleuro-pneumonia among neat-cattle. In 1860 he was a member of the electoral college of the state, of which he became secretary, and cast his vote for Abraham Lincoln. In 1862 he was elected to congress to complete the unexpired term of Goldsmith F. Bailey, and during the session of 1862-63 moved the issue of compound-interest notes in a bill which became a law. Late in 1857 Mr. Walker published a pamphlet on the "Nature and Uses of Money and Mixed Currency," to which he added a "History of the Wickaboug Bank," a work which had a large circulation. His "Science of Wealth; A Manual of Political Economy," passed through eight editions, and was translated into Italian by Prof. Cognetti, of Turin. Jointly with William B. Calhoun and Charles L. Flint he wrote "Transactions of the Agricultural Societies of Massachusetts" (1818-54), a work in seven volumes. His contributions to periodicals and newspapers were numerous. The honorary degree of M. A. was conferred upon him by Middlebury College in 1852, and that of LL. D. by Amherst in 1867. Mr. Walker twice married; first, July 6, 1826, to Emeline, daughter of Deacon Jonathan Carleton, of Boston. She died in 1828 and he was married, second, June 23, 1834, to Hannah, daughter of Stephen and Hannah (Eastman) Ambrose, of Concord, N. H. They had three children, Emeline, Robert Walter and Francis Amasa, the latter noted as a statistician and as president of the Massachusetts Institute of Technology. Both sons entered the Federal army, though their father was opposed to war under any conditions. Mrs. Walker died July 9, 1875, and was followed by her husband Oct. 29th. The success of his life in the face of physical frailty was due to his cheerful and hopeful nature.

KIP, Leonard, author, was born in New York city, Sept. 12, 1826, son of Leonard and Maria (Ingraham) Kip, and brother of Bishop William I. Kip, of California. He was graduated at Trinity College, Hartford, in 1846, after which he went to Albany, N. Y. There he was admitted to the bar and has since resided, with the exception of a visit to California in 1849, by way of Cape Horn. He was engaged in the practice of the law here until his retirement in 1896. He was engaged in literary pursuits from an early age, having begun to write for the press in his seventeenth year. In addition to a large number of tales and sketches in the magazines, he published in book form "California Sketches" (1850); "Volcano Diggings" (1851); "Enone" (1866); "The Dead Marquis" (1873); "Hannibal's Man" (1878); "Under the Bells" (1879); "Nestle-

nook" (1880); "At Colweb and Crusty's" (1881); "Thaloe" (1883); "The Puntacooet Colony" (1887); "Three Pines" (1888), and "A Tale of the Incredible" (1889). In 1885 he was elected president of the Albany Institute, and in 1886 he delivered the address before the Art and Historical Association at the opening of the Albany bi-centennial celebration. He received the degree of L. H. D. from Trinity College in 1893, and that of LL. D. from Hobart College in the same year. He is a member of the Authors' Club and of several other literary and scientific societies. He was married, in 1852, to Harriet L., daughter of John S. Van Rensselaer, of Albany, son of David and Martha (Pomeroy) Whittlesey.

SARGENT, George Frederick, merchant and inventor, was born at Amesbury, Mass., July 14, 1841, son of John Grant and Martha (Bellamy) Sargent, of English descent. After receiving a common school education, he obtained a position as a clerk in a book and news store in Fall River, Mass., in 1852. After three years spent in the dry-goods business, in 1860 he became connected with the wholesale dry-goods business in Boston. Removing to New York city, he started his career as manufacturer in 1878, in which he has won so much success.

Mr. Sargent was one of the first inventors to realize the peculiar mechanical needs of brain workers, and has won the gratitude of many thousands who have profited by the energy-saving devices which he has developed for their use. He has invented about fifty or sixty different styles of rolling chairs and other furniture for invalids, as well as several different reclining and library chairs, rotary book-cases, book-racks, dictionary holders, folio holders, reading stands, reading and writing desks. These were first developed singly, but perceiving that since they were so frequently used together their range of usefulness might be greatly increased by

various combinations. Mr. Sargent organized these various devices into what he calls an "economic system for brain workers." Strangely enough, no other class of workers has been so poorly provided with labor-saving appliances; but with Mr. Sargent's system the use of books has been greatly facilitated, and their storage, too often a difficult problem, has been made practical even for the smallest dwelling. The invalid also has been well provided for by Mr. Sargent's talent; his reclining chairs, back rests and tables for the bed-ridden, his invalid lifts and fracture beds, are all designed to alleviate suffering. He is a typical self-made American—a man with ideas, with sufficient force of character to make them practical, and is undoubtedly the recipient of much silent praise from worker and invalid alike. He is also a musician of no mean ability, and composed (1873), "Tossed by the Tempest"; "Come Home, There is Bread, and to Spare" (1882), and "Hope" (1888), as well as many other hymns and songs. He was married in Boston, Jan. 8, 1863, to Mary Motley, daughter of George Bradish Gavett, of Boston, and has one child, Frederick Leroy Sargent, the botanist and author.

HUNT, Edward Bissell, military engineer, was born at Portage, Livingston co., N. Y., June

15, 1822. His brother, Washington, was governor of New York in 1850-52. After attending a village academy, he entered the U. S. Military Academy, West Point, in 1841, where he took a high position, and in 1845 was graduated, standing second on the roll. In the same year he was appointed second lieutenant in the corps of engineers; in 1846-49 he was assistant professor of engineering at West Point; in 1851 he was assigned to duty in connection with the U. S. coast survey, and in this service continued until 1858, being generally attached to the office at Washington and especially charged with the superintendency of the engraving of the charts. In 1857 he was assigned to duty with the corps of engineers to which he belonged, and was stationed at Key West, Florida, where he remained until 1862, constructing fortifications and lighthouses. He was promoted to a captaincy in July, 1859, and during the early days of the civil war aided in preventing the forts of southern Florida from falling into the hands of the Confederates. While at Key West he devised a submarine projectile designed to enable a ship of war to destroy its antagonist at distances not much less than cannon-shot range in the air. This contrivance he called the sea-miner, and it was his belief that it would revolutionize the science of naval warfare. In 1862 he was chief engineer of the department of the Shenandoah, but in the same year was ordered to New York, and was employed in erecting fortifications on Long Island sound. Besides annual reports of the coast survey, which included papers on various subjects, he prepared an index of all the sketches published by the office in 1844-54, and contributed many articles to the "American Journal of Science" and to the "Transactions" of the American Association for the Advancement of Science. He was married, in October, 1852, to Helen Maria, daughter of Prof. Nathan W. Fiske, of Amherst College, who as "H. H." (Helen Hunt), and, after her second marriage, as Helen Hunt Jackson, was widely known as an author. They had two sons. Hunt was promoted major March 3, 1863. At New York he conducted a series of experiments with a view to test the practicability of his sea-miner and to verify the truth of his anticipations regarding it, employing for this purpose a partially submerged floating water-tight box. On Oct. 2, 1863, through some mistake, the gases evolved after the projectile was expelled from its barrel filled the chamber, and he was first overcome by the fumes, and then fell, suffering concussion of the brain, which resulted in his death.

FROHMAN, Daniel, theatrical manager, was born at Sandusky, O., Aug. 22, 1851, eldest son of Henry and Barbara Frohman. He removed with his parents to New York when quite young, and attended the public schools of the city. At the age of thirteen he was employed in the business office of the New York "Tribune," and having attracted the attention of Mr. Greeley, was made one of his private secretaries. After remaining in the service of the "Tribune" for five years, he entered into an engagement with John Russell Young, who was about to establish the New York "Standard," to become the publisher of that paper. He remained with the "Standard" during its lifetime, a little less than three years, and then became the advertising manager of the "Daily Graphic," adding largely to its volume of business. Ill-health, however, compelled him to give up business, and to seek in travel some measure of relief. He engaged as advertising agent for a theatrical troupe, and found in the occupation recreation from the exacting demands of journalism that greatly benefited his health. Before he could return to his chosen profession, he was offered by J. H. Haverly a five years' engagement as general theatrical agent, and he traveled through the United States, visiting every

"one-night stand" in America. At the end of this engagement, in 1879, he became business manager for Steele Mackaye, who was about to open the Madison Square Theatre, and in less than a year Mr. Haverly again secured his services as local manager of the Fifth Avenue Theatre. The following year he became the director of the Madison Square Theatre, and remained there until 1885, when Mr. Palmer became its lessee and manager. It was through the efforts of Mr. Frohman that "Hazel Kirke" became so popular and as a property so valuable. Other American plays, "Young Mrs. Winthrop," "Esmeralda," "The Rajah" and "May Blossom," were produced and popularized at the Madison Square Theatre during Mr. Frohman's management. From ten to fourteen companies were each season maintained "on the road." He afterwards engaged and managed Modjeska, and in 1886 he became business manager of the Lyceum Theatre, organizing a stock company. The Lyceum became and has remained one of the leading and most popular theatres in the metropolis, its actors being invariably of unquestioned merit, and the plays produced representing the highest order of comedy and drama. Under Mr. Frohman's management, E. H. Sothern, J. K. Hackett and others developed into stars. He also directed the American tours of Mr. and Mrs. Kendal for five years, as well as numerous traveling companies, who presented in all the cities in America the plays so successfully introduced and popularized at the Lyceum. Mr. Frohman is unmarried. His younger brother, Charles Frohman, is also a theatrical manager of prominence.

FROHMAN, Charles, theatrical manager, was born at Sandusky, Erie co., O., in 1858, son of Henry and Barbara Frohman, of Jewish extraction. He was educated at the public schools of his native town, and at the age of eighteen he joined Colender's Georgia colored minstrels, acting as a voyage agent. In the early eighties he went to New York, and became advertising agent for A. M. Palmer. Soon after he started business for himself, taking second-rate companies on the road. He gradually bettered his position until, in the winter of 1895-96, he formed the theatrical syndicate with Nixon & Zimmermann, of Philadelphia; Klaw & Erlanger, of New York; Rich & Harris, of Boston, and Alfred Hayman, of San Francisco, for the purpose of controlling the theatres of the United States. The theatrical syndicate under his direction virtually obtained absolute control over sixty-two theatres in first-class cities and over one hundred and two theatres located in minor cities. Besides, this organization controls four theatres in London, England. Charles Frohman is the producing partner of the syndicate, Klaw & Erlanger book the routes, while the other partners furnish the necessary money and provide the theatres. Mr. Frohman is the personal manager for Maude Adams, John Drew, Annie Russell, William Gillette, Julia Marlowe, Mrs. Leslie Carter, Blanch Bates, and for about twenty-five other theatrical organizations. He is unmarried.

KITCHELL, Aaron, U. S. senator, was born at Hanover, Morris co., N. J., July 10, 1744. He was a blacksmith by trade, and was a warm supporter of the revolution. He was a representative in congress from New Jersey in 1791-93, in 1791-97, and from 1799 to 1801. Mr. Kittchell was a senator in congress from 1805 to 1809, when he resigned. At one time he was a member of the state legislature, and in 1817 was a presidential elector on the Monroe ticket. He died at Hanover, N. J., June 25, 1820.

WALLEY, Samuel H., lawyer and congressman, was born in Boston, Mass., Aug. 31, 1805. He

was fitted for college at Andover Academy and was graduated at Harvard University in 1826, subsequently studying law. He served for twenty years as treasurer of a savings bank in Boston for the benefit of seamen, being also for a long time treasurer of a railroad in Vermont and one in New York. He was a member of the state legislature for eight sessions; speaker of the house for two years, and a representative in congress from 1853 to 1855. On his return from Washington he was the Whig candidate for governor of Massachusetts, but was defeated. He was a bank commissioner in 1858, and in 1859 became president of the Revere Bank, of Boston.

BORDEN, Matthew Chaloner Durfee, merchant, was born at Fall River, Mass., July 18, 1842, son of Richard and Abby W. (Durfee) Borden. He was educated at Phillips Academy, Andover, and was graduated at Yale College in 1861. He entered the employ of a leading dry-goods house in New York. Three years later Mr. Borden was made a partner in the firm of Low, Harriman & Co., of New York. In 1880 he established connections with the commission house of J. S. & E. Wright & Co., now (1901) Bliss, Fabyan & Co., and in 1887 he purchased his brother's interest in the American Printing Co. These mills were started in 1835, and at that time the capacity for production was 2,200 pieces weekly; it is now (1901) about 70,000 pieces per week. In 1889 he erected cloth mills in Fall River, and at the end of three years had built and equipped three large mills for spinning yarn and weaving the same into cloth for printing. The plant was established under the title of the Fall River Iron Works Co. He erected mill No. 4 in 1895. Mr. Borden lives in New York, and is a director of the Manhattan Bank, Lincoln Bank, Lincoln Safe Deposit Co., and the New York Security and Trust Co. He is a trustee and treasurer of the Clinton Hall Association, and governor of the Woman's Hospital in the State of New York. He is a member

M. C. Borden

of the Union League, Metropolitan, Republican, Merchants', Down Town, Players', Riding, New York Yacht, Seawanhaka Yacht, Yale Alumni, South Side, Sportsman's, Whist and Jekyl Island clubs. He is also a member of the New England Association. Mr. Borden was married, in 1865, to Harriet M., daughter of Nathan Durfee, of Fall River, and has had seven children, three of whom are living.

FELT, Dorr Eugene, manufacturer and inventor, was born near Beloit, Rock co., Wis., March 18, 1862, son of Eugene Kincaid and Elizabeth (Morris) Felt, and a descendant of George Felt, who came to this country from Wales in 1629, and settled in Charlestown, Mass. Young Felt received a common school education, and worked on his father's farm until sixteen years of age, when he apprenticed himself to a machinist, with whom he remained three years. Removing to Chicago in 1882, he worked as a journeyman machinist and mechanical draughtsman in various shops for eight years. Possessing an inventive turn of mind, his spare time was occupied in experimenting and devising improvements in various kinds of machinery; among which was an adding machine. A rough wooden model was brought to the attention of his employer, A. B. Lawther, who kindly offered to bear all the expense of its development. At that time Felt had never heard of an adding ma-

chine, or a calculating machine of any kind. A patent was obtained Oct. 11, 1887, and the new machine was called the "Comptometer." Further experiments developed the fact that, besides being simply an adding machine, it could be used for multiplying, dividing, extracting square root, and other forms of intricate calculation, according to rules formulated by Mr. Felt. The success of his invention having been practically demonstrated, he sold a fourth interest to Robert Tarrant, of Chicago, who provided the money to make the necessary special tools to begin the manufacture of the machine,

and who subsequently became a partner in the business of the manufacture and sale of comptometers, the firm being incorporated in 1889 under the name of Felt & Tarrant Manufacturing Co. The comptometer is probably the most successful of all the calculating machines, and is the only one which will add more than one column at a time by the simple touching of keys and nothing more; works rapidly in multiplication and division, and is also susceptible of more operations. It is extensively used by the government and in private establishments where accuracy and quickness in calculations are essential. Mr. Felt has

made a number of other inventions, for which he has secured patents, but the only one developed has been the comptograph, a modification of the comptometer, on which he has taken numerous patents. At the World's Columbian exposition, in 1893, it received the highest award "for the clearness of work, combined with rapidity and accuracy, durability of mechanism, utility and power." On Jan. 15, 1891, Mr. Felt was married to Agnes, daughter of George Washington and Ann Arabella (Rhea) McNulty; they have three children.

HARRIGAN, Edward, comedian and playwright, was born in New York city, Oct. 26, 1845. He received but scanty education, and while still quite young was apprenticed to the trade of ship-caulking. Later he worked his way to San Francisco, where for a time he found employment at his trade. In 1867 he secured an engagement as a singer and dancer at the Bella Union Variety Theatre in that city; later he formed a partnership with an actor, named O'Brien, and they appeared together in specialties with success in various theatres. Upon the death of O'Brien, in 1871, he became the partner of a young variety actor, named Tony Hart. He had, meanwhile, appeared in nearly all of the principal variety theatres of the country, and when he met Hart was filling an engagement as end-man in a minstrel company. In the subsequent performances, in which they jointly appeared, Mr. Harrigan wrote the comedy sketches, and the two soon won a wide popularity. Upon the solicitation of John Stetson, they filled a successful two years' engagement at the Howard Athenaeum in Boston, leaving there to accept an advantageous offer from Tony Pastor to appear at his theatre on the Bowery, in New York city. Leaving Pastor's Messrs. Harrigan and Hart were seen for three years at the Theatre Comique, where they became firmly established as metropolitan favorites. After a brief season on the road, they assumed the management of the Theatre Comique, the fortunes of which were at a low ebb, and soon made it one of the most popular play-houses in New York city. Here were produced

many of the plays which established Mr. Harrigan's reputation as a playwright, and in which he and Mr. Hart created the leading rôles. After several years' profitable seasons at the Theatre Comique, their company also making annual tours of the country, the firm secured control of the Globe Theatre in 1881, and for three seasons the production of the plays written by Mr. Harrigan was continued with undiminished success and profit. In December, 1884, the Globe Theatre was destroyed by fire, and in the following May the firm of Harrigan and Hart was dissolved. Mr. Hart became a star upon his own account, and Mr. Harrigan, after playing for a time at the Fourteenth Street Theatre, produced a number of his plays at the Park Theatre. Later he opened a new theatre on West Thirty-fifth street, New York city, where, with a large and excellent company, he produced many successes until 1890, when he retired. He not only wrote, but staged and played his own pieces. The most successful plays he wrote and produced are: "Mulligan Guard Ball"; the "Guard's Picnic"; "Chowder"; "Surprise"; "Nominée"; "Christmas"; "Mulligan's Silver Wedding"; "Squatter Sovereignty"; "The Major"; "The Grip"; "McSorley's Inflation"; "Cordelia's Aspirations"; "Dan's Tribulation"; "Investigation"; "The Leather Patch"; "Old Lavender"; "The O'Reagans"; "McNooney's Visit"; "McAlister's Legacy"; "Christmas Joys and Sorrows"; "Mordecai Lyons"; "The Law Makers"; "The Doyle Brothers"; "The Blackbird"; "The Muddy Day"; "Pete"; "Waddy Googan," and "Reilly and the 400." Mr. Harrigan found the material for his comedies in a close and careful study of contemporaneous life in the metropolis. As a comedian he was careful and always effective, possessing in abundance the mixture of drollery and pathos which makes the true comedian. Mr. Harrigan resided in New York city after his retirement.

DAKE, Jabez Philander, physician, was born in Johnstown, N. Y., April 22, 1827, son of Dr. Jabez and Sophia (Bowen) Dake. His grandfather, William G. Dake, fought in the revolutionary war, and his father was a soldier in the war of 1812. The family originally came from Hungary, the first of the name landing in Rhode Island in 1639, and the name up to the beginning of the nineteenth century was spelled Deak; but, to make the spelling and Americanized pronunciation correspond, it was changed to Dake. He was educated at the Nunda Academy, Nunda, N. Y.; at Madison University, Hamilton, N. Y., and at Union College, Schenectady, N. Y., where he was graduated in 1849. He then studied medicine in the office of Dr. G. Reichelm, of Pittsburgh, Pa., and the Geneva Medical College, Geneva, N. Y., and after graduation at the Homeopathic Medical College of Pennsylvania, Philadelphia, in 1851, he entered upon the practice of his profession in Pittsburgh, in partnership with his preceptor. He was professor of materia medica and therapeutics at his alma mater (1855-57), but the constantly increasing demands of his practice at Pittsburgh compelled him to resign. In 1863 he relinquished his practice, owing to ill-health, and removed to his farm at Salem, O., where he became largely interested in the cultivation of the grape on the south shore of Lake Erie. Owing to the failing health of his wife, he removed to Nashville, Tenn., in 1869, and resumed practice. For one year (1876) he was

D. E. Felt

J. Dake

professor of the principles and practice of medicine at the Hahnemann Medical College, Philadelphia. He was a constant contributor to the journals of his school of medicine, and was an active worker in the American Institute of Homeopathy (was president in 1857); was associate editor of the "Philadelphia Journal of Homeopathy," the "North American Quarterly," and, with Dr. Hughes, of England, he edited the "Cyclopedia of Drug Pathology." He was the author of works on acute diseases, on therapeutic methods, and many pamphlets on medical subjects. He was a member of the American Public Health Association; the Homoeopathic Medical Society of Mexico; several state and county homoeopathic medical societies; member of the homoeopathic yellow fever commission of 1878, and was president of the Nashville Art Association, which he organized. In his latter years he traveled extensively in Europe. In 1851 he was married to Elizabeth, daughter of Dr. William Church, who survives him with four sons, all physicians: Drs. William C. and Walter M., at Nashville, and Drs. Charles and Frank B., at Hot Springs, Ark. A fifth son died in 1886. In his last years Dr. Dake confined himself to consultations with his two sons, who succeeded to his practice. He died in Nashville, Tenn., Oct. 28, 1894.

DAKE, William Church, physician, was born in Pittsburgh, Pa., Jan. 28, 1852, eldest son of Jabez P. and Elizabeth (Church) Dake. He was educated at Pittsburgh, Pa.; Ypsilanti, Mich., and studied medicine in his father's office. He was graduated at the medical department of the University of Nashville in 1872, and spent the winter of 1872-73 in New York city, attending lectures and clinics in the various hospitals, and was matriculated at the College of Physicians and Surgeons and the New York Homoeopathic Medical College. Returning to Nashville, he entered into partnership with his father. He has been a member of the American Institute of Homeopathy since 1872, and has been president of the Southern Homoeopathic Medical Association, of the Homoeopathic Medical Society of Tennessee, and of the Homoeopathic Medical Society of Middle Tennessee. His literary labors have been chiefly in connection with medical matters. He has contributed to various medical journals and proceedings of the societies of which he is a member. On Aug. 28, 1878, Dr. Dake was married to Adelaide Augusta, daughter of Richard and Rebekah Wiggin, of Janesville, Wis., and has two children, Richard Wiggin and Elizabeth Church Dake.

DAKE, Walter Marshall, physician, was born in Pittsburgh, Pa., Jan. 16, 1855, second son of Dr. Jabez P. and Elizabeth (Church) Dake. His early education was received in the public schools, and later under Dr. Bryce Thompson, of Nashville, Tenn., by whom he was prepared to enter upon a course of medical training. In 1875 he became a student in the Pulte Medical College of Cincinnati, O., and in September, 1876, was matriculated in the Hahnemann Medical College of Philadelphia, where he was graduated in 1877. He began the practice of medicine at Jackson, Tenn., but was called to Nashville in 1878, to enter into partnership with his father and brother, Dr. William C. Dake, practicing physicians in that city. As a member of this prominent firm he has attained considerable distinction. He is a member of the American Institute of Homeopathy; the

Southern Homoeopathic Medical Association, and the Homoeopathic Medical Society of Tennessee. Numerous treatises, contributed by him to medical journals have assisted the progress of medical science. Dr. W. M. Dake has also taken a prominent part in public measures for the educational advancement of his adopted city; is a director of the Howard Library, and has himself collected a private library of several thousand valuable works. He was married, Nov. 8, 1882, to Fanny G., daughter of Samuel M. Ward, of Jefferson, Tex. They have two children, Walter M., Jr., and Woodie Elizabeth.

Walter M. Dake

DAKE, Charles, physician, was born in Pittsburgh, Pa., July 13, 1860, fourth son of Dr. Jabez P. and Elizabeth (Church) Dake. Like his brothers, he determined to enter the medical profession, and was educated to that end, first in the common schools of his native city and of Salem, O., and later in the high school of Nashville, Tenn., where his family settled in 1869. After leaving school he studied for one year at the Southwestern Baptist University, Jackson, Tenn., and in 1879 entered the medical department of the University of Tennessee, where he was graduated in 1881. After practicing his profession for a few months at Hot Springs, Ark., he removed to Louisville, Ky., but returned in 1883 to resume his labors in the locality which he had at first chosen. Here he met with marked success, and established a practice which is national. Dr. Dake is a specialist in chronic diseases, and has from time to time written articles for the medical journals, treating of his chosen specialty. He is a member of various medical associations, among them the American Institute of Homeopathy and the Southern Homoeopathic Medical Association, and is a prominent Mason. Dr. Dake was married, July 29, 1900, to Emily J., third daughter of Col. J. L. Hurley, of Australia, Miss., who was one of the largest and most successful cotton planters in the South.

Charles Dake

DAKE, Frank Borland, physician, was born in Salem, O., Sept. 10, 1864, youngest son of Dr. Jabez P. and Elizabeth (Church) Dake. He removed to Nashville, Tenn., with his parents in 1869, and, like his father and brothers, early decided to study medicine. He was educated in the public schools and the Montgomery Bell Academy at Nashville, and matriculated in the medical department of the University of Tennessee in 1885, from which he was graduated in 1887. The following winter he attended lectures and clinics at the Post-Graduate Medical School of New York city, after which he practiced medicine for a time at Memphis, Tenn., and Chicago, Ill., locating finally at Hot Springs, Ark., and becoming associated with his brother, Dr. Charles Dake. Dr. Dake is a member of the American Institute of Homeopathy; the Southern Homoeopathic Medical Association, and other organizations, is a Mason of high rank, a Knight Templar and Shriner and a member of several social clubs.

Wm. C. Dake

MANN, William D'Alton, soldier, inventor and editor, was born at Sandusky, O., Sept. 27, 1839, son of William R. and Eliza (Ford) Mann, of Puritan descent. After the war of 1812 his father, a native of Pennsylvania, settled in Ohio. William D'A. Mann was educated for the profession of civil engineer, but at the outbreak of the civil war entered the army in the 1st Michigan cavalry as a captain. In 1862 he organized, at Detroit, Mich., the 1st mounted rifles, which afterward became the 5th Michigan cavalry, and Daniel's horse battery. He afterwards, at the request of the governor, organized another cavalry regiment and battery, known as the 7th Michigan cavalry and Gunther's horse battery. These troops became what was known in the army of the Potomac as the Michigan cavalry brigade that had such a reputation under Sheridan. In 1863 and 1864 Col. Mann devised most valuable improvements in the accoutrements for troops, for which he received patents and which were extensively adopted in the U. S. army and in the Austrian army; these returned to Col. Mann a fortune in royalties. After the close of the war he settled in Mobile, Ala., where he was occupied in various industrial enterprises. He was a pioneer in the manufacture of cotton-seed oil, erecting for that purpose the largest mill and refinery then existing. He also became the proprietor of the old Mobile "Register," and for years directed its policy when it

W. D. Mann

was the leading paper of the South. Actively interested in politics, Col. Mann was the first candidate of the Democratic party for Congress from the Mobile district, under "reconstruction," receiving a large majority of the votes, but was counted out by the carpet-bag managers of the reconstruction state government. In 1871 he devised the boudoir car, patented Jan. 9, 1872, the principal feature of which was the division of the car by transverse partitions, and spent the next ten years in introducing that marvelous improvement in facilities of travel throughout

Europe. Returning to this country in 1883, he settled in New York city, and established the Mann Boudoir Car Co. So great was the popularity of the boudoir car, and so prosperous were its makers, that the Pullman Co. found it advisable to buy out the plant and patents of Col. Mann's company. His other inventions are the "vestibule" for cars, patented Jan. 8, 1878, and first applied in England to a train sent to Russia; an improved system of ventilation, and many accessories for cars, most of which are in use by the Pullman and Wagner car companies. In 1891 Col. Mann purchased "Town Topics," and now devotes his entire attention to its management, having made it a most successful journal, with a circulation world-wide wherever English is read. He is a member of several clubs both in this country and in Europe, and is a companion of the Military Order of the Loyal Legion.

TRASK, Spencer, banker, was born in Brooklyn, N. Y., Sept. 18, 1844, son of Alanson and Sarah (Marquand) Trask. He descended from Capt. William Trask, a Puritan who with Endicott and others sailed on the ship *Abigail* from Weymouth, England, June 20, 1628, and formed at Salem the nucleus of the Massachusetts bay colony. He was a deputy of the general court of Salem; was made captain in 1636, and commanded colonial forces against the Pequot Indians. He donated the land

for the first school in New England, which developed later into Harvard College. On his death, in 1666, he was buried with military honors, and it is recorded in the "Annals," of Salem that "he was one of the first military commanders in Massachusetts," and it may be said that what Capt. Standish was to Plymouth, Capt. Trask was to Massachusetts bay colony. The family was prominent throughout the colonial period, and later ancestors of Mr. Trask fought in the revolutionary war. The Marquands are of French (Huguenot) descent. Spencer Trask was educated by private tutors and at the Brooklyn Polytechnic Institute preparatory to entering Princeton College, where he was graduated in 1866. During his connection with the college he was a member of the leading social organizations and of the American Whig Literary Society. The degree of A.M. was conferred upon him in course. He returned to New York to enter the banking business, and soon after became associated with Henry G. Marquand, to whose banking interests he succeeded about 1870. In that year he became a member of the stock exchange, and formed the firm of Trask & Stone. In 1881 the firm became Spencer Trask & Co., a name of wide distinction throughout the banking world, with branches in Philadelphia, Albany, Saratoga and Providence. Mr. Trask has been a director in the Edison Electric Light Co. almost from its beginning, and president of the Edison Illuminating Co., of New York for years. He is a director in the Rio Grande Western railroad, of which one of his partners, George Foster Peabody is vice-president. He is also president and the largest stockholder of the company that owns the Bowling Green building. He is a member of the Union League, Reform, Metropolitan, Grolier and National Arts clubs of New York, and has taken a prominent part in municipal reform and local politics, especially in connection with the national gold Democracy. In 1897 he reorganized the N. Y. "Times," of which he is the largest owner, as well as president of the company. His literary work is limited to editorials contributed occasionally to that paper. Mr. Trask's gifts to Princeton College have been generous, and he has erected at Saratoga, N. Y., St. Christina Home, an undenominational home for children and for the education of girls for domestic service, in which he takes peculiar interest. He is a trustee of the Teachers' College and of St. Stephen's College, and is actively interested in other educational and philanthropic work. He is a communicant of the Protestant Episcopal church, and takes a leading part in church work. His country seat at Saratoga, called "Yaddo," is a handsome stone building surrounded by about five hundred acres of beautifully wooded land. He was married in Brooklyn, in 1874, to Katrina, daughter of George L. Nichols.

TRASK, Katrina (Nichols), author, was born in Brooklyn, N. Y., May 30, 1853, daughter of George L. and Christina (Cole) Nichols, and a descendant of Anneke Jans. Her father is a well-known merchant of New York city. Mrs. Trask has written numerous stories, essays and poems for the magazines, besides her more important published works. The three poems contained in her first book, "Under King Constantine," were written in three days under an intense mental strain. They were then laid away for several years, and when the persuasion of her husband induced Mrs. Trask to consider publishing them, they were subjected to more than a year of continual revision before their author was willing to send them anonymously into the world. The result was an exquisitely finished production, of which a critic has well said: "As nothing in the literature of the woman heart is so great as

the 'Sonnets from the Portuguese,' even so nothing in that literature strikes a loftier note of spiritual loveliness than the love epics of Katrina Trask." Not until the second edition appeared was the name of the writer known. Since then she has published: "Sonnets and Lyrics" (1894); "White Saffin and Homespun" (1896); and "John Leighton, Jr." (1897). She was married, Nov. 12, 1874, to Spencer Trask, the banker.

McMASTER, John Bach, educator and historian, was born in Brooklyn, N. Y., June 29, 1852, son of James and Julia (Bach) McMaster. His father was a banker and planter in New Orleans previous to the outbreak of the civil war. Owing to the events of the war the family removed to New York city, where the son received his early education at the public schools. He was graduated at the College of the City of New York in 1872. He taught grammar in that institution for over a year, and then took up the study of civil engineering, at which he worked for a number of months. In 1872 he began the work of writing his "History of the People of the United States," for which he had been gathering material since 1870. In 1877 he was appointed instructor in civil engineering at Princeton College. He continued to work upon his history, and in 1883 was appointed professor of American history at the University of Pennsylvania, a position which he still holds. This university conferred upon him the degrees of A.M., Ph.D., and Litt.D. The first volume of the "History of the People of the United States" was published in 1883, and had pronounced success. Others were published at varying intervals until now (1900) five volumes of this monumental work have been completed. Of one of the early volumes the New York "Nation" said: "It is our only systematic attempt to obtain a faithful picture of the social conditions of the American people at successive stages of their development; and though such successive photographs cannot be expected to be as successful in the case of a great people as in the case of a horse in motion, the success in this case is certainly beyond any of our past criterions." His statements are generally accepted as accurate, but those in the first volume regarding the state of education in South Carolina during the colonial and revolutionary periods, which he represents as deplorable, have been refuted in Moriwether's "History of Higher Education in South Carolina" (Washington, 1889). In addition to the history and numerous magazines and review articles Prof. McMaster has written: "Bridge and Tunnel Centres" (1876); "High Masonary Dams" (1876); "Benjamin Franklin as a Mau of Letters" (1887); "With the Fathers" (1893); "Origin, Meaning and Application of the Monroe Doctrine" (1895); "A School History of the United States" (1897); and "A Primary School History of the United States" (1893). With F. D. Stone he published "Pennsylvania and the Federal Constitution, 1787-89" (1880).

CAMPBELL, William W., jurist, congressman and author, was born at Cherry Valley, Onezago co., N. Y., June 10, 1806. He was graduated at Union College in 1827, and studied law with Judge Kent, of New York city. In 1831 he began the practice of his profession in that city. In 1841 he was appointed master in chancery, and in 1842 commissioner of bankruptcy for the southern district of New York. As a representative of the national American party he served in congress from 1845 to 1847, and took a prominent part in reforming the consular service. He then spent a year in Europe, and on his return was appointed a justice of the superior court of New York city, holding this position from 1849 to 1855. In 1857 he was elected a judge of the supreme court of the state, for the 6th district, remaining on the bench until 1865. Judge Campbell was the

first jurist to hold, under the statute enlarging the legal rights of married women, that a man could convey an estate directly to his wife without the intervention of a trustee. He published several biographical and historical works: "Annals of Tryon County; or, the Border Warfare of New York" (1831; new eds., 1849 and 1880); "Memoirs of Mrs. Grant, Missionary to Persia" (1840); "Life and Writings of De Witt Clinton" (1849); and "Sketches of Robin Hood and Captain Kidd" (1853). He died at Cherry Valley, Sept. 7, 1881.

LAUFMAN, Philip Harrington, inventor and manufacturer, was born in Strasburg, near Chambersburg, Pa., Feb. 18, 1832, son of David and Susan (Harrington) Laufman. His grandfather, Philip Laufman, was the drummer who beat the tattoo at Yorktown when Cornwallis surrendered. His father was an iron manufacturer and partner of Thomas Chambers, who built the Southampton furnaces near Chambersburg in 1830. Young Laufman was educated in the district schools and academy at Chambersburg. He was engaged in the hardware business until 1876, then he bought the Apollo rolling mills at Apollo, Pa., and began the manufacture of cold rolled sheet iron and steel, under the style of P. H. Laufman & Co. Mr. Laufman has manufactured the largest tin plate sheets in the world, size 30 X 84, at a cost of \$1.50 per box less than the foreign plates. In 1887-91 he was engaged in establishing the tin plate industry to compete with British manufacturers, and to him is due the credit for the proportions to which this has grown in the United States. He is the inventor and manufacturer of high class electro-magnetized sheets, used in dynamos and transformers, the process of which is kept a secret. These are used by the Edison and Westinghouse companies. In the adoption and invention of new methods Mr. Laufman has been the pioneer, and after spending nearly seventy years in the iron business in all its branches, he retired April 1, 1900.

The business was then merged in the new American Steel Sheet Co., under the direct control of the consolidated interests of the sheet manufacturers of the United States. He was a member of the board of education; the select council of Pittsburgh; of the board of water commissioners, building the water-works of Pittsburgh; also a member, and class leader of the Methodist church. On July 13, 1848, he was married to Mary Ann, daughter of Philip Berlin, of Chambersburg, who invented the first sleeping car in the world. As manager of the Cumberland Valley railroad, in 1838, he built special cars with three shelves, two feet wide, on each side, made to fold up against the sides during the day. They have had eight children, six daughters and two sons.

SEWARD, Frederick William, lawyer and legislator, was born in Auburn, N. Y., July 8, 1830, son of Hon. William H. and Frances A. (Miller) Seward. His father was secretary of state under Lincoln. He received his education in the public schools of Auburn and in Union College, Schenectady, where he was graduated in 1849. He studied law with Judges Kent and Davies in New York, and was admitted to the bar in 1851. Having been invited by Thurlow Weed to join the staff of the Albany "Evening Journal," he became associate editor, and sub-

sequently one of the proprietors. He resided in Albany for ten years, where he took part in founding Albany University, and in meetings to organize the Republican party. In 1861 he was sent from Washington to Philadelphia to warn Pres. Lincoln of a plot to assassinate him in Baltimore. He was appointed assistant secretary of state by the president, and continued in that position during the civil war, and the administrations of Pres. Lincoln and Johnson. While having special charge of the consular service, he participated in diplomatic affairs, and during his father's illness or absence was several times appointed acting secretary. He was a member of the council which decided upon the first movement of troops into Virginia; also of that which received Gen. Grant when coming to report the victory at Appomattox, and which decided upon the policy of "reconstruction." On the night of April 14, 1865, when Booth murdered Pres. Lincoln, one of his fellow conspirators attacked and nearly murdered the secretary and assistant secretary of state. The chief diplomatic negotiations of Sec. Seward during Johnson's administration were those for the settlement of the Alabama claims, for the evacuation of Mexico by the French, for

Frederick W. Seward

the purchase of Alaska, for the purchase of the Danish West India islands, for the new treaty with China, and for the Panama canal. In all these Frederick W. Seward participated. He was also sent with Adm. Porter on a special mission to the Dominican Republic, the final outcome of which was the treaty for the annexation of St. Domingo. Retiring from office in 1869, Mr. Seward accompanied his father in his travels across the continent, to Alaska, through Mexico and to the West Indies. In 1874 he was elected to the New York legislature, where he proposed and advocated the constitutional amendments in regard to canals and prisons, and had charge of the bill for the first elevated railroad (Ninth avenue) in New York city. In 1877 he resumed his old place in the department of state, and while there he introduced reforms in the consular service, took part in the negotiations securing a Samoan harbor to the United States, and in those developing commercial and diplomatic relations with Oriental powers. In 1881 he was one of the commissioners in behalf of the state to participate in the Yorktown centennial. In later years he has been engaged in literary work, particularly in continuing and completing the autobiography his father had left, which was published in three volumes in 1891. He lectured on "Diplomacy" at Union College in 1892. His "Journal of a West India Cruise" was published in 1894. Union College conferred upon him the degree of LL.D. in 1878. He is president of Union College Alumni Association and president of the Sagaponack Realty Co. Mr. Seward was married, in 1854, to Anna M. Wharton, of Albany, N. Y.

MacDOWELL, Edward Alexander, musician, was born in New York city, Dec. 18, 1861, son of Thomas and Frances (Knapp) MacDowell. He began his musical studies at an early age, one of his teachers being Teresa Carreño. In 1876 he was taken to Paris by his mother, and at that time showed so much talent for painting that it attracted the attention of a prominent artist, who offered to teach him gratuitously for three years, provided he would give up music. In 1877 he was placed in the Conservatoire, where he studied theory under Savard and

piano under Marmontel; afterwards he studied for a time in the Conservatorium at Stuttgart, and in 1879 settled in Wiesbaden, where he studied composition with Louis Ehrlert. From Wiesbaden MacDowell went to Frankfort-on-the-Main, and entered its Conservatorium, studying composition under Raff and piano under Carl Heymann. Through Raff's influence he became first piano teacher at the Darmstadt Conservatorium, but soon returned to Frankfort, where he gave instruction privately, and applied himself more seriously to composition. In 1882 he visited Weimar to play some compositions before Liszt, and was highly praised by that master, and invited to perform his first suite for piano, op. 10, at the convention of the *Allegemeiner Deutscher Tonkünstler Verein*, held that year in Zurich. Some concert tours followed, in the course of which he played in most of the great cities of Continental Europe, and, except financially, these brought great satisfaction to the pianist. In 1884 he removed to Wiesbaden, where he devoted himself to composition and to giving piano and composition lessons. In the fall of 1888 MacDowell returned to the United States, to live in Boston, where, Nov. 19th, he made his first appearance at a Kniesel quartet concert. On Dec. 17, 1894, he played, on invitation, with the Philharmonic Society, giving his second concerto. On Jan. 23, 1896, the Boston Symphony Orchestra performed his first concerto (composed in 1880) and his Indian Suite. In the same year he was called to New York city to become professor of music in Columbia University. MacDowell's compositions, especially those for orchestra, have met with great favor in Europe, and have been played in all the great centres of musical culture. At Breslau, one of his works was repeated three times in one season. He has produced a large number of compositions representing every department excepting oratorio and opera. These include, for full orchestra: "Hamlet and Ophelia," two poems; "Lancelot and Elaine," symphonic poem; "Lamia," symphonic poem; "The Saracens and Lovely Alda," fragments from the "Song of Roland"; First Suite; "In October," supplement to foregoing, and "Second (Indian) Suite." For piano and orchestra: Concertos in A minor and D minor; for violoncello and orchestra: "Romance"; for two pianos, four hands: Concertos in A minor and D minor; for piano, two hands: arrangements of "Hamlet and Ophelia," "Lancelot and Elaine," and "The Saracens and Lovely Alda"; op. 10, First Modern Suite; op. 14, Second Modern Suite; "Idyls," six pieces; "Twelve Studies"; "Sonata Tragica"; "Twelve Virtuoso Studies"; three sonatas; "Woodland Sketches," and "Sea Pieces"; for piano, four hands, arrangements of "Hamlet and Ophelia," "Lancelot and Elaine," and "The Saracens and Lovely Alda," and First Suite. He has written also a large number of vocal pieces, including songs for male chorus and for mixed chorus.

Mr. MacDowell was married, in 1884, to Marion Griswold, daughter of David Nevins, of Waterford, Conn.

E. MacDowell

CAIN, Richard H., clergyman and congressman, was born in Greenbrier county, Va., April 12, 1825. He was taken to Ohio in 1831 by his parents, who settled in Gallipolis. Though he had received a limited education he began to study for the ministry at an early age, and entered Wilberforce University, at Xenia, O., in 1860. In 1861 he removed to Brooklyn, N. Y., where he discharged ministerial duties for

four years, and in 1865 was sent as a missionary to the freedmen in South Carolina. He engaged in the work of reconstruction, and in 1867 was chosen a member of the constitutional convention of South Carolina. In 1868 he was elected a member of the state senate, and served for two years. He became editor of a newspaper in 1868. In 1875 he was elected to the 43d congress, serving on the committee on agriculture, and was re-elected to the 45th congress. In 1880 he was made bishop by the general conference of the African Methodist Episcopal church, and was sent to Louisiana and Texas to supervise its interests. At Waoo, in the latter state, he organized Paul Quinn College, which was named in honor of W. P. Quinn (1788-1873), an eloquent bishop of his church. He was afterward appointed presiding bishop of the African Methodist Episcopal church, over the conferences of New York, New Jersey, New England and Philadelphia. In 1873 he received the degree of D. D. from Wilberforce University.

LAWRENCE, Albert Gallatin, soldier and diplomat, was born in New York city, April 11, 1836, son of William Beach and Esther R. (Gracie) Lawrence. Through his great-grandfather, Rev. Dr. Abraham Beach (1740-1828), who served for many years as rector of Trinity Church, New York city, he was a descendant of the first white person born in Connecticut. He was educated at the Charter Institute, New York, at the Anglo American Academy, Yevay, Switzerland, and at Harvard University, where he was graduated in 1856. He then pursued a graduate course in the law school of the latter institution, being graduated there in 1858 with the degree of LL. B. After spending a year in the office of David Dudley Field, of New York city, he accompanied the U. S. minister, J. Glancey Jones, to Vienna as an attaché. On his return he enlisted in the Federal army as lieutenant in the 54th New York volunteers, and served as captain on Gen. Stahl's staff from September, 1862, until July, 1863, after which he was active in raising a cavalry regiment in New York, and subsequently in drilling colored troops, receiving a commission as captain of the 2d U. S. colored cavalry in 1864. He was staff officer with Gen. W. H. Smith at Cold Harbor; Gen. Martindale at Petersburg, and Gen. Ames in front of Richmond and at Fort Fisher. Against the latter he led the assault of Jan. 15, 1865, and while planting his flag upon the ramparts, received four wounds, one of which destroyed his arm. For the capture of Fort Fisher he was brevetted lieutenant-colonel, and Gen. Ames wrote of him to the secretary of war as follows: "He has displayed great gallantry, coolness and judgment. So prominent have been these qualities that I have given him charge of commands greater than a regiment in most important movements. In October last, when one of my brigades was to assault the enemy's position near

Richmond, I sent him with it, having more confidence in him than in the brigade commander. At Fort Fisher he led the assault with authority to direct in my name the movements of the leading regiments, and was the first to gain the fort, where he was wounded." The brevet of brigadier-general was received on March 25, 1865. On Oct. 2, 1866, he was appointed minister to Costa Rica, where he served for two years with honor, his recall being made necessary by a duel fought with a Prussian attaché who had cast a slur upon the U. S. government. In 1875 he was sent by Pres. Grant to treat with the Sioux Indians,

meeting a council of over 3,000 warriors, and in 1878 performed a similar commission under Pres. Hayes, investigating the troubles of Sitting Bull and his tribe. He died in New York city, Jan. 1, 1887.

WOOLWORTH, Frank W., merchant, was born at Rodman, Jefferson co., N. Y., April 13, 1852, son of John H. and Fanny (McBrier) Woolworth. His first American ancestor was Richard Woolworth, who emigrated from England about 1650, and settled in Massachusetts. He was brought up on a farm and attended the district school and a commercial college at Watertown, N. Y., where he was graduated in 1872. He then secured a position as clerk in a dry goods store in Watertown, working for the first three months without pay. In 1878 he originated the idea of the five and ten cent store, which under him has attained such marvellous proportions. His employers, Moore & Smith, bought \$50 worth of the cheapest sort of goods and put them with other old shop-worn goods, displaying the sign, "Any article on this counter five cents." The stock was sold the first day, and shortly after Mr. Woolworth decided to have a five and ten cent store of his own. He borrowed \$325, opened a store in Utica, N. Y., and at the end of six weeks had a net profit of \$139.50. In 1879 he removed to Lancaster, Pa., where he opened a store 14 by 35 feet, and within a month he opened another store, at Harrisburg, Pa., of which his brother was manager. The present Lancaster store is in the Woolworth Building, one of the finest business structures in the state of Pennsylvania. He has since opened seventy-five stores, sixty-two of which are in operation at the present time (1901). He has eight large stores in New York city, and employs seven buyers, two of whom operate entirely abroad, and from 2,000 to 6,000 people. His representatives visit Europe every year, and to such proportions has Mr. Woolworth's business grown that several German towns are employed in filling his orders. It is believed that he imports a larger tonnage of toys and tree ornaments than all other buyers in the United States, or nearly one-half the product of the world. He was married, in 1876, to Jennie, daughter of Thomas Crighton, of Pictou, Ont., Canada, and has three daughters.

RICE, Isaac Leopold, lawyer and promoter, was born at Wachenheim, Rhenish Bavaria, Germany, Feb. 2, 1850, son of Mayer and Fanny (Sohn) Rice. In 1856 the family emigrated to Philadelphia, Pa., where the son received his early education in the public schools, the Central High School and from private tutors. At the age of sixteen he began a course of general studies, literature and music in Paris, France, and during the latter part of his stay abroad he was correspondent for the Philadelphia "Evening Bulletin." In 1869, at the age of nineteen, he returned to America and continued studying, always supporting himself by writing and teaching. At the age of twenty-four he wrote a scientific book entitled "What is Music," which was received with enthusiasm by the press and the public, and subsequently appeared in the popular edition of the "Humboldt Library of Science." In 1878 he entered Columbia Law School, where he was graduated in 1880, with prizes in constitutional and international law. During 1882-83 he was lecturer at

the School of Political Science of Columbia University, and in 1884-86 was instructor in the Law School. Meantime he had entered on an active and successful practice, becoming attorney for the Brooklyn Elevated Railroad Co. in 1884. In 1886 he was elected a director of the Richmond Terminal Co., that controlled what is now the Southern Railroad Co., and in 1889 he became chairman of the syndicate formed to purchase the controlling interest in the Philadelphia and Reading railroad, formulating a plan two years later which was substantially adopted when the reorganization of the company was effected in 1891. During 1892 he resided in Europe as foreign representative of the Reading Co. After his return he became largely identified with the Electric Storage Battery Co., of Philadelphia, and in 1897 became its president. In 1896 he organized the Electric Vehicle Co., and was its president in 1897-99, then declining re-election. He is also president of the Electric Boat Co.; of the Holland Submarine Boat Co.; of the Seamans-Halske Electrical Co. of America; of the Electric Launch and Power Co., and is founder of the Electric Ayle Light and Power Co. In 1885 he founded the "Forum," the well-known political and general review of New York city, and has continued president of the corporation to the present time. His own contributions have frequently appeared in its pages as well as in the "Century" and the "North American Review." Mr. Rice is a man of extraordinary gifts, with a mind singularly alert and comprehensive, and has indomitable energy and perseverance. He is an enthusiast on the subject of chess, and is the inventor of a new opening, the "Rice gambit." For several years he was president of the Manhattan Chess Club, and was umpire of all the international games played by cable. In 1899 he donated the trophy to be competed for in the international intercollegiate chess matches which are

Isaac L. Rice

now a feature of student interest. He was married, Dec. 12, 1885, to Julia Hyneman, daughter of the late Nathaniel Barnett, of New Orleans, La. They have six children.

SALISBURY, Edward Elbridge, Oriental scholar, was born in Boston, Mass., April 6, 1814, son of Josiah and Abigail (Breese) Salisbury. The Salisburys are of very ancient stock, the family name being variously written Salisbury, Salesbury Salusbury and Salisbury, which last is probably its oldest form in Great Britain, the family having, as tradition says, come from Salzburg, in the Tyrol. In the seventeenth and eighteenth centuries several of this family are known to have emigrated to America, of whom John Salisbury, of Boston, in 1689, the direct ancestor of the subject of this notice, is believed to have been one, or to have descended from one. As a boy Edward was mostly taught at home by his father, a graduate of Harvard and a man of scholarly tastes and acquisitions, widened by study and foreign travel, who devoted his leisure to the education of his children. He completed his preparation for college at the Latin school in Boston, was graduated at Yale College in 1832, and spent one year in private study and three more in the Theological Seminary at New Haven. In the spring of 1836 Mr. Salisbury went to Europe, remaining abroad between three and four years, and during that time, led by previous Hebrew studies, he entered on wider Oriental research. He studied with De Sacy and Garcin de Tassy in Paris and with Bopp

in Berlin; and when, on the death of De Sacy, his library was sold, improved the opportunity to secure some of its treasures for his native land. In 1841 the president and fellows of Yale College voted that a professorship of the Arabic and Sanscrit languages be established in the college, and Mr. Salisbury was invited "to give such instruction from time to time as may suit his convenience without the expectation of pecuniary compensation. . . ." Accepting this appointment he went again to Europe in 1842, spent a winter in Bonn, reading Sanscrit with Lassen and attending lectures, and studying with Burnout in France. On his return he was inaugurated professor. But in the year 1854 Prof. Salisbury retired in favor of William Dwight Whitney, an old friend and pupil, already widely distinguished for his exhaustive researches in Oriental languages and literature, and made a provision for him as professor of Sanscrit. He afterwards increased this endowment to a full professor's foundation, adding later the gift to the college of his Oriental library, with funds for its increase. His own official connection with Yale ceased in 1856, and in 1857 he visited Europe for the third time. Meanwhile he had become the corresponding secretary of the American Oriental Society, and for seven years labored in that capacity to make its "Journal" the vehicle of some valuable contributions to the world's stock of Oriental knowledge as well as for the general prosperity of the society. On the death of Dr. Edward Robinson, in 1863, he was made president of the society, Prof. Whitney taking his place as corresponding secretary. In 1838 he was elected a member of the Asiatic Society of Paris; in 1839, a member of the Connecticut Academy of Arts and Sciences; in 1848, a fellow of the American Academy of Arts and Sciences of Boston; in 1855, a corresponding member of the Imperial Academy of Sciences and Belles Lettres of Constantinople; in 1859, a corresponding member of the German Oriental Society; and in 1861, a member of the American Antiquarian Society. The degree of LL.D. was conferred on him by Yale College in 1869 and by Harvard in 1886. Besides contributions on Oriental subjects, art and other topics, Prof. Salisbury published (1886) "Family Memorials," relating to his own ancestry and that of his first wife. In 1892, in collaboration with his second wife, he published "Family Histories and Genealogies," relating to her families (7 volumes). In the spring of 1836 he was married to his first cousin, Abigail Salisbury Phillips, of the Phillips family of Massachusetts. His only child, Mary Phillips, was born in Geneva, Switzerland. On Nov. 23, 1871, he was married to Evelyn, daughter of Hon. Charles Johnson McCurdy, of Lyme, Conn., late judge of the supreme court of Connecticut. Prof. Salisbury died in New Haven, Feb. 5, 1901.

HALL, Fitzedward, philologist, was born at Troy, N. Y., March 21, 1825, eldest son of Daniel and Anjnette (Fitch) Hall, and a direct descendant of John Hall, who emigrated from Coventry, England, to New England in 1630, settling at Charlestown, Mass. His grandfather, Lot Hall, born on Cape Cod, served in the navy during the revolutionary war; was married, in 1786, to Mary Homer, of Boston; removed to Westminster, Vt., and was judge of the supreme court of the state in 1794-1801. Fitzedward Hall was graduated at the Rensselaer Polytechnic Institute at Troy in 1842. He then went to Harvard, and while there published various translations from the German but before completing the course he was sent to Calcutta, India, in 1846, in search of a younger brother who had run away to sea, and being obliged to remain longer than he intended, on account of the wrecking of the vessel, took up the study of Hindustani and Persian. He spent three years in Calcutta perfecting himself in

these languages, to which he added Bengali, and then proceeded to Benares, where in February, 1850, he was appointed in the government college to a post which in 1853 was converted into an Anglo-Sanskrit professorship. In 1855 he was transferred to Rajpootana as inspector of public instruction for Ajmere and Mairanra; in December, 1856, was appointed to a like inspectorship for the central provinces, with headquarters at Saugor, and during the Sepoy mutiny did good service with his rifle. In 1862 he established himself in London, but in 1869 removed to Marlesford, Suffolk. He held the professorship of Sanskrit, Hindustani and Indian jurisprudence in King's College until 1879, also holding the librarianship of the India office. In 1864 he became examiner in Hindustani and Hindi in connection with the civil service commissioner; in 1880 was appointed examiner in Sanskrit, and about 1889 in English also, and continued to serve until his death. Notwithstanding his long residence in England he was to the last a sturdy defender of the people and institutions of his native land. To Harvard he bequeathed 1,000 Oriental manuscripts, many of them unique, and an equal number of volumes on special subjects. Oxford University conferred upon him the degree of D.C.L. in 1860 and Harvard the degree of LL.D. in 1896. His principal works are Sanskrit: "The Atmabodha, with its Commentary, and the Tattvabodha" (1852); "The Sankhyapravachana" (1856); "The Suryasiddhanta" and "The Vasavalatta" (1859); "The Sankhyasara" (1862), and "The Dasarupa, with its Commentary, and Four Chapters of Bharata's Nātyasastra" (1865); Hindi: "The Tarkasamgraha," translated into Hindi from the Sanskrit and English (1850), and "The Siddhāntasamgraha" (1855). He also edited Dr. J. R. Ballantynes "Hindi Grammar" (1868), and published a "Reader" (1870) in that language. He was the first American to publish a Sanskrit text (1852). He also discovered several Sanskrit works supposed to have been lost, and a complete copy of the "Brihadlevata," only a fragment of which was previously known to exist. His studies of his mother tongue, begun in boyhood, resulted in a series of volumes showing great erudition, and throwing new light on the subjects of which they treat. These include: "Recent Exemplifications of False Philology" (1872), in which he joined issue with Richard Grant White; "Modern English" (1873); "On English Adjectives in-able, with Special Reference to Reliable" (1877); "Doctor Indoctus" (1880). He sent material to Dr. Worcester for his "Dictionary," some of which appeared in the supplement to that work without public acknowledgment. Prof. Hall was one of the editors of the "New English Dictionary," and contributed thousands of words peculiar to Suffolk to Wright's "Dialect Dictionary," besides aiding generously in the cost of publication. His contributions to the "Journal of the (Bengal) Asiatic Society," the "American Journal of Philology," the "New York Nation" and other periodicals, many of which were signed with his initials only, were very numerous. Prof. Hall was married in Delhi, in 1854, to a daughter of Lieut. Col. Arthur Shuldham, who bore him several children. He died at Marlesford, England, Feb. 8, 1904.

CARR, Dabney S., U. S. minister to Turkey, was born in Albemarle county, Va., March 5, 1802, son of Peter and Hetty (Smith) Carr, and grandson of Dabney Carr, patriot, whose wife was Martha, sister of Thomas Jefferson. His early years were passed in the counting room of his uncle, Gen. Smith, head of the firm of Smith & Buchanan, Baltimore. Subsequently entering the political arena, his influence as editor and proprietor of the Baltimore "Republican and Argus," a Democratic journal which he established in 1827, was so great that Gen. Jackson

was mainly indebted to him for the majority received in Maryland during the presidential canvass. Mr. Carr was rewarded by his appointment as naval officer of the port of Baltimore, which he held from 1829 until 1833, when Pres. Tyler appointed him minister to Turkey. He returned to America in 1850. Mr. Carr was married to Sidney, daughter of Hon. Wilson Cary Nicholas, governor of Virginia, and for many years member of congress from that state. They had five sons and two daughters. His death occurred at the University of Virginia, Charlottesville, March 21, 1854.

RANDALL, Samuel Haskell, lawyer, was born in Boston, Mass., Sept. 22, 1836, son of Henry and Sarah Ann (Ruggles) Randall. His father was a prominent merchant of Boston. He was educated in the Boston schools, taking the Franklin medal and other prizes for scholarship, and between 1851 and 1857 gained a valuable experience in business. He entered the law school of Harvard University in 1857, where he was graduated in 1859. Continuing his studies in the office of Tolman Willey, an able Boston lawyer, he was admitted to the bar in 1860. He removed to New York city, and was admitted to practice in the New York supreme court in 1868, and soon afterwards to the bar of the U.S. circuit court for the southern district of New York. He has had a successful career, and is looked upon as an impressive pleader. While Mr. Randall was in Boston he was a member of that city's school board from 1860-63, and was the youngest man ever occupying that position. For a term of seven years after his removal to New York he served as a school trustee in the 2d ward, and was elected chairman of the local board by his associates. For many terms he was a member of the Republican county committee of the city and county of New York, and has been a delegate to state, senatorial and other conventions, being so well known as an attractive speaker, not only on political, but other subjects, that his services have been in great demand. In 1888 and 1890 he was unanimously nominated for the state assembly in the old 19th district. He is popular in social circles; is a member of the Masonic fraternity; of the West Side Republican club, of which he was one of the founders, and he has been a member of the Arcadian Club, the Palette Club and others. He is a life member of the Harvard Law School Association. He is connected with the Church of Zion and St. Timothy in New York city. Mr. Randall was married, in November, 1865, to Amanda, daughter of Cyrus J. McClellan, of Philadelphia. They have four children. His only son, Harry, is also a member of the bar of the New York supreme court.

BACKUS, Manson Franklin, banker, was born at South Livonia, N. Y., May 11, 1853, son of Clinton T. and Harriet N. (Groesbeck) Backus, and a descendant of William Backus, who settled at Saybrook, Conn., in 1635. His grandfather, John Backus, distinguished himself in the war of 1812. He was graduated at Oakwood Seminary, Union Springs, N. Y., in 1871, and at Central New York Conference Seminary, Cazenovia, N. Y., in 1872. He at once entered the employ of the First National Bank of Union Springs as a clerk, becoming teller in 1874 and cashier in 1875. This position he resigned in January, 1888, when he was elected president of the First National Bank of Auburn, N. Y. Through the dishonesty of the cashier, running back over a

Samuel C. Randall

period of eight years, this bank had been utterly ruined, and ten days after Mr. Backus' election as president, and before he had removed to Auburn, examined into its condition, or assumed any part whatever in its management, it was closed by the comptroller of the currency. In 1889 he removed to Seattle, Wash., where he became one of the organizers of the Washington National Bank of that city, serving as its cashier and chief executive officer until 1897, when he was chosen vice-president. He was made president in March, 1900. This bank has always been conducted on most conservative lines, while its

growth has been phenomenal, its deposits now aggregating three millions of dollars, while its surplus exceeds its capital by eighty per cent. While at Union Springs, Mr. Backus studied law as an accomplishment, and was admitted to the bar at Buffalo in 1888. He early acquired a reputation as a keen financier and business man; was general manager of the Cayuga (Land) Plaster Co., at Union Springs, from 1879 to 1888, during which period the business of the company increased ten-fold. He was appointed postmaster by Pres. Garfield in May, 1881. In 1893 he was appointed by the U. S. circuit court receiver of the Seattle Consolidated Street Railway Co., and also of the Rainier Power and Railway Co., two of the largest corporations in the city. He was a member of the Seattle clearing house committee, which was instrumental in carrying out a failure among its members. In November, 1896, he organized the banking house of Graves & Backus (afterwards Graves, Backus & Purdy), at New Whatcom, Wash., the remarkable success of which is chiefly attributable to his foresight and sound judgment, and is now president of the association. He is a director of the Columbia and Puget Sound Railway Co.; a member of the Rainier and several other clubs, a Republican, a Knight Templar, and a liberal contributor to local charitable movements. He was married, in April, 1873, to Emma C. Yawger, of Union Springs, who died in 1884, leaving a son and a daughter, and was married again, in 1886, to Lue Adams, of King Ferry, N. Y., who died Feb. 12, 1901.

SEWARD, Theodore Frelinghuysen, musician and author, was born at Florida, Orange co., N. Y., Jan. 25, 1835, son of Israel and Mary (Johnson) Seward. He was educated at Seward Institute, and adopted the musical profession. He published a series of religious tune books for choirs, Sunday schools and musical societies. One of these, "The Temple Choir," reached a sale of over 100,000 copies. In 1874-77 he was musical director of the Fisk jubilee singers during their remarkable tour in Great Britain, when they raised several hundred thousand dollars, by which the Fisk Grammar School was transformed into a university. During this tour he made the acquaintance of Mr. Gladstone, Lord Shaftesbury, the Duke of Argyll and many other eminent Britons. He returned to America in 1877, and introduced the tonic sol fa system of reading music, regarded in England as the greatest reform ever made in the history of music. At various times he was editor of the New York "Musical Pioneer," New York "Musical Gazette," "The Tonic Sol Fa Advocate," and "Musical Re-

form," and he was for years professor of music in the Teachers' College in New York city. Being deeply interested in religious questions, he observed, while serving as organist in different churches, that whatever the denominational name all earnest people have the same religious experience—in other words, that they are practically united on essentials, and differ only in that which is external and non-essential. He, therefore, in 1891, suggested the idea of a "Brotherhood of Christian Unity," not a new sect, but as a means of drawing the members of all denominations into closer union. This society has led and still leads to widespread results. Since founding the "Brotherhood" Mr. Seward has abandoned all musical work, and devoted his time entirely to his idea of Christian unity. In 1892 he published two pamphlets, "Hadesian Theology," a satire, and "A Plea for the Christian Year." In 1894 he published his "School of Life: Divine Providence in the Light of Modern Science"; in 1896 "Heaven Every Day; or, Common Sense Christianity," and in 1897 "Don't Worry; or, the Scientific Law of Happiness." This book was the means of starting "Don't Worry Clubs" in various parts of the country, a distinctly religious movement to emphasize the truth of a universal divine providence. He regards his present work (1900) as a culmination of all his previous religious efforts. It is his aim to bring all the churches into accord on a foundation of spiritual monism as expressed by the following postulates: (1) God is the only life. (2) Spirit is the only substance. (3) Love is the only force. (4) Harmony is the only law, and (5) Now is the only time. Mr. Seward believes that the acceptance of these principles by the world would bring mankind spiritually near to the ideal Christ, and would introduce the world to an era of universal unity. His last book, entitled "Spiritual Knowing; or, Bible Sunshine," is an unfolding and application of these five postulates, and an exposition of the spiritual psychology which they embody. He was married, in 1890, to Mary H., daughter of William H. Coggeshall, of New London, Conn., and has had three children.

LLOYD, John Elwyn, clergyman, was born in Wales, near the city of St. Asaph, Nov. 15, 1848, son of Evan and Catherine (Jones) Lloyd. He received his early education in the local grammar school, and at the age of eighteen removed to Liverpool, where he was engaged for two years in Welsh journalism. Coming to America in 1868, he entered Princeton College, where he was graduated in 1874, winning the junior prize oration gold medal of his class. He then studied theology at the Princeton Theological Seminary, and was duly graduated in 1877. After preaching in the Welsh Presbyterian Church, New York city, and the Presbyterian Church of Ryegate, Vt., he was ordained by the presbytery of Boston, on June 5, 1878. In March 1879, he was called to the First Presbyterian Church, Boonville, N. Y., and entered upon his labors there the following July. In 1881 he received a call from the First Presbyterian Church of Nyack-on-the-Hudson; served there for seven years, and in 1888 became pastor of the Twelfth Street Reformed Church, Brooklyn, N. Y., and was installed in October of that year. He found the church heavily burdened with a debt, and somewhat weakened by internal dissensions. In less than three years not only had the membership

greatly increased, but a debt of \$12,000, which for twenty-one years had rested on the church, had been entirely wiped out. Since then until now (1901) the church has gradually grown in strength, and is considered one of the most influential in the metropolis. During his pastorate he has commended himself to the confidence and esteem of his associates in the ministry of all communions, not only by his accurate scholarship and intellectual discrimination, not only by his marked ability as a preacher, combining clear and cogent argument with a fervor of appeal characteristic of his Welsh ancestry and tradition, but also by his urbanity of temper, his elevation of spirit, his thoughtful personal courtesy toward all who meet him. In 1898 Galesville University conferred upon him the degree of Ph.D., and in 1889 that of D.D. He is a member of the Brooklyn Clerical Club, and the Alpha Sigma Club, of New York city. He was married at Stratington, Pa., Aug. 24, 1880, to Anna L., daughter of Hugh L. and Mary (Morgan) Davis. They have two children, Harold Llewelyn and Gwendolen.

BULLARD, Massena, lawyer, was born in Lafayette county, Mo., Oct. 7, 1850, son of William L. and Ann F. Bullard, who removed to Montana in 1864, and settled near Helena in 1865. He attended school in Virginia City until 1866, when he entered the public school at Helena. He began to study law in the office of Woolfolk & Toole in Helena, in 1869, was admitted to the bar in 1871, and at once opened a law office. His business increased rapidly, and he is now attorney for several wealthy corporations, and holds in trust large financial interests. Mr. Bullard is a member and elder of the Christian Church of Helena. For ten years he was secretary and for one year president of the Montana Christian Association, and he was for a long time president of the Montana Bible Society. He has been president of the Montana Bar Association, and for five terms has been city attorney of Helena under both Republican and Democratic rule. He is also very prominent in the fraternity of Odd Fellows in Montana.

For fifteen years he was secretary of Montana Lodge, No. 1. He was elected grand master in 1882 and grand representative in 1892, which latter office he still holds. He has delivered many addresses at dedications, anniversaries and annual services, and is historian of the Past Grand Officers' Association of Montana. He is also a past masterworkman of Capital Lodge No. 1, Ancient Order United Workmen, and a past grand Chief Templar of the Grand Lodge of Good Templars, having been grand secretary of the latter order for twenty years, from 1869 to 1889. He is a past consul of Broadwater Camp, Woodmen of

the World, and a member of the Order of the Pyramids. Mr. Bullard was married, June 3, 1876, to Laura E. Bywaters, by whom he has three children.

CRAVATH, Paul Drennan, lawyer, was born at Berlin Heights, Lorain co., O., July 14, 1861, son of Erastus Milo and Ruth (Jackson) Cravath. His father was a noted Congregational clergyman and first president of Fisk University, Nashville, Tenn. Both his grandfathers, Orin B. Cravath, of Cortland county, N. Y., and Caleb Sharpless Jackson, of Kennett Square, Chester co., Pa., were prominent in the cause of abolition, the former having been a member of the first Republican state convention in

New York. Paul D. Cravath's early education was principally obtained at Martin Academy, at Kennett Square, Pa., and the Polytechnic Institute of Brooklyn. After two years of schooling abroad he entered Oberlin College, where he was graduated in 1882. He then began the study of law, and upon graduation at the Columbia Law School, in 1886, he received the first prize in municipal law, and an appointment as prize instructor for three years. Soon after graduation he entered on the general practice of his profession in New York city, first as junior member of the firm of Carter, Hughes & Cravath, in association with Walter S. Carter and Charles E. Hughes, and after 1891 as senior member of the firm of Cravath & Houston, in association with John W. Houston. The firm's practice is (1901) both large and profitable, covering all branches of the law except criminal cases. Mr. Cravath has been prominently identified with the electrical industry, having been counsel for many years for the Westinghouse Electric Co. and its allied interests. Mr. Cravath is a hard worker, devoted to his profession, and devoid of ambition for all public or elective preferments. He is a Republican in politics, and was a delegate to the Republican state convention in 1898, which nominated Theodore Roosevelt for governor. He is a member

Paul D. Cravath

of the Union League, University and Lawyers' clubs; the New England and Ohio societies, and several other social organizations of New York city. He was married, Nov. 15, 1893, to Agnes Huntington, whose brilliant career as a singer is still fresh in the public mind. They have one child, a daughter, Vera Agnes Huntington Cravath.

BISHOP, William Darius, lawyer, was born at Bloomfield, N. J., Sept. 14, 1827, son of Alfred and Mary Bishop, and a descendant of Rev. John Bishop, second minister of the First Church of Stamford, Conn. He was graduated at Yale College in 1849; studied law and was admitted to the bar, but, owing to the death of his father, who was largely engaged in constructing railroads, he abandoned the practice of law to prosecute his father's enterprises. These involved the construction of the Naugatuck and the New York and New Haven railroads, in Connecticut, and the railroad between Saratoga Springs and Whitehall, in the state of New York. This was followed by the building of the Milwaukee and Chicago and Milwaukee and Watertown railroads, in Wisconsin. In 1855 he became superintendent of the Naugatuck (Conn.) railroad; was afterwards its president, which position he held until 1867, and then was elected president of the New York, New Haven and Hartford railroad, and held that office for twelve years. Mr. Bishop was a member of the 35th congress from the fourth Connecticut congressional district, and was chairman of the committee on manufactures. He was appointed commissioner of patents, at the expiration of his term in the U. S. house of representatives, but resigned that office in January, 1869, that he might devote his energies to his railroad business. Since 1881 he has been president of the executive committee of the Eastern Railroad Association. In 1850 he was married to Julia Ann, daughter of Russell Tomlinson, of Bridgeport, Conn., and has one daughter and four sons. He resides at Bridgeport, Conn.

Massena Bullard

BOWEN, Francis, educator and author, was born in Charlestown, Mass., Sept. 8, 1811, son of Dajah and Elizabeth (Plint) Bowen. His early education was received in the Mayhew Grammar School of Boston, and after several years' employment in a Boston publishing house, he entered Phillips Exeter Academy in January, 1829, and the sophomore class of Harvard College in 1830, graduating in 1833 as first scholar in a class containing such men as Henry Warren Torrey, Joseph Lovering and Jeffries Wyman. He taught two years in Exeter Academy, and then was called to Harvard as tutor in Greek. About this time he wrote the lives of Sir William Phipps, James Otis, Baron Steuben and Benjamin Lincoln, for Sparks' "Library of American Biography," and began to contribute frequently to the journals of the time. Resigning his position at Harvard in 1839, he devoted a year to study and travel in Europe, and returned to Cambridge in 1840, where he spent the following twelve years in literary pursuits. In 1842 he published an edition of "Virgil," and a volume of essays, entitled "Critical Essays on Speculative Philosophy." The following year he became editor and proprietor of the "North American Review," and during the ten years of his control his articles won for the magazine the appreciation of the best class of readers. During six years of this period he also edited and published "The

American Almanac and Repository of Useful Knowledge," and in the winters of 1848 and 1849 delivered two courses of lectures before the Lowell Institute on the application of metaphysical and ethical science to the evidences of religion (published in 1855). He also lectured here in 1850 and 1852. In 1850 Mr. Bowen was appointed to the McLean professorship of history in Harvard College; but, owing to his having taken the unpopular side in his articles on the Hungarian question in the "North American Review," the board of overseers refused to concur with the corporation, and he retained the position only six months. How-

ever, three years later he became Alford professor of natural religion, moral philosophy and civil polity, which office he held until 1889, when he became professor emeritus. In 1853 he published "Behr's Translation of Weber's Outlines of Universal History, Revised and Corrected, with the Addition of a History of the United States." Other important publications then followed: "Documents of the Constitution of England and America from Magna Charta to the Federal Constitution of 1789," compiled and edited, with notes (1854); "Dugald Stewart's Philosophy of the Human Mind," revised and abridged, with critical and explanatory notes (1854); "The Principles of Metaphysics and Ethical Science Applied to the Evidences of Religion" (1855); "The Principles of Political Economy Applied to the Condition and Institutions of the American People" (1856); "The Metaphysics of Sir William Hamilton" (1862); "De Tocqueville's Democracy in America," edited, with notes, etc. (1863); "A Treatise on Logic" (1864); "American Political Economy" (1870); "Modern Philosophy from Descartes to Schopenhauer and Hartman" (1877); "Gleanings from a Literary Life, 1838-1880" (1880), and "A Layman's Study of the English Bible" (1885). In the fields of history, political economy and philosophy his work is deserving of a lasting reputation; his writings exhibit a style remarkable for clearness and force; while as

a teacher his instruction was unbiassed and clear as well as enthusiastic. He was antagonistic to all views colored with Darwinism, and a strong believer in the truths of Christianity, ever throwing his influence in that direction. He was married at Portsmouth, N. H., Nov. 1, 1848, to Arabella, daughter of Charles J. and Eliza (Austin) Stuart. They had one son and two daughters. He died at Cambridge, Mass., Jan. 21, 1890.

SYMMEES, John Cleves, pioneer and jurist, was born at Riverhead, Long Island, N. Y., July 21, 1742. He received a good English education, and in early life was employed in land surveying and school teaching. He served in the revolutionary war, and was a delegate from Delaware to the Continental congress. Removing to New Jersey he became judge of the supreme court and afterwards was chief-justice of the same state. He represented New Jersey in the old congress of 1785 and 1786. In 1787 he applied to congress, in the name of himself and a number of other officers of the New Jersey line who had served in the revolution, for the purchase of a large tract of land in Ohio, afterwards known as the "Miami Purchase," lying between the Little Miami and Great Miami rivers. The original purchase was for 1,000,000 acres, at sixty-six cents an acre; but the contract was not fulfilled, and a new grant was made of 248,000 acres, in September, 1794. Early in 1788 Judge Symmes aided in selecting a site for a city, the present Cincinnati, and in February, 1789, with a colony from New Jersey founded North Bend. In February, 1788, he was appointed one of the judges of the northwest territory. He was married to Anna (1741-76), daughter of Henry Tuthill, of Southold, Long Island. Their daughter, Anna, became the wife of Pres. William Henry Harrison. Judge Symmes' second wife was a daughter of Gov. William Livingston, of New Jersey. He died in Cincinnati, O., Feb. 26, 1814. John Cleves Symmes, author of the "Theory of Concentric Spheres," was his nephew.

SYMMEES, John Cleves, soldier and author, was born in Sussex county, N. J., Nov. 5, 1780. After receiving a common school education he enlisted in the U. S. army at twenty-two years of age; attained the rank of captain, and continued in the service until the close of the war of 1812. On several occasions he displayed great personal bravery, notably at the battle of Niagara and in the sortie from Fort Erie. He settled at Newport, Ky. In 1818 he broached a novel theory of concentric spheres, and devoted the remainder of his life to its promulgation, by writing books, pamphlets, memorials, letters, and by traveling, lecturing, and even petitioning congress. As a man he was greatly respected, particularly in his home; but his theory met with universal ridicule. He held that all planetary bodies, including the earth, are composed of concentric spheres, open at their poles. In one of his numerous memoirs he thus illustrates his conception: "With dividers describe a plane of matter of loose texture, and in the centre add a very small circle; then draw a line through the centre. It is evident (as matter gravitates matter in proportion to quantity and distance) that either half of the inner circle, being almost equally surrounded by matter, must be very little gravitated centrewise; so being suspended, only a rotary motion is needed to throw it compactly toward the outer circle. This being admitted, it follows that half way from the outer to the inner side of this circle of matter thus thrown out, a like rarity, suspension or balance of gravity should prevail, and hence a disposition to concentric circles; therefore, it follows that successive similar subdivisions should exist, gradually lessening in force or quantity. By applying this principle to the earth, I find the necessity of hollow concentric spheres." He saw further

arguments for his theory in the "migrations of animals to and from the Arctic regions," "atmospheric refraction," and the "variation of the compass" observed in high northern latitudes. He believed the interior of the earth to be inhabitable, and he petitioned congress, in 1822 and 1823, to fit out an expedition to test his theory. He was even permitted to lecture before Union College, and in 1826 he published his "Theory of Concentric Spheres," from which the above quotation is taken. He had a son, Americus V. Symmes, who tried to revive the subject. Mr. Symmes died at Hamilton, O., May 29, 1829.

KEARNEY, Belle, temperance lecturer, was born at Vernon, Miss., March 6, 1863, daughter of Walter Guston and Sue (Owens) Kearney. She was educated in her native state, and while still in her teens became a teacher, continuing in this capacity for six years with marked success. In 1889 the Woman's Christian Temperance Union cause aroused her intense interest and allegiance, and she was led to devote her energies to this movement. She was immediately made superintendent of two important departments, and with enthusiasm took her place upon the platform as an advocate of the cause. Two years later she became national organizer and lecturer at the convention of the National Woman's Christian Temperance Union, held in Boston. In 1895 she was elected president of the Mississippi Woman's Christian Temperance Union, but resigned in order to attend the international convention of the Woman's Christian Temperance Union in London, England. While there she was appointed to represent the organization as round-the-world missionary, but declined this position on account of lack of physical strength. While in London she was shown much distinguished attention, speaking six times, often on the platform with noted orators from different nations. She represented the Woman's Christian Temperance Union at the international conference of Christian workers in Grindelwald, Switzerland, and lectured in the Protestant church there. After journeying through England, Scotland, Ireland, Switzerland, France and Italy, Miss Kearney returned to the United States, and has since lectured in every state and territory west of the Rocky mountains, and from Maine to Texas. In 1897 she went from Sitka, Alaska, to old Mexico; in the years prior to that from Canada to Louisiana. She is an ardent advocate of woman suffrage, using her influence both through the press and upon the platform; has served as state president of the Mississippi Woman Suffrage Association, and was prominent at the national convention of the Woman Suffrage Association at Washington, D. C., in the spring of 1898. She is a woman of brilliant intellect, of exceptional oratorical ability; is logical and convincing in her utterances, and has charming, gracious manners. Miss Kearney is regarded as one of the philanthropic leaders of the South, and is a representative of the noblest type of American womanhood. In 1899 she published "A Slaveholder's Daughter." It deals with the South as it was prior to the civil war, the days of reconstruction, the negro problem, the evolution of the Southern woman, and her personal experiences as a society woman, a teacher, traveler, educator, lecturer and reformer.

DAYTON, Amos Cooper, clergyman and author, was born at Plainfield, N. J., Sept. 4, 1813. He was graduated at the New York Medical College in 1834, and soon removed to the South for his health. Originally a Presbyterian, in 1852 he joined the Baptist church at Vicksburg, Miss., and became a minister in that denomination. He was associate editor of the "Tennessee Baptist," and became noted as a controversial writer. Besides his contributions

to periodical literature, he published, "Baptist Facts Versus Methodist Fiction"; "Baptist Question Book" (2 vols.); "Children Brought to Christ"; "Pseudobaptist and Campbellite Immersion: Review of the Arguments of Waller, Fuller, Wayland, Broadhus, and Others"; "Theodora Ernest, or, The Heroine of Faith"; "Ten Days' Travel in Search of the Church" (2 vols.); "The Infidel's Daughter." "Theodora Ernest," which was a denominational novel, had a large circulation. He died at Perry, Ga., June 11, 1865.

WILLIE, Asa Hoxey, jurist, was born near Washington, Wilkes co., Ga., Oct. 11, 1829, son of James and Caroline Emily (Hoxey) Willie. He was educated and lived in Washington until 1846, when, with an elder brother, James, he went to Washington county, Tex. He studied law with this brother, and before coming of age was admitted to the bar by a special act of the legislature. After this he was associated in the firm of Willie, Day & Willie. His brother having been appointed attorney-general of Texas in 1856, and also in the same year elected to the legislature, he assisted him in the duties of the former office, removing to Austin, Tex., in 1857. He later removed to Marshall, Tex., and was associated with his brother-in-law in legal practice, the firm style being Pope & Willie. In 1862 he enlisted

in the Confederate army as commissary under Gen. Gregg as part of Gregg's brigade, and participated in the engagements at Chickamauga, Missionary ridge, Port Hudson, Jackson, etc. After the close of the war he resumed his law practice at Marshall, Tex. In 1867, when only thirty-six years of age, he was elected to the supreme court of Texas. When Gen. Griffin was in command of Texas for reconstruction purposes, Judge Willie removed to Galveston and became associated in the firm of Willie & Cleveland, which connection continued until 1882. In 1872 he was elected to the 43d congress, and was the author of two bills for Galveston harbor, carrying \$160,000. He declined a renomination, although his friends offered to supplement the loss of his practice to the extent of \$150,000 annually. In 1882, by the largest majority ever given any man in the state of Texas for any office, he was elected chief justice, and remained on the bench until March, 1888, when he resigned to resume law practice in the firm of Willie, Mott & Ballinger. In 1891 the firm was changed to Willie & Ballinger, and in 1897, his two sons having been taken into the firm, the style was changed to A. H. Willie & Sons. Judge Willie's charming modesty, lofty character, profound learning and felicitous expression placed him in early manhood among the distinguished lawyers and laymen of Texas; and these characteristics, in the passing of time, were exemplified and emphasized in a life replete with responsibility, distinction and honor. His 500 decisions (found in vols. 28, 30, 58, 70, 8, C. R. of Texas) are models of perspicuity and diction—comprehensive, analytic and clear. He was married, Oct. 20, 1859, at Marshall, Tex., to Bettie, daughter of Capt. Johnson, of Breun, Miss., who was in the war of 1812. They had five children. He died in Galveston, Tex., March 16, 1899.

DE SMET, Peter John, missionary and author, was born at Termonde, Belgium, Dec. 31, 1801. He was educated at a seminary in Mechlin, and wishing to devote himself to missionary work

A. H. Willie

among the American Indians, in 1821 he accompanied Bishop Nerinx to Philadelphia. For two years he abode in a novitiate house of the Jesuits at White marsh, Md., and in 1824 accompanied Bishop Dubourg to Florissant, where he completed his theological studies and was admitted to the priesthood. In 1828 he went to St. Louis, where for many years he was a professor at the University of St. Louis, which he assisted in establishing. In 1838 he was despatched to institute a mission among the Pottawatamie Indians on Sugar creek. In conjunction with Father Verreydt, he built a chapel, huts for the missionaries and a school. His labors among these people were eminently successful, and he had the happiness of seeing almost the whole tribe embrace the Christian faith. In 1840, with the sanction of Bishop Dubourg, he left Westport in the annual caravan of the American Fur Co. to pursue missionary labors among the Flatheads of Oregon. The chief of these Indians, who still retained traditions of the French missionaries who had visited them nearly two hundred years before, accorded him a warm welcome, and for two months he taught among them, translating the Lord's Prayer, the Apostles' Creed and the commandments into the Selksh tongue. He then returned to St. Louis to make preparations for making a permanent mission. Accompanied by Fathers

Point and Mengarini, and with three lay brothers, who were skilled mechanics, he reached the tribe again Aug. 14, 1841. A site was chosen on the Bitter Root river, a chapel and other buildings were erected, and the mission was named St. Mary's. A tribe of Nez Perce Indians sought instruction also, and Father de Smet finding the needs of the work increasing, made a difficult and laborious journey to Fort Vancouver, hoping there to obtain the necessary supplies; instructing the tribes on his route and learning their language. Not obtaining what he desired at Vancouver, he visited St. Louis, and from thence went to Belgium and France, where he roused much

enthusiasm for his work, and sailed from Antwerp in 1843, accompanied by five Jesuits and six sisters of the Congregation of our Lady, who had volunteered to instruct the Flathead children. He obtained a grant of land on the Willamette river, and a convent and other buildings were rapidly erected. Leaving this mission firmly and prosperously established, in 1845 he accomplished a series of missions among the Kootenays and other tribes, and later he several times visited Europe to obtain funds and workers. His influence with the Indians was phenomenally great, and he was able to render great service to the U. S. government in averting Indian wars. He terminated the Sioux war, and induced the Yabamas and other tribes in Oregon to cease hostilities. He was chaplain to the first expedition to Utah, and established missions in that territory. Father de Smet received the Order of Leopold from the king of the Belgians. He enriched the Catholic literature of America; the best known of his published works among those translated into English are: "The Oregon Missions and Travels Over the Rocky Mountains"; "Indian Letters and Sketches"; "New Indian Sketches"; "Western Missions and Missionaries." He died at St. Louis, Mo., in May, 1872.

LEE, William, publisher, was born in Boston, Mass., April 17, 1826, son of John and Laura (Jones)

Lee. His father was from Manchester, England; but on his mother's side his ancestry traces back to several of the colonial families of America. When he was eleven years old his father died, which necessitated his leaving school, and he became apprenticed to Samuel G. Drake, the antiquarian and bookseller; but two years later he renewed his studies and prepared for college. Having decided to continue in the book trade, at the age of eighteen he entered the employ of Phillips, Sampson & Co., where ability and close attention to business procured for him rapid promotion. From the age of twenty-one he received a share of the profits, and in 1850 he was made an equal partner. In 1857 he decided to sell out his share in the business and go abroad; but he did not realize from the sale of his interest, owing to the sudden deaths of both Phillips and Sampson, and he was obliged to return to Boston to help straighten out the company's affairs. In 1860 he purchased an interest in the firm of Crosby, Nichols & Co., and the style of this firm was changed to Crosby, Nichols, Lee & Co. This venture did not prove successful, owing to the outbreak of the civil war and the stringency of the times. In 1861 he withdrew from the firm, and in February, 1862, entered into partnership with Charles Augustus Billings Shepard, who had likewise been brought up in the book business. Mr. Shepard was first employed by John P. Jewett, the publisher of "Uncle Tom's Cabin," and later he was senior member of the firm of Shepard, Clark & Brown. He and Mr. Lee had been intimate friends for many years; they both had a thorough knowledge and a genuine love for their business, and, under the name of Lee & Shepard, they conducted one of the most famous publishing houses of the country. Mr. Lee remained at its head until June, 1898, when he retired from business. Among their earliest publications were the "Bout Series," in six volumes, and the "Riverdale Stories," in twelve volumes, by W. T. Adams (Oliver Optic), at that time a Boston schoolmaster, which were followed by a long series of Oliver Optic's books, over 100 in number, so well known wherever the English language is spoken. The trade of this firm increased until the sales for some years amounted to almost \$1,000,000. He was twice married: first to Anna M., daughter of Thomas Leavitt, of Hampton, N. H. She died in 1883. He was married again, in 1888, to Mrs. Sarah Louise Saunders, daughter of James Wells White, of New York city. He has one daughter, Alice. He is a charter member of the Boston Art Club, the Algonquin and Twentieth Century clubs of Boston.

ROTCH, Arthur, architect, was born in Boston, Mass., May 13, 1850, son of Benjamin Smith and Annie Bigelow (Lawrence) Rotch. His earliest American ancestor was William Rotch, a native of Salisbury, England, and a Quaker, who came to America in 1710, settling at Provincetown, Mass. His son, Joseph, went from Nantucket to Dartmouth, Mass., in 1765, to engage in whale fishing. He purchased land here from Joseph Russell, and named the town Bedford in honor of Russell, who belonged to the family of the duke of Bedford. The prefix New was added subsequently upon learning that there was another Bedford in the state of Massachusetts. Joseph Rotch was married to Love Macy, in 1733, and their son, Francis, was the owner of the Dartmouth, the first vessel built at New Bedford, and one of the vessels from which the tea was thrown into Boston harbor in 1773. The line of descent runs through their son, William, who was married to Elizabeth Barney; through their son, William, who was married to Elizabeth Rodman, and through their son, Joseph, who was married to Ann Smith; these last being the grandparents of

F. de Smet

Arthur Rotch. He was educated at Mr. Dixwell's school, Boston, and after graduating at Harvard College in 1871, he studied architecture for several years at the École des Beaux Arts in Paris. Returning to Boston, he entered into partnership with George T. Tilden in 1880, under the firm name of Rotch & Tilden. Among the prominent buildings constructed during this partnership are the churches of the Messiah, the Ascension and the Holy Spirit, in Boston; the chapels at Andover and Chestnut Hill, Mass.; the public libraries at Bridgewater and Groton, Mass.; the public library at Eastport, Me., and the Art Museum and Art School at Wesley College, besides college gymnasiums, academies, public buildings and private residences in Boston, New York, Washington, Montreal, Lenox, Mass., and Bar Harbor, Me. This firm was the first to revive the colonial style of architecture for modern buildings, which so fully answers the requirements of modern life, and Mr. Rotch was the first to advocate the use of "rough cast," which has now come into general use, and which led to the adoption of "staff" as the material of the Chicago exposition buildings. At various times Mr. Rotch traveled in Europe and studied the architecture of ancient and modern cities, paying particular attention to interior and mural decorations, the effect of this study and investigation being apparent in his work. He early began to paint in water colors, and his pictures have been exhibited at the Paris Salon, London Academy, and in New York, Boston and Philadelphia. He bequeathed to Harvard College \$25,000 for forming a department of architecture; \$40,000 to the Massachusetts Institute of Technology for its department of architecture, and \$25,000 to the Boston Museum of Fine Arts. On Nov. 16, 1892, he was married to Lisette De Wolf Colt. He died at his summer home in Beverly, Mass., Aug. 15, 1894.

WINCHESTER, Oliver Fisher, manufacturer, was born in Boston, Mass., Nov. 20, 1810. He attended school only for a brief period, and at an early age was apprenticed to a carpenter. He worked at his trade in various cities, becoming a master builder before he had attained his majority, and in 1834 engaged in business as a men's furnisher in Baltimore, Md. He prospered, and in 1848 removed to New Haven, Conn., where he established a shirt factory, the first of its kind in the United States, which grew in a few years to large proportions. In

1855 Mr. Winchester became interested in fire-arms, a device invented by Messrs. Smith & Wesson, whose name has since become famous in connection with the manufacture of pistols, known as the Volcanic repeating rifle, was purchased, and a company organized called the Volcanic Repeating Arms Co. This company was not financially successful, and was reorganized in 1857 for the manufacture of other arms besides the Volcanic pistol, and under the name of the New Haven Arms Co. About 1858-59

the New Haven Arms Co. purchased the patent of B. Tyler Henry, covering an invention improving the Volcanic repeating rifle, and the name New Haven Arms Co. was changed by act of the legislature, in 1865, to be the Henry Repeating Arms Co. Some of the Henry guns were sold during the civil war, and were used very effectively with the arms of the Spencer Rifle Co. A number of valuable patents having been

acquired, the name of the Henry Repeating Arms Co. was changed and the assemblage of patented improvements upon the Henry rifle became known as the Winchester rifle, because manufactured by Mr. Winchester. In 1866 the name Winchester Repeating Arms Co. was adopted. About this time Mr. Winchester discontinued his connection with the manufacture of shirts, in which he was largely interested, and gave his entire time to the business of the Winchester Repeating Arms Co. In 1872 the Winchester Co., whose buildings cover an area of two acres in New Haven, began the manufacture of metallic cartridges, and it now has facilities for producing 500,000 a day. Mr. Winchester served as a Republican elector in 1864, and in 1866 was elected lieutenant-governor of Connecticut. The success of the firearms company brought him large wealth, and he gave freely to religious, educational and similar objects, one of his most notable gifts being property, valued at \$100,000, for the foundation of the Yale observatory. His residence and grounds were among the finest in New Haven. His son, Wm. Witt Winchester, lived only two months after the death of his father. Mr. Winchester died at New Haven, Dec. 10, 1880.

KAUFMAN, Abraham Charles, philanthropist and financier, was born at Charleston, S. C., Sept. 10, 1839, son of Rev. Abraham and Anna Dorothea (Faber) Kaufman, of German descent. His father, a native of Carlisle, Pa., was rector of St. Helena Church, Beaufort, S. C., and later assistant to Bishop Gadsden at St. Philip's, Charleston. His mother was a native of Charleston. An uncle, David Spangler Kaufman, was an early settler of Texas; helped in codifying the laws of the republic and of the state, and died, a member of congress, in 1851, at the early age of thirty-seven. Mr. Kaufman was educated in the schools of his native city and at the College of Charleston, where he was graduated in 1860. The degree of A.M. was conferred upon him by his alma mater in 1871. He began active life as a financier, and in a few years established a reputation for enterprise and sound business ability. In 1873 he was one of the projectors of the Spartanburg and Asheville railroad, the trunk line between Charleston and the West, which, in association with Hon. Christopher Gustavus Memminger, ex-secretary of the Confederate States treasury, he carried through to a successful issue. This line has since become a part of the great Southern railway system. For over thirty years Mr. Kaufman has been identified with all the large business enterprises of his native city, and with his reputation as a representative financier he has accumulated a handsome property. He has been equally active in philanthropic movements. In January, 1886, he helped organize the Vanderbilt Benevolent Association of Charleston, named in honor of the late William H. Vanderbilt, which is a potent factor for good in the community. He was also instrumental in securing from the government an appropriation for a soldiers' and sailors' home on the present site of Castle Pinckney, Charleston harbor. Mr. Kaufman is also widely known as a friend of the negro race, and contributed largely to the establishment of a colored hospital in Charleston, of whose advisory board he is still a member. He is a trustee of the College of Charleston, a commissioner of the city public

Ab. Kaufman

schools; a member of the Sons of the Revolution; a charter member of the American National Red Cross, and was appointed by Pres. McKinley one of the board of visitors to the U. S. Military Academy for the year 1900.

DERBY, John Barton, author, was born at Salem, Mass., Nov. 15, 1792. He was half-brother to George Derby (1819-74), the noted sanitarian, and a nephew of Elias Hasket and Elizabeth (Crowninshield) Derby, being a descendant in the fifth generation from Roger and Lucretia (Hilman) Derby, who came from England to Ipswich in 1671. He was graduated at Bowdoin College in 1811; was admitted to the bar, and practiced law at Dedham, Mass. Later in life he held a subordinate position in the Boston custom house. His eccentricities brought him still lower in the social scale, and he became well known as an itinerant vendor of razors and other small articles on State street, Boston, amusing himself at the same time by writing poetry, some of which he published, notably: "Musings of a Recluse" (1837); "The Sea" (1840); "The Village" (1841). He was the father of George Horatio Derby, topographical engineer and the author of the "Squibb Papers." He died in Boston in 1867.

ROGERS, Theodore, banker, was born at Jamaica, L. I., Oct. 10, 1831, son of Alexander and Elizabeth (Platt) Rogers. His earliest American ancestor was Joseph Rogers, who emigrated from England in the Mayflower, in 1620. His paternal grandfather, Zophar Rogers, was a patriot in the war of the revolution. Both of Mr. Rogers' parents died before he was seven years old. He received his early education at Union Hall Academy, Jamaica, and when fifteen years old entered a real-estate office in Brooklyn, N. Y. A few months later he found employment with the silk house of Fisher, Blashfield & Co., of New York city, and he remained with this firm until 1849. In that year he became the assistant of the discount clerk in

the American Exchange Bank, and during the five years he remained with this institution was promoted several times. In 1854-63 he was in the employ of the Union Bank, rising from the position of check clerk to that of assistant receiving teller. In 1863 he was called to the Shoe and Leather Bank, to fill temporarily the place of the second teller. He remained with this bank until 1871, rising in the meantime to the position of paying teller and acting for about a year as certifying teller for the Tenth National Bank, the two institutions then having close business relations. In June, 1871, he became cashier of the Bank of the Metropolis, and in 1894 he was elected president of the bank, which position he still holds. He is a member of the Adline Club of New York city; Jamaica Club, Jamaica, Long Island; the Wyandaneh Club of Smithtown, Long Island; the Bellport Gun Club of Great South Bay, Long Island; Carman's River Fishing Club of Brookhaven, and the New York State Association for the Protection of Game. Mr. Rogers makes his home at Jamaica, L. I.

CHRISTY, William, soldier, merchant and lawyer, was born at Georgetown, Scott co., Ky., Dec. 6, 1791, son of George and Mary (Cave) Christy, the latter a lineal descendant of Rev. William Cave, chaplain to King Charles II. His paternal ancestors

were of Scotch origin, and were among the early settlers of Kentucky. At the age of fourteen William Christy was left an orphan. When war was declared between Great Britain and the United States, in June, 1812, he was studying law; but he hastened to join William H. Harrison's command. He was at once made an aid to Gen. Harrison, and when Fort Meigs was established at the rapids of the Maumee river, in Ohio, he was made acting quartermaster and storekeeper. On May 5, 1813, when Gen. Green Clay's relief forces were approaching the fort, he joined, in spite of Gen. Harrison's orders, a body of 360 men sent out of the fort, under Capt. William Sebree, to capture a British battery. This little body was attacked in the rear by Tecumseh's Indians. The young soldier, at once realizing the situation, called to the men within hearing of his voice to follow him, and led an attack upon the Indians. His little force was slaughtered, but those who pressed forward to the battery were saved from annihilation. When all except one of his companions had fallen dead and he had been twice wounded, he made a bow to Tecumseh, then within twenty paces of him, and started on a desperate run for the main body of the American troops. The Indians poured a cross fire upon him as they followed; but they soon gave up the chase, and the fleet-footed runner reached the American lines in safety. Calling at once for aid, he retraced his steps with a small body of men, and again saved Capt. Sebree's men from a massacre. Thenceforth he was known as the "hero of Fort Meigs." He remained in the army until July, 1816, holding the rank of lieutenant, and then engaged in trade as a tobacco merchant in New Orleans, La. Financial disaster came to him in 1818, through the acts of his partner, and he then renewed his study of law, and was soon admitted to the bar, where he became a leader. In 1823-33 he was a member of the New Orleans board of aldermen. In 1826 he compiled the first digest of the decisions of the supreme court of Louisiana. In 1836 much of his fortune was given in aid of securing the independence of Texas. In 1850-54 he was surveyor of customs at New Orleans. He was a man of benevolence, and to his energy New Orleans owes its asylum for orphans. He was married in New Orleans, in 1818, to Mrs. Katharine P. Cenas, daughter of Christopher and Katharine (Krieder) Baker, of Philadelphia. They had two sons and one daughter. Mrs. Christy died in 1856. Col. Christy died Nov. 7, 1865.

DIX, John Homer, author and physician, was born about 1810. He was graduated at Harvard in 1833, and the Jefferson Medical College in 1836. He settled in the practice of his profession in Boston, making a speciality of aural and ocular diseases, in which he was eminently successful. He, first on this continent, performed the operation of dividing the internal rectus muscle for strabismus—the case being reported in the Boston "Medical and Surgical Journal" of Sept. 30, 1840. He built the Hotel Pelham in Boston (1856-57), which was the first strictly family hotel in America. Dr. Dix published: "Relief of Deafness" (Boston "Medical and Surgical Journal," 1839); "Strabismus" (Philadelphia, 1841); "Morbid Sensibility of the Retina" (Boston, 1849); "Sparkling Eye" ("Virginia Medical and Surgical Journal," 1853); "The Ophthalmoscope and Its Uses"; "A Hitherto Unobserved Result of Darcycystitis" (1854); "Surgical Treatment of Glaucoma" (1862). And he translated from the French of M. Camille Melehiour Gibert: "Changes of the Blood in Disease," of which the "Western Lancet" made the following criticism: "The treatise of M. Gibert is elaborate, and exhibits a very good view of the relation of the blood to the morbid conditions of the system." He died in Boston, Mass., in 1884.

COLBURN, Warren, civil engineer, was born at Waltham, Middlesex co., Mass., Aug. 18, 1821, son of Warren and Temperance C. (Horton) Colburn. His father was a famous mathematician, author of a series of arithmetics and of several advanced mathematical works. He was also a promoter, and served as curator of the Middlesex County Lyceum, which was designed to extend to the public the benefits of lectures, equivalent to the Rindford course at Harvard College. At an early age the subject of this sketch was sent to the public schools in the city of Lowell, where he showed unusual aptitude for

Warren Colburn

learning, particularly in mathematics, his apprehension of that science being almost preternatural. When thirteen years of age he entered the preparatory school of Dr. Muhlenberg, at Flushing, L. I., where he made an excellent record in scholarship. While at this school he attained such proficiency in mathematics that the pastime of his leisure hours was to compose mathematical problems, many of which were so highly esteemed for their originality that a leading scientific journal published them as productions of an intellect of rare promise. His first employment after quitting school was as an

actuary of an insurance company, where he was engaged in the preparation of insurance computations and mathematically tabulated scales; but the impulse of his mind towards civil engineering was so predominant that he relinquished this position and secured a subordinate position with an engineering party on the Fitchburg railway. His mathematical mind and his natural genius for civil engineering soon mastered the rudimentary principles of the profession, and upon concluding his engagement with that company he was appointed assistant engineer of the Cheshire railway, the duties of which he discharged efficiently until the completion of the work in 1849. Mr. Colburn was then—although he had barely attained his twenty-fifth year—appointed chief engineer of the Ashuelot railway, and personally supervised the engineering of this road until it was finished and ready for operating. In 1851 he was appointed chief engineer of the Rochester, Lockport and Niagara Falls railway, including the Lockport and Buffalo railway, and when they were opened for traffic was appointed general manager, performing the duties of that office until both roads were merged into the New York Central. He was elected to the office of chief engineer of the Wabash line in 1853. The difficulties attending the building of this road, with its extensive bridging and expensive structures, as well as those arising from sharp conflicting interests as to its location, he successfully surmounted, his developed judgment and extended experience seeming all sufficient for the solution of every problem. He was appointed vice-president and general manager on the opening of the line, and filled those positions for eleven years in a manner acceptable to the company and with the confidence and esteem of all with whom he had business intercourse. After his withdrawal from the last named line Mr. Colburn was made chief engineer of the Decatur and East St. Louis railway in 1868, supervising its engineering and construction until it was completed, when it was leased to the Wabash line. At this juncture Mr. Colburn, after a professional experience extending over a period of nearly thirty years, permanently withdrew from all direct participation in railway constructions and management.

In 1871 he visited Europe, and remained two years. Soon after his return, in 1875, he accepted a temporary position as commissioner of the joint trunk lines, but his connection with railway affairs thereafter was almost exclusively of an advisory and consulting character. He was often selected by the courts to act as a commissioner and arbitrator in controversies between railway companies, involving questions of construction and engineering, and his conclusions in such cases were so clear, accurate and impartial that they were invariably accepted by contestants and made the judgment of the court. Intellectually Mr. Colburn was an uncommon man. He was an original thinker, and was gifted with a prodigious memory and an acute faculty for discrimination and analysis. His power of abstraction and concentration of thought was such that the processes of his mind towards results seem to have had the quickness of intuition. His knowledge of his profession was unquestionably extensive, practical and profound, the result, no doubt, of well-directed early training and assiduous study and reflection. It was due to this fact that in questions of civil engineering his opinions were so generally esteemed and accepted as of the highest authority. He was married, June 19, 1850, to Lavinia C. Parmelee, of Syracuse, N. Y., and took up his residence at Toledo, O. They had one child, Warren, who died in infancy. Mr. Colburn died at Saratoga Springs, Sept. 15, 1879.

CROCKER, Uriel, printer and publisher, was born at Marblehead, Mass., Sept. 13, 1796, son of Uriel and Mary (James) Crocker, and a descendant of William Crocker, who emigrated to Massachusetts from Devonshire, England, in 1624, and was the ancestor of the numerous Crockers, who, originating on Cape Cod, are now scattered throughout the United States. Uriel Crocker was graduated at the academy at Marblehead in 1811, and began work in Boston as an apprentice in the printing-office of Samuel T. Armstrong. When he was nineteen years old he was made foreman of the printing-office, and three years later he and another apprentice, Osmyn Brewster, were taken into partnership, the agreement being that the printing-office was to be conducted in the name of Crocker & Brewster and that Mr. Armstrong should continue his book-selling business under his own name. After 1825 the entire business of the partners was carried on under the firm name of Crocker & Brewster, Mr. Armstrong, however retaining an interest in the house until 1840. In 1821 a branch was established in New York city, which they sold five years later to Daniel Appleton and Jonathan Leavitt, and following this sale came the foundation of the publishing house of D. Appleton & Sons. In 1826 the stereotype plates, copyrights and book stock were sold to H. O. Houghton & Co., but the partnership continued until Mr. Crocker's death, eleven years later. Mr. Brewster died in 1889, when nearly ninety-two years old. Crocker & Brewster published many important books, including a long list of educational works. In 1820 the firm published "Scott's Family Bible," in six royal octavo volumes. This was the first large work that was stereotyped in this country, and between 20,000 and 30,000 copies were sold. The firm operated the first iron lever printing-press used in Boston, and also the first power press erected in that city. Mr. Crocker published his autobiography in 1869. He was one of the organizers of the Old Colony railroad.

Uriel Crocker

and a director in 1844-50 and in 1863-83; was a director of the Northern (N. H.) railroad, the Concord railroad, the Atlantic and Pacific railroad (its vice-president in 1870-73, and its president in 1874), and of many other railroads and business concerns. He was a leader in the movement for the erection of the Bunker Hill monument, and through his efforts \$10,000 was raised for the fund. He was director of the Bunker Hill Monument Association in 1833-39, and vice-president in 1868-87. Mr. Crocker was a member of several charitable associations, and was also a member of the board of managers of the Boston Dispensary; a trustee of Mount Auburn cemetery; a member of the standing committee of the Old South Society; one of the original incorporators of the Franklin Savings Bank of the City of Boston; an overseer of the Boston House of Correction; a trustee of the Boston Lying-In Hospital, and a member of the Massachusetts Horticultural Society, the New England Historic Genealogical Society and the Bostonian Society. The honorary degree of A.M. was conferred upon him by Dartmouth College in 1866. Mr. Crocker was married, in 1829, to Sarah Kidder, daughter of Elias Haskell, and had three children, Urie Haskell, Sarah Haskell and George Glover Crocker. He died at Cohasset, Mass., July 19, 1887.

WHALLEY, Edward, regicide, was the second son of Richard Whalley, of Kirkton and Scrayton, Notts, by his second wife, Frances, daughter of Sir Henry Cromwell and aunt of the Protector. According to some historians, he became a woollen draper, but about 1642 entered the parliamentary army; it is a certainty that he was a major in Cromwell's regiment of horse in 1643, and distinguished himself at Gainsborough. He was in the engagement at Marston Moor, 1644, and when Cromwell's regiment was divided into two parts, in 1645,

he was placed in command of one as lieutenant-colonel. He was at Naseby, where he displayed great gallantry; besieged Banbury until it capitulated, and began the siege of Worcester which was defended by Col. Henry Washington. Edward Whalley was intrusted with the custody of Charles I. at Hampton Court, and when the king fled he left a letter thanking him for his courtesy. He fought under Fairfax at Maidstone, and took part in the siege of Colchester; attended every sitting but one of the high court of justice at the king's trial, and signed his death warrant. In 1650 he accompanied Cromwell to Scotland as commissary-general of horse, and at Dunbar was wounded and had a horse shot under him. In 1651 he accompanied Cromwell in pursuit of Charles Stuart, and was in the battle of Worcester. He supported the protectorate; sat in Cromwell's second and third parliaments, and in the new house of lords, 1657. In 1655 he was appointed a major-general, and had charge of the counties of Lincoln, Nottingham, Derby, Warwick and Leicester. Whalley took the part of Richard Cromwell against the army, and about that time was deprived of the command of his regiment, probably because he still adhered to the Church of England. At the restoration he was deprived also of large estates, and on Sept. 22, 1660, a reward of £100 was offered for his arrest; but he had taken ship for Boston, Mass., in the spring, in company with William Goffe, who was married to his daughter, Frances. They settled in Cambridge, and for some months they appeared in public freely; visited Boston and neighboring towns, and were everywhere received with assiduous attention. When intelligence came from England of the act of indemnity and that Whalley and Goffe

were among those marked for punishment, the government of Massachusetts bay grew uneasy, and on Feb. 22, 1661, a meeting of the council was held to consult as to their security. Four days later the fugitives left for New Haven, where, in the house of Rev. John Davenport, they remained in hiding. Upon learning of Charles II.'s proclamation for their arrest, three weeks later, and to release Davenport from responsibility, they removed to Milford, and there showed themselves in public; but secretly returned to Davenport's house. In a month's time word was received from Boston that search would be made in earnest, orders having been sent for their apprehension. They, therefore, removed from their hiding place in the cellar of Rev. Mr. Davenport's house to various other places, and finally to a sort of cave formed by a pile of boulders on West rock (called by them Providence hill), near New Haven. This is now known as Judges' cave, and is marked by a tablet. Here they remained almost continuously from May 15th to Aug. 19th, being supplied with food by Richard Sperry, a farmer in the neighborhood, to whose house they repaired in very stormy weather. From this cheerless retreat they went to Milford, where they dwelt for two years, indulging in more freedom, and even conducting the devotions of a few neighbors who came to their chamber. Other towns where they had previously hidden were Guilford, Branford and Derby. New commissioners from the king, with extraordinary powers, being expected in New England, they removed to Hadley, Mass., in September, 1664, and were received into the house of Rev. John Russell. Early in February, 1665, they were joined by another regicide, John Dixwell, who after some years removed to New Haven, where he lived under the name of James Davis. Except for the visits of a few confidential friends, the regicides had no connection with the outside world. They received presents from leading colonists, however, and remittances arrived regularly from England. Whalley was twice married: first, to Judith, daughter of John Duffell, of Rochester, by whom he had sons and daughters; second, to Mary Middleton. He is supposed to have died in 1675, for Goffe, in a letter to his wife, written in 1674, speaks of her father as "a scarce capable of natural discourse." Until recently a stone, inscribed E. W., in the rear of the Centre Congregational Church, New Haven, was supposed to mark his grave; the initials are probably those of Edward Wigglesworth, one of the founders of the town. In the "Pennsylvania Magazine," 1877, Robert P. Robins, of Philadelphia, claims descent from Whalley, and asserts that the regicide died in 1718, in Somerset county, Md., after living in Virginia, where he had been joined by his family. When the house of Rev. Mr. Russell, in Hadley, was demolished toward the end of the eighteenth century the removal of a slab in the cellar discovered human remains of large size, which were supposed to be those of Whalley.

GOFFE, William, regicide, was the fourth son of Rev. Stephen Goffe, a Puritan and the rector of Stanmore, Sussex, England. He was apprenticed in his youth to a London salter; but when he came into public notice was engaged in some commercial pursuit for himself. In 1642 he was imprisoned by the lord mayor for promoting a petition in support of the parliament's claim to the militia. Goffe became a captain in Col. Harley's regiment, parliamentary army, in 1645, and commanded the soldiery when they turned out Barebones' parliament. With his father-in-law, Edward Whalley, he was a member of the court of justice for the trial of Charles I., and a signer of the warrant for his execution; a member of the Protector's second and third parliament, and finally a member of "the other house." In 1649, with ten fellow officers, he received

Edw. Whalley

the degree of M.A. from Oxford. At the battle of Dunbar, Sept. 3, 1650, he commanded Cromwell's regiment, and in the second expurgation of the Long parliament, 1653, rendered service particularly acceptable to the Protector. In 1651 he represented Yarmouth in parliament, and in 1656 represented South ampton, and supported the proposal to offer the crown to Cromwell. As one of the ten major generals appointed in 1655, Goffe held the government of Hampshire, Berkshire and Sussex. His popularity was so great that he was even spoken of as a successor to Cromwell. About the end of May, 1660, in company with Whalley, he departed for New England, not waiting to hear what might be the will of parliament after the restoration in respect to persons circumscribed. His name did not appear on the ship's list, that of Stephenson representing him, and Whalley, without doubt, adopted a similar ruse. The history of the regicides from the time of their arrival until they fled to Hadley, Mass., is related in the biography of Whalley. Letters passed between Goffe and his wife, purporting to be between a mother and son, Walter and Frances Goldsmith. Four, full of pathos, are preserved, and are to be found in the "Collections of the Massachusetts Historical Society," 4th series, Vol. IV. Gov. Hutchinson, in his

W. Goldsmith
 "History of Massachusetts," relates an incident in Goffe's life, his authority being one of Gov. Leverett's descendants. On Sept. 1, 1675, so runs the story, the Indians attacked Hadley, while its inhabitants were at a fast-day service, and the panic-stricken people were unable to rally. Suddenly a venerable man, in uncommon dress, appeared among them, placed himself at the head of those who had arms, repulsed the savages, and then as suddenly disappeared. This mysterious deliverer was believed to be a supernatural being, but was really Goffe, who had left his hiding-place. This story, which rests solely on Hutchinson's statement, has been accepted without question by many historians, including Palfrey and Bryant. Prof. Dexter gives evidence in its favor in "Memoranda Concerning Edward Whalley and William Goffe," in "Papers of the New Haven Historical Society," Vol. II. Walter Scott put it into the mouth of Maj Bridgeforth, in "Peveril of the Peak," and Fenimore Cooper used it in his novel, the "Wept of Wish-ton-Wish." Hon. George Sheldon, the historian of Greenfield, Mass. ("New England Historical and Genealogical Register," Vol. 31), gives an exhaustive account of the rise and growth of the legend concerning Goffe and a fight with Indians at Hadley, and rejects the story, for the following reasons: On the date invariably given, Sept. 1, 1675, the Indians attacked Deerfield, but not Hadley, which was only "alarmed." On June 12, 1676, not a fast day, when the Indians did attack the town, only a small party suffered, having been drawn into an ambuscade, and the inhabitants could not have been thrown into a panic, since there were several hundred soldiers there, with at least two captains. Goffe kept a journal from the time he left Westminster until 1667. This passed into the possession of Gov. Hutchinson, and was destroyed when his house was sacked in 1765. A transcript of entries from May 4th to Sept. 6, 1660, found among the Winthrop papers, was printed in the same volume with the letters already alluded to. Apparently he removed from Hadley to Hartford early in April, 1677. The following year Gov. Andros, of New York, complained to the governor and assistants that Goffe, under the name of Mr. Cooke, was being sheltered in Hartford, naming as the chief offenders Capt. Joseph Bull and his sons. An indignant denial was

returned, but it is believed that Goffe was still secreted in the town and that he died there in 1679. Pres. Stiles, of Yale College, wrote an untrustworthy "History of the Three Judges" (1791), in which he calls attention to a stone, inscribed M. G., near what he supposed to be Whalley's grave on New Haven green. "His fruitful fancy," says a New Haven historian, "saw in the unskillful lettering an attempt to conceal the resting place of William Goffe. The grave beneath it probably contains the ashes of Matthew Gilbert, one of the first planters." Goffe left three daughters in England: Anne, Elizabeth and Frances.

READE, Edwin Godwin, jurist, was born at Mt. Tirzah, Person co., N. C., Nov. 13, 1812, son of Robert R. Reade, who died when the son was very young. In early life he helped to support the family by work on a farm, in a carriage and blacksmith shop, and in a tanyard. At eighteen years of age he started to procure an education, and later entered an academy at Spring Grove, N. C., paying for his own instruction by teaching the younger boys. Instead of entering college he began to read law in 1833, studying the books kindly loaned him by a retired lawyer, and he was licensed to practice in 1835. He at once attained prominence, and his rise at the bar was rapid. In 1856 he was nominated for congress against John Kerr, one of the finest orators in the state, and was elected. In 1863 he was appointed by Gov. Vance Confederate States senator, and in the same year he was elected judge of the supreme court. When all offices were declared vacant in 1865 he was reappointed provisionally by the governor, until the legislature elected him judge of the supreme court. In 1868, when, by the terms of the new constitution, the judges were to be chosen by the people, Judge Reade was nominated by both the Democrats and Republicans, and elected without opposition for a term of ten years. At its close he was elected president of the Raleigh National Bank, then somewhat embarrassed. He speedily redeemed the credit of the bank, and remained its president until his death. He was chosen almost unanimously a delegate to the state convention of 1865, which was called to readjust relations with the Federal government, and was elected its president by acclamation. On taking the chair Judge Reade made a memorable address, beginning, "We are going home," which attracted wide attention. It is said that in his prime he never had a superior as an advocate before a jury. He always spoke with clarity and simplicity. His practice was to allow an opponent to supply defects, correct errors, and do almost anything he desired in fixing up his case before trial; but when the trial commenced and swords were drawn, he said "I threw away the scabbard and fought for a funeral." He was a caustic and trenchant writer, and many of his articles and addresses have been published in pamphlet form. Among notable cases tried by him was the famous Johnston will case, in which the ablest counsel summoned from all parts of the state appeared, and in which was involved the validity of the will of James C. Johnston, disposing of the largest estate in North Carolina. The case was tried below by Chief Justice Merrimon, then upon the superior court bench, and the opinion affirming the judgment on appeal is by Judge Reade. The issue was the sanity of the testator. His first wife was Emily Moore, of the family of Gen. Moore and Bishop Moore. She died in 1871, and he subsequently was married to Mrs. Mary E., widow of

Benjamin J. Parmelee, of Washington, N. C. Judge Reade died in Raleigh, N. C. Oct. 18, 1894.

ATHERTON, Charles Humphrey, lawyer and congressman, was born at Amherst, Hillsboro co., N. H., Aug. 14, 1773, only son of Joshua and Abigail (Goss) Atherton. He was graduated at Harvard in 1784; began the practice of law at Amherst in 1797; quickly rose to eminence; was one of the leaders of the New Hampshire bar at a time when Daniel and Ezekiel Webster, Jeremiah Smith and Jeremiah Mason were in active practice; was register of probate in 1798-1807; served in congress as a Federalist from Dec., 15, 1815, until March 3, 1817, declining a re-election; in 1823, 1828 and 1839 was a representative in the state legislature. He was an early member of the New Hampshire Historical Society, and to its annals contributed several memoirs. The annual address before that body in 1831 was delivered by him, and in this he examined the tenure by which real estate is held and the American policy of sub-dividing land. Mr. Atherton was married at Hampton, N. H., Oct. 30, 1803, to Mary Ann, daughter of Christopher and Sarah (Parker) Toppam. Their only child, Charles Gordon Atherton, was a lawyer and congressman. He died at Amherst, Jan. 8, 1835.

BRUSH, Daniel Harmon, lawyer and soldier, was born at Vergennes, Vt., April 25, 1813, son of Elkanah and Lucretia (Harmon) Brush. His father, a native of Vermont, removed to Illinois in 1820, and settled near Carrollton. He enjoyed few educational advantages; but he was a constant reader, and by this means acquired a wide and varied amount of knowledge. He began active life as a clerk in a small store at Murphysboro, and for ten years (1837-47) held the four offices of county clerk, recorder of deeds, probate judge and circuit clerk of Jackson county. He then engaged in mercantile business at Carbondale, Ill. This village, which he himself founded, has since grown into an important town, the site of the Southern Illinois Normal University and a central railroad junction. After the village had

grown up around the store which he erected he engaged in banking, and so continued until the outbreak of the civil war. During the excitement in the early days of the war Col. Brush gave evidence of the greatest bravery and determination. At this time southern Illinois contained many strong Confederate sympathizers; but, despite threats of personal violence, Col. Brush raised the national flag over his bank, and defied any one to haul it down. His resolute stand did much to change the trend of public opinion in favor of the Federal cause. Later he raised a company, which was mustered into the 18th Illinois infantry as company K, and entered

the U. S. service May 28, 1861. Among other important engagements in which he commanded his company were Fort Donelson and Shiloh, in both of which he was severely wounded. He was repeatedly mentioned for conspicuous gallantry, and steadily promoted to the ranks of major, lieutenant-colonel and colonel, and at the close of the war was made brigadier-general of volunteers. After the return of peace he practiced law at Carbondale, and was largely instrumental in securing the State Normal University for his town. In the practice of law, as in all his other activities, Col. Brush maintained the same uncompromising stand on the principles of right and truth. He frequently refused to defend men whom he knew to be guilty. He was a decided

and uncompromising advocate of any cause he espoused, never being moved by consideration of expediency; but, although this characteristic often made him enemies, he enjoyed the respect of all who knew him. He was twice married: first, in 1841, to Julia M., daughter of Samuel Etherton, of Jackson county, Ill., who died in 1867, leaving three sons and three daughters; second, in 1868, to Elizabeth Parham Bliss, of Brooklyn, N. Y. One of his sons, Charles E. Brush, is one of the leading architects of Chicago. Col. Brush died, as the result of an accident, at Carbondale, Ill., Feb. 10, 1890.

BRUSH, Charles Eliphalet, architect, was born at Carbondale, Ill., March 17, 1855, son of Daniel Harmon and Julia Maria (Etherton) Brush. He was educated in the public schools of his native town and at the Illinois Industrial University (now the University of Illinois), Champaign, where he was graduated in architecture in 1877. He entered on the practice of his profession at Carbondale, and soon after was appointed superintendent of construction for the U. S. Marine Hospital, Cairo, Ill. His services in this capacity were highly efficient, and led to his appointment as architect of the additions to the southern Illinois penitentiary buildings at Chester, Ill. These buildings are models of their kind for convenience and security, and well deserve the reputation of constituting one of the finest penitentiaries in the United States. In 1885 Mr. Brush located at Kansas City, Mo., where he has constructed some of the principal office buildings and dwellings. His skill as a designer and his exceptional ability in combining useful features early raised him to a high place in his profession. After five years' residence in Kansas City, he located in Chicago, and at once entered upon a large and profitable professional practice. In 1885, after a spirited contest, he was appointed architect of the Northern Illinois State Normal School at De Kalb, which on its completion was acknowledged to be one of the best appointed buildings for the purpose ever constructed. Its architectural features have commanded the highest praise. The Lee County court house, at Dixon, Ill., is one of his latest buildings. Mr. Brush is a member of the Masonic fraternity; a member of the first class, by inheritance, of the Military Order of Loyal Legion, and a member of the Illinois Chapter American Institute of Architects. He was married, March 11, 1855, to Ida F., daughter of John C. Flemming, of Fort Wayne, Ind.

GREEN, Alexander Little Page, clergyman and author, was born in Sevier county, Tenn., June 6, 1806. He was educated at an academy, and was ordained to the Methodist ministry at the conference of the Methodist Episcopal church in Tennessee in 1827. After a series of missionary services he was pastor of various congregations. He was a delegate to the general conference from 1832, and in 1844 took a prominent part in the discussions at the general convention of that year, which eventuated in the separation of the southern and northern churches. He acted as one of the commissioners to adjudicate the questions relating to property resulting from the separation of interests. Mr. Page was one of the founders of the Methodist Publishing House at Nashville, Tenn., and chairman of its book committee. He was a trustee of Nashville University and of Vanderbilt University. He was regarded as an authority on subjects pertaining to Indian lore. He

C. E. Brush

D. H. Brush

published "The Church in the Wilderness" (1840), and at the time of his death had in preparation a work on "The Fishes of North America." He died at Nashville, Tenn., July 15, 1874.

EATON, Daniel Cady, botanist, was born at Fort Gratiot, Mich., Sept. 12, 1831, son of Amos Beebe and Mary (Selden) Eaton. His father was a lieutenant in the U. S. army, and later commissary-general of subsistence, and was a son of Amos Eaton, botanist and former principal of the Van Rensselaer Polytechnic Institute. He was educated in New Haven, and entering Yale College in 1853, was graduated in the class of 1857. His strong taste for botany led him to become a pupil of Prof. Gray at Cambridge, and he was graduated in science at Harvard College in 1860. The civil war breaking out soon afterward, he accepted a responsible clerkship in the U. S. commissary's office in New York, where his training in natural history enabled him to become a keen judge of the quality of subsistence stores. In 1864 he was appointed professor of botany in Yale College, and entered upon the duties of his new position the next year, his instruction being given principally in the Sheffield Scientific School. He wrote many papers upon botanical subjects for the scientific journals, and in 1879-80 published an elaborate work, in two quarto volumes, on the "Ferns of North America." He was a member of the chief scientific academies in New Haven, Boston, New York, Philadelphia and Buffalo, as also of several historical and genealogical societies in England and America. He was an attractive and able speaker on scientific subjects, and acquitted himself with ease and fluency in the lecture room. He died in 1895.

MEAD, Edwin Doak, reformer and author, was born at Chesterfield, Cheshire co., N. H., Sept. 29, 1849, son of Bradley and Sarah (Stone) Mead. After working on his father's farm, he became a clerk in the store of his brother-in-law in Chesterfield, where he devoted his leisure time to study and reading, and edited a little monthly magazine, composed of original essays and tales. Among his relatives in the neighboring town of Brattleboro, Vt., were the noted sculptor, Larkin G. Mead, and his sister, who became the wife of William Dean Howells. The latter had much to do with shaping the subsequent career of Edwin Mead, by securing for him a place in the counting-room of Ticknor & Fields, the Boston publishers, where he remained nearly nine years, and where he acquired a practical business knowledge, and also became acquainted with many of Boston's literary men. He went abroad in 1875 to prepare himself for the ministry of the Episcopal church; but after becoming more familiar with New England transcendentalism and English broad church teachings, he withdrew from the church in 1876. During the five years he spent in Europe he devoted much time to study at Oxford, Cambridge and Leipzig, and to work in the British Museum, besides writing a number of articles for American magazines on the "English Broad Churchmen," as well as upon other topics. After his return to America he edited, in 1881, "Faith and Freedom," a collection of sermons by Stopford Brooke; and in the same year was published his first book, "The Philosophy of Carlyle." Three years after this came out his "Martin Luther: A Study of Reformation." He became active in the Free Religious Association and in educational movements, and lectured in the east and west on literary, historical, philosophical and political subjects. He has been since 1883 the director of the famous Old South work in Boston for the education of young people in history and politics, and has prepared the "Old South Leaflets," which have been widely circulated throughout the country. In 1889 Mr. Mead became associate editor with Rev. Edward Everett

Hale of the "New England Magazine." After Mr. Hale's retirement in a year's time, he became chief editor, a position he has since held. He was one of the founders of the Massachusetts Society for Promoting Good Citizenship, and has for several years been its president. He was also one of the founders of the Twentieth Century Club of Boston, and is president of its council. He was the first secretary of the Boston Municipal League. His later publications have related chiefly to political and social reform.

LONGYEAR, John Wesley, jurist, was born at Shandaken, Ulster co., N. Y., Oct. 22, 1820. He was educated at Lima, N. Y., and removing to Mason, Ingham co., Mich., he was admitted to the bar there in 1846. In 1847 he settled at Lansing, Mich., and gradually acquired an extensive practice. He was elected a Republican member of congress in 1862, and served in the 38th and 39th congresses, during both of which he was chairman of the committee on expenditures on public buildings. He was a delegate to the Loyalists' convention in Philadelphia in 1863; a member of the state constitutional convention in Michigan, 1867, and was appointed judge of the U. S. district court of Michigan in May, 1870. His decisions in that capacity, especially those in admiralty and bankruptcy cases, were regarded as very able and judicious and were widely quoted. He died in Detroit, Mich., March 10, 1875.

HILL, William Henry, financier, was born in Boston, Mass., July 14, 1828, son of William Henry and Abbie Fermald (Remick) Hill, and a descendant of Peter Hill, of Plymouth, England, who emigrated in 1633 and settled on Richmond island, near Cape Elizabeth, Me. In 1644 he leased land at Winter Harbor (now Biddeford Pool), and in 1648 was a member of the court of Lyconia. From him the line of descent runs through his son, Roger, who settled at Saco, Me.;

through his son, John, who commanded the fort at Saco during King Philip's war; through his son, Elisha, a physician; through his son, James, a soldier in the revolution, and through his son, James, second, grandfather of the present representative. William H. Hill was educated in the schools of Roxbury, and completed the course in the Roxbury High School in 1855. He began his active life as clerk in the publishing house of Sanborn, Carter & Bazin, and continued in the employ of their successors, Brown, Taggard & Chase. At the age of twenty-one he became a partner in the firm under the style of Chase, Nichols & Hill. He, however, retired from the firm two years later, and began the bookselling and publishing business on his own account, continuing until the spring of 1869. In November of that year he helped organize the banking house of Richardson, Hill & Co., which for nearly half a century has occupied a place among private banking institutions of Boston. One cause of the success of this firm may be traced to the fact that all of the present partners have been connected with it from the beginning, either as members or as clerks; this is certainly a record unique in itself. In addition to the cares of a large and increasing business, Mr. Hill is trustee of several estates, and is president of the Boston and Bangor Steamship Co., established in 1824, ten years after Filton's first steamboat was built; president of the Citizens' Gas Light Co., of Quincy, Mass., and Foster's Wharf Co., of Boston; a director in the American Rubber Co., the Boston Rubber Co., in the First National Bank of Boston, in

the Boston Insurance Co., the Windsor mills, and the Renfrew Manufacturing Co., of Adams, Mass. He is also a member of the Boston chamber of commerce, Stock and Real Estate exchanges, the Bostonian Society, the Bunker Hill Monument Association and several others. Although active in so large a variety of business interests, Mr. Hill enjoys great social popularity, and is a member of numerous clubs, notably the Algonquin, Art, Colonial, Country, Exchange, Tarrantine and others. He was married, Jan. 8, 1863, to Sarah E., daughter of William B. May, of Boston. Of their eleven children, seven sons and one daughter survive.

COGSWELL, Joseph Green, educator and librarian, was born at Ipswich, Essex co., Mass., Sept. 27, 1786, son of Francis and Anstis (Manning) Cogswell. His earliest American ancestor was John Cogswell, who came to America in 1635, and settled at Ipswich. Young Cogswell was educated at Phillips Exeter Academy, Exeter, N. H., and at Harvard College, and, like other young men of studious habits and small means, employed his vacations in teaching school. After graduation, in 1806, he made a trip to India; studied law two years in Boston, and then made another voyage to the Mediterranean. He also visited many European countries, returning to America in 1841. Resuming the study of law in Boston, he was admitted to the bar, and practiced in Belfast, Me., until 1813, when he became

Latin tutor in Harvard University. In 1815 he made another trip to Europe, and spent two years at the University of Göttingen. In 1821 he was appointed librarian and professor of mineralogy and chemistry at Harvard College. In 1823, he, with George Bancroft, the historian, founded a school at Round hill, Northampton, Mass. From 1834 to 1837 he conducted a similar school at Raleigh, N. C., in the latter year locating in New York city, where for five years he edited the New York "Review." He became acquainted with John Jacob Astor, who consulted him regarding his plan to endow a library. In March, 1842, he received the appointment of librarian, and measures were put into operation for the erection of the building. Meanwhile he was authorized to visit the literary centres abroad, to make as complete a collection as possible of the books necessary to meet the demands of advanced students, and for fourteen years this interesting task absorbed all his energy. Four such visits to Europe and many journeys nearer home he made in this service, and the work he accomplished in the "Alphabetical Catalogue," in the "Analytical Catalogue," in the organization of the institution, and the arrangements of the books, even to the mechanical labor of placing them on the shelves, was surprising for a man who had already passed his prime. The scholars of America know what is due to him for it all, and the trustees of the Astor Library more than once placed on record their appreciation of this the culminating work of Mr. Cogswell's life. Mr. Cogswell had a very active mind, with quick perceptions, and a physical organization which found satisfaction in movement

and change. He learned as much by observation as by study. In science and general literature his attainments were rather extensive than profound, but in bibliography his knowledge was thorough, various and exact. Herein he had few equals and no superior. He resigned the office of superintendent of the Astor Library in 1861, and built a home in Cambridge, Mass. Here he prepared a supplementary volume of the "Astor Library Catalogue," which he finished in 1864. He received the degree of L.L.D. from Trinity College in 1842, and from Harvard College in 1863. He was a frequent contributor to the magazines, including "Blackwood," "The North American Review" and "The Monthly Anthology." On April 17, 1812, he was married to Mary F., daughter of John T. Gilman, governor of New Hampshire. She died in 1813. Dr. Cogswell died at Cambridge, Mass., Nov. 26, 1871.

APPLETON, John, jurist, was born at New Ipswich, N. H., July 12, 1804, son of John and Elizabeth (Peabody) Appleton. The Appletons were of knightly rank in the feudal ages, and the family throughout its known history is one not only of long pedigree, but of high standing and reputation. The first American ancestor, Samuel Appleton, a Puritan, was born in Suffolk, England, in 1586, and on May 25, 1636, together with sixty-one others, took the freeman's oath in the colony of Massachusetts. He settled in Ipswich, Mass., where he had a grant of land, of which a large portion is now in the possession of his descendants. John Appleton, who was named for his father, received his early education in the common schools and in the academy of his native town, and was graduated at Bowdoin College in 1822, when only eighteen years of age. He studied law with George F. Farley, of Groton, Mass., and afterwards at Alfred, York co., Me., under the direction of his distinguished relative, Nathan Dane Appleton. After reaching his majority he was admitted to the bar at Amherst, N. H., in 1826. He began the practice of his profession that same year at Dixmont, Penobscot co., Me., but after a few months removed to Sebec, now in Piscataquis county, where he spent six years in that thinly settled and comparatively inaccessible district. In 1832 he removed to Bangor, which he made his permanent home. During his first year of residence in Bangor he entered into a partnership with Elisha H. Allen, under the style of Allen & Appleton, which connection lasted until Mr. Allen's election to congress in 1840. Their practice was large and remunerative, and their ability and energy placed them in the foremost rank of the legal profession. In 1841 Mr. Appleton was appointed reporter of decisions, and his reports demonstrated the cultured ability with which he filled the position. He subsequently formed a partnership with John B. Hill, of Bangor, and after that with his cousin and former pupil, Moses L. Appleton, the latter association lasting until Mr. Appleton was elevated to the supreme judicial bench, which occurred on May 11, 1852. On Oct. 24, 1862, he was appointed chief-justice, to fill a vacancy caused by the retirement of Justice Tenney. He was reappointed in 1869, and again in 1876, each term embracing seven years. The last terminated in September, 1883. Judge Appleton was an indefatigable worker, and most accomplished in legal composition. He originated many statutory alterations in the law of evidence and in other branches of legal jurisprudence. His writings on the rules of evidence were published in the "Jurist," subsequently being collected and given to the public in the form of a "Treatise on Evidence," issued at Philadelphia in 1860. This volume has a high reputation and an extensive circulation. The radical change in the law of evidence, since adopted in nearly every state, is due more to Chief-Justice Ap-

pleton than to any one person. Judge Appleton was longer on the bench, decided more cases, and wrote more decisions than any of his contemporaries in Maine. He was married twice; first, in 1834, to Sarah N. Allen, who died Aug. 12, 1874; and second, March 30, 1876, to Annie V. Greeley. Judge Appleton died in 1891, leaving two sons, Henry A. and F. H. Appleton, who now (1901) reside in Bangor.

GULICK, John Thomas, missionary, author and scientist, was born in Waimoa, Kaula, Hawaiian islands, March 13, 1832, son of Peter Johnson and Fanny Hinckley (Thomas) Gulick. His grand father, John Gulick, was a farmer in New Jersey, descended from Hendrick Gulick, who came to New York from the Netherlands in 1653. His mother, daughter of a farmer of Scotch and English ancestry, was a native of Lebanon, Conn.; his father, born in Freeland, N. J., in 1797, took college and theological courses at Princeton, and was a missionary to the Hawaiian islands in 1827-74. He died in Japan in 1877. Mr. Gulick came to New York in 1853, and after attending its University, entered Williams College, where he was graduated in 1859. For two years, 1859-61, he studied at Union Theological Seminary. During 1862-63 he spent eighteen months in Japan, and sought by correspondence to induce the American Board of Foreign Missions to open a mission in that country. As they were unable to do so at that time, he went to China, having received appointment as their missionary. He was ordained in Canton, Aug. 22, 1861; was married to Miss De La Cour, Sept. 3, 1861; engaged in mission work in Peking in 1864-65; Kalgan, N. China, 1865-75; in Kobe, Japan, 1875-82; Osaka, Japan, 1882-99. The mission station opened by Mr. and Mrs. Gulick in Kalgan was the first regular Protestant work in China which involved the residence of the missionary elsewhere than in close proximity to the foreign consuls or ministers. During their stay in this field they were largely engaged in outstation, evangelistic and medical work, involving extended tours in the saddle. Though the climate of that region is healthful for most persons, the continued exposure was too much for Mr. Gulick, and accordingly after the death of his wife, which occurred in Kobe, Japan, in 1875, he remained in the latter country. His interest in natural history was centered in the problems connected with the origin and distribution of species. In 1872 he published the results of his investigations in "Nature" and in the *Linnean Society's "Journal of Zoology,"* Vol. XI. The article in the latter was brought before the Linnean Society through Wallace, who was interested in the facts, though his interpretation of the same was different from that reached by Mr. Gulick. It was also during this visit in England that he met with Darwin, who gave him great encouragement in his special investigations. From this time Mr. Gulick entered on a more extensive study of the factors of evolution, and in 1887 published "Divergent Evolution Through Cumulative Segregation," and in 1889 "Intensive Segregation" (see *Linnean Society's "Journal of Zoology,"* Vols. XX, and XXIII); also three papers on allied subjects in the "American Journal of Science," January, July and December, 1890; and five letters in "Nature," Vols. XLII, XLIII, XLIV, and LV. The publication of these letters led to correspondence with G. J. Romanes, and in his volume "Darwin and After Darwin" Romanes makes frequent references to Gulick's papers, characterizing them as "of higher value than any other work in the field of Darwinian thought since the date of Darwin's death." Sixteen years after his first furlough from missionary work Mr. Gulick again visited England, and in 1888 made the personal acquaintance of Ro-

names in London. In 1889 he met Prof. Hyatt, of the Boston Society of Natural History, who has since then taken the deepest interest in Gulick's collection of land shells, collected in 1851-52 in the Hawaiian islands. Through Prof. Hyatt's influence, the Museum of the Boston Society of Natural History has come into possession of the fullest set of these shells, and they have been so arranged on a model of the island of Oahu as to show in the most effective and permanent way the light they throw on the problems of evolution. In 1889 Mr. Gulick received the degree of A. M. from Williams College, and the degree of Ph. D. from Adelbert College of the Western Reserve University. In 1880 he was married to Frances A., daughter of Rev. William R. Stevens. Since 1900 he has resided in Oberlin, O., where he is bringing together in a single volume his writings on the factors of organic evolution.

BINGHAM, Edward Franklin, jurist, was born at West Concord, Essex Co., Vt., Aug. 13, 1828, son of Warner and Lucy (Wheeler) Bingham. He is descended from Thomas Bingham, who came from Sheffield, England, and settled in Norwich, Conn., in 1659. He attended the public and select schools of Vermont, including the academy of Peacham. In 1846 he removed to Ohio; studied a short time at Marietta College; read law with his brother, Hon. Harry Bingham, at Littleton, N. H., and afterwards with the late Judge Joseph Miller, at Chillicothe, O. After being admitted to the bar of the supreme court of that state, in May, 1850, he opened a law office at McArthur, and soon built up a large practice. For five years, after 1850, he served as prosecuting attorney of Vinton county. During 1856-57 he was a member of the Ohio legislature. In 1858 he was unanimously nominated by the Democratic party for the office of judge of the court of common pleas for the 2d subdivision of the 7th judicial district, composed of the counties of Vinton, Jackson, Scioto, Pike and Lawrence, but was defeated by a small margin, his party being in the minority. In 1860 he served as delegate from the 11th congressional district of Ohio to the Democratic national convention at Charleston, S. C. Removing to Columbus, O., in January, 1861, he resided in that city until his removal to Washington, D. C., in 1887. In 1868 Judge Bingham became chairman of the state Democratic executive committee, and fulfilled the duties of the office in the important campaign of that year to the great satisfaction of his party. During 1867-71 he was, by election, city solicitor of Columbus, O. During 1863-68 he served as a member of the city board of education, and was re-elected in 1872. In March, 1873, he was elected, without opposition, judge of the court of common pleas of the 5th judicial district, being twice unanimously re-elected, each term being for five years. In 1876 Judge Bingham was a delegate to the Democratic national convention at St. Louis, which nominated Samuel J. Tilden for president. In 1881 he was nominated by the Democratic state convention as a candidate for supreme judge of the state of Ohio, but, with the rest of the ticket, was defeated. On April 25, 1887, he was appointed by Pres. Cleveland chief-justice of the supreme court of the District of Columbia. He has taken foremost rank as lawyer, and on the bench his success has been more pronounced than it was as a

lawyer. Few of his decisions have been reversed by higher courts. Judge Bingham has been twice married: first, Nov. 12, 1850, to Susannah F. Gunning, of Fayette county, O., who died in 1886, leaving two sons and two daughters; and second, Aug. 8, 1888, to Mrs. L. C. Patton, daughter of the late U. S. senator, Allen T. Caperton, of West Virginia.

HICKS, Elias, preacher, was born at North Hempstead, L. I., March 19, 1748, son of John and Martha Hicks, and descendant of John Hicks, who emigrated from England to Long Island in 1641.

At the age of twenty, after a wayward life, he became deeply interested in religion and the principles of the Society of Friends, of which he was a birthright member, and began to exhort with great fervor and eloquence. By the time he was twenty-four Hicks was well known as a preacher in the towns of Long Island. In 1795 he made the first of a number of extensive tours, the last of which was in 1828, and during that period traveled from Canada to the Carolinas and westward to Ohio, supporting himself by his trade, carpentry. Crowds flocked to hear him

wherever he went, especially during the later years of his migrations. He was, it is said, "a person of rough exterior, but of vigorous intellect; and, making no pretensions to style, he reasoned with much force, and addressed himself to the every-day common sense, rather than to the imagination of his auditors." Early in the nineteenth century the soundness of his doctrine was questioned by certain of the society, and about 1817 he began to be opposed. "His religious character was set at naught," says one writer; "the most revolting opinions were attributed to him and the most shocking sentiments were put into his mouth." Hodgson, in his "Society of Friends in the Nineteenth Century," states that Hicks' teachings were in entire accordance with German rationalism, adding: "His supporters asserted that he was persecuted because he stood for the views of the early Friends"; yet when extracts from the writings of Penn and others, of a strongly orthodox character, were published in reply, Hicks denounced this as an attempt to impose a creed. It may be true that he was not directly responsible for the troubles with which the Society of Friends was soon afflicted, but his remarkable influence did much to encourage a spirit of revolt. In 1827 a schism occurred, beginning in Philadelphia and extending to New York, Ohio, Indiana and Maryland; and since that time the parties have been known as Hicksite and Orthodox, though the former appellation, having been given in derision, is not recognized. Struggles, often disgraceful, for the possession of meeting-houses, lands and school funds, followed, those who approved of the doctrines preached by Hicks generally gaining the victory. In 1829 Hicks was disowned as a member by the monthly meeting of Friends in Westbury and Jericho, L. I.; but the most bitter opponent of his theology was compelled to recognize the blamelessness of his life. In the movement which led to the abolition of slavery in New York state in 1827 he took an active part. Among his works are "Observations on Slavery" (1811); "Doctrinal Epistle" (1824); "Extemporaneous Discourses" (1825); "Sermons" (1828); "Journal of the Life and Religious Labors of Elias Hicks" (1828, 3d ed., 1832). "Letters of Elias Hicks" appeared in 1834. He was married at Jericho, Jan. 2, 1771, to Jemima, daughter of Jonathan and

Elizabeth Seaman. She bore him several sons, who died unmarried, and a daughter. Elias Hicks died at Jericho, Feb. 27, 1830.

GRAYDON, William, lawyer and author, was born near Bristol, Bucks co., Pa., Sept. 4, 1759, son of Col. Alexander Graydon, an Irishman who settled in Philadelphia, where he did business as a merchant and ranked high in social circles as a man of talent and spirit. William Graydon was educated at Philadelphia, studied law and was admitted to the bar at Harrisburg in 1786. He was made the first notary public of that city in 1791; was conspicuous as a leader during the "mill dam troubles" of 1794-95, and held several civic offices of more or less prominence. He published "Digest of the Laws of the United States" (1803); "Justice and Constable's Assistant" (1820); "Forms of Conveyancing, and of Practice in the Various Courts and Public Offices" (new ed. by Robert E. Wright, 1845). "We are glad," says "The American Law Register," January, 1853, "to see this favorite book in a new and much improved edition. The previous editions have been for the last forty years the ready and constant guide-book of the professional man, as well as of the citizen, in all cases in which a safe and convenient form-book was needed; and it is only necessary to remark that the labors of Mr. Wright in bringing it down to the present period have been faithfully and judiciously executed." Graydon died at Harrisburg, Pa., Oct. 13, 1840.

OPDYKE, George, merchant and politician, was born at Kingwood, Hunterdon co., N. J., Dec. 7, 1807, son of George and Mary (Stout) Opdyke. His ancestors were among the earliest settlers of New York under the Dutch government; about 1640. Later the family removed to New Jersey. He was brought up on his father's farm until the age of sixteen, when he began to teach school. A few years later he removed to Cleveland, O., but did not remain there long. After a brief time in New Orleans, where he engaged in the clothing trade, he returned to New York city and continued in the dry-goods and clothing business until 1867. He had an interest in the house of W. J. Peake & Co., and the clothing firms of Henry & John Paret and Carhart, Whitford & Co. He was a director in one of the largest banks, president of an insurance company, and senior member of the banking firm of George Opdyke & Co., which was organized in the fall of 1868. His first appearance in politics was as a delegate to the Buffalo convention in 1848, where he served on the committee that framed the Free-soil platform. In 1858 he was elected to the state legislature, and took a prominent part in opposing corrupt schemes for plundering the city. Three years later he was elected mayor of the city of New York, and during his term of office occurred the memorable draft riots. He was a delegate to the national Republican convention in 1860, and was instrumental in the nomination of Abraham Lincoln. He served in the New York constitutional convention (1867-68) and on the New York constitutional commission (1872-75). He was a member of the New York chamber of commerce in 1858-80, serving as its vice-president eight years, from 1867 to 1875. He published a "Treatise on Political Economy" (1851), containing remarkably clear and sound views upon the questions of slavery, paper money and free trade. He also published "Report on the Currency" (1858) and "Official Documents,

Addresses, Etc." (1866). On Sept. 26, 1829, he was married to Elizabeth, daughter of Peter and Keziah (Davis) Stryker, of New Jersey. They left six children. He died in New York city, June 12, 1880.

HILLHOUSE, William, jurist, was born at Montville, New London co., Conn., Aug. 25, 1728, son of Rev. James Hillhouse, who came from Ireland, and settled in New Hampshire in 1719, and became pastor of the second parish of New London, Conn., in 1722. William was admitted to the bar and practiced his profession at New London. He became prominent in political life. He was a member of the state legislature and of the council, and attended 106 sequential semi-annual sessions of the legislature. He was also for a period of forty years judge of the court of common pleas. He served during the revolutionary war as major in the 2d regiment of Connecticut horse, and at the close of the war was elected a member of the Continental congress (1783-86). He maintained his vigor and activity to a great age, retiring from public life in 1808. He died at New London, Conn., Jan. 12, 1816.

FISCHER, Benedickt, merchant and manufacturer, was born at Oberschopfheim, Baden, Germany, March 21, 1810, son of Bernhard and Carolina (—) Fischer. His father was a tax receiver and wheelwright, and young Fischer learned his trade. Coming to New York in 1855, he began his business career in a "curlhair" factory; later becoming salesman for a varnish dealer. He soon became efficient as a salesman; but, with a view to bettering his condition, resigned, and for two years was in the employ of a tea, coffee and spice firm. Having thoroughly learned the business, he decided to engage in it on his own account, and began with a capital of \$32. At the end of a year he owned his own horse and wagon, and had accumulated a few hundred dollars. Mr. Fischer is a pioneer in American tile manufacturing. As early as 1854 he became interested in it through a friend to whom he had advanced money, who had been making experiments in that direction. His friend failed; but Mr. Fischer was convinced that the enterprise could be advanced to a successful state, and accordingly began a series of experiments with two small kilns at Zanesville, O. The industry

being a new one in this country many difficulties were encountered, and large amounts of money were spent before tiles could be manufactured that would compare successfully with foreign products. This end accomplished, Mr. Fischer organized the American Encaustic Tiling Co., Ltd.; was elected its president, and still (1901) holds office. The business is now international. In 1893 the company completed an immense factory, to employ 600 hands, and this was formally opened by Pres. McKinley in the presence of 20,000 people. Mr. Fischer also is interested

in real estate and in other matters in New York city, and is vice-president of the Mautser Manufacturing Co. His only son, William H., is at the head of the office department of B. Fischer & Co. Mr. Fischer's chief recreation is travel, and he has visited the greater part of the civilized world. He is a member of the Arion, Liederkrantz and Colonial clubs and other societies, and in 1869 was retired as first lieutenant of the 3d New York cavalry.

BUCKLAND, Ralph Pomeroy, soldier, was born at Leyden, Franklin co., Mass., Jan. 20, 1812.

His father, Ralph Buckland, went from Massachusetts to Portage county, O., as a surveyor, in 1811, and later removed his family thither, settling at Ravenna. He served as a volunteer under Hull, and died of disease contracted in the army, leaving his family inadequately provided for, so that his son, Ralph, acquired only the rudiments of an education. In the autumn of 1830 the subject of this sketch went down the Mississippi as far as Natchez, where for a few months he was employed as a clerk. In 1831 he continued his journey to New Orleans, and there remained for three years as clerk in the cotton house of Harris, Wright & Co., meanwhile studying by himself and learning the French language. In 1831 he returned to Ohio, and spent a year at Kenyon College, after which he studied law at Middlebury and Canfield, O., and in 1837 was admitted to the bar, making Fremont, then called Lower Sandusky, in the same state, his place of residence. He was a delegate to the Whig convention in 1848, and in 1855-59 served in the state senate. In the fall of 1861 he organized the 72d Ohio volunteer infantry, and in February, 1862, was assigned to the command of the 4th brigade of Sherman's division,

with which he took part in the thickest of the fight at Shiloh, April 6-7. He commanded it during the advance on Corinth, and was then assigned to the command of a brigade in Lamman's division, forming a part of the Tallahatchie expedition. In March he joined Sherman's corps in front of Vicksburg, and took an active part in the siege of that city, on one occasion leading his brigade in front of an assault. For gallant conduct at Shiloh and Corinth he was promoted brigadier-general in November, 1862. During the year 1864 he was in command of the district of Memphis, and recaptured the city of Memphis from Forrest, who had taken it during one of his raids. He resigned Dec. 24th, having been elected to the 39th congress, and resigned from the army Jan. 9, 1865, two months later. March 13th—being brevetted major general of volunteers. Gen. Buckland was re-elected to congress, serving two terms, and acting with the radical Republicans. He then returned to the practice of his profession. He was a delegate to the loyalists' convention of 1866, to the Pittsburgh soldiers' convention, and to the Republican national convention of 1876. He was appointed a manager of the Ohio Soldiers and Sailors' Orphans' Home at Xenia, and was president of its board in 1867-73. He was government director of the Pacific railroad in 1877-80. Gen. Buckland was married at Canfield, O., in January, 1838, to Charlotte Boughton, whose family was from New England. She bore him five sons and three daughters. Gen. Buckland died at Fremont, O., May 28, 1892.

CUTLER, Elbridge Jefferson, educator and author, was born at Holliston, Middlesex co., Mass., Dec. 28, 1831. In 1865 he was appointed professor of modern languages in Harvard, a chair which he held until the time of his death. He contributed to the "Atlantic Monthly," the "North American Review" and other periodicals, his poems and critical articles being of high merit. A man of great modesty, he was held in the highest esteem. He published "War Poems" in 1867 and "Stella" in 1868. His memoir was published by Andrew P. Peabody at Cambridge (1872.) He died at Cambridge, Mass., Dec. 27, 1870. One of his war poems, "The Volunteer," is given in Stedman's "American Anthology."

B. Fischer

R. P. Buckland

BAUMGARTEN, William, manufacturer and decorator, was born at Wolfenbüttel, near Brunswick, Germany, June 26, 1845, son of George Wilhelm and Frederika (Zartman) Baumgarten. His father was a master cabinet-maker. The son was educated at Jacobson's Institute, Sossen, and the Real Gymnasium, Brunswick, and prepared to receive the degree of civil engineer, but as the age at which he would be called to serve in the army was approaching, left for America in June, 1865. Upon his arrival in New York city he found, through acquaintance with Theodore Steinway, the piano

manufacturer, a native of Brunswick, a situation in the house of J. Ziegler & Co., makers of furniture and decorators. He assisted in making the designs and in the general management of the business, and continued with the firm for five years, at a salary of \$1,500 per annum, until 1870, when he made the acquaintance of Christian Herter, of the famous firm of Herter Bros., furniture makers and decorators. Mr. Herter, who had recently become the head of that firm, engaged Mr. Baumgarten as his assistant in the general management, at a salary of \$3,000 per annum, which was raised the following year to

\$4,500, and two years later to a share of ten per cent. in the profits, and again a few years later to a share of twenty per cent. During the ten years from 1871 to 1881 the firm executed the most important work then being done in New York city, in the houses of William H. Vanderbilt, Darius O. Mills, J. Pierpont Morgan, Heber R. Bishop, David Dows, Josiah M. Fish and many others. In 1881 Mr. Herter retired from the firm, and Mr. Baumgarten succeeded him as the head of the firm of Herter Bros. In this capacity he continued until 1891, maintaining the unrivaled prestige of the house, and executing the interior decorations of many equally notable residences, including those of James C. Flood, of San Francisco; H. H. Cook, of New York city, and William Rockefeller, of Tarrytown. When the firm, in 1891, was formed into a stock company Mr. Baumgarten retired and established, under his own name, the firm of William Baumgarten & Co., with his younger brother, Emilie, as partner, whose training at the Institute of Technology, Boston, and at the École des Beaux Arts, Paris, became of the greatest assistance. From the start the new firm was highly successful, and during the past ten years has had the same high prestige and the same unrivaled clientele enjoyed by the old firm. The achievement in his career in which Mr. Baumgarten takes more pride than in any other is the introduction and establishment in this country for the first time of a new art industry, that of the making of Gobelin tapestries, which he started early in the year 1893. From a small beginning, with four imported French weavers, the works gradually increased, and at the present time more than eighty persons are employed, among whom are fourteen native boys and men trained here at the works, and about twenty-five women, mostly natives. A large number of important wall panels with figure compositions have been executed for the residences of wealthy men, and it is admitted by the best connoisseurs that these productions are not excelled by any made in France, artistically or mechanically, and also as regards the beauty and permanency of the colors. Mr. Baumgarten was mar-

ried, in New York, on May 7, 1887, to Clara, daughter of Dr. J. Frankel. They have three sons and one daughter.

FUNK, Isaac Kauffman, clergyman, editor and publisher, was born at Clifton, Greene co., O., Sept. 10, 1829, son of John and Martina (Kauffman) Funk, and descendant of early Holland-Swiss emigrants to Pennsylvania. His father was a Universalist, his mother a Lutheran, and having been trained in the principles professed by her he entered Wittenberg College, Springfield, O., and was graduated in 1860 with the degree of D.D. From this institution he received in 1896 the degree of LL.D. In 1861 he began active work in the Lutheran ministry near Mooreshill, Ind., subsequently serving as pastor of the Lutheran church at Carey, O., and in 1865-72 St. Matthew's English Lutheran Church in Brooklyn, N. Y. He resigned the pastorate in 1872 to travel in Europe, Egypt and Palestine, and on his return became associate editor of the "Christian Radical," published in Pittsburgh, but later in New York city. In 1876 he founded and published in New York city the "Metropolitan Pulpit," now the "Homiletic Review," of which he was editor-in-chief. Adam W. Wagnalls, a lawyer, of Atchison, Kan., who had been a college classmate of Dr. Funk, entered the publishing house at this time as a clerk, and in 1877 became a partner, the style being I. K. Funk & Co. Later, the firm name was changed to Funk & Wagnalls, and in 1891 it became Funk & Wagnalls Co. Branch houses have been established in Canada and in England. In 1884 the firm republished Dr. Spurgeon's "Treasury of David," which met with as much favor in this country as in Great Britain. The same year "The Voice," a campaign paper in the interests of Prohibition, was started, and very soon had a circulation of 130,000. During the presidential campaign of 1888 over 700,000 copies were issued weekly for a number of weeks. In 1888 the "Missionary Review" was founded, and in 1889 the "Literary Digest," both of which are still published. Large numbers of popular works have been published by this firm, the chief of which is the "Standard

Dictionary of the English Language" (1890), projected by Dr. Funk, and of which he was editor-in-chief. More than 240 editors and specialists and 500 readers for quotations, besides a large staff of writers, were engaged in its preparation, and its production cost nearly \$1,000,000. Other works equally important in their special fields are the "Schaff-Herzog Encyclopedia of Religious Knowledge"; "Homiletic Commentary"; Butler's "Bible Work"; "Historical Side Lights"; "Hoyt's Cyclopaedia of Quotations"; and "Cyclopaedia of Classical Dates."

The company has now in hand an immense work, the "Jewish Encyclopedia," to be completed in twelve volumes at an estimated cost of \$750,000. Dr. Funk was married at Carey, O., in 1863, to Eliza E., daughter of James and Jeanette Thompson, who bore him a son, now deceased, and a daughter, Mrs. Robert Scott. His wife died in 1868, and in 1869 he was married to her sister, Helen G., by whom he has one son.

BROWN, Chad, colonist, was a native of England, and was born about 1600. He came to America (Boston) in the ship Martin, in July, 1638,

W. Baumgarten

I. K. Funk

and with his wife Elizabeth and his little family, removed to Providence not long after Roger Williams settled there; exiled for conscience's sake, his tombstone says. Serious difficulties having arisen respecting the division of lands made by Roger Williams, the matter of the adjustment with the contending parties is thus referred to by Williams: "The truth is, Chad Brown, that wise and holy soul (now with God), with myself brought the remaining aftercomers and the first twelve to a oneness by arbitration." He was one of the owners of "home lots," his being in what is now the college campus of Brown University. In 1642, while on a visit to England, Mr. Brown was ordained elder, and returning to Providence became the first pastor of the Baptist Church. For more than half a century the church had no meeting-house, the place of their assemblage for public worship being a grove or orchard, and in unpleasant weather the house of some one of the members. The special theological controversy which occupied the minds of the colonists during Mr. Brown's ministry was on the "laying on of hands." The controversy gave rise to the formation of distinct Baptist churches in the colony, called "Six Principle Baptists," which have kept up their organization to this day. Mr. Brown performed the duties of the ministerial office until his death, which occurred about the year 1665. Five sons survived the death of their father: John, who was married to a Holmes; Judah, alias Chad, who died without children; James, who, about 1672, removed to Newport; Jeremiah, who, like his brother, became a citizen of Newport; and Daniel, who was married to a Henden.

DIXON, Brandt Van Blarcom, educator, was born in Paterson, N. J., Feb. 27, 1850, son of David Ackerman and Ann (Van Blarcom) Dixon. Mr. Dixon's family removed to St. Louis when he was eight years of age, and he received his education first in private schools of that city, then passed two years at Amherst College, Massachusetts, and two years at Cornell University, where he was graduated in 1870. He taught for one year in the Bellevue Institute, Caledonia, Mo., was for three years teacher in the St. Louis Grammar School, and thirteen years in the St. Louis Central High School, of which he was principal in 1884-87.

In 1887 Mr. Dixon was called to New Orleans by the administrators of Tulane University to organize the H. Sophie Newcomb Memorial College, endowed by Mrs. Josephine Louise Newcomb in memory of her daughter. The sum of \$100,000, originally given by Mrs. Newcomb, was augmented by gifts from her to \$1,000,000. Since 1887 Mr. Dixon has been chiefly occupied in directing and developing this institution, and in lecturing on psychology and philosophy at Tulane University. Mr. Dixon was married, June 24, 1873, to Eliza R. daughter of James A. and Mary H. (Wingo) Carson, of Caledonia, Mo. They have one son, William Ackerman Dixon.

BEAL, William James, botanist, was born at Adrian, Lenawee co., Mich., March 11, 1833, son of William and Rachel Smith (Comstock) Beal, and grandson of Joseph Beal, who served in the war of 1812. He was prepared for college at Raisin Valley Seminary, and was graduated at the University of Michigan, in 1859, after which he taught for three

years in the Friends' Academy, Cayuga county, N. Y. He then took a full course at the Lawrence Scientific School at Harvard University, studying under Prof. Agassiz and Gray, with some interruptions due to his teaching, at the same time, in the Howland Institute, Union Springs, Cayuga co., N. Y., where he remained until 1867. He was professor of botany, zoology and geology, at the University of Chicago, and lecturer to other colleges in 1868-71, and professor of botany and horticulture at the Michigan Agricultural College in 1870-81, where he was instrumental in the erection of the first independent building for botanical work in the United States. Since 1881 he has been professor of botany and forestry at the latter institution. He was the first president of the Society for the Promotion of Agricultural Science, and has been president of the Michigan State Teachers' Association, and of the section of biology of the American Association for the Advancement of Science, and secretary of the American Pomological Society. He has written numerous reports and has been a frequent contributor to scientific and educational periodicals. He is also the author of "The New Botany" (1879), and of a valuable two-volume work, entitled "Grasses of North America" (1887-96). The degree of Ph.D. was conferred upon him by Michigan University in 1880. He was married, in 1863, to Hannah A. Proud, of Rollin, Mich., and had two children.

Mr. J. Beal.

MARSHALL, William Louis, engineer, was born in Mason county, Ky., June 11, 1816, son of Charles Alexander and Phebe Ann (Paxton) Marshall. His earliest American ancestor was John Marshall, a captain of cavalry under Charles I., who came to Virginia about 1650. His son, Thomas Marshall (1655-1704), was one of the foremost planters in Virginia; his son, Capt. John Marshall (1700-52), was an officer in colonial affairs and a large planter, and his son, Thomas Marshall (1730-1802), was colonel of the 3d Virginia artillery in the revolution, and afterwards surveyor-general of lands in Kentucky. He was father of Chief Justice John Marshall; James W. Marshall, statesman and diplomat; Dr. Louis Marshall, president of Washington College, Virginia, and of Thomas M. Marshall. William L. Marshall entered Kenyon College in 1860, but his studies were interrupted by the outbreak of the civil war. In 1862 he enlisted as a private in the 10th regiment, Kentucky cavalry, U. S. volunteers, and served in Kentucky and Virginia until his appointment to a cadetship in the U. S. Military Academy at West Point, N. Y., which he entered in June, 1861. In 1868 he was graduated and was assigned to the corps of engineers, being promoted captain in 1882 and major in 1895. During 1868-70 he served with the battalion of engineers at Willets Point, N. Y.; in 1870-71 was acting assistant professor of natural and experimental philosophy at West Point, and in 1872-76 was in charge of the Colorado section U. S. geographical and geological surveys west of the 100th meridian. While engaged upon these surveys he discovered "Marshall pass" across the continental divide at the summit of the Rocky Mountains, and located the gold placers in "Marshall basin," San Miguel river, Colorado. From 1876 to 1881 he was engaged in river improvements in Georgia, Tennessee and Alabama; in 1881-84, on the improvement of the Mississippi river and the construction of levees in Mississippi, Louisiana

Brandt V. Dixon

and Arkansas, and in 1884-88, on the improvement of the Fox and Wisconsin rivers and on the improvement of harbors in the Milwaukee district. From 1888 to 1900 he was in charge of the government engineering works in the vicinity of Chicago, including Chicago and Calumet rivers and harbors; the Illinois river improvement and the location and construction of the Illinois and Mississippi canal (Hennepin), and since 1900 he has been in charge of the fortifications at the eastern and southern entrances to New York harbor, and of the construction of the forty-foot channel from the city to the sea. Maj. Marshall has invented and patented many improvements in hydraulic constructions, notably in the class relating to protecting shores against erosion by waves, and in automatic canal locks, valves, dams, and sluice gates. He has also served as consulting engineer on many important civil works and on advisory boards of engineers considering extensive projects of improvement carried on by the general government. He was married, in 1886, to Elizabeth Hill, daughter of the late Sen. Alfred

M. Marshall

Holt Colquitt, of Georgia, who was also a distinguished officer in the Mexican and civil wars. They have one daughter, Frances Maitland Marshall (b. 1889).

BURGESS, Alexander, first P. E. bishop of Quincy, Ill., and 119th in succession in the American episcopate, was born in Providence, R. I., Oct. 31, 1819, son of Thomas and Mary (Mackie) Burgess. His father was an eminent lawyer, and for some years chief-justice, and brother of Bishop George Burgess, both natives of Wareham, Mass. He was graduated at Brown University in 1838, and from the General Theological Seminary, New York city, in 1841, after which he spent a year in Europe. He was ordained deacon in Providence, Nov. 3, 1842, and took charge of St. Stephen's Church, East Haddam, Conn.; was ordained priest Nov. 1, 1843, and became rector of St. Mark's Church, Augusta, Me. In 1854 he removed to Portland, and became rector of St. Luke's Church. In 1866 the clergy of Maine elected him bishop of the state to succeed his brother, George Burgess, but he declined to allow his name to go to the laity for confirmation. In 1867 he was called to St. John's Church, Brooklyn, N. Y., and in 1869 to Christ Church, Springfield, Mass., where he continued to officiate until chosen bishop of the new diocese of Quincy, Ill., in 1878. Dr. Burgess was a deputy to the general convention of the Episcopal church, from 1844 until 1877, and represented the dioceses of Maine, Long Island and Massachusetts during that period, serving also on their standing committees. He is an authority on canon law, and in 1877 presided over the house of deputies. He was consecrated bishop in Christ Church, Springfield, Mass., May 15, 1878. The degree of S. T. D. was conferred upon him by Brown University in 1866, and by Racine College in 1880, and in 1891 he received the degree of LL. D. from Griswold College. Bishop Burgess has published a number of sermons and addresses; also carols, hymns and a few poems and Sunday-school books, and a memoir of his brother, Bishop Burgess, of Maine (1869). He was married, in 1845, to Mary W. Selden, of Norridgewock, Me., who died in 1856, leaving two children, and, in 1858, to Mary A. Howard, of Portland, Me., by whom he had four children, two of whom, with the

two mentioned above, are living. He resided at Quincy, Ill., from 1878 to 1885, when he removed to Peoria.

ROST, Pierre Adolphe, soldier and jurist, was born in the Department of Lot et Garonne, France, in 1797. His early education was obtained in and near his native town, in a college in Cahors, France, and the Lycée Napoleon, in Paris. He was admitted soon after he was sixteen years old to the École Polytechnique, in Paris, the great French institution for the education of young men for the military, naval and civil services. When the allied armies of Austria, Prussia and Russia crossed the Rhine, in 1813, the entire battalion of the École Polytechnique asked the privilege of assisting in attempting to repel the invasion, and it was attached to the garrison of Paris. Its admirable conduct and discipline in the unsuccessful defence of the city on March 30, 1814, won the respect and the admiration of the enemy. Mr. Rost remained with his battery until the last shot was fired at the enemy, retreating only long after the order to leave had been issued. With other soldiers he joined Napoleon at Fontainebleau, and when the restoration was an accomplished fact he returned to the École Polytechnique. When Napoleon I. escaped from Elba and returned to France he applied for a commission in the Emperor's army, but before it could be issued the battle of Waterloo brought about the downfall of the great military captain. He was later offered a commission in the Gardes du Corps, but refused it, being determined to escape from what he thought an oppressive rule over his country. Emigrating to the United States early in 1816, he landed at New Orleans, La., and at once proceeded to Natchez, Miss., without connections and friends, unknown to all, and having nothing. He soon became popular as a teacher, and studied law in the office of Joseph Emory Davis, brother of Jefferson Davis (afterward president of the Confederate States of America), was admitted to the bar, and settled at Natchitoches, La. In 1822 he was elected to the state senate, and in 1828 removed to New Orleans, where he became colonel of the 19th Louisiana regiment. Mr. Rost visited Europe with his family in 1838, and on his return was made one of the judges of the supreme court of Louisiana. He held this office only a few months, and for the greater part of several years following his attention was given to the development of his extensive plantation at St. Charles. In 1846 he accepted an appointment to the supreme court of Louisiana, and officiated in that position until 1852; in 1861 he was appointed by Pres. Davis one of the three commissioners of the Confederate States to the governments of Europe, and in 1862 was sent as special commissioner to the court of Spain. Upon his arrival in Madrid he speedily ascertained that there was no probability of that court ever recognizing the independence of his government, and, at the close of the war, returned to find his lordly estate, in St. Charles, devastated and confiscated by the United States. He, however, met his misfortune with a dignity and fortitude which were entirely consistent with his character. He was married, in 1830, to Louisa Odile, daughter of John N. and Celeste (Robin de Langny) Destrehan, of St. Charles parish, La. They had four sons and two daughters. Mr. Rost died in New Orleans, La., Sept. 6, 1868.

P. A. Rost

CHUTE, Horatio Nelson, author and educator, was born at Grovesend, Ont., Canada, Dec. 26, 1847, son of Walter and Catherine (McConnell) Chute. In 1634 Lionel Chute, of England, settled in Ipswich, Mass., and the subject of this sketch is of the ninth generation in direct descent. In early life he attended the district school, then the Woodstock College, Ontario. From 1870 to 1873 he was a student in the literary department of Michigan University, graduating with the degree B. S. in 1872. From 1866 to 1869 he was principal of the Aylmer Public Schools, Ontario; 1869-70, assistant professor of Latin in Woodstock College, Ontario; and after his graduation, in 1873, was appointed instructor in physical science in Ann Arbor High School, which position he still holds. In 1872-73 he was engaged in astronomical work, under Prof. J. C. Watson, of the Detroit Observatory. Prof. Chute published, in 1877, a series of registers and system of school reports, which have been widely used in Michigan and some adjoining states, and in 1889 published a book on practical physics for secondary schools. This was a pioneer work on this subject in America, and it has been extensively used as a reference work by teachers of physics. In conjunction with Dr. Carhart, of Michigan University, he published, in 1893, "Elements of Physics for Secondary Schools"; and in 1894 appeared his "Physical Laboratory Guide." This, the principal work of its kind, is used in the physical laboratories of high schools throughout the northern and western states. He also published "Laboratory Work—What? How Much? How?" (1895), and "A Physical Laboratory Note Book" (1898), which is a companion to the "Physical Laboratory Guide." Mr. Chute is a member of the First Baptist Church, of Ann Arbor, and was for years superintendent of its Sunday-school. He is a member of the Masonic order and is a Knight Templar; fellow of the American Association for the Advancement of Science, and a member of the Michigan Schoolmasters' Club. He was married, in 1872, to Lucretia, daughter of Rev. D. C. Clappison, a Methodist minister, of London, Ont.

MOAK, Nathaniel Cleveland, lawyer, was born at Sharon, Schoharie co., N. Y., Oct. 3, 1833. He was brought up on his father's farm, in winter attending the district schools of the neighborhood. He continued his education at the Cherry Valley Academy, and an academy of Cooperstown, teaching school meanwhile. In 1853 he entered the law office of James Demey, at Cherry Valley, as a student, and was admitted to the bar in 1856. In 1859 he formed a partnership with Judge Daniel Countryman, and the two practiced law together at Cherry Valley until 1862, when Judge Countryman removed to Cooperstown. Mr. Moak then formed a co-partnership with Daniel Clark, and continued with him until Mr. Clark moved West. When the civil war broke out these two partners made an agreement that while one should conduct the business at home the other should go to the war, the one remaining to give the share of the earnings of the other to his family, and that on his return the latter should resume his place in the firm. They cast lots, and the duty of going fell to Mr. Clark, who went out as captain of company G, of 121st New York volunteers, Mr. Moak remaining and carrying out his agreement. In 1867 he removed to Onondaga, and two years later to Albany, where he entered the firm of Smith & Beneroff, which became Smith, Moak & Buchanan in 1880. At Albany Mr. Moak acquired a large practice, and was engaged in some of the most important cases in the state during his time. In 1869 he edited Clark's "Chauncery Reports" with elaborate notes by himself, and Van

Santvoord's "Pleadings" in 1873. In 1872 he began the republication of the current reports of the courts, and in 1881 published an edition of "Underhill on Torts." In November, 1871, he was elected district-attorney of Albany county for three years. During his term of office he prosecuted the celebrated Lowenstein murder case, and that of Phelps, the defaulting clerk in the state treasurer's office, for forgery and larceny, securing a conviction for both offences. Though ranking as one of the first criminal lawyers of the country, he made that branch of the law merely secondary. Mr. Moak was a pronounced Democrat, though never an active politician. He was married, Oct. 27, 1859, to Keziah Holt, of Cherry Valley. He died in Albany, N. Y., Sept. 17, 1892.

THROCKMORTON, John Ariss, planter and soldier, was born in Loudoun county, Va., March 3, 1815, son of Mordecai and Sarah McC. (Howe) Throckmorton. The Throckmorton family derive descent from Robert Throckmorton, lord of the manor of Ellington, Huntingdonshire, who received a grant of land in Virginia in 1637. From him and his wife, Anne, the line of descent runs through their son, John Throckmorton and Frances Mason, his wife; through their son, Gabriel Throckmorton and Frances Cooke, his wife; through their son, Capt. Mordecai Throckmorton and Mary Reade, his wife; through their son, Hon. Thomas Throckmorton and Mary Howe, his wife, who were the grandparents of our subject. He was a strong believer in state rights, and when Virginia seceded from the Union, enlisted as a private in company F, 6th Virginia cavalry (although at that time he was a colonel of the state militia). In a few days he was unanimously elected orderly sergeant; in a month a vacancy occurred as first lieutenant, to which office he was elected without a dissenting voice; in 1861 he was with Gen. Stewart in all his scouts and raids. In 1862 he was elected captain of his company, and in that position commanded a squadron of his regiment under Gen. "Stonewall" Jackson in the valley of Virginia in all his battles, having a horse killed under him. He participated in the battle of Cedar mountain, and led Gen. Jackson's advance in all three days of the second Manassas fight. In 1863 he was promoted to major, and commanded a regiment in the great cavalry fight at Brandy station, June 9, 1863. At Gettysburg he commanded the regiment which led the great cavalry charge. He was known as the "old colonel," and participated in thirty-four hard-fought battles and many skirmishes. He was mentioned many times in official despatches for bravery and gallantry in battle. In 1820 he was married to Mary Barnes, daughter of Col. Charles Penleton Tutt, of Louisa Hill, Loudoun co., Va., an officer of the war of 1812, a large land owner and slaveholder. He was a personal friend of Pres. Jackson, who offered him the governorship of the then territory of Missouri, which he refused; he subsequently appointed him U. S. naval agent at Pensacola, Fla. He was a son of Capt. Benjamin Tutt, of the revolution, and a great nephew of Edmund Penleton, chairman of the committee of safety of Virginia. His wife, Anne Mason Chichester, was a granddaughter of Hon. Thomson Mason, of Virginia, famous as a statesman, judge and patriot, and a grand-niece of George Mason, of

John A. Throckmorton

"Gunston Hall," author of the Virginia bill of rights. Mary Tutt Throckmorton was born Jan. 15, 1815, and died Dec. 19, 1898. She was well-known in Washington society for many years. She made her debut at the White House as a guest of Pres. Jackson, and was the "young lady of the White House" during his second administration. She enjoyed the personal acquaintance, and in some cases friendship, of every president from Gen. Jackson to the time of her death and was a guest at the White House in one of Gen. Grant's terms, and was probably the only person who had been an inmate of the White House in Gen. Jackson's and Gen. Grant's incumbency. She was famous for her wit, and a great belle in her time. During the civil war she stayed in Washington, and made the welfare of the Confederate prisoners her special care. She was a ready writer, and contributed many interesting articles to magazines, etc. Col. Throckmorton died on his farm in Virginia, May 27, 1891.

THROCKMORTON, Charles Beaujoilais, soldier, was born in Loudoun county, Va., May 27, 1812, son of John Ariss and Mary B. T. Throckmorton. He was a page in the U. S. senate for two years, and was educated at Georgetown College and Columbian University, District of Columbia. In the civil war he became first lieutenant of the 2d regiment, Missouri national guard, in January, 1861; second lieutenant, 4th U. S. artillery, March 16th, and first lieutenant on May 14th following. He saw his first active service at the battle of Bull run. By a coincidence his battery was then engaged with the 6th Virginia cavalry, his father's regiment; and in order to avoid the possibility of personal encounter with his own parent, he was transferred to the Western army at his own request. For some time thereafter he was attached to the staffs of Gen. Robert Anderson, Gen. William T. Sherman, and Gen. Henry W. Halleck, and was assistant to the chief of artillery on the

staff of Gen. William Nelson, at the battle of Richmond, Ky. He saw active service in the battles of Shiloh, Monterey and Farmington; at the evacuation of Corinth, Miss.; in the campaign against Gen. Bragg; at the battles of Perryville, Stone river, and others in Kentucky and Tennessee. He was provost marshal at Governor's Island, N. Y. (1864), and from his promotion to a captaincy in July, 1865, to December, 1868, commanded artillery batteries in various parts of the South and West. At the close of the war he was brevetted major for "gallant conduct and meritorious services," and in May, 1883, received full rank in the 2d U. S. artillery. Besides taking conspicuous part in the Modoc, Nez Perce and other Indian wars, he discharged several special assignments and commanded Fort Stevens, Ore. (1877-81); Fort San Jose, Cal. (June, 1881, to November, 1881); Fort Preble, Me. (November, 1881, to August, 1882); Fort Adams, R. I. (1882-83); Jackson barracks, La. (1885-88), and Fort Schnyler, N. Y. (1890-92). On March 8, 1894, he was retired under the thirty year service law, and immediately became assistant general superintendent, department of street cleaning, New York city, an office held by him until February, 1895. On Oct. 8, 1863, he was married to Fannie Hall, daughter of Hon. Robert Logan Wickliffe,

of Bardstown, Ky. They have one son, Charles Wickliffe, and one daughter, Josephine Holt Throckmorton.

NASH, Stephen Payne, lawyer, was born in Albany, N. Y., Aug. 26, 1824, son of David and Hannah (Payne) Nash, and a descendant of Thomas Nash, one of the original settlers of New Haven, Conn. The Rev. Samuel Stone, pastor of the church at Hartford in 1647-63, was another ancestor. After his father's death, his mother removed to Saratoga Springs with her young children, and Stephen, who had previously attended the Albany Academy, was sent to the French College at Chambly, Lower Canada, where he spent some time. Subsequently he entered the law office of Esek Cowen, one of the justices of the supreme court, who lived at Saratoga. There he completed his legal studies, and also assisted Judge Cowen and Nicholas Hill in their preparation of the voluminous "Cowen & Hill's Notes to Phillips' Evidence." Mr. Nash was admitted to the bar of the supreme court in January, 1843, receiving from Chancellor Walworth, without further examination, his license as solicitor and counsel in chancery. His first partnership was formed with Augustus Bockes, afterward a judge of the supreme court. It was not long, however, before he went to Albany, where he became junior partner to Mr. Hill, who had been appointed state reporter at the capitol in 1842. In 1845 Mr. Nash removed to New York city, and there became a member of the firm of Walker & Nash, and later of that of Spier & Nash, with Gilbert M. Spier, subsequently a judge of the New York superior court. This connection lasted for seventeen years, at the end of which time Mr. Nash, with Edward H. Owen and Joseph H. Gray, established the law firm of Owen, Gray & Nash. When this partnership was dissolved, in 1875, he took his son, John McLean Nash, and George E. Holt into partnership, the firm name being Nash & Holt, which was later changed to Nash & Kingsford upon Mr. Holt's withdrawal and the admission of J. P. Kingsford. Finally, with his son and Charles L. Jones, the firm of S. P. & J. McL. Nash was formed, and no further change was made during Mr. Nash's lifetime. While his experience in all branches of civil jurisprudence was varied, he was especially distinguished for his knowledge of equity, and conducted many celebrated cases of this kind. He was also much consulted in matters of ecclesiastical law, and was an authority on the laws affecting religious corporations. In 1855 he was retained to go to England as an expert witness in the Lauderdsale peerage case, testifying as such before the house of lords as to the law of marriage in the colony and state of New York. Mr. Nash was a member of the Episcopal church, and became a vestryman of Trinity Church in 1868; was senior warden at the time of his death, and was for many years a member of the standing committee of the diocese of New York. He represented that diocese in the triennial general conventions of the church from 1880 until his death, and was a trustee of the Episcopal Theological Seminary. In 1868 he was elected a trustee of Columbia College, and he took a very active interest in the work of the law school of that institution. He was a founder of the New York Bar Association, assisted in the preparation of its first constitution, and personally drafted the address by which the organization was recommended to the profession at large. In 1880 he was elected president of the association, succeeding William M. Everts, its first presiding officer, and for many years he was president of the New York Law Institute. He was a member of the Century and Down-town Associations; the Church and Barnard clubs; the Scientific Alliance, and the National Academy of

W. H. Woodcut

Design. In 1889 the degree of LL. D. was conferred upon him by Columbia College, and in 1890 by Trinity College, Hartford. He was married, in 1847, to Catherine, daughter of John McLean, of Salem, N. Y. They had five sons—John McLean, lawyer and treasurer of Columbia University, David, S. Edward, Thomas and Henry, and two daughters, Elizabeth, wife of Lyman Rhodes, and Catherine Nash. Mr. Nash died at Bernardsville, N. J., June 4, 1898.

SAULSBURY, Willard, chancellor of Delaware (1874-92), was born at Mispillion Hundred, Kent co., Del., June 2, 1820, son of William and Margaret (Smith) Saulsbury. His family is of Welsh descent, having settled in Delaware in the seventeenth century. He obtained his classical education at Delaware and Dickinson colleges, and studied law under Chief Justice Bartol, of Maryland, and Chancellor Bates, of Delaware. After being admitted to the bar, in 1845, he began the practice of law at Georgetown. In 1850 he was appointed attorney-general for Delaware and held this office until 1855. In 1856 he was a delegate to the convention which nominated Buchanan, and in 1859 was elected to the U. S. senate, where he served for twelve years, being re-elected in 1865. He labored earnestly for the preservation of the Union and the prevention of civil war, and made a number of important speeches, including those on the state-rights speech of Jefferson Davis, on the resolution to expel Jesse B. Bright, and on the bill to prevent officers of the army and navy from interfering in elections in the southern states. His speech on amending the constitution of the United States was delivered March 6, 1866. In the 36th congress he closed the debate on disunion by declaring that "as Delaware was the first to adopt the constitution of the United States, she would be the last to do any act looking to separation." In the 37th congress he offered a resolution proposing a conference for the settlement of difficulties, and argued against the constitutionality of the bill on compensated emancipation in Missouri. During his senatorial career he served on the committees on commerce, pensions, patents and the patent office, and mines and mining. In 1871 he was succeeded by his brother, Eli, after a remarkable triangular contest, in which the third candidate was another brother, Gove, whose term as governor of Delaware had just ended. In 1864 he was a delegate to the Chicago Democratic convention. In 1873 he was appointed by Gov. Ponder chancellor of Delaware, which position he filled with eminent ability until his death. He was married, May 11, 1850, to Annie, M., daughter of John Ponder, and sister of Gov. Ponder of Milton, Del. They had one daughter and two sons, John P. Saulsbury, who died while secretary of state of Delaware, and Willard, who is a prominent member of the Wilmington bar. Chancellor Saulsbury died suddenly at his home in Dover, Del., April 6, 1892.

SAULSBURY, Eli, senator, was born at Mispillion Hundred, Del., Dec. 29, 1817, son of William and Margaret (Smith), Saulsbury. His academic education was obtained in the public schools and at Dickinson College. After studying law he was admitted to the bar in 1837, and began to practice at Dover, Del. In 1853 he

was elected to the Delaware legislature, and in 1870 was elected U. S. senator as a Democrat, succeeding his brother, Willard. He was re-elected in 1876, and

again in 1883. His last term of office expired in 1889. In the 43d congress he offered an amendment to the force bill, and in the same session opposed and voted against the act to enforce the provisions of the 14th amendment to the U. S. Constitution. He moved an amendment to the specie-payment bill in the 43d congress, and voted against military interference in the organization of the Louisiana legislature. During his senatorial term he served on many committees, and as chairman of the committee on privileges and elections led in clarifying many important contests for the southern states. Like his brothers, Willard, whom he succeeded in the senate, and Gove, who was governor of Delaware during and after the civil war, he always opposed disunion. He was never married, and died at Dover, Del., March, 22, 1897.

ROGERS, Wynne, lawyer and jurist, was born in New Orleans, La., about 1815, son of Owen Wynne and Jane Eastman (Carter) Rogers. His father was a native of Wicklow county, Ireland, and his mother came from Devonshire, England. He was educated in the public schools of his native city, and during the civil war enlisted as a private in Bridges' Louisiana battery, with which he served until the close of the war. He then entered the law department of the Louisiana State University, where he received the degree of LL. B. He practiced his profession in New Orleans until 1878, when he was elected judge of the 2d justice court, a position which he held for two years.

He was a member of the state house of representatives from 1874 to 1876, and of the state senate from 1880 to 1884. In 1891 he was appointed a judge of the state court of appeals, and so continued for three years. Since retiring from the bench he has been engaged in the active practice of his profession, and is ranked among the leaders of the New Orleans bar. Since 1875 he has been a Knight of Pythias, Knight of Honor and a Knight of Temperance. He was married, in 1871, to Mary, daughter of the late Wm. Winkelman, of New Orleans. They have four sons and three daughters.

WALKER, John Williams, senator, was born in Virginia in 1789. He was graduated at Princeton College in 1806 as valedictorian. Being admitted to the bar in 1810, he began the practice of his profession at Huntsville, Ala. He was repeatedly elected to the legislatures of both Mississippi and Alabama, and he was president of the convention which framed the first constitution of the latter state. In 1819 he was the first senator elected to represent Alabama in the upper house of the national legislature, and took his seat on Dec. 4th of that year; but failing health compelled his resignation in December, 1822. Upon his resignation he retired to Huntsville, Ala., where he died April 11, 1833. His son, Leony Pope Walker, was a lawyer who attained high place at the bar of northern Alabama, and during the civil war was commissioned a brigadier-general in the Confederate army.

SMITH, Andrew Jackson, soldier, was born in Berks county, Pa., April 28, 1815. Having entered the U. S. Military Academy on July 1, 1834, he was graduated in 1838, and on the same day was promoted second lieutenant of the 1st U. S. dragoons. He served at the Carlisle barracks, Pa., for a year

Wynne Rogers

was elected to the Delaware legislature, and in 1870 was elected U. S. senator as a Democrat, succeeding his brother, Willard. He was re-elected in 1876, and

and a half, and then spent a year on recruiting duty. In 1840 he was ordered West, and participated in an expedition to the Pottawatomie country. He served in Kansas and Missouri until 1845, when he was made first lieutenant, and took part in an expedition to the south pass of the Rocky mountains. On Feb. 16, 1847, he received his captaincy. He participated in the war with Mexico, and in 1848-49 was assigned to frontier duty at San Francisco, Cal., alternating between that and recruiting for several years. In 1853 he took part in the Rogue river expedition, and again in 1856. He became major in May, 1861,

colonel of the 2d California cavalry in October following, and brigadier-general of volunteers in March, 1862. He was engaged in the siege of Corinth and took part in several skirmishes; commanded the troops in Covington and its vicinity, and with the army of the Tennessee accompanied the Yazoo river expedition, and was engaged in the assaults on Chickasaw bluffs and Arkansas post. In the Vicksburg campaign he commanded a division of the 13th army corps. Being assigned to the command of a division of the 16th army corps, he took part in the Red river campaign, the assault and capture of Fort de Russy, the battle of Pleasant hill, the action at Cane river, and covered the retreat of Gen. Banks' army, with almost daily heavy skirmishing. For his gallant and meritorious service at Pleasant hill he received the brevet of colonel of the U. S. army. He was brevetted brigadier-general March 13, 1865, for his conduct at Tupelo, Miss., and major-general for service at the battle of Nashville. On July 28, 1866, having been mustered out of the volunteer service, he was appointed colonel of the 7th U. S. cavalry, and was in command of the district of upper Arkansas until 1867, and the department of the Missouri until 1868. He was on leave of absence then until May 6, 1869, when he resigned from the regular service. In the same year he was appointed postmaster of St. Louis. By the law of 1888 he was reappointed to the army, made colonel of cavalry on Jan. 23, 1889, and placed on the retired list on the same day. He died Jan. 30, 1897.

BRADLEY, Milton, publisher, was born at Vienna, Kennebec co., Me., Nov. 8, 1836, son of Lewis and Fanny (Lyford) Bradley. His earliest American ancestor was Daniel Bradley, who came to America from London, England, in 1635, and whose children were conspicuous in the Indian wars of New England. His father was a country merchant, and first introduced the manufacture of potato starch into the state of Maine. The unexpected development of potato-rot within a few years ruined his financial prospects, and his son, Milton, had to commence his career with no other capital than his enterprise and good sense. In 1847 the family removed to Lowell, Mass., where Milton attended school in the grammar and high school grades. He felt compelled to earn money, and when out of school was employed in a dry-goods store to build fires and to deliver parcels. After graduation he secured a position in the office of a civil engineer and patent solicitor, where he made the drawings and copied the specifications of the numerous inventions to be patented. He then became a mechanical engineer, but after several years' work recognized the necessity of better preparation for his chosen profession. With his accumulated savings he, in 1854, entered the Lawrence Scientific School, Cambridge, and in 1856 secured a position as draughtsman in a locomotive factory in Springfield, Mass.; but later opened an office on

his own account in Springfield, and practiced as a mechanical engineer and patent solicitor. In the meantime he became interested in the art of lithography, and this proved to be the turning point in Mr. Bradley's life. While visiting a friend about this period he saw the game called the "Mansion of Happiness," and from this he developed another called "The Checkered Game of Life." From this small beginning has grown the business of the Milton Bradley Co., which has now (1901) three departments: the lithographic, home amusement and educational. The latter includes the extensive manufacture of kindergarten materials, school devices and book publishing, while the home amusement department comprises an extensive variety of social games, which are both amusing and instructive. With the preparation of his line of kindergarten material the demand for colored papers led him to a study of the subject of color as a science. This resulted in the Bradley system of elementary color instruction and the establishment of a color nomenclature based on spectrum standards definitely located by their wave lengths, corresponding somewhat by the notation form of music. With this now well-known system a color can be designated as accurately as a note in music, and the whole subject is raised from the realm of the mysterious to as practical a basis as that on which form or music rests. The method is based on standard colors combined by means of the Maxwell rotating disks, and is the first system ever devised by which any color could be definitely named and communicated without a material sample. Mr. Bradley has, perhaps, done more than any person in America to practically popularize the education theories of Froebel. His devices are practical, and impart to students a correct conception of things, while his system of colors for elementary students is unexcelled. Mr. Bradley has been a member of the Springfield city council and of the school board.

FAIRBANKS, Charles Warren, lawyer and senator, was born on a farm near Unionville Centre, Union co., O., May 11, 1852, son of Lorison M. and Mary (Smith) Fairbanks. His father was a Vermont Yankee, and was one of the early pioneers to the Buckeye state, where he located in 1836, and helped to carve that great state out of the wilderness. The son's earliest recollections were of work on the farm during the day and of study at night. He always had a great fondness for books and study, and decided to be a lawyer before he entered college. He was educated at a district school, and at the Ohio Wesleyan University, where he was graduated in 1872 with distinction. During his senior year at college he was editor of the college paper, known as the "Western Collegian." He acted as Associated Press agent in Cleveland for about a year, during which time he studied law and was admitted to the bar of the supreme court of Ohio at Columbus in 1874. In the same year he removed to Indianapolis, Ind., which has ever since been his residence, and entered upon the practice of his profession. Mr. Fairbanks never held public office prior to his election to the senate. He was chairman of the Indiana Republican state conventions in 1892 and 1898; was unanimously chosen as the nominee of the Republican caucus for U. S. senator in the Indiana legislature in January, 1893, and subsequently received his entire party vote in the legislature, but was defeated by David Turpie, Democrat. He was a delegate-at-large to

the Republican national convention at St. Louis in 1896, and was temporary chairman of the convention. He was appointed a member of the U. S. and British joint high commission which met in Quebec in 1898, for the adjustment of Canadian questions, and was chairman of the U. S. high commissioners; was elected to the U. S. senate Jan. 20, 1897, by a majority of twenty-one on joint ballot over Daniel W. Voorhees and Leroy Templeton, and took his seat March 4, 1897. His term of service will expire March 3, 1903. Since 1885 he has been a trustee of the Ohio Wesleyan University, and in 1889 built a gymnasium for the college largely at his own expense. In 1874 he was married to Cornelia, daughter of Judge P. B. Cole, of Marysville, O. They have five children.

BOUTELLE, Clarence Miles, educator, was born at Antrim, Hillsboro co., N. H., July 23, 1851, son of Charles Morrill and Sarah Louisa (Buckminster) Boutelle. From England, James Boutelle and his brother John emigrated to Massachusetts about 1632, the former being the direct ancestor of Dr. Boutelle. William Boutelle, his grandfather, served in the war of the revolution, and fought at Bennington under Gen. Stark. Clarence Miles Boutelle was graduated at the State Normal School, Winona, Minn., in 1872, and completed his education at the Institute of Technology, Boston, giving special attention to mathematics and sciences. In 1874-83 he was a professor in the Normal School, and during the last two years was one of the three conductors of the state teachers' institutes. He has worked in about fifty important teachers' institutes. After his resignation, in 1883, Dr. Boutelle was connected with a private school at Rochester, Minn., for a short time; in 1885 became principal of public schools at Decorah, Ia.; in 1892 was elected superintendent of public schools at Chippewa Falls, Wis., and in 1895 he accepted a position in the department of mathematics in the State Normal School at East Stroudsburg, Pa. Although re-elected at an increase of salary, he severed his connection with that institution to take the superintendency of the public schools at Marshall, Minn., where he is still engaged. Scientific and educational articles by him have appeared in the "Scientific American," "Scientific American Supplement," "New England Journal of Education," "Educational Notes and Queries," "School Education," etc. Short stories and poems have been published in many prominent periodicals, while several serials have been given to the public in "Frank Leslie's Popular Monthly," "Frank Leslie's Illustrated Newspaper" and the "Voice of Masonry." Of these, five

have been re-issued in book form; namely, "The Man Outside," "An Artificial Fate," "The Grave Between Them," "Beyond the End," "The Man of Mount Moriah," "Beyond the End," is said to be, probably, the best autobiography of a ghost that has appeared in English. Dr. Boutelle is a member of the Protestant Episcopal church. He is an Odd Fellow and a Mason, and has held the highest offices in lodge, encampment, chapter and commandery. In 1896 the degree of LL. D. was conferred upon him by St. Stephen's College, Amandale, N. Y. He was married at Newtown, Long Island, N. Y., July 22,

1880, to Fannie Card, daughter of the late Arthur C. Kimber, and sister of Dr. Arthur C. Kimber, vicar of the Chapel of St. Augustine, Trinity parish, New York city. He has two children, Anna Kimber and Louisa Elizabeth.

MACBRIDE, Thomas Huston, botanist, was born at Rogersville, Hawkins co., Tenn., July 31, 1848, son of James B. and Sarah (Huston) Macbride, both of Scotch descent. His father, a Presbyterian clergyman, removed in 1854 to Iowa, where the son attended the common schools; he subsequently entered Monmouth College, Illinois, where he was graduated in 1869. Becoming professor of modern languages in Lenox College, Iowa, in 1871, he remained there until 1878, when he was called to the State University of Iowa as assistant professor of natural science; in 1884 he was elected professor of botany and systematic zoology, and in 1888 professor of botany, which chair he has since retained (1901). In 1891 he spent some time in Europe, taking one semester in Bonn, Germany. Dr. Macbride has written much on the natural history of Iowa, and is editor of the "Natural History Bulletin," to which he has contributed numerous papers on the saprophytic fungi of eastern Iowa, and on the myxomycetes—the fungus-like organisms known as slime molds. He is a fellow of the American Society of Geologists, and the author of a text book on botany for the use of pupils in secondary schools, of a monograph on "North American Slime-Moulds" (1899), which has been received as authoritative in this country and in Europe, and of various scientific papers published in the "Popular Science Monthly," "Science," and other similar publications. The study of fungi is Dr. Macbride's specialty. He was married Dec. 31, 1874, to Harriet, daughter of Jacob G. Dillenderfer, of Hopkinton, Ia. They have two children.

BURCHARD, Samuel Dickinson, clergyman, was born at Steuben, N. Y., Sept. 6, 1812. His father was a farmer in Oneida county, having purchased his land from the heirs of the famous Baron Steuben, of revolutionary fame. The son received his early education in the common schools and academies, after which he began teaching, and in his eighteenth year removed to Kentucky, where he entered Centre College, Danville, supporting himself by teaching. In 1832, when the cholera scourge devastated Kentucky, Samuel D. Burchard was the only student who remained; and though-out the plague he nursed the sick and tended the dying, becoming known as the student nurse of Danville. He had already been preaching upon religion, temperance and human rights, and immediately after graduation, in 1836, became a lecturer, and despite the unpopularity, in Kentucky, of the subject of abolition, addressed large and enthusiastic audiences. In 1838 he received from the Transylvania Presbytery his license to preach, and though tendered calls from various directions, eventually drifted to New York, accepting, in 1829, the pastorate of the old Houston Street Presbyterian Church in that city. The organization prospered under his administration, and in 1846 more commodious quarters becoming necessary, a new church edifice was erected in Thirteenth street. In 1855 the building was destroyed by fire, but a subscription was immediately started to rebuild it, and after a trip to

Clarence M. Boutelle.

Europe, Dr. Burchard returned in time to dedicate the new structure, continuing in charge until 1879. In 1856 he was appointed chancellor of Ingham University, making semi-annual visits during the eight years he filled that position, and later he occupied the presidency of Rutgers Female Academy. In 1861 he was appointed chaplain of the American Church in Paris. In 1884 he coined an expression which traveled back and forth over the country until it was a familiar phrase in the mouth of every citizen. Toward the end of the presidential campaign, the Republican managers assembled a meeting of ministers, which Mr. Blaine, the candidate, was to attend. Dr. Burchard, being selected to address Mr. Blaine on behalf of the clergymen, delivered an impromptu speech, which, though in the main tactful, ended with the words: "We are Republicans, and do not propose to leave our party and identify ourselves with those whose antecedents have been ruin, Romanism and rebellion." This termed the Republicans as enemies of all Catholics; but Blaine apparently failed to see it, and his smiling acquiescence gave the matter official weight. The Republicans had been making extraordinary efforts to secure the Roman Catholic vote, but the Democrats quickly took advantage of the situation, and flooded the country with posters headed "R—R—R," giving the impression of Republican sanction. Liquor dealers labeled their bottles "Ruin, Romanism and

Rebellion," and the expression was the tocsin of the closing days of the campaign. The vote proved so evenly balanced that the result finally rested on the returns from New York state, which gave the Democrats a plurality of 1,047 votes; and the effect of Dr. Burchard's fatal sentence was moderately estimated as a loss of several thousands. His life was made unpleasant for some time thereafter, but he bore the insults with fortitude and magnanimity, believing his words to be the working of Providence; for though he was a lifelong enemy of ruin, and a supporter of the Union during the civil

war, he had never been heard before to openly express antipathy to the Roman Catholic church. Dr. Burchard received the degree of A.M. from his alma mater, and that of D.D. from Madison University. He was an author of some note, having published two volumes and written a number of valuable articles for periodical literature. He died at Saratoga, N. Y., Sept. 25, 1891, survived by three sons, Dr. Thomas H., Robert B., and Louis Burchard.

McALLISTER, Matthew Hall, jurist, was born in Savannah, Ga., Nov. 26, 1800, only son of Matthew McAllister and Hannah Gibbons, sister of the millionaire, Thomas Gibbons. His ancestors, who came to this country from Scotland, were of noble descent, being of the Macdonald family, which is classed with the Plantagenets as one of the oldest families in Great Britain. Allister Macdonald, the progenitor of the Macallisters, became chief of a new clan known as "Clan Allister" in 1268, and was succeeded by his son, Abister MacAllister, who headed a powerful clan which prospered in Scotland until the downfall of Prince Charles in 1745. Matthew H. McAllister was educated at Princeton, subsequently studied law, and in 1820 was admitted to the bar, beginning practice in Savannah. His father had been U. S. district-attorney under Gen. Washington, and in 1827 the son was appointed to the same position. He was one of the political leaders in the crisis of 1832, and was actively opposed to nullification. In 1845 he was defeated for the

governorship of Georgia by a small majority, being a candidate of the Democratic party. He was a member of the state legislature in 1835, served for five years in the state senate, and through his efforts a court for the correction of errors was successfully established. He was a delegate to the national Democratic convention when Lewis Cass was nominated for the presidency in 1848, and during the several terms of his service as mayor of Savannah he was a recognized friend and protector of the negro population. In 1850 he moved with his family to California, where he engaged in the practice of law in San Francisco and five years afterwards was given the appointment of first U. S. circuit judge of that state. Land titles at that time were in a state of great confusion, and he rendered valuable service by the wisdom of his decisions upon this subject. He was also prominent for his prompt measures in putting down the vigilance committee by appealing to naval authority. Owing to declining health he resigned his office in 1862. He was an author of some repute, having written a "Eulogy on President Jackson," some miscellaneous papers, and a volume of "Legal Opinions," published by his son. The degree of LL.D. was conferred upon him by Columbia in 1860. In 1822 he was married to Louisa Charlotte Cutler, the belle and beauty of New York city, from Jamaica Plain, Mass., whose maternal ancestors were descendants of the Corday family of France. He died in San Francisco, Cal., Dec. 19, 1865. His son, Julian (who was born in New York city, Oct. 28, 1823, and died on Governor's island, N. Y., Jan. 3, 1887), was a soldier in the U. S. army, serving through both the Mexican and civil wars, in the former as an artilleryman and in the latter as chief of ordnance in the Pacific department. In 1866 he was made a major and placed on the board for determining the armament of the Pacific coast fortifications. On June 23, 1874, he became lieutenant-colonel, and in 1886 was placed in command of the New York arsenal on Governor's island, where he served as president of the board for testing field cannon.

PENICK, Charles Clifton, P. E. bishop, and 117th in the succession of American bishops, was born in Charlotte county, Va., Dec. 9, 1843, son of Edwin Anderson and Mary Maurice (Hamner) Penick. His father served in the civil war as a member of the 38th regiment Virginia volunteers, of Gen. Pickett's division, and was killed at the battle of Sharpsburg, Md. The son was educated at a military school in Danville, and was a student of Hampden-Sidney College, Prince Edward county, Va., at the breaking out of the war. He entered the Confederate army, serving for four years in the same regiment with his father and was quartermaster-sergeant at the time of the surrender of Gen. Lee. Resuming his studies, preparatory to entering the ministry, he was graduated at the Theological Seminary of Virginia in 1869. He was ordained deacon June 26th of that year by Bishop Johns, who advanced him to the priesthood, June 24, 1870. After laboring at Goodson, Va., and at St. George's Church, Mt. Savage, Md., he organized the Church of the Messiah, Baltimore, Md., and there remained until elected to the missionary episcopate. He was consecrated third missionary bishop of Cape Palmas and parts adjacent in St. Paul's Church, Alexandria, Va., Feb. 13, 1877. He went to Africa in November, 1877, and in the year following founded the Cape Mountain and Episcopal Mission in Liberia. After six years' service he was overcome by fever and tendered his resignation to the house of bishops in 1883; it was accepted in October of that year and he returned to pastoral work, becoming rector of St. Andrew's Church, Louisville, Ky., where he remained for nine years. He then became the rep-

S. D. Burchard.

representative of the commission for colored people in the board of missions, which position he resigned in 1896 to accept the rectorship of St. Mark's Church, Richmond, Va., on Nov. 15, 1896, remaining until Sept. 15, 1899, when he took charge of Christ Church, Fairmont, W. Va., where he still remains (1901). Bishop Penick is the author of "More Than a Prophet"; "Hopes, Perils and Struggles of Negroes in the United States of America"; "Wonders of Christmas"; "Everlasting Life"; "Memoirs, Hopes and Duties of the Confederate Soldiers"; "Science of Missions"; "Eternal Life," and "A Vision." In 1877 he received the degree of D.D. from Kenyon College. He was married, in April, 1881, to Mary, daughter of Isaac Hoge, of Wheeling, W. Va., and has had two daughters—Clara Emily (who died at five months of age) and Mary Clifton.

ADAMS, Henry, historian, was born in Boston, Mass., Feb. 16, 1838, son of Charles Francis and Abigail B. (Brooks) Adams. His father was the eminent statesman, third son of Pres. John Quincy Adams, and his mother was a daughter of Peter Charlon Brooks, of Boston. He received a liberal education, and was graduated at Harvard College in 1858. In 1861 he accompanied his father to London, and acted as his private secretary during the time he was U. S. representative in London. On his return, in 1870, he became instructor in history at Harvard University, which position he held for seven years, and then returned to London to reside for the second time. From 1873 to 1876 he was editor of the "North American Review," with Hon. Henry Cabot Lodge. His publications, which show marked historical ability, are: "Essays in Anglo-Saxon Law" (1876); "Historical Essays"; "Life of Albert Gallatin" (1879); "Life of John Randolph" (1882); "History of the United States," in nine volumes (1889); "The First and Second Administrations of Thomas Jefferson" (1889-90). He edited "Documents Relating to New England Federalism, 1800-15" (1877), and "Writings of Albert Gallatin" (3 vols., 1879). He resides in Washington, D. C.

MACDONALD, Charles, civil engineer, was born at Gananoque, Ont., Canada, Jan. 26, 1837, son of William Stone and Isabella (Hall) Macdonald, of Scotch descent. He received his early education at the preparatory school of Queens University, Kingston, Ont., and after some employment on the surveys for the Grand Trunk railway, he entered the Rensselaer Polytechnic Institute of Troy, New York, and was graduated C.E. in 1857. He engaged in railroad work for some years, but in 1868 turned his attention to bridge construction. He is now the senior partner of the Union Bridge Co., which was organized March 1, 1884, and which has designed and constructed many of the largest railroad bridges in the country. In 1886 this company secured the construction of the Hawkesbury bridge, in New South Wales, Australia, in competition with the leading bridge engineers of the world, and during its erection Mr. Macdonald spent some time in Australia. In 1896 this company's plan for a bridge over the Hudson river at New York was adopted, and arrangements are now being perfected for the construction of the work. Mr. Macdonald became a member of the American Society of Civil Engineers Sept. 15, 1869, and was vice-president in 1873 and 1874. He is a member and has been vice-president of the Canadian Society of Civil Engineers; a member of the Institute of Mining Engineers; a trustee of the Rensselaer Polytechnic Institute; of Stevens Institute; of the East river bridge; manager of St. Andrew's Society; a member of the Century, University and Union clubs of New York city, and president of the Engineers' Club. He has published a

treatise on the isometrical truss, and contributed a number of papers to the proceedings of the American Society of Civil Engineers. In 1891 he received the degree of LL.D. from Queen's University. He was married, Aug. 5, 1861, to Sarah Louise, daughter of William Tell Willard, of Troy, N. Y., and granddaughter of Mrs. Emma Willard. They have three children.

SCHNEIDER, Charles Conrad, civil engineer, was born in Apolda, in the Duchy of Saxony, Germany, April 21, 1843, son of Julius and Emilie (Bengel) Schneider. He received his preliminary education in his native city, and at the close of his school days was placed as an apprentice in a machine shop, where he acquired a practical knowledge of the details of iron working. He then began the study of engineering; was graduated at the Royal School of Technology, at Chemnitz, Germany, in 1864, and was engaged for some years in active professional practice as a mechanical engineer. In 1867 he came to the United States, and for three years was employed as draughtsman in the Rogers locomotive works at Paterson, N. J. In 1871 he accepted the position of assistant engineer of the Michigan Bridge and Construction Co. at Detroit, Mich., but in July, 1873, took charge of the engineer's office of the Erie railway in New York city. For some months, about the close of 1876 and the early part of 1877, he was engaged with the board of engineers appointed by the Long Island Bridge Co. in considering designs for a proposed bridge across the East river at Blackwell's island, to connect Long Island with New York city. From May, 1877, to July, 1878, he was employed as designer by the Delaware Bridge Co., of New York. On Aug. 1st he established himself independently as a civil engineer in New York, making a specialty of designing and superintending bridges and structural work for buildings. During this period he became the constructor of some important and famous bridges, such as the Fraser river bridge on the Canadian Pacific railway; the Niagara river cantilever bridge, the Marett gulch viaduct on the Northern Pacific railroad, and the Stony creek viaduct on the Canadian Pacific railway, which was at the time the highest viaduct built in North America. In 1886 he was awarded the first prize for the best competitive design for the Washington bridge across the Harlem river in New York. In the same year he received the Rowland prize from the American Society of Civil Engineers for his paper on the construction of the Niagara river cantilever bridge. In May, 1886, Mr. Schneider entered into an agreement with A. & P. Roberts & Co., of Philadelphia, owners of the Pencoyd iron works, to establish a bridge and construction department in connection with their works, of which he was appointed chief engineer. The bridge and construction department of the Pencoyd iron works, which was started at that time in a very modest way, has under his direction developed into the largest establishment in this country for the construction of bridges and structural steel and iron work, and has gained an international reputation. Many important structures have been constructed by the Pencoyd iron works under his supervision, such as the bridge across the Delaware river at Philadelphia, the steel arch bridge across the Niagara river at Niagara falls and numerous other bridges and steel structures for the United States as well as

C. C. Schneider

for Mexico, Japan, Egypt and other foreign countries. He held his position with the Pencoyd iron works until the same was consolidated with a number of other works and formed the American Bridge Co., of which he became vice-president in charge of engineering, on May 21, 1900. He is a member of the American Society of Civil Engineers and of the German Society of Engineers, of Berlin. Mr. Schneider was married, Jan. 8, 1880, to Katharine Clyde, daughter of John J. and Ruth H. (Luther) Winters. Her father was a resident of Paterson, N. J., and a well-known merchant of New York city.

CONGER, Frank, engineer and manufacturer, was born at Groton, Tompkins co., N. Y., May 21, 1849, son of Corydon W. and Mary Jane (Brown) Conger. His maternal great-grandfather, Ebenezer Brown, was a soldier in the revolutionary war, and one of Gen. Washington's body guard at Valley Forge; as he spelled his name Broom, and sometimes talked of going home to the Netherlands, he was doubtless born in Holland. Another ancestor, Richard Townley, was also a revolutionary soldier, and was afterward appointed state surveyor, later became a judge, and was for several terms a member of the legislature. His father was a general produce and commission merchant at Groton; in 1863,

failing in business through the mismanagement of others, he sold everything he possessed to satisfy his creditors, and began life again as a tanner. The son was educated in the common schools of his native town, and after he was thirteen years of age helped his father (who built up a very good transfer business) until 1868, when he was employed as clerk by Reynolds & Clark, dry-goods merchants at Groton. In 1870 he bought the dry goods store of L. Thomas & Co., assuming an indebtedness of about \$8,000. His entire capital amounted to \$450, of which he paid \$390 for one month's full page advertisement in the Groton "Journal," a move which attracted so much attention that his business increased rapidly and he was soon out of debt. A few years later he founded the C. W. Conger & Co. Mercantile Co., of Groton, and opened a number of branch stores in Tompkins and Cayuga counties. In 1885 he organized the Groton Bridge Manufacturing Co., and built a large plant for the construction of high-grade highway bridges, engaging some of the best bridge engineers in the country to carry on the work. In 1900, when the company went into the bridge trust known as the American Bridge Co., it was sending out \$2,000,000 worth of work annually. Mr. Conger planned and organized the American Bridge Co., becoming vice-president and general manager of its highway construction department. He is president of the First National Bank of Groton; president of the Universal Safety-Tread Co., of New Jersey; president of the American Visible Typewriter Co., of Delaware; vice-president of the Groton Carriage Works; director of the Conger Manufacturing Co., and the Conger Produce Co., of Groton. He is also a member of the Engineers' and Lawyers' clubs of New York city, and the Duquesne Club of Pittsburgh, Pa. He is an Odd Fellow and high degree Mason. Brooklyn, N. Y., is his present place of residence. He was married, in 1870, to Jennie E., daughter of Daniel Conant, of Groton. They have one daughter, Oressa.

JARVIS, Charles Maples, civil engineer, was born in Deposit, Delaware co., N. Y., April 16, 1856, son of Henry and Rachel (Peters) Jarvis, and is a descendant in the seventh generation of William Jarvis, who was one of the original settlers of Huntington, Long Island. William's son, Capt. Samuel Jarvis, was married to Naomi Brush, and by her had two sons, Bishop Abraham and Stephen Jarvis; the latter was married to Rachel Starr, and their son, Samuel, who was married to Abigail Sanford, was the grandfather of the subject of this sketch. At the age of two years the parents of young Jarvis removed to Binghamton, N. Y., where he received his early education. Entering the Sheffield Scientific School of Yale University, he was graduated in 1877, having taken the course in civil engineering. In April, 1878, he was offered a position as engineer with the Berlin Iron Bridge Co., of East Berlin, Conn., the company at that time being known as the Corrugated Metal Co. They had then about twenty employees, and did a business of about \$20,000 a year. For two or three years he made all the drawings, estimates and a part of the contracts, and also kept the books. The history of the Berlin Iron Bridge Co. is really the history of the life of Mr. Jarvis, as he has given his entire time and attention to its development, and has made it one of the most successful corporations in Connecticut. The company began the manufacture of iron bridges with the incoming of Mr. Jarvis as engineer, and soon took the lead, especially in the New England states, in furnishing the best bridges designed for the heavy traffic required in that section. Later they extended their business into other parts of the country and to all parts of the world. Mr. Jarvis was the first to recognize the demand for something better than the ordinary wooden frame for manufacturing buildings, and the Berlin Iron Bridge Co. became the pioneer in the introduction of structural iron and steel in the construction of manufacturing buildings, their work in this line appearing in every state of the Union and in almost every foreign nation. In 1886, at the death of S. C. Wilcox, Mr. Jarvis was placed at the head of the company as president, and under his leadership the business has been marvelously developed, so that now (1901) over five hundred men are employed at East Berlin and in all parts of the world, erecting steel bridges and buildings, and the business of \$20,000 per annum which was done when he first went to East Berlin in 1878, has grown one hundred fold. In May, 1900, the Berlin Iron Bridge Co., together with twenty-six other leading companies in the same line of business, were combined into one corporation, known as the American Bridge Co., of which Mr. Jarvis is vice-president, and has charge of the operating department, comprising twenty-seven manufacturing plants, and an army of men in the field erecting these bridges, buildings and all classes of metallic structures in all parts of the world. He was married, May 27, 1880, to Mary Morgan, daughter of Chauncey and Jane (Morgan) Bean, of Binghamton, N. Y., a direct descendant of Miles Morgan, of Massachusetts, by whom he has one daughter, Grace Morgan Jarvis.

ERRETT, Isaac, clergyman and author, was born in New York, Jan. 2, 1820. He was a brother of Russell Errett (1817-91), journalist

Isaac Conger

and representative to congress from Pittsburgh, Pa. (1877-83). His parents were among the first of the sect of Campbellites or disciples of Christ. Isaac's boyhood was spent in Pittsburgh, Pa., and he was largely self-educated, being thrown upon his own resources at the age of ten years. In 1840 he commenced to preach, and soon acquired celebrity by his oratorical powers. He was early associated with Alexander Campbell, the founder of the sect, in the editorial conduct of the "Millennial Harbinger," and in 1866 founded "The Christian Standard," which he published for a few years at Cleveland, O., but which was in 1869 removed to Cincinnati. He filled pastorates in Pennsylvania, Ohio and Michigan, and in 1851 was appointed corresponding secretary of the Ohio Christian Missionary Society, resigning that position in 1854, to take a similar position in the American Christian Missionary Society, of which he was elected president on the death of Alexander Campbell in 1866. He was president of Alliance College, Alliance, O., 1868-69, and in the latter year removed to Cincinnati, where he resided until his death. He was the first president of the Foreign Missionary Society, his office being terminated with his life. He published: "A Brief View of Christian Missions, Ancient and Modern" (Cincinnati, 1857); "First Principles; or, The Elements of the Gospel" (Cincinnati, 1867); "The True Basis of Christian Union," "Walks About Jerusalem: A Search After the Landmarks of Primitive Christianity" (Cincinnati, 1871; 5th ed., St. Louis, 1884); "Talks to Bereans. A Series of Twenty-three Sermons, Designed as a Help for Christians" (Cincinnati, 1872; 4th ed., St. Louis, 1884); "Letters to a Young Christian" (1877; 2d ed., 1881); "Review of Dr T. O. Summers's Tract, Entitled 'Why I am not a Campbellite'" (1877); "Evenings with the Bible: Old Testament Studies" (Cincinnati, 1884-87, 2 vols.); "Life and Writings of George Edward Flower" (1885); "Our Position: A Brief Statement of the Plea Urged by the People Known as Disciples of Christ" (1885). He also published a "Debate on Spiritualism" (with Rev. Joel Tiffany, 1855), and many pamphlets. He received the degree of LL.D. from Butler University in 1886. He died at Terrace Park, near Cincinnati, Dec. 19, 1888.

BURKE, Thomas, lawyer, was born in Clinton county, N. Y., Dec. 22, 1849, son of James and

Delia B. (Ryan) Burke. He attended the public schools of his native county until, in 1862, he removed with his parents to Iowa, where the following four years he was employed by railway contractors and in a store. In 1868 he went to Ypsilanti, Mich., and worked upon a farm to earn money for schooling. Entering Ypsilanti Seminary in 1869, he defrayed his expenses by teaching school, and was graduated in 1870. He then entered the University of Michigan, but not having sufficient means for expenses was obliged to

resume teaching. In 1872 he removed to Marshall, Mich., where he studied law, and in 1873 was admitted to the bar. He removed to Seattle, Wash., in 1875, and commenced the practice of his profession, in partnership with Hon. J. J. McGilvra. He was elected probate judge of King county in 1876, and re-elected in 1878. In 1880 and 1882 Judge Burke was the nominee for congress on

the Democratic ticket, but was defeated. He was appointed chief justice of Washington territory by Pres. Cleveland in 1888, which office he resigned in 1889. Judge Burke has contributed to the growth of Seattle by taking a prominent part in many of its most important enterprises. He was married, Oct. 6, 1879, to Caroline E., daughter of Hon. John J. McGilvra, of Seattle, Wash.

SNYDER, Edmund Bowman, clergyman, was born at Berwick, Pa., April 18, 1831, son of Charles and Parmelia (Mack) Snyder, of German and Scotch descent. His grandfather, John Snyder, was a colonel in the Pennsylvania militia during the revolution, Snyder county, Pa., being named after him; and Gov. Snyder, of Pennsylvania, was his uncle. He was educated in the public schools and Dickinson Academy, being graduated at the latter in 1854. He was graduated at William and Mary College in 1852, and entered the ministry of the Methodist Episcopal church. He has filled the following pastorates: Shippensburg, Pa., 1855-56; Bellefonte, Pa., 1857-58; Hollidaysburg, Pa., 1859-60, High Street Church, Baltimore, Md., 1861-62; Christ Church, 1866-68; Trinity Church, Chicago, 1869; Grace Church, Richmond, Ind., 1871-72; Trinity Church, Indianapolis, Ind., 1873-75; North Avenue Church, Allegheny, Pa., 1876-78; Spring Garden Street Church, Philadelphia, Pa., 1879-81; Germantown, Philadelphia, Pa., 1882-84, and Oklawaha, Fla., 1885-87. While serving in the latter pastorate his health became impaired, and in 1890 he withdrew from the ministry, later taking up work again at Jacksonville, Fla., where he continued as pastor until 1895. The degree of D.D. was conferred upon him by De Pauw University, in 1872. During the civil war he acted as superintendent of chaplains in the army, being a member of the Christian commission until it was disbanded in 1865. Dr. Snyder was, according to a contemporary, a splendid example of a Christian gentleman; a man who had the courage of his convictions, a conscientious preacher and an untiring worker. He was married, Aug. 26, 1856, at Williamsport, Pa., to Mary McCoy, and had three sons and two daughters. Dr. Snyder died in Jacksonville, Fla., June 28, 1895.

EAMES, Charles, diplomat, was born at New Braintree, Worcester co., Mass., March 20, 1812. After being prepared at Leicester Academy, he entered Harvard, where he was graduated in 1831. Subsequently he studied at the Cambridge Law School, and with John Duer in New York city, but was prevented by ill-health from practicing his profession. In 1845 he took a position in the navy department, and a few months later became associate editor of the Washington "Union." He was appointed, by Pres. Polk, commissioner to the Sandwich islands for the negotiation of a treaty, and returned to this country in 1850. After editing the Nashville "Union" for six months, he again edited the Washington "Union," until sent as minister to Venezuela by Pres. Pierce; he resigned this office and returned to Washington in 1858, where he practiced law until his death. During the last five years of his life he won distinction as an admirably lawyer, and for his knowledge of international law. He was a fine linguist and a brilliant conversationalist. He died in Washington, D. C., March 16, 1867.

E. B. Snyder

Thomas Burke

CALDWELL, Henry Clay, jurist, was born in Marshall co., W. Va., Sept. 4, 1832, son of Van and Susan () Caldwell. His father was of Scotch descent, while his maternal grandfather was a native of Ireland, a Methodist minister and a soldier of the war of 1812. Henry C. Caldwell was taken by his parents to Iowa in 1836. Here he received a common school education, and after reading law in the office of Wright & Knapp, at Keosauqua, Van Buren co., was admitted to the bar when less than twenty years of age, shortly thereafter becoming a junior member of that firm. In 1856 he was elected prosecuting attorney for his district, and in 1858 became a member of the state legislature, where for two sessions he was chairman of the judiciary committee in the lower body. Commissioned major of the 3d Iowa cavalry in 1861, he soon became its colonel, and served in the West until June, 1864, when Pres. Lincoln appointed him U. S. district judge for the district of Arkansas. When the U. S. courts were opened in that state, the docket was at once crowded with cases involving all the difficult and intricate questions growing out of the war. His court was the first to pass upon these, and his rulings, with a single exception, were affirmed by the supreme court. During his quarter of a century upon the bench his clear insight, his quickness at grasping the salient points of a case and disentangling them from the

web of misleading argument and idle verbiage, and his consequent success in dispatching business, have won him an enviable reputation. The force and clearness of his opinions have attracted the attention of the bench and bar of the country, and some of them have made him the leading authority on the subjects to which they relate. On March 4, 1890, he was appointed by Pres. Harrison U. S. circuit judge for the 8th circuit, which is the largest in the country, comprising ten states. As a member of the

Arkansas Bar Association and otherwise, he has taken active part in the amendment of the state laws. His address on the "Insecurity of Titles to Real Property" led to important legislation, and that on the "Anaconda Mortgage," a system then prevailing in Arkansas, caused an amendment of the law, and opened the way to the establishment of co-operative stores by the "Wheel" organizations of that state. He bore a prominent part in securing the independent rights of married women, in establishing the present system of state laws regulating the liquor traffic of Arkansas, and in substituting code pleading for the old and cumbersome methods of common laws.

HALTON (or HALTEN), Samuel, physician and statesman, was born at Danvers, Mass., June 9, 1738. He attained eminence as a physician in his native town, where he acquired a very extensive practice, but early gave attention to matters of politics and the stirring events of the time, and an ardent and patriotic spirit drew him from his profession into the vortex of public life. A few years before the revolution he was a member of the general assembly, and was there notable for his earnest advocacy of the principles of civil liberty. In 1774 he was a delegate to a convention which met at Essex to discuss the measures that could righteously be taken to maintain the civil liberties of the people of Massachusetts, where he was associated with such men as Timothy Pickering, Jr.; Elbridge

Gerry, A. Orne, Joseph Gerrish, Jr., Tristram Dalton and Jeremiah Lee. He was a member of the several provincial congresses of Massachusetts, 1774-75, and was also a member of the committee of safety. Later he was a member of the committee chosen by the first congress to consider and report as to the state of the province, and he was chosen a member of the supreme executive council (July, 1776), by the house of representatives when the authority of Gen. Gage and the mandamus councillors was repudiated. He thus participated in those great services which the civil body of patriots as well as the military rendered to their country in its extreme need, and made great personal efforts for the preservation of the liberties and civil rights of the commonwealth and of the country. Dr. Halton was chosen a member of the Continental congress by the state legislature in 1778, and in 1782 was re-elected. He was a member of the council board for several years, and later was appointed a probate judge, and also a judge of common pleas for the county of Essex. He was vice-president of the Massachusetts Medical Society. Judge Halton died at Danvers, Mass., Jan. 2, 1816.

McMASTER, Guy Humphrey, jurist and author, was born at Clyde, Wayne co., N. Y., Jan. 31, 1829. He was graduated, in 1847, at Hamilton College, where he was known as the most brilliant student ever entered there. In the following year he wrote the war lyric, "Carmen Bellicosum," better known as "The Old Continentals," which was published in the "Knickerbocker Magazine," and attained immediate popularity. His articles in the "Whig Review" and "Putnam's Monthly" appeared during his early youth, and when he was but twenty years of age he published a "History of Steuben County." Afterward virtually abandoning literature for the law, he was admitted to the bar in 1852, and practiced his profession in Steuben county until he was elected county judge and surrogate in 1863. He held both offices until their separation in 1883, when he was made surrogate. During this period he contributed to the press at frequent intervals, and edited the "Steuben Courier" in 1855, again in 1876, and in 1877, while abroad, gave to its columns a series of articles called "Other Side Letters," that was widely read and copied. He was also author of the following poems: "A Dream of Thanksgiving Eve" (1864); "The Commanders," which was delivered at the Newton Sullivan centennial celebration, and was included in "Gen. Sullivan's Indian Expedition," and "The Professor's Guest Chamber" (1880). Judge McMaster died at Bath, Steuben co., N. Y., Sept. 13, 1887.

HALL, Sarah (Ewing), author, was born at Philadelphia, Pa., Oct. 30, 1761, daughter of the Rev. John Ewing, D.D., a provost of the University of Pennsylvania. She acquired Greek and Latin by hearing her brothers recite, and she became a proficient student of astronomy, in which her father had attained some eminence. She was married, in 1782, to John Hall, the son of a wealthy planter in Maryland, and spent the first eight years of her married life at a beautiful farm on the banks of the Susquehanna river. In 1790 Mr. Hall removed to Philadelphia, where he acted as secretary of the land office and as U. S. marshal for Pennsylvania. In 1801 the family removed to Lambertton, N. J., where they lived until 1805. They resided in Maryland from 1805 until 1811, and in 1812 finally returned to Philadelphia, where Mr. Hall died in 1826. These constantittings were necessitated by the vicissitudes of the family fortunes, and it may be considered wonderful that, under these circumstances, and notwithstanding the fact that she was the mother of eleven children, to whom she gave full care and instruction, Mrs. Hall should still have

found opportunity to read, study and develop her literary talents. She was one of the earliest contributors to the "Portfolio," which her son, John E. Hall edited. She was an eminently pious and high-minded woman, and the tone of her articles and essays not only exhibited the clarity of the source from whence they flowed, but, says Mrs. Sarah Josepha Hale: "may be readily distinguished, as well by their vivacity as the classic purity of their diction." Mrs. Hall was best known for her "Conversations on the Bible" (1818). Having this work in contemplation, she studied Hebrew, although over fifty years of age, in order that she might be able to read the Scriptures in the original. A second volume was written by the author, and the whole was published in 1821 (5th ed., 1837). Her memoir was published by her son, Harrison Hall, in 1833. She was the mother of Judge James Hall, of Illinois; John E. Hall, lawyer and writer on jurisprudence, and Harrison Hall, journalist. Mrs. Hall died in Philadelphia, April 8, 1839.

McDILL, James Wilson, senator, was born at Monroe, Butler co., O., March 4, 1831, son of John and Fanny (Wilson) McDill. His ancestors, who were of Scotch Irish birth, settled in South Carolina before the war of the revolution, and the families on both sides furnished soldiers for that conflict. His father was a Presbyterian clergyman. The son received his preparatory education at the Salem Academy, Ohio, and entered Miami University, where he was graduated in 1853. He studied law at Columbus, was admitted to the Akron, O., bar in 1856, and removed to Iowa in the same year, going first to Burlington and later settling at Alton, where he entered upon the practice of his profession. He was chosen judge of Union county in 1860. In 1861 he was appointed clerk of the senate committee on the district of Columbia, and a clerk in the office of the third auditor of the treasury department, Washington, D. C. He resigned in 1866, and returned to Iowa, where he resumed the practice of law. In 1868 he was elected circuit judge of the 3d judicial district and in 1870 a district judge. In 1872 he was elected to the 43d congress as a Republican, and in 1874 was re-elected. He served on the committees on Pacific railroads and public lands, and on a special committee to inquire into the rights of the house of representatives with reference to the electoral count. He was appointed, in 1878, on the first board of railroad commissioners of Iowa, and served until 1881, when he was appointed to the U. S. senate in place of Samuel J. Kirkwood, who had resigned to become secretary of the interior in Pres. Garfield's cabinet. He was elected to the seat by the succeeding legislature, and served throughout the 47th congress, in which he earnestly advocated a national railway commission. In 1884 he was again appointed railroad commissioner, and upon the resignation of Judge Cooley as a member of the interstate commerce commission. Pres. Harrison appointed Judge McDill, Jan. 5, 1892, to fill the unexpired term, and reappointed him for the full term of six years, beginning Jan. 1, 1893. He was married, Aug. 26, 1857, to Narcissa, daughter of Samuel Fullinwider, of Des Moines county, Ia. They had five children. Judge McDill died at his home at Creston, Ia., Feb. 28, 1894.

HALLAM, Robert Alexander, clergyman and author, was born at New London, Conn., Sept. 30, 1807, a descendant of Nicholas Hallam, who, with his brother, John, and his mother, Alice, and her second husband, John Levean, emigrated to New London, Conn., from the Barbadoes in 1676. Nicholas married Sarah Pygman, of New London. Robert Alexander was graduated at Yale College in 1827, and at the General Theological Seminary, New York, in 1832. He was admitted to holy orders,

and was rector of St. Andrew's Church, Meriden, Conn., 1832-34, and succeeded Isaac W. Hallam as rector of St. James' Church, New London, Jan. 1, 1835. He was the eighth rector of this church, and remained there until his death. He was a member of the standing committee of the diocese of Connecticut, 1846-72, and a delegate to each recurrent meeting of the general convention from 1850 to 1868. Oxford University conferred upon him the degree of S. T. D. in 1853. His writings and his sermons contained much original thought, and were felicitous in expression. They met with universal approval, and his "Lectures on the Morning Prayer" (1856) were especially admitted and commended by his contemporaries. He also published "Sermons" (1850); "Moses: A Course of Lectures Delivered in the Chapel of St. James' Church, New London" (1859; new ed., 1879); "Sketches of Travel in Europe" (1869); "Sovereigns of Judah" (1877); "Annals of St. James', New London." He died at New London, Conn., Jan. 4, 1877.

BEATES, Henry, physician, was born in Philadelphia, Pa., Dec. 20, 1837, son of Henry and Emily A. (Baker) Beates. His father was a wholesale druggist, and son of Rev. William Beates (1776-1867), a Lutheran clergyman, at the time of his death senior of the German evangelical ministerium of Pennsylvania, and noted for his eloquence and impassioned power as a preacher.

Henry Beates, Jr., was educated in private schools in Philadelphia, and was graduated M.D. at the University of Pennsylvania in 1879. While a student he performed a meritorious service to medical education in Pennsylvania by beginning an agitation in favor of extension of the professional course from two to three years. In this cause he secured the cooperation of sixty-four of his fellow-students, who pledged themselves to enter upon a prolonged course and augmented curriculum. He was also instrumental in securing the passage of a law by the Pennsylvania legislature compelling a four years course preparatory to the practice of medicine. Immediately after his graduation he was appointed clinical assistant to Prof. William Pepper, D. Hayes Agnew, William Goodell, and John Ashurst, four of the most distinguished physicians of their time. He held this position for five years and then resigned, on account of the pressure of his large and constantly increasing practice. He was appointed a member of the state board of medical examiners by Gov. Pattison on Jan. 1, 1894, and was reappointed by Gov. Hastings in January, 1897, being elected president of the board in 1899. Gov. Stone appointed him to the position in 1900, and he is still active in the discharge of its duties. Dr. Beates is a member and was first vice-president of the Philadelphia Medical Club, in the affairs of which he has always taken a very active interest. He is also a fellow of the Philadelphia College of Physicians; a member of the Philadelphia County Medical Society, and chairman of its board of directors; a member and director of the Pennsylvania State Medical Society, and one of its judiciary council; a member of the Northern Medical Society; of the Pediatric and Pathological societies of Philadelphia, and of the American Medical Association. Among the organizations of a local and non-professional character of which he is a member may be mentioned the Academy of Natural Sciences and the Union League Club of Philadelphia, the American Academy of

Henry Beates, Jr.

Political and Social Science, and the Geographical Society of Philadelphia. Dr. Bentes is also a Mason. He has frequently contributed to journals and periodicals on subjects connected with advanced medical education and general professional subjects. On Sept. 3, 1896, he was married to Agnes Trevette, daughter of Francis Barrington, of Philadelphia.

CARY, Samuel Fenton, congressman, was born in Cincinnati, O., Feb. 18, 1814, son of William and Rebecca (Fenton) Cary. His father, who emigrated from New Hampshire to the Northwestern territory before Ohio became a state, was a lineal descendant of John Cary, of the Plymouth colony; while his mother, a native of New York state, was a sister of Gov. Renben E. Fenton's father. When Samuel was still an infant the family removed to a farm six miles out of Cincinnati, now known as College Hill. Freeman G. Cary, the founder of Farmers' College, was an elder brother, while the poets, Alice and Phoebe Cary, were consins of Samuel. The latter was graduated at the Miami University in 1835, and at the Cincinnati Law School in 1837, and practiced his profession with unusual success until 1845, when, in spite of the protest of friends, he abandoned the bar in favor of philanthropic work, and devoted all his energies to the cause of temperance. Early in life he had become a member of the Sons of Temperance, and in 1848 was elected to the head of that order in North America. He edited several annuals, wrote a number of tracts that were widely read, and for twenty years was the editor of temperance papers of large circulation. He made a great number of addresses in the temperance cause, speaking in all the principal cities, towns and villages throughout twenty-six states of the Union, and addressing large audiences in England, Ireland, Scotland, Wales and Canada. His speeches were the happiest combination of logic and argument with sarcasm, pathos and

apt illustration, and he played on the passions and feelings of an audience with remarkable skill. As a political speaker he first acquired a reputation in 1840, when he took a prominent part in the Harrison campaign, and his services in subsequent presidential campaigns were in demand for many years. In 1866 he was nominated as an independent candidate for congress by the workmen of the 2d congressional district of Ohio, and although the district was largely Republican, he was elected by a majority of 959 votes, taking his seat in the 40th congress (1867-69). He served as a member of the committee on education and labor, and weights and measures; and was conspicuous in his opposition to the impeachment of Pres. Johnson, as well as to other acts of the Republicans, thus securing the confidence and support of the Democratic members, though formerly identified with Whig and Republican organizations. A powerful speech delivered by him in the house of representatives on the rights and wrongs of labor, gained him extensive popularity among the working classes of the country. During the civil war he was an active and successful recruiting officer, and was commissioned general. In 1875 he was nominated for the office of lieutenant-governor of Ohio, on the Democratic ticket, and in the following year the "Greenback" party endeavored to elect him vice-president with Peter Cooper as president. Mr. Cary was married in Cincinnati, in 1836,

to Maria Louisa, daughter of Samuel R. and Martha Allen, of Cincinnati. She died in 1847, and he was married the second time at Oxford, O., to Lida S., daughter of L. S. Stillwell. His death occurred at College Hill, O., Sept. 29, 1900.

DAVIS, George Royal, soldier and member of congress, was born at Palmer, Hampden co., Mass., Jan. 3, 1840, son of Benjamin and Cornelia (Butlington) Davis. His father, a native of Ware, Mass., was a member of one of the old families of the state; his mother was a native of Connecticut, and her family were members of the Society of Friends. George R. Davis was graduated at Williston Seminary, Easthampton, Mass., in 1860; studied law, and was admitted to practice. He enlisted as a private in company H, 8th Massachusetts infantry, and before many months rose to the rank of captain. In that capacity he served with the 18th army corps in North Carolina. In August, 1863, he resigned his commission and returned to Massachusetts, where he organized a battery of light artillery. Soon after this he was transferred to the 3d Rhode Island volunteer cavalry, with the rank of major, and commanded that regiment until the end of the war. He was then transferred to the regular army in the civil department, being attached to the department of the Missouri under Gen. Sheridan, and took part in the campaign against the Indians in 1868 and 1869. He accompanied Gen. Sheridan to Chicago in 1869, and remained connected with the army until May 1, 1871, when he resigned. He remained in Chicago, engaged in insurance and manufacturing business, and there became colonel of the 1st regiment, Illinois national guard. His influence as a Republican, in political circles, led to his election to congress in 1878, from the 2d district of Illinois. He served for three terms, and was influential in carrying through several bills in behalf of Chicago, one of which appropriated a large sum for the improvement of the harbor. He was treasurer of Cook county in 1886-90, and in the latter year was the unanimous choice of the national commission for director-general of the World's Columbian exposition. He had been one of the most enthusiastic promoters of the enterprise, and was influential in having Chicago selected as the site for the exposition. He showed much energy, zeal and executive ability in making the preparations, and the success of the enterprise was largely due to him. Col. Davis was married in New Orleans, La., July 25, 1867, to Gertrude Schulin, who bore him two sons and four daughters.

KENT, William, jurist, was born in New York city, in 1802, son of James Kent, the distinguished jurist. He acquired his classical education at Union College, at which he was graduated in 1820, taking his master's degree in course. He was for many years a successful lawyer in New York city, and in 1841 was appointed by Gov. Seward a judge of the circuit court. Retiring from the bench in 1846, he accepted a call to the Royall professorship in Harvard University, but resigned it the next year, and returning to New York city, was thenceforward occupied in the adjustment of referee cases. Prof. Kent received the honorary degree of LL. D. from Hobart in 1843, and from Harvard in 1847. He was a member of the American Philosophical Society, and in 1838, with Benjamin F. Butler and David Graham the younger, cooperated in organizing the law faculty of the University of New York, becoming one of its original lecturers. He died at Fishkill, N. Y., Jan. 4, 1861.

JONES, Seaborn, lawyer and congressman, was born in Augusta, Ga., in 1788. He entered Princeton College, but was obliged to leave before he was graduated, on account of his father's failure in business. He then studied law, and was admitted

to the bar in his twenty first year by special act of the legislature. He was made solicitor general of the state in 1823; was a representative in congress in 1833-35, and in 1815-17. For fifty years he was one of the most distinguished lawyers in the state. Among his most treasured possessions was a cane made from the wood of the frigate Constitution, presented to him by his friend, Com. Isaac Hull. He died at Columbus, Ga., in 1874.

LANE, La Fayette, lawyer and congressman, was born in Vanderburg county, Ind., Nov. 12, 1812, son of Joseph Lane, who was a major-general in the Mexican war, and was appointed by Pres. Polk territorial governor of Oregon. The son was educated in Washington, D. C., and in Stamford, Conn. He adopted the profession of the law, and removed to Oregon with his father. He was elected to the legislature of that state in 1861, was defeated in 1866 as candidate for secretary of state; was a code commissioner for the state in 1874, and in 1875 was elected a representative to the 44th congress, in the place of G. A. La Dow, who died in May of that year. He was defeated at the next congressional election, and resumed the practice of law.

JOYCE, Charles Herbert, lawyer and congressman, was born near Andover, Hampshire, England, Jan. 30, 1830, son of Charles and Martha E. (Grist) Joyce. He was brought to the United States by his parents in 1836. They settled at Waitsfield, Washington co., Vt., where the son was brought up on a farm, and attended the district school until he was eighteen years of age, when he entered the Northfield Academy, completing his education there and at Newbury Seminary. For three sessions he was a page in the Vermont house of representatives; subsequently he studied law; was admitted to the bar in 1852, and began to practice at Northfield. He was state librarian in 1855, and county attorney in 1856-57. In June, 1861, he was appointed by Gov. Fairbanks major of the 2d Vermont infantry (three-years men), and was promoted to lieutenant-colonel in 1862. He fought gallantly with his regiment in the first battle of Bull run, at Lee's mills, Williamsburg, Golden's farm, Savage's station, White Oak swamp, second Bull run, and Fredericksburg, being several times warmly commended by his superior officers. A severe disability compelled him to resign his commission in 1863. He resumed the practice of law at Rutland, and won a high reputation for his brilliant arguments in criminal cases. He was a member of the legislature in 1869, 1870 and 1871, and was speaker during the latter term. In 1874 he was elected a representative from Vermont to the 44th congress, and was re-elected to the 45th, 46th and 47th congresses. During his eight years of congressional service Col. Joyce took an active part in the discussion of important questions, and made many speeches that attracted the attention of the whole country. In politics he has always been a Republican, and in every presidential campaign since 1852 has taken the platform for his party, not only in his native state, but in New Hampshire, Connecticut, Indiana and New York. He is one of the most effective speakers in the country, and has frequent calls made upon him for addresses on special occasions. He was married, Feb. 21, 1853, to Ronene Morris, daughter of Gurdon and Laura (Scott) Randall, of Northfield. They have one son, Charles Pitt F., who was graduated at Princeton in 1887, and at Dartmouth Medical College in 1892, and one daughter, Inez Rouene, who was married to Theron C. Crawford, of Michigan.

PALMER, Benjamin Morgan, clergyman, was born in Charleston, S. C., Jan. 25, 1818, son
Vol. XI.—31.

of Rev. Edward and Sarah (Bunce) Palmer, and a descendant of William Palmer, who came to this country from England in 1629, settling in what is now Salem, Mass. He was educated principally at home, and spent one year at Amherst College. After teaching for two years he resumed his studies at the University of Georgia, where he was graduated with honors in 1838. The following year he entered the Theological Seminary of Columbia, S. C. He was licensed to preach in 1841, and became pastor of the First Presbyterian Church of Savannah, Ga., in which he officiated until 1843, when he was called to the First Church of Columbia, S. C., and remained for fourteen years. Dr. Palmer was professor of church history and government in the Theological Seminary there in 1853-56. During the latter year he removed to New Orleans, and was installed pastor of the First Church, where he has remained through life, declining several professorships of theology and the chancellorship of the Southwestern Presbyterian University. His ability as a theologian, his usefulness as a preacher, and his self-denying labors in times of pestilence and of other calamities, made him perhaps the most conspicuous figure in the city and the most beloved by all classes. He served as chaplain in the army of Tennessee during the civil war, but without commission. He was the first moderator of the Southern General Assembly, organized in 1861, and served as commissioner in ten general assemblies, three of them being of the old school Presbyterian church. The degree of D. D. was conferred on him by Oglethorpe University, Georgia, in 1852, and that of LL. D. by Westminster College, Fulton, Mo., in 1870. For a period of years he was associate editor of the "Southern Presbyterian Review," and was later a contributor to the "Presbyterian Quarterly." He is the author of the "Life and Letters of Rev. Dr. J. H. Thornwell"; "The Theology of Prayer"; "The Family in its Civil and Churchly Aspects"; "The Broken Home; or, Lessons in Sorrow," and "Twelve Lectures on the Formation of Character." On Oct. 7, 1841, he was married to Mary Augusta, step-daughter of the Rev. Dr. George Howe, of Columbia, S. C. They had six children.

BEALL, Reazin, soldier, was born in Montgomery county, Md., Dec. 3, 1769. In March, 1792, he was appointed an ensign in the U. S. army, and in 1793 battalion adjutant, serving under Gen. Anthony Wayne in his campaign against the Indians. Resigning from the army he settled in Pennsylvania in 1801, but two years later removed to New Lisbon, O., and in 1815 to Wooster. In September, 1812, he was made brigadier-general of Ohio volunteers. Immediately organizing a detachment, he marched at the head of several hundred men to Wayne and Richland counties to protect the frontier, and subsequently joined the troops under Gens. Wadsworth and Perkins. The command later devolved upon Gen. Perkins as senior officer, and Gen. Beall returned home. He occupied various public stations in Ohio, and was a member of congress from that state from 1813 to 1814, when he resigned to accept the position of register of the land office for the Wooster district, in which he continued until 1824. He was chosen to preside over the great Whig mass convention held at Columbus, Feb. 22, 1840, and afterward was chosen a presidential elector. He died at Wooster, O., Feb. 20, 1843.

WARREN, Francis Emroy, first state governor of Wyoming (1890), was born at Hinsdale, Mass., June 20, 1814, son of Joseph S. and Cynthia E. (Abbott) Warren. His ancestry is traced in a direct line to the Warrens who handed with the Pilgrim fathers, and he is a descendant of Gen. Joseph Warren, who was killed at Bunker hill. His education was begun in the district school at the early age of three years, and when eight years old he was at the head of a class of pupils nearly double that age. Later he completed a course at Hinsdale Academy. In 1861 he enlisted in the 49th Massachusetts volunteers and served through the civil war. He participated in the capture of Fort Hudson, and was one of the members of the "forlorn hope," who preceded the column to fill up with fascines the ditch in front of the earthworks. Three-fourths of this force were killed or wounded and he himself was stunned. After the war he engaged in various pursuits until 1871, when he formed at Cheyenne, Wyo., the mercantile partnership of Converse & Warren, which, a short time later, became F. E. Warren & Co.; still later the F. E. Warren Mercantile Co. was incorporated, of which he is now (1901) the president. He has devoted much time to cattle raising since 1873, and organized in 1883 the Warren Live Stock Co., being still its president. This is one of the largest concerns of its kind in Wyoming, controlling more than 100,000 acres of land, over which roam thousands of sheep and horses. He was one of the most prominent promoters of the Electric Light and Gas Co. of Cheyenne; erected many of the important buildings of that town, and contributed largely to its development. In 1872 he was elected a trustee of Cheyenne; served several terms in the city council; was mayor of the city; president of the territorial council, and for six years the treasurer of Wyoming. In March, 1885, he was appointed governor of Wyoming territory, serving until December, 1886, and in March, 1889, he was again appointed to the office, which he held until 1890. On July 10th of that year Wyoming was admitted to the Union, and he was then regularly elected as the first governor of the state. His administration was marked with firmness and wise discretion during trying emergencies. The anti-Chinese riots of 1885 were so formidable as to necessitate calling out the government troops, and this was done so promptly that much property and many lives were saved. He was instrumental in having measures enacted which led to the building of a university, an insane asylum, a capitol edifice at Cheyenne and the Cheyenne and Northern railroad. Gov. Warren worked incessantly both within the territory and at Washington for the admission of Wyoming to the Union, and the organization of the state in 1890 was largely due to his efforts. He resigned from

the governorship to accept an election to the U. S. senate, where he took his seat on Nov. 18, 1890, for the term ending March 3, 1893. He was again elected, however, resuming his seat March 4, 1895, and in 1901 was re-elected for the term ending March 3, 1907. In 1871 he was married to Helen M., daughter of Matthew Smith, of Middlefield, Mass.

BARBER, Amos Walker, physician and second governor of Wyoming (1890-95), was born at Doylestown, Bucks co., Pa., July 25, 1861, son of Alfred H. and Asenath (Walker) Barber. His father was in the government special detective ser-

vice during the civil war, being frequently commended for his faithful performance of duties. The son was educated in the Doylestown Academy, and subsequently entered the University of Pennsylvania, where he was graduated in 1883 after taking full literary and medical courses. After graduation he was appointed regular resident physician of the University Hospital, and served also as staff physician to the Children's Hospital of Philadelphia, the Pennsylvania Hospital and as substitute resident in the Episcopal Hospital. He was selected in 1885 to take charge of the hospital at Fort Fetterman, Wyoming, and was shortly after his arrival appointed acting assistant surgeon U. S. army. While serving in this capacity he accompanied Gen. Crook's forces into Arizona, and upon his return was stationed at Fort Russell and Fort Fetterman. He gained a wide reputation among the settlers, especially for his skill in treating rattlesnake bites by inoculation with permanganate of potassium. After resigning from the army in 1886 he had charge of the hospital of the Wyoming Stock Association, and in 1889 began general practice at Cheyenne. On July 10, 1890, he was nominated by the first Republican convention for secretary of state and was elected by an overwhelming majority. When Gov. Warren resigned his office in 1890 to accept a U. S. senatorship, Dr. Barber by constitutional provision succeeded him as chief executive, at the same time retaining his secretarial duties. Gov. Barber's administration was characterized by firmness, decision and promptitude in action. In 1891 he quelled the Pine Ridge Indian outbreak by calling out the militia without delay. A similar determination was manifested in 1892 on the occasion of the Rustler war between the cattle and sheep men. The governor at once called out the state troops and finally appealed for assistance to the Federal government. He was severely criticised for refusing to turn over to the authorities of Johnson county certain prisoners accused of cattle-stealing, holding them in custody in Fort Russell until they could be tried on the indictment, but he was upheld by the Federal authorities. During his incumbency as governor he continued his medical practice. He has written considerably for the medical press on gunshot wounds and snake bites and has contributed stories of western life to "Harper's Weekly." Gov. Barber was married, in 1892, to Anella, daughter of Thomas A. Kent, of Cheyenne, Wyo.

OSBORNE, John Eugene, third governor of Wyoming (1893-95), was born at Westport, Essex co., N. Y., June 9, 1858, son of John C. and Mary (Reel) Osborne. His grandfather, Robert Osborne, emigrated from England to America in 1840. His father was a saddler by occupation, and his mother was the daughter of a Canadian capitalist. The son was graduated at the high school of his native town in 1876, after which he studied medicine at the University of Vermont. During the summer months he worked in a drug store to pay his college expenses, and was finally graduated with honors in 1880. Removing at once to Rawlins, Wyo., he engaged there in the practice of medicine, and later established a drug store. In a short time the Union Pacific Railway Co., recognizing his ability, appointed him as its railway surgeon, and he served

as such for five years. Gradually branching out in other directions, his keen business ability and general enterprise soon made him one of the foremost men of the state, and he is now probably the largest individual sheep owner in Carbon county and the largest individual tax payer in the city of Rawlins, yet at the time he arrived in Wyoming he was in debt for his surgical instruments and medical library. Gov. Osborne has always been a staunch Democrat. In 1882 he was elected to the territorial legislature; was appointed by Gov. Moonlight as chairman of the state penitentiary commission in 1888, and served

for one term as mayor of Rawlins. He was sent as a delegate to the national Democratic convention of 1892. In the fall of the latter year he was elected governor of Wyoming on the Democratic ticket, carrying the state by a majority of 1800 and leading the entire state ticket by several hundred. After serving from 1893 to 1895 he was unannouncedly renominated, but declined the honor. In 1895 he was a member of the Bimetallic Democratic national committee for Wyoming; in 1896 was chairman of the Wyoming delegation at the Chicago convention, and was elected to the 55th congress. Twice he received the minority nomination for U. S. senator.

He became president of the Rawlins Drug Co.; of the Rawlins Electric Light Co.; of the Rawlins Hotel Co., and served as secretary of the Rawlins Wool Storage Co. He is the owner of the Rawlins Opera House and several business buildings in that city. Though not now practicing medicine generally, he is still known (1901) as a consulting physician and surgeon. His favorite pastimes are hunting and fishing, and he takes great pleasure in looking after the active interests of his extensive stock range. He is a prominent Mason, in which order he is a past eminent commander of the Knights Templar and past high priest of the chapter of Royal Arch Masons.

RICHARDS, William Alford, fourth governor of Wyoming (1895-99), was born at Hazel

Green, Wis., March 9, 1849, son of Truman Perry and Eleanor (Swinnerton) Richards, both natives of central Illinois. He was brought up on his father's farm, and attended the village school. In 1863 he joined his elder brother, Monzo, in the army of the Potomac, and being refused enlistment on account of his youth, he obtained a position as an ambulance driver. He taught schools in Wisconsin and Illinois for three years (1866-69), spending the summer vacations in farm labor. In 1869 he went west; spent several months as a lumberman in Omaha, Neb., and then joined a government surveying party on its way further west. By studying under them he became a capable surveyor and civil engineer. Returning to Omaha, he studied law in the office of Judge Wakeley, but did not practice. In 1869 he was admitted to practice in the supreme court of Wyoming. He spent seven years in the survey of the boundaries of Wyoming and public surveys in Ne-

braska, being employed during the winter seasons upon the Omaha "Tribune and Republican" on editorial work. In 1876 he removed to California, where he engaged in farming and surveying, and in 1879 was elected county surveyor of Santa Clara county. Owing to ill health, he went to Colorado Springs, Col., in 1881, and was city engineer and county surveyor of El Paso county. In 1881 he resigned his official positions, and returning to Wyoming, settled on a remote tract of land, which he cultivated, making use of the then almost unknown system of irrigation. In 1889 he became manager of a large cattle company, which developed the possibilities of the surrounding cattle range. During 1890-94 he was U. S. surveyor general, residing in Cheyenne. In 1891 he was elected, on the Republican ticket, governor of Wyoming, his term of office beginning in January, 1895. In 1896 the Bannock Indians threatened to rebel, but Gov. Richards succeeded in averting the trouble by his decisive action in enforcing the law of the state against hunting during the close seasons. After a hard fought legal contest his position was fully sustained by the U. S. supreme court. He declined a renomination, and was appointed by Pres. McKinley assistant commissioner of the general land office, in which position he achieved a decided success. In the opening to settlement and entry of the Kiowa, Comanche, Apache and Wichita Indian reservations in Oklahoma, in 1901, of which he had sole charge. He was married, in 1874, to Harriet Alice, daughter of Milan Hunt, of Oakland, Cal., and has three daughters.

RICHARDS, De Forest, fifth governor of Wyoming (1899-19—), was born at Charlestown, N. H., Aug. 6, 1846, son of J. De Forest and Harriet Bartlett (Jarvis) Richards, of New England ancestry. Many of his family were prominent in the civil and military affairs of the revolution. In the exciting days prior to and during the revolutionary war his maternal great-grandfather, Dr. Charles Jarvis (1748-1807), was the intimate friend and adviser of John Hancock and Samuel Adams. It was the custom of these gentlemen to meet regularly at the doctor's house and discuss the engrossing questions of the day, and he made many eloquent speeches in Faneuil Hall in the cause of American liberty. Charles' son, William Jarvis (1770-1859), was U. S. consul at Lisbon, Portugal, during the administrations of Jefferson and Madison. Taking advantage of the Napoleonic war, he secured many thousands of merino sheep, which he exported to America, and from this strain were nearly all the flocks of fine woolled sheep in America and Australia derived. De Forest Richards attended Kimball Union Academy, Meriden, N. H.; spent one year at Phillips Andover Academy, and in 1865 went to Alabama, where he engaged in cotton planting. Two years later he became a member of the state legislature; was sheriff of Wilcox county (1868-71), and was treasurer of that county (1872-76). He was engaged in mercantile pursuits in Camden, Ala., until 1885, when he removed to Chadron, Neb., and was elected county treasurer of Dawes county in the same year. He organized the First National Bank of Chadron, and removing to

John E. Osborne

W. A. Richards

D. F. Richards

Douglas, Wyo., in 1886, organized the First National Bank there, of which he became president; he still (1901) remains in this position. He also engaged in merchandising and in sheep raising. He was a member of the Wyoming constitutional convention of 1890, and was elected state senator in 1893. He served as colonel of the 1st regiment, W. N. G. (1891-94). In 1898 he was elected governor of Wyoming on the Republican ticket. He was married, June 1, 1871, to Elise J., daughter of J. C. Ingersoll, of Camden, Ala.

TRIPLER, Charles Eastman, inventor, was born in New York city, Aug. 10, 1849, son of Archibald B. and Sophie L. (Davis) Tripler. He was educated at private schools, but his preference was for mechanics and chemical experiments. Having access to a shop with modern appliances and the best tools, he became expert as a mechanic, and when, in 1871, the state of New York offered a reward of \$100,000 for the invention of a canal-boat which would not wash the banks, he applied himself to this problem, and constructed several model boats driven by steam engines of his own construction. In 1872 he built an engine for a naphtha launch, condensing the naphtha in such a manner that it could be used over and over, and he spent considerable time in the South Kensington Museum, London, studying the development of the steam engine.

Upon his return he erected in Florida one of the largest saw mills and factories in the South for the manufacture of railroad ties, of which he was superintendent. His experiments with gases began as early as 1873, and he also built a dynamo on new principles, and carried on numerous experiments in electric lighting. He separated hydrogen and oxygen from water by passing steam through cylinders containing iron and other metals, which gathered the hydrogen at one point and the oxygen at the other; the process did not prove of any commercial value. Since 1890 he has devoted himself entirely to

the liquefaction of gases—making in January the first regenerative coil—and to the discovery of means for their application to the many uses to which they can be put. In that year he discovered some of the principles which he has since utilized in liquefying air, his process being different from any previously employed. His process is this: with steam power and a compressor air is forced into an apparatus containing coils, copper pipes and peculiar valves, and the temperature of the air is so reduced that within fifteen minutes from the time the compressor starts liquid air is pouring out of the faucet. This liquid is then passed into another apparatus to produce a still more intense cold, until such a point is reached that the external air rushing in through the inlet pipe by its natural pressure to fill the vacuum caused by the condensation itself becomes liquefied. The French scientist, Pictet, succeeded in liquefying oxygen gas in 1877; the Polish scientist, Olewski, liquefied nitrogen gas in 1892. James Dewar subsequently liquefied both gases at the same time, but the minimum cost was \$500 per ounce, and liquid air was looked upon solely as a curiosity of science. Mr. Tripler was the first to make a practical use of liquid air, reducing the cost of production to five cents per gallon. He claims that it can be used for refrigeration, not only for articles of food, but for cooling apartments and for supplying sick rooms and hospitals with an air free from germs; as a motive power for ships in the same manner as steam,

but without the oppressive heat, and that vessels using it, freed from the necessity of carrying an immense weight of coal, will be able to make voyages of any length at great speed, and some of the difficulties in connection with aerial navigation will be surmounted for the same reason. His appliances, inventions and rights are controlled by the Tripler Co., which under his personal supervision is manufacturing liquid air in commercial quantities. Mr. Tripler was married in New York city, Jan. 28, 1875, to Isabel S., daughter of John H. Davis, and has one son and one daughter.

STACK, Edward, naval officer, was born in France about 1755, of Irish descent. His grandfather was a follower of Lord Clare, who sought refuge in France in the days of William of Orange. According to Augustus C. Buell, when Paul Jones began to recruit French volunteers for the Bon Homme Richard, Edward Stack was sub-lieutenant in Walsh's famous regiment of marine artillery attached to the French navy. He obtained permission from the French naval authorities to join Jones's expedition, and during the naval engagement with the Scorpion he commanded the tops of the Bon Homme Richard, performing valuable and gallant service. He was on the Ariel when Jones returned to Philadelphia, Pa., in February, 1781. He became an American citizen, and after serving afloat in the Continental navy for a year or more, making one cruise with Capt. Barry in the Alliance, he was married to an American girl named Rysdyk, and settled near Middletown, in Orange co., N. Y., where his descendants are still to be found.

DOWDELL, James Ferguson, senator, was born in Jasper county, Ga., Nov. 26, 1818, son of Louis Jefferson and Mary (Farley) Dowdell, both natives of Virginia. He received a classical education, and was graduated at Randolph-Macon college in 1840. He read law in the office of Gen. H. A. Harrison, of La Grange, and was admitted to the bar in April, 1841. He practiced his profession for a short time in Greenville, Ga., but it was not to his taste, and he retired in 1846, removing to Chambers county, Ala., where he purchased a farm. Mr. Dowdell inherited a large estate from his father in 1848, and did not confine himself to any one line of work. He became interested in politics; was trustee of a normal college and a class leader in his church. In 1848 he was a presidential elector. In 1852 he was elected to the 33d congress on the Democratic ticket, and was re-elected to the 34th and 35th congresses, in the last serving on the committee on ways and means.

HAYWARD, Lemuel, physician, was born at Braintree, Mass., March 22, 1749. He was graduated at Harvard in 1767; studied medicine under Dr. Joseph Warren, and settled as a physician in Jamaica Plain, Mass. He participated in the war of the revolution, and was for some time a surgeon in the Continental army. In 1783, on the restoration of peace, he returned to the practice of his profession in Boston, which became very extensive. He was eminent for his success in the treatment of the small-pox, which was extremely prevalent in and about Boston in his time. He was an original member of the Massachusetts Medical Society, and was for some time a member of its executive council. He withdrew from practice in 1798, and died at Braintree, Mass., March 20, 1821.

HAYWARD, George, physician, was born in Boston, Mass., March 9, 1791, son of Dr. Lemuel Hayward. He was graduated at the University of Pennsylvania in 1812, pursued his medical studies and practiced as a physician in Boston. He held the chair of clinical surgery at Harvard, 1835-49, was prominent in the profession, and made valuable

contributions to its literature. His "Surgical Reports and Miscellaneous Papers on Medical Subjects," published in 1855, was declared by the "North American Review" to be "valuable alike to the non-professional reader, to the medical student, and to the veteran practitioner. . . . Dr. Hayward's book, though intended for the profession, is neither a treatise on surgery nor on medicine. . . . We welcome it not only as a timely addition to positive medical knowledge, but as a valuable contribution on subjects of the first importance to every intelligent individual." Dr. Hayward performed the first capital operation in which the patient was subjected to the influence of sulphuric ether, which anæsthetic he very highly extols in his book as compared with chloroform. He was president of the Massachusetts Medical Society, and a member of the Academy of Arts and Sciences. He contributed largely to scientific periodicals, and published beside the volume already referred to: "Outlines of Physiology" (1831); a translation of "Bichat's General Anatomy" (1818-22, 3 vols.); translation of Beckler's "Additions to Bichat's Anatomy" (1823). He died in Boston, Mass., Oct. 7, 1863.

KUNKEL, John Christian, lawyer and congressman, was born in Harrisburg, Pa., Sept. 18, 1816. He was graduated at Jefferson College, Pennsylvania, afterward studied at the Carlisle Law School, was admitted to the bar of Dauphin county and soon won a reputation, both in his profession and as a public speaker. He was elected to the legislature in 1844, and served for three terms in succession. In 1851 he was elected to the state senate, and at the close of the first session was chosen speaker. In 1854 he became a member of the 34th congress from his native state, and was re-elected in 1856, his second term expiring in 1859. He served on the committee on claims. Mr. Kunkel died in Harrisburg, Oct. 14, 1870.

HARRINGTON, Joseph J., clergyman, was born at Roxbury, Mass., Feb. 21, 1813. His father, Joseph Harrington, was a lawyer. He attended the public schools of Roxbury, and in 1827 entered Phillips Exeter Academy, from which he passed to Harvard College, where he was graduated in 1833. During his college term he taught school at Walpole, and shortly before the end of his last term at Harvard, by leave of the president, he assumed the position of principal of the academy at East Greenwich, R. I. In 1834 he took the principalship of the Hayes School, South Boston, where his influence entirely changed the tone and character of the school. While at South Boston he founded a literary and self-improvement society, with which he was affiliated for some years. He studied theology, continuing his school until the last year of his divinity course. In the winter of 1839-40 he was stationed as a missionary at Chicago, Ill., under the auspices of the American Unitarian Association. In 1840 he was ordained in the Federal Street Church, Boston, and in October of the same year returned to Chicago, as pastor of the First Unitarian Church of that city. He was married there to Helen E. Griswold, April 6, 1841. In the summer of 1841 he visited Milwaukee, Wis., where he was the first to preach Unitarian doctrines; the result of his mission being the establishment of a church in that city. In 1843 he was instrumental in establishing the first Unitarian church at Rockford, Ill., and his eloquence and power were very warmly admired by all denominations in that city. In 1844 he visited his old home in the East, and resolved to resign his pastorate in Chicago. He was actively employed for some time in an endeavor to establish a Unitarian society at the "South End" of Boston, and for a year had pastoral charge of the Suffolk Street Chapel. During this time he received a call from Hartford, Conn., which he declined,

but on its repetition, in 1845, he accepted. Unitarianism was not popular in Hartford, and Mr. Harrington was avoided both in public and in private by several of the ministers of other denominations, exceptions being Dr. Horace Bushnell, Rev. Thomas Clark, of the Episcopal church, and Rev. Mr. Gallaudet. He was most earnest in Hartford, as elsewhere, in his advocacy and encouragement of all measures tending to facilitate and advance the cause of education, and he served for several years as chairman of the board of visitors of the public schools. In 1852 he was called to San Francisco, but died a few months after his arrival, on Nov. 2.

LINDSAY, William, lawyer, was born in Rockbridge county, Va., Sept. 4, 1835, son of Andrew and Sallie G. (Davidson) Lindsay, both of whom were members of families of Virginia farmers. He was educated in country schools, settled in Clinton, Hickman co., Ky., in 1854; there took up the study of law, and in 1859 began the practice of his profession. During the civil war he served with the Confederate army, entering as a private, but being promoted to a lieutenantcy and afterwards to the rank of captain. His military career was brought to a close in 1865, when he was paroled as prisoner of war at Columbus, Miss., and he returned that same year to Clinton, where he resumed his legal practice. In 1867 he was elected state senator for the Hickman district and in 1870, his success as a lawyer having brought him into prominence, he was made judge of the Kentucky court of appeals, serving until September, 1878, during the last two years as chief-justice of the court. He removed to Frankfort, Ky., in 1878, and has since practiced his profession there. This new district elected him state senator in 1889, and he was also appointed and served as a member of the World's Columbian commission for the country at large from the time that commission was organized until Feb. 20, 1893. In 1893 he was elected U. S. senator, to fill the vacancy caused by the resignation of John G. Carlisle, and in 1894 was re-elected for the full term, commencing March 4, 1895. In 1883 Mr. Lindsay was married to Eleanor, daughter of Dr. George N. Holmes, a native of Kentucky, but at the time of his death a citizen of the state of Georgia.

WEAVER, Jonathan, bishop of the United Brethren in Christ, was born in Carroll county, O., Feb. 23, 1821. His father's father emigrated from Germany to this country about 1750, settling at Lancaster, Pa., but two years later removing to Washington county, Pa. His mother's parents, also natives of Germany, were residents of Washington county; there his father and mother were born, and there in 1808 they were married. In 1817 Mr. and Mrs. Weaver removed to Carroll county, O. Jonathan, the youngest of twelve children, grew up on his father's farm, and with the exception of a term at Hagerstown (O.) Academy, had no schooling other than that to be obtained in district schools. He joined the United Brethren church at the age of seventeen; became a class leader at the age of nineteen; was licensed to preach at the age of twenty, and was placed on a circuit at the age of twenty three. Feeling keenly the lack of a college

and seminary training, he sought by reading and study to make up in part for the deficiency. Mr. Weaver spent five years in the pastorate, five years as presiding elder, and eight years as financial agent and manager of Otterbein University, Westerville, O., which, in 1870, conferred upon him the degree of D. D. In 1865 he was elected bishop of the United Brethren in Christ, and was continued in this high office, having been re-elected by right successive general conferences. As a preacher he was plain and practical, dealing mostly with what are accepted as the fundamental truths of Christianity. His simplicity of style and grasp of the truth, together with a deep conviction that his message was from God, made him exceedingly popular. No one in the denomination exercised a larger influence in shaping its policy, and even beyond the limits of the denomination his services as a preacher and lecturer were in great demand. Bishop Weaver was a voluminous writer for the church paper, "The Telescope," and his articles were eagerly read, for his style was clear and fresh, and further was characterized by delicate humor. His chief published works were: "Lecture on Secret Societies" (1862), pamphlet; "Discourses on the Resurrection"; "Divine Providence" (1873); "Ministerial Salary"; "Universal Restoration Carefully Examined" (1878); "Practical Comment on the

Confession of Faith of the United Brethren" (1892); "Heaven; or, that Better Country" (1899), and "Christian Theology" (1900). He also edited "Christian Doctrine" (1889), a work by thirty-seven different authors. At one time he prepared manuscript for a book on "Baptism," but concluded not to publish it, and he left in manuscript form, ready for publication, a volume of sermons to be entitled "Practical Theology." His "Heaven" was spoken of by the Boston "Congregationalist" as "reverent, practical and devotionally inspiring." The "Central Christian Advocate" of St. Louis, described it as "a delightful volume, in which he puts the fruit of much meditation and in-

vestigation concerning the immortal life. While it is written especially to quicken aspiration and strengthen faith and kindly devotion, it is at the same time intended to set forth afresh the arguments upon which belief in immortality is founded. He deals with the fact and nature of another life, and with some of the revealed aspects of heaven." Bishop Weaver was married in Mahony county, O., Feb. 24, 1847, to Keziah L. Robb, by whom he had two daughters. She died four years later, and in 1854 he was married to Mary E. Forsyth, of Stark county, O., by whom he had nine children. She survived him with four sons and two daughters. Bishop Weaver died in Dayton, O., Feb. 6, 1901.

KNIGHT, Jonathan, civil engineer and congressman, was born in Bucks county, Pa., Nov. 22, 1777. He removed with his parents, in 1801, to East Bethlehem, Washington co. He was chiefly self-educated, and became a school-teacher at the age of twenty one, at the same time pursuing the occupation of a surveyor of lands. In 1816 he was appointed by the state government to make and report a map of his county. After serving for three years as county commissioner, he, in 1827, was appointed a commissioner to extend the national road from Wheeling through Ohio and Indiana to the eastern line of Illinois. In 1822 he was elected to the legislature and served for six years. In 1828 he visited

England to acquire a thorough knowledge of civil engineering, and on his return was appointed chief engineer on the Baltimore and Ohio railroad. In 1854 he was elected a representative in the 34th congress from Pennsylvania. He died at East Bethlehem, Pa., Nov. 22, 1858.

DUNNELL, Mark Hill, congressman and diplomat, was born at Buxton, Me., July 2, 1823, son of Samuel and Achsah (Hill) Dunnell. His paternal ancestors were of Scotch descent, coming to this country about 1640, while his mother's family was of English origin. He was graduated at Colby University, Waterville, Me., in 1849; he then became a teacher, and for five years was principal of Norway and Hebron academies. In 1854 he was elected to the Maine house of representatives; in 1855 became a member of the state senate, and in 1856 served as a delegate to the National Republican convention at Philadelphia. From 1855 to 1859 he was state superintendent of common schools. Obtaining his admission to the bar, Mr. Dunnell commenced the practice of law at Portland, Me., in 1860. He enlisted as a private in the Federal army, on May 6, 1861, and was commissioned in the following month as colonel of the 5th Maine infantry. In 1862 he was appointed by Pres. Lincoln consul at Vera Cruz, Mexico. Removing to Minnesota in 1865, he was there elected a representative to the state legislature in 1867, and from that year until 1870 served as state superintendent of public instruction. He was elected a representative to the 42d congress (1871-73), and was re-elected to the 43d, 44th, 45th, 46th and 47th congresses, serving continuously for twelve years, and acting on the committees on claims, public lands, education and labor. In 1888 he was again elected as a Republican to the 51st congress (1889-91). He received the honorary degree of LL.D. from Shurtleff College in 1868, and was elected an honorary member of the Society of Geography and Statistics of the City of Mexico in 1877. Mr. Dunnell was married, Nov. 20, 1850, to Sarah A. Purrington, of Buxton, Me. They have had five children.

ATKINSON, Theodore, jurist, was born at Newcastle, Rockingham co., N. H., Dec. 20, 1697. He was graduated at Harvard College in 1718, and filled many public offices, being appointed secretary of the colony in 1741, chief justice in 1754, and major general of militia in 1769; but the revolution deprived him of all these honors. He was a delegate to the congress at Albany in 1754, and was one of the committee that drew up the plan of union for the defense of the colonies. For many years he served in the legislature and council and also held the offices of clerk of the court of common pleas, collector of Portsmouth and sheriff. He was colonel of militia, and in active service during the French and Indian wars. At his death he left £200 to the Episcopal Church of Portsmouth, the interest to be spent in bread for the poor. He died Sept. 22, 1779.

MANNY, John H., inventor, was born at Amsterdam, N. Y., Nov. 28, 1825. He possessed a mechanical turn of mind at an early age, making invention a study, and at school was noted for his perseverance and industry. About 1846 his attention was directed to the need of a perfect reaper. A heading machine purchased by his father had failed utterly to do the work required, and they set to work to alter and improve it; then patented their improvements, and commenced building heading machines for sale; but these were so expensive to manufacture that they were beyond the means of the farmers. Young Manny then began experimenting with a machine for cutting grain and grass, overcoming one defect after another until it would reap

perfectly. During the ensuing year he built forty machines, but the sickles, which he had purchased, proved ineffective, and on these he improved, and secured a patent Sept. 23, 1851. In 1852 he built eighty-four successful machines, adding such improvements as practical experience suggested, and in July of that year at a reaper trial held at Geneva, N. Y., he received a gold medal for the best combined reaper and mower. From this time on the demand for the Manny reaper continued to increase until he was at the head of the largest reaper business in the world. In the spring of 1853 he removed to Rockford, Ill., where he manufactured 400 machines, and in 1854 Messrs. Wait and Sylvester Talcott became associated with him under the name of John H. Manny & Co. They produced over one thousand machines during that year. In 1855 Jesse Blinn and Ralph Emerson, Jr., were added to the firm, the name changing to Manny & Co. He then retired from active management, but continued to make improvements on his machine until twenty-three patents had been issued to him, embracing thirty-three distinct claims. In 1855 suit was brought by Cyrus McCormick to enjoin Mr. Manny's company from using what was called the "divider" or "shoe," which precedes the sickle and parts the standing grain; but in the supreme court of the United States Mr. Manny's right as the original inventor was sustained. Abraham Lincoln, who was employed in the first trial of this case, afterward referred to his \$1,000 retainer as enabling him to stump the state of Illinois with Douglas. Such men as Reverdy Johnson, Edwin M. Stanton, and Peter H. Watson were also connected with this important suit. Mr. Manny died Jan. 31, 1856.

DIBRELL, George Gibbs, soldier and congressman, was born near Sparta, White co., Tenn., April 12, 1822, son of Anthony and Mildred (Carter) Dibrell. The family name originally was DuBroy, and the first in this country to bear it was Dr. Christopher DuBroy, who was one of a Huguenot colony that settled on the James river in Virginia in 1700. His son, Charles, grandfather of George G. Dibrell, was a soldier in the revolutionary war. In 1811 he removed to White county, Tenn.; was clerk of the circuit court at Sparta for twenty one years; was a candidate for congress in 1839; was state treasurer for ten years; was reappointed clerk of the circuit court after the war, and was a prosperous trader and farmer. His wife was a daughter of William Carter, of New River, Wythe co., Va., who was a revolutionary soldier. George Dibrell received a common school education and in 1838 attended one session at the University of Tennessee. In 1840 he was made clerk of the Sparta branch of the Bank of Tennessee, and held the position until March, 1846. In 1848 he was elected clerk of the county court, was re-elected in 1852, '56 and '60, and after twelve years of service declined a renomination. From 1846 to 1860 and from 1865 to 1875 he conducted a mercantile business at Sparta, and a large stock farm near that place. In 1860 he was elected to the general assembly of the state, serving for one term, and in 1870 was elected as a Federal delegate to the state constitutional convention. After serving a few weeks in the legislature, to which he was elected in 1861, he enlisted in the Confederate army as a member of the 25th Tennessee infantry, under Col. Sidney S. Stanton. On August 10th he was made lieutenant-colonel; served in Tennessee and Kentucky under Gen. Zollicoffer, and later raised the 8th Tennessee cavalry regiment, of which he became colonel, joining Forrest's command at Murfreesboro in October, 1862. On July 1, 1863, Gen. Dibrell succeeded to the command of Forrest's "old brigade," and commanded it until the close of the war. During the last six months he had charge also of William's

Kentucky brigade. He was commissioned brigadier general in July, 1864. At Philadelphia, Tenn., he captured 700 men and all of Gen. Woodford's artillery, with camp equipage, ambulances, wagons and 1,200 horses. At the close of the war he was a member of Pres. Davis' escort. In 1874 he was elected to the 43d congress, and by reelection served for ten years, being recognized as a leader and orator of the first quality. He was the first to introduce bills making it a misdemeanor in a Federal officer to demand, receive or contribute money for election purposes, and making all public roads post-roads, secured large appropriations for the improvement of the Tennessee river, and was instrumental in making Chattanooga a port of entry, with a Federal court and custom house. Gen. Dibrell served on the committees on military affairs, agriculture and pensions, and by his mere opinion secured the passage, over the adverse report of a committee, of a bill to pay a war claim. In 1870 he served as a delegate from White county to the state constitutional convention, and in 1880 was appointed a delegate to the national Democratic convention at Cincinnati, but did not attend. The Bon Air Coal Co., now one of the great coal properties of the South, was organized by him. He was elected a director of the Southwestern railroad in 1866, and served many years as its president. He originated and assisted in founding at Sparta the Dibrell Normal School. He was a steward and

trustee of the Methodist Episcopal church, and served as a delegate to the general conferences at Memphis in 1870 and Nashville in 1882. Gen. Dibrell was married at Sparta, Jan. 13, 1842, to Mary E., daughter of Waman and Rebecca (Rowland) Leftwich. Her father, who was a merchant, was a native of Wytheville, Va., and for several years served as county trustee and a justice of the peace. Two of Gen. Dibrell's sons, Waman and Joseph, fought under him and rose to the rank of lieutenant. He died at Sparta, Tenn., May 9, 1888.

CONKLING, Alfred, jurist, was born at East Hampton, Suffolk co., N. Y., Oct. 12, 1789. The family originally emigrated from England in 1635, John Conkling having landed at Boston and settled at Salem, Mass., where he and his sons were among the first to manufacture glass in America. From Massachusetts the family removed to Long Island, two of John Conkling's sons settling respectively at Easthampton and Southold, and from the former of these, Ananias Conkling, the subject of this sketch, was descended. Alfred Conkling was graduated at Union College in 1810, and was admitted to the bar in 1812. He was appointed district attorney of Montgomery county, and after serving as such for three years, was elected to the 17th congress (1821-23), being chosen by the anti-Jackson Democrats as a representative from New York. About this time he removed to Albany, N. Y. He was appointed by Pres. Adams, in 1825, U. S. judge for the northern district of New York, the appointment being unani-

mously confirmed by the senate, and in this capacity he served for twenty-seven years. In 1852 he was appointed U. S. minister to Mexico by Pres. Fillmore, and upon his return to the United States, in the following year, settled at Geneseo, N. Y., devoting the remainder of his life to literary work. The degree of LL. D. was conferred upon him by Union College in 1847. Among his published writings are: "Treatise on the Organization and Jurisdiction of the Supreme, Circuit, and District Courts of the United States" (1842); "Admiralty Jurisdiction," a work in two volumes (1848); "The Powers of the Executive Department of the United States" (1866), and the "Young Citizens' Manual." Judge Conkling died in Utica, N. Y., Feb. 5, 1874.

SWINTON, William, author, was born at Salton, Scotland, April 23, 1833, son of William and Jane (Currie) Swinton. His parents removed to Canada in his tenth year, where he attended Knox College, Toronto. Later he studied at Amherst College, Mass. He began preaching in 1853, but in the same year accepted the professorship of languages at Edgeworth Seminary, Greensborough, N. C., where he taught for a year and a half, during which time he contributed to "Putnam's Magazine" several critical and philological essays, which were later collected and published in the form of a book, entitled, "Rambles Among Words" (1858). He subsequently went to New York city to become professor in Mt. Washington

College Institute; and in 1858 he was taken on the staff of the New York "Times." In 1862 he became a war correspondent, for which he had equipped himself by a close study of military tactics; and he discussed the subject with so much freedom that in 1864 Gen. Burnside, having been criticised, ordered his exclusion from the camps, and at a later date Gen. Grant also became displeased. Continuing his study of the war for several years after its cessation, he traveled through the South in 1867, visiting the military and civil leaders of the

Confederacy, and collecting material for historical works. He then returned to the "Times" as literary critic, in which field he had previously become prominent. In 1868 he retired from journalism to accept a position as professor of belles-lettres at the University of California, and continued there until 1874, when he returned to Brooklyn, N. Y. He produced many educational works, which were widely adopted in both private and public schools throughout the country. In his text-books, though covering all grades, he confined himself to history, geography and language. A series submitted to the Paris exposition of 1867 secured for him a gold medal. His works include: "The Times' Review of McClellan" (1864); "Campaigns of the Army of the Potomac" (1866); "The Twelve Decisive Battles of the War" (1867); a "Condensed History of the United States" (1870); a "Word Book" series (1871); a "Language" series (1873-74); "Outlines of the World's History" (1875), followed later by numerous readers, spellers and grammars. He also edited a number of works, including "Masterpieces of English Literature" (1880), and a "Treasury of Tales" (1885). Jefferson Davis publicly declared that "he was the fairest and most careful of the northern writers on the war"; and Henry Ward Beecher is quoted as having said: "If any one would know the mechanism and anatomy of battle, let him read our American Napier—William Swinton." Mr. Swinton was married in Montreal,

May 4, 1853, to Catherine, daughter of James and Margaret (London) Linton. He died in Brooklyn, N. Y., Oct. 24, 1892, survived by three sons and two daughters.

JARNAGIN, Spencer, lawyer and senator, was born in Granger county, Tenn., about 1793. After he was graduated at Greenville College in 1813, he studied law; in 1817 was admitted to the bar, and began practice at Athens, Tenn. He was a member of the state house of representatives at one time, and was U. S. senator from Tennessee from 1841 to 1847. In the latter year he removed to Memphis, and a history of that city says: "He was a philosopher and a fisherman. If the fish were biting well, the court had to wait." Mr. Jarnagin was a man of fine abilities, genial temperament, and was an able lawyer. He died in Memphis, Tenn., June 24, 1851.

KEY, Philip, congressman, was born in St. Mary's county, Md., in 1750, and was a cousin of Philip Barton Key, member of congress in 1807-13. He received a classical and commercial education in England, and on his return to Maryland was devoted to agricultural pursuits. For a number of years he served in the legislature of Maryland, and was for one or two terms speaker, also rendering some service in the municipal courts of his native county. He was a representative in congress from Maryland in 1791-93. He died in his native place Jan. 4, 1820.

KEY, Philip Barton, lawyer, was born in Cecil county, Md., in 1757. His grandfather, Philip Key, came to this country from England; obtained large grants of land in St. Mary's, Cecil and Frederick counties, and died in 1764. Philip was sent to England, where he received a liberal education. He entered the British army after the declaration of independence. In 1778 he held a commission in the Maryland loyalists' regiment, of which he became captain in 1782, going to Jamaica with his troops. During his service in Florida he was taken prisoner, and upon his release, on parole, went to England. After peace was declared he retired on half pay. In 1785 he returned to Maryland, where he took a high position as a lawyer. He settled in Annapolis in 1790, and represented that district in the state legislature in 1794 and for several years thereafter. In 1801 he removed to Georgetown, and in 1807 formally renounced his claim on the British government in a letter to the British minister in Washington. He was elected to congress from Maryland in 1807, serving until 1813. He died at Georgetown, D. C., July 28, 1815. His son, Philip Barton, was born at "Woodley," Georgetown, D. C., Nov. 2, 1804. He was graduated at Hamilton College, New York, in 1823; studied law with his cousin, Francis Scott Key, and practiced for a time in Annapolis. In 1835 he removed to Louisiana, where he engaged in planting. He became a member of the Louisiana legislature, and in 1850 of the constitutional convention. He died near Thibodaux, La., May 4, 1854.

COBB, Henry Ives, architect, was born at Brookline, Mass., Aug. 19, 1859, son of Albert Adams and Mary (Candler) Cobb, natives of Boston, Mass. His ancestors were of English, Scotch and French (Huguenot) origin, and among them were many names prominent in the early history of New England. Henry being too delicate as a child to join his brothers in out-of-door sports, amused himself with his pencil in illustrating and in making toys and building all manner of structures. After a few years in private schools he attended the Brookline High School, but not being robust, he was sent, accompanied by his brother, on a sea voyage, sailing on a merchant ship owned by his father. They visited England and France, traveling with an uncle, Hon. John W. Candler. Returning home after an absence of six months, Henry, completely restored to

Confederacy, and collecting material for historical works. He then returned to the "Times" as literary critic, in which field he had previously become prominent. In 1868 he retired from journalism to accept a position as professor of belles-lettres at the University of California, and continued there until 1874, when he returned to Brooklyn, N. Y. He produced many educational works, which were widely adopted in both private and public schools throughout the country. In his text-books, though covering all grades, he confined himself to history, geography and language. A series submitted to the Paris exposition of 1867 secured for him a gold medal. His works include: "The Times' Review of McClellan" (1864); "Campaigns of the Army of the Potomac" (1866); "The Twelve Decisive Battles of the War" (1867); a "Condensed History of the United States" (1870); a "Word Book" series (1871); a "Language" series (1873-74); "Outlines of the World's History" (1875), followed later by numerous readers, spellers and grammars. He also edited a number of works, including "Masterpieces of English Literature" (1880), and a "Treasury of Tales" (1885). Jefferson Davis publicly declared that "he was the fairest and most careful of the northern writers on the war"; and Henry Ward Beecher is quoted as having said: "If any one would know the mechanism and anatomy of battle, let him read our American Napier—William Swinton." Mr. Swinton was married in Montreal,

health, resumed his attendance at school, completing the course in 1876, when he entered the Massachusetts Institute of Technology, Boston, remaining one year. He then joined the sophomore class of the Scientific School of Harvard University, where he was graduated in 1880 as an engineer. Deciding to engage in architectural work, he took a special course of study with William R. Ware, at the Massachusetts Institute of Technology, and spent some time in the office of Messrs. Peabody & Stearns, architects, Boston. In 1881 the Union Club of Chicago accepted plans for a new club-house by him, and the supervision of its erection obliged him to remove to that city, where he has continued to reside. Mr. Cobb has visited Europe a number of times, making a study of architecture and collecting valuable books and photographs for his library of architectural works. Among the many important buildings which have extended his reputation are those of the University of Chicago, of which he has had full charge. He was also architect for the Newberry Library and the Lewis Institute, Chicago. He was one of the board of architects of the World's Columbian exposition, and designed the Fisheries and East Indian buildings, the Cairo street, and many other structures on the grounds. He has designed many tall office buildings in the different cities of the United States, and was the first architect to introduce "skeleton framing." In 1882 Mr. Cobb was married to Emma, daughter of Augustus F. Smith, a prominent lawyer, of New York.

LAMBERT, John, acting governor of New Jersey (1802-3), was born in that province in 1748, and received an academic education. He served in the state house of representatives for many years; was vice-president of the council and acting governor of New Jersey in 1802-3; was a representative in congress from New Jersey in 1805-9, and in 1809-15 was a member of the U. S. senate. He died at Amwell, N. J., Feb. 4, 1823.

JONES, Samuel, lawyer, was born in New York state, July 26, 1734, son of William Jones, and grandson of Thomas Jones, born in Ireland about 1665, of a family which was originally from North Wales. The last named fought in the army of King James II. at the battles of the Boyne (1690) and Aghrim (1691), and in the siege of Limerick (1691). In the following year he went to France, participating in the revolution, and later, in the same year, emigrated to Long Island, where he was married to Free love, daughter of Thomas Townsend, acquiring a large tract of land, and becoming ranger-general of Long Island, then known as Nassau. He was also active in local military affairs, becoming a major of the Queens county regiment. His death occurred at Fort Neck, Queens co., Long Island, Dec. 13, 1713. One of his sons, David (b. 1699; d. 1775), was a judge of the supreme court of New York city (1758-73), and a member of the colonial assembly (1737-58), serving for thirteen years as its speaker. Samuel Jones spent the early years of his life as a sailor, but afterwards studied law under William Smith, who became an historian of New York and a chief justice. Securing his admission to the bar, he built up a lucrative practice, and his office was much sought by law students, De Witt Clinton being one of his pupils. Through the revolution he remained within the British lines, as he was a loyalist in principle; but he took no active part in the war, and, after peace was declared, became an ardent Federalist. Many political and legal offices of trust were held by him; he was repeatedly elected to the state assembly, and was an active member of the convention at Poughkeepsie which adopted the constitution of the United States in 1788, drawing up most of the amendments. In 1789 he bore the prin-

cipal part in the revision of the New York state statutes, being assisted by Richard Varick, and in that year was appointed recorder of New York city, holding the office until 1797, when he was succeeded by Chancellor Kent, who subsequently wrote, "No one surpassed him in clearness of intellect and in moderation and extreme simplicity of character, no one equaled him in his accurate knowledge of the technical rules and doctrines of real property, and his familiarity with the skillful and eloquent, but now obsolete and mysterious, black letter learning of the common law." In 1796, at the request of John Jay, he drafted the law creating the comptroller's office of New York state, which still exists, and he himself was the first incumbent (1796-96), in the latter year retiring to his country home at West Neck, Long Island. Dr. David Hosack said of him: "Common consent has, indeed, assigned him the highest attainments in jurisprudence, and the appellation of father of the New York bar." Besides the "Laws of the State of New York," a work in two volumes, written in collaboration with Richard Varick (1789), he contributed valuable papers on the history of New York to the collections of the New York Historical Society. Judge Jones died at West Neck, Long Island, Nov. 21, 1819.

JONES, Samuel, jurist, was born in New York, May 26, 1749, second son of Samuel Jones (1734-1819). After graduating at Columbia University, in 1790, he began the study of law in his father's office, and was admitted to the bar. He at once took an active part in politics, and later attained to many important offices. He was elected to the assembly in 1812, serving until 1814, and to the office of recorder of New York city in 1823. In 1826 he became chancellor of the state, and held the office until 1828, when he was appointed chief justice of the superior court of New York city. The latter appointment he held until 1847, in which year he was made justice of the state supreme court for the term 1847-49. He then resumed his private practice, though eighty years of age, and continued it until two months of his death. In the councils of the Episcopal church he was also active, and in matters of social and public importance he showed a remarkable interest up to his very latest days. The term, "father of the New York bar," which was originally applied to his father, still clung to the son. His death occurred at Cold Spring, N. Y., Aug. 9, 1853.

PHILLIPS, Stephen Clarendon, congressman, was born at Salem, Mass., Nov. 1, 1801. He was graduated at Harvard University, in 1819, with high honors; began to study law, but soon discontinued it to become a merchant in Salem. In 1824, by annual re-elections, he served as a representative in the state legislature; in 1830-31 he was state senator, and in 1832 was again a member of the house. In 1834 he represented Massachusetts in congress; from December, 1838, to March, 1842, he was mayor of Salem, and upon his voluntary retirement devoted the whole of his salary as mayor to the public schools of the city. In 1840 he was one of the presidential electors for Massachusetts. In 1848 he was the Free-soil candidate for governor, and afterward held various state and private trusts, in the discharge of which, by his ability, sagacity, experience and integrity, he rendered signal service. He was for many years a member of the state board of education and a trustee of the State Lunatic Hospital at

Worcester. Mr. Phillips was president of the Boston Sunday-school Society and author of the "Sunday-school Service Book." After retiring from public life, in 1849, he became extensively engaged in the lumber business in Canada, and met his death by the burning of the steamer Montreal, on the St. Lawrence river, June 26, 1857, while returning from Quebec.

BLACKFORD, Isaac Newton, jurist, was born at Bound Brook, Somerset co., N. J., Nov. 6, 1786; was graduated with honor at Princeton College in 1806, and was admitted to the bar of New Jersey in 1810. He removed to Indiana in 1812 and settled in Salem. On the organization of Washington county, in 1813, he was chosen its first clerk and recorder. In 1814 he was elected clerk of the territorial legislature, but resigned to become judge of the first district court, and removing, in 1815, to Vincennes, he there opened a law office. In 1816 he was elected a representative from Knox county to the first state legislature, and was chosen speaker. In 1817 Gov. Jennings appointed him judge of the supreme court of Indiana, and this position he honored for thirty-five years. In 1855 he was appointed by Pres. Pierce judge of the U. S. court of claims, and held this office until his death in Washington city, Dec. 31, 1859.

DOOLEY, Patrick Callan, lawyer, was born near Gort, Ireland, Dec. 25, 1842, son of John and Ellen Dooley. In 1850 he came to America with his mother, going to Cheshire, Berkshire co., Mass., where he lived on a farm, and attended school in winter time. He went to Falley Seminary, Fulton, N. Y., in 1860-61, and subsequently to the Wesleyan Academy at Wilbraham, Mass.; entered the University of Michigan in 1865, and the law department there two years later; he was graduated in 1869. After studying law for one year with the Hon. T. D. W. Yonley, at Little Rock, he removed to DeWitt, Arkansas co., Ark., and began the practice of his profession. He was elected to the state senate in 1872, and after serving one session was appointed circuit

judge of the 12th judicial district, with jurisdiction over four counties. Judge Dooley remained upon the bench until 1875, since which time he has lived at Little Rock, practicing law and operating in real estate. In 1888 he presided at the organization of the Lincoln Club, a prominent Republican club of Little Rock, and became its first president. He was a charter member and was the second president of the Quapaw Club. In July, 1898, he was appointed referee in bankruptcy for the eastern district of Arkansas, and was reappointed in 1900. Judge Dooley was married, Oct. 16, 1871, to Matilda Arnold, daughter of Arnold Stoddard, of St. Louis, Mo., and has two daughters.

JARVES, James Jackson, author, was born in Boston, Mass., Aug. 20, 1820. His early education was received at the Chauncey Hall school of his native city, and he prepared for a course in Harvard University, but failing sight compelled him to relinquish his plans. He then traveled extensively, visiting California, Mexico, Central America, and located at Honolulu in 1838, where he remained for several years, publishing in 1840 "The Polynesian," which was the first newspaper ever started at that place. Four years later his journal was made the official organ of the Hawaiian Islands, Mr. Jarves receiving the title of director of the govern-

ment press. Returning to the United States in 1849, he was a short time later appointed a special commissioner of the Hawaiian government to negotiate treaties with the United States, France, and Great Britain. In 1851 he went to Europe, and resided there for many years, collecting a large number of paintings at Florence and Paris, which illustrated the various schools of art; and also making valuable collections of sculpture and Venetian glass. Some (122) of these paintings, dating from the eleventh to the seventeenth centuries, are now in the Yale School of Fine Arts, New Haven, Conn.; the sculptural pieces, together with other paintings, are in the Hollenden gallery, Cleveland, O., while the specimens of ancient and modern Venetian glass were presented by him to the Metropolitan Museum of Art in New York city. In Italy Mr. Jarves became well known as a connoisseur, and was elected an honorary member of the Florence Academy of Fine Arts. Between 1879 and 1882 he served as U. S. vice-consul and acting consul at Florence, Italy; and during 1882-83 he represented that country at the Boston foreign exhibition, receiving for his services, in 1887, the title of Knight of the Order of the Crown of Italy. Besides contributing to periodical literature, Mr. Jarves published "History of the Hawaiian or Sandwich Islands" (1843); "Scenes and Scenery in the Sandwich Islands" (1844); "Parisian Sights and French Principles Seen through American Spectacles," in two volumes (1853); "Art Hints: Architecture, Sculpture, and Painting" (1855); "Kiama, a Tradition of Hawaii" (1855); "Italian Sights and Papal Principles Seen through American Spectacles" (1855); "The Confessions of an Inquirer" (1857-60); "Art Studies: The Old Masters of Italy" (1861); "The Art Idea: Sculpture, Painting and Architecture in America" (1866); "Art Thoughts: The Experiences and Observations of an American Amateur in Europe" (1876); "Italian Rambles" (1884), and other works.

PHILLIPS, Philip, lawyer and congressman, was born in Charleston, S. C., Dec. 13, 1807. He was educated at the Norwich Military Academy, in Vermont, and at Middletown, Conn. In 1825 he commenced the study of law in Charleston, and on the day after attaining his majority was admitted to the bar. He entered public life by becoming a member of the nullification convention, in 1832, and voted with the minority; in 1834 was elected for two years to the state legislature, but resigned in 1835, and removed to Mobile, Ala., where he practiced his profession with success. In 1837 he was elected president of the Alabama Democratic state convention; in 1844 was elected to the legislature, and was chairman of the committee on Federal relations; and in 1849 was president of an internal improvement convention. In 1851 he was again elected to the legislature; in 1852 went to the Baltimore convention; in 1853 was a representative in congress from Alabama. He declined a re-election, and engaged in the practice of his profession in Washington, D. C., where he died Jan. 14, 1884.

KIRBY, Ephraim, jurist, was born at Litchfield, Conn., Feb. 23, 1757. He spent his boyhood on his father's farm and when eighteen years of age joined the army of the revolution, participating in the battle of Bunker Hill, and remaining in active service until the Declaration of Independence. He fought in nineteen engagements and received thirteen wounds, seven of which were sabre cuts on the head, inflicted by a British soldier at Germantown, where he was left on the field for dead. At the close of the revolution he contrived to obtain a classical education, and Yale College gave him the degree of M. A. He studied law, was admitted to the bar, and in 1789 published a volume of "Reports of

the Decisions of the Superior Court and Court of Errors," which was the first work of that character published in Connecticut, and probably in the United States. From 1791 to 1804 he was a representative in the legislature, and in 1804 was appointed, by Pres. Jefferson, supervisor of the revenue. After the acquisition of Louisiana he was appointed a judge of the newly-organized territory of Orleans, and, on his way to enter on the duties of his office, died at Fort Stoddard, Miss., Oct. 2, 1804. His son, Reynold Marvin, was born at Litchfield, Conn., March 10, 1790; entered the army in 1813, and was brevetted first lieutenant and captain for gallantry in the siege of Fort Erie. In 1821 he became captain of artillery and brevet major in the same year. He died in Fort Sullivan, Wts., Oct. 7, 1842. Another son, Edmund, was born at Litchfield, April 8, 1794; entered the army in 1812, and served through the war with England. In 1819 he was aid to Gen. Jacob Brown, to whose daughter he was married. He became captain in May, 1824, and paymaster in August of the same year. Afterward he served on the staff of Gen. Taylor at Monterey, and on that of Gen. Scott in the valley of Mexico, being brevetted lieutenant-colonel for gallantry at Contreras and Churubusco, and colonel at Molino del Rey. He died at Bronxville, N. Y., Aug. 20, 1849. Edmund's son, Edmund (1810-63), was a graduate of the U. S. Military School; served through the civil war; was promoted to brigadier-general, and was mortally wounded at Chancellorville.

DAYTON, Elias, revolutionary soldier, was born at Elizabethtown, N. J., in July, 1737, a descendant of Ralph Dayton, an Englishman, who emigrated from Bedfordshire to Boston and settled in New Haven in 1638. He removed thence to Southampton, Long Island, and was the founder of East Hampton. As a young man he joined the British forces, fought with the "Jersey Blues," under Wolfe, at Quebec; and subsequently became captain of a company of militiamen, with which he marched against the northern Indians. At the outbreak of the revolution he became a member of the committee of safety, and with William Alexander, Lord Stirling, commanded a party which, in July, 1775, captured a British transport off Elizabethtown. In February, 1778, he was appointed by congress colonel of the 3d New Jersey regiment; in 1781 aided in the suppression of the New Jersey mutiny, and in 1783 was advanced to the rank of brigadier-general. Throughout the entire war he was in active service, being prominently engaged in the battles of Springfield, Monmouth, Brandywine and Yorktown, and was three times unhorsed; at Germantown, at Springfield, and again at Crosswick's bridge. When the enemy, under Gen. Knyphausen, penetrated into New Jersey, he directed the execution of the measures adopted for their annoyance. At the close of the war he was appointed major-general of militia. He was elected a delegate to the Continental congress in 1770, but declined the honor; on being again elected, however, he served during 1787-88. He served several terms in the New Jersey legislature, and at the organization of the New Jersey Society of the Cincinnati, was elected its first president, holding the office until his death, which occurred at Elizabethtown, N. J., July 17, 1807.

DAYTON, Charles Willoughby, lawyer, was born in New York city, Oct. 3, 1846, son of Abram Child and Maria A. (Tomlinson) Dayton. His earliest American ancestor, Ralph Dayton, emigrated from Bedfordshire, England, to Boston; was one of the original settlers of New Haven in 1638, removed to Southampton, Long Island, and was the founder of East Hampton. His descendants settled principally in New York and New Jersey, among them being William L. Dayton, Elias Dayton and Brewster Day-

ton. The last removed from Long Island to Stratford, Conn., and served in the revolutionary army. His wife was Betsy Willoughby, and their son, Charles Willoughby, who was married to Jane Child, of New York city, was Mr. Dayton's grandfather. His only son, Abram Child Dayton, though engaged in mercantile affairs, was a man of literary tastes, contributing to periodicals and publishing, in 1811, "Last Days of Knickerbocker Life," a most entertaining as well as historically valuable work, which was republished by Putnam in 1896. His mother was descended from Maj. John Canfield and Joseph Tomlinson, soldiers of the revolution, and also from Hon. Andrew Adams, chief justice of Connecticut. Mr. Dayton was educated at the College of the City of New York, and after graduating at the Columbia Law School was admitted to the bar in 1868. Becoming identified with politics as early as 1864, he supported Gen. McClellan for the presidency, in 1884 was elected, on the Democratic ticket, a member of the state legislature, and served on the judiciary committee. In 1882 he organized the Harlem Democratic Club, of which he became president in 1888, and identified himself with the citizens' reform movement, which put forward a Democratic candidate for mayor. He was a delegate to the Democratic state conventions of 1881, 1882, 1884, and in 1892 he was chairman of the committee on organization of the state convention. In 1884 he was one of the presidential electors in New York state and secretary of its electoral college. One of his speeches, delivered at Burlington, Ia., was adopted by the national Democratic committee and circulated as a campaign document. In 1893 he was a delegate to the New York state constitutional convention, and in the same year was appointed by Pres. Cleveland postmaster of New York city, resigning in April, 1897, to resume law practice. Subsequently to his retirement he was tendered a banquet by 1,500 letter carriers, and his bust was erected in the post office, as testimony to his "efficiency, discipline, justice, courtesy and kindness." Ex Pres. Cleveland wrote him as follows: "The faithful and efficient service you have rendered the government . . . entitles you to an acknowledgment of my personal obligation for the credit thus reflected upon the appointing power." Notwithstanding the attention given to political affairs, Mr. Dayton maintains a law practice of considerable magnitude. At one time he was a member of the executive committee and a vice president of the Bar Association of the State of New York, he also served upon important committees of the Bar Association of the City of New York. He was one of the incorporators of the Post Graduate Medical School; organized and is a director of the Twelfth Ward Bank and the Empire City Savings Bank, being the legal counsel of each, and is a director of the United States Life Insurance Co. He is a member of the New York Geographical Society, the New York Historical Society to which he gave a series of portraits of the postmasters of New York (1804-97), of the Down Town Association, the New England Society, the Sons of the Revolution; the Sagamore, Harlem, Players' and Harlem Democratic clubs, and of the Manhattan Club, of which he is a governor. He was married in New York city, Jan. 29, 1874, to Laura A., daughter of Dr. John B. Newman, and has two sons and one daughter; Charles Willoughby, John Newman and Laura Adams Dayton.

ELLSWORTH, Mary Wolcott (Janvrin), author, was born at Exeter, N. H., Sept. 16, 1830, daughter of Alexander Janvrin, whose ancestor emigrated from the Isle of Guernsey prior to the American revolution. She was educated at an academy in her native town. She early began to use her pen and when eighteen wrote a story entitled "Children's Vows; or, The Carnelian Ring," for which she received a prize from a prominent Boston publisher, which encouraged her to make literature her avocation. Her work was favorably received; she contributed to western and southern journals and was a regular contributor to "Godey's Ladies' Book." In 1856 she edited and wrote biographical articles for "Cypress Leaves," published by James Usher, Boston; in 1858 she was engaged in compiling for French & Co., publishers, Boston, a series of books entitled the "Juvenile Miscellany." She was married, Aug. 13, 1868, to Oliver Ellsworth, a bookseller in Boston, son of Gov. William Wolcott Ellsworth, and grandson of Chief-Justice Oliver Ellsworth. She was the author of "Peace; or, The Stolen Will" (1857); "An Hour with the Children" (Am. Tract Society, 1860), and "Smith's Saloon; or, The Grays and the Grants" (1871). Mrs. Ellsworth died at Newton, Mass., Aug. 12, 1870.

SEALY, John, financier, was born at Kingston, Pa., Oct. 18, 1822, son of Robert and Mary (McCurry) Sealy, both natives of Cork, Ireland. At the age of

fourteen he entered a country store as a clerk. He proved so competent that four years later his employer made him general manager of some coal mines. He remained in this position three years longer on a salary, and then decided to emigrate to Texas. Arriving at Galveston in 1846 he became a dry-goods salesman. A strong friendship sprang up between Mr. Sealy and J. H. Hutchings, the book-keeper of the firm, and they decided to go into business on their own account, each having laid up about \$750. With this capital they bought a stock of goods and, removing to Sabine Pass, Tex., in 1847, opened a store under the name of Hutchings & Sealy. Meet-

ing with success, they removed to Galveston. In 1854 a partnership was formed with Mr. George Ball, and a general dry-goods and commission business was carried on. In 1860 the dry-goods business was sold out, and the firm continued in the cotton commission business, and under the firm name of Ball, Hutchings & Co., engaged in banking. In 1867 Mr. Sealy's brother, George, was admitted as a partner, and the firm remained unchanged until John Sealy's death. He was connected with nearly every corporation in the city, either as president or director; he originated many enterprises, and he responded to every call to sustain any improvement or any undertaking that promised to be of lasting benefit. One of his most successful undertakings was the building, management and establishment of the Gulf, Colorado and Santa Fe railroad system. His chief public bequest was the sum of \$75,000 for the erection of a hospital at Galveston, to which patients from every part of the state are admitted free. Mr. Sealy was married at Bedford, Pa., in 1857, to Rebecca, daughter of Samuel B. and Margretta (Campbell) Davis. She bore him a daughter, Etta Jane, and a son, John, who succeeded to his father's interest and became a partner in the firm. He died at Galveston, Tex., Aug. 29, 1884.

MONEY, Hernando De Soto, senator, was born in Holmes county, Miss., Aug. 26, 1839, of English ancestry. His father and paternal grandfather had strong individual characteristics bordering on eccentricity. On the maternal side he is descended from the Vardaman family, whose members are noted for size, strength and longevity. He was educated in the literary and law departments of the University of Mississippi, at Oxford, Miss. Throughout the civil war he served in the Confederate army, returning at its close to the practice of law. This he was, however, compelled to abandon because of failing eyesight, and for several years he confined himself to cotton planting in the Mississippi delta. In 1871 he returned to his old home in Carrollton, where he edited the "Conservative," in which journal he was the owner of a half interest, and in 1872 removed to Winona, purchased a half interest in the "Democrat-Advance," and continued to edit both papers. He was elected mayor in 1874 and in 1875 was chosen as a Democratic representative in congress, serving by re-election until 1885, when he voluntarily retired to engage in the practice of law; but in 1892 he was again elected to the national legislature, and was re-elected in 1894. He was chairman of the committee on post-offices and post-roads in the 46th and 48th congresses, and in this capacity took an active interest in postal legislation toward the improvement and extension of the service. In January, 1896, he was elected to the U. S. senate for the term beginning March 4, 1899; but, to fill the vacancy caused by the death of J. Z. George, he was appointed to the senate, Oct. 8, 1897, and upon the convening of the legislature, was regularly elected, the term ending March 3, 1899. He was then re-elected for the term expiring in 1905. Sen. Money is a close student, an omnivorous reader, and an able public speaker.

COMSTOCK, Anna (Botsford), educator and wood engraver, was born at Otto, Cattaraugus co., N. Y., Sept. 1, 1854, the daughter of Marvin and Phoebe (Irish) Botsford, and a descendant of Henry Botsford, who came to this country from England, and was one of the founders of Milford, Conn. She attended Chamberlain Institute, Randolph, N. Y., and entered Cornell University in 1874, for a special course in history and political science. In October, 1878, she was married to John Henry Comstock, professor of invertebrate zoölogy in Cornell University. Shortly thereafter Prof. Comstock was called to the position of entomologist to the U. S. department of agriculture, and during their residence in Washington Mrs. Comstock made many careful drawings of microscopic insects in order to assist her husband in investigating the habits of scale insects. When they returned to Cornell, she continued to make drawings for his publications, at the same time taking a course in natural history at the university, for the purpose of qualifying herself scientifically. She received the degree of B.Sc. from that university in 1885. Finding the methods of reproducing drawings for printing unsatisfactory, she studied wood engraving, in Cooper Union, New York, in 1886. In 1890 she was elected a member of the Society of American Wood Engravers. In 1895 more than 600 of her plates were published in "Comstock's Manual for the Study of Insects." Her more recent work includes the illustrations for "Insect Life" by Prof. Comstock, and some engravings for "Every Day Butterflies" by Prof. S. H. Scudder. She has lectured before farmer's institutes on the possibilities and ideals of farm life, and in 1894 for her efforts in this line was made a member of the New York State Society for the Promotion of Agriculture. This association began the experiment of introduc-

John Sealy

ing nature study into district schools. Mrs. Comstock assisted the movement in the Westchester schools, and later was employed by Cornell as an instructor in nature study, in university extension work among teachers. In this capacity she has taught for several summers in the state teacher's institute at Chautauqua, and in 1900 she delivered a course of lectures on nature study at Leland Stanford, Jr., University, California. In December, 1898, she was made assistant professor in nature study at Cornell University, being the only woman who has been given the title of professor there.

PRITCHARD, Peter Conley, senator, was born at Jonesboro, Tenn., July 12, 1837, son of William H. and Elizabeth L. Pritchard. Paternally he is of Scotch and Welsh descent, while his maternal ancestors came from Ireland. His father was a carpenter. The son, after a thorough training at the Martin Creek Academy, Tennessee, was apprenticed to learn the printer's trade in the office of the Jonesboro "Tribune-Herald." At the age of seventeen he removed to Bakersville, Mitchell co., N. C., where until 1887 he was joint editor and owner of the "Roan Mountain Republican." In the latter year he was admitted to the bar, and began practice in Marshall, Madison co., where he soon became a prominent and active citizen. He was a Republican elector in the presidential campaign of 1880, and served in the state legislature in 1884, 1886 and 1890. In 1888 he was the Republican candidate for lieutenant-governor; in 1892 was the caucus nominee for U. S. senator, and in the same year served as delegate-at large to the Minneapolis convention. In November, 1894, he was elected to the U. S. senate on a fusion ticket by the Republicans and Populists, to fill the vacancy created by the death of Zebulon B. Vance; being notable as the first Republican in twenty years to be elected to that body from any southern state. A recognized leader in all councils and movements of his party, his political following is very large. He was elected president of the state protective tariff league in 1892, and was one of the organizers of the co-operation movement which resulted in his election in 1894. In 1897 he was re-elected to the senate for the term ending March 3, 1903. Sen. Pritchard was married at Asheville, N. C., Oct. 18, 1862, to Malissa, daughter of James W. and Mary Bowman.

BUCKLAND, Cyrus, inventor, was born at Manchester, Conn., Aug. 10, 1799, son of George and Elizabeth (——) Buckland. At an early age he displayed inventive ability. His first important mechanical work was done in helping to prepare and place the machinery for cotton mills at Monson and Chicopee Falls, Mass. In his twenty-ninth year he entered the employ of the U. S. army, Springfield, Mass., as a pattern-maker, from which he rose to the position of inspector. In this capacity he devised a number of improved firearms and invented machines for their manufacture, without any other compensation than his regular salary. The value of his inventions may be judged from the fact that through his efforts the cost of turning out a finished musket was reduced one-half. The greatest advance was made in the working of gun stocks, screws and hammers, and in milling screws. These processes were adopted by most of the countries of Europe; England even going so far as to import workmen to run the gun-stock machines, of which she had secured copies through her agents. Mr. Buckland was forced to retire through ill health in 1859. At that time he received a grant of \$10,000 from congress, in recognition of his services. He was married, in 1821, to Mary A. Locke, of Monson, Mass., and had three children. He died Feb. 25, 1891.

HALLER, Granville O., soldier and pioneer, was born at York, Pa., Jan. 31, 1819, son of George and Susan (Pennington) Haller. He was appointed from civil life, and commissioned second lieutenant in the 4th U. S. infantry, Nov. 17, 1839. He served through the Seminole war in Florida in 1841-42, and is frequently mentioned in Spague's history of "The Origin, Progress and Conclusion of the Florida War." He was adjutant of the 4th infantry from Jan. 1, 1843, until his resignation in 1845, and was promoted first lieutenant July 2, 1846. He served under Gen. Taylor in the war with Mexico until after the capture of Monterey, when his regiment was transferred to Gen. Worth's division. He was in every battle to the capture of the City of Mexico, with Worth's division, and was brevetted captain and then major for gallant and meritorious conduct on the field. In 1853 he went to Washington territory, and later to Fort Dallas, Oregon; the Indian war being fought many engagements, and after hard fighting utterly annihilated the tribe that committed the Boise river massacre. He established and built Fort Townsend, on Puget sound, in 1857, and participated in the San Juan embargo in 1859. In 1860 he was assigned to the command of the military post of Fort Mojave, Ariz., and early in 1861 was ordered to San Diego, Cal., and finally to New York to join the army then being organized by Gen. McClellan. On his arrival he found that he had been promoted commandant of the general headquarters on McClellan's staff, and the 93d New York volunteers were placed under his command as general headquarters guard. He was employed during the Virginia and Maryland campaigns under McClellan, the subsequent campaign of Burnside, and for a short time under Hooker. At the close of the civil war he returned to Puget sound, where he established a general merchandise store and built up a large trade, but in 1879 returned to the regular army as colonel of the 2d infantry, and served with his regiment until his retirement. He was a 32d degree Mason, member of the Washington Pioneers, and for one term president of the Pioneer Association, also a member of the Military Order of Foreign Wars, an active companion of the Loyal Legion of the United States, and for one year commander of the Washington Commandery. He was married, June 21, 1849, to Henrietta M. Cox, of York, Pa., and had five children. He died at Seattle, Wash., May 2, 1897.

Granville O. Haller

PENFIELD, Smith Newell, organist and composer, was born at Oberlin, O., April 1, 1837, son of Anson and Minerva (Dayton) Penfield. When a lad he was organist and choir master of the college church and of a choral society of over one hundred members. For seven years he was organist and teacher at Rochester, N. Y.; then went abroad to study the piano under Moscheles, Papperitz and Dellioux, harmony under Hauptman and Richter, and composition under Reinecke. On returning to the United States he went to Savannah, Ga., where he founded a conservatory of music and a choral and orchestral society, the Mozart Club, of which he was leader. In 1875 he returned to the North and settled in Brooklyn, N. Y., and later in New York city, for professional work. He was organist of the Church of the Pilgrims, Brooklyn, for two years, and of the Lafayette Avenue Presbyterian Church

for three years, then in New York was successively at St. George's, St. Mark's, the Broadway Tabernacle and the Scotch Presbyterian Church, where he is now playing. He received from the University of New York the degree of Mus. Doc. In 1885 he was elected president of the Music Teachers' National Association, and in 1890 president of the New York State Music Teachers' Association, and he is a member of the Manuscript Society of New York. His compositions are numerous and varied in form, comprising an overture for full orchestra; a string quintet in three movements; "The Eighteenth Psalm," a cantata for soli, chorus and orchestra; two complete services of the Protestant Episcopal canticles; "Beyond," an aria for contralto with full orchestra; "Dream Pictures," an aria for soprano with full orchestra; a "Reverie," and a march, besides many choruses, glees, songs and solo pieces for piano and organ.

DELUREY, Laurence Augustine, educator, was born at Easton, N. Y., May 15, 1864, son of Daniel and Catherine (Sheridan) Delurey. His elementary education was obtained in the schools of his native town, and in September, 1881, he entered the College of St. Thomas, of Villanova, Pa. Here, having evinced a preference for the priesthood, he was admitted to the novitiate of the Augustinian order in August, 1885. He was ordained priest, March 15, 1890, by Archbishop Ryan, of Philadelphia, and in September of the same year was appointed to a vacancy on the faculty of his alma mater, having at the same time charge of St. Denis' Church, Ardmore, Pa. Father Delurey was appointed in August, 1891, to succeed Rev. A. Gleason, O. S. A., as vice-president of the College of St. Thomas, to which he was elected in July, 1894.

During this time he had entire charge of the studies and discipline of the college, and performed his duties with remarkable tact, endearing himself to all by his evident interest in their welfare, even in their sports; the prominence that the college holds to-day in the athletic world is due solely to the encouragement and direction of Rev. L. A. Delurey. Upon the resignation of Rev. F. J. M. Shane, O. S. A., from the presidency of the college, in January, 1895, Father Delurey was appointed to succeed him, and at the Chapter of the Augustinian Fathers held in July, 1898, he was re-elected to the office, and at the same time made superior of the Monastery of St. Thomas of Villanova. Since he has become president, he has broadened the course, and introduced lectures by prominent men, both lay and ecclesiastical. Under his régime the increased attendance of students made enlarged quarters a necessity, and, largely owing to his efforts, have two commodious buildings been erected, fitted with every modern convenience and educational appliance. Father Delurey is also widely known as a lecturer and preacher as well as an educator.

KELLY, James Edward, sculptor, was born in New York city, July 30, 1855, son of Patrick Paul and Julia Frances (Golden) Kelly. His father, a native of Glasgow, Scotland, emigrated to America in 1849, and settled in New York city, where he was an optician. The son received his preliminary education in the public schools, and in 1871 was apprenticed to a wood engraver, meanwhile studying in the Academy of Design, and subsequently assisted in organizing the Art Students' League, and with Carl Hirschberg and Theodore Robinson formed the

first committee. In 1873 he entered the art department of Harper & Brothers, and in 1875 Mr. Kelly, with Edwin A. Abbey, opened a studio, where they began illustrating, principally for magazines, and for Bryant & Gay's "History of the United States." It was then he utilized his former knowledge of engraving in directing the manner of cutting his work, which was carried out by Cole, Juengling, Kingsley, Wolf and others, and is now called the American school of wood engraving. He also made studies from life of the various distinguished military and naval commanders then living, and also made sketches of the important incidents in their careers under their directions. His first model, a statuette of "Sheridan's Ride," was exhibited in the National Academy of Design, in 1879. In 1883 he was chosen to model the five bas-reliefs around the base of the Monmouth monument. The subjects selected were: "The Council of War at Hopewell"; "Washington Rallying His Troops"; "Ramsay Defending His Guns"; "Molly Pitcher"; and "Wayne's Charge." He also modeled "Arnold Wounded in the Trenches" and "Schuyler Giving His Plans to Gates Before the Battle of Saratoga."

for the Saratoga monument, in 1886, and he also modeled the statue of Gen. Grant, at Donelson, for which the general posed; statue of "Call to Arms," for the Troy monument; statue of Gen. Buford, at Gettysburg; "Knowlton at Harlem Heights," at Columbia College, for the Sons of the Revolution, and a series of bronze portrait busts of army and navy officers of the Spanish-American war. His later works are an equestrian statue of Gen. Sherman; "Col. Roosevelt at San Juan Hill," and the "Fitz John Porter Monument," for which Gen. Porter selected Mr. Kelly. In 1890, with all the ceremony peculiar to the Seneca Indians, he was adopted into that nation as a brother of Gen. Ely S. Parker, the sachem "Donohogua," and was given the title of "The Ganasqua," or "Stone Giant."

BROWNLEE, William, Craig, clergyman, was born at Torfoot, Lanarkshire, Scotland, in 1783. He was graduated A. M. at the University of Glasgow in 1804, and was licensed to preach by the presbytery of Stirling about 1808. He at once married and came to this country, settling as pastor of the Associate Church at Mt. Pleasant, Pa., where he remained until 1813. Removing to Philadelphia, he had charge of the Walnut Street Scotch Associate Church in that city, for two years. He was rector of the grammar school, or academy, at New Brunswick, N. J., from 1815 to 1817, and in the latter year became pastor of the Presbyterian church at Buskingridge, N. J., where he continued until 1825. During the year following he was professor of Latin and Greek at Rutgers College, in New Brunswick, and in 1826 was installed as one of the ministers of the Collegiate Reformed Dutch Church in New York city. He remained in this pastorate until 1848, and continued to make New York his home thereafter. He was prominent among the city clergy, with whom he was chiefly distinguished for his zealous opposition to the Roman Catholic church. He edited the "Dutch Church Magazine" through four volumes, and published various books and pamphlets, among

L. A. Delurey

James Edward Kelly

them, "Inquiry into the Principles of the Quakers" (1824); "The Roman Catholic Controversy" (1834); "Treatise on Popery" (1847); "Lights and Shadows of Christian Life" (1847); "The Christian Youth's Book"; "Christian Father at Home"; "Deity of Christ"; "History of the Western Apostolic Church"; "The Converted Murderer," and "The Whigs of Scotland," a romance. In 1869 a memorial of his life was printed in New York city, where his death occurred on Feb. 10th of that year.

OSBORN, Henry Stafford, educator, was born in Philadelphia, Pa., Aug. 17, 1823. He was graduated at the University of Pennsylvania in 1841, and at the Union Theological Seminary in 1845. He also studied at Bonn, Germany, and at the London Polytechnic Institution. In 1845-46 he was stated supply at Coventry, R. I.; was ordained in June, 1846, and was pastor, successively, at Hanover, Va., until 1849; in Richmond, Va., until 1853; at Liberty, Va., until 1858; and at Salem, Va., until 1859. In 1859-66 he was pastor of the Second Presbyterian Church at Belvidere, N. J. Before the civil war he had held the chair of natural science in Roanoke College, and in 1866 he accepted the professorship of mining and metallurgy in Lafayette College. He left this position in 1870 to become stated supply at Oxford, O., and in 1871 became professor in Miami University, where he remained until that institution was closed in 1873. While he was pastor of a church at Millville, O., his health failed, and he has since devoted his attention to literary pursuits, especially to the illustration of Bible history. Much of his time has been spent in visiting Palestine, Syria, Egypt and the Mediterranean islands, and many of the maps of these localities used in Bible teaching were prepared by him. In 1865 he received the degree of LL. D. from Lafayette. His published works are: "Palestine, Past and Present" (1855); "Flowers and Fruits of the Holy Land" (1856); "Pilgrims in the Holy Land" (1857); "Scientific Metallurgy of Iron and Steel in the United States" (1870); "The New Descriptive Geography of Palestine" (1877); "Manual of Bible Geography," and "Ancient Egypt in the Light of Recent Discoveries" (1885); "Chart of the Books of the Bible" (2d ed., 1886); "The Useful Minerals and Mining Architecture" (1887), and "Biblical History and Geography" (1888).

ELLIOTT, Charles, clergyman and author, was born at Killybegs, county Donegal, Ireland, May 6, 1792. He was educated in Dublin and came to America in 1814; joined the Ohio conference in 1818 as a circuit preacher; was superintendent of the Wyanadotte (Indian) mission, Upper Sandusky, in 1822; in 1823-27 was presiding elder of the Ohio district, and in the latter year was appointed to the chair of languages in Madison College, Uniontown, Pa., which he held for four years. He was then settled at Pittsburgh, where he was presiding elder of the district and edited the "Pittsburgh Conference Journal." He next went to Cincinnati, where he edited the "Western Christian Advocate" until 1848. His next three years were spent in ministerial duty, when he resumed editorial control of the "Western Christian Advocate," in 1852-56. He was professor of Biblical literature at Iowa Wesleyan University and president of that institution, in 1856-60, and again in 1864-67. During the civil war he was editor of the "Central Christian Advocate" at St. Louis, Mo. He published, "A Treatise on Baptism" (1834); "Delineation of Roman Catholicism" (2 vols., New York, 1842; third edition, London, 1851); "Sinfulness of American Slavery" (2 vols., Cincinnati, 1851); "Life of Bishop Roberts" (1853); "History of the Great Secession from the Methodist Episcopal Church" (1855); "The

Bible and Slavery," "Political Romanism" (1859), "Reminiscences of the Wyanadotte Mission," and a "History of the M. E. Church in the South and West from 1811 to 1866." He died at Mount Pleasant, Ia., Jan. 6, 1869.

BEATTY, John, soldier, was born near Sandusky, O., Dec. 16, 1828, son of James and Elizabeth Williams Beatty. His education was obtained at the district school of a pioneer settlement. His grandfather, John Beatty, was the founder of the town of Milan, O., which was originally called Beatty in his honor. He was an anti-slavery man, of the James G. Birney school, and from him the present John acquired in boyhood his first political tenets, adhering to them through life. In 1852 he supported John P. Hale for the presidency. In 1856 he cast his vote for John C. Fremont. In 1860 he was the Republican presidential elector for the 13th (Ohio) congressional district. In April, 1861 he raised a company for the war, and as lieutenant-colonel was with McClellan in West Virginia. Subsequently he became the colonel of the 5th Ohio volunteer infantry, and was with O. M. Mitchell in his capture of Huntsville and occupation of North Alabama. He commanded a regiment in the battle of Perryville, Ky., Oct. 8, 1862, and in November of that year was commissioned brigadier-general of volunteers. In the December following he was assigned to the army of the Cumberland, and as the commander of a brigade took part in the four days' battle of Stone river. He was with Rosecrans in the Tullahoma campaign, and in the Chattanooga campaign was the first of Thomas' corps to cross Lookout mountain. He commanded a brigade at Chickamauga and in the battle of Missionary ridge, subsequently accompanying Sherman in the expedition to Knoxville for the relief of Burnside. He was elected to the 49th congress from the 8th Ohio district in 1866, and re-elected to the 41st and 42d congresses, serving first as a member of the committee on invalid pensions, then as chairman of the committee on public buildings and grounds, and finally as chairman of the committee on public printing. In 1884 he was one of the Republican presidential electors at large for Ohio, in 1886-87 a member of the board of state charities; in 1891-95 president of the Ohio Chickamauga National Park commission. He is the author of "The Citizen Soldier" (1876); "The Belle o' Berkett's Lane" (1882); "McKintleyism" (1894), and "An Answer to God's Financial School" (1895). Gen. Beatty resides in Columbus, O., where he is president of the Citizens' Savings Bank.

KANE, Elias Kent, senator, was born in New York city, June 7, 1796, a cousin of Judge John Kintzing Kane. After completing his preliminary education in New York, he pursued the study of law, and engaged in the practice of that profession at Nashville, Tenn. In 1815 he removed to Kaskaskia, Ill., where he was elected a delegate to the state constitutional convention in 1818. He was the first secretary of Illinois, and afterwards served in the legislature of that state. In politics he was a Jacksonian Democrat, and on that ticket was elected in 1825 to a seat in the U. S. senate, where he officiated as chairman of the committee on private land claims. He entered the upper house of the national legislature on Dec. 5th of the latter year; and, being re-elected at the end of his term, served continuously until his death, which occurred in Washington, D. C., Dec. 11, 1835.

McDOWELL, Katherine Sherwood (Bonner), author, was born at Holly Springs, Miss., Feb. 26, 1849, daughter of Dr. Charles Bonner. She was educated in private schools in Mississippi and Alabama, and in 1870 was married to Edward McDowell. In 1873, with her husband, she removed to Cambridge, Mass., where for a time she acted as private secretary to the poet, Henry W. Longfellow. Her first contribution to note was a poem, entitled "The Radical Club." She wrote under the pen-name of "Sherwood Bonner." Returning to the place of her birth in 1878 she helped nurse her father and brother, who had been stricken with yellow fever during the epidemic of that year. She continued to reside there until her death. In Mrs. Kirk's novel, "Margaret Kent," she figures as the heroine. Her publications are: "Like Unto Like" (1881); "Dialect Tales" (1883); "Suwanee River Tales" (1884). Mrs. Bonner died at Holly Springs, Miss., July 22, 1883.

HOPKINS, John Henry, first P. E. bishop of Vermont and twenty-sixth in the succession of the American episcopate, was born in Dublin, Ireland, Jan. 30, 1792. At the age of eight he came to the United States with his parents. His early education was obtained at home from his mother. For a time he was engaged in the iron business in western Pennsylvania, but gave it up and commenced the study of law, a profession he preferred to a mercantile life. He was admitted to the bar in Pittsburgh in 1818,

where he rapidly rose to the first rank in business and influence. He became a vestryman in the Trinity parish, and on a vacancy in the rectorship was elected to fill it. On Dec. 24, 1823, he was ordained deacon, and five months later priest. He was a candidate for assistant bishop of Pennsylvania in 1826, and would have been elected but refused to cast a vote for himself. He wished to found a theological seminary in Pittsburgh; but the plan was not approved by his bishop, and in 1831, being invited to become assistant minister of Trinity Church, Boston, Mass., and help found a seminary there, he accepted and left Pittsburgh. He was elected

the first bishop of Vermont in 1832, being consecrated in St. Paul's Chapel, New York city, Oct. 31st. He then removed to Burlington, Vt., where he was also rector of St. Paul's Church, and so continued for twenty-seven years. In "Men of Vermont" (1894) it is said: "Bishop Hopkins will long be remembered in Vermont for his indomitable energy and industry, his varied talents, his peerless expression of his often peculiar opinions, his unselfish and self-sacrificing devotion to duty, and his powerful will. In no respect were his opinions more peculiar than on the subject of education, and all his children were necessarily deeply impressed by these peculiarities. They were never sent to any public school until the boys were old enough to enter college; but the good bishop opened a school of his own in 1854, embarking his entire property and all he could borrow in the erection of the old Vermont Episcopal Institute, which was located just south of the then village of Burlington, and a part only of whose buildings now remain. In this school there were no vacations, no plays, no relaxation from alternate study, work and church attendance, except on Saturday afternoon. Severe discipline and frequent punishment with the rod or black strap were the only inducements to effort—emulation, rewards, and even marks being strictly excluded. The teachers were nearly all theological students, the great object of the school being

to train up clergymen for the church. For several years it was well attended, but the hard times of 1838-39 caused the withdrawal of so many of the pupils that the school closed its doors, and bankruptcy resulted." Bishop Hopkins was an accomplished painter and musician. He was also interested in architecture, and was one of the first to introduce Gothic architecture into this country, publishing an essay on the subject in 1836. He designed a new building for Trinity Church, Pittsburgh, and the enlarged St. Paul's Church of Burlington. He was a clear and forceful speaker, and was especially remarkable for his singular independence of character. He was a voluminous writer, and, besides many pamphlets and sermons, published: "Christianity Vindicated" (1833); "The Primitive Creed" (1834); "The Primitive Church" (1835); "The Church of Rome in Her Primitive Purity" (1837); "The Novelties Which Disturb Our Peace" (1844); "The History of the Confessional" (1850); "The End of Controversy Controverted" (1854); "The American Citizen" (1857); "A Scriptural, Historical and Ecclesiastical View of Slavery" (1864); "The Law of Ritualism" (1866); "The Pope Not the Anti-Christ" (1868). He was married to Melusina Muller, a native of Germany, whose father, a wealthy shipping merchant, emigrated to the United States in 1812, when his daughter was thirteen years old, and settled in Pennsylvania. They had thirteen children. Bishop Hopkins died June 9, 1868. His life was published by his son in 1868.

BISSELL, William Henry Augustus, second P. E. bishop of Vermont and eighty-eighth in the succession of the American episcopate, was born at Randolph, Vt., Nov. 10, 1814, son of Ezekiel and Elizabeth (Washburn) Bissell. He was educated in the public schools and academy of Randolph, and entering the University of Vermont, was graduated in 1838. For a while he taught in the Vermont Episcopal Institute, under Bishop Hopkins, and later he established a private school in Detroit, Mich., in partnership with G. B. Eastman. Having studied for the ministry meanwhile, he was ordained deacon Sept. 29, 1839, in Calvary Church, New York city, and his first charge was at Trinity Church, West Troy, N. Y.; he was afterwards called to Grace Church, Lyons, where he remained until 1848, and then removed to Genesee, N. Y. He was elected bishop of Vermont in 1868, to succeed the late Bishop John Henry Hopkins, and was consecrated in Christ Church, Montpelier, June 3, 1868. Bishop Bissell was much interested in missionary work, being connected with all societies working under the authority of the Episcopal church. He was an independent in politics. In 1838 he was married to Martha, daughter of Phineas and Maria (Cotton) Monilton, of West Randolph, Vt., by whom he had five children. He died in Burlington, Vt., May 14, 1893.

HALL, Arthur Crawshaw Alliston, third P. E. bishop of Vermont, and one hundred and seventy-third in the American episcopate, was born at Binfield, England, April 12, 1847, son of Maj.-Gen. William T. Hall, of the British army, and Louisa A. (Alliston) Hall. He was educated at Brighton College and at Christ Church, Oxford, where he was graduated B.A. in 1869 and M.A. in 1871; was ordained by the bishop of Oxford as a deacon, 1870, and as priest, 1871. He then became a member of the Society of St. John the Evangelist (the Cowley fathers), a brotherhood of clergymen in the English church living in community, under vows of poverty, chastity and obedience, and giving themselves to missionary work at home and abroad. In 1873 Father Hall came to America, where a branch of the society was established in the Protestant Episcopal church, and was connected with the diocese of

Massachusetts; until 1882 as assistant of the Church of the Advent, Boston, that parish then being in charge of the Society of St. John the Evangelist; and from 1882 to 1892 was rector of the Mission Church of St. John the Evangelist. Father Hall was during this time provincial superior of the mission priests of St. John in America, and constantly engaged in preaching and conducting missions and retreats in various parts of the country. During his residence in Boston he was on terms of strong friendship with Phillips Brooks, though representing a school widely separated from that of the rector of Trinity Church. At the end of 1892 Father Hall was recalled by the Society of St. John to England. In 1893 he was elected bishop of Vermont, and (being released from all obligations to the Society) was consecrated to the episcopate, Feb. 2, 1894, in St. Paul's Church, Burlington, by the bishops of Maine, Massachusetts and New Hampshire, assisted by the archbishop of Ontario and the bishops of Delaware and Fond du Lac. Bishop Hall is the author of "Confession and the Lambeth Conference"; "Meditations on the Creed"; "Meditations on the Collects"; "Meditations on the Lord's Prayer"; "Self Discipline"; "The Example of the Passion"; "The Virgin Mother"; "Christ's Temptation and Ours" (Baldwin lectures at Ann Arbor, Mich.); a charge on "Marriage and Divorce," and other works.

STANTON, Frank Leiby, poet and journalist, was born in Charleston, S. C., Feb. 22, 1857, son of Valentine and Catherine R. (Perry) Stanton. His grandparents on his father's side were George Henry Stanton, of New York, a large investor in real estate at Baracoa, Cuba, and Nicolette, daughter of Nicholas Prieutzer, who was killed at the battle of Dresden, under Napoleon Bonaparte. His mother's parents were Peter Parry, a native of Liverpool, England, and a wealthy cotton planter on Kinbawh island, S. C., and Harriet E. Wilson, of Savannah, Ga. The civil war, in which his father bore arms on the Confederate side, interrupted Frank Stanton's studies, pursued at that time in a high school in Savannah, and his education was completed in private without an instructor. Having begun original composition at the age of fourteen, and having inherited from his father an interest in printing, he rather naturally was drawn into journalism, and began on the "Morning News" of Savannah. Having served an apprenticeship at the printer's case, he in 1887 removed to Smithville, Ga., where he published a newspaper, the Smithville "News," doing much of the mechanical work himself. In 1888 he removed to Rome, Ga., and after service on the staff of the Rome "Tribune," as night editor, in 1889 became connected with the Atlanta "Constitution," and has occupied an editorial chair ever since 1890, contributing a daily column of poetry and dialect, entitled "Just from Georgia." He has published "Songs of a Day" (1892); "Songs of the Soil" (1894); "Comes One With a Song" (1898); "Songs from Dixie Land" (1900). Of him Joel Chandler Harris said: "In a period that fairly reeks with the results of a sham culture . . . it surely is something to find a singer breathing unceremoniously into Pan's pipes and waking again the woodland echoes with snatches of song that ring true to the ear because they come straight from the heart." His contributions have appeared in the "Century," "Cosmopolitan," "Mimesis," "Collier's," "Ladies' Home Journal," "Saturday Evening Post," and all the leading magazines and papers of the United States, and in many of the London magazines and newspapers. Mr. Stanton was married at Smithville, Ga., in 1887, to Leona, daughter of Valentine B. Jossey. They have two sons, Valentine and Frank, and a daughter, Marcelle.

VOL. XI.—32.

DERBY, James Cophas, publisher, was born in Little Falls, N. Y., July 20, 1818, eldest son of Benjamin and Lezetta Derby. He was educated in the public schools of Herkimer, N. Y. When fifteen years old he was apprenticed to Henry Iverson, a bookseller in Auburn, N. Y., who took him in his own family to live. He rapidly developed as a salesman and an authority on literature. In 1840 he formed a partnership with a son of Mr. Iverson, and the firm of J. C. Derby & Co. commenced business as publishers and booksellers. The first book bearing their imprint was published in 1844 and was entitled "Conference Hymns with Tunes, Adapted to Religious Meetings for Prayer." In 1848 Mr. Iverson withdrew and Norman C. Miller, a former clerk, became partner, and the firm was known as Derby & Miller. Their list of publications included "Life of Zachary Taylor," by Henry Montgomery; "Lives of Mary and Martha Washington," by Margaret C. Conkling; "Life of the Empress Josephine," by J. T. Hendley; Seward's "Life of John Quincy Adams, Goodrich's "History of all Nations"; "Life of Aloniam Judson and Lives of the Three Mrs. Judsons," "Life of Washington," by Jared Sparks; "Fern Leaves," and "History of the War with Mexico." This list gives an insight into the methods and purposes governing Mr. Derby in his selection of subjects and authors. He became a publisher of high class books on popular subjects. The business was enlarged by a subscription-book department, and that afterward popular method of selling books was largely pioneered by Mr. Derby. In 1853 he removed to New York city and established the firm of Derby and Jackson, which became a prominent publishing house with a list of books that included the best known authors of the day, among them Wm. H. Seward, Henry Ward Beecher, "Fanny Fern," Alice and Phoebe Cary, B. P. Shillaber, S. G. Goodrich, Henry Wikot, Augusta J. Evans, Thomas Bailey Aldrich, "Marion Harland," Frank B. Goodrich, "Widow Bodott," "Miles O'Reilly," Fred S. Cozzens, and the author of "Rutledge." Many of these credit their first encouragement in the literary field to Mr. Derby, their first publisher. The firm also published upwards of 200 volumes of standard English classics. In 1862 the firm of Derby & Miller was renewed in New York city, and published a line of subscription books, including Raymond's "Life of Lincoln," Hendley's "Life of Grant," Goodrich's "Tribute Book," and the engraving on steel of Carpenter's "Emancipation Proclamation." Mr. Derby with his three brothers, also well-known publishers in their time, give to their mother the credit of their success in the molding of their characters. She wrote her sons the following letter in 1844 in speaking of which Mr. Derby said just before his death, "I can confidently say that in the long and varied experience of my brothers and myself, not a single volume has ever been sold by us of a doubtful tendency." "As you are soon going on your accustomed journey to purchase books, I will ask you once more to consider my plea regarding the policy and character of some portion of your business. The selecting of books for a reading community is a peculiar responsibility; and if the matter therein contained be good in its wholesale and retail consequences, it will rise up for you; if bad, against you, even here in this partly Christianized America. You now stand upon the pivot of general improvement in almost everything, and it is your special

province to go forward in this particular branch of progression, provided your religious principles, high moral character and self-denial be such as should be worthy the patronage and confidence of the world, and more especially your own conscience. . . . The mind of man is a soil that God has made highly productive of greatness and goodness, provided it is beneath the refreshing showers of healthful and exalting influences; and it is your peculiar privilege to administer in the books you put into their hands such influences to fallen and rebellious man. . . . I would therefore have you come out on the right and on the safe side, and to extend your usefulness make your principles publicly known and your reasons for them, then your names may be written in letters of gold, as the first booksellers resolved to put nothing but that which is good and healthful upon your shelves and counters. Your affectionate mother, **LEZETTA DERBY.**" In 1862 Mr. Derby retired from business and was in the government employ in the state department under Secretary Seward, his life-long friend. In his capacity as U. S. dispatch agent for the government in 1865 he forwarded to Minister Adams, and through him to the nations of Europe, the official news of the assassination of President Lincoln. In 1865 Mr. Derby was appointed by the government U. S. general agent of the Paris Exposition of 1867 and was instrumental in making the American display a success. For his services in this connection he received from Emperor Napoleon III. a gold and also a bronze medal. In 1868 Mr. Derby removed with his family to Aiken, S. C., where he lived for five years. Upon his return to New York he accepted the management of the subscription-book business of D. Appleton & Co.; and a new edition of the "American Cyclopaedia," Seward's "Travel Around the World," and Sherman's "Memoirs" were sold by him, their sale being phenomenal. In 1890, at the special request of Frederick W. Seward, Mr. Derby and Mr. Miller renewed the partnership of Derby & Miller to bring out the biography of William Henry Seward, in three volumes. Mr. Derby was married in 1841 to Lavanchie White, daughter of Isaac Fitch, and niece of Abijah Fitch of Auburn, N. Y. They had eight children born to them, seven of whom grew to maturity. Mr. Derby was a fellow of the National Academy of Design and a member of the Century Association. He died in Brooklyn, N. Y., Sept. 22, 1892.

DERBY, George Hunter, publisher, was born in Little Falls, Herkimer co., N. Y., March 6, 1823, third son of Benjamin and Lezetta Derby. He received a good primary education, and as a lad entered the book store of his brother James, at Auburn, N. Y., where he was thoroughly initiated in the business of making, publishing and selling books. In the same store was another brother, Henry William Derby, who removed to Ohio and conducted the book

business for a life time at Cincinnati and Columbus, with a few years' experience in New York city, where he was for a time delegated by A. T. Stewart to purchase in Europe a number of the paintings included in the latter's celebrated art gallery. Henry W. Derby also purchased in Europe, and exhibited throughout the United States, the celebrated painting, "The Prodigal Son." He died at Cincinnati, O., in 1892. Another and younger brother, Chauncey Lyman Derby, was also trained in the same school, and was a publisher in western New York, Sandusky, O., and New York city, and died in the

latter city in 1876. George Hunter Derby left his brother's employ in 1845, and opened a book store in Geneva, N. Y. Here he had as clerk, William Orton, afterward president of the Western Union Telegraph Co. On removing to Buffalo in 1847, Mr. Derby sold out his business to his clerks, and the firm of Prince, Orton & Miller succeeded to the business. He was married, July 29, 1845, to Celia M. Bancroft. In Buffalo he was the pioneer bookseller and he found a field for the exercise of his indomitable industry, energy, and enterprise, which in less than a year gave him a standing as one of the sterling business men of the city. He was the instigator of an enterprise that finally resulted in the establishment in San Francisco, Cal., of the great publishing house of H. H. Bancroft & Co. In 1852 he proposed to his brothers that they join in a venture to ship to California, by way of Cape Horn, the only available route, a cargo of books to be sold in the new country, and to open for the Derby brothers a new publishing house on the Pacific coast. At this time, Hubert Howe Bancroft and George L. Kenney were clerks for Mr. Derby in the Buffalo store. His keen insight and thorough knowledge of men fixed upon these two as fitted to undertake the management of the new enterprise in California. Before the arrival of the cargo, however, Mr. Derby died, and the consignment was sold by order of his partners and executors. His widow having faith in the project, and in her husband's plans, determined, however, to carry out the enterprise, and used her entire fortune to establish Mr. Bancroft, who was her brother, in the book business there. She subsequently married Mr. Kenney, and removed with her three daughters to California, where she has since resided. Mr. Derby's death was due to an attack of the Asiatic cholera, which was epidemic in Buffalo at that time. He died Sept. 15, 1852.

COOK, Abraham, clergyman, was born in Franklin county, Va., July 6, 1774. His parents, in 1780, removed to Kentucky, which was then a wilderness, and united with a few other families in forming a settlement at the Forks of Elkhorn. The father dying a few months later, the widow was left in straitened circumstances, with a large family depending upon her for support, and surrounded by the constantly increasing perils of frontier life. The new colony soon began to feel the need of a clergyman to minister to their spiritual wants. They accordingly tendered William Hickman 100 acres of ground, provided he would come and settle among them. He accepted the proposition, and in February, 1788, moved to Franklin county, and the following June established a small church called Forks of Elkhorn. Among the number of converts he made during the first year of his pastorate were nine of Mrs. Cook's family, Abraham being of the number. In April, 1792, the settlement was simultaneously attacked at three different points by hostile Indians. Two of Abraham's married brothers were killed, but not before they had made a terrible struggle with the Indians. Their wives afterward defended their home and infants. They had a rifle in the house, but were without bullets; one of them, finding a musket ball, bit it in two with her teeth, rammed one piece down the rifle, and putting the gun through a small aperture in the wall, fired it at an Indian who was sitting on a log near the cabin. At the crack of the rifle he sprang high in the air, and fell dead. His companions tried to break the door open, but, failing in their purpose, fired upon it. The balls, however, failed to penetrate the door, which was made of thick puncheons. The Indians then kindled a fire on the roof of the cabin, which was extinguished by one of the courageous women, only to be rekindled, and soon the water in the house

August Belmont

was exhausted. The Cook brothers' wives in the end, however, bullied the savages, who finally retired, and left them to mourn over the dead bodies of their husbands. Abraham Cook continued his connection with the Forks of Elkhorn congregation until 1796, when he was married to Sarah Jones, and removed to the source of Six Mile creek, in Shelby county. He there, in 1799, entered the constitution of what subsequently became known as Christianburg Church. For the following ten years he divided his time between work on the farm and the study of the Bible. He all the while felt that he was called to preach the gospel, but being poorly educated, and entertaining a very humble opinion of his natural endowments, for some time he heroically strove to repress the feeling. In 1806 Mr. Cook became a member of Indian Fork Church, and in 1808 was licensed to preach, and in September of the following year ordained to the ministry by William Hickman, Jr., Thomas Woodriddle, and Philip Weber. He soon showed a talent for preaching far above the average, and acquired popularity and influence among the Baptists of Kentucky. Mr. Cook was chosen pastor of Indian Fork, Six Mile and Buffalo Lick Churches, in Shelby county, and Mt. Carmel in Franklin. In addition to his pastoral duties, he also labored and preached among the destitute. He refused to receive any compensation for his services, and supported his family by working on the farm. In 1851 he sold his land in Kentucky and removed to Missouri, where he died on Feb. 10, 1854.

BELMONT, August, banker and diplomat, was born at Alzei in the Palatinate, Rhenish Prussia, Dec. 8, 1816, son of a wealthy landed proprietor, who gave to his son every opportunity of self-improvement in the best schools of the locality, and under the most thorough instructors. When the son was fourteen years of age, he was placed in the Frankfort house of the great banking firm of Rothschild Bros., in order that he should become a thorough master of the principles of financiering. In this he proved a ready pupil, and at the end of three years, he was advanced to the supervision of the branch house in Naples, Italy. In 1837 he was sent to New York city, to found another branch of the great Rothschild house, under the name of August Belmont & Co. He took the first opportunity to become a citizen of the United States, and from that time was conspicuously identified with the political, diplomatic, commercial, financial, and social affairs of his adopted country. He affiliated with the Democratic party, and cast his first presidential vote for the electors on the Polk and Dallas ticket in 1844. During the same year he was appointed by the Austrian government consul-general in the United States. He resigned the position in 1850, as a protest against the treatment Hungary was then subjected to by the government of Austria. In 1853 Mr. Belmont took an active part in the presidential campaign that resulted in the election of President Pierce, and was appointed *charge d'affaires* of the U. S. legation at the Hague. In 1855 the rank of the mission was raised, and Mr. Belmont became minister resident of the United States at the Hague. During his incumbency he negotiated a highly important consular convention, and received from the government at Washington special thanks for the service rendered. He also persuaded the state department of the United States to locate consuls in the Dutch East Indies, a diplomatic favor theretofore persistently denied. In 1856, upon the retirement of the Pierce administration, Mr. Belmont resigned as U. S. minister to Holland, and upon his return to America, became an active leader of the Democratic party. He deprecated civil war, and made heroic efforts to maintain peace between the contending sections. He became a natural supporter

of Stephen A. Douglas, the champion of compromise. At the Charleston Convention of 1860, to which Mr. Belmont was a delegate, he went with the Douglas wing, and was an active champion of that leader in the Baltimore Convention, and was by the convention made chairman of the National Democratic committee. Upon the election of Mr. Lincoln, he declared that the election could not be considered a just provocation of war, and when South Carolina seceded, he in his official position wrote to the governor of all the other southern states, as well as to the leading southern politicians, and urged them to refrain from a course which he prophetically declared must end in disaster for the South. His words, as written Nov. 20, 1860, were: "Secession in South Carolina signifies civil war, which must be followed by a dissolution of the whole state structure, after infinite sacrifices of money and blood. If patriotism and love of the Union are not strong enough to prevent the people of the South from carrying out their insane purpose, I still hope that they will not lose the instinct of self-preservation." When the South decided to secede, Mr. Belmont became one of Mr. Lincoln's staunchest supporters, and

urged a vigorous prosecution of the war. He helped to raise and equip the first German regiment, and on May 15, 1861, as they were leaving for the seat of war, he presented them with a stand of colors, and in an address to the men, outlined their duty toward the flag of their adoption. Mr. Lincoln and Secretary Seward, knowing the great influence Mr. Belmont had in European financial circles, found in him a ready and willing ally in directing the minds of the commercial and financial leaders of the old world to the superior strength and importance of the North over the South, and discouraging the recognition of the Confederacy as a belligerent. He wrote to the Rothschilds in London and Paris, and his letters were laid before the English and French ministers of state, Palmerston and Thouvenin. In 1861 Mr. Belmont personally visited England, and had an interview with Palmerston, whose laconic reply Mr. Belmont transmitted to Mr. Lincoln: "We do not like slavery, but we need cotton, and hate your Morrill protective tariff." In 1863 he visited Paris and wrote: "I am convinced that the emperor is the chief person from whom we must encounter danger. The secessionists here—and their number is legion—are very sanguine of the speedy recognition by, and assistance of, France." In 1863-68 Mr. Belmont, as chairman of the National Democratic committee, opened and directed the political campaign. In 1872, upon the party nominating Horace Greeley as its candidate, Mr. Belmont resigned. He was a delegate to every National Democratic convention, from 1860 until 1884. He was a member of the Union Club, and for many years president of the Manhattan Club, and of the American Jockey Club, and was deeply interested in the development of American thoroughbreds, and largely contributed to the elevation of the turf in this country. He maintained at the time of his death, one of the best stock farms and one of the leading stables of thoroughbreds in the United States. In 1849 Mr. Belmont was married to a daughter of Com. Matthew C. Perry. Of six children, four are now (1894) living. Perry Belmont, August Belmont, Jr., Oliver H. P. Belmont, and a daughter, the wife of Samuel S. Haviland. Mr. Belmont died at his home in New York city, Nov. 24, 1890.

BELMONT, Perry, lawyer and politician, was born in New York city, Dec. 28, 1851, eldest son of August Belmont, a prominent banker, of New York city, and Caroline Slidell Perry, his wife. He was graduated at Harvard University in the class of 1872, taking special honors in history and political economy. He afterwards entered the University of Berlin for a course in civil law, and on his return to America took a course of legal study at the Columbia College Law School, where he was graduated in 1876. On being admitted then to the bar, he began practicing in New York. In 1881 he was elected as a Democrat to congress, and was re-elected for four consecutive terms, serving from Dec. 5, 1881, until March 4, 1887. He was a member of the committee on foreign affairs during his first term, and in 1885 was appointed chairman of this committee. In congress he advocated tariff reform, introduced and carried through the bill to indemnify the Chinese for the massacre at Rock Springs, and urged on several occasions the strict observance of treaty obligations with the Chinese government. As a member of the committee on foreign affairs he severely censured James G. Blaine, then in charge of the state department, for his alleged relations with a syndicate of American capitalists interested in the development of certain guano deposits in Peru, and as chairman of the same committee opposed and defeated the effort of the Nicaragua Canal Co. to secure support from the U. S. government. His congressional service covered many other important measures, such as the retaliation bill on the fisheries dispute for non-interference with Canada, etc. During 1887-88 he was U. S. minister to Spain, and has resided since his return in New York, where he is a member of many clubs and societies, and is very active in politics.

BELMONT, August, banker, was born in New York city, Feb. 18, 1853, second son of August Belmont, the banker and financier, and brother of Perry Belmont, the lawyer. He obtained his preliminary education at the Rectory School, Hamden, Conn. He then studied at Haverford College, Pa., and Phillips Exeter Academy, after which he entered Harvard University, and was graduated in 1875. In September of the same year he entered his father's banking house. Upon the death of his father in 1890, he assumed charge of the bank, and has since played a very prominent rôle in the financial world. In addition to its American interests his firm is the accredited representative of the Rothschilds in America. Besides his immediate connection with the banking business August Belmont is chairman of the board of the Louisville and Nashville railroad, a director of the St. Paul railroad, vice-president of the Kings County Elevated railroad, a director of the Equitable Life Insurance Co. and of the Manhattan Trust Co., of the National Park Bank, of the Bank of the State of New York, and various other corporations. An active sportsman in his leisure hours, he is prominently connected with many clubs. He was married in New York city, in 1881, to Bessie Hamilton Morgan.

HALL, Willard, lawyer, congressman and jurist, was born at Westford, Middlesex co., Mass., Dec. 24, 1780, son of Willis and Melcheta (Pool) Hall and grandson of Willard Hall, who was graduated at Harvard College in 1722, was the first pastor at Westford, and was also a physician and a farmer. He entered the Westford Academy in 1792 with the first class and in 1791 he passed the entrance examination for Harvard College, but he preferred to perfect his elementary education and did not enter Harvard College until 1795, having passed the previous year at Westford Academy. After leaving

college he entered, in March, 1800, the law office of Samuel Dana, of Groton, Mass. He was admitted to the bar in 1803 in Hillsboro county, N. H. A speech by James Asheton Bayard, then a member of congress, in which he spoke of the high moral tone of the members of the Delaware bar, attracted his attention about this time, and after correspondence with Mr. Bayard he decided to make his home in Delaware. He left his father's house in Westford, Mass., April 7, 1803, on horseback and on April 16 he reached Wilmington, Del. He at once went to Georgetown, Del., where the court of common pleas was in session and soon after was admitted as an attorney and counselor. In May, 1803, he settled in Dover, and there he practiced law for twenty years, always acting according to the highest standard of the relations between an attorney and his clients. In Delaware he soon won the esteem of his fellow citizens and in 1811 he was appointed as secretary of state. He held this office until January, 1814, and in 1817-21 he was a member of congress. He was again secretary of state in Delaware in 1821, and in 1822 he was elected to the state senate. In May, 1823, he was appointed by Pres. James Monroe as U. S. district judge for Delaware, and this office he held with honor until his death. At the request of the state legislature Judge Hall undertook the revision of the Delaware laws. This work he completed in 1829, reducing six volumes of laws, 3,646 octavo pages, to one volume of 563 octavo pages, and retaining in the original terms all old provisions unaltered by the latest legislation. His work was published under the title of "Laws of Delaware to 1829, Inclusive." From 1829 to 1852, when another revision of the state laws was made, no difficulties or perplexities were occasioned in the courts by his work of revision. In 1831 he was a member of the state constitutional convention. Throughout his life he was a man of influence in the religious world. He was a Sunday-school teacher for forty years, and he was an earnest advocate of the idea that lawyers should always be religious men. When he was secretary of state in Delaware he had advocated the establishment of public schools, and in 1829, at the request of a committee of the legislature, he drew up a bill providing for a school system for the state. The bill was passed and he took place then as the father of the public schools of Delaware. He died in Wilmington, Del., May 10, 1875.

NORVELL, John, lawyer and senator, was born in Garrard county, Ky., Dec. 21, 1789, son of Lipscomb Norvell, a Virginian, who served as an officer in the war of the revolution and lived to enjoy a pension until he was over ninety years of age. The son went to Baltimore and learned the trade of a printer, acting upon a letter from Thomas Jefferson advising him to learn a trade. At the same time he studied law and was admitted to the bar, becoming a journalist and politician. He was a friend and correspondent of Pres. Madison, and gave him warm support, especially praising his war measures, both by speeches and in editorials. In 1816 Mr. Norvell became the Democratic editor of a paper in Philadelphia, where he resided for sixteen years. In May, 1832, he removed to Detroit, Mich., having been appointed postmaster of that city by Andrew Jackson. He was a leading member of the constitutional convention of 1835, serving as chairman of eight committees and a member of several others. His work in that convention was one of great value

Willard Hall

to the welfare of the state. With Lucius Lyon he was elected a U. S. senator and went to Washington before the admission of Michigan to the Union. He secured with the aid of his colleague a large portion of the upper peninsula and its accompanying mineral wealth to compensate for the loss of a small strip of land on the southern boundary of the territory. After the expiration of his term as senator in 1841 he resumed the practice of law at Detroit and served as a representative in the legislature of 1842. In 1845 he was appointed U. S. district attorney of Michigan, holding the office until 1849. He supported the administration in the prosecution of the Mexican war and sent three sons to serve in the field. He died at his home, near Detroit, Mich., April 11, 1850.

SCHLEICHER, Gustave, soldier and legislator, was born at Darmstadt, Germany, Nov. 19, 1823. He was educated at the University of Giessen, in the Grand Duchy of Hesse-Darmstadt, and became a successful civil engineer. As such he was engaged in the construction of several European railroads, but in 1847 emigrated to Texas, and after passing some time on the frontiers, established himself finally in San Antonio (1850). In 1853-54 he was a member of the state house of representatives, and in 1859-61 of the state senate. During the civil war he served in the Confederate army, reaching the rank of lieutenant colonel and colonel of the Texas Rangers. In 1874 Gustave Schleicher was elected to the 44th U. S. congress (1875-77) as a representative from Texas on the Democratic ticket. He showed marked ability as a legislator, and was the first member of congress who was recognized as a representative of the Germans of the United States. He was re-elected to the 45th and 46th congresses, but did not live to begin his third term. He died in Washington, D. C., Jan. 10, 1879.

RUMSEY, David, jurist, was born at Salem, Washington co., N. Y., Dec. 25, 1810, son of David and Lydia Stiles Rumsey. His earliest American ancestor was Robert Rumsey, a native of Wales, who settled in Fairfield, Conn., between 1639 and 1661. The line of descent runs through his son, Robert; through his son, Joseph, who was married to Sarah Bartram; and through their son, Ephraim, who was married to Phoebe Hurlbut, and who were the grandparents of Judge Rumsey. He was educated at Hobart College, Geneva, and studied law at Bath, Steuben co., being admitted to the bar in 1831. In 1847 he was elected a representative to the U. S.

congress, where he served until 1851. In 1873 he became justice of the supreme court of New York state, and held that position until 1880, when he retired on account of his age, and was succeeded by his son, William. In 1847 he was married to Jane E., daughter of Anthony C. and Mary (Ellis) Brown of Ogdensburg, N. Y., by whom he had two sons and four daughters. Judge Rumsey died at Bath, N. Y., March 12, 1883.

RUMSEY, William, jurist, was born at Bath, N. Y., Oct. 18, 1841, son of David and Jane E. (Brown) Rumsey. He inherited his legal talents from his father, and received an excellent preparatory education. He matriculated at Williams College in 1856, and would have been graduated, but the

civil war broke out, and he at once reported for duty as aid-de-camp to Gen. R. B. Van Valkenburg of the state militia. He resigned that position in August, 1861, and was appointed first lieutenant and adjutant in the 1st New York light artillery. He took part in the siege of Yorktown, the battle of Williamsburg, and the battle of Fair Oaks, in which his horse was shot under him, and he was severely wounded. He was promoted to the rank of captain and assistant adjutant general for bravery in this last engagement, and subsequently was made a brevet lieutenant colonel "for distinguished services in the campaign of May, June and July, 1864." Col. Rumsey studied law in his father's office, and was admitted to the bar in 1868. Having a thorough knowledge of the profession, and being a fine speaker, he soon obtained a large practice. He also entered into politics on the Republican side, and in 1880 was elected justice of the supreme court in the 7th judicial district, to succeed his father, who retired on account of his age. Judge Rumsey has written an exhaustive work on "Practice," and was one of a commission of three with the Hon. David Dudley Field and Hon. David L. Follett appointed by Gov. Hill to prepare and revise the code of evidence. In 1891 he was re-elected justice of the supreme court, receiving the nomination of both parties, and the following year he was assigned by Gov. Morton to the appellate division of the supreme court for the fourth department, his term beginning Jan. 1, 1896; but before he entered upon those duties, at the request of the judges and several lawyers in the city of New York, he was temporarily assigned to the first

department in the place of Judge Dwight, who was prevented from accepting his assignment because of his ill health, and subsequently, upon Judge Dwight's assignment being revoked at his request, Judge Rumsey was assigned to the first department for a term of five years. He resigned this position in 1901, and returned to New York city. The degree of LL.D. was conferred upon him by Williams College in 1888. He was married in Brooklyn, N. Y., Feb. 1, 1877, to Ella, daughter of Dr. Francis Moore, of that city, and he has two daughters and one son. He is a member of the University and Manhattan clubs, of New York.

GURLEY, Phineas Densmore, clergyman, was born at Hamilton, Madison co., N. Y., Nov. 12, 1816, son of Phineas and Elizabeth (Fox) Gurley. After being graduated at Union College with the first honor, in 1837, he studied theology at Princeton, where he was graduated in 1840. He was ordained to the Presbyterian ministry and held pastorates in Indianapolis, Ind.; Dayton, O., and in 1851 accepted an invitation to assume pastoral charge of Fifth Street Church, Washington, D. C. In 1859 this church was enlarged by its union with the Second Presbyterian Church of the same city, and Mr. Gurley acceptably ministered to the spiritual needs of both congregations until his death. In 1859 he was appointed chaplain of the U. S. senate. He was present at the death bed of Pres. Lincoln, and preached his funeral sermon. He was very prominent in the discussions and negotiations which led to the fusion of the old and new schools of the Presbyterian church. He died in Washington, D. C., Sept. 30, 1898.

D. Rumsey

William Rumsey

DRINKER, Anne, poet, was born in Philadelphia, Pa., Dec. 3, 1827, daughter of Joseph D. and Eliner (Skyrin) Drinker. Her earliest American ancestor, Philip Drinker, came to America from Devonshire, England, in 1635. During the revolutionary war her great grandparents were inflexible loyalists, and her great-grandfather, John Drinker, was imprisoned three days and drummed through the streets of Philadelphia at the head of a "Yankee" regiment for refusing to take the oath of allegiance. Her father was a clerk in a branch of the Bank of the United States; then a stockbroker in Philadelphia, and in 1843 removed to Montrose, Susquehanna co., Pa., and lived upon inherited lands which were purchased before the revolution. Miss Drinker was educated in Philadelphia under the preceptorship of Prof. Charles D. Cleveland, Mary Anne Longstreet, M. Victor Value, Count Rosunkwitz and Mdlle. Aline Rodrigue. She is better known by her pen-name, "Edith May." Her contributions to magazines attracted wide attention, and in 1850 she published her "Poems by Edith May" in a very expensive form; but to oblige those who wrote saying they could not afford the first edition, she, in 1854, issued a popular

Anne Drinker.

edition. The volume was favorably noticed by the leading reviews of America, England and France. She also published "Tales and Verses for Children" (1855) and "Katie's Story." Miss Drinker was a member of the Protestant Episcopal church at Edgemont, Pa., where she resided for many years. Her favorite pastimes are music, painting, microscopy and the study of languages.

BRYANT, Gridley, engineer and inventor, was born at Scituate, Plymouth co., Mass., Aug. 27, 1790. His father dying soon after and the family being poor his education was limited to the country schools. When he was fifteen years of age he was apprenticed to a builder in Boston. At the age of twenty-one he began business for himself as a builder, and soon attained prominence as a contractor and constructor of large enterprises. In 1823, while building the U. S. Bank in Boston under a contract with the U. S. government, Mr. Bryant invented the portable derrick, now in universal use. When the Bunker hill monument was undertaken, he aided the architect in the preparation of the foundations and at the laying of the corner-stone acted as master mason. He had purchased and opened granite quarries at Quincy, four miles from Boston, and on April 1, 1826, he began the construction of the first railroad in Massachusetts, the charter for which he procured against great opposition. The road, four miles long, was constructed for the purpose of transporting the granite for the Bunker hill monument, and the first train passed over the road Oct. 7, 1826. In building and equipping this road, Mr. Bryant designed the switch, the turn out, and the turn-table which are universally used on all railroads. He also designed an eight wheeled, two-truck car for carrying long blocks of granite around short curves, which was used for twenty five years on that railroad, and was introduced in evidence in the great patent suit of Ross Wiggins against the Erie railroad to prevent that road from using an eight-wheeled car of his invention, on which he had obtained a patent. After five years' litigation and an expenditure of \$250,000 the Wiggins patent was annulled, it being shown that the principle which Wiggins patented in 1831 was antedated by Bryant in his car of 1826. Mr. Bryant

never took out patents for his many inventions and no compensation was ever paid him by the users. He was engaged on many other important public enterprises, retaining to the last his facility in overcoming obstacles. He was able to spend the latter years of his life free from the annoyances of active business and with all his faculties unimpaired. He was always a great reader and student of philosophical writings. He died at Scituate, Mass., June 13, 1868.

SPEIGHT, Jesse, senator, was born in Greene county, N. C., Sept. 22, 1795. His education was limited to a public school training, supplemented by his own personal efforts, but his natural abilities were of a high order, and in 1822 he became a member of the lower house of the North Carolina legislature. In 1823 he was made a member of the state senate, where he continued until 1827, officiating for several years as the presiding officer. Having been elected as a Democrat, he served as a representative in congress from North Carolina from 1829 to 1837, when he declined a re-election. Of the convention held in 1835 for revising the constitution of North Carolina he was a member, but later he removed to Plymouth, Lowndes co., Miss., and was elected to the legislature of that state, becoming its speaker. In 1844 he was elected president of the Mississippi senate, and in the following year he became a senator in congress from his adopted state, serving from March 4, 1845, to his death, which occurred at Columbus, Miss., May 5, 1847.

SMITH, Delazon, senator, was born at New Berlin, Chenango co., N. Y., Apr. 17, 1816. He was graduated at the Oberlin Collegiate Institute of Ohio in 1837, after which he studied law, and was admitted to the bar. Becoming a writer for the press, he associated himself, in an editorial capacity, with the Rochester "True Jeffersonian," in New York, and the "Western Empire," in Dayton, O. He was appointed by Pres. Tyler special commissioner to Quito, Ecuador, in 1842. In 1846 he removed to Iowa territory, where he remained until 1852, when he emigrated to the territory of Oregon. In 1854 he was elected to the Oregon assembly, and was re-elected in 1855 and 1856. In 1857 he was a member of the convention which framed a state constitution, and in July, 1858, was chosen one of the senators in congress for the prospective state, taking his seat as such on Feb. 14, 1859. He served, however, only until March 31 of the same year. He was licensed as a preacher in the Methodist Episcopal church, and in politics he was a Democrat. He was editor of the Albany "Democrat" from 1853 to his death, which occurred at Portland, Ore., Nov. 17, 1860.

OLIN, Gideon, jurist and congressman, was born in Rhode Island in 1743. He removed to Shaftsbury, Vt., in 1776, and became one of the founders of that state. He was elected a delegate to the Windsor convention of June 4, 1777, and was a member of the state legislature in 1778, serving as a commissioner of sequestration. In the same year he acted as major of the 2d Vermont regiment under Col. Herrick, and afterward under Lieut. Col. Walbridge, seeing frequent service on the frontier during the revolution. From 1780 to 1793 he was a member of the Vermont general assembly, and during six years of that time served as speaker of the house. In 1803 he became a member of the state council, and remained in that body for five years. He was judge of the Bennington county court from 1781 to 1798, held the same office from 1800 to 1802, and served as chief judge from 1807 to 1811. He was elected a delegate to the constitutional conventions of 1791 and 1793, and was a representative in congress from 1803 to 1807. His death occurred at Shaftsbury, Vt., Aug. 6, 1822.

DREW, Daniel, capitalist, was born at Carmel, Putnam co., N. Y., July 29, 1797. He was

brought up on his father's farm, gaining what education he could in the winter from the country school in the neighborhood. When he was fifteen years of age his father died, leaving the family in almost a helpless condition. In 1815 young Drew went to New York to look for employment, but the war with England had so depressed business that he was unsuccessful. After a time he was employed by a cattle broker, and spent the following five years driving cattle from Putnam county to New York. In 1820 he removed to New York city, and lived at the famous Bull's Head tavern in the Bowery, and for a

time kept the house himself. Saving some money, he went into partnership with two drovers, and began trading in cattle with such success that the firm was able to extend its operations into Pennsylvania and Ohio, and eventually brought into New York city the first drove that ever came from the West. In 1831 Mr. Drew abandoned the cattle business, in which he had been for fourteen years, and went into steamboating. He became interested in a boat running between New York and Peekskill, called the Water Witch, and was soon

running an opposition line to Cornelius Vanderbilt. Within three years Mr. Drew and his associates spent nearly \$100,000 in steamers to equip their line. In 1840 they founded the celebrated People's line, in which he became the largest stockholder. This company built the Isaac Newton, the New World, the St. John, the Dean Richmond and the Drew, the last two costing over \$700,000 each. In 1847 he formed a partnership with George Lay, and established a line of steamers between New York and Stonington, and in 1850, in connection with Cornelius Vanderbilt, he secured a controlling interest in the railroad from Stonington to Boston. In 1849 Drew and his associates purchased the Champlain Transportation Co., running a line of five steamers from Whitehall to the Canadian end of Lake Champlain. The new proprietors conducted its business for seven years at a profit, and in 1856 sold out to the Saratoga and Whitehall Railroad Co. In 1849 he established the banking firm of Drew, Robinson & Co., which became known as one of the most successful houses in New York. In 1857 he was elected a director of the Erie Railroad Co., and was subsequently treasurer of the company and one of its principal creditors. At one time Mr. Drew was considered to be worth \$15,000,000, but later he met with serious losses, particularly through the failure of Kenyon, Cox & Co., of which firm he was a partner. This failure forced him to make an assignment, and eventually to go into bankruptcy. He was trustee of the Mulberry Methodist Church, New York, for which he erected a church at the corner of Fourth avenue and Twenty-second street; he was also a trustee of the Wesleyan University at Middletown, Conn., which he largely endowed. He founded the Drew Ladies' Seminary at Carmel and in 1866 the Drew Theological Seminary at Madison, N. J., but the notes he gave for its endowment, amounting in all to \$1,000,000, were never paid, owing to his failure. He died in New York city, Sept. 19, 1879.

STANTON, Theodore, author and journalist, was born at Seneca Falls, N. Y., Feb. 10, 1851, son of Henry Brewster and Elizabeth (Cady) Stanton. He is a lineal descendant of Thomas Stanton, who came to this country in 1638 as crown interpreter-general of the Indian dialects, and afterwards became judge of the New London county court, while

through his paternal grandmother, Susan (Brewster) Stanton, he is directly descended from Elder William Brewster, the ecclesiastical head of Plymouth colony. His maternal grandfather was Daniel Cady, the distinguished judge of the New York supreme court. Mr. Stanton not only has a notable line of ancestors but comes of distinguished parentage. His father was the well-known leader and lecturer in the anti-slavery movement, as well as a prominent journalist, and his mother is known as an author of considerable note and the inaugurator of the woman-suffrage movement in America. Theodore Stanton was graduated at Cornell University in 1876. In 1880 he became the Berlin correspondent of the New York Tribune, a position he held for several years. At present (1900) he is engaged in newspaper work in Paris, France. He is the author of "The Woman Question in Europe" (1881), translated and edited Le Gall's "Life of Thiers" (New York, 1879), and is a contributor to various periodicals.

PENNYBACKER, Isaac Samuels, U. S. senator, was born in Shenandoah county, Va., Sept. 12, 1807. He was educated at Washington College, Virginia. He then studied law at the Winchester Law School, and after being admitted to the bar settled at Harrisonburg, Va., where he commenced the practice of his profession, and soon attained eminence. In 1837 he was a representative in congress, and at the expiration of his term became judge of the district court of western Virginia. He declined the office of U. S. attorney-general, offered him by Pres. Van Buren, and subsequently that of justice of the supreme court of Virginia. He was also spoken of for governor of his state, but declined to run for the office. In 1845 he was elected U. S. senator, but before the expiration of his term he died in Washington, D. C., Jan. 12, 1847.

FLAGG, Azariah Cutting, politician, was born in Clinton county, N. Y., in 1790. When he was nine years old his father removed to Richmond, Va., and at the age of eleven he was apprenticed to a printer in Burlington. He remained here until 1811, when he removed to Plattsburg, N. Y., and served as a soldier in the war of 1812. In 1813 Mr. Flagg established the Plattsburg "Republican," which he owned and edited for many years. He represented Clinton county in the assembly from 1823 to 1824, and in 1826 was appointed by Gov. De Witt Clinton secretary of state, which office he held until 1833. He was comptroller of the state in 1831-32, and again in 1842-46. During the whole of his public life and especially after he removed to New York city, in 1846, Mr. Flagg was one of the leaders of the Democratic party in the state and also bore the reputation of being one of the ablest financiers. In the columns of the Albany "Argus" he discussed the political questions of the day for many years; he was one of the most determined opponents of the U. S. bank, and rendered efficient aid to De Witt Clinton in moulding public opinion in regard to his canal policy, and later was foremost in his opposition to the pro-slavery tendencies of the Democratic party. In 1856 he was elected comptroller of the city of New York and in 1855 was re-elected. In 1857, soon after leaving office, he became blind, but never lost his interest in political questions. He died in New York city, Nov. 26, 1873.

SHERMAN, Robert Minot, jurist, was born at Woburn, Middlesex co., Mass., May 22, 1773, nephew of Roger Sherman, signer of the Declaration of Independence. He was graduated at Yale College in 1792, and was a tutor in that institution in 1795. Having acquired a legal education, he was admitted to the bar in 1796, and opened an office in Fairfield, Conn., where he resided during the remainder of his life, and gained a lucrative practice. He was a member of the general assembly in 1798, of the state senate from 1814 to 1818, and was a delegate to the Hartford convention in 1814. The degree of LL.D. was conferred on him by Yale College in 1829. He was a judge of the superior court and the supreme court of errors from 1840 to 1842. Judge Sherman died at Fairfield, Conn., Dec. 30, 1844.

MCDONALD, Joseph Ewing, statesman, was born in Butler county, O., Aug. 29, 1819, son of John and Eleanor (Pratt) McDonald, both natives of Pennsylvania, of Scotch and Huguenot ancestry. His father dying during his infancy, his mother subsequently was married to John Kerr, and in 1826 the family removed to Montgomery county, Ind. With the exception of two years passed at Crawfordsville, Ind., where he attended school, he remained on the farm until he was twelve years of age, when he was apprenticed for a term of six years

to a saddler and harness-maker. He became an excellent workman, and in recognition of his services was released from his apprenticeship three months before its legal expiration. He was at this time eighteen years of age, and having prepared himself by studying during his leisure hours, he entered Wabash College and supported himself by working at his trade. Entering the Asbury University at Green-castle, Ind., in 1840, he remained until 1842, when he began the regular study of law under the late Zebulon Baird, of Indiana, who

trusted him with the management of important cases under his instruction before his admission to the bar in 1844. He was elected by the Democratic party prosecuting attorney for the Lafayette circuit soon after he began to practice and was re-elected in 1845, removing in the same year to Crawfordsville, Ind. In 1849 he was elected by the Democratic party to the 31st congress, serving one term; in 1856 he became attorney-general for the state of Indiana and was re-elected in 1858. In 1859 his increasing practice obliged him to remove to Indianapolis, where he formed a partnership with Addison L. Roache, ex-judge of the supreme court. This advantageous connection was continued until 1869, when Judge Roache retired. In 1864 Mr. McDonald was nominated for governor by the Democratic party of Indiana, his opponent being the late Oliver P. Morton; but though he made one of the most vigorous campaigns in the history of Indiana, receiving 6,000 more votes than had been cast two years before for the head of the Democratic ticket, he was defeated. In 1875, after a warm contest in the legislature, he was elected to succeed Hon. D. D. Pratt as senator and took his seat in the senate, March 5, 1875, where from the very start he ranked with the leading members. During his term of six years he filled many important commissions, and his speech objecting to the count of Louisiana by the electoral commission in

the Tilden-Hayes contest immediately gave him a foremost place among constitutional lawyers. He was an able man in every sense of the word. Broad and deep in thought, possessed of good common sense and fine judgment, his advice was always pregnant with wisdom. He was unflinching in his adherence to sound Democratic principles and the sobriquet, "Old Saddle Bags," by which he went, showed the pride with which he was regarded by the plain people from whose ranks the saddler and harness-maker had risen. During his latter years he gradually withdrew from politics. He was married; first, to Nancy Ruth Buell; second, to Mrs. Araminta W. Vance, and third, to Mrs. Josephine F. Bernard, daughter of Joseph Farnsworth, of Madison, Ind. Mr. McDonald had four children. He died at Indianapolis, Ind., June 21, 1891.

NAUDAIN, Arnold, physician and senator, was born near Dover, Del., Jan. 6, 1790, grandson of a French Huguenot who emigrated to Delaware during the early history of that colony. He was graduated at Princeton in 1806, and, entering the University of Pennsylvania, pursued a course of study in the medical department of that institution, receiving his diploma in 1810. In the war with Great Britain, which broke out two years later, he served as surgeon-general of the Delaware militia. In 1826 he was elected speaker of the local legislature, and in 1829 was chosen a member of the U. S. senate. He took his seat on Jan. 13, 1830, filling the vacancy caused by Sen. Louis M. Lane's resignation, and continued to serve as a Whig representative from Delaware until he resigned, June 16, 1836. In 1841 he accepted the office of customs collector for the port of Wilmington, Del., where he remained until 1845. On retiring from the latter post he removed to Philadelphia, Pa., where he practiced the profession of medicine for several years. His death occurred at Odessa, Del., Jan. 4, 1872.

ATKINSON, Henry, soldier, was born in Person county, N. C., in 1782. He entered the army as captain of the 3d regiment of infantry in 1808, and was retained there after the war of 1812. He was made inspector-general on April 25, 1813, and a year later was appointed colonel of the 45th infantry. He was promoted brigadier-general on May 13, 1821, and on June 21st of the same year was advanced to the grade of adjutant-general; subsequently he was appointed to the command of the western army, and served with distinction in the Black Hawk war. With Gen. Scott, Gen. Atkinson was ordered from Buffalo to reinforce the troops in the Rock river valley, and defeated the Indians near Bad Axe river, Aug. 1-2, 1832, taking Black Hawk prisoner. Gen. Atkinson died at Jefferson barracks, Mo., June 14, 1842.

WALKER, Freeman, senator, was born in the county of Charles City, Va., Oct. 25, 1780. In 1797 he removed to Georgia, where he studied law, and was admitted to the bar in 1802. He began the practice of law in Augusta, and quickly attained prominence among the members of his profession. In 1807 he became a member of the state legislature, and in 1819 he was elected to represent Georgia in the upper house of the national legislature, taking the place of John Forsyth, resigned; he continued to serve in the U. S. senate from Dec. 15 of that year until his resignation, Aug. 8, 1821. In 1820 a speech delivered by him on the subject of the Missouri compromise received wide attention in the papers of the country, and still stands on record as a monument to his genius and patriotism. Richard Henry Wilde described him as "generous, hospitable and humane, of cheerful temper and familiar manners, idolized by his family, beloved by his friends, and admired by his countrymen." Sen. Walker died in Richmond county, Ga., Sept. 23, 1827.

BARRINGER, Daniel Moreau, U. S. minister to Spain, was born in Cokurrus county, N. C., in July, 1807, son of Paul and Elizabeth (Brandon) Barringer. His earliest ancestor in America, John Paul Barringer, was born in Hanover, Germany, in 1721, and after emigrating to this country, settled first in Pennsylvania, removing to North Carolina before the revolution. From his devotion to the cause of the patriots he was taken prisoner by the Tories and carried to Camden, S. C., where he was kept a captive for a long time. He died Jan. 1, 1807. Daniel's father became a member of the house of representatives in 1806; was often afterward elected to both branches of the legislature, and died in 1844. His maternal grandfather, Matthew Brandon, of Rowan, N. C., was a patriot and revolutionary soldier. Daniel was graduated at the University of North Carolina in 1826, and, selecting the law as a profession, began its study with Chief Justice Ruffin, being admitted to the bar in 1829. In the same year he was elected a member of the state legislature and was returned for several successive terms. In 1835 he was appointed a member of the convention held to amend the state constitution, and in 1843-49 he represented North Carolina for three terms in congress. He was appointed U. S. minister to Spain by Pres. Taylor in 1849, and served until 1853, when, after traveling extensively in Europe, he returned home, where he was again elected to the state legislature. Declining a re-nomination in 1855, he retired to private life and devoted himself to literary studies. In 1861 he was chosen delegate to the peace congress, held in Washington, and in 1866 he was a delegate at the national union convention in Philadelphia. Mr. Barringer died at White Sulphur Springs, Va., Sept. 1, 1873.

EATON, William, soldier, was born at Woodstock, Conn., Feb. 23, 1764, son of Nathaniel Eaton, a teacher and farmer, and a descendant in the fifth generation of John Eaton. He ran away from home at Mansfield, and enlisted in the army at the age of sixteen and served until the end of the war, attaining the rank of sergeant. Desiring a good education, he made his way to Dartmouth College, where he was graduated in 1790. In 1792 he was commissioned captain in the U. S. army, and Aug. 21st of the same year he was married at Union, Conn., to Mrs. Eliza (Sykes) Danielson, widow of Gen. Timothy Danielson, of Brimfield, Mass. In 1798 he went to the Barbary States as U. S. consul to Tunis. In 1801 the adjoining state, Tripoli, declared war on the United States. After several years of naval warfare, Eaton formed a plan to reinstate Hamet Pacha, who had been deposed by his younger brother, Jussef Caramalli, on the throne of Tripoli, hoping to secure the release of several hundred Christian captives and the future good will of the ruler of that state. After many vexatious delays and a visit home to settle his consular accounts and secure the co-operation of the Federal government, he organized a force of four or five hundred men at Alexandria, including Hamet Pacha and ninety of his personal adherents, and started westward for Derne, March 3, 1805. They reached the vicinity of Derne April 25, and Capt. Hull, U. S. navy, with the Argus, Nautilus and Hornet, vessels of war, arrived the next day. On the 27th a joint attack by land and sea was made upon the town, and it was taken by assault, Eaton being shot through the left wrist, and fourteen Christians of his party killed or wounded. So far the expedition was successful, but the U. S. consul-general at Algiers, Col. Tobias Lear, against Eaton's protestations, made peace with the Tripolitan authorities, and Eaton was forced to abandon Derne on June 11th. Through Lear's treaty, all payment of tribute was abolished and an exchange of prisoners was effected, but Hamet

was forced to retire to Syracuse, leaving his wife and children with Caramalli as hostages. Eaton returned home disgusted, in November, 1805, and was received as a hero. Massachusetts voted him a gift of 10,000 acres of land in Maine, and the cities of Richmond and Washington honored him with public dinners. Gen. Eaton was approached by Aaron Burr, and invited to take part in his treasonable designs, but he would have nothing to do with him except to bear witness against him. He retired to his home in Brimfield, and became a private citizen, once serving in the state legislature. He died June 1, 1811.

BUCKMINSTER, Joseph, clergyman, was born at Rutland, Mass., Oct. 14, 1751, son of Rev. Joseph Buckminster, D. D., and grandfather of Col. Joseph Buckminster, whose father was one of the earliest settlers of Framingham, Mass. His earliest ancestor in America came from Wales, and died in Boston in 1658. His father (b. 1720; d. 1792) was a graduate of Harvard College (1739), was ordained in 1742, and for fifty-three years was a Calvinist minister. The son was graduated at Yale in 1770, where he also enjoyed a three years' post graduate course, through winning a Berkeley scholarship; and from 1774 to 1778 he served as a tutor in the same institution. While holding this position he was for a time attached, if not engaged, to a lady, whose history furnished a portion of the plot for "The Coquette," by Miss Foster, a popular romance writer of the time. On Jan. 27, 1779, he was ordained and placed over the North Church in Portsmouth, N. H., succeeding Dr. Stiles, and there continued for thirty-three years, when his health became impaired and spirits depressed, finally bringing about periods of delirium. On June 2, 1812, he began a trip through the Green mountains in Vermont, hoping to improve his condition, but died at a tavern in Readsboro, Vt., June 10, 1812, though interred at Bennington. It is told of Dr. Buckminster that a few hours before his death he repeatedly said of his eldest son, "Joseph is dead"; and as a matter of fact his son had died on the preceding day. Dr. Buckminster was three times married, his first wife being the only daughter of Rev. Dr. Stevens, of Kittery; his second wife was the daughter of Rev. Isaac Lyman, of York, and his third wife, who survived him, was the widow of Col. Eliphalet Ladd. One of his daughters, Eliza B. Lee, published "Memoirs of the Rev. Joseph Buckminster, D. D., and of his Son, the Rev. Joseph Buckminster" (1851). Dr. Buckminster was greatly beloved and deeply lamented by all who knew him. He possessed a cultivated mind and brilliant imagination, was an eloquent speaker, and in every particular an able and impressive preacher. When the Congregational churches of New England were divided on matters of belief, he remained "orthodox," while his son adopted liberal views. Among his published sermons are those entitled: "On the Death of Washington" (1800); "On the Death of Mrs. Rowland and Mrs. Porter"; "On Choosing Rulers" (1796); "On Baptism" (1803), and one at the ordination of his son (1805).

ARCHER, William S., senator, was born in Amelia county, Va., March 5, 1789, son of Maj. John Archer, who served in the revolutionary war, acting as aid to Gen. Wayne, and acquiring himself with special distinction at the capture of Stony Point, and grandson of William Archer, of Welsh

ancestry, a colonel in the revolutionary army, who died on a British prison-ship. He was educated at the College of William and Mary, and after being graduated there in 1806 studied law. He was later elected to the state legislature, and served, with the exception of a single year, from 1812 to 1819. In 1820 he became a representative from Virginia to the national legislature, where he remained until 1825, taking an active part in all matters of national importance and exerting a wide influence, especially as chairman of the committee on foreign affairs and as a member of the committee on the Missouri compromise. In 1841 he was elected to the U. S. senate, serving until 1847 at the head of the committee on foreign relations. In the latter year he retired to his father's estate. He commanded the respect of the country by his public acts, and won the friendship of distinguished men by the charm of his character. His death occurred at his birthplace, March 28, 1855.

BIGELOW, Lewis, lawyer and congressman, was born at Petersham, Worcester co., Mass., Aug. 18, 1785, son of Daniel and Anna (Johnson) Bigelow. He was graduated at Williams College in 1803, studied law with his father and practiced in Petersham. In 1819-21 he was a member of the state senate, and was a representative in congress from his native state in 1821-23. In 1831 he removed to Peoria, Ill., being the second lawyer in that place, and served as clerk of the circuit court until his death. Mr. Bigelow was the author of a "Digest of the First Seventeen Volumes of Massachusetts Reports" (1818; enlarged ed., 1825), and also of a "Digest of Pickering's Report, Volumes One to Seven" (1830). He died in Peoria, Ill., Oct. 3, 1838.

BAKER, David Jewett, senator, was born at East Hadham, Conn., Sept. 7, 1792. In 1800 he was taken by his parents to Ontario county, N. Y., where his boyhood was spent upon a farm. After completing a preliminary education in the public schools, he entered Hamilton College, where he was graduated in 1816; the study of law was then undertaken by him, his admission to the bar occurring in 1819. Removing to Kaskaskia, Ill., he there commenced his practice, securing an extensive clientele and attaining high rank throughout the state. He was probate judge of Randolph county and was appointed to the U. S. senate as a Democrat, filling the vacancy caused by the death of John McLean. Though he served only from Dec. 6, 1830, to Jan. 4, 1831, he rendered important service to the state of Illinois by his measure providing for the sale of public lands in forty-acre tracts to actual settlers. In 1833 he was made U. S. attorney for Illinois, serving until 1841, when he resumed his private practice. He was a bitter enemy of slavery, and so outspoken in opposing its introduction into Illinois that his life was seriously endangered. He died at Alton, Ill., Aug. 6, 1869.

MORRIS, Clara (Morrison), actress, was born in Toronto, Canada, March 17, 1848. Her childhood was passed in Cleveland, O., where, at the age of fourteen, she became a member of John Ellsler's stock company, playing at the Academy of Music. She was at first cast for small parts, in which she showed so much talent and cleverness that she was advanced rapidly to the position of leading lady. After four years spent at the Academy she became leading lady at Wood's Theatre, Cincinnati, in 1869, and it was here that her talents began to attract general attention. Mr. Maguire, the San Francisco manager, made her a flattering offer, but she declined it in order to try her fortunes in New York city. Obtaining an interview with Augustin Daly, she asked for an engagement in his company and obtained it. Regarding this interview she

writes: "I was not a particularly attractive object on my first arrival in New York city. I had but two dresses in the world, except my stage wardrobe, which was correct but rigidly confined to the necessities of parts. Mr. Daly had been accustomed to the magnificence of Miss Morant, Fanny Davenport, Agnes Ethel and others of his really splendid stock company and he looked down upon my five feet three inches, clothed in a rusty linen gown and carrying a satchel, with a shrug and a doubtful expression in every line of his face. He engaged me, but only upon condition that I should take my part save that of soubrette or a general utility performer. My salary was to be thirty-five dollars per week, with the understanding that if I made a distinct and undeniable success it should be doubled. Upon this sum I was to live, support my mother and buy my stage dresses. When I had moved and settled with my small belongings I had not a dollar left and my means were so cramped that they would not admit of our eating meat oftener than once a day. My mother used to ask me if I would have my chops to rehearse upon, or to act upon, and as I preferred to have the strength to act upon, I used often to be so weak at rehearsal that I could not act at all, and I am sure that Mr. Daly endured much mental distress in regard to the fiasco which he was convinced I was going to make. It was in 'Man and Wife' that I made my first New York appearance in 1871. Agnes

Clara Morris

Ethel was cast for the part of Annie Sylvester and I, Blanche. At the last moment Miss Ethel refused to act the part of Annie Sylvester and it was given to me." Though compelled on brief notice to assume the principal rôle in an important production, Miss Morris acquitted herself splendidly and won a grand triumph. She was called before the curtain five times on the opening night and her acting was the sensation of the season. Careful critics recognized that in her had appeared an actress of unusual force and of great and peculiar talents. Miss Morris remained a member of Mr. Daly's company for two seasons, when differences of opinion arising between them at the end of that time, she was at once engaged by Mr. A. M. Palmer to head the stock company playing at the Union Square Theatre, and by her acting in the "Geneva Cross" repeated and emphasized her first triumph in "Man and Wife." Soon after leaving the Union Square company Miss Morris became the wife of Frederick C. Harriott, a New York merchant, and appeared as a star. Her first season, which proved exceedingly profitable, carried her to San Francisco. On Nov. 22, 1875, she was seen in "The New Leah" at the Fifth Avenue Theatre, New York, and in October of the following year played Miss Moulton for the first time at the Union Square Theatre. On Nov. 8, 1877, she came forward in "Jane Eyre." "The New Magdalen," her next original creation, was first produced at the Union Square Theatre, Jan. 5, 1882. During the season of 1882 she appeared with Tommaso Salvini, the Italian tragedian. "Denise," the play produced at Daly's Theatre, April 21, 1885, proved a complete failure. Following this she was seen to advantage in an adaptation of D'Ennery's "Martyr," "Camille" and "Article 47." Her magnetism and power to move others were extraordinary. Her methods were unconventional, but impressive, direct, fiery and realistic, her im-

personations never failing to give evidence of genius. She has lately, however, retired from the stage and turned her attention to literature, publishing, in 1839, a collection of stories for children. "Little Jim Crow" revealed a sense of humor and rare sympathy with young and old. Her other publications are: "The Silent Singer," an autobiography (1890); "Lite on the Stage" (1901), and "A Paste-Board Crown" (1902).

ROBERTS, Ellis Henry, journalist and financier, was born in Utica, N. Y., Sept. 30, 1827, son of Warkin and Gwen Roberts. His parents emigrated to America from Merionethshire, North Wales, in 1816. The father died when Ellis was a mere child, and the boy early began to realize some of the sober necessities of self-dependence. Learning the printer's trade, he not only supported but educated himself with money earned at the case, and after attending Whitestown Seminary for two terms, he entered Yale College as a sophomore. He was graduated with the second highest honor in the class of 1850, and received the Bristol scholarship. After leaving college he became principal of the Utica Free Academy and a teacher of Latin in the Utica Female Seminary. In 1851 the Utica "Morning Herald," of which his brother, Robert, was one of the originators, underwent a change of management, by which Ellis became its editor and a part proprietor. In 1854 he withdrew for a brief period, owing to political differences, and when he resumed work it was as sole proprietor of the paper, which he for thirty-eight years endeavored to keep on the highest plane of journalism. The terse and forcible Anglo-Saxon of his writing, coupled with his comprehensive knowledge of affairs, keen analysis of men and methods and fearless expression of convictions, made his editorials a power in moulding opinions and broadening intelligence in the large community to which they were addressed. During the most critical period of the civil war they attracted particular attention, being characterized by a hopefulness which was not always clearly borne out by passing events. They outlined very clearly important and necessary military movements, but their criticisms, even when these were carelessly delayed, were those of encouragement rather than of censure. In 1864 and 1868 he was a delegate to the Republican national convention, and in 1886 he was elected as a Republican to the New York assembly from the 2d Oneida district, receiving 3,193 votes against 2,643 cast for James G. Preston, Democrat. The most important of the committees to which Mr. Roberts was assigned in the assembly was that of ways and means. In 1870 he was elected to the national house of representatives from the Oneida district by a plurality of 1,716 votes over Abraham B. Weaver, Democrat, and was re-elected in 1872 by a plurality of 2,803 votes over Richard U. Sherman, Liberal Republican. In 1874, however, Mr. Roberts was defeated by Scott Lord, Democrat, who received a plurality of 1,436 votes. The tidal wave which overwhelmed Republicans generally in 1871 was swelled in Oneida county by a rupture between the "stalwarts," who were friends of Roscoe Conkling, and the "half-breeds," who were friends of Mr. Roberts. In fact, this was the beginning of a famous factional fight, which eventually disorganized the Republican party of the entire country. Subsequent events indicated that those Republicans who censured the defeat of Mr. Roberts for congress dealt with him unjustly; but so far as he was concerned all trace of resentment was obliterated by his masterly obituary in the "Herald" on the occasion of Mr. Conkling's death. In congress Mr. Roberts received from Speaker Blaine an honor rarely accorded to a new member, namely, a position on the ways and means committee. In committee and in debate on the floor the

member from Oneida was a prominent champion of specie payment resumption, funding the national debt at a continually decreasing interest, redemption of bonds, and a reduction of war taxes, so far as that was consistent with the system of protection to American industries. Upon these subjects he made at least six elaborate speeches, in which he clearly outlined possibilities of national finance that subsequently became actualities. He introduced the bill for the repeal of the moiety laws, was chairman of the sub-committee of ways and means which reported it, and by argument, appeal and persistent activity, succeeded in getting it through the house. Its object was the overthrow of a pernicious system that had prevailed since the foundation of the government; but as many official salaries would be affected by the repeal of the laws a strong pressure was brought to bear against the bill, especially in the senate, when it was amended and finally sent to conference. Mr. Roberts was chairman of the house conferees. The chief features of the bill were retained, and it became a law, June 22, 1874. Mr. Roberts' literary work has been mainly confined to his editorship of the "Herald," but he has found time to write a number of books and to deliver occasional addresses. He traveled abroad in 1868 and 1873, and embodied his observations in a series of letters, entitled "To Greece and Beyond." In 1881 he delivered at Cornell University and Hamilton College a series of protection lectures which subsequently appeared in book form under the title "Government Revenue, Especially the American System." He is also the author of "The Planting and the Growth of the Empire State," published in the "American Commonwealth" series in 1887. Pres. Harrison, on April 1, 1889, appointed Mr. Roberts assistant U. S. treasurer at New York city, and during the subsequent four years he directed the sub-treasury there. Upon his retirement Sec. Carlisle wrote to him: "The department appreciates fully and comments the admirable manner in which the affairs of the office have been conducted during your incumbency." In the summer of 1893 Mr. Roberts accepted the presidency of the Franklin National Bank. He received the degree of LL. D. from Hamilton in 1869 and from Yale in 1884. He has been president of the Fort Schuyler Club and of the Oneida Historical Society of Utica, and is a member of the Republican Club of New York, the Press Club, the Authors' Guild, the Patria Club and president of the Yale Alumni of Washington, D. C. In 1897 he was appointed U. S. treasurer by Pres. McKinley. In 1851 Mr. Roberts was married to Elizabeth, daughter of David E. Morris, of Utica, N. Y.

VAIL, Charles Henry, clergyman and author, was born at Tully, Oneida co., N. Y., April 28, 1866, son of Frank Aaron and Tacy Louisa (Palmer) Vail. He was educated in the public schools, and after studying music under Dr. H. R. Palmer, of New York city, he taught vocal and instrumental music in central New York. From 1887-89 he was engaged as a teacher in the Choral Union work in Syracuse, N. Y., which had for its aim the elevation of church and Sabbath-school music without regard to denomination. Although Mr. Vail was brought up an adherent of the orthodox faith, his interest was

aroused in the doctrines of Universalism, and although opposed by his parents and friends, he made a thorough study of its main arguments, and decided to enter the Universalist ministry. In the autumn of 1889 he prepared himself for his chosen work at St. Lawrence University, Canton, N. Y., and was graduated in 1892. In the following year he took a post graduate course, and was granted the degree of B. D. Mr. Vail's first charge was All Souls Church, Albany, N. Y. At the conclusion of his first year's pastorate he was called to the First Universalist Church, of Jersey City, N. J. He resigned in 1901

to enter the lecture field in behalf of the Socialist movement. He was appointed national organizer of the party, and during a six months' lecture tour of the United States, he traveled over 14,000 miles and spoke nearly every night to large audiences. In 1901 he was the candidate of the Socialist party for governor of New Jersey. While in college he was especially interested in the study of sociology, and became convinced that socialism is the only remedy for the unjust conditions in society, and is absolutely essential to a

higher state of civilization. Although his advocacy of socialism has made him a champion of an unpopular doctrine, he has stood firm and loyal to his convictions, proclaiming to the world the new gospel of emancipation without fear or favor. In addition to many leaflets on socialist subjects which have had wide circulation, he is the author of "National Ownership of Railways" (1897); "Modern Socialism" (1897); "The Industrial Evolution" (1898); "Principles of Scientific Socialism" (1899); "The Mission of the Working Class" (1899); "The Trust Question" (1900), and "The Socialist Movement" (1902). He was twice married: first, in 1888, to Mary C., daughter of Stephen Ellis, of Otisco, N. Y.; who died in 1890; second, in 1892, to Nina, daughter of Ambrose Bedell, of Geneva, N. Y.

HOLLEY, Alexander Lyman, metallurgist and mechanical engineer, was born at Lakeville, Salisbury co., Conn., July 20, 1832, son of Alexander H. and Jane M. (Lyman) Holley. His father was governor of Connecticut in 1857. His early education was received at the Salisbury and Farmington academies and at Williams Academy, Stockbridge, Mass., and in 1853 he was graduated at Brown University in the scientific course. From his early youth he was interested in the study of machinery, and at the age of eighteen published in "Poor's Railway Journal" a very clever and full treatise on cutlery and the processes of its manufacture. While a student he invented a steam cut-off and his graduating thesis was on "The National Motor," the steam locomotive. After being graduated he spent eighteen months in the Corliss engine works in Providence, R. I., leaving them to seek employment where locomotive engines were built, which he at length found in the New Jersey locomotive works. During 1855-57, in conjunction with Zerah C. Burn, he conducted an engineering periodical, and in the autumn of 1857 the two went to Europe to study foreign railway practice. The results of their investigations were published in a book entitled "The Permanent Way and Coal-burning Locomotive Boilers of European Railways." He again

visited Europe in 1858-60 and contributed to the New York "Times" a series of articles on the steamship Great Eastern, over the signature of "Tubal Cain," which attracted general attention among capitalists and engineers. In 1860 he published "Railway Practice," a work which was for many years the standard authority on the subject. At this time he also prepared for "Webster's Dictionary" a list of engineering words and definitions with drawings. In 1863 he was sent to England by Corning, Winslow & Co., of Troy, to obtain information concerning the Bessemer process of steel manufacture. After purchasing the Bessemer patents, which were subsequently combined with the conflicting Kelly patents in this country, Mr. Holley returned, and under his supervision the first Bessemer steel plant built in this country was constructed in Troy. From 1865 to 1867 and from 1870 to 1882 he served as a trustee of the Rensselaer Polytechnic Institute. Plants were subsequently erected at Harrisburg, Chicago, Joliet and Pittsburgh. He made many improvements on the English process which decreased the cost and at the same time increased the capacity for production. It is conceded that to him, more than to any other man, is due the development of the steel industry of the United States, and this result was accomplished by his thorough investigation of principles, his faculty of discrimination of the salient points of an obscure problem, his capacity for close, hard work, continued long, his ability to clearly elucidate both in writing and orally in a most attractive and convincing manner his conclusions and the principles on which they were based. He published "Ordnance and Armor" after his return, which at once took high rank as an authority and was translated into French shortly after. He became a member of the American Society of Civil Engineers in 1873 and was vice-president in 1875. He was a member of the American Institute of Mining Engineers and was president in 1875. In 1877 he was elected a member of the Institution of Civil Engineers (England), and in 1879 was one of the founders of the American Society of Mechanical Engineers. He was a member of the English Iron and Steel Institute, from which he received the award of the Bessemer medal for eminent services to science. In 1865 he became one of the trustees of the Rensselaer Polytechnic Institute; in 1875 he was appointed a member of the U. S. board for testing iron and steel; in 1876 was one of the jurors on iron and steel of the Centennial exposition, and was also a member of many other important commissions. He was married to Mary, daughter of John Slade, a well known merchant of New York city, who was a native of Boston. Mrs. Holley died in 1892. Of their four children, two daughters, Mrs. Frank E. Randall and Mrs. Frederick Brooks, of New York, are still living. In August, 1881, while in England, was seized with illness, but was able to respond in a brilliant speech to the toast "The United States" at a banquet given by the lord mayor of London to the Iron and Steel Institute. He returned to his home in Brooklyn, N. Y., and died there, Jan. 29, 1882. The technical associations to which he belonged and the steel manufacturers united in the erection of a bronze memorial bust of him which was presented to the city of New York in Washing-

Charles H. Vail.

A. L. Holley

ton square, on Oct. 2, 1890, at the time of a convention of the three great iron and steel associations of America, England and Germany, at which an eloquent memorial address was delivered by James Bredge, editor of "Engineering," the leading English technical journal.

LEWIS, Ernest Sydney, physician, was born in New Orleans, La., Sept. 21, 1840, son of Algeron Sydney and Annette (Fronchet) Lewis. His paternal grandparents were Joshua Lewis, son of Gen. Andrew Lewis and America Lawson, daughter of Gen. Robert Lawson, both of Virginia, and distinguished in the revolutionary war. Joshua Lewis was the first judge of the U. S. territorial court of Orleans (now Louisiana) by appointment of Pres. Jefferson. Ernest S. Lewis received his preparatory education in the private schools of New Orleans and entered the University of Louisiana (now Tulane), where he was graduated B.S. in 1858. He then studied medicine in the medical department of the university; was resident student of the Charity Hospital, New Orleans (1859-61), and soon after his graduation was appointed assistant house surgeon of the charity hospital. Upon the resignation of the house surgeon six months later he was elected his successor, and held the position until the arrival of Gen. Banks, who changed the administration. Desiring to enlist in the Confederate army, Dr. Lewis ran the blockade with two others. He pulled a skiff through a mile of swamp to Lake Pontchartrain, which he crossed; he made his way to Tallahomah, and there passing his examination as full surgeon was commissioned and assigned to the 3d Georgia cavalry of Crew's brigade, Martin's division, Wheeler's corps. He later became brigade surgeon of Crew's brigade, and during the last six months of the war was medical director of Gen. Wheeler's cavalry corps and placed on his staff. After the close of hostilities he returned to New Orleans, and engaged in the practice of his profession. He was inspector for the board of health in the 3d district in 1866-67; chief of clinic to Prof.

Hunt about the same time, and was appointed, in 1874, professor of materia medica and therapeutics. In 1876 he was transferred to the chair of obstetrics, gynecology and diseases of children, which he still occupies. He is vice-president of the board of directors of the Charity Hospital; a member of the American Medical Association, and was chairman of the obstetrical section in 1879. He is also a member of the Southern Surgical and Gynecological Association, and was its president in 1896; was a

delegate at the international congress of obstetrics and gynecology, Geneva, 1896, and is a member of the parish and state medical societies. He was married, in 1866, to Susan D. P., daughter of Rev. A. D. McCoy. They have had nine children.

SAVAGE, John, journalist and dramatist, was born in Dublin, Ireland, Dec. 13, 1828. After studying at the Harold's Cross Monastery, in his native city, he entered the art school of the Royal Dublin Society, where he completed the regular course and took several prizes. In 1848 he became involved in the revolutionary movement and organized and led bands of peasants in the south. Upon the failure of the insurrection he disguised himself

as a sailor and made his escape to America, where he secured employment on the "Tribune" as a proof reader. Later he took up journalism and art criticism, and in 1850 published his "Lays of the Fatherland," which met with a generous reception. During the next few years he contributed frequently to the "Democratic Review" and the "American Review," then the most prominent periodicals in America, and also to "The Lantern," a clever satirical weekly conducted by John Brougham, the dramatist and comedian. In 1854 he became literary editor of "The Citizen." In 1856 he published "Modern Revolutionary History and Literature of Ireland," produced a tragedy, "Sibil," in 1858, and his comedy, "Waiting for a Wife," in 1859. In 1857-58 he removed to Washington, where he was leader writer for "The States," the organ of Stephen A. Douglas. He left this paper for a time, but returned to it in 1860, eventually becoming its owner. In its columns he devoted all his energies to sustaining Douglas in his fights with Lincoln. He served with the 69th New York regiment in the civil war and helped to organize the Irish legion for the Federal army. At this time he wrote "The Starry Flag," which he followed with "The Muster of the North," two of the most stirring ballads of the war time. "Faith and Fancy," a collection of poems called forth by the war, was published in 1863, and went into a second edition immediately. "Eva, a Goblin Romance," was published in 1865. In 1867 Savage, after once refusing, yielded to pressure and assumed the office of chief executive of the Fenian brotherhood. In the same year his "Fenian Heroes and Martyrs" was issued. "Poems, Lyrical, Dramatic and Romantic" followed in 1870, and "Picturesque Ireland" in 1878-83. St. John's College, Fordham, N. Y., conferred upon him the degree of LL. D. in 1875. He was married, in 1851, to Louise Gouverneur, daughter of Samuel Chester Reid, known as the hero of Fayal in the war of 1812, and as the designer of the present U. S. flag. He died on Oct. 11, 1888.

PLATT, Thomas Collier, U. S. senator, was born at Owego, Tioga co., N. Y., July 15, 1833, son of William and Lesbia (Hinchman) Platt. His earliest American ancestor, Richard Platt, came to this country from England in 1638, landing at New Haven, Conn. He was one of the first settlers of Milford in 1629, and was a considerable land owner. Another ancestor, Jonathan Platt, was a member of the provincial congress of 1775, and with his son, Jonathan, served in Gen. Sullivan's army, which drove the Indians out of Wyoming valley in 1779. William Platt was for many years a prosperous lawyer and real estate agent in Owego. The son received his early education at a local academy, and in 1849 entered Yale College, but was forced by ill-health to return home in his sophomore year. Finding it desirable to lead an active life, he engaged in business as a merchant in his native town, becoming senior partner in the firm of Platt & Hull, druggists, in 1856. He also acquired extensive lumber interests in Michigan, and while still a young man was made president of the Tioga National Bank in Owego upon its organization in January, 1865. In 1858 he was elected clerk of Tioga county, and during the two years he held this office he was instrumental, with his friend, Alonzo B. Cornell (after-

John Savage

E. Lewis

ward governor of New York), in advancing the political interests of Roscoe Conkling through the influence of the congressional district of Tioga and Tompkins counties. Mr. Platt's position in the councils of the Republican party rapidly increased in power, and in 1870 a deadlock occurring between two candidates—to one of whom he was pledged—he was nominated as congressman, but declined. In 1872, however, he was elected to congress, and was re-elected in 1874. In the latter year he represented his state in the Republican national convention, and he has been a delegate to every national convention of his party since that time. Upon the election of Pres. Hayes he was an unsuccessful candidate for the position of postmaster-general. In 1879 he became secretary and general manager of United States Express Co., and the following year president, which position he still holds. In 1880 he was appointed commissioner of quarantine for New York city, and in 1884 was made president of the board, remaining until 1888, when he was removed on account of non-residence in that city. On Jan. 1, 1881, Mr. Platt was elected U. S. senator, to succeed Francis Kernan, but with his colleague, Roscoe Conkling, resigned on May 16th, in consequence of a disagreement with the executive regarding New York appointments. The president, on March 23d, had sent the name of William H. Robertson for collector of the port of New York. Judge

Robertson had been a delegate to the Chicago convention of 1860, where he led the revolt against the unit rule in the New York delegation, which had been instructed for Gen. Grant, and this contributed materially to Gen. Garfield's nomination. Conkling and Platt bitterly opposed Robertson's confirmation, and finally the president was driven by their determined opposition to withdraw from the senate the other New York nominations which had been made with a view to conciliating the Republican machine of that state. Finding that they had engaged in what seemed to be a hopeless struggle with the

administration, the senators from New York sent in their resignations through Gov. Cornell, together with a letter explaining their course. Going to Albany they made a fight for re-election, and an exciting contest followed, but before it was decided Mr. Platt withdrew from the candidacy. He took no active part in politics until 1884, when he espoused the cause of the anti-machine party, and went to Chicago as a Blaine delegate. In 1888 he was influential in swinging the New York delegation over to the support of Benjamin Harrison for president. In 1896 Mr. Platt and the majority of the New York delegation at first supported Levi P. Morton, as the Republican nominee for president, in opposition to William McKinley, but afterward voted to make McKinley's nomination unanimous. In 1896 he was chosen U. S. senator for the term ending in 1903. The other Republican candidate was Joseph H. Choate, and the voting was 142 to 7 in favor of Mr. Platt. As the acknowledged leader of his party in New York state he is one of the most influential, though least obtrusive, political managers in the country. Mr. Blaine said of him in "Twenty Years in Congress": "He is a business man of great personal popularity. He has an aptitude for public affairs, and is a man of influence in his state. He is no debater, but has strong common sense and a quick judgment of men." In 1871 Mr. Platt became president of the Southern Central railroad,

and in 1885 president of the Addison and Northern Pennsylvania railroad; neither of these are now in existence. He was also director of the Chesapeake, Ohio and Southwestern railroad, and the Florida Central and Western railroad. In 1876 Yale College conferred upon him the honorary degree of A.M. He was married, in 1852, to Ellen Lucy, daughter of Hon. Charles Barstow, of Owego, N. Y., and has three sons: Edward Truax, who resides in Washington, D. C.; Frank H., who is engaged in business with his father, and is following in his footsteps politically, and Henry B. Platt. Mrs. Platt died Feb. 13, 1901.

GREEN, Thomas Jefferson, soldier, was born in Warren county, N. C., in 1801. He studied at the University of North Carolina in 1819 and finished his education at West Point. He represented Warren county in the North Carolina legislature in 1826 and then removed to Florida territory, where he was a member of the legislature. After the death of his wife, in 1836, he removed to Texas, which had just declared its independence of Mexico. He was commissioned a brigadier-general in the Texan army and directed to return to the States and raise a brigade. This he did, absorbing his entire fortune in the effort. He arrived at Velasco on his return on the day that Santa Anna, who had been made prisoner at San Jacinto, was released and put on shipboard preparatory to returning to Vera Cruz. Green believed this an unwarranted assumption of power and in connection with Gens. Hunt and Henderson, and under the sanction of Pres. Burnet, brought the prisoner ashore. The action was sustained by the government and Santa Anna was assigned to the custody of Gen. Green. He was held as the general's guest and bed fellow. In 1843 their relations were reversed, and then the Mexican ordered Green to be heavily ironed and to be put to work on the roads. For awhile after the battle of San Jacinto the young republic had peace; the Mexican incursions began afresh and a counter invasion of Mexico was determined on, but it was opposed by Houston, and the result was that only 304 Texans remained to continue the invasion. They met the Mexicans under Gen. Anquidia and numbering 2,340 men, at Mier on Dec. 25, 1842, and after killing three times their number were induced to surrender by false claims and false promises. Green protested against the surrender and called for 100 men to cut their way through the enemy's lines, but these were not found. Some of the prisoners escaped at Salado, but were recaptured, and the whole lodged in the castle of Perote. Every tenth man was shot by order of Santa Anna, and on the night of July 2, 1843, ten of the remainder escaped from Perote by cutting their way through a wall of volcanic rock eight feet thick. Eight of these, including Gen. Green, got back to Texas after incredible hardships. He was then sent to the Texan congress, where he introduced a bill making the Rio Grande the boundary of the Texan republic. Returning to the United States on the eve of annexation he was offered by Pres. Polk the position of confidential agent, which he declined. In 1849 he went to California; worked in the mines; was elected to the first legislature and was a prominent candidate for the U. S. senatorship. While here he laid out the towns of Oro and Valjejo, the latter being recognized as the capital for a while, and as major-general of militia, went to suppress the Indians. He defeated the Divorce bill, a measure granting absolute separation upon mutual consent of man and wife. He also introduced and secured the passage of the bill establishing the University at Berkeley. In Texas he laid out the town of Velasco, on the Brazos and was the first active advocate of a railroad to the Pacific, urging its neces-

J. C. Platt

sity from the military standpoint. He published "The Texan Expedition against Mier" (New York, 1845). He died in Warren county, N. C., Dec. 12, 1863.

FOERSTER, Adolph Martin, composer, was born in Pittsburgh, Pa., Feb. 2, 1851, of German birth. His father was a well-known artist. He received his first instruction in music from his mother, who was an amateur pianist of considerable ability. Later he was for a short time a pupil of Jean Mlans, and then took up a commercial career. After three years, however, he abandoned it to devote himself seriously to music, and in 1872 went to Leipzig, where at the conservatory he studied piano, under Coccini and Wenzel; singing, under Grill and Schimon; and theory, under E. P. Richter and Papperitz. Returning to the United States in 1875 he was for one year teacher at the Conservatory of Music at Fort Wayne, Ind., and afterwards settled in Pittsburgh, where he has since remained as a teacher of singing and piano, devoting all his leisure to composition. He was conductor of the Pittsburgh Symphonic Society in 1878-79, and of the Pittsburgh Musical Union in 1883. Mr. Foerster was a personal friend of Franz, the famous song-writer, and carried on a correspondence with him for eighteen years; he has also written an important appreciation of the composer for the magazine, "Music." His compositions include: "Thunella," a character-piece for full orchestra, based on Karl Schaffer's poem (op. 10); a "Noxette" for violin and piano (op. 26); quartette for violin, viola, cello and piano (op. 21); second quartette (op. 40); "Albumblatt," for cello and piano (op. 24); trio for violin, cello and piano (op. 29); suite for violin and piano (op. 36); "Hero and Leander" (op. 41); "Verzweiflung"; suite for piano (op. 46); prelude to Goethe's "Faust" for full orchestra (op. 48); dedication march for Carnegie hall in Pittsburgh; "Valse Brillante" for piano (op. 11); "Sonnet," based upon a lyric of Petrarch's (op. 13); two sonatas (op. 18); "Exultation" and "Lamentation," two concert études (op. 37); twelve "Fantasy Pieces" (op. 38); six songs, dedicated to Robert Franz (op. 6); "Among Flowers," a book of eleven songs (op. 28), and many other similar compositions.

DEARING, James, soldier, was born in Campbell county, Va., April 25, 1840, son of James Griffen and Mary Anna (Lynch) Dearing. He was descended in the fifth generation from Robert Dearing, who came from England and settled in (now) Orange county, Va., and on the maternal side in the fourth generation from Charles Lynch, who came from Galway, Ireland, about 1715, and settled first in Albemarle county and afterward at Chestnut Hill, now in Campbell county, Va. He was the father of John Lynch, founder of the city of Lynchburg, Va., and of Col. Charles Lynch, of revolutionary fame, from whom "Lynch law" derived its name. Young Dearing received his elementary education at the New-London Academy, Reul's School, in Lynchburg, and Hanover Academy, all in his native state. Later he entered the U. S. Military Academy, West Point, and was about to graduate at that institution when Virginia seceded, and he, with other southern cadets, returned home. He was at once appointed aid-de-camp on Gov. Letcher's staff, and later, first lieutenant in Maj. Walton's New Orleans artillery battalion, and was present at the first battle at Manassas. He was promoted captain in 1862, and was complimented for gallantry in the battle of Seven Pines, where his command lost twenty five men and seventeen horses in thirty minutes, but held its ground. In the fall of 1862 he was made major and became colonel in the next year. In the spring of 1864 he was in command at the storming of Plymouth, N. C., and was immediately afterward made a

brigadier general. He was with the army around Petersburg during the winter of 1864-65, and helped to cover the retreat from Richmond after its evacuation. On April 8, 1865, while leading a charge at the High Bridge, near Farmville, he was mortally wounded in a hand-to-hand encounter with Col. Washburn, of the Federal army, who died that night. His commission as major-general had been made out and was ready to be dispatched when Richmond was evacuated. He was the youngest major general in the Confederate army, and, probably, in either army. As a soldier he was distinguished as well for his genial disposition as for his intrepidity and daring. He was married, in 1864, to Roxana Birchett, and had one daughter, Mary Lucretia, now the wife of Judge Frank P. Christian, of Lynchburg. Gen. Dearing was taken to Lynchburg, where he died April 22, 1865.

NELSON, William, naval officer, was born at Maysville, Mason co., Ky., in 1825, brother of Thomas Henry Nelson, U. S. minister to Mexico and to Chili. William Nelson entered the navy when fifteen years of age. He commanded a battery at the siege of Vera Cruz and afterwards served in the Mediterranean. On Sept. 15, 1854, he became master, and on April 18, 1855, lieutenant. In 1858 Nelson commanded the Niagara, in which the negro slaves taken from the captured slaver Echo were returned to Africa. At the outbreak of the civil war he was in Washington, D. C., on ordnance duty. He was made lieutenant commander on July 16, 1861, and was assigned to the command of the gunboats patrolling the Ohio river, but the military service offering greater opportunities for action he exchanged from the navy to the army on Sept. 16, 1861, and was made brigadier-general of volunteers. He organized a camp between Garrardville and Danville, Ky., and another in Washington, Mason co., Ky.; participated in numerous engagements in the eastern part of Kentucky, and was untiring in the work of raising regiments. He was in command of the 2d division of Gen. Don Carlos Buell's army when it joined Gen. Grant at the battle of Shiloh. Nelson was wounded at Richmond, Ky. He was in command of the forces in Louisville when Bragg threatened that city, and on July 17, 1862, was promoted to major general of volunteers. In an altercation with Gen. Jefferson C. Davis at the Galt House, Louisville, Ky., he was fatally shot by that officer on Sept. 29, 1862.

SCOFIELD, Glenni William, jurist, was born in Chautauqua county, N. Y., March 11, 1817. He was graduated at Hamilton College in 1840, and removed to Warren, Pa., where he was admitted to the bar in 1843. In 1850 he was a member of the Pennsylvania assembly; in 1857-59 of the state-senate, and in 1861 was appointed president judge of the 18th judicial district of the state. In 1862 he was elected a representative from Pennsylvania to the 35th congress and served until March, 1875; during his term of office he was a member of the committees on Indian affairs, elections and expenditures in the war department and chairman of the committees on unfinished business and naval affairs. He was register of the treasury of the United States from 1878 to 1881, when he was appointed an associate justice of the U. S. court of claims. In 1884 the degree of LL. D. was conferred on him by Hamilton College.

BUCK, Gurdon, physician, was born in New York city, May 4, 1807, son of Gurdon and Susannah (Manwaring) Buck, and great-grandson of Gov. Gurdon Saitonstall, of Connecticut. After receiving a classical education at Nelson's School in New York he engaged in business for a time, but later took up the study of medicine under Dr. Thomas Cook and was graduated at the College of Physicians and Surgeons in 1830. He served the regular term in the medical department of the college, went abroad, and after studying for two years and a half, chiefly in Paris, Berlin and Vienna, returned toward

the latter part of 1833 and began practice in New York city. A second trip was made abroad (1835-37), and in the latter year he was appointed visiting surgeon of the New York Hospital, a position he held until his death. He became visiting surgeon also of the Presbyterian and St. Luke's hospitals and consulting surgeon of the Roosevelt Hospital at their organization, and from 1852 to 1862 was visiting surgeon of the New York Eye and Ear Infirmary. He served as trustee of the New York Ophthalmic and Aural Institute, the New York Dispensary, the College of Physicians and Surgeons; was connected with the

New York Pathological Society and the American Medical Association, and was a fellow of the Academy of Medicine from its foundation, serving one term as vice-president. Besides publishing an elaborate treatise entitled "Contributions to Reparative Surgery" (1876), he was for thirty-five years a frequent contributor to the medical journals, writing many valuable articles. He introduced the treatment of fractures with weight and pulley, known as "Buck's Extension," and performed successfully many difficult operations. Dr. Buck was married at Geneva, Switzerland, 1836, to Henrietta E. Wolf, a native of that country. He died in New York city, March 6, 1877.

DODGE, Richard Irving, officer and author, was born at Huntsville, N. C., May 19, 1827, son of James and Susan (Williams) Dodge; grandson of Richard and Anne Sarah (Irving) Dodge, and a lineal descendant of Tristram Dodge, the original settler of Block Island. He was a grandnephew of Washington Irving. He was graduated at the U. S. Military Academy in 1848 with the rank of second lieutenant, 8th infantry, and was regularly promoted for efficiency and good service; first lieutenant, 1855; captain, 1861; major, 1864; lieutenant-colonel, 1873; colonel, 1882, and was retired May 19, 1891. During the war he was employed as mustering and disbursing officer in various places; commanded the camp of instruction at Elmhurst, N. Y., and was assistant inspector-general of the 4th army corps. On the cessation of hostilities he served as member of a board to perfect a system of army regulations in New York (1871-72), and later participated in numerous campaigns against the Indians. His writings received much commendation from able critics for their reliable information and the vivacity, picturesqueness and fidelity of his descriptions, the "Saturday Review" comparing him favorably with Catlin and Ruxton, both masters of the subjects which employed his pen. His publications are: "The Black Hills: A Minute Description of the Routes, Scenery, Soil, Climate, Zoology, Etc." (1876); "The Plains of the Great West, and Their Inhabitants," with an intro-

duction by William Blackmore (1877); the English edition was entitled "The Hunting Grounds of the Great West: A Description of the Plains, Game and Indians of the Great North American Desert" (London, 1876); "Our Wild Indians," with an introduction by Gen. Sherman (1882), and "A Living Issue" (1882). Col. Dodge died at Sackett's Harbor, N. Y., June 16, 1895.

SCHROEDER, John Frederick, clergyman and author, was born in Baltimore, Md., April 8, 1809. After graduating at Princeton College, in 1819, he took up the study of theology at the Episcopal Seminary in New Haven, Conn., and was admitted to holy orders in Baltimore in 1823. He was the assistant rector of Trinity Church, New York city, in 1824-38, and after a short visit in Europe he established St. Ann's Hall, a school for girls, at Flushing, L. I. In 1846 he was made rector of the Church of the Crucifixion, New York city, and in 1853 took charge of St. Thomas' Church, Brooklyn, N. Y. Besides being a popular preacher, he delivered a course of lectures on Oriental literature before the New York Athenaeum, and contributed a treatise on the "Authenticity and Canonical Authority of the Scriptures of the Old Testament," and on the "Use of the Syriac Language," in a volume of essays on Biblical literature, which he edited. He published a memorial volume on the death of Bishop Hobart in 1830; "Memoir of Mrs. Mary A. Boardman" (1849); "Maxims of Washington, Political, Social, Moral and Religious" (1855), and at the time of his death he was engaged upon "The Life and Times of Washington," which was completed by others. He received the degree of A. M. from Princeton and Yale colleges in 1823, and the degree of S. T. D. from Trinity College in 1836. He died in Brooklyn, N. Y., Feb. 26, 1857.

WILCOX, Cadmus Marcellus, soldier and author, was born in Greene county, N. C., May 29, 1825, son of Reuben and Sarah (Garland) Wilcox. He was graduated at West Point Military Academy in 1846. He served in the Mexican war and was appointed brevet second lieutenant of the 4th U. S. infantry at Monterey, a few days after the battle. He was on Gen. Taylor's staff, then was made aid-de-camp to Gen. Quitman, and participated in all the battles of that division in Mexico. At Chapultepec he headed the storming party, and with Lieut. Selleck, of the Palmetto regiment, mounted the aqueduct and raised the Palmetto flag, the first American flag to wave from a Mexican fortress. The incident is commemorated in a large picture, to be seen at the U. S. Capitol. Returning from Mexico, he was engaged in Indian operations in Florida and Texas. In 1852 he was ordered to West Point as commandant of cadets and instructor of infantry tactics; in 1853 was granted twelve months' sick leave, which he spent in Europe inspecting military institutions. Returning home, he published a work on rifle practice. This was adopted as a text book at West Point and at Saint Cyr Military School, near Paris, and the U. S. war department bought 1,000 copies for distribution at military posts. He also translated and published "Austrian Line Infantry Evolutions," which had a large circulation; was promoted to a captaincy in 1859, and stationed at Fort Fillmore, Arizona, at the outbreak of the civil war. The mail bringing news of the secession of Tennessee, the state to which he acknowledged allegiance, brought also an order from Gen. Scott to report at Washington,

Gurdon Buck

Cadmus Wilcox

and offering an important assignment at headquarters; but, resigning his commission, he left for Virginia, reaching Manassas the day after the battle. Having tendered his services to the Confederacy, he was appointed colonel 9th Alabama regiment; was made brigadier general in October, 1861, and assigned to duty with the army of northern Virginia; was present at the battles of Williamsburg, Seven Pines, Gaines' mill, Frazier's farm, Malvern hill, Sharpsburg, Chancellorsville, Gettysburg, and was highly esteemed by Gen. Lee, as he had been by Taylor, Quitman, Scott and all comrades and superiors. He was appointed major-general in August, 1863, and was prominent in all engagements from the Wilderness to Appomattox, where he surrendered with Lee. From Appomattox he went to Mexico, where he received social courtesies from Maximilian and Carlota; returned to the United States in 1866, and engaged in the insurance business. At the time of his death he was employed in the records division, U. S. war department. He left in manuscript a history of the Mexican war, completed and published after his death by his niece, Mary Rachel Wilcox, pronounced by competent critics the most accurate and readable account of that memorable struggle, and one of the best historical works published by any American author. He also left notes and documents which he intended to use in a history of the great war, 1861-65. He never married, and he died at Washington, D. C., Dec. 2, 1890.

MONTAGUE, Henry J. (Henry John Mann), actor, was born in the county of Staffordshire, England, Jan. 20, 1843. His father was a clergyman of the Established Church of England. He was educated at the Essex Grammar School and the Maiden Hill College. His father lost money, and being obliged to leave the academy and seek employment, he obtained a clerkship in a banking house in London, which he held for five years. During these years he became stage-struck, and took part in several private dramatic performances. At the age of eighteen, he finally went on the stage. He made his first appearance in America, Oct. 6, 1874, as Tom Gilroy, in "Partners for Life," and soon became one of the most popular actors before the American public. When "The Shaughraun" was produced at Wallack's, and during the long run of that drama, the handsome, red-coated Capt. Molyneux shared with the shock-headed Conn the admiration of the public. He had an agreeable, even tenor voice, and sang sentimental songs, very expressively. In the "Little Church Around the Corner," which "Harry" Montague attended, is a memorial stained glass window, representing him in the garb of a pilgrim, with staff in hand, ascending the heights.

In private life Mr. Montague was a thoroughly charming companion. He was eminently sociable, sweet-tempered and generous, and had that rare personal magnetism which wins friends without effort. He died in New York, Aug. 11, 1878.

REES, John Krom, scientist, was born in New York city, Oct. 27, 1851. After completing his academic course he entered Columbia College. In 1872 he was graduated there, and in 1875 from the School of Mines of that institution, where he served, part of the time while a student, as assistant in mathematics for three years. The following year he filled the chairs of mathematics and as-

tronomy in the Washington University, at St. Louis, Mo. Under his direction the observatory was erected, and the time system first adopted there was largely due to his efforts. He returned to Columbia in 1881 to become adjunct professor of practical astronomy and geodesy, and on Oct. 1, 1881, was made professor of these sciences and director of the observatory of Columbia College. In 1888 Mr. Rees was appointed managing editor of the "School of Mines Quarterly," which position he held for several years. In 1878 he was a member of the Fort Worth solar eclipse party. Mr. Rees is a member of the American Meteorological Society, in which he has held various important offices.

As secretary of the American Meteorological Society, Mr. Rees rendered valuable service in bringing about the adoption of standard time throughout the United States. He is also a member of the American Association for the Advancement of Science; was its local secretary in 1878 at the meeting held at St. Louis; in 1879 secretary of the section on mathematics and physics, and in 1880 general secretary. He was president of the New York Academy of Sciences, 1894-96, and secretary of the University Council of Columbia University, 1892-98. He has published: "Report on the Solar Eclipse of July 28, 1878"; "International Time System and Standard Time"; "Variation of Latitude and Constant of Aberration"; "Index of Rutherford's Photographs of Sun, Moon and Stars," etc. While he has been director of the Columbia Observatory important work has been done by Prof. Jacoby, Dr. Davis and others in reducing and publishing the measurements of the photographs of stars by Rutherford. A fine series of observations has been made by Rees, Jacoby and Davis for determining the variation of latitude at New York city, and for the constant of aberration. Columbia Observatory was the first to work on this problem in connection with an observatory on the same parallel of latitude; namely, the Royal Observatory at Naples. Prof. Rees lectures frequently on astronomical topics. At the Paris exposition of 1900 he was the U. S. juror on instruments of precision and a delegate to the astronomical conference on photographing the atlas and to the congress on chronometry. The French republic conferred upon him the decoration of chevalier of the Legion of Honor in 1900.

DOUGLAS, Silas Hamilton, chemist and author, was born at Fredonia, N. Y., Oct. 16, 1816, son of Benjamin and Lucy (Townsend) Douglas; grandson of Daniel and Lydia (Douglas) Douglas, and of Samuel and Lydia (Dyer) Townsend, and a descendant of William and Anne (Mattle) Douglas, of Scotland, who settled in New London, Conn. He received an academic education in his native place, and studied medicine under Dr. Zina Pitcher, in Detroit, Mich., and at the College of Surgeons and Physicians, Baltimore, Md., where he received his degree of M. D. in 1842. He practiced medicine for a short time at Dearborn, Mich., and in 1844 was appointed instructor of chemistry at the University of Michigan, and lecturer on chemistry and zoology, 1845-46. In 1846 he was elected professor of chemistry, mineralogy and geology, an office which he held until 1851, during which time he participated in the establishment of the department of medicine, which was inaugurated in 1848, he was professor of chemistry, pharmacy, toxicology and mineralogy, 1855-70, of chemistry, 1870-75, and of metallurgy,

chemistry, technology, 1875-77. His earnest thought and effort during this time were given to the establishment of a laboratory of instruction, of which he became director in 1870. He resigned his duties at the university in 1877. His publications consist of: "Tables for Qualitative Chemical Analysis" (1864), and, in collaboration with Prof. Albert B. Prescott, "Qualitative Chemical Analysis; a Guide in the Practical Study of Chemistry" (1874, 2d ed., 1880). He died at Ann Arbor, Mich., Aug. 26, 1890.

WEAVER, James Baird, statesman, was born in Dayton, O., June 12, 1823; son of Abram and Susan (Inley) Weaver. He was educated in the common schools; was graduated at the law school of the Ohio University, at Cincinnati, in 1856, and commenced the practice of his profession in Iowa. He enlisted in the Federal army as a private in April, 1861, and achieved a brilliant and honorable record as a soldier. He was elected first lieutenant of company G, 2d Iowa infantry; was made major Oct. 3, 1862, and promoted colonel Oct. 12, 1862, the senior officer of his regiment having been killed in battle. He was brevetted brigadier-general on March 13, 1865, "for gallantry on the field," to date from that day. At the close of the war he resumed the practice of law; was district-attorney of the 2d judicial district of Iowa from 1866 to 1870, and assessor of internal revenue for the 1st district of Iowa from 1867 to 1873. Subsequently he became one of the editors of the "Iowa Tribune," published at Des Moines. He was instrumental in the formation of the National Greenback party, and was elected to congress as its representative in 1878, serving until 1881. He was a delegate to the national convention of the Greenback party held in Chicago in 1880; was nominated by the convention as a candidate for president of the United States, and at the ensuing election received about 350,000 votes. In 1884 he was elected to congress by the Democratic and Greenback Labor parties; was re-elected in 1886, and served until 1889. He was defeated for re-election in 1888. In 1892 he wrote and published a work entitled "A Call to Action." The same year he was the People's party candidate for president of the United States, and received twenty-two electoral votes.

J. B. Weaver

The popular vote for him was 1,041,028. In his own state he received 20,395 votes; in Kansas, 162,845. In North Dakota one of the Populist electors voted for Cleveland. He was married, in 1858, to Clara, daughter of Cuthbert Vinson, a Marylander by birth and education. He has resided in Colfax, Ia., since 1895, and is now (1901) mayor of that city. He is a man of positive character and virile intellect, and a powerful debater.

WALCOT, Charles Melton, author and actor, was born in London, England, Sept. 20, 1815, and was educated at Eton College. He came to America with an independent fortune in 1837, and, settling in Charleston, S. C., became an architect. He lost everything in the national monetary panic of that year, and accepted the position of treasurer of the Charleston Theatre, under the management of Mr. Abbott, a celebrated tragedian. He first appeared as an actor at the latter's benefit in 1839, in the character of Steady in a comedy called "The Quaker." In the tragedy of "George Barnwell" he was so successful that he thenceforth adopted the stage as a profession, and being also a cultivated musician with an excellent baritone voice, he often sang in English

opera. In 1840 he appeared as the Unknown in the opera of "La Bayadere," and as Florian in "The Devil's Bridge," with Mr. Brahiam at the National Theatre, Philadelphia, under the management of William E. Burton. In 1843 he joined the stock company of Mitchell's Olympic Theatre, New York, as leading man, where he was the original representative in this country of "Don Cesar de Bazan"; also sang Lord Aleash in the opera of "Fra Diavolo"; Dandini in Rossini's "Cinderella," and wrote and acted in many of his own plays for a period of six years. In 1853-54 he joined Mr. Wallack, who was then establishing the afterwards famous Wallack's Theatre, situated at Broadway and Broome street, New York, where he appeared in the principal eccentric comedy rôles and became famous in such characters as Bob Acres in "The Rivals"; Goldfinch in "Road to Ruin"; Graves in "Money"; Touchstone in "As You Like It"; Sir Harcourt Courty in "London Assurance," and Tony Lumpkin in "She Stoops to Conquer," until 1858, when he went on a starring tour through the United States. He re-joined Wallack's Theatre in 1859, and was there the original representative in this country of Major Wellington Deboots in "Everybody's Friend." In 1865 he made a starring tour to England and played that character in the Olympic Theatre, London, with great success. Walcot was a most versatile, graceful and finished comedian. He was particularly excellent in eccentric comedy, and was also a prolific playwright. Among his original or adapted plays are: "The Course of True Love" (1839); "Washington; or, Valley Forge" (1842); "The Customs of the Country" (1848); "The Haunted Man" (1848); "David Copperfield" (1848); "Hoboken" (1849); "Edith" (1849); "One Coat for Two Suits" (1854); "Hiawatha" (1855), and "A Good Fellow" (1857). He composed the songs "My Love is a Sailor Boy" and "My Own Little Rose." He was the father of Charles Melton Walcot, who was also an actor and became a successful member of the Lyceum Theatre company, New York city. Upon returning to America in 1866 Walcot, Sr., retired from the stage owing to failing health, and he died in Philadelphia, Pa., May 13, 1868.

WALCOT, Charles Melton, actor, was born in Boston, Mass., July 1, 1840, son of Charles Melton and Anne (Powell) Walcot. He was educated at St. John's College, Fordham, N. Y., where he established the first dramatic society conducted by the students. It gave semi-annual performances of plays of the highest order, in which he appeared as Macbeth, Falstaff, etc. He was graduated in 1858 and made his professional debut the following October as a member of a regular stock company in Charleston, S. C., where he made rapid progress in his art. The year following he acted light comedy rôles at the National Theatre, Cincinnati, O., and also during the season of 1860-61 at the Richmond Theatre, Richmond, Va. He first appeared in New York as the leading man at the Winter Garden Theatre in October, 1861, where he was most successful in the rôles of Uncle Tom in "Uncle Tom's Cabin"; "Uncle Pete in 'The Octoroon'; Captain Hawksley in "Still Waters Run Deep," and Jacques Strop in "Robert Macaire." In September, 1862, he joined Laura Keane's stock company, as the leading man of Laura Keane's theatre, playing the rôles of Charles Surface in "The School for Scandal"; Young Dornton in "The Road to Ruin"; Captain Absolute in "The Rivals"; Doctor Douglass in "The

Heir at Law"; Doctor Ollapod in "The Poor Gentleman"; Charles Courtley in "London Assurance"; Asa Trenchard in "Our American Cousin"; Myles on Coppaleen in "Colleen Bawn"; Littleton Coke in "Old Heads and Young Hearts," and Young Marlowe in "She Stoops to Conquer." During the season of 1863-64 Walcott starred in Lester Wallack's successful play, "Roschdale," taking the part of Elliott Grey. In September, 1861, he again became the leading man at the Winter Garden Theatre, New York, under the management of Edwin Booth, during which he appeared for one hundred consecutive nights in "Hamlet." This was at that time the longest run on record of a Shakespearean play in this country. He also played in "Julius Caesar" and "Othello." In 1866 he joined the stock company of the Walnut Street Theatre, Philadelphia, under the management of Edwin Booth and J. S. Clarke, and for seven years he played all the leading roles, supporting such stars as Edwin Forrest, Edwin Booth, Joseph Jefferson, Charles Fechter, Barry Sullivan, Mmie. Janauschek and Charlotte Cushman. In 1871 he supported Mmie. Janauschek in the leading roles at Booth's Theatre, New York, returning to the Walnut Street Theatre, Philadelphia, the following season, where he remained as stage manager and leading man until June, 1879. In September, 1879, he joined A. M. Palmer's Union Square Theatre company, acting George Washington Phillips in Bronson Howard's "The Banker's Daughter" for three consecutive years; after which he was with the Madison Square Theatre company for two years, playing in "Esmeralda." In 1886 he was leading man for Lawrence Barrett, playing Brutus in "Julius Caesar"; Louis XI. in "Guingoire," etc. In September, 1886, he joined Rose Coghlan's company, playing Sir Peter Teazle in "The School for Scandal"; Sir Harcourt Courtly in "London Assurance," and Jacques in "As You Like It." In November, 1887, he joined the stock company of the Lyceum Theatre, New York, under the management of Daniel Frohman, where he still remains.

SHEFFIELD, Joseph Earl, merchant, was born at Southport, Conn., June 19, 1793, son of William and Mabel (Thorpe) Sheffield. His father and grandfather were wealthy shipowners who during the revolutionary war fitted out and maintained an armed vessel in the interest of the colonial service. His mother was a daughter of Capt. Walter Thorpe, also a shipowner of Southport. He received a common school education and began a mercantile career at the age of fourteen in Newberne, N. C. Removing to New York city he became a partner in a New York mercantile house in 1813, subsequently removing to Mobile, Ala., where he engaged extensively in the cotton trade. His business career here for nearly twenty-two years was eminently successful, enterprising and honorable. In 1835 he removed to New Haven, Conn., where he resided the rest of his life. He was interested in the purchase and operation of the New Haven and Northampton canal, and he helped to secure the charter for the New York and New Haven railroad, and went to London to interest Baring Bros. in the enterprise. He also built the Chicago and Rock Island railroad, and in all these enterprises Henry Farnam, the civil engineer, was associated with him. In 1860 the scientific department of Yale, which now bears his name, was, through his munificence, reorganized and enlarged. During his lifetime he gave over \$450,000 to this department, and in his will bequeathed \$500,000 more. He made liberal donations to other colleges, seminaries and religious institutions. In 1829 he was married to Maria, daughter of Col. J. T. St. John, of Walton, N. Y., by whom he had children. He died in New Haven, Conn., Feb. 16, 1882.

GANNON, Mary, actress, was born in New York city, Oct. 8, 1829. She appeared on the stage at the Richmond Hill Theatre, New York city, at the age of three, and for several years thereafter was exploited as an infant wonder. She made her debut as an adult in Philadelphia in 1846, and soon gained recognition as one of the most pleasing and accomplished comedienne. She was for several years a member of the company playing at Mitchell's Olympic, New York, and later was a favorite member of the company of the elder Wallack. In 1854 she was married to George W. Stephenson, a lawyer of New York city. Her last appearance was as Mary Nettley in "Ours," in January, 1868. She died in New York city, after a long and painful illness, Feb. 22, 1868.

DOWNES, Lewis Thomas, insurance, was born at Waterbury, Conn., July 9, 1821, son of Anson and Evelyn (Welton) Downes, and a direct descendant in the seventh generation of John Downes, one of the early settlers of the New Haven colony. He is of Anglo-Saxon origin, and traces his lineage to 1243 A. D. His early education was obtained at the Cheshire, Waterbury and Newtown academies in Connecticut. He was graduated at Trinity College, Hartford, in 1848, and received the degree of A. M. in 1851. He then studied law in the office of Judge Francis Parsons at Hartford. In 1855 he went to Providence, R. I., and entered the office of Royal Chapin, wool dealer and manufacturer. In 1861 he became associated with George W. Chapin, under the name of Chapin & Downes, in the manufacture of woolen goods, and the firm soon after built the Riverside mills. Previous to this he spent some time studying the methods and processes of woolen manufacturing in England, France, Belgium, Germany and Austria. This resulted in his introducing the Bollette first breaker card feeder, the first self-operating woolen mules, the Hougat double cylinder gig (now known as the Downes gig) and other woolen finishing machines heretofore unknown in the United States. In 1872 he left the Riverside mills, and in 1873, with Elisha Harris, organized the What Cheer Mutual Fire Insurance Co., now one of the New England factory insurance companies, and in 1875 the Hope Mutual Fire Insurance Co., of both of which he is now (1901) president. He is well known as a church musician and organist, having studied under some of the most noted masters of the organ and voice, and has done much toward raising the standard of church music in the Episcopal church. He was for several years a member of the school committee of Providence and chairman of the committee on nurse. He is a member of the Advance Club, being one of its executive committee, and chairman of the committee on municipal reform, and has also been a member of the Churchman's Club since its organization. In 1857 he was married to Sarah, daughter of Royal and Maria T. Chapin, and had four children, only one of whom, Louis W. Downes, is now living.

HARRIS, Miriam (Coles), author, was born on the island of Dosoris, Long Island sound, near Glen Cove, July 7, 1831, daughter of Butler and Julia Anne (Weeks) Coles, and granddaughter of Gen. Nathaniel Coles, of the revolutionary army. Her earliest American ancestor, Robert Coles, emi-

grated from Suffolk, England, with Gov. Windrop, in 1639, landing at Boston. Subsequently his sons removed to Oyster Bay, L. I., where they intermarried with the Burlers and the Townsends. She was educated at St. Mary's Hall, Burlington, N. J., and at Mahame Canda's fashionable school, New York city. After contributing to periodicals for several years she, in 1860, published, anonymously, her first novel, "Ruthledge." A new edition appeared in 1866, and the book still has a wide circulation. Since then Mrs. Harris has published many novels and other books, including the following: "The Sutherlands" (1861); "Louie's Last Term at St. Mary's" (1866); "Richard Vandermark" (1871); "A Perfect Adonis" (1875); "Happy-go-lucky" (1881); "Missy" (1880); "Phoebe" (1884); "An Utter Failure" (1890); "A Chit of Sixteen, and Other Stories" (1892); "A Corner of Spain" (1898), and the religious books "A Rosary for Lent" and "Dear Feast of Lent." All of her works have passed through many editions. She was married, April 29, 1864, to Sidney S. Harris, a lawyer practicing in New York city, who died in 1892, leaving a son and a daughter.

DAVIDGE, William Pleater, actor, was born in London, England, April 17, 1814. He made his debut on the stage as an amateur, and then for some years was a member of a stock company in Manchester. He first appeared in London in 1836. He came to the United States in 1850; made his first appearance at the Broadway Theatre, New York, in "Used Up," and then for five years supported Forrest, Cushman and other leading players of the time. In 1855 he made a tour of the country. He played for a time with F. B. Conway, and for two seasons was a member of the company playing at the Olympic Theatre. He shared in the Shakespearean revivals at the Winter Garden Theatre, and from 1869 to 1877 was a member of Augustin Daly's company.

In 1879 Davidge was the original Dick Deadeye in the American production of "Pinafore." In 1885 he joined the Madison Square Theatre Co., with which he remained until his death. During his professional career he played over 1,000 parts. He was an earnest and finished actor, of especial excellence in the rôles of eccentric comedy. His son, William, born in Manchester, England, March 11, 1847, is also an actor, and made his first appearance in New York city. William Pleater Davidge died in Cheyenne, Wyo., Aug. 7, 1888.

PECKHAM, William Clark, physicist, was born at South Royalston, Mass., Aug. 13, 1841, son of Samuel Howland and Sarah (Clark) Peckham. He is of the Petersham (Mass.) branch of the Peckhams, and is descended, on his father's side, from John Peckham and Mary Clark, who settled in Newport, R. I., in 1638, through their son, Thomas, and grandson, Philip, who was married to Jane Blackwell. Their son, John, was married, in Bristol, R. I., April 22, 1742, to Tabitha (Howland) Cary, daughter of Samuel Howland and widow of Nathaniel Cary. She was a great-granddaughter of John Howland, of the Mayflower. They settled in Petersham, Mass. William was married to Elizabeth Knapp, whose son, Samuel Howland, was the father of the subject of this sketch. On his mother's side, he was descended from Maj. Jonathan Clapp, whose daughter was married to Lieut. Asahel Clark, great-grandfather of William Clark Peckham. Lieut.

Clark served through the war of the revolution, having enlisted three times, and rose from the ranks to a second lieutenancy in Capt. Avard's company in the 2d Hampshire county regiment. Lieut. Clark was descended from Lieut. William Clark, who was born in Plymouth, England, in 1609, and came to Dorchester, Mass., in 1638. Samuel Howland Peckham (b. in Petersham, Mass., Sept. 19, 1733; d. in Westminster, Mass., Jan. 23, 1864) was a prominent Congregational clergyman and early abolitionist in Massachusetts. His wife, Sarah (b. July 12, 1826; d. Dec. 5, 1858), was the daughter of Eliezer and Sarah Clark, of East Hampton, Mass. William Clark Peckham received his preparatory education at the Lawrence Academy, Groton, Mass., in 1860-63. During this period, in 1861-62, he served as a private in the 23d regiment, Massachusetts volunteers, at Roanoke island and Newbern, N. C. Entering Amherst College, he was graduated A. B. in 1867, and A. M. in 1870. In 1871-72 he took special studies at the Union Theological Seminary, in New York city. After his collegiate course he taught, 1867-68, as principal of Leicester Academy, Massachusetts, and, 1868-70, of Williston Seminary, Easthampton, Mass. During 1870-71 he traveled around the world. On his return he commenced educational work in Brooklyn, N. Y., in Lockwood's Academy, where he remained until 1875, when he received an appointment in the Adelphi Academy, now Adelphi College, where he is still professor of physics. Prof. Peckham is prominent in Brooklyn educational circles, a beloved and inspiring teacher and very successful in presenting scientific subjects in a popular manner. He has been for many years a contributor to papers and periodicals, among others the "American Electrical World," the "Electrical Engineer" and "Century Magazine." He has been connected with the "Scientific American" since 1897. He is a fellow of the Brooklyn Institute of Arts and Sciences, and president of its department of photography. He is also an associate member of the American Institute of Electrical Engineers. Prof. Peckham is one of the most successful investigators of the X-ray phenomena in the United States, and is considered an authority on the subject of liquid air, both as an investigator and lecturer. Prof. Peckham was married in Kingston, Mass., Jan. 1, 1868, to Katalena, daughter of John and Maria (Kellog) Whittier. They have one daughter, Clara Isabel (Peckham) Pashley.

WILSON, Thomas, lawyer, U. S. consul and scientist, was born in New Brighton, Pa., July 18, 1832, son of James and Lydia (Mercer) Wilson, of English ancestors, who settled in Hereford county, Md., removing to New Brighton in 1800. He was educated in common schools, and at the age of sixteen apprenticed himself to David Woodruff, of Salem, O., to learn the carriage-making trade, where he remained three years. In 1851 he returned to his home, carried on his trade two years, and then migrated West, working as a journeyman in St. Louis, Mo.; Troy and Peoria, Ill., finally settling at Marietta, Ia., where he began the manufacture of heavy plows for prairie use. In 1857 he was chosen deputy clerk of the court. This turned his attention to the law as a profession, and he began to read after his day's work. He then entered the law office of Finch & Crocker, at Des Moines, Ia.; was admitted to the bar in 1860; returned to Marietta; opened an office, and soon acquired an extensive practice. At the beginning of the civil war he enlisted, and served as captain of the 2d Iowa cavalry, also in the 44th Iowa infantry; was mustered out in 1864, and went to Washington, where he formed a partnership in law and claims with Hon. Thomas Corwin, of Ohio, the firm subsequently including Col. W. H. Owen and

Hou, L. G. Hine, practicing principally before the supreme court and the court of claims. In 1881 he was appointed U. S. consul, first to Ghent, Belgium; then to Nantes, and subsequently to Nice, France. Having been interested in the Indian mounds of his native place, he was brought during his consulship at Nantes into close relation with the prehistoric monuments of Brittany, where he had exceptional opportunities to indulge his taste for archeology. In the pursuit of this science he visited nearly all the museums of western Europe. He became acquainted with most of the leading archeologists and anthropologists of Europe, and was elected to some of their most important societies. During this time he gathered a collection of 15,000 objects of prehistoric and classic archeology, now displayed at the National Museum at Washington. Mr. Wilson was appointed curator of the U. S. National Museum, to fill the vacancy left by the death of Dr. Charles Rau. He is a regent of the National University, which conferred on him the degree of LL.D. In 1887 he installed the display of the department of prehistoric anthropology at the Cincinnati exposition; was sent to Paris, in 1889, by the U. S. National Museum, as a delegate of the Smithsonian Institution to the tenth international congress of anthropology and prehistoric archeology; also to observe the French World's exposition, and to the Exposition Historico-Americano, at Madrid, Spain, 1892, where he received two medals and was appointed commander of the Royal Order of Isabella la Católica. He was also appointed by the committee of awards at the World's Columbian exposition as honorary judge in the department of ethnology, and, with Señor Manuel M. de Peraltá, minister of Costa Rica, was assigned to judge all the exhibits in the Convent of La Rubia. Mr. Wilson has contributed many valuable articles to archeological literature, among which are: "Results of an Inquiry as to the Existence of Man in North America During the Paleolithic Period of the Stone Age"; "Criminal Anthropology"; "Swastika"; "Prehistoric Art," and "Arrow Points, Spear-heads and Knives."

WARD, Henry, congressman, was born in Rhode Island, Dec. 27, 1792, son of Gov. Richard and Mary (Tillinghast) Ward, and brother of Gov. Samuel Ward. He was appointed secretary of Rhode Island in 1790, and held this office until his death. His father and grandfather had held it before him. He was a supporter of the revolution; a member of the congress which met in New York city, Oct. 7, 1765, and a member of the committee of correspondence during the revolution. He died Dec. 27, 1797.

FARNAM, Henry, civil engineer, was born at Scipio, Cayuga co., N. Y., Nov. 9, 1803. His father was a farmer, and, having a large family, needed the assistance of his son until the latter was twenty one. In his youth the boy showed a great fondness for books. He was especially interested in poetry and mathematics, and before the age of sixteen he had mastered the elements of trigonometry and surveying. For a short time he pursued the study of medicine, but he had no liking for that profession, and turned his energies in a different direction. In 1821 he obtained a position as surveyor on the Erie canal, then in process of construction, where his promotions were rapid, and ill-health alone compelled him to abandon the work in 1825. He also taught school at intervals, and all the time he was away from home, until he was twenty one, he employed a substitute to work for him on his father's farm. He next went to Connecticut, acting as assistant, and subsequently as chief engineer, of the Farmington canal. He continued in the service of the company until 1850, a railroad having been in the meantime, largely through his advice, built upon the canal

property. Subsequently Mr. Farnam became much interested in western railroads, his initial enterprise being a part of the Michigan Southern, over whose tracks the first locomotive from the east entered Chicago. In 1852 he began the Chicago and Rock Island road, and completed it two years later. Immediately afterward a branch of this road was run to Peoria, and still later the line of the main road was extended from Rock Island through Iowa, the bridge across the Mississippi, under Mr. Farnam's engineering, being the first to cross that river. His success, both financially and technically, was by this time well established, and he began to enjoy the fruits of his labors. His age alone prevented him from active participation in the civil war, although his sympathies with the Federal cause were most cordial. From 1863 to 1868 he made an extensive trip abroad, having returned in 1864 in order to vote for Pres. Lincoln. The remainder of his life, with the exception of other trips abroad, was spent in retirement in New Haven, Conn., and it was during this period that he made the greater part of the gifts that so endeared him to Yale College. As early as 1864 he gave \$20,000, to be expended in the erection of a new dormitory, and a few years later another \$30,000 was added, the building erected in 1870 being named, in honor of its greatest donor, Farnam Hall. Besides this, he gave at different times smaller sums to the college, particularly to the art school, the library and the divinity school, finally bequeathing to the institution valuable real estate. His gifts to New Haven were many and liberal. Besides the Farnam drive in East Rock park, he gave largely to the hospital and other public charities. Mr. Farnam's success was due not so much to favoring circumstances as to his own individual force and character. He died Oct. 4, 1883.

WOODWARD, George Washington, jurist, was born in Bethany, Pa., March 26, 1809. He received an academic education; studied and practiced law in Bethany. He was a member of the state constitutional convention of 1837. In 1841 he was appointed president judge of the 1th judicial district, and held the office for ten years, and in 1852 was elected judge of the supreme court of Pennsylvania, and held the position for nearly sixteen years. He was elected a representative from Pennsylvania to the 40th and 41st congresses, serving on the committees on mines and mining, revision of the laws of the United States, private land claims, reconstruction and the library; was a delegate to the New York convention of 1868. While traveling abroad, he died in Rome, Italy, May 10, 1875.

PURVIANCE, Hugh Young, naval officer, was born in Baltimore, Md., March 22, 1779, son of James and Eliza (Young) Purviance, of Huguenot descent. His grandfather, Robert Purviance, a native of Castle Fin, Ireland, settled in America in 1763, and with his elder brother, Samuel, established a commission house in Baltimore. These brothers were the financial agents for the government during the revolution. After the revolutionary war he became naval officer of the port of Baltimore, and upon the death of Gen. Otho H. Williams succeeded him as collector of that port. He held this office until his death in 1806. Hugh Y. Purviance attended school in Baltimore, then went to St. Mary's College, and spent two years in Europe. Returning to this country, he was appointed midshipman in the U. S. navy, and served on the frigate Congress, 1819-21; on the East India and Franklin from 1824; in the Pacific squadron, and in the North Carolina, in the Mediterranean squadron, in 1821-27. On March 23, 1827, he was commissioned lieutenant, and served on the West India squadron until 1830, and on the Virginia squadron, 1837-38, commanding the brig Dolphin. He relieved an Ameri-

can schooner from the French blockade at Salado, River Platte, and for this service received the acknowledgment of the government. In 1846 he commanded the frigate *Constitution* in the squadron in the Mexican blockade. He was commissioned commander March 7, 1849, and assigned to the sloop-of-war *Maryland*, on the coast of Africa, where he remained from 1852 to 1855. He received his commission as captain Jan. 28, 1856, and commanded the frigate *St. Lawrence* in the blockade off the Southern and Charleston coast at the beginning of the civil war, capturing the Confederate privateer *Petrel* off Charleston, which was the first prize of the war. He participated in the fight of the *Merrimack* off Sewall's point, Hampton roads. He was commissioned commodore July 16, 1862; lighthouse inspector 1863-65. He received a vote of thanks from the Maryland legislature in recognition of his patriotic services. On Oct. 23, 1834, he was married to Elizabeth R., daughter of James Beatty, of Baltimore, Md., by whom he had two daughters. He died in Baltimore, Oct. 21, 1883.

TALIAFERRO, James Govan, jurist, was born in Amherst county, Va., in 1798, son of Zacharias and Sarah (Warwick) Taliaferro. His family came to Virginia early in the eighteenth century. His father was a lumberman and mill owner for twenty years, and later a small planter. The son received a good education and was graduated at Transylvania University, Lexington, Ky. He studied law at Lexington and was admitted to the bar in 1820. Almost from the beginning of his practice he took a conspicuous position, making the acquaintance of Henry Clay and other prominent politicians, and himself held many local offices. In 1840 he was made judge of his parish; in 1852 he was elected to the Louisiana constitutional convention, and in 1860 was sent to the state convention which passed the ordinance of secession. He was bitterly opposed to this measure and denounced it, refusing to sign the ordinance

when adopted. He took no part in the civil war, and at the return of peace was appointed to the supreme bench of Louisiana. He was president of the state convention of 1868, and under the constitution then formulated was reappointed justice of the supreme court, so continuing until his death. Judge Taliaferro was a profound and widely read scholar and possessed of many notable graces of character. He was married, in 1819, to Elizabeth Williamson, of Lexington, Ky. They had ten children. He died Oct. 13, 1876.

DONALDSON, James Lowry, soldier and author, was born in Baltimore, Md., March 17, 1814. He was graduated at the U. S. Military Academy in 1836, and served throughout the Florida war as second lieutenant in the 3d artillery. He was promoted first lieutenant in 1838, and was on garrison duty until 1846. During the military occupation of Texas he was stationed at Fort Brown. He was present at Monterey and Buena Vista, and was brevetted captain and major. In 1847 he was appointed assistant quartermaster, with rank of captain. In 1858 he was promoted chief quartermaster of the department of New Mexico. During the civil war he served as chief quartermaster at Pittsburgh, Pa.; with the 8th army corps at Baltimore, Md.; in the department of the Cumberland; the military division of the Tennessee, 1865, and of the military division of the Cumberland until 1870 when he was retired. He

was brevetted brigadier-general for distinguished services in the Atlanta campaign, 1864, and major-general of volunteers in 1865. He also attained the rank of colonel on the staff. He resigned Jan. 1, 1874. He is said to have suggested to Gen. Thomas the setting apart of cemeteries for the remains of soldiers who had fallen on the field. He published "Sergeant Atkins," a story of adventures in the Florida war (1878). Gen. Donaldson died in Baltimore, Md., Nov. 4, 1885.

CARPENTER, William Henry, author, was born in London, England, Feb. 6, 1814, son of William Carpenter, a merchant. He was educated at Shaftsbury Academy, but left before graduating, and emigrating to the United States, settled in Baltimore, Md., in 1831. He early displayed a taste for literature, and, in addition to mercantile duties in a cloth-importing house, became dramatic critic of the "Evening Transcript," and contributed frequently to other magazines and journals. In conjunction with T. S. Arthur, he edited the "Baltimore Book," contributing frequently to its pages both in verse and prose. He was the author of "Claiborne, the Rebel"; "The Regicide's Daughter"; "Ruth Emsley," and "John the Bold." He was also joint author with T. S. Arthur, of eleven volumes of state histories, published by Lippincott. He was for a time proprietor of the "Western Continent," and then became editor of the Baltimore "Patriot." He died in Baltimore, Md., in 18—.

WOODWARD, Joseph Janvier, surgeon, was born in Philadelphia, Pa., Oct. 30, 1833. He was educated at the Philadelphia Central High School, and received from it the degrees of A. B. and A. M., the latter in 1855, when he was graduated with the valedictory. Meanwhile he had begun the study of medicine, and in 1853 was graduated at the medical school of the University of Pennsylvania. Practicing in his native city, he also gave private instruction in the use of the microscope and in pathological histology, and was a prominent member of the Pathological Society. At this time he aided in carrying on a quiz class in connection with the course of instruction in the University of Pennsylvania. He was demonstrator in operative surgery at the University, clinical surgical assistant, and finally had charge of the surgical clinic. At the outbreak of the civil war he entered the army as assistant surgeon, and after serving with the army of the Potomac, was assigned to duty in the surgeon-general's office at Washington, as chief assistant, with rank of lieutenant-colonel. On July 28, 1866, he was commissioned captain and assistant surgeon, and on June 26, 1876, surgeon, with the rank of major. He remained in the surgeon-general's office until his death. In connection with Dr. John H. Brinton, of Philadelphia, he collected materials for a "Medical and Surgical History of the War of the Rebellion," and for a military medical museum. At the end of the war he took charge of the pension division of the surgeon-general's office, of the medical collection of the Army Medical Museum, and of the preparation of the medical portion of the "History," which appeared in 1870 and 1879, constituting Vol. I. He also conducted experiments in photo-micrography, assisted by Dr. Edward Curtis, U. S. army, and published a series of reports, with photographs, on the application of photo-micrography to test objects and to histological work. Among other publications are: "Contributions to Pathological Histology" ("American Journal of Medical Science," 1859); "Outlines of the Chief Camp Diseases of the United States Armies" (1863); "On Photo-micrography With the Highest Powers, as Practiced in the Army Medical Museum" ("American Journal of Science and Arts," 1866); "Report on Medical Literature" ("Transactions of the American Medical Associa-

tion," 1870); "Structure of Cancerous Tumors" ("Smithsonian Miscellaneous Collections," 1873); "Typho-malarial Fever: Is It a Special Type of Fever?" ("Transactions of International Medical Congress," 1876); "Official Record of the Post-mortem Examination of the Body of Pres. James A. Garfield" ("American Journal of Medical Science," 1881). Dr. Woodward was elected a member of the National Academy of Sciences; at the time of his death he was a member and ex-president of the American Medical Association and the Washington Philosophical Society; a member of the Association for the Advancement of Science; of the Academy of Natural Sciences of Philadelphia, and of the College of Physicians and Surgeons of Philadelphia, not to mention many other American and European learned bodies. Dr. Woodward was one of the surgeons who attended Pres. Garfield after he was shot, and the confinement and labor to which he was subjected brought on an illness which caused his own death, which occurred near Philadelphia, Aug. 17, 1884.

OLCOTT, Chancellor John (Chauncey Olcott), actor, was born in Buffalo, N. Y., July 21, 1859, son of Mellen Whitney and Margaret M. (Dowley) Olcott. He was educated in the schools of Buffalo, but discontinued his studies at the age of thirteen, and at the age of nineteen began his professional life as a ballad singer with Benedict's minstrel troupe. He next formed an engagement with Haverley's minstrels, and accompanied them to Europe in 1882. On his return to the United States he went to San Francisco, as treasurer and manager of Emerson's minstrels and the Standard Theatre. Subsequently he joined John L. Conners's minstrels, and remained four years in the company. After that he joined Dezman Thompson in the "Old Homestead," playing the part of Frank Hopkins. He then joined the Duff Opera Co., and a year later McNeill's Opera Co., after which he went to London, and studied two years, also playing at the Criterion Theatre and the Prince of Wales' Theatre in comic opera. Among the characters in which he was especially successful were O'Franagan, the Irishman, in "Miss Helyett," which he essayed for the first time. In the latter rôle he achieved such popularity that Augustus Pitou heard of him, and engaged him to take the place of William J. Scanlan. Mr. Olcott made his appearance as a star at the Fourteenth Street Theatre, New York city, Oct. 15, 1893, and the crowded houses that greeted him night after night proved to Mr. Olcott that he had done wisely in making a speciality of Irish characters. He has produced a number of plays since that time, but his greatest successes have been won as Terence Dwyer in "Mavourneen; the title rôles in the "Irish Artist" and the "Minstrel of Clare," and as Gerald O'Carroll in "Sweet Misconduct." Mr. Olcott has made extensive tours as a star, and his popularity increases with the years. He has an attractive face, a winning personality, a sweet and well-trained voice, and decided gifts as an orator in his particular line. He is a member of the Players', Lambs and Dramatic clubs, of New York city, and of the Buffalo Club, of Buffalo. He is a devoted member of the Roman Catholic church. He is exceedingly fond of horses and dogs; his favorite pastime is horse-back riding, and at least one of his favorite dogs has figured in a play with his master. Mr. Olcott was married at Salem, Mass., Sept. 28, 1897, to Margaret, daughter of Martin and Margaret O'Donovan, of San Francisco.

SMITH, Edward Delafield, lawyer, was born at Rochester, N. Y., May 8, 1826. He was graduated at the New York University in 1846, and was the poet of his class, being considered the best writer and speaker. He began the study of law, being admitted to the bar in 1848, and in 1849 commenced

the practice of his profession. In 1851 he formed a partnership with Smith Child, and subsequently with Isaac P. Martin and Augustus F. Smith, his brother; he at once rose to prominence as a mercantile lawyer, and in 1861 was appointed district attorney and counsel of the United States for New York city, a position he held for four years. He was very successful in prosecuting cases for the government, among them that of the capitalists, Kohnstamm; Andrews, the leader of the New York rioters; the Park-hill murderers; and in many prosecutions for the suppression of the slave trade. From 1871 until 1875 he was corporation counsel of New York city, and was an active member of the Republican party. He was a man of culture and literary taste, was professor in the law department of New York University, and published reports and addresses upon trials. Mr. Smith was assistant attorney of the United States during the official terms of District-Attys Sedgwick, Roosevelt and Dickinson. Early in life he was married to a daughter of Rev. Dr. Gilbert Morgan, of Bradford Springs, N. C. He died at Shrewsbury, N. J., April 13, 1878.

DUNCAN, James, soldier, was born at Cornwall, Orange co., N. Y., Sept. 29, 1811, son of Robert and Judith (Farrist) Duncan. He was graduated at the U. S. Military Academy in 1831; was brevetted second lieutenant in the 3d artillery, and after serving for a year on garrison duty at Savannah, Ga., was appointed assistant professor of mathematics at the Military Academy, Relinquishing this position to engage in the Florida war, he was wounded at Outhlaocochie. In November, 1836, he was promoted first lieutenant, and in 1839 Hon. Joel R. Poinsett, secretary of war, selected him to join the camp of instruction at Trenton, N. J. After serving on frontier and garrison duty, he, in 1845, was promoted captain, and rendered conspicuous service during the Mexican war, taking part in the battles

James Duncan

of Palo Alto, Resaca de la Palma, Monterey, Cerro Gordo, Churubusco and Molino del Rey, in the assault on Chapultepec and in the capture of the city of Mexico. In less than ten months afterward he received the brevets of major, lieutenant colonel and colonel. He was inspector-general, with rank of colonel, for six months before his death, which occurred at Mobile, Ala., July 3, 1849. He never married.

RAQUET, Condy, merchant and author, was born in Philadelphia, Pa., Jan. 28, 1781, of French descent. He was graduated at the University of Pennsylvania, and, though he studied law, entered the counting house of a merchant, who, in 1804, sent him as supercargo to San Domingo, where he spent several months. On his return he published "A Short Account of the Present State of Affairs in San Domingo," and after another voyage, in 1805, another small volume, entitled "A Circumstantial Account of the Massacre in San Domingo." In the following year he established an independent business, which he conducted with success in Philadelphia, where he became one of the founders and managers of the Philadelphia Savings Fund, president of the Pennsylvania Life Annuity Co., and also of the Philadelphia chamber of commerce. He became a colonel during the war of 1812, and took active measures for defending the city of Philadelphia

against an expected attack by the British fleet. In 1845 he was a member of the assembly, and afterward served in the state senate. He became U. S. consul at Rio Janeiro in 1832, negotiated a commercial treaty with Brazil, and was appointed first chargé d'affaires to that country in 1835. Returning to the United States in 1827, he became editor of several free-trade journals, and contributed numerous articles on free trade to the "Portfolio" and various other periodicals. A treatise "On Currency and Banking," published by him in 1839, was republished in London during the same year, and in Paris, in the French tongue, a year later. Besides the works mentioned, he wrote, "An Inquiry into the Causes of the Present State of the Circulating Medium of the United States" (1815); the "Principles of Free Trade" (1835), and edited the following, each in two volumes: "The Free Trade Advocate" (1829); the "Examiner" (1834-35); the "Financial Register" (1837-39). The degree of LL. D. was conferred upon him by St. Mary's College, Baltimore. He died in Philadelphia, March 22, 1842.

AYLESWORTH, Barton O., educator, was born at Athens, Menard co., Ill., Sept. 5, 1860, son of Ezra and Malinda (Hall) Aylesworth. His early education was received in the public schools, and then entering Eureka College, Illinois, he was graduated A. B. in 1879. Going then for a post-graduate course to Bethany College,

West Virginia, he received the degree of A. M. in 1880. Having been ordained a minister of the Disciples church, he accepted a charge at Cedar Rapids, Ia., in 1885. He also filled pastorates at Peoria, Atlanta and Abingdon, Ill., until 1889, when he accepted the presidency of Drake University. Pres. Aylesworth's administration was characterized by a careful business management of all the departments. The teaching force was increased to fifty and the number of students exceeded 900. The president himself made a speciality of

German philosophy and literature; also gave special attention to American authors, and besides lecturing with success before his college classes, wrote frequently upon the subject of literature for the periodical press. He is author of "Thirteen" (1892); "Short Stories" (1895), and "Song and Fable" (1897). The honorary degree of LL. D. was conferred on him by Drake University in 1891. Pres. Aylesworth was married, in November, 1882, to Georgia L., daughter of James L. Shores, of Atlanta, Ill. They have two children. Since 1893 he has been much upon the lecture platform with sociological themes. In 1897 he accepted a call to the pastorate of the Central Church of Christ, Denver, Colo., and since 1899 he has been president of the State Agricultural College of Colorado.

DAY, Benjamin Franklin, naval officer, was born at Plymouth, O., Jan. 16, 1841, son of Benjamin P. and Prussia (King) Day. He was appointed to the Naval Academy in 1858, and was graduated as ensign in 1861. The following year he became lieutenant, serving on the steamer New London, of the west Gulf blockading squadron, and was wounded in a night engagement at Mine Winchester's plantation, on the Mississippi river, July 9, 1863. On this occasion his services were highly spoken of by his commanding officer, Lieut. Com. Perkins, in his report to Rear Adm. Farragut, as follows: "The conduct of Lieut. Day, my executive officer, deserves

particular attention, who, after being wounded in the head, remained at his post and rendered valuable service, encouraging the men by his bravery and coolness." He was then transferred to the steam frigate Colorado, and in 1864 to the steamer Saugus, of the north Atlantic blockading squadron. He was in the engagements with the Howlett house batteries in the James river in 1864, and took part in both attacks on Fort Fisher in 1865. In 1866-68 he was on the Pacific squadron in the Tuscarora, being commissioned lieutenant-commander July 25, 1866. Subsequently he served on the Contocook, 1868-69; Ticonderoga, 1871; Congress, 1872-73; on the receiving-ship New Hampshire, 1874-75, and commanded the Manhattan, of the north Atlantic station, 1876. He was commissioned commander Aug. 8, 1876, and commanded the naval force on the Rio Grande, 1877. He was attached to the navy yard at Norfolk, Va., in 1879-81, and was lighthouse inspector in 1881-84. He commanded the Mohican, of the Pacific station, in 1885-88, and was attached to the Boston navy yard in 1889-92. He was commissioned captain Nov. 5, 1891, and became a member of the naval examining board at the navy yard at Washington; was commissioned rear-admiral March 29, 1899; retired in that grade March 28, 1900. On Sept. 22, 1869, he was married to Flora, daughter of Hiram and Lucy (Clark) Baldwin, of Trumbull county, O. They have two sons.

GEER, George Jarvis, clergyman and author, was born at Waterbury, Conn., Feb. 24, 1821. He was graduated at Trinity College, Hartford, in 1842, and pursued his divinity studies at the General Theological Seminary, New York city, where he was graduated in 1845. He was admitted to the deaconate in Christ Church, Hartford, Conn., by Bishop Brownell, and became rector of Christ Church, Ballston Spa, N. Y., in September, 1845. He was ordained to the priesthood by Bishop Delancey in the church at Ballston Spa, N. Y., June 11, 1846. In 1852 he became associate rector of the Church of the Holy Apostles, New York city, and rector of St. Timothy's, New York, Oct. 22, 1857. Dr. Geer was a member of the general convention of 1874 from the diocese of New York; was first president of the Free Church Guild of New York; and in 1858 was appointed by the bishops, with Dr. Muhlenburg and Bishop Beidel, to revise and edit the "Tune Book of the Protestant Episcopal Church." He received the degree of S. T. D. from Columbia College in June, 1862, and that of D. D. from Union College, New York, in August, 1862. He published "The Conversion of St. Paul" (1871). Dr. Geer died in New York city, March 16, 1885.

REEDER, Charles, manufacturer, was born in Baltimore, Md., Oct. 31, 1817. His parents were natives of Pennsylvania, but removed to Baltimore in 1813, where his father established a manufactory of steam engines. The son attended private schools until he was fifteen, when he entered his father's workshop, employing his leisure hours in studying mathematics and mechanical philosophy with an accomplished mathematician, and in attending lectures at the University of Maryland. As a member of the firm of Charles Reeder & Sons, in 1837, he aided in the construction of several government vessels, among them the Natchez, built to run between New York city and Natchez, Miss., and the Isabel, which ran between Charleston and Havana, being first-class boats for that time. In 1838 the works were destroyed by fire and the rebuilding of them caused the firm financial embarrassment for several years. In partnership with his elder brother, Mr. Reeder restored the credit which the firm had formerly possessed, and when his brother withdrew in 1848, he conducted the business alone. The Reeder shops have sent out hundreds of engines for ocean,

George Jarvis Geer

bay and river steamers, and sustain a high rank for constructing efficient and durable machinery. Mr. Reeder in this way became interested in steamships, and in 1855 was an owner of the Tennessee, the first that cleared from Baltimore to a European port. He was a director in banking and other establishments, and was the author of "Caloric, or a Review of the Dynamic Theory of Heat," published in Baltimore in 1887. He was married in October, 1838, to Frances Ann, daughter of Peter and Francis Sherlock. They had seven children. Mr. Reeder died in Baltimore, Dec. 1, 1900.

JACKSON, John Jay, jurist, was born in Parkersburg, W. Va., August 4, 1824, eldest son of John Jay and Emma G. (Beeson) Jackson. The first of the family in America was John Jackson, a native of Ireland, who settled in Calvert county, Md., about 1748, removing with his family to northwestern Virginia (now West Virginia) about 1768. His eldest son, George, was colonel of a regiment in the revolutionary army, and in 1788 was elected a member of the convention which ratified the Constitution of the United States, and he subsequently represented his district in the 4th, 6th and 7th congresses. His son, John G. Jackson, was the first district judge of the western district of Virginia, serving from 1819 until his death in 1825. John Jay Jackson, Sr. (1800-77), a graduate of West Point in 1818, served on the staff of Gen. Andrew Jackson, resigning in 1823. He was prosecuting attorney for twenty-five years for Wood county, and for five years was a member of the legislature from that county. The maternal grandfather of John Jay Jackson, Hon. Jacob Beeson, was commissioned by Pres. Monroe, in 1819, the first U. S. district attorney of the western district of Virginia, a position he filled until his death in 1823. Judge Jackson received his early education in private and common schools, and was graduated at Princeton in 1845. After studying law with his father he was admitted to the bar in 1846. In 1848 he was appointed the first prosecuting attorney for Wirt county, and the following year became prosecuting attorney for Ritchie county. He was a member of the Virginia legislature for four years (1851-54). He was an elector on the Whig ticket in the presidential elections of 1852, 1856 and 1860. In 1861 he was appointed by Pres. Lincoln to be judge of the U. S. district court for the western district of Virginia, and has discharged the duties of this office for forty years. Since his election to the bench Judge Jackson has taken no active part in politics. He was married, July 7, 1847, to Carrie C. Gline, of Parkersburg, and has two children, Lily Irene and Benjamin Vinton Jackson.

HENRY, William, inventor and member of congress, was born in Chester county, Pa., May 19, 1729, of Scotch-Irish ancestry, his grandparents having emigrated to America in 1722 and settled in Pennsylvania. When still a very young man he began to manufacture firearms at Lancaster, Pa., and when troops were being collected for Braddock's expedition he was appointed armorer and ordered to Virginia. In 1758 he was commissioned a justice of the peace; two years later visited England, and in 1771 was appointed one of the commissioners to examine into the practicability of opening communication between the Delaware and Ohio rivers for purposes of navigation or land carriage. In 1776 he was elected to the assembly, and in 1777 to the office of treasurer of Lancaster county, retaining the office until his death. He served during the revolution as commissary, and was a delegate from Pennsylvania to the Continental congress from 1784 to 1786, during the former year being commissioned president judge of the courts of common pleas and quarter

sessions of Lancaster county. A student of mechanics, he was a member of the American Philosophical Society, and became favorably known as an inventor. He invented the self-moving or sentinel register (1768); the screw auger (1771); a wheel carriage propelled by wind, and built so as to roll close against the wind (1785); and after his death drawings of a steam-propelled boat, dated 1779, were found among his papers. His son, William (b. 1757, d. 1827), was one of the pioneers of the iron industry in eastern Pennsylvania, and later became associate judge of the courts of Northampton county; while another son, John Joseph (1758-1811), was a soldier of the revolution, who afterwards studied law and became president judge of the second judicial district of Pennsylvania. This younger son was the author of "An Accurate and Interesting Account of Arnold's Campaign Against Quebec," published in 1812. He died at Lancaster, Pa., Dec. 15, 1786.

THOMPSON, Maurice, author, was born at Fairfield, Ind., Sept. 9, 1814, son of Grigg Matthew and Diantha (Jaeger) Thompson. His first American ancestor, Nicholas Thompson, settled at Flower de Hundred, Va., in 1623. His father, who was a preacher, removed to Kentucky soon after the birth of his son, and later settled near Calhoun, Ga., where the family continued to reside until the close of the civil war. From earliest childhood Maurice Thompson was educated by private tutors. His health being delicate, he almost lived in the open air, and thus gained his intimate acquaintance with nature. He was accustomed to say that he was educated "in the university of the wood." At the age of seventeen, he and his brother, Will, enlisted in the Confederate army, and served continuously until after the surrender of Gen. Lee. After the war he went to Florida, where he made long excursions into the Everglades, exploring Lake Okechobee and the Kissimmee river, with light fowling piece and a bow and arrows. His picturesque and unusual experiences there are described in his book, "The Witchery of Archery" (1878). Early in life he determined to adopt the profession of literature; but the war having left his father's family wrecked in fortune, he put aside this ambition for a time to take up the study of law. In 1868, with his brother, Will, he went to Crawfordsville, Ind., where he found employment as a civil engineer, and quickly rose to the position of chief engineer of a railroad, which was completed in three years. After some further engineering experience, building other railroads, bridges, etc., he opened a law office in Crawfordsville, and for a time was Gen. Lew Wallace's partner. In 1878 Mr. Thompson was elected to the legislature; in 1881 he was state geologist, and in 1888 was a delegate to the St. Louis convention which nominated Mr. Cleveland. In 1876 his magazine articles began to attract attention, and he resigned the office of state geologist. Soon after he accepted an editorial position with the New York "Independent," which he held until his death. His literary work, aside from books and editorial writing, consisted of short stories, published mostly in the "Century Magazine"; critical papers for "America," the "Independent," "Chautauquan," "Forum" and "North American Review"; light essays on natural history, which have been published in book form, and articles on athletic sports, hunting and angling, in all of which he was an expert. Mr. Thompson's home was at Crawfordsville, Ind., but he always spent his winters in the South—in Louisiana, Florida, or at his old home in Georgia.

Maurice Thompson

His other works are "Hoosier Mosies" (1875); "A Tallahassee Girl" (1882); "His Second Campaign" (1881); "Songs of Fair Weather" (1883); "At Love's Extremes" (1885); "A Banker of Bankersville" (1886); "By ways and Byw-notes" (1886); "Boy's Book of Sports" (1886); "Sylvan Secrets" (1887); "A Fortnight of Folly" (1888); "Story of Louisiana" (1889; new ed., 1901); "Poems" (1892); "The King of Honey Island" (1893); "Ethics of Literary Art" (1893); "Lincoln's Grave," poem (1894); "The Ocala Boy" (1895); "Stories of Indiana" (1898); "Stories of the Cherokee Hills" (1899); "Alice of Old Vincennes" (1900), and "A Winter Garden" (1900). With his brother, Will II., he wrote "How to Train in Archery" (1879). In a review of one of Thompson's books, Howells wrote: "The odor of the woods, pure and keen and clear, seems to strike up from his verse as directly as from the mould in the heart of the primeval poet; but it is as exquisite as if thrice distilled in some chemist's alembic; the last effect of his cunning in perfumes." Maurice Thompson ranks with the first of western writers in literary culture. He was a student of letters in the fullest sense, and deeply versed both in the art and the ethics of his calling. He was professedly an idealist, and one of the sturdiest champions of that school. His work always gave evidence of care and polish, but this never interfered with the strength of his thought. He was married at Crawfordsville, in 1868, to Alice, eldest daughter of Col. John Lee, whose sister was the wife of his brother, Will. He died at Crawfordsville, Ind., Feb. 15, 1901, survived by his wife, one son and two daughters.

THOMPSON, Will Henry, lawyer and poet, was born at Calhoun, Ga., March 10, 1848, son of Grigg M. and Diantha (Jaeggard) Thompson, and brother of Maurice Thompson, the author. His father was a minister of great influence in the Baptist denomination and an author of renown. His ancestors were conspicuously identified with colonial history, and eight distinguished themselves in the revolutionary war. He was educated at the Georgia Military Institute, and in 1863 enlisted in the Confederate 4th Georgia regiment, and served until he was disabled in 1865. In 1868 he removed to Crawfordsville, Ind., and with his brother, Maurice, served as civil engineer in railroad construction. He studied law under William H. Dalmeij at Calhoun, Ga., and was admitted to the bar of Indiana in 1872, beginning his practice in Crawfordsville. In June, 1889, he removed to Seattle, Wash., and in 1896 was

appointed counsel for the western division of the Great Northern Railway Co. As a corporation lawyer he has no superior on the Pacific coast. He is also a poet of note, and has written "High Tide at Gettysburg," one of the strongest of American ballads (1888), "Together Against the Stream" (1895), and "The Bond of Blood" (1899). They were all published in the "Century Magazine," and have been reprinted in historical works. In 1874 he was married to Edith, daughter of John Lee, of Crawfordsville, Ind., who is a direct descendant of "Light Horse" John Lee, a revolutionary war hero, and has

STONE, Amasa, philanthropist, was born at Charlton, Worcester co., Mass., April 27, 1818, son of Amasa and Esther (Boyden) Stone. He was descended in the seventh generation from Gregory Stone, an Englishman, who emigrated to this country from Ipswich in 1635. He was brought up on a farm, attending school in the winter months, and at seventeen years of age left home to engage in business with an elder brother. In 1839 he became associated with his brother-in-law, Mr. Howe, inventor of a truss bridge, in erecting a bridge across the Connecticut river at Springfield, Mass., and about two years later he and Azariah Booddy, purchasing Howe's patent rights for the New England states, formed a company for the construction of railroads and railroad bridges. He made important improvements in the Howe bridge, and, while yet a young man, became known as the most eminent constructor in New England. In 1846 he dissolved partnership with Mr. Booddy and formed a company with Stillman Witt and Frederick Harbach for the construction of the Cleveland, Columbus and Cincinnati railroad from Cleveland to Columbus. This enterprise reflected credit on both the ability and courage of the contractors, as a great

part of the payment was made in the capital stock of the company, which was at that time of very doubtful value. Mr. Stone became superintendent of the road in 1850, and thereafter made his home in Cleveland. He also built a railroad from Cleveland to Erie, and continued to be superintendent of both roads as well as a director in the companies which owned them for many years. He was also president of the Cleveland, Painesville and Ashtabula railroad. In 1858 he contracted to build the Chicago and Milwaukee line, of which he was a prominent director, and was managing director of the Lake Shore railroad (1872-74). He was a director in four banks in Cleveland; president of a bank in Toledo; a director of the Western Union Telegraph Co.; president of the Mercer Iron and Coal Co., and constructed iron mills, woolen mills, car works and other manufacturing establishments. He designed and built the Union passenger depot in Cleveland, was one of the first men to design and build pivot bridges of long span, and was constantly introducing important improvements in the construction of railway cars, locomotives and all the appliances of the great transportation system of the country. He built and endowed a home for aged women and a school and home for destitute children. On condition that the Western Reserve College should remove from Hudson to Cleveland and call its classical department by the name of his son, who was drowned in 1865, Adelbert College, he endowed it with \$500,000, which was afterwards increased to \$600,000 by the family. His mind was remarkable for its grasp both of great and minute matters. In discussing the construction of a railroad he could compute mentally the probable expense of engineering and equipment amounting to millions of dollars. He was an enthusiastic supporter of Pres. Lincoln and his war policy, and on several occasions gave the wisest of counsel to the government. He was married, in 1832, to Julia A., daughter of John Barnes Gleason, of Warren, Mass. Their children were Adelbert Barnes Stone, Clara L., wife of John Hay, and Flora A., wife of Samuel Mather. He died May 11, 1883.

Amasa Stone

Will H. Thompson

MUNROE, Kirk, author, was born near Prairie du Chien, Wis., Sept. 15, 1836, son of Charles W. and Susan M. (Hall) Munroe. He is a direct descendant

Kirk Munroe

of the Munroes of Lexington, Mass. where, in 1775, his great-grandfather, Col. William Munroe, was orderly sergeant of Capt. Parker's minute-men, who faced the British on the common. Kirk Munroe was educated at Harvard as a civil engineer, and spent several years on the plains in the service of both the Northern and Southern Pacific railways. His "Letters from the Plains" being in demand for publication, his thoughts were thereby turned to literature, and returning to the East, he served an apprenticeship as reporter on the New York "Sun"; assistant editor of the New York "Times," and in 1879 became the first editor of "Harper's Young People," later "Harper's Round Table." In 1883 he was married to Mary, eldest daughter of Amelia E. Barr, the novelist, and removed to the extreme southern part of Florida, where he established a home among the Seminole Indians on Biscayne bay, and began the writing of books for boys. His first book, entitled "Wakulla," was published in 1886, since which time he has produced: "The Flamingo Feather" (1887); "Derrick Sterling" (1888); "Crystal Jack & Co." (1888); "Dory Mates" (1889); "Under Orders" (1889); "Camp Mates" (1890); "Prince Dusty" (1890); "Golden Days of '39" (1890); "Canoe Mates" (1891); "Coral Ship" (1891); "Raft Mates" (1892); "Cab and Caboose" (1892); "The Fur Seal's Tooth" (1893); "White Conquerors" (1893); "Snow-shoes and Sledges" (1894); "Big Cypress" (1894); "Rick Dale" (1895); "At War with Pontiac" (1895); "Through Swamp and Glade" (1896); "The Painted Desert" (1896); "The Ready Rangers" (1897); "With Crockett and Bowie" (1897); "The Copper Princess" (1898); "In Pirate Waters" (1898); "Forward, March" (1899); "Shine Terrell" (1899); "Under the Great Bear" (1900); "Brethren of the Coast" (1900), and "The Belt of Seven Towns" (1901). His work is thoroughly American, and while he has visited every state and territory in search of material, he has never found it necessary to go outside of his own country. His books, however, are published in England as well as here, and have quite as large a sale there as in the United States. Mr. Munroe has always been devoted to out-of-door sports; was one of the first riders of the bicycle in this country, and is known among all wheelmen as the founder of the League of American Wheelmen, the first general meeting of wheelmen having been called at his invitation, as president of the New York Bicycle Club, on May 30, 1880. He is also an ardent canoe man; was for several years commander of the New York Canoe Club, and made alone, in 1882, an extensive expedition to the Florida everglades and Lake Okechobee in the cedar sailing canoe. "Psyche," fourteen feet long by twenty-eight inches wide. He has lived much among the Seminoles of Florida; is one of the few white men to whom they give their friendship, and is a recognized authority concerning the manners and customs of this little known people.

HENKLE, Eli James, physician and congressman, was born in Baltimore, Md., Nov. 4, 1828. He received an academic education, and after teaching school for three years took up the study of medicine, and received the degree of M.D. from the University of Maryland in 1850. He became professor of

anatomy, physiology and hygiene in the Maryland Agricultural College. In 1863 he was elected to the Maryland house of delegates, in 1866 he was a member of the state senate, and again in 1867-70. He was again elected to the house of delegates in 1871; in 1873 he became a member of the 41th congress, as a Democrat, and served on the committee on the District of Columbia. He was re-elected to the 45th and 46th congresses from the same district, receiving a majority of 2,731 votes over the Republican candidate, and served on the committees on the District of Columbia and the militia.

ISAACS, Samuel Myer, clergyman, was born in Leeuwarden, Holland, Jan. 4, 1801, son of a banker, who, being greatly impoverished by the French war, emigrated to London with his family in 1814. For some years the son was at the head of a charitable and educational institution there until 1839, when he accepted a call to the ministry of the old Elm Street Synagogue (Bnai Jeshurun) in New York city. So little was known at that time of the old Jewish beliefs that large audiences of different denominations flocked to listen to his preaching, which was characterized by much learning, earnestness and eloquence. His activity was not confined to his own synagogue, but extended over the entire community, while his services were frequently enlisted to dedicate synagogues throughout the country, English-speaking rabbis then being few in number. In 1857 he founded "The Jewish Messenger," an organ of American Judaism, and he was instrumental in establishing the Hebrew free schools, Mt. Sinai Hospital and other institutions. He was a life-long friend of Sir Moses Montefiore. In 1845 the Congregation Shaaray Tefila, or Gates of Prayer, was formed, with Rev. S. M. Isaacs as its minister, first holding its services in Franklin street, near Broadway, and in 1846 building a new synagogue in Wooster street, near Prince. Following the up-town tendency, their third place of worship was established in a building at the corner of Thirty-sixth street and Broadway, where they remained until their synagogue on West Forty-fourth street was completed, which was considered one of the finest places of worship in the city, and was consecrated with imposing ceremonial May 11, 1869. Mr. Isaacs was regarded as the father of the old Jewish school in the United States, which had steadfastly resisted the movements of the radicals and the innovations in the service of the synagogue. He was a man of great talent and force of character, and used his wide influence to preserve the traditional features of Judaism. He was logical, honest and fair in his utterances, and while emphatic, and sometimes even blunt, he was tender and sympathetic. His ability, sincerity and kindness made him widely esteemed, and his own congregation were united to him by the strongest ties of affection. At the Lincoln Memorial services in New York, April, 1869, he was chosen to represent the Jewish community. In 1830 he was married to Jane, daughter of Jacob Symmons, of London, England, who with three sons and three daughters survived him. He died in New York city, May 19, 1878.

HILLMAN, James, pioneer, was born in Northumberland county, Pa., Oct. 27, 1762. He served in the revolutionary war under Gen. Harnar, and then moved West with his father, living for a time on the

Sir Moses Montefiore

banks of the Ohio river, three miles below Pittsburgh, about 1786, where he was engaged as a pack-horse-man, making long journeys to carry provisions and to trade with the Indians. In 1797 he met John Young, a native of New Hampshire and a farmer, who had purchased land from the Connecticut Land Co., and began a settlement, which he named Youngstown. Hillman purchased a farm of sixty acres from Mr. Young, on the west side of the river, where he built the first frame house in the township. He removed back to the village in 1808, and kept a tavern in a log house, which is still standing in Youngstown. He served in the war of 1812 as a wagon master, after which he returned to Youngstown to reside. He was shrewd, active, industrious and kind-hearted. He was appointed constable of Youngtown in August, 1800, and was frequently elected township trustee. In 1806 he became sheriff of Trumbull county, and subsequently was a lieutenant-colonel in the Ohio militia. In 1814 he was elected to the state legislature, and in 1825 became justice of the peace, a position he held for a number of years. He was married, but left no children. He died at Youngstown, O., Nov. 12, 1848.

SHOEMAKER, Samuel Moor, express manager, was born at Bayon la Fourche, La., June 28, 1821, son of Samuel and Sally (Falls) Shoemaker. His earliest American ancestor was George Shoemaker, who with two brothers came from Germany in 1686, and was one of the founders of Germantown, Pa. Benjamin, the grandson of George, was mayor of Philadelphia in 1743 and 1751, and his son, Samuel, was mayor in 1769 and 1771. This Samuel was a friend and patron of Benjamin West, the painter, and a man of great influence in the colony, although he lost most of his property during the revolutionary war. His great-grandson is the subject of this sketch. Samuel M. Shoemaker was educated at Lafayette College, Pennsylvania, and began his business career as a clerk in a counting room. Later he was agent of the Rappahannock Steam Packet Co., and when the Ericsson line of steamers

between Baltimore and Philadelphia was established in 1841, he was made agent of this line also. He showed unusual energy in managing the forwarding part of the business of these lines, and in 1843 E. S. Sanford, then agent of the Adams & Co. express at Philadelphia, invited Mr. Shoemaker to unite with him in establishing an express line between that city and Baltimore, and under the name of the Adams & Co. express the Sanford and Shoemaker line was opened. His career covers almost the entire history of the Adams Express Co., which owes its success largely to his enterprise. The new line was extended to various points of the South and West, until the business grew to colossal proportions. In 1854 the company united with other express lines between Boston and Philadelphia, resulting in the formation of one great company, organized under the laws of New York state as the Adams Express Co. Mr. Shoemaker was one of the principal managers of this new company, and later was elected vice president. He was also largely interested in various railroads, transportation, banking and manufacturing enterprises in Maryland, Pennsylvania, and the southern states, and it is to him that the later development of Old Point Comfort as a resort was due. Notwithstanding his many business enterprises he always took a deep interest in politics. He was married, Dec. 28, 1856, to Anna C., daughter of John B. F. ... of the coast of ...

of Maryland. He died at the Hygeia Hotel, Old Point Comfort, Va., June 1, 1884.

WALKER, John Grimes, naval officer, was born at Hillsboro, N. H., March 20, 1835, son of Alden and Susan (Grimes) Walker. He was appointed from Iowa to the U. S. Naval Academy in 1856, was graduated at the head of his class in 1856, was attached to the sloop-of-war Portsmouth, of the Pacific station; was promoted as master Jan. 22, 1858; served on the Falmouth 1856-57, and on the St. Lawrence 1858-59. On Jan. 23, 1858, he was commissioned lieutenant; served at the Naval Academy, 1853-60, as instructor in mathematics; on the Susquehanna 1860-61; on the Connecticut in 1861, and on the gunboat Winona in 1861-62, under Farragut, participating in the engagements of Forts Jackson and St. Philip; also in the capture of New Orleans, and was engaged for two years in every action on the Mississippi. He was selected by Porter for service in his command, and while in command of the ironclad Baron de Kalb he displayed qualifications which brought him to the attention of the commander-in-chief and of the navy department. He commanded the Baron de Kalb in both attacks on Vicksburg (1862-63), in two attacks on Haines' bluff, and in the engagement at Arkansas post, where he performed such valuable service (his vessel being first in action) that Comr.-in-Chief Porter reported him for gallantry. In the Yazoo pass expedition the Baron de Kalb, under Walker, did herculean work at Fort Pemberton, the capture of Yazoo city, clearing obstructions, and in the destruction of the Confederate steamers carrying cotton and munitions of war. He commanded the gunboats Saco and Shawmut, 1864-65; was present at the bombardment of Forts Anderson and Caswell, on Cape Fear river, and at the capture of Wilmington, N. C., after the surrender of Fort Fisher. In 1866 he was specially promoted to commander, and was in the service of the Naval Academy as assistant superintendent in 1866-69; took the Sabine (1869-70) on a cruise to Europe with a class of midshipmen; was secretary of the lighthouse board 1873-78. He was appointed chief of the bureau of navigation in 1881, and during eight years was chief professional adviser to the secretary of the navy. In 1889, having reached the grade of commodore, he was appointed an acting rear-admiral, in command of the White squadron (the Chicago being his flagship), visiting Europe and South America. He was detached from the command of the squadron in 1893. In 1894 he was appointed commander-in-chief of the Pacific squadron, and hurried to Honolulu to keep the peace and protect American interests at a time when serious troubles were threatened. He was successful, and his conduct was highly approved by the people of the United States. Upon his return he was appointed chairman of the lighthouse board, a post which only a strong man was capable of filling. In 1896, in addition to his duties as chairman of the lighthouse board, he was appointed chairman of the deep water harbor board to locate a deep water harbor to be constructed by the United States in Southern California. According to the requirements of law, he was retired in 1897, at the age of sixty-two, having received his commission as rear-admiral in 1894. He was appointed president of the Nicaragua canal commissioners in 1897 (Report of Nicaragua canal commission, 1897-99), and in 1899 president of the isthmian canal commission to investigate and report upon all practicable routes for a canal across the American isthmus, work now in progress, and it is to his inestimable services that the government is indebted for its present progress (1901)—a service which can not be fully appreciated by his countrymen, as it will never be thoroughly known. He is a member of the Metropolitan Club, of Washington, and the University Club, of New

York. In September, 1866, he was married to Rebecca White, daughter of Henry White Pickering, of Boston, Mass. They have five children.

HORWITZ, Phineas Jonathan, medical director U. S. navy, was born in Baltimore, March 3, 1822, son of Dr. Jonathan and Debby (Andrews) Horwitz, of that city. His father attained great distinction as a fine classical scholar, a profound thinker and eloquent lecturer. He studied medicine under Prof. Nathan R. Smith, and after graduating at the University of Maryland, in 1841, continued his medical studies at the Jefferson Medical College, Philadelphia. He entered the U. S. navy in 1847, as assistant surgeon, and was assigned to duty on board the frigate Cumberland, and afterwards placed in charge of the Naval Hospital at Frontera de Tobacco during the Mexican war. He served on the Constitution in 1849-51; in the Brazil squadron in 1852; on the Princeton in 1854; on the store-ship Supply, African station in 1858-59. In 1859 he was made assistant chief of the bureau of medicine and surgery in the navy department, and, owing to the feeble health of the surgeon-general, the labors of the bureau fell almost entirely on Dr. Horwitz during the trying time of the civil war. His position involved voluminous correspondence; the adjustment of pensions accruing to the wounded, or to the widows or orphans of the killed in the navy; the supplying of surgeons, apothecaries, nurses, medicines, and the general management of all financial matters pertaining to the office. These duties were discharged with such noted efficiency as to win the unanimous approval of congress and of the executive branch of the government, so that upon the death of his predecessor he was at once appointed to the office, without application on his part, and with the approbation of all. On March 3, 1871, he was promoted to medical inspector, and on June 30, 1873, he was made medical director, stationed at Philadelphia. From 1877 until 1883 he had charge of the Naval Asylum in Philadelphia, and in the year following he was president of the examining board. In 1854 he was married to Caroline Norris, who died in 1877. He had seven sons and two daughters.

McAULEY, Jerry, rescue missionary, was born in Kerry, Ireland, about 1840. His father was a counterfeiter, who left home to escape arrest before the son was old enough to know him. He was never given any schooling, but was allowed to grow up in idleness and crime, and at the age of thirteen he was sent to New York city to be cared for by a relative. Shortly after, he joined a small band of river thieves, becoming a terror and nuisance in the streets of the then notorious 4th ward. Guilty of many crimes, at the age of nineteen he was arrested on a charge of highway robbery, and, although innocent of this particular crime, he was found guilty, and sentenced to fifteen and a half years in prison. During his incarceration at Sing Sing he was converted, principally through the ministry of one Orville Gardner, an ex-prize fighter. McAuley's innocence having been proved to the satisfaction of Gov. Dix, he was pardoned in 1861 and restored to citizenship; but, finding no friends to encourage him in right-doing, he fell into the old ways again. He finally became influenced by a missionary, and, although he fell several times in the interim, at last he gained a permanent foothold for good, and obtained honest employment. In October, 1872, he started the now famous Jerry McAuley Water Street Mission in a small building at 316 Water street, nearly under the Brooklyn bridge, where thousands of unfortunate men and women have been lifted from lives of drunkenness, vice and crime, and restored to decency and to society. Here the criminal

and the outcast are sheltered, fed, clothed, if need be, and put to work at something. They are not questioned, and no promises are exacted. There are no rules to observe except the one rule of order. They are not lectured on their past, nor exhorted to lead a better life in the future, and, although it is essentially a religious institution, religion is not forced upon them. They are neither watched nor suspected, but they are merely treated like brothers and sisters, and they meet with unvarying kindness on every hand. Whatever may be their wrong doing there is no word of reproof or scolding, only welcome and kindness, until at last they learn that in the McAuley Mission there is a stock of love and patience not to be exhausted, and this has been the secret of its success. In the end, the tough heart of the criminal is finally broken by the principle of love, and he becomes a practical, earnest, Christian man. S. H. Hadley, the superintendent in 1900, who himself was a redeemed drunkard, wrote: "We get men from all parts of the world, men in every condition of misery and wretchedness. Our sovereign remedy is divine love, born in us from the great heart of our dear Redeemer. All who work here come in physical, mental and moral wrecks. We love the drunkard because he is a drunkard, and because nobody else does love him. All the policemen know us and our work, and often bring men here whom they would otherwise have to arrest." McAuley was so successful in his work that, in

January, 1882, he opened the Cremorne McAuley Mission on Thirty second street, near Sixth avenue, where he and his faithful wife continued to labor. In 1872 he was married to Maria, daughter of Michael Fahy, of Crag-e Clair, Ireland. She continued at the head of the Cremorne Mission until 1892, when she resigned on account of ill-health, and shortly afterwards was married to Bradford L. Gilbert, a prominent architect, of New York city, and a trustee of the mission. McAuley's work is considered the pioneer in its chosen field, and converts of this mission have been the means of establishing similar institutions in many other cities. He died in New York city, Oct. 18, 1884.

DICKSON, John, congressman, was born at Keene, N. H., in 1783. He was graduated at Middlebury College in 1808, and supported himself by teaching mathematics and languages while reading law at Wilton, N. Y., where he was admitted to the bar in 1812. He practiced his profession at Bloomfield, 1813-25, Rochester, 1825-28, and then returned to Bloomfield. He was a member of the assembly, 1829-30, and a representative in congress, 1831-35. He was greatly esteemed for the honesty of his conduct and opinions, and is credited with having delivered the "first important anti-slavery speech ever made in congress." He published, "Remarks on the Presentation of Several Petitions for the Abolition of Slavery and the Slave Trade in the District of Columbia" (1835). He died at Bloomfield, N. Y., Feb. 22, 1852.

EMERSON, George Barrell, author and educator, was born at Wells, Me., Sept. 12, 1797, son of Samuel and Olive (Barrell) Emerson. Mr. Emerson's earliest American ancestor was Thomas Emerson. His father, who was a practicing physician in Wells and Kennebunk, Me., was born in September, 1764, and died in August, 1851. His mother, a daughter of Nathaniel and Sarah (Stuyward) Barrell, of York, Me., was born in February, 1768, and died in June, 1841. Mr. Emerson was graduated at Harvard College in the class of 1817, having taught school during the vacations to pay his expenses. Soon after his graduation he taught school in Lancaster, Mass. In 1821-23 he was principal of the English Classical School for Boys in Boston. Having declined the professorship of mathematics in Harvard, he opened a school for girls in Boston in 1823, and conducted it until 1856, when he retired from professional life. In 1859 he received the degree of LL.D. from Harvard College. He assisted in organizing the Boston Society of Natural History, of which he became president in 1837, and was instrumental in getting the legislature to authorize the geological survey of the state, and took charge, with Dr. Dewey, of the botanical department of the survey, under appointment of Gov. Everett. Mr. Emerson was also president of the American Institute of Education, and aided in securing the establishment of the state board of education. He passed

forty years of his life in teaching, thirty-four of which were spent in Boston. He wrote the second part of the "School and Schoolmaster," which appeared in 1842, of which the first part was written by Alonzo Potter, D.D., of New York. A copy of the work was placed in every school in the states of New York and Massachusetts. He was also the author of several lectures on education and a contributor to various periodicals. By order of the legislature, he published a report on "The Trees and Shrubs Growing Naturally in the Forests of Massachusetts," in 1846, and it still holds its place as an authority; a "Manual of Agriculture," in 1861,

and for private circulation "Reminiscences of an Old Teacher," in 1878. In May, 1824, Mr. Emerson was married to Olivia, daughter of Rev. Joseph Buckminster, of Portsmouth, N. H., and had four children. The sons all died unmarried. His wife died in July, 1832, and in November, 1834, he was married to Mary, widow of John W. C. Fleming and daughter of William Rotch, of New Bedford, Mass. Mr. Emerson was a member of the Unitarian church, and was for many years an active member of King's Chapel, Boston. He died in Newton, Mass., March 14, 1881.

EMERSON, Joseph, educator, was born at Norfolk, Conn., May 28, 1821, son of Ralph and Eliza (Rockwell) Emerson. His father was an honored professor of Andover Theological Seminary for a quarter of a century, and the family kinship includes many notable persons of the Emerson name. Joseph Emerson was graduated at Yale in 1841. In college he was an editor of the "Yale Literary Magazine," a member of the Skull and Bones and other societies. After graduation he taught school for a time in New London, Conn., finally entering Andover Theological Seminary where he spent two years in study. In 1848 he consented to help start Beloit College, Beloit, Wis., and assumed his duties May 24th of the same year. Having at the outset most of the work of instruction, he was able gradually to finish his field until, through the development of the faculty, he was appointed professor of

Greek, a department in which he was one of the greatest American teachers. The completion of his fortieth year of instruction was celebrated with a remarkable outpouring of enthusiasm from alumni, undergraduates and a host of friends. Prof. Emerson was made a D.D. by his alma mater in 1880, and an LL.D. by Beloit College in 1897. Although a busy schoolman, Prof. Emerson found time for literary production. In 1867 he published a "Volume of Lectures and Sermons," which embodies some of his unique and original thought upon Greek and Scripture themes. He contributed articles to the "Bibliotheca Sacra" and other magazines, editorials to leading newspapers, and was the author of many lectures, addresses and pamphlets on a variety of subjects. He was married, Sept. 7, 1852, to Mary C. North, by whom he had two children. She died in 1879. On July 9, 1884, he was married to Helen Frances Bruce, of Evanston, Ill. Prof. Emerson died at Beloit, Aug. 4, 1900.

KEESE, William Linn, author, was born in New York city, Feb. 25, 1835, son of John Keese, a famous bookseller, wit and literateur, and Elizabeth Willets Keese, his wife. His father (b. Nov. 24, 1805; d. May 30, 1856) was a native of New York. He edited a number of works, including the "Poets of America" and "The Forest Legendary," and furnished the greater part of the text for "North American Scenery" (1845). He also contributed verse to various periodicals. At the time of his death he was appraiser of books in the New York custom house. His paternal grandfather was William Keese, a lawyer of reputation, and son of John Keese, a distinguished officer in the revolutionary army. His maternal great-grandfather was Rev. William Linn, an eminent divine of the eighteenth century, who had the honor of being chosen to deliver the oration on the death of Washington before the Society of the Cincinnati, an organization of which W. L. Keese is a member by right of descent from this ancestor. He received his education in private schools, and subsequently entered the book business under his father, but engaged in the hardware business in the early fifties with Willets & Co., where he continued for thirty years. His literary tastes at the same time developed and found expression in sundry compositions of prose and verse. He has also appeared before the public as a lecturer on literary themes. His published works are: "John Keese, Wit and Literateur" (1883); "William E. Burton, Author and Manager" (1886); "William E. Burton: A Sketch of His Career Other than that of Actor" (1891). He has also contributed articles to "Actors and Actresses of Great Britain and the United States" (5 vols., New York, 1886). Mr. Keese is a member of the Protestant Episcopal church. He was married, Oct. 4, 1864, to Helen K., daughter of Henry Thorne. His home is in the borough of Brooklyn.

SAUNDERS, Daniel, manufacturer and founder of Lawrence, Mass., was born in Salem, N. H., June 20, 1796, son of James and Elizabeth (Little) Saunders, and a descendant of Henry Saunders, an early settler of Haverhill, Mass. About 1820 he began the manufacture of wooden goods in North Andover, Mass.; subsequently he removed to Concord, N. H. In 1832 his attention was attracted to the enormous water power of the Merrimac river in and about Peter's and Bodwell's falls and the opportunities for developing a great manufacturing town. He made personal surveys that demonstrated the practicability of securing the full power of these rapids by building a permanent dam at the lowest falls. Selling his mills, he set about purchasing the lands necessary to control this water power. Upon the advice of his nephew, Hon. Josiah G. Abbott,

Geo. B. Emerson

of Lowell, Mass., he brought the matter to the attention of the manufacturers and capitalists of Lowell, among whom was Samuel Lawrence. The utility and value of the falls having been demonstrated, the Merrimac River Water Power Association was formed in 1841, comprising Daniel Saunders, manager; Daniel Saunders, Jr., Judge Hopkinson, Samuel Lawrence, John Nesmith, Nathaniel Stevens, Jonathan Tyler and Josiah G. Abbott, and the site of the city of Lawrence was purchased, including the land previously purchased by Mr. Saunders, for which he only asked the price he had originally paid, with simple interest added. The city was named after Samuel Lawrence, mentioned above. In 1821 he was married to Phebe Foxcroft, daughter of Caleb Abbott, who served with distinction in the revolutionary army. They had three sons: Daniel, a prominent attorney, member of the state senate and house of representatives, and mayor of Lawrence in 1860; Charles W. and Caleb, who was also mayor of Lawrence. Mr. Saunders died in Lawrence, Mass., Oct. 8, 1872.

TOWNSEND, Mary Ashley (Van Voorhis), poet, was born at Lyons, Wayne co., N. Y., in 1832, but removed in early youth to New Orleans, La., where she grew up a staunch Southerner in sentiment. She began writing stories and verse in her school days, her first publications consisting of short stories, which appeared in the Southern press under the pseudonym "Xariffa." These were followed by a series of humorous articles, entitled "Quillotypes," contributed to the New Orleans "Delta," which won such praise from the local critics that the young authoress was encouraged to continue her literary labors in a more ambitious way. She accordingly published, in 1859, a novel, entitled "The Brother Clerks: A Tale of New Orleans." She is best known, however, through her poetical works, which appeared with the titles: "A Georgia Volunteer" (1870); "Xariffa's Poems" (1870); "The Captain's Story: A Dramatic Poem" (1874); "Down the Bayou, and Other Poems" (1882), and "Distaff and Spindle," sonnets (1895). Her famous "Creed," which was published first in the New Orleans "Picayune," in 1869, John G. Saxe pronounced one of the finest poems in the English language. Of her work the "Critic" has said: "She has among other merits a quick perception of natural beauties and of their relation to the world of thought. To this she adds the grace of being able to show you what she herself sees with a delicate and skillful tact." Mrs. Townsend's merit as a poet has made her the recipient of repeated honors, conferred upon her by her fellow citizens. In 1884 she was requested to write a poem to be delivered at the opening of the New Orleans exposition, and in 1887 she was again officially called upon to deliver an original poem at the unveiling of the statue of Gen. Albert Sidney Johnston. She became deeply interested in Mexico, and made repeated visits to that country; she was a member of the Liceo Hidalgo, the leading literary club of the city of Mexico. The results of her observations have been embodied in a work on that country. Her husband, Gideon Townsend, is a banker and a prominent business man in New Orleans. They have three daughters, one of whom is married to the son of Edwin M. Stanton.

LOWRY, Reigart B., naval officer, was born in South America, July 14, 1826. He was appointed from Pennsylvania as midshipman Jan. 21, 1840; was promoted passed midshipman in 1846, and was attached to the home squadron during the Mexican war. He was present at several engagements, and was slightly wounded at Tuxpan. He was promoted master in 1855, and commissioned lieutenant on Sept. 14th of that year, and was

stationed on the steam frigate Powhatan. He was on the Pawnee in 1861 in the first firing on Fort Sumter, and commanded the steamer Freeborn in an engagement at Matthias point on the Potomac river, and commanded the steamer Underwriter in Albemarle sound. He was executive officer of the steam sloop Brooklyn in the battles with the forts below New Orleans, and his commanding officer, Capt. Thomas T. Craven, spoke of him as follows: "I have to congratulate myself on being so ably assisted by my executive officer, Lieut. R. B. Lowry. He was everywhere, inspiring both officers and crew with his own zeal and gallantry." He was engaged in the first attack upon Vicksburg, and commanded the steamer Scioto during the engagement at Donaldsonville between that vessel and a Confederate force of 900 men, Oct. 5, 1862. He was commissioned lieutenant-commander July 16, 1862, commanded the apprentice ship Sabine in 1864-68. He was commissioned commander July 25, 1866, and captain Nov. 2, 1871. He commanded the steam sloop Canandaigua on the north Atlantic station; was at the naval station, New London, Conn., 1875-77, and was commissioned commodore in 1880. He died March 25, 1880.

SWASEY, Ambrose, telescope builder, was born at Exeter, N. H., Dec. 19, 1816, son of Nathaniel and Abigail Chesley (Peavey) Swasey. His early education was acquired at Exeter, where he early learned the machinist's trade. In 1870 he went to Hartford, Conn., and entered the employ of the Pratt & Whitney Co. He paid special attention to the subject of gearing, and devised and perfected the epicycloidal milling machine for producing true theoretical curves from which cutters for gear teeth are made, and invented a new gear cutting engine for generating and at the same time cutting the teeth of spur gears, the process being a practical solution of a well-known theory of the interchange system of gear wheels. He went to Cleveland, O., in 1880, and entered into partnership with

Ambrose Swasey

Worcester R. Warner, under the firm name of Warner & Swasey, for the purpose of manufacturing machine tools and astronomical instruments. The first of the large telescopes which the new firm designed and constructed was the 36-inch of the Lick Observatory, which was erected during the winter of 1887-88 under Mr. Swasey's personal supervision. Up to that time it not only was the largest refracting telescope, but was the first to be adapted to the triple purposes of visual, photographic and spectroscopic work. The instrument proved to be so satisfactory that the government commissioned this firm to construct a mounting similar in design for the 26-inch of the U. S. Naval Observatory, and later they were intrusted with the task of making the 40-inch telescope, as well as the 90 foot dome and the 75-foot elevating floor, for the Yerkes Observatory, Williams bay, Wis. The construction of a dividing engine for automatically graduating circles requiring the greatest accuracy, such as are necessary for astronomical instruments, is another problem which Mr. Swasey has recently successfully solved; and the most severe tests show that the greatest errors of this engine are less than one second of an arc. Having traveled extensively at home and abroad, he has become familiar with ancient as well as modern engineering, in which he is especially interested. He is a man of genial nature and broad culture, and has

held many positions of trust in the business world. He is past president of the Civil Engineers' Club of Cleveland; member of the American Society of Mechanical Engineers; the Institution of Mechanical Engineers of Great Britain; the British Astronomical Society, and a fellow of the Royal Astronomical Society. In 1900 he received the decoration of the Legion of Honor from the French government. He was married at Hampton, N. H., Oct. 24, 1871, to Lavinia D., daughter of David and Sarah Ann (Dearborn) Marston.

NEWELL, Robert Henry, author and journalist, was born in New York city, Dec. 13, 1836, son of Robert and Anne (Lawrence) Newell, of Welsh and English stock. His maternal grandfather, Thomas Lawrence, was a native of England, and emigrating with his wife and child, settled at Springfield, N. J., where he established a paper mill and conducted a successful business. His father (1803-54) was a native of Newburgh, N. Y., and settling in New York city at an early age, became associated with two brothers named Day, under the name of Day & Newell, for the manufacture of locks. He was the inventor and patentee of the Paratopic bank lock, the distinctive feature of which was a key permitting unlimited combinations to which the lock readily adjusted itself, so that it could be

changed daily if desired. Robert Newell also perfected the first practical sewing-machine, which antedated the Howe machine several years. He was awarded a gold medal at the World's fair of London (1851) and at the World's fair of Vienna. Robert H. Newell was educated in a private school of New York city, and was preparing for college when the death of his father, in 1854, compelled a change of plans. In 1859 he began writing for the press, and within two or three months he was offered and accepted the assistant editorship of the

New York "Sunday Mercury," then one of New York's largest papers. To it he began contributing his famous "Orpheus C. Kerr" (office seeker) papers, which were subsequently published in book form. He was forced by the popularity of these papers to publish four consecutive volumes in as many years (1861-64). In 1863 he severed his connection with the "Mercury," and, after a year traveling in California for his health, he returned to New York to accept an editorship on the New York "World," writing mainly on social and literary subjects. He retained this connection for a year and a half, when he made a change to the staff of the New York "Daily Graphic," following the step taken by the managing editor of the "World." While with this paper the "Health and Home" was purchased by the Graphic Co., and made the weekly edition of the regular paper, under the editorship of Mr. Newell. The "Health and Home" was also changed to an illustrated paper, which was considered a bold undertaking in those days. In 1876 Mr. Newell retired from the staff of the New York "Graphic," in order to devote himself exclusively to the preparation of a two-volume novel, entitled "Diaböschel." But after about a month's work, and just as his first volume was made up he was afflicted with letter-blindness. He then resumed work, which he never recovered from. He died at New York, June 15, 1901. He was once a member of the "Society for the Improvement of the Idea of

putting forward the opposite of the Darwinian theory regarding the anthropoid apes; "Avery Glibun" (1867); "The Palace Beautiful," his first volume of poetry (1865); "The Cloven Foot," an adaptation of "The Mystery of Edwin Drood" to American characters (1870); "Versatilities," poems (1871); "The Walking Doll," a humorous novel of New York life (1872); "Studies in Stanzas" (1882). As a humorist he has won a distinct place among the writers of America. He distinguishes between "wit" and "humor" in the following apt expression: "Humor is the sunshine of the language, wit its lightning." In 1861 he was married to Adah I. Menken (1835-68), from whom he separated four years later. Her name was originally Dolores Adios Fuertes. She became a popular actress in the South, particularly in the play of "Mazepa," and she also published a volume of poems entitled "Infelicia." Her nom de plume was "Indigna." Mr. Newell died in his home in Brooklyn the first week in July, 1901.

DUER, John, jurist, was born in Albany, N. Y., Oct. 7, 1782, son of William and Catherine (Alexander) Duer. His father (1747-99), a native of England, became a delegate to the Continental congress, member of the New York legislature, and assistant secretary of the treasury, under Gov. Hamilton. His mother was the second daughter of Gen. William Alexander, a claimant to the Scottish earldom of Stirling. At the age of sixteen he enlisted in the army, but after serving two years resigned, and took up the study of law. He was admitted to the bar, and began practice in Orange county, N. Y. In 1820 he removed to New York city, where he won considerable renown as an insurance lawyer. He was a delegate to the state constitutional convention in 1821, and was one of the commissioners to revise the statute laws of the state in 1825. In 1849 he was elected an associate judge of the superior court of New York, becoming chief-justice on the death of Judge Oakley, in 1857. He wrote "A Lecture on the Law of Representations in Marine Insurance" (1844); "A Treatise on the Law and Practice of Marine Insurance" (1845-46)—this work is still regarded as a standard authority in the United States on the subject; "A Discourse on the Life, Character and Services of James Kent, Chancellor of the State of New York" (1848); and, in connection with Benjamin F. Butler and John C. Spencer, "Three of the Revised Statutes of the State." At the time of his death he was editing "Duer's Reports of the Decisions of the Superior Court." He died at his home on Staten Island, Aug. 8, 1858.

PECK, Harry Thurston, educator and author, was born at Stamford, Conn., Nov. 24, 1856, son of Harry Peck, well known as an educator. To his father's side of the family belonged Aaron Burr, vice-president of the United States, and to his mother's Gen. Henry Dearborn, distinguished for his services in the war of the revolution and the war of 1812 and as secretary of war in 1801-09. He was educated chiefly at Columbia College, where he was graduated in 1881, and was an instructor in that institution until 1888, when, after a course of study at the University of Berlin, he succeeded Prof. Charles Short as professor of Latin. He has been secretary of the faculty of Columbia for a number of years, and represented the college at the celebration of the 300th anniversary of the founding of the University of Dublin in 1892. Since 1890 he has been editor-in-chief of the "International Cyclopaedia," and since 1895 editor of "The Bookman." He is also the literary editor of the "Commercial Advertiser." He has published "Ethics of the Marking System" (1886); "Seniitic Theory of Creation" (1887); an edition of Suetonius, with critical commentary (1889); "Manual of Latin Pronunciation" (1892); "Dictionary of Classical Literature and Au-

tiquities" (1896); "The Personal Equation," essays on various subjects (1897); "Trimalechio's Dinner" (1898); "Sandstone and Porphyry," verse (1900); a book of stories for children, and many miscellaneous papers and reviews. He also edited the "University Bulletin" (1891-95) and "Classical Studies" (1894). Prof. Peck is a member of the Royal Society of Canada; of the American Philological Society; of the Archeological Institute of America, and numerous other bodies, and is a trustee of the Columbia University Press. He was married in Brooklyn, N. Y., in 1882, to Nellie M. Dawbarn.

DEMING, Henry Champion, lawyer, was born at Colchester, Conn., May 23, 1815, son of Gen. David and Abigail (Champion) Deming, and grandson of Gen. Henry (Champion) who served in the battles of Bunker Hill, Long Island and Stony Point. He was graduated at Yale College in 1836, after which he studied law at the Harvard Law School, and was graduated there in 1839. He commenced the practice of his profession in New York city, but in 1847 removed to Hartford, Conn., where he remained the rest of his life. He held many prominent state offices, serving in the lower house of the legislature, 1849-50 and in 1850-61, and was a member of the state senate in 1851. He was mayor of Hartford in 1854-58 and also in 1860-62. In the civil war he became colonel of the 12th Connecticut volunteers, serving in Louisiana, his regiment being the first to reach New Orleans after Gen. Butler passed the forts. Col. Deming was on detached duty, acting as mayor of the city from October, 1862, until February, 1863. He then resigned, returning to Hartford, and was elected to congress, as a Republican, in 1863, serving for two terms. He was a member of the committee on military affairs and chairman of the committee on expenditures in the war department. In 1866 he was a delegate to the Loyalist's convention in Philadelphia, and from 1869 until his death he was U. S. collector of internal revenue for his district. He was a man of broad culture and refined literary tastes. Together with Park Benjamin, he edited the "New World," a literary weekly, in New York city, and published translations of Eugene Sue's "Mysteries of Paris" and "The Wandering Jew" (1840); also a eulogy on Abraham Lincoln (1865) and "Life of U. S. Grant" (1868), of whom he was a strong friend and admirer. Harvard College conferred upon him the degree of B. L. in 1839, and Trinity that of LL. D. He was married in Hartford, in 1830, to Sarah, daughter of Laurent Clerc, who came to this country from France with Thomas H. Gallaudet in 1816, and with him inaugurated at Hartford the education of the deaf mutes in the United States. Three sons and a daughter were born of this union. He was married (2d) at Hartford, in 1871, to Mrs. Annie Wilson Jilison, who survived him. He died in Hartford, Conn., Oct. 9, 1872.

BURNAP, George Washington, clergyman and author, was born at Merrimack, N. H., Nov. 30, 1802. He was graduated at Harvard College in 1824, and after a course in theology for three years he removed to Baltimore, Md., and was ordained pastor of the First Unitarian Church on April 23, 1828, as the successor of Jared Sparks. He became one of the most distinguished men of letters of the South. He contributed to the best reviews, magazines and literary journals, as well as to the daily press. He was one of the trustees of the Peabody Institute in Baltimore, and was a member of the Maryland Historical Society. He also delivered lectures in the larger eastern cities, where he was highly esteemed. His publications are: "Lectures on the Doctrines of Controversy Between Unitarians and Other Denominations of Christians" (1835); "Lectures to Young Men" (1840); "Lectures on the Sphere and Duty of

Woman" (1840); "Lectures on the History of Christianity" (1842); "Memoir of Leonard Calvert" (1844), which was included in Jared Sparks' "American Biographies"; "Biography of Henry A. Inghalls" (1845); "Lectures on the Principal Texts of the Bible Which Relate to the Doctrine of the Trinity" (1845); "Miscellanies" (1845); "Popular Objections to Unitarian Christianity Considered and Answered" (1848); "What is Unitarianism?" (1848); "On the Rectitude of Human Nature" (1850); "Christianity" (1855). He died in Baltimore, Md., Sept. 8, 1850.

DALTON, Tristram, senator, was born at Newbury, Mass., May 28, 1738, son of Michael and Mary (Little) Dalton. His earliest American ancestor was Philemon Dalton, who came to New England in 1635 and settled at Dedham, Mass. Tristram Dalton's elementary education was received in Dunmer Academy, Byfield, under Samuel Mooly, after which he entered Harvard College and was graduated in 1755 in the class with John Adams. He then studied law in Salem, but on the completion of his studies returned to Newbury and joined his father in business. He became actively interested in public affairs previous to the revolution, his name frequently appearing on the records of the town. He served on committees, and gave considerable time and attention to the revision of the public school system of Newbury. In 1774 he was one of the delegates to the provincial congress, and in 1776 he was elected representative to the general court. During the revolutionary war he ardently supported the Continental government. From 1782 to 1785 he was an influential member of the state legislature, and in 1783 was chosen speaker of the house. From 1786 to 1788 Dalton was a member of the state senate and also a delegate from Newbury to the constitutional convention of 1788. He zealously advocated the adoption of the Constitution of the United States, and after a long and protracted contest he and Caleb Strong were elected senators to the first national congress. He was distinguished for his scholarly accomplishments, and at his residence, Spring Hill, he entertained Washington, Adams, Talleyrand and other famous persons. Following the advice of his friend, Pres. Washington, he sold his property in Massachusetts to invest the proceeds in real estate in Washington, D. C., but through the mismanagement of his agent was reduced to poverty. In 1815 he obtained the post of surveyor to the port of Boston, which he held until his death. He was married, Oct. 4, 1758, to Ruth, daughter of Robert Hooper, a rich merchant of Marblehead, and had five children. He died in Boston, Mass., May 30, 1817.

HUBBARD, William, clergyman and historian, was born in England in 1621. In 1630 his parents emigrated to Massachusetts, and in 1642 he was a member of the first class that was graduated at Harvard College. Taking up the study of theology, he was ordained in 1665, and had charge of the Congregational church at Ipswich, Mass., until 1703. He published "A Narrative of the Troubles of the Indians from 1697 to 1677"; "Testimony of the Order of the Gospels in Churches" (1701), and "A History of New England," containing the history from the discovery of the country to the year 1680. This last work was purchased by the state for the sum of £50, and was printed in 1815 by the Massachusetts Historical Society. His author died at Ipswich, Mass., Sept. 11, 1704. He was married, (1) to Margaret Rogers, (2) to Mrs. Mary Pearson.

CLAYTON, Joshua, first governor of Delaware (1789-96), was born at Dover, Del., July 20, 1741, son of John and Grace Clayton, and a lineal descendant of Joshua Clayton, who was one of the immigrants who came over with William Penn in 1682. In 1776 he was married to Rachel McCleary, an adopted daughter of Richard Bassett (who afterwards became governor of Delaware), and settled on upper Bohemia Manor, near Mt. Pleasant, St. George's Hundred, Del. He read medicine, and became one of the leading physicians of the state. At the outbreak of the American revolution, thinking that

he was living on the Maryland side of the state line, he assisted in organizing the Bohemia battalion of Maryland regiment for home defense, but the approach of Howe's army caused the battalion to disband as a separate command, many of the members entering the Continental army. Clayton, who was one of these, took part in the battle of Brandywine, as aid-de-camp on the staff of Gen. Washington. He was said to have been strikingly handsome that Washington placed him on his staff, so as to make a good appearance upon receiving the sword of Gen. Lord Howe, whom he had expected to capture at that place. While

in camp at Valley Forge, Peruvian bark became very scarce and, as a substitute, Dr. Clayton combined the barks of the poplar and dog-wood trees, which proved to be very efficacious. In 1785 and 1787 he sat as a member of the Delaware house of representatives. In 1786 he was elected state treasurer. On the death of Pres. Collins he was, on May 30, 1789, elected by the legislature to fill the unexpired term. He served under this election for two and a half years, when he was elected governor by the people over Thomas Montgomery, by a majority of 307 in that small and sparsely settled state. He occupied the chair for six and a half years, serving longer than any executive who held the office in the history of the province or state. During his administration an act was passed for relief of the poor, and a new constitution was adopted in 1791. He was elected to the U. S. senate Jan. 19, 1796, and served until his death. In 1798 yellow fever was an epidemic in Philadelphia. He was called in consultation with the leading physicians and fell a victim to it. He was first buried on his estate on Bohemia Manor, but later was reinterred in Bethel graveyard, Cecil county, Md. He left three sons, Richard, Dr. James Lawson and Thomas, the last of whom became chief justice of Delaware, and U. S. senator. John M. Clayton, U. S. senator, chief justice of Delaware, and secretary of state, under Pres. Taylor, and joint maker, with Sir Henry Bulwer, of the Clayton-Bulwer treaty, was a nephew of Gov. Clayton. The latter died near Middletown, Del., Aug. 11, 1798.

BEDFORD, Gunning, second governor of Delaware (1796-97), was born in Philadelphia, Pa., April 7, 1743, son of William Bedford, a substantial land owner, and grandson of Gunning Bedford, who is supposed to have come from Delaware to Pennsylvania or New Jersey, and is said to have served as a lieutenant during the latter part of the old French war. On March 20, 1775, he was commissioned as major in the Delaware militia, and on Jan. 19, 1776, lieutenant-colonel of Col. John Haslet's Delaware regiment. In June, 1776, he received the additional appointment of muster-master-general. While leading his regiment at the battle of White Plains, Oct. 28th,

he was wounded, but recovered; took part in the New Jersey campaign, and remained in the service until some time in 1779, when he returned to Delaware. Col. Bedford was soon appointed prothonotary of New Castle county, and on Aug. 4th was admitted to the bar in Sussex county, though a resident of New Castle. In 1784-86 he was a member of the state house of representatives; in 1783 and 1790 was elected to the privy council; on Feb. 28, 1788, was appointed register of wills for New Castle county, and on Jan. 24, 1789, a justice of the peace. Col. Bedford was a member of the Continental congress in 1783-85 and 1786-87. In 1788 he was chosen one of the first presidential electors, and cast his vote for Washington. On Jan. 13, 1796, he took his seat as governor, succeeding Joshua Clayton, and served until his death. Under his administration the Delaware legislature incorporated on Feb. 9, 1796, the Bank of Delaware, with a capital stock of \$500,000. This was the first institution of its kind in the state. The legislature of the same year passed a law providing that all money received for marriage or treasury licenses between 1796 and 1806 should be appropriated for the establishment of schools throughout the state; and this was the first act toward creating a public school system in Delaware. Gov. Bedford was married, in 1769, to Mary, sister of George Read, the signer. The speaker of the senate, Daniel Rogers (b. Jan. 3, 1754; d. Feb. 2, 1806), by virtue of his office assumed the duties of governor upon the death of Gov. Bedford, which occurred at his home at New Castle, Del., Sept. 30, 1797.

BASSETT, Richard, jurist, senator and third governor of Delaware (1799-1801), was born at Bohemia Manor, Cecil co., Md., April 2, 1745, son of Michael and Judith (Thompson) Bassett, and was of Norman English descent, the Bassetts having been followers of William the Conqueror. Losing his parents at an early age, he was brought up by relatives. After attaining his majority he removed to Delaware, where he became prominent in public life, and by his ability as a lawyer, his uprightness as a judge, and his eminence as a statesman conferred honor upon that state. As captain of the Dover light horse he fought under Washington in 1777. In 1776 he served on the council of safety, also entered the governor's council (where he remained for ten years), and was a member of the constitutional convention which met at Annapolis in 1785. He was one of the signers of the U. S. Constitution and of Delaware's ratification of that document, and one of the members of the constitutional convention of Delaware in 1792. From 1789 until 1793 he was a U. S. senator, and was the first to vote in favor of locating the capital on the Potomac. From Sept. 6, 1793, until January, 1799, he was chief justice of the court of common pleas of Delaware, and in 1797 was a presidential elector. He was elected governor of Delaware in 1798, for the term of three years, and resigned in March, 1801, to accept the office of U. S. circuit court judge for the 3d circuit. Congress abolished the court in 1802. James Sykes (b. March 27, 1761; d. Oct. 28, 1822), became acting governor, and served until January, 1802. Gov. Bassett was converted under Whitfield, became a zealous Methodist, and did much to promote the progress of the denomination. His fortune was large, and he entertained lavishly at his three homes in Wilmington, Dover,

Richard Bassett

and at Bohemia Manor. He was married to Ann, daughter of Henry Emalls, and his daughter, Mary, became the wife of Hon. James A. Bayard, U. S. senator, and one of the commissioners who negotiated the treaty of Ghent. Gov. Bassett died at Bohemia Manor, Del., Aug. 16, 1815.

HALL, David, soldier, judge and fourth governor of Delaware (1802-05), was born at Lewes, Sussex co., Del., Jan. 4, 1752. After a classical education he was admitted to the bar in 1773. When the struggle for independence began he enlisted as a private, but a little later recruited a company which became a part of Hazlet's regiment, was commissioned its captain, and led it in the battles of Long Island and White Plains. In April, 1777, he was commissioned colonel of a regiment, and while commanding it at the battle of Germantown was so seriously wounded as to be incapacitated for further service. Returning to Lewes he resumed the practice of his profession, which was uninterrupted until 1802, when he was elected governor of Delaware, and he officiated in that capacity until 1805. Soon after the expiration of his term he was appointed one of the associate judges under the constitution of 1792. Gov. Hall was married to Catherine Tingley, of New York, and had a son, Joseph Hall, who was admitted to the bar in 1809, but died in early manhood. Gov. Hall died at Lewes, Sept. 18, 1817.

MITCHELL, Nathaniel, fifth governor of Delaware (1805-08), was born near Laurel, Sussex co., Del., in 1753. He became an adjutant in Col. Dagworth's battalion of militia; afterward was with Col. Patterson's battalion of the flying camp, and still later with Col. Grayson's additional Continental regiment, being engaged at Brandywine, Germantown and Monmouth. In April, 1779, he was transferred to Col. Gist's regiment, and subsequently was brigadier-major and inspector to Gen. Peter Muhlenberg. Maj. Mitchell was a delegate to the Continental congress in 1786-88, and in 1804 was elected governor of his state, and served for three years. He died Feb. 21, 1814, and was buried in the cemetery of the old Brick Church near Laurel.

TRUITT, George, sixth governor of Delaware (1808-11), was born near Felton, Kent co., Del., in 1756, and spent the greater part of his life there, his residence being on a tract of land which was part of a larger tract known for many years as "Burberry's Berry." He was four times a member of the house of representatives, once a member of the state senate, and was also a member of the state convention that ratified the constitution of the United States. His term as governor extended from January, 1808, until January, 1811. He was married to a daughter of Joseph and Mary Hodgson, and had a daughter, Sarah, who became the wife of Dr. James Fisher. Gov. Truitt died Oct. 8, 1818. His epitaph extols him as one "who, in the various public stations to which he was called by the voice of his country, always exercised that probity and fidelity which belong to the soul of the genuine patriot."

HASLET, Joseph, seventh and eleventh governor of Delaware (1811-14; 1823), was born in Kent county, Del., only son of John Haslet, an Irishman by birth. The latter after practicing medicine in Kent and Sussex counties, and serving in the state assembly, entered the army; he became colonel of a regiment, and was killed at the battle of Princeton in 1777, his wife's death following a few days later. Joseph, on the death of his parents, became the ward of chief-justice Killen, afterward chancellor of Delaware. On attaining his majority he removed to Cedar Creek Hundred, Sussex co., where he devoted himself to agricultural pursuits. In 1810 he was elected governor of Delaware, and had the responsibility of guiding affairs during the second war with Great Britain. During his administration Delaware was

successfully defended from the British; many important war measures were enacted by the legislature, and the militia was reorganized. On April 6, 1813, Lewiston was bombarded by the British frigate *Belvidere*, with little damage. In 1822 he was again elected governor, this being the only instance of a second election to that office in the history of the state. He died, however, before the expiration of his term, and Charles Thomas (b. June 23, 1790; d. Feb. 8, 1818), who was speaker of the state senate, became acting governor. Gov. Haslet died in Wilmington, Del., June 23, 1823.

RODNEY, Daniel, eighth governor of Delaware (1811-17), was born at Lewes, Sussex co., Del., Sept. 10, 1761, son of John and Ruth (Hunn) Rodney and great-grandson of William Rodney, of Somerset, England, who emigrated in 1682 with William Penn, and settled in Kent county, Del. He was the oldest member of the elder branch of the family established by this colonist. Daniel Rodney's father was a member of the council of safety, a trustee of the loan office and a judge of the court of common pleas. The son was endowed by nature with a vigorous mind and an ardent desire to cultivate it, but the state of the country, the war of the revolution having broken out when he was a child, denied him facilities for a liberal education. This he supplied in a measure by study; but early engaged in active pursuits, becoming master of a coaster in which he was twice captured by British cruisers. After the revolution he settled in business in Lewes. Subsequently he was appointed a judge of the court of common pleas, which position he filled most acceptably for twelve years. In 1813 he was elected governor of Delaware by the Federalists. This was during the war with Great Britain, and the period was one of great excitement, but he passed through this ordeal with the approbation and respect of both parties. Gov. Rodney was active in procuring a defensive work for Pea Patch Island. He was elected to the U. S. house of representatives in 1822, and for a short period (1825-7) was a member of the U. S. senate. Temperate, sympathetic and consistently religious, it was in private life that his character shone forth conspicuously. He was married at Lewes, March 5, 1788, to Sarah, daughter of Col. Henry Fisher, an ardent patriot of the revolutionary period. They had five sons and two daughters. He died at Lewes, Del., Sept. 2, 1846.

CLARK, John, ninth governor of Delaware (1817-20), was born at Smyrna, Del., Feb. 1, 1761, son of Capt. William Clark. His grandfather, Capt. David Clark, believed to have come from the north of Ireland, after living in the Pequa valley, Lancaster, Pa., removed to New Castle county, Del. Here, at Rockwell's Landing, on Duck creek, he had a large estate, and on it erected a mansion, which is still standing. Capt. William Clark distinguished himself at the battle of Monmouth, but his company lost forty out of the seventy-five engaged. The sword with which he killed an antagonist in the battle was to descend in a way prescribed in his will, but was stolen by an heir not entitled to it. Probably it was presented to him at the time he raised his company for Washington's army. He endorsed for a fellow army officer, and much of his estate was sold to pay the debt thereon. John Clark became the owner of the farm on the death of his father, and lived there all his life except the last nine months. In 1816 the Federalists of the state nominated him for governor, and he was elected over Mansen Bull, Democrat, by a plurality of 491. During Gov. Clark's administration the manufactures of Delaware received

a great impetus by the organization of "The Society of the State of Delaware for the Promotion of American Manufactures." In 1819 Henry Molliston was elected governor, but died before the time came for him to qualify, and a contingency resulted for which the constitution had made no provision. Gov. Clark thereupon resigned to obviate any difficulties or embarrassments which might arise, and Jacob Stout (1764-1855), who at the time was speaker of the senate, succeeded him, serving from January, 1820, until January, 1821, when John Collins took the chair. The only other positions known to have been held by Gov. Clark were those of colonel of militia and justice of the peace. Gov. Clark was married, Sept. 16, 1784, to Sarah (who died Dec. 5, 1790), daughter of Gov. John Cook, by whom he had a daughter, Mary, who became the wife of Pennell Corbit, of Odessa, and died Feb. 25, 1814. Among his descendants are Anthony Higgins, at one time U. S. senator, and John Clark Higgins, U. S. consul at Smyrna under Pres. McKinley. Gov. Clark died at Smyrna, Del., Aug. 14, 1821, and was buried in the old Presbyterian graveyard near Smyrna.

COLLINS, John, tenth governor of Delaware (1820-22), was born in Nanticoke Hundred, Sussex co., Del., in 1775, son of Capt. John Collins, who according to the records of the time was possessed of

"1,465 acres of good land, 1,108 acres of swamp, and fourteen slaves." Upon the death of his father in 1804, the son inherited 350 acres of good land, and 250 acres of swamp, and a third interest in the mill. In 1812 he built a charcoal forge. In October, 1819, he was elected governor of Delaware, receiving 3,970 votes against 3,520 for his opponent, Gov. Collins died during the third year of his term at Wilmington, Del., April 15, 1822,

and Caleb Rodney (b. April 19, 1767; d. April 29, 1840), brother of Gov. Daniel Rodney and speaker of the senate, became acting governor.

PAYNTER, Samuel, twelfth governor of Delaware (1824-27), was born at Paynter's Drawbridge, near Lewes, Del., in 1768, son of Samuel and Elizabeth (Stockly) Paynter and grandson of Samuel Paynter, a native of Lewes, Sussex, England, who settled at Lewes, Del. His father was a member of the general assembly, an associate judge and a colonel of militia, and, in addition, was an enterprising farmer and merchant. Engaging in business himself, Samuel Paynter, Jr., occupied a position which has no parallel at the present time, acting, as he did, as banker for those who traded with him. State and national affairs had great interest for him, and it was said that when he ceased to take an active part in politics it was so much the worse for politics. After holding various local offices he, in 1818, was appointed an associate judge. In 1823 he was nominated for governor by the Federalists, and was elected. Upon leaving the chair he returned to business and was thus engaged until 1844, when he was elected to the legislature. He was married to Elizabeth Rowland, of Sussex county, by whom he had two sons and two daughters. Their son, Samuel Rowland, was a member of the state senate. The latter's son, John Henry, was attorney-general of Delaware, state senator and judge of the superior court; Edwin Rowland, another son, was deputy attorney-general for sixteen years, and was editor of the "Delaware Democrat" at Georgetown, Gov. Paynter died at Lewes, Oct. 2, 1845.

POLK, Charles, thirteenth governor of Delaware (1827-30) and acting-governor in 1836, was

born near Bridgeville, Sussex co., Del., Nov. 15, 1788, son of Charles and Mary (Manlove) Polk. He was descended from Robert Bruce Polk, of county Donegal, Ireland, who was married to the widow of Col. Porter, of the English army, and emigrated to Somerset, Md. There, in March, 1687, he took up a tract of land which is still in possession of the family. One of his great-grandsons, Charles (1740-95), the governor's father, was a member of the legislature for years, a judge of the court of common pleas at the time of his death, and held many other offices. He is described as a man of splendid ability and of remarkable piety and probity of character. Charles Polk, who became governor, attended a classical school at Lewes, and then read law with Kensey John at Newcastle, but never practiced. In 1816 he removed to Kent county and became the owner of a tract of land of 1,100 acres near Milford, which land is still held in the family undivided. A national orator, a man of strikingly handsome appearance, of pleasing manners, and gifted with tact, he early made his mark in public life. He was elected to the state house of representatives in 1814, and was its speaker; was re-elected the following year, and in 1817 was elected from Kent county. In 1819 he was a member of the levy court of Kent county, and in 1824 a member of the state senate. The Federalists nominated him as their candidate for governor in 1826, and he was elected over David Hazzard. In 1828 the lower house of the Delaware legislature was unable to elect a speaker after balloting from Tuesday to Saturday, and broke up informally, thus being unable to legally meet again until called together by the governor. Great excitement was caused throughout the state at this unusual disagreement, and ugly reports were circulated concerning the members. Mr. Polk was president of the constitutional convention of Delaware in 1831; was re-elected to the state senate in 1834; was elected speaker of that body in 1836, and on the death of Gov. Bennett succeeded him in office. For five years (1843-48) he was register of wills for Kent county, and for four years (1849-53) was collector of the port of Wilmington. In August, 1857, Gov. Polk was appointed commissioner-judge of the supreme court of Delaware. He is said to have declined an appointment as chancellor of Delaware and a nomination as U. S. senator. Gov. Polk was married at Berlin, Md., to Mary Powell. Nine of his children survived him. One of his sons, Charles George Polk, a physician practicing in Philadelphia, was formerly an assistant surgeon of the U. S. army. Gov. Polk died on his estate near Milford, Oct. 27, 1857.

HAZZARD, David, fourteenth governor of Delaware (1830-33), was born at Broadkill Neck, Sussex co., Del., May 18, 1781, only son of John and Mary Purnell (Houston) Hazzard. Coard Hazzard, the first ancestor concerning whom there is definite information, settled in Broadkill Neck in 1700, having come thither from Virginia. He was of English descent. His grandson, the governor's father, was a major in a Delaware regiment during the revolutionary war, having received his commission from Gov. Clayton. Mary Purnell Houston was the daughter of Robert Houston, whose residence was near Milford. During the war of 1812 David Hazzard was an ensign in Capt. Peter Wright's company. Previously he had held the office of justice of the peace. He was elected governor on the American Republican ticket in 1829, with a majority of 167, and he served to the satisfaction of the people, who upon his retirement elected him to the state senate. During his administration a constitutional convention was held at Dover, Del., in 1831, which revised the constitution of the state, changing the governor's term from three to four years. In 1844 he was ap-

pointed an associate judge, being the last one to receive that honor, but resigned three years later. He again was sent to the legislature, and in 1852 was chosen a member of the constitutional convention. This last service performed he retired to private life. Gov. Hazzard was a man of strong and vigorous intellect and of broad sympathies, which made him greatly beloved. He was married, July 12, 1804, to Elizabeth, daughter of John Collins, who had been a captain in the revolutionary army. Their eldest son, John Alexander Hazzard, a man much beloved and respected, was also a member of the state senate, and filled other offices in church and state. John Alexander's sons, William and David, joined the regular U. S. army during the civil war, the one serving in the cavalry, and dying in the field; the other in the infantry. David Hazzard, the grandson, died, the last of his line, in 1901. Gov. Hazzard died July 8, 1861.

BENNETT, Caleb P., fifteenth governor of Delaware (1833-37), was born in Chester county, Pa., Nov. 11, 1758, son of Joseph Bennett, who removed to Wilmington in 1761, and there engaged in business as a shipping merchant, owning and being captain of a vessel in the East India trade. One of Gov. Bennett's grandmothers was Mary Boone, sister of the famous Kentucky pioneer, Daniel Boone. At the age of seventeen, though his parents were Friends, he was allowed to enter the Continental army. A year later he was made a sergeant, and on April 5, 1777, was commissioned ensign in Capt. Thomas Holland's company of David Hall's regiment. He fought at Brandywine and at Germantown, where he was wounded; was at Valley Forge during the winter of 1777-78; was commissioned second lieutenant Aug. 16, 1778, and first lieutenant in April, 1780, was present during the siege of Yorktown, and was in command of a battery on the day that Cornwallis surrendered. As major of the Delaware militia he commanded the forces at Newcastle during the war of 1812. In 1807-32 he was treasurer of Newcastle county. On Nov. 13, 1832, he was elected governor by the Jackson Democrats, his majority over Dr. Arnold Naudain, Republican, being fifty-seven. The oath of office was taken in January, 1833. During his administration the Delaware legislature denounced, as unconstitutional, South Carolina's plan for amending the Federal constitution. On March 3, 1834, the people of Delaware presented congress their petition for the restoration to the bank of the United States, of the public deposit. He died July 11, 1836, before the expiration of his term of office, and was succeeded by Gov. Polk, who was speaker of the senate.

COMEGYS, Cornelius Parsons, sixteenth governor of Delaware (1837-41), was born in Kent county, Md., Jan. 15, 1780, son of Cornelius and Hannah (Parsons) Comegys. His first ancestor in this country was Cornelius Comegys, a native of Lexmont, Holland, who, with his wife, Milliminty, emigrated to Maryland in 1666. This colonist obtained from Gov. Calvert a grant of 350 acres on the Chester river in Kent county, and in 1671, with his family, which now included four children, was naturalized. Cornelius, father of the governor, served in a Maryland regiment during the revolutionary war. Cornelius Parsons Comegys entered into business relations in his youth, being employed by Col. Tenment, a merchant of Baltimore, as supercargo. After he had attained his majority he removed to Delaware, and, after his second marriage, settled at Cherbourg, the family home of the Marvins, where he engaged in farming. On March 29, 1808, he was commissioned by Gov. Truitt major in the 5th regiment of militia, and on Dec. 26, 1814, lieutenant-colonel of the same regiment by Gov. Rodney, having a command at Lewes. He was a member of the lower house of the legislature in 1812-16;

was for several terms its speaker, and served on the committee to carry into effect the resolution passed in honor of Com. McDonough, after his victory on Lake Champlain. For several years (1820-33) he was state treasurer. Among the non public offices held by him was that of cashier of the Farmers' Bank at Dover (1818-20). In 1836 he was elected governor by the Whigs. He advocated the improvement of common schools, the modification of the school-tax law, the perfection of the penal code, and the payment of the French spoliation claims by the government. Gov. Comegys was noted for the gracious courtesy of his manners. His benignity of temper, liberality of heart, profuse hospitality and unselfishness, to the extent of real sacrifice, made him the most popular man of his day in the state. About 1801 he was married to Ann, daughter of Benjamin Blackiston, of Duck Creek Hundred. His wife lived but a short time, and he was again married, Feb. 16, 1804, to Ruhamah, daughter of John and Hannah Marvin, of Cherbourg, near Dover, her father being a lieutenant in the revolutionary war. They had seven sons and five daughters. Among the eight children who survived him were Hon. Joseph P. Comegys, chief justice of Delaware; Benjamin B. Comegys, a prominent citizen and financier, of Philadelphia; Cornelius G. Comegys, M.D., of Cincinnati; and John M. Comegys, M.D., of Dover. Gov. Comegys died at Dover, Del., Jan. 27, 1851.

COOPER, William B., seventeenth governor of Delaware (1841-45), was born not far from the present town of Laurel, Sussex co., Del., Dec. 16, 1771. He was made an associate judge in 1817. He was a man of great force of character and polished manners, with intellectual gifts of a high order and fascinating conversational powers. In 1811 he was elected governor of Delaware by the Whigs, serving until 1815. During this period Delaware was placed in the 4th judicial district of the U. S. courts; the state legislature permitted the banks to suspend the payment of specie, and they were enabled to resume their payments, leaving an unimpaired credit; while a memorial to congress was presented, favoring the issuance of \$200,000,000 in government stock. Gov. Cooper died April 27, 1849.

STOCKTON, Thomas, soldier and eighteenth governor of Delaware (1845-46), was born at Newcastle, Del., April 1, 1781, eldest son of John and Ann (Griffith) Stockton. His father, a native of Maryland, served in the revolutionary army as a lieutenant. He was confined in the old sugar house in New York city for a long time. Some time after the war ceased he took up his residence in Delaware, served in the militia, and with the rank of brigadier general commanded it in the defense of Elkton (1813). Thomas Stockton was educated at the College of New Jersey (Princeton), and settled at Newcastle. On Jan. 4, 1810, he was appointed prothonotary of the county by Gov. Fassett, but on Oct. 7, 1812, resigned to join the Delaware volunteers, was commissioned captain, and recruited a company in Delaware and New Jersey which was assigned to the 3d regiment of artillery under Col. Macomb. In 1813 his and other companies under Col. Winfield Scott proceeded to the Canada border and at the battle and capture of Fort George, May 27th, Stockton distinguished himself, plucking with

his own hands from a magazine a match placed there by the retreating enemy. For his courage and gallantry he was soon afterward transferred to the infantry and was brevetted major. During his service on the frontier he attended to the sick and wounded of his company personally and was regarded as a father by his men, who wept when he was transferred. He was in command of a battalion at Lewistown, Md., and at Philadelphia until peace was declared. He was retained in the army, though he was twice reduced, and served both in the infantry and artillery, until 1825, when he resigned to attend to family affairs, and returned to Newcastle. In 1832-35 he was register in chancery for Newcastle county. The Whigs nominated him for governor in 1844, and he received forty-six votes more than William Tharp, Democrat. During his administration joint resolutions were passed by the Delaware legislature, opposing the admission of Texas; and these were presented to the U. S. senate by the senator from Delaware, John M. Clayton. After being in office but a year and two months he died suddenly at Newcastle, March 1, 1846. Joseph Maull, speaker of the senate, succeeded him, but he died about two months later, and William Temple (1814-63) took the chair, which he held from May 1st until January of the following year. Gov. Stockton was married at Newcastle, June 2, 1804, to Fidelia Rogerson, daughter of Kensey Johns, Sr., and Nancy (Van Dyke) Johns, and had six children. His son, Thomas, was graduated at West Point, about 1827, and entered the army; his grandson, James, served in an Ohio regiment in the civil war under Gen. Rosecrans, while one of his descendants bore arms in the war with Spain in 1898.

THARP, William, nineteenth governor of Delaware (1847-51), was born near Farmington, Kent co., Del., Nov. 27, 1803, son of James and Emice (Fleming) Tharp. He was a great-grandson of John Tharp (Thorpe), of Sussex, England, who settled in Kent county in the early days of its history, and a grandson of William, who was married to Ruth Clark. After serving in the general assembly several times, and being an unsuccessful candidate for the office of senator, he was nominated in 1844 as the Democratic candidate for governor. Among his supporters at the election was his grandfather, Deniah Fleming. He was defeated by the Whig candidate, Thomas Stockton, but succeeded Stockton by election in 1846. Joseph Maull and William Temple having served as acting governors in the interim. Upon his election he removed to Milford, and there he spent the remainder of his life. In 1848 a long controversy over the ownership of Pea Patch island was finally settled, Delaware relinquishing her claims in favor of the U. S. government. Gov. Tharp was the owner of much real estate, and was a progressive and successful farmer. His daughter, Ruth, was the mother of William Tharp Watson, governor in 1895-97. Gov. Tharp died at Milford, Del., Jan. 1, 1865.

ROSS, William Henry Harrison, twentieth governor of Delaware (1851-55), was born at Laurel, Sussex co., Del., June 2, 1814, son of Caleb Ross, who is said to have been a native of New Castle county, and to have been related to George Ross, signer of the Declaration of Independence. His mother was Letitia Lofland, of Milford, Del. He was educated in his native town, and at an academy in Pennsylvania, and gained considerable culture by extensive reading. In 1836, in company with his father, he made a tour of Great Britain and Ireland. He spent the year 1837 in Adams county, Ill., where he engaged in business, and then returned to Laurel, where he remained until 1845, when Seaford became his permanent home. In 1850 he was elected governor on the Democratic ticket by a small majority. He was married at

Middletown, Del., June 7, 1840, to Elizabeth E., daughter of George K. Hall. They had ten children, seven of whom survive, three sons and four daughters. Gov. Ross died at Seaford, Del., in 1890.

CAUSEY, Peter Foster, twenty-first governor of Delaware (1855-59), was born near Bridgeville, Sussex co., Del., Jan. 11, 1801, son of Peter Taylor and Tamzey (Eaton) Causey, and grandson of Frederick Causey, who emigrated from Wales to Delaware about 1780. After attending the best schools of his section he went into business with his father, who was a merchant and manufacturer. He was elected to the state house of representatives in 1832, and to the state senate in 1835; was a delegate to the Whig national convention which nominated Gen. Harrison for president, and to that which nominated Henry Clay. In 1846 he was an aid on the staff of Gov. Stockton. He was elected governor of the state on the Whig ticket. His appointments to office were excellent. On Feb. 4, 1857, an act abolishing life tenure in office was passed; but this being a change in the state constitution, required the governor's approval, which he withheld, and he gave such satisfactory reasons for his action that the course was at once sanctioned by all parties. After his term ended he held no position, except that of president of the Junction and Breakwater railroad connecting the Delaware railroad with Lewes. He was married at Milford, Del., in 1825, to Maria, daughter of John and Sarah Williams. Their eldest son, William Frederick Causey, was secretary of the state of Delaware under Gov. Stockley and now is register of wills. Another son, John Williams Causey, was a member of the state senate in 1872-76, and a member of congress in 1891-95. Gov. Causey died at South Milford, Del., Feb. 15, 1871.

BURTON, William, twenty-second governor of Delaware (1859-63), was born near Milford, Kent co., Del., Oct. 16, 1789, son of John and Mary (Vaughan) Burton, of English descent. His early life was spent on his father's farm; his education was obtained at the schools near his home, and at the Medical School of the University of Pennsylvania. He settled at Lewes, but soon removed to Milford, and there acquired a large practice. In 1830 he was elected sheriff of Kent county; in 1854 was the Democratic candidate for governor, but was defeated by his neighbor, Peter F. Causey, candidate of the Whig party. Four years later he was successful, his majority over the candidate of the People's party being about 200. His administration extended over the early years of the civil war, which he had endeavored to avert by personal and official influence. Efforts were made to draw Delaware, a slave state, into the Confederacy, but these

Peter F. Causey

William Burton

efforts were defeated, and she sent into the Federal army more troops in proportion to her population than any of her sister states. Gov. Burton's efforts were at first directed towards effecting a peaceful solution of the difficulties, but finding this impossible, he gave his official support to the policy of the national government in using force. Delaware had no militia at the time of the president's first call for troops, but between April 23d and May 1st, her full quota of 780 men was supplied. A short time later three additional regiments were furnished. Gov. Burton was married to Mrs. Eliza Walcott, daughter of William Sorden, of Kent county; second, in 1839, to Ann C., daughter of Robert and Rhoda (Davis) Hill, by whom he had one daughter, Rhoda, who became the wife of Alfred R. Wootten, attorney-general of the state. He died at Milford, Del., Aug. 5, 1866.

CANNON, William, twenty-third governor of Delaware (1863-65), was born near Bridgeville, Sussex co., Del., March 15, 1809. While still young he began a mercantile career, and with nothing but a common school education to equip him for his life-work, by native force of character he made his way upward, becoming a force in politics. He was elected to the lower house of the general assembly in 1844 and 1846, served as state treasurer in 1851, and was a delegate to the peace congress of 1861. In 1862 he was elected governor of Delaware on the Republican ticket, receiving 8,155 votes against 8,044 cast for Samuel J. Jefferson, the Democratic candidate. He continued to officiate as governor until his death. He defended the assembling of troops at the preceding election, and the arrest of citizens for disloyalty; but the legislature's first act was a law "to prevent illegal arrests." This action called forth a patriotic proclamation by the governor, upon which his political opponents affirmed him to be deserving of impeachment. The matter was then dropped by the state legislature, but provoked much discussion in the U. S. senate. The emancipation proclamation of Pres. Lincoln did not apply to Delaware, and the gradual emancipation by means of compensation, which was proposed by the president, was rejected by the state. The first definite movement towards this object was effected when Gov. Cannon established recruiting stations for enlisting colored troops under the war department order of Oct. 26, 1863, which made free all slaves who enlisted in the service of the United States. When the Confederates were reported to be on the point of passing through Delaware, Gov. Cannon was prompt in issuing his warning proclamation. On July 3, 1864, Delaware was placed under martial law. In his last statement to the legislature he computed the number of soldiers furnished by Delaware at nearly 11,000, a very large proportion of her population. He was married to Margaret N. B. Laws, of Sussex county, Del. He died at Bridgeville, Del., March 1, 1865.

SAULSBURY, Gove, twenty-fourth governor of Delaware (1865-71), was born in Mispillion Hundred, Kent county, Del., May 29, 1815, son of William Saulsbury, sheriff of Kent county, and Margaret, daughter of Captain Thomas Smith. One of his brothers, Eli, was U. S. senator in 1871-89, another, Willard, was U. S. senator for six years and chancellor of Delaware for more than twenty years. After attending local schools he took a course at Delaware College, taught for a time, and then entered the medical school of the University of Pennsylvania, where he was graduated in 1842. From that time until his death he was engaged in practice at Dover. In 1862 he was elected to the state senate on the Democratic ticket, and at the second session of his term was made speaker. On March 1, 1865,

Gov. Cannon died, and Dr. Saulsbury became acting governor. In 1866 he was elected for the constitutional term, and served until January, 1871. While he was in office (1870) the negroes of Delaware exercised the right of suffrage for the first time, under the operation of the fifteenth amendment to the constitution. In his message to the legislature in 1871 Gov. Saulsbury denounced the disregard of constitutional obligations shown by congress and the Federal executive, in seeking "by revolutionary means to centralize and consolidate all political power in their own hands by attempting to control elections in the states." He also declared the fifteenth amendment to have been adopted by fraud and coercion. His strong will and positive convictions, combined with other traits, made him a natural leader of men, and he exerted a strong influence in the councils of the Democratic party in the state. He was many times a delegate to Democratic national conventions. Dr. Saulsbury had a keen interest in education; was instrumental in founding the Wilmington Conference Academy at Dover, and from its organization until his death was president of its board of trustees. He was also a trustee of Delaware College. The Methodist Episcopal church, of which he was a member, had in him a strong supporter, and a short time before his death he was appointed a delegate to the ecumenical conference. Dr. Saulsbury was married in Philadelphia, Nov. 1, 1848, to Rosina Jane, daughter of Isaac P. Smith, of Snow Hill, Md. They had three sons and two daughters. He died in Dover, July 31, 1881, survived by but one child, William, present editor of the "Delawarean."

PONDER, James, twenty-fifth governor of Delaware (1871-75), was born at Milton, Sussex co., Del., Oct. 31, 1819, son of John and Hetty (Milby) Ponder, and was of English descent. The first of the family in this country emigrated to Virginia during the colonial period. His father was a man of affairs; held several state and federal offices, took part in the war of 1812, and for his services was granted several land patents by the government. He was also interested in ship-building and in the shipment of grain, lumber and other commodities. James Ponder was educated at private schools in Lewis and Georgetown, in his native state, and when about twenty years of age began business life under his father. He became the owner of many ships and the largest owner of real estate in Delaware, adding by purchase to what he had inherited. Mr. Ponder was the head of every enterprise in Milton that advanced the prosperity of the town, and no one in the community was more prompt than he to relieve distress, especially of those who were poor. He was president of the Farmers' Bank at Georgetown and director of Queen Anne's railroad and of many companies and corporations. After serving in the lower house of the general assembly (1856), he was elected to the state senate in 1864 and was

Gove Saulsbury

James Ponder

chosen speaker of that body in 1867. In 1870 he was elected governor on the Democratic ticket by a large majority. The most important bills signed by him were those restricting fisheries; confining the sale of intoxicating liquors chiefly to hotel keepers, and increasing the legal rights of married women. He was married at Milton, July 31, 1851, to Sallie, daughter of Gideon Waples. She, with two sons and a daughter, survived him. Gov. Ponder died at Milton, Del., Nov. 5, 1897.

COCHRAN, John P., twenty-sixth governor of Delaware (1875-79), was born in Appoquinimink Hundred, Newcastle co., Del., Feb. 7, 1809. His father, who was of Scotch-Irish descent, removed to Delaware from Cecil county, Md. He was brought up on a farm, and, with the exception of a few years spent in business, spent his life there, adding to his estates until he was one of the largest land owners in Delaware. Though active in politics for many years he was seldom induced to accept a public office. For two terms (1838-46) he represented New Castle county in the levy court, and then retired to private life. In 1874 he was nominated by the Democrats as their candidate for governor, and was elected by a majority of 1,239 votes over Dr. Isaac Jump, Republican. He served from Jan. 20, 1875, to January, 1879. During his administration a state board of education was formed; for the first time a state superintendent of free schools was provided for, and the constitutional amendment of 1873 was ratified, sanctioning a general incorporation law. Gov. Cochran died at his home in Newcastle county in 1898.

HALL, John Wood, twenty-seventh governor of Delaware (1879-83), was born at Frederica, Kent co., Del., Jan. 1, 1817, son of John Hall, a merchant and a soldier in the war of 1812, and descendant of an Englishman, who emigrated to Delaware in early colonial days. His mother, Henrietta Bowman, was the daughter of a farmer of Milford Neck. At the age of sixteen he began to earn his own living as a clerk, and soon after bought a cabinet shop, which he conducted at the same time. When he came of age he bought out his employer, and extending the business built up a profitable trade in lumber and grain, building vessels for that purpose, and sending them to ports in all parts of the world. At one time he was the largest ship owner on the Delaware. He also became one of the great landed proprietors of Kent county, and some of his farms were highly productive. Originally a Whig, he became a Democrat. In 1866 he entered the state senate, and in 1876 was sent as a delegate to the national Democratic convention; which nominated Tilden for

John W. Hall

the presidency. In 1878 he was nominated governor by acclamation, and was elected by a very large majority. During his administration bills were passed regulating the sale of artificial butter, and providing for the use of a distinguishing stamp; establishing an insurance commissioner to be appointed by the governor for the purpose of supervising the business of insurance companies, and providing for a refund of the state debt to the amount of \$800,000 at 4½ per cent. His acts as chief executive showed him to have been guided by his conscience rather than by mere policy; his appointments were excellent, and he

employed the methods and principles which had made him successful as a business man to the benefit of the state. On leaving the chair he returned to business life. In 1890 he was again elected to the state senate, and at the time of his death was still serving. For many years he was a director of the Farmers' Bank of Dover. John Wood Hall was married, Nov. 15, 1842, to Caroline, daughter of Samuel and Sarah X. Warren, of Kent county. Of their four children, two sons and a daughter survive. He died at Frederica, Jan. 23, 1892.

STOCKLEY, Charles Clark, twenty-eighth governor of Delaware (1883-87), was born at Georgetown, Sussex co., Del., Nov. 6, 1819, son of Jehu and Hannah Rodney (Kollock) Stockley. The Stockleys went from England to Accomac county, Va., in 1680, and thence to Rehoboth, Del., before 1695. His mother, Margaret (Ellis) Kollock, was descended from William Rodney, of Bristol, England, who came over with William Penn, and was one of the proprietors of Delaware; also from John Rodney, member of the council of safety of Delaware and military treasurer of Sussex county during the revolution. Jacob Kollock, her grandfather, was an

Char. C. Stockley

officer in the French and Indian war, was president judge of the "three lower counties" (Delaware), member of the assembly and speaker; collector of customs at Lewes; and, with Caesar Rodney and Thomas McKean, was a delegate to the congress convened in New York to resist the Stamp Act. Phillips Kollock, her father, was clerk of the court in 1770; member of the assembly of the three lower counties in 1776; clerk of the peace in 1799-1805; register of wills in 1801-20; recorder of deeds in 1793-1811; Jehu Stockley, the governor's father, was a watchmaker and also register in chancery for Sussex county. The son was educated at Georgetown Academy and entered business life at Millsboro, Del. In 1852 he was appointed county treasurer; in 1856, sheriff of Sussex county; in 1873, was elected state senator; in 1875, became speaker of the senate; and in 1882 was elected governor on the Democratic ticket, receiving 1,938 majority. In his inaugural address, he recommended the amendment of the constitution; three school superintendents instead of one; and opposed any change in the liquor law. The most important acts passed during his administration were those establishing a state library and making the forming of an opinion disqualification for jury service in a capital case. In 1891 he was appointed register of wills and probate judge for Sussex county, and served for four years. Mr. Stockley is president of the Farmers' Bank of Georgetown, a director of the Old Dominion Steamship Co., was president of the Breakwater and Frankford railroad, and director of the Junction and Breakwater railroad. He was married at Georgetown, Del., Dec. 13, 1857, to Ellen Wright, daughter of James Anderson. Their only child, Hannah E., became the wife of Hon. John H. Paynter (b. Feb. 26, 1838), attorney-general of Delaware in 1869, and during 1885-87 editor of the Delaware "Democrat," and judge in 1887. He codified the laws of his state in 1874. Gov. Stockley died at Millsboro, Del., April 20, 1901.

BIGGS, Benjamin Thomas, twenty-ninth governor of Delaware (1887-91), was born near Summit

Bridge, Pencader Hundred, Newcastle co., Del., Oct. 1, 1821, son of John Biggs. His father, a farmer, was a native of Cecil county, Md. The son was educated at the New Jersey Conference Seminary and at Wesleyan University, Middletown, Conn.; then returning to his native place, engaged in farming and horticulture, in which he prospered. During the Mexican war he was commissioned major by Gov. Temple, but did not enter the army. Maj. Biggs, as he was familiarly called, was, from his youth upward, a speaker of great force and popularity and frequently was called upon to address assemblies, particularly those of a political character. He was an influential member of the state constitutional convention of 1853. Up to the year 1854 he was a Whig in politics, after that a Democrat. In 1860 he was a candidate for congress, but was defeated by George P. Fisher; he was, however, successful in 1868, and was re-elected in 1870. The "Delaware plow-boy," as he was called by his fellow members, returned to farming, but in 1877 removed to Middletown, Newcastle co. In 1886 he was elected governor over James R. Hoffecker, the Republican candidate, by a majority of 6,110 votes, and served his full term until January, 1891. A number of important acts were passed during his administration, among which were those allowing the people to vote on the question of holding a constitutional convention, compelling husbands to support their wives and children, and creating three superintendents of schools instead of two. An act was passed refunding \$250,000 of the state debt, at 3 per cent., and the loan was immediately taken up. A state hospital for the insane was established; a new survey of the boundary between Pennsylvania and Delaware was conducted, and May 30th was declared a legal holiday. Maj. Biggs was president of the Queen Anne's and Kent Railroad Co., which he was largely instrumental in building. He

B. J. Biggs

was married, near Griggstown, N. J., in 1853, to Mary Scott, daughter of Abram C. Beckman, by whom he had two sons and a daughter. His death occurred at Middletown, Del., Dec. 25, 1893.

REYNOLDS, Robert John, thirtieth governor of Delaware (1891-95), was born at Smyrna, Kent co., Del., March 17, 1838, son of Robert W. and Sally G. Reynolds, and a descendant of Thomas Reynolds, who emigrated to Delaware from England in the seventeenth century. His father was the sheriff of Kent county in 1834 and register of wills in 1853, and in the Democratic state convention of 1862 was a nominee for the governorship, receiving only four votes less than Samuel Jefferson, the successful candidate. During the son's childhood the family removed to South Murderkill Hundred. He was educated at schools in his native state and at Fairfield, Herkimer co., N. Y., and in 1861 settled at Petersburg, Kent co., to engage in farming and in horticulture. In 1869 Mr. Reynolds was elected to the general assembly, and in 1879 and 1881 was elected state treasurer. He was frequently chairman of Democratic committees, and was chairman of the state committee in the campaign that elected Charles C. Stockley governor and Grover Cleveland president. He was himself nominated for governor, Aug. 12, 1890, receiving on the first ballot 151 of the 163

votes cast, upon which the nomination was made unanimous. In his letter of acceptance he denounced the Lodge "force bill" and the McKinley tariff bill and favored the adoption of the Australian ballot system. These denunciations and this recommendation were incorporated in the platform subsequently adopted. The total vote at the election was 35,059 and his plurality over Harry A. Richison, Republican, was 543. At the celebration in Wilmington of Memorial Day, in 1891, Gov. Reynolds made the principal address, one notable for its patriotic spirit. He was a delegate to the national Democratic convention at Chicago, in 1892. At the Columbian exposition in the following year he fittingly represented his state on Delaware day, and made a most felicitous address. During his administration the new boundary line between Delaware and Pennsylvania was established. Gov. Reynolds was married at Smyrna, Del., in 1862, to Lovenia L., daughter of Edward Riggs, and had one child, Byron, who died in 1898.

MARVIL, Joshua Hopkins, thirty-first governor of Delaware (1895), was born at Laurel, Sussex co., Del., Sept. 3, 1825. His mother was of French descent. When he was nine years old his father died, and from that time until he was of age he worked on the farm owned by the family. For a year he followed the sea, and then took up the business of shipbuilding, which he carried on for seven years, though only as foreman of the yard. In 1853 he established a shop for the manufacture of agricultural implements, and prospering thereby continued the business until 1865. In 1870 he invented a machine for making peach and berry baskets; in the following year added steam power to his plant, and was enabled in a few months' time to produce 600,000 baskets and crates. This industry has grown to such proportions that more than 2,000,000 baskets and crates are annually produced, and a number of firms in other states use his machinery, paying a royalty thereon. Mr. Marvil was prominently connected with the Republican party, and contributed liberally to its campaign funds, but never held office until he became governor. His plurality over Ebe W. Tunnell, Democrat, was 1,221. His term of service was cut short by his sudden death, and he was succeeded by the speaker of the senate, William Tharp Watson, born in Milford, June 22, 1819, and a grandson of Gov. William Tharp. Gov. Marvil was married, in 1849, to Sarah Ann Sirman, and they had three sons, two of whom continue their father's business. He died in Dover, April 8, 1895.

TUNNELL, Ebe Walter, thirty-second governor of Delaware (1895-1901), was born at Blackwater, Sussex co., Del., Dec. 31, 1844, son of Nathaniel and Maria (Walter) Tunnell, both natives of the state. He attended the schools of the neighborhood in his early days; about 1860 he entered the private school of Prof. Abner, at Milford, Del., and later the private school of Prof. Sherman E. Adams, at Lewes, Del. About the time he attained his majority he engaged in mercantile business at his home. In 1870 he was elected to the legislature of the state, having succeeded in overcoming the large adverse majority in his district. In 1872 he removed to Lewes and engaged in the drug and hardware trade. Gov. Charles C. Stockley appointed him to the responsible position of clerk of the peace for the county in 1885, which office he held for five years. At present he is presi-

dent of the Farmers' Bank of Delaware, one of the directors of the Delaware, Maryland and Virginia railroad, and president of the board of commissioners of Delaware's seaside resort at Rehoboth. Nominated in 1891 as the candidate for governor on the Democratic ticket, he was defeated by a small majority; nominated a second time in 1896 for the same position he was elected by a plurality of 5,000 over his opponents. He was inaugurated as governor of the state in January, 1897, for the term of four years.

HUNN, John, thirty-third governor of Delaware (1901-), was born in St. George's Hundred, New Castle co., Del., June 23, 1817, son of John and Annie E. (Jenkins) Hunn, and descendant of Nathaniel Hunn, who settled in Delaware in the seventeenth century. His father, a farmer, was bitterly opposed to slavery, and aided many a fugitive to reach the free states by way of the "underground railroad." After attending the Friends' School at Camden, and the Bordentown (N. J.) Institute, the son went to Beaufort, S. C., in 1861, with the expedition which captured Port Royal on Nov. 7th. After the war he engaged in the phosphate trade; but returned to Delaware in 1876, and settled at Wyoming as a dealer in grain, lumber and fruit. In this business he is still engaged, and is also vice-president of the First National Bank of Dover, and a director of the National Building and Loan Association of the same city. He steadily refused to hold a political office until 1900. In that year he was nominated on the Union Republican ticket for lieutenant-governor, and on the regular Republican ticket for the same office. The Democratic candidate was Peter J. Ford. Finally he was made a compromise candidate for governor, and was elected by the largest majority any governor has received in Delaware to the present time (1901). He was married in Philadelphia, Pa., Nov. 11, 1874, to Sarah Cowgill, daughter of William Spencer Emerson, of Camden, Del. They have one child, a daughter.

WILDER, Edward, railroad official, was born in Boston, Mass., Sept. 4, 1843, son of David and Celia Colton (Burt) Wilder.

His father was auditor of the Boston and Worcester railroad. He is of English ancestry, coming from Berk's county, where a branch of the family is still living on the estate presented to Nicholas Wilder in the year 1497 by Henry VII. His first American ancestor was Thomas Wilder, who joined the Massachusetts bay colony about 1638; and his great-grandfather was David Wilder (b. 1741; d. 1815), a captain of the Continental troops at the battle of Lexington, and elected in 1779 by the legislature of Massachusetts first major of the 8th regiment of Worcester county militia. His mother was a member of an old New England family, Henry Burt having emigrated from England to Springfield, Mass., about 1630; and several of her ancestors were officers in the revolutionary war. On the death of Nathaniel Burt the town of Long Meadow erected a tombstone in recognition of his generosity in donating lands for the public good. Edward Wilder received his early education in the schools of Brookline, Mass., and at the age of fourteen, though only half through his high school course, was compelled to seek employment. He entered the office of the Cunard Steamship Co. at

a meagre salary, but at the end of each year it was voluntarily doubled as a reward for his faithfulness. Three years later he engaged with the Boston and Worcester Railroad Co., and in the nine years he remained there advanced to the positions of paymaster and auditor. In 1870 the previous consolidation of this road with the Western Railway Co. having created some changes in his work, he accepted the office of land commissioner of the Hannibal and St. Joseph railroad; but at the end of a year he was tendered the office of assistant treasurer of the Atchison, Topeka and Santa Fé railroad, and removed to Topeka, Kan. In 1877 he was elected secretary and treasurer of the road and still (1901) holds this position. Mr. Wilder has done much to promote the material and educational welfare of Topeka, having been instrumental in organizing the Topeka Library Association, from which the fine public library and art gallery and the Kansas State Art Association have grown. He has served as a member of the school board for many years, and for two years was its president; he has contributed of his energies and his means to the associated charities, the free kindergarten and the industrial school; he aided in establishing the services and in erecting the buildings of the New Jerusalem Church of Topeka. Mr. Wilder was one of the founders of the Topeka Edison Electric Illuminating Co. which he has served as secretary and treasurer since its establishment, while for many years he has been a director and one of the largest stockholders in the Missouri and Kansas Telephone Co. He was connected with his teacher in establishing and operating the public library in Brookline; was one of the promoters and guiding spirits in the public library established at Hannibal, Mo., in 1870; and was appointed a member of the Traveling Libraries Commission for Kansas. During his service with the Atchison, Topeka and Santa Fé Railroad Co. he has been secretary and treasurer of about one hundred and twenty-two different companies. Since his business start in 1857 he has never had to seek a position, has practically made but three changes, and has never been out of service and his frequent increases of compensation have come to him almost unsolicited. Mr. Wilder was married in Philadelphia, Dec. 29, 1868, to Mary C., daughter of James W. and Mary (Robb) Scott, of Philadelphia. They have had three children: Mabel Scott Wilder (died 1885), Edward Twichell and Walter Robb, the sons being successful architects of New York city.

ELMER, Jonathan, senator, was born at Fairfield, Cumberland co., N. J., Nov. 29, 1745. He was graduated at the medical department of the University of Pennsylvania in 1771, and began the practice of medicine, but later became active in public affairs. A military company was organized by him, and he was an energetic member of the vigilance committee. He was a delegate from New Jersey to the Continental congress in 1776, serving two years; was again a delegate in 1780, serving four years, and was a third time a delegate in 1784, serving until the establishment of the Federal government. He then became a senator in congress under the constitution (1789-91), and was among those who voted to locate the national capital on the Potomac. During the revolution he also served as medical inspector of the army. He was later a high sheriff, and acted as surrogate of Cumberland county from 1784 to 1802. Still later he was elevated to the presiding judgeship of the county common pleas court, which office he resigned in 1814. He devoted much time to literary pursuits, becoming a member of the American Philosophical Society (1771), and president of the State Medical Society (1787). He died at Burlington, N. J., Sept. 3, 1817.

Wilder

GOMPERS, Samuel, president of the American Federation of Labor, was born in London, England, Jan. 27, 1850. He attended common schools from his sixth year until he was ten years and three months of age, when, against his inclinations, he was placed in a factory to learn the shoemaking trade. He was subsequently apprenticed to the trade of cigar making, which his father followed, and during that time became deeply interested in the civil war in progress in the United States, and in the discussions that arose among his associates advocating the side of the North in its attempts to abolish slavery. Previous to this, and while he was very young, his sympathies for the oppressed and unfortunate had been aroused by the sight of a parade of workmen, who had been thrown out of employment. In 1863 his parents emigrated to the United States. When the Cigar-makers' International Union, now numbering nearly 30,000 members, was formed, in 1864, young Gompers joined it, becoming the first registered member. To his suggestion and advocacy is due the adoption of its system of legislation by the initiative and referendum, and its nomination and election of officers by adirect vote of the members of the union in all parts of North America; and the fact that it is to-day the most successful trades union in the United States is also due to him. He served as its president for six years, and acted as secretary, without salary, for four years. In 1881 he was a delegate of the International Union to the first convention of the American Federation of Labor, held at Pittsburgh, Pa., and attended by 300 delegates. He was chosen president of the organization, but declined, accepting, however, the vice-presidency; but in 1882 he was placed at the head of the federation, and has served continuously to the present time, except in 1894, when he was defeated by John McBride, of the coal miners. Mr. Gompers held office for six years without receiving any salary, but at the convention of 1886 he was induced to give his entire time to the advancement of the federation and to accept a salary of \$1,000. Among the many laws on the statute books of the national government and of the various states the passage of which is due to his labors are the lien laws, making wages the first lien on property; the sanitary inspection laws of workshops, factories, mills and mines; the age-limit law, relating to children employed in industrial pursuits; the law making employers liable for damages to life and limb of employees; the uniform car-coupling law; the eight-hour law in governmental work; the ten-hour law for street railway employees; the anti-sweatshop law; the law creating state boards of conciliation and arbitration; the Saturday half-holiday law, and the law making the first Monday in September a legal holiday—Labor Day, which resulted in the international labor congress, held in Paris, in 1889, voting to make May 1st European Labor Day. He was married, in 1867, to Sophia, daughter of David H. Julian, of Brooklyn, N. Y.

SPENCER, Fannie M., musician and composer, was born at Newburgh-on-Hudson, N. Y., about 1860, daughter of T. W. and Cynthia (MacCullum) Spencer. She studied music and composition under Samuel P. Warren. She was a founder of the American Guild of Organists; chairman music committee of the Professional Woman's League, as well as of the musical department of that body, and is an active member of the New York Manuscript Society. Her work lies in the field of the solo-organist, of the composer and teacher, as well as of the choir director and director of choral societies, she having organized and developed several societies and given concerts. She is the author of a book of thirty-two hymns, with original tunes, published by Novello, Ewer & Co.; several songs: "I Love Thee," "When I Know That Thou

Art Near Me," "Awake, My Love," "The Daisy" "Unless," and "Well-a-day"; anthems: "As Pants the Hart," "Bethlehem," "Magnificent and Nunc Dimittis" in G; "Lord's Prayer," "O Lord, Rebuke Me Not"; a set of Easter carols, etc. Her compositions are said to bear the stamp of originality, spontaneity and virility, and have always been favorably received.

QUIMBY, Phineas Parkhurst, mental scientist, was born at Lebanon, N. H., Feb. 16, 1802, son of Jonathan and Susannah (White) Quimby, who were of English descent. When he was about two years old his parents removed to Belfast, Me., where he received a common school education. He was apprenticed to a watch and clockmaker, and was later engaged in that business for himself. He inherited from his father, who was a blacksmith, a taste for mechanics, and was of an inventive turn of mind, devising several mechanical appliances, such as a steering apparatus for boats, a vise, an endless-chain saw and a clock movement. About the year 1838 one Dr. Collyer, a traveling hypnotist, gave a series of lectures in Belfast, which elicited his interest. He gave the subject much thought; made experiments himself, and in time acquired considerable proficiency, his influence upon a young man, named Burkmar, being considered so remarkable that for several years the two traveled through Maine and New Brunswick, giving exhibitions in mesmerism that greatly astonished the beholders. Quimby was often called upon to use the powers of his subject to diagnose disease. He soon perceived that the diagnosis was always identical with what the patient or some one else present thought was the trouble, and that suggested to him a connection between mesmerism and the cure of disease. This was the awakening in him of the idea that disease and its cure were mental states. Further study showed that hypnotism was unnecessary to the success of his work, and he accordingly dropped that part of his practice. Having cured himself of what physicians had declared to be consumption, he began to put into practice his "Theory," or "the Truth," as he always termed it, his chief desire being to impart the knowledge to others and to benefit humanity at large. In a circular to the sick, he says: "My practice is unlike all medical practice. I give no medicine and make no outward applications. I tell the patient his troubles and what he thinks is his disease; and my explanation is the cure. If I succeed in correcting his errors, I change the fluids of the system and establish the truth, or health. The truth is the cure." He frequently called his philosophy "the science of health and happiness." In an article written in 1893 he uses the term "Christian science." One of his patients, a Dr. Evans, who published several volumes on the subject, first used the term "mental science" in 1869, and this is the term still used by a large class of practitioners, "Christian science" being an offshoot of mental science. The fundamental principle underlying all the different schools of mental therapeutics is the same, namely, the influence of the mind of the patient on his body; however different the claim and methods, the explanation of all is the same. It is as old as humanity itself, but Dr. Quimby was the first in this country,

as far as known, to make a serious study of it in connection with healing the sick. In 1859 his work increased to such an extent that he established headquarters at Portland, Me., though his home was still in Belfast, and there he became favorably known, and performed many remarkable cures. Among his patients was Mrs. Mary B. G. Eddy, who became the leader of the Christian scientists. He was married, Dec. 23, 1827, to Susannah B., daughter of John Haraden, of Belfast, Me., who bore him three sons and one daughter. After twenty years of unselfish devotion to the cause of humanity, he died at Belfast, Me., Jan. 16, 1866.

THORNTON, Matthew, signer of the Declaration of Independence, was born in Ireland about 1714, son of James Thornton, a Protestant, who, about 1717, emigrated to New England, settling at Wiscasset, Me. Soon after the family removed to Worcester, Mass., where the son obtained a classical education. He next studied medicine in Leicester, Mass., and removed to Londonderry, N. H., to practice, which he did with profit. He accompanied the New Hampshire troops, under Pepperell, in the expedition against Louisburg in 1745, acting as surgeon; later he was a colonel of militia and chief justice of Hillsboro county; president of the provincial convention of 1775, and in January, 1776, was elected

speaker of the assembly. On Sept. 12, 1776, he was elected to the Continental congress, and on Nov. 4th, on taking his seat, signed the Declaration of Independence, though he had not been one of its framers. In December he was re-elected to congress for a year. From 1776 until 1782 he was a judge of the superior court of New Hampshire. He removed to Exeter in 1779, but about a year later settled on a farm at Merrimac, on the banks of the Merrimac, giving up medical

practice. After serving in both houses of the general court, Mr. Thornton was, in 1785, elected a member of the general council. His declining years were passed in writing newspaper articles and a treatise on sin, which was never published. He was married to Hannah Jackson, by whom he had several children. His son, Matthew, a graduate of Dartmouth in 1797, adopted the law as his profession. Mr. Thornton died while visiting a daughter at Newburyport, June 24, 1803, and was buried at Merrimac. His tombstone bore the inscription: "An honest man." In 1887 the legislature appropriated \$1,000 for a more pretentious monument.

McCLUNG, John Alexander, clergyman and author, was born at Washington, Ky., Sept. 25, 1804, son of William McClung, a prominent jurist of that state, and a nephew of Chief-Justice John Marshall. He studied for the ministry at the Princeton Theological Seminary, and was licensed to preach in the Presbyterian church in 1828, but abandoned the pulpit soon after on account of his doubts as to the authenticity of some books of the Bible. He studied law, and being admitted to the bar in 1835 he practiced with great success until 1849, when he renewed his theological studies. He was ordained in 1851, and was pastor of the First Presbyterian Church in Indianapolis, Ind., until 1857, when he removed to Maysville, Ky., con-

tinuing his preaching until his death. He occupied a high position as a theologian, and during his career at the bar he contributed frequently to the press and wrote "Sketches of Western Adventures" (1832). He received the degree of D. D. He was drowned in Niagara river, Aug. 7, 1859.

NADAL, Ehrman Syme, author, was born at Lewisburg, W. Va., Feb. 13, 1843, son of Rev. Bernard Harrison Nadal. His father, who was a prominent clergyman, was born in Talbot county, Md., March 27, 1812. He was graduated at Dickinson College in 1848, and in 1854 became professor in the Indiana Asbury University. Upon the organization of the Drew Theological Seminary he was made professor of church history, and when Dr. McClintock died, in 1870, he acted as president. He was admitted to the old Baltimore conference of the Methodist church, and preached in the states of Maryland, Virginia and Pennsylvania, and in Brooklyn, N. Y., and New Haven, Conn., and was for a time chaplain of the house of representatives. He received the degree of D. D. from Dickinson College in 1857. His son, Ehrman S. Nadal, was educated at home and at Columbia College and Yale University, where he was graduated in 1864. In 1870-71, and again from 1877 to 1884, he served as second secretary of the American legation in London. It was during his first term in this office that he collected the materials for his first published work, entitled "Impressions of London Social Life, with other Papers Suggested by an English Residence." It appeared simultaneously in London and New York in 1875, and called forth criticism which was, on the whole, encouraging. "The New York 'Nation'" said of the book: "It is graceful and agreeable; it is what one would call a gentlemanly book. . . . Mr. Nadal's observations, however, rather lack incisiveness, and strike us occasionally as vague and ineffectual. . . . Mr. Nadal errs in giving too few examples and too many generalizations." Other reviews of the book were, however, more lenient than this. In 1882 he published "Essays at Home and Elsewhere," and reviewing this the "Athenaeum" said: "Mr. Nadal may not be particularly helpful as a critic of politics or of literature, but he is delightful as a painter of landscape and figures." Upon his return to America, in 1884, he took up writing as a profession, and was for some years on the staff of the New York "Evening Post." In 1887 a third work appeared, consisting of a series of papers entitled "Zweibak; or, Notes of a Professional Exile."

MATSON, Courtland C., legislator, was born at Brookville, Ind., April 25, 1841, son of John A. and Margaretta M. Matson. He was graduated at Asbury University, Indiana, in 1862. He served in the Federal army throughout the civil war, filling all grades up to that of colonel. In 1866 he began the study of law in his father's office at Greencastle, Ind., and was admitted to practice in 1868. He was three times elected prosecuting attorney of different courts in Indiana, and distinguished himself as an able and painstaking lawyer. He also took an active part in politics as a Democrat, was a frequent speaker in campaigns and a delegate to numerous local and state conventions. In 1880 he was elected to represent the 5th Indiana district in congress, and was re-elected in 1882, 1884 and 1886. While in congress he was one of the most forceful and influential representatives of his party. In the 50th congress he rendered exceptional service as chairman of the committee on invalid pensions. In 1888 he was nominated without opposition as the Democratic candidate for governor of Indiana, but was defeated after a close and exciting contest that attracted national attention. Since that date he has practiced his profession in Greencastle, Ind.

Matthew Thornton

De KROYFT, Susan Helen (Aldrich), author, was born in Rochester, N. Y., Oct. 29, 1818, daughter of Obed and Melinda (Potter) Aldrich. Her earliest known American ancestor was George Aldrich, who emigrated to America from Derbyshire, England, with his wife and one child, Dec. 3, 1631. Her grandfather, Benjamin Aldrich, was a Quaker soldier of the revolution, and her father was a captain in the war of 1812. She was educated at Lima Seminary, where she was graduated in 1843. On July 25, 1845, she was married to Dr. William De Kroyft, of Rochester, N. Y. A few days before the wedding, while alighting at the door of his office, he was thrown from the carriage and injured, and although the injury was considered slight, it resulted in his death on the wedding day. A month later Mrs. De Kroyft became blind from grief and shock. She obtained a position as organist in the New York Institution for the Blind. The grace and beauty of her letters from the institution made her name familiar to the public, many having been copied in English papers, and in 1849 they were collected and published in a volume entitled "A Place in Thy Memory." Shortly after the publication of her book she went to Washington to introduce it there, and she also traveled throughout the United States and Canada. In 1871 Mrs. De Kroyft brought out an illustrated edition of her second book, "The Story of Little Jakey," since abridged in Johnson's "Little Cassies." In 1888 her third book, a memoir, entitled "Mortara," appeared. Although over eighty years of age she has now (1900) in preparation five manuscripts, among them "The Foreshadowed Way," reminiscence, which is nearly completed.

FOSTER, James Martin, merchant and planter, was born in Monroe county, Ala., April 23, 1831, son of Flavel and Mary (Hollingsworth) Foster. He was educated at the Western Military Institute, Drennon Springs, Ky., and on completing his course of study, engaged in cotton planting in Louisiana. This business was at that time one of the most profitable in this section, and attracted numbers of young men from all parts of the country. From the start Mr. Foster achieved a marked success and rapidly gained position and fortune after the abolition of slavery mainly through his wise and far-sighted methods meeting the requirements of the new régime. He brought under his management large tracts of rich alluvial lands in the Red river valley in Louisiana and Arkansas, and realized an annual output of thousands of bales of cotton. His business methods have been widely copied by others, and he is the actual founder of one of the most extensive business

enterprises in the Southern states. Having achieved eminent success in cotton planting, he embarked largely in commercial business at Shreveport, La., where he has made his home since 1870. For many years he has been prominent in the Democratic politics of his state, and is one of the most trusted leaders of the party. He was president of the police jury of Caddo parish for a number of years. His administration of that office was a marvel of efficiency, and a model of excellence. He is an able and forcible speaker, and possesses the happy faculty of concise and lucid statement, added to keen powers of analysis. He is a man of strong intellect, of resolute purpose, of unflinching zeal and unlaughed courage. He unites in strong combination the sagacity to plan and the

force to execute. With unflinching fortitude and aggressiveness in action and the self-reliance of the man sure of himself, he is yet simple and modest in character. Beneath a somewhat severe exterior beats a heart at once sympathetic, generous and charitable. Mr. Foster was married, in 1859, to Mary Ellen, daughter of Dr. William Long, of Natchitoches, La., a lady of rare character and accomplishments. They have had eleven children, of whom six are living. One of his sons was Lieut. Claiborne L. Foster, of the U. S. army, whose untimely death set a period to a promising career. His daughter, Lucille, is the wife of Benton McMillin, now (1899) governor of Tennessee.

FOSTER, Claiborne Jasper, planter and soldier, was born in Monroe county, Ala., Aug. 4, 1831, son of Flavel and Mary (Hollingsworth) Foster. While he was still very young his parents settled in Caldo parish, La., where his father engaged extensively in planting. He was educated in the private schools of this parish and completed his education at the Western Military Institute, Drennon Springs, Ky. He then engaged in agricultural pursuits until 1862, when he became first lieutenant of a company formed in his neighborhood, which had been sworn into the Confederate service in New Orleans at the outbreak of the civil war. It was mustered into the 27th Louisiana regiment as company G, and upon the resignation of its captain, Mr. Foster succeeded him and remained in command until the close of the war.

After the battle of Shiloh the regiment was ordered to Vicksburg, Miss., where Mr. Foster's company was occupied in the construction of fortifications, and during the siege was continually at the front. He performed memorable services in volunteering and successfully accomplishing a plan of firing the buildings and wooded land on the west of the Mississippi river, so as to give the Confederate gunners clear sight of the Federal transports floating down at night from Milliken's bend to land troops below the city. In carrying out this exploit he was several times exposed to the fire of the siege and field pieces, but escaped unhurt, and it was chiefly due to his bravery that Grant's well planned movement was defeated. His discipline was strict, but his great solicitude for the comfort and well-being of all under his command won him their heartfelt affection, and even after the Confederate cause was known to be lost no man of them deserted. After the war he resumed the occupation of a planter at his home place near Keatchie, La., where he resided until his removal to Shreveport in 1882. Throughout the period of corruption, oppression and spoliation under the "carpet bag" government of Louisiana, he repeatedly proved himself a mediator between contending factions, ever counseling moderation and discouraging resorts to violence. He led the way to the true use of negro labor under the new conditions, to the benefit of his associates, the good of the freedmen and the increase of his own property. His fair and honest methods won the hearts of his laborers, as they had previously won those of his soldiers, and the meanest freedman felt as safe with him as with his own friends. Later, with his brother, he formed the firm of Foster & Glassell, cotton factors and commission merchants, of Shreveport, La. This house is now one of the largest in its line in Louisiana, and like the development of the cotton business throughout the state, owes its growth largely to Capt. Foster. In 1868 he was a candidate for the state legislature, but was defeated by the

C. J. Foster

James M. Foster

corrupt political methods then in force. He was, however, elected in 1884, and served for four years with eminent credit; originating, among other beneficent measures, the present Sunday law and the constitutional provision for the regulation of railroads. He was a life-long, active and earnest member of the Methodist church, South, and a constant contributor to all worthy charities. He was married, in 1865, to Eunice, daughter of Rev. John C. and Mrs. Emily L. Burruss, of Caddo parish. They had three sons and one daughter. He died at Shreveport, La., June 22, 1898.

McDOUGALL, Alexander, soldier, was born in the parish of Kildalton, island of Islay, Scotland, in 1732, son of Ronald and Elizabeth McDougall, who, in 1738, emigrated to the colony of New York with three children. Alexander appears to have become a sailor at an early age, for in 1756, during the war with France, he commanded the war vessels *Barrington* and *Tiger*, sailing from New York under letters of marque. After the war he became a merchant, and was conspicuous in public affairs, especially in the events that tended toward independence. In December, 1769, he published a hand-bill signed "A Son of Liberty," denouncing the assembly for granting money to support the British troops quartered in New York, and for rejecting a proposition that authorized voting by ballot.

Addressed to "the betrayed inhabitants of the colony," this publication had immediate effect. On the following day, in obedience to its call, the citizens assembled at the liberty pole in the "fields," as City Hall park was called, and disapproved the assembly's proceedings. A second hand-bill signed "Legion," charged the assembly with a betrayal of their trust; a reward was immediately offered for the discovery of the writer of this "infamous and seditious libel," and McDougall, betrayed by the printer, was imprisoned, having refused either to plead or to give bail. On receiving his sentence he exclaimed: "I rejoice that

I am the first to suffer for liberty since the commencement of our glorious struggle!" He was confined for more than five months in what was later the debtors' prison, now the Register's office in the City Hall park, but during that period was a popular hero; men and women of the best families visited him, patriotic songs were sung under his window, and on the anniversary of the repeal of the Stamp Act, 300 Whigs toasted him at dinner and sent a delegation to dine with him in jail. Though released on bail he was never brought to trial. He presided over an assembly of the people thereafter known as "the great meeting in the fields," July 6, 1774, at which a non-importation resolution, drafted by him, was passed, and other patriotic measures were approved. It was at this meeting that Alexander Hamilton made his first appearance as a public speaker. McDougall was one of a committee of 100 chosen May 5, 1775, to organize a provisional government for the city, and when, June 30, the first New York regiment was formed he was made its colonel. On Aug. 9, 1776, he was promoted brigadier-general, and on Oct. 20, 1777, major-general. He was actively engaged at Chatterton's hill near White Plains; was under fire again in New Jersey, and then, early in 1777, was placed at Peekskill in charge of army stores. There, on March 22, a large force of British landed; but not before McDougall

had withdrawn the garrison and most of the stores. He took part in the battles of Germantown and White Plains; was placed in command of all the posts in the Highlands in 1778, and commanded at West Point from July 19 to Dec. 6, 1779; from June 20 until July 4 and Sept. 20 until Oct. 5, 1780; and again from June 20, 1781, until Jan. 18, 1782. In 1780 and 1781 he was a member of congress and in the latter year was appointed minister of marine, but declined the position, preferring to return to the field. After the war he was elected to the New York senate and served in that body until his death. He was the first president of the New York Society of the Cincinnati, and first president of the Bank of New York. McDougall (Macdougall) street, New York city, was named in his honor. He was married, in 1751, during a visit to Islay, to Nancy, daughter of Stephen McDougall. His two sons died unmarried—John in the Canada expedition, 1775, and Ronald Stephen from the result of injuries received in the field, 1786. His only daughter, Elizabeth, was married to John Lawrence, the jurist. Gen. McDougall, described by Washington, as "a brave soldier and a distinguished patriot," died in New York city, June 8, 1786. His remains lie in the family vault of the McDougall, Lawrence and Hawkes families in the First Presbyterian Church, Fifth avenue, corner of Twelfth street. Tablets have been erected to his memory in the church above mentioned, and in the chapel at the U. S. Military Academy at West Point.

WHITMAN, Ezekiel, jurist, was born at East Bridgewater, Mass., March 9, 1776, son of Josiah and Sarah (Sturtevant) Whitman. His father dying in 1778, his childhood was one of hardship and poverty, but his uncle, Rev. Levi Whitman, of Wellfleet, took him in charge and gave him a rudimentary education. He entered Brown University in 1791, and was graduated in 1795. He studied law in the office of Benjamin Whitman, of Hanover, and later in the office of Nahum Mitchell, of East Bridgewater, where he manifested such solid judgment, keen perceptions and exceptional ability that Mr. Mitchell confided many cases to his care. He was admitted to the bar of Plymouth county in 1799. After some years of increasing business and popularity at New Gloucester, Me., he removed to Portland in 1807, where his practice became extensive. In 1806 he was nominated to represent the Cumberland district in congress, but was defeated; two years later, however, he was elected. In 1815-16 he was a member of the executive council of Massachusetts, and in the latter year was a member of the Brunswick convention, held upon the important question of the separation of Maine from Massachusetts. In 1816 Mr. Whitman was elected to the 15th congress and afterward to the 16th and 17th. His influence in the national councils was powerful because of his experience, integrity and solid judgment. Feb. 4, 1822, he was appointed by Gov. Parris, chief-justice in the newly established court of the common pleas for the state of Maine. He retired from congress to enter upon his new duties. In December, 1841, he was appointed chief-justice of the supreme court, which office he resigned in October, 1848. As a judge he was calm, self-possessed and dignified; he was clear and concise in the expression of his opinions, and he was the incarnation of honesty. He was married, Oct. 31, 1799, to Hannah, daughter of Cushing Mitchell, of East Bridgewater, by whom he had one son and two daughters. Judge Whitman died, Aug. 1, 1866.

RANKIN, John Chambers, clergyman, was born near Greensboro, Guilford co., N. C., May 18, 1816. His preparatory studies were directed by an older brother, the Rev. Jesse Rankin; at the age of seventeen he began teaching, and later entered

A. M. Dougall

the University of North Carolina, Chapel Hill, but was not graduated. In September, 1836, he entered the Theological Seminary of Princeton, New Jersey, where he pursued the usual three years' course of study. While yet a student of the seminary he was accepted as a missionary by the Presbyterian Board of Foreign Missions, but prior to embarking spent nearly a year in visiting the churches of Ohio, Indiana and Kentucky as an agent. On June 3, 1840, he was married to Sarah T., daughter of the Rev. David Comfort, of Kingston, N. J., and August 5th of the same year sailed for India. After reaching his destination, Furrukhabad, he began the study of the native languages and soon acquired such a knowledge of them as to speak and write with fluency. Besides some minor contributions to the native press, in 1845, he wrote and published, in the Urdu language, an extended reply to a learned and formidable Mohammedan book against Christianity; in the meantime teaching and preaching among the natives with much earnestness and efficiency. In the midst of these labors his health failed and he proceeded to Simla, in the Himalaya mountains, in the hope of restoration, but finding little relief there he returned to America in 1848. After a rest of three years his health was sufficiently restored to justify him in taking a pastorate. On Sept. 4, 1851, he was installed by the presbytery of Elizabethtown, pastor of the church of Basking Ridge, where he served forty-four years. He resigned in 1895. During his ministry he wrote the following articles for the "Princeton Review": "Foreign Missions and Millenarianism" (1856); "Thoughts for the Ministry" (1854); "Arminianism and Grace" (1856), and "The Mode of Baptism—The Subjects of Baptism—A Practical View of Infant Baptism" (1861). He also published a volume on "The Coming of The Lord" (1855). In 1867 the honorary degree of D. D. was conferred on him by the College of New Jersey. He resided among the people whom he so long served until his death, April 24, 1900.

KOOPMAN, Harry Lyman, poet and librarian, was born at Precept, Cumberland co., Me., July 1, 1860, son of Charles Frederick and Mary Brewer (Mitchell) Koopman. His paternal grandparents were Niclas and Fredrika Maria (Lingvist) Koopman, natives of Gothenburg, Sweden. He was educated in the public schools of Precept, and entered Colby College, receiving the degree of A. B. in 1880, and of A. M. in 1883. After graduating at Colby, he was for a short time principal of a grammar school at Claremont, N. H. In 1881 he became clerk in the Astor library, and was catalogue at Cornell University library (1883-84); at Columbia College library (1884-85); at Rutgers College library (1885-86), and at the library of the University of Vermont (1886-92). In 1893 he was appointed librarian of Brown University, which position he still holds. Mr. Koopman has published several volumes. "The Great Admiral" (1883); "Ellen Statira Koopman, a Tribute to her Memory" (1885); "Orestes, a Dramatic Sketch, and Other Poems" (1888); "Woman's Will, a Love Play, with Other Poems" (1888); "The Crime of the Culprist Eay, with Other Poems" (1890); "The Gothic Minster, a Poem" (1891); "The Mastery of Books, Hints on Reading and the Use of Libraries" (1896); "Morrow-Songs" (1898). He has also published "Bibliography of George Perkins Marsh" (1892), and has edited "Address Book of Living Graduates of Brown University" (1891-99), and "Historical Catalogue of Brown University, 1764-1894" (1895). He was president of the Massachusetts Library Club (1900-01). He is an advocate, perhaps the originator, of the plan of having a select or standard collection of books accessible to the public in connection with every large library. Mr.

Koopman spent the year 1892-93 in the graduate school of Harvard University, receiving the degree of A. M., in 1893. In 1889 he was married to Helene Luise, daughter of Christoph Wilhelm and Johanna Friedrika (Baumbach) MAYER, of Ulm, Germany. They have one son and one daughter.

ALGER, Horatio, Jr., author, was born at Revere, Mass., Jan. 13, 1832, son of Horatio and Olive A. (Penny) Alger. His father was a well known Unitarian clergyman, who was twice a member of the Massachusetts legislature. His earliest American ancestor was Thomas Alger, who was in Taunton, Mass., in 1665, and was married to Elizabeth Packard. Israel, son of Thomas, was married to Patience Hayward, and their great grandson, James, who was married to Hannah Bassett, was the father of the first Horatio Alger. Horatio Alger, Jr., received his preliminary education at the district schools of his native place and at Gates Academy, Marlboro, Mass. He was graduated at Harvard College in 1852, when twenty years of age. During his college course he devoted himself to the languages, taking the prize in Greek and also receiving the first prize of forty dollars for an essay on "Athens at the Time of Socrates." At eight years of age he had begun the study of Latin, and had read the works of Josephus, the Jewish historian. His first published writings appeared when he was but thirteen years of age. For five years after leaving college he was occupied in teaching and journalism, being editorially connected with two Boston papers, by which he was enabled to defray his expenses at the Cambridge Theological School during 1857-60. In 1861, after a year's sojourn in Europe, he became a private tutor at Cambridge, Mass., and in December, 1864, was ordained pastor over the Unitarian church at Brewster, Mass. In April, 1866, Mr. Alger established himself in New York city, and there began the study of the habits and manners of the street gam. He soon became a familiar figure along the docks and wherever friendless nelehms were to be found. By his ready sympathy and generous charity he was not long in winning their confidence and becoming a favorite. One of the results of his studies was "Ragged Dick," first published in the "Student and Schoolmate," a powerful and original story, and the first that brought him into popularity with the juvenile world. Before this Mr. Alger had written for leading periodicals, and had by special request prepared a short sketch for the "Student and Schoolmate," which attracted much notice. He had also written a number of stirring war poems. Mr. A. K. Loring, of Boston, in consequence of the popularity of "Ragged Dick," made a liberal offer to Mr. Alger to write six volumes on similar subjects. These became phenomenally popular, hundreds of Sunday-school libraries buying them, and they were read in every state and territory. Eight other volumes followed under the general term of the "Tattered Tom" series, after which came the "Brave and Bold" and the "Pacific" series. The last were the result of studies and observations made during a trip to the Pacific coast in 1877, and later to other parts of the country. In 1881 Mr. Loring retired, and Porter & Coates, of Philadelphia, succeeded as Mr. Alger's authorized publishers. His story of "Phil the Fiddler," who was an Italian musician, is said to have been the cause of breaking up almost imme-

Horatio Alger

diately the venarious traffic of the padrones, who leased boys of their parents in southern Italy and subjected them to the most cruel treatment in their creed for money. Mr. Alger was the author of over seventy volumes of stories, and of two books of poems, besides his numerous contributions to weekly papers and magazines. He was never married, but his fondness for children was so great that he adopted two boys and a niece, of whom he assumed the entire charge. A biographical notice of Mr. Alger, published in 1885, speaks of him as one who "has long employed his genius in behalf of a multitude of boys, greater than any man can number. He never uses tobacco or liquor in any form. His eye is as clear and his cheeks as rosy at fifty as though he had always lived in the country and dined daily on buttermilk. He is one of the most genial of men, and is entertaining in whatever company he is thrown." One of these boys figures in "The Young Circus Rider." He died at Natick, Mass., July 18, 1899, at the home of his sister, Mrs. O. A. Cheney.

PUTNAM, Salmon W., manufacturer and inventor, was born at Hopkinton, N. H., Dec. 10, 1815. He was descended in the seventh generation from John Putnam, who, with his wife, Priscilla, came from Abbot-Aston, near Aylesbury, England, in 1634, and settled in Salem, Mass. He was related to Rufus Putnam, of revolutionary fame. John Putnam, the father of Salmon W., was a scythe-maker. The latter left home when only eight years of age to earn his living, and entered the cotton factory at New Ipswich, N. H., of which his brother-in-law, Christopher Whiting, was overseer. Here he worked for several years as a bobbin-boy, until he obtained employment in one of the large manufacturing concerns of Lowell, Mass., and became an overseer at seventeen years of age. He went into business with his brother, John, at Fitchburg, Mass., then a town of about 2,000 inhabitants. Their business, which was at first mainly repairing, increased, and they began to manufacture gear-cutting machines, after

the model of one which they had made for themselves, which brought them trade, and established for them a reputation. They also made new kinds of machinery for paper manufacture, and a kind of gauge-lathe for making bobbins. During the first years of the partnership Salmon W. Putnam invented the universal or self-adjusting box and hanger, now generally used, and originated the idea of the feed-rod. The first, applied to shafting and engine lathes made by the firm, was quickly copied by others and soon was generally used. He also first suggested a change in the construction of the table for the upright drill, which had been fixed immovably on the arm supporting it; so that the table should

revolve on its own centre, and could also be moved with the arm around the upright pillar, and thus the workman was enabled to place any part of the work under the drill without detaching it from the table. The present form of the back-rest in the engine-lathe enabling the workman to lift the piece of work out of, instead of drawing it through, the rest, was also his device. Mr. Putnam did not secure these important inventions to himself or to the firm by procuring patents on them. He afterwards invented the frictional feed as used on machinist's tools, and also the revolving saw, both of which are of much practical value and extensively used. Their business so increased that in 1845 they erected a large new building, which, however, was burned in 1850. In 1851 the shop

was rebuilt, and until 1858 they continued business as a firm. In that year a stock company was formed under the style of the Putnam Machine Co., with a capital of \$40,000, which was increased, in 1866, to \$160,000, and afterward to \$320,000. In the same year the Newton mill property, which covered an area of twenty acres, was purchased by the company and new buildings were erected. Mr. Salmon W. Putnam from the beginning was the active business manager of the firm, and the president of the company. He was the guiding and controlling mind of the enterprise, a thorough mechanic, an ingenious inventor, and an able business man. He represented Fitchburg in the state legislature in 1857, and was a director in the Rollstone National Bank. He was married, March 10, 1840, to Harriet J. Whitney, of Ashburnham. They had four sons. Mr. Putnam died, Feb. 23, 1872.

DIVEN, Alexander Samuel, lawyer and soldier, was born at Catharine, Tioga co. (now the town of Dix, Schuyler co.), N. Y., Feb. 10, 1809, son of John and Eleanor (Means) Diven. He was educated in the schools of his native town and in the academies at Penn Yan and Ovid. He studied law with Judge Gray at Elmira, and was admitted to the bar in 1832, at the age of twenty-three. He became a member of the celebrated legal firm of Diven, Hathaway & Woods in Elmira, and conducted a successful practice until the civil war began. Gen. Diven was one of the organizers of the Republican party in New York, and was prominent in its councils. He served one term, 1858-59, in the state senate, and in 1860 was elected a representative to the 37th congress, taking a prominent part in its deliberations during that critical time in the nation's history. He was strongly opposed to slavery. He was the first man in congress to introduce measures providing for the employment of colored troops in the Federal army, having drafted and introduced the first bill for that purpose. In 1862 he left his seat in congress, and assisted in raising the 107th regiment of New York volunteers; entering the service as its lieutenant-colonel, and distinguishing himself in the Virginia campaigns of 1862 and 1863. After the battle of Antietam he was commissioned a colonel, and led his regiment at Chancellorsville in the thickest and fiercest part of that deadly conflict. He was commissioned an adjutant-general in May, 1863, with the rank of major. On Aug. 30, 1864, he was brevetted brigadier-general, and assigned to duty as assistant provost marshal-general for the western district of New York, subsequently being appointed to the command of the northern and western districts, which he retained until the close of the war. Many years before the civil war Mr. Diven became a director in the New York and Erie Railroad Co., being its leading attorney until 1865, when he was chosen its vice-president, and held that position for three years. He was successful, through tireless efforts, in raising the necessary millions for constructing railroad connection between Elmira and New York. He was also a moving spirit in establishing the road from Binghamton to Corning and Hornellsville, and was projector of the Elmira and Williamsport railroad (now a part of the Northern Central), and president of the company during the entire time of its construction. In connection with Gen. Thomas Price and James P. Kirkwood, he contracted for the construction of the Missouri Pacific railroad, and, under the firm name of Diven, Stanciliff & Co., engaged in constructing the southwest branch of that road. He was for years the president and leading manager of the Elmira and Horseheads street railway, and, with his sons, the owners and managers of the Elmira water-works. Gen. Diven was married twice: first, in 1845, to Amanda Beers, of Elmira, by whom he had four sons and four daughters. One

S. W. Putnam

of the sons, Alexander, was mayor of Elmira in 1881 and 1882; another, George M., is an eminent member of the legal profession in that city. Mrs. Diven died in 1875. Gen. Diven was married again, in 1876, to Maria Joy. He died June 11, 1896.

COOPER, Theodore, civil engineer, was born at Cooper's Plains, Stoulen co., N. Y., Jan. 12, 1839, son of John and Elizabeth M. (Evans) Cooper. He was graduated at Rensselaer Polytechnic Institute, Troy, N. Y., in 1858. His first important engagement was as assistant engineer on the Troy and Greenfield railroad in the construction of the Hoosac tunnel. In the fall of 1861 he entered the navy as an engineer officer, and served throughout the war. In June, 1865, Mr. Cooper was assigned to the Winnipeg, then at Newport, R. I., and during the summer cruise was instructor in practical steam engineering to the graduating class of the Naval Academy. During the next three years he was instructor in this department at Annapolis. In 1868-70 he was attached to the Nyack, of the south Pacific squadron; then returning to duty at the Naval Academy, and finally, in July, 1872, resigning from the service, with the rank of first assistant engineer. In May, 1872, he was appointed inspector of the material for the steel bridge at St. Louis, the construction of which he afterwards superintended, and on its completion succeeded James B. Eads as engineer of the Bridge and Tunnel Co. At the time of its construction this was the longest cantilever bridge in the world, the two half-arches each extending 540 feet from the river piers; and Mr. Cooper's important services are fully set forth in Prof. Woodward's account. Mr. Cooper superintended the Delaware Bridge Co.'s works at Phillipsburgh, N. J.; was the superintendent and assistant general manager of the Keystone Bridge Co., at Pittsburg; designed and built the Laredo shops of the Mexican National railroad, the Norton Cement mills at Binewater, and has acted as consulting engineer for various railroads, cities, towns and corporations, besides designing numerous bridges and engineering structures, including the Seekonk bridge at Providence, R. I.; Sixth street, at Pittsburg; Second avenue over the Harlem river, New York city; Newburyport bridge over the Merrimac, and the Junction bridges over the Allegheny. He was engineer of construction on the New York Elevated railroad; and consulting engineer for the Suburban Rapid Transit Co., the New York rapid transit commission, the Boston rapid transit commission, as well as for the Harlem river commission. Pres. Cleveland appointed him a member of the board of bridge experts to determine the Hudson river bridge span in 1894. He has published many papers on engineering subjects, and has twice been the recipient of the Normal medal from the American Society of Civil Engineers. He is a member of the American Society of Civil Engineers; the Military Order of the Loyal Legion; New York chamber of commerce; New York Historical Society; Century Association, and is a life member of the Naval Institute and of the Society of Fine Arts, besides being corresponding member of the American Institute of Architects. Mr. Cooper is unmarried.

KNOTT, Aloysius Leo, lawyer and statesman, was born in Frederick county, Md., May 12, 1835, son of Edward and Elizabeth Sprigg (Sweeney) Knott. His father, a native of Maryland and a planter, was a lieutenant in the war of 1812. His mother was a daughter of Allan Sweeney, of Choptico, St. Mary's co., Md. The family descends from John Knott, who came to Maryland from Yorkshire, England, in 1642. Mr. Knott was educated at St. John's College, Frederick, and on his removal to Baltimore, in 1847, entered St. Mary's College, where he was graduated in 1853. He read

law in the office of Hon. William Schley, in the meantime holding for two years both a Greek and mathematical professorship at his alma mater. He was admitted to the bar in 1857, and formed a partnership with James H. Boyans, which continued two years. From the beginning of his career he has taken an active part in politics. In the memorable campaign of 1860 he supported Stephen A. Douglas, and opposed secession. In 1861 he was active in reorganizing the Democratic party of the state, and, as secretary of the state central committee, helped to inaugurate the movement to defeat the call for a constitutional convention. The movement, however, was unsuccessful, although the protest against misrule in the state was vigorously inaugurated, and in November, 1866, the Democratic party succeeded in securing a two-thirds majority in each house of the legislature. The result was that in January, 1867, a new constitutional convention was assembled. Mr. Knott was at this time a member of the legislature, and was a member of the joint committee of both houses which reported a bill to call the new convention; a member of the committee on the judiciary, and chairman of the committees on elections and on internal improvements. In 1867 he was elected state's attorney for Baltimore by a large majority, being re-elected in 1871 and 1875. In this capacity he tried many important cases, both civil and criminal, some of them involving grave questions of constitutional law, particularly touching the constitutionality of the Federal laws passed to enforce the fourteenth and fifteenth amendments of the U. S. constitution. Upon his retirement from this office, in 1880, he resumed general legal practice. He was a delegate to the Democratic national conventions of 1864 and 1872, and a member of the national Democratic executive committee in 1872-76. He was active in the presidential campaign of 1884, making vigorous speeches in several states; and on Pres. Cleveland's inauguration was appointed second assistant postmaster-general. In 1886 he went to Havana, and arranged with the governor-general of Cuba for a mail service between Cuba and Spain, by way of Key West, Tampa and New York, by the Plant system of railroad and steamship. In 1890 he became associated with Robert G. Washington, Linden Kent and R. Byrd Lewis in conducting the case on behalf of the heirs of Henry Harford, last lord proprietary of Maryland, in the government suit to settle the right and title of parties to the lands under the Potomac river opposite Washington. The case was argued in 1895 before the supreme court of the District of Columbia, and in October, 1898, before the U. S. supreme court. Mr. Knott took a prominent part in the presidential campaign of 1896, sustaining Mr. Bryan and the Democratic platform adopted at Chicago, and in 1900 was chairman of the delegation from Maryland to the Kansas City convention. He is a contributor to periodical literature, and is a member of the Maryland, University, Country and Catholic clubs, of Baltimore, and of the General Society of the War of 1812, of which he was unanimously elected judge-advocate general in 1898 and 1900. In 1890 Mr. Knott was elected to the house of delegates of the general assembly of Maryland and was made chairman of the committee on corporations in that body. He was married, in 1873, to Regina Maria, daughter of Anthony Keenan, of Baltimore.

A. Leo Knott.

CALLAHAN, James Morton, author and educator, was born at Bedford, Ind., Nov. 4, 1864, son of Martin Isaac and Sophia Oregon (Tannehill) Callahan. His father, a teacher and farmer, was a son of Isaac Callahan and great grandson of Henry Callahan, who emigrated from Ireland and settled at Martinsburg, Va., at the close of the revolution. James spent his early life in the country, where he showed a disposition to study both nature and books. After a course in the public schools he was graduated at the normal school at Mitchell, Ind., and took a commercial course

J. M. Callahan

of study at Delaware, O. Beginning in 1883 he taught school for several winter terms, continuing his studies during the spring and summer vacations. In 1886 he became principal of the Carr Graded School at Medina, Ind., and in 1889-90 taught in the Normal Pedagogical Institute, at Hope, Ind. In 1890 he was elected superintendent of the Hope public schools, but resigned to accept a position in the Southern Indiana Normal School. He attended the University of Indiana in 1892-94, receiving the degree of A. B. in 1894, and A. M. the following year. During the summer of 1894 he was a graduate

student at the University of Chicago, and in the following October he entered Johns Hopkins University, where, after three years of hard study in the graduate courses in history, jurisprudence, politics and economics, he received the degree of Ph. D. For the last two years he was successively assistant and fellow in history. He was acting professor of American history and constitutional law at Hamilton College in the year 1897-98, since which he has been lecturer in diplomatic history at Johns Hopkins University, devoting the larger part of his time to the field of American diplomacy and foreign relations (especially to subjects having direct bearing upon present conditions and upon questions of American national policy), and obtaining his material principally from researches in the archives and libraries at Washington, D. C. He has written "The Neutrality of the American Lakes and Anglo-American Relations" (1898), "Cuba and International Relations" (1899); "American Relations in the Pacific and the Far East" (1901); "The Diplomatic History of the Southern Confederacy." He has also had experience as a newspaper correspondent, and has written short articles for several periodicals. Several of Mr. Callahan's monographs have appeared in the reports of the American Historical Association, of which he is a member. The Chicago "Inter Ocean," in a review of his work, says: "Our author is in no sense speculative. He simply tells the facts of history, allowing the reader to draw his own conclusions. He writes in a style that is attractive, optimistic, flowing and full of vitality, and endeavors to state facts in their true relations and bearings without prejudice or prophecy."

PINCHOT, Gifford, forester, was born at Shinsbury, Conn., Aug. 11, 1865, son of James and Mary E. (Eno) Pinchot, and grandson of Constantine Cyril Desrie Pinchot, a native of Breteuil, France, who, for his political faith, came to America in 1815, settling at Milford, Pa., where he became a merchant with large western interests. His maternal grandfather was Amos Richards Eno. On his

mother's side he is a direct descendant of William Phelps, one of the founders of Windsor, Conn., and the progenitor of a family prominent during colonial times and the revolutionary war. His great-uncle, John S. Phelps, was a brigadier-general during the civil war, and governor of Missouri (1875-82). Gifford Pinchot attended Phillips Exeter Academy, and was graduated at Yale University in 1889. Deciding to take up forestry, in October, 1889, he went to England to consult with the men best able to direct his studies. As a result of his observations and after having spent some time in examining the forestry exhibit of the Paris exposition he entered the École Nationale Forestière, Nancy. Early in 1890 he began field work in the French Alps and the Vosges, and spent a short time in the city forest of Zurich, Switzerland. During the summer of that year he accompanied the students of the English Forest School on a three-months' trip in Germany and Switzerland, under the direction of Sir Dietrich Brandis, and after a few months' study in Vienna, Munich and Bingen returned to America. In 1891 he traveled in Arizona, Arkansas, California, Oregon, Washington and British Columbia, and aided in the preliminary examination of George Vanderbilt's forest at Biltmore, N. C., where, in January, 1892, he began the first systematic forest work in the United States, introducing a method of scientific management still applied there. Mr. Pinchot prepared the Biltmore and North Carolina exhibits for the World's fair at Chicago. In December, 1893, he opened an office in New York city, as consulting forester, and was engaged for the next three years in miscellaneous work in various sections of the country, during this time acting as a member of the jury of award on forestry at the Atlanta exposition in 1895. He was secretary of the forest commission of the National Academy of Sciences, appointed in 1896, to consider and report upon the inauguration of a forest policy for the lands of the United States; was appointed confidential agent of the secretary of the interior to examine and report upon the forests of the reserves (1897), and was appointed forester and chief of the division of forestry of the U. S. department of agriculture in 1898—a position he still occupies (1901). Mr. Pinchot is a member of the Century Club, the University Club, the City Club, the Yale Club; a life member of the National Academy of Design and the National History Society, in New York city; the Washington Academy of Sciences, the American Economic Association, the American Association for the advancement of Science, the National Sculpture Society, the Municipal Art Society, the National Art League,

the National Municipal League, the Boone and Crockett Club, the American Forestry Association, the Pennsylvania, New Jersey and Connecticut Forestry associations; the National Geographical Society, the American Geographical Society, the Metropolitan, the Cosmos and Golf clubs, of Washington, D. C.; the Graduates' Club, of New Haven, and the Sierra Club, of San Francisco. He was the first native American to make forestry his profession. He is the author of "The White Pine" (18—); "A Study of Forest Fires and Wood Production in Southern New Jersey" (Annual Re-

Gifford Pinchot

port State Geologist for 1898). "The Timber Trees and Forests of North Carolina" (Bulletin No. 6 of North Carolina Geological Survey), "The Adirondack Spruce" (18—), and the "Primer of Forestry" (Bulletin No. 24 of the Division of Forestry), besides numerous minor articles. With his father, mother and brother, Amos R. E. Pinchot, he founded the Yale Forest School at New Haven, Conn., of the governing board of which he is a member and in which he holds the position of special lecturer on forest policy, and the Yale Summer School of Forestry, at Grey Towers, Milford, Pa., the library building and collection of forest books for which he joined his father in presenting.

SCHEPPEGRELL, William, physician, was born in Hanover, Germany, Sept. 22, 1860. He received his elementary education in Germany, but at an early age removed with his parents to the United States, settling in Charleston, S. C., and was graduated with high honor and as valedictorian at the College of Charleston in 1880. In 1881 he entered the Medical College of the State of South Carolina, his preceptor being the late Prof. R. E. Kinloch, the distinguished surgeon of South Carolina. Before completing his course of study Dr. Scheppegrell became professor of chemistry and mathematics. He received the degree of A. M. from the College of Charleston in 1881, his thesis for this occasion, "The Chemical Properties of the Electric Spark," attracting considerable attention. During this time he devoted himself to the study of physics, in which he made many important investigations, especially in the study of electric energy. In 1887 he resumed his study of medicine, and on graduating received the appointment of resident surgeon of the Charleston Hospital. In 1890 he removed to New Orleans, and was appointed assistant surgeon to the Eye, Ear, Nose and Throat Hospital, and assistant in laryngology to the New Orleans Polyclinic. For the past ten years Dr. Scheppegrell has been identified with progress in laryngology and otology, and many important surgical inventions and methods of treatment in this specialty have been contributed to the

profession as the result of his labors. He is associate editor of the "Laryngoscope"; co-editor of the "Annals of Otology, Laryngology and Rhinology," and American collaborator of a French periodical in the same field. His contributions to the medical and scientific journals of America and Europe have been numerous, among which may be mentioned: "The Treatment of Laryngeal Tuberculosis with Cupric Interstitial Cataphoresis, with Report of Cases";

"The Comparative Pathology of the Negro in Diseases of the Ear, Nose and Throat, from an Analysis of 11,855 Cases";

"Non-Malignant Tumors of

the Larynx"; "The X Rays and Their Application in Medicine and Surgery," and many others. His book on "Electricity in Diseases of the Nose, Throat and Ear" was published in 1898, and is considered a standard work on this subject. Dr. Scheppegrell is a member of a number of national and foreign medical societies. He is president of the Western Ophthalmologic and Oto-Laryngologic Association; in 1897 was vice-president of the American Laryngologic, Rhinologic and Otologic Society, and president of its southern section; is also vice-president of the New Orleans Electric Society and of the

Orleans Parish Medical Society, fellow of the American Academy of Medicine, and honorary member of several European scientific societies. In 1882 he was married to Jessie, daughter of the late Prof. Alessandro Gambati, a famous Venetian artist and composer. They have one daughter, Jessie Agatha.

HORSKY, Edward, lawyer, was born in Helena, Mont., June 12, 1873, son of John and Louise (Seykora) Horsky. His father was one of the pioneers of Montana, and is now (1901) a prominent man, being receiver of the U. S. land office at Helena. The son received his early education in the public schools of his native city, and at the age of fourteen was sent to Philadelphia, to enter the High School, where he studied for three years. In 1890 he was graduated with distinction, receiving a certificate entitling him to teach in the capacity of public school principal, and on June 6, 1896, he received the honorary degree of A. M. from the same institution. After graduation he returned to Helena; studied medicine for one year under a physician there, and then removed to New York city, where he attended the Bellevue Hospital Medical College

for another year. He then received the appointment to a position in the U. S. assay office of Helena, but in the fall of 1893 resigned to take up the study of law in the University of Michigan. After receiving the degree of LL. B., he was at once admitted to the bar of Michigan, June 15, 1895, and a few months later to the bar of Montana. He was admitted to practice in the U. S. circuit court, Oct. 18, 1897, and in the U. S. circuit court of appeals at San Francisco, Feb. 28, 1899. He became city attorney of Helena in 1898, and is there recognized as an able attorney. He speaks several languages, and is prominent in the social circles of the city, having served for a year as president of the Sons and Daughters of the Montana Pioneers. Mr. Horsky is a prominent Republican, and has been chairman of the Republican committee of Helena. He is interested in the Howard mine, near his home.

DENT, Elmer Addison, clergyman, was born near Athens, O., Nov. 30, 1861, son of Richard Shively and Malvina (Evans) Dent, and a descendant of Cecil Calvert, Lord Baltimore, through his paternal grandmother, Sarah Jane Calvert. He was prepared at the Atwood Institute and the Northwestern Ohio Normal University, and was graduated at the Ohio University in 1888, and at the Yale Divinity School in 1891, taking a post graduate course at the Boston University in philosophy and comparative religions. He organized the Athens Summer Normal School for teachers, in which he was an instructor for three seasons, and also engaged as lecturer in the teachers' institutes of that state. Upon completing his education he began the study of law, but, believing himself better fitted for the church, soon prepared for the Methodist Episcopal ministry. His first charge was at Unionville, Conn., 1890. Joining the New York east conference in 1892, he was appointed to Windsor Locks, Conn., in 1893, and to St. Andrew's, New Haven Conn., in 1896. The attention of the progressive and aggressive thinkers and church workers of America had been attracted to the "Forward movement," under Hugh Price

Hughes, of London, which had already been inaugurated in New York city, within the bounds of the New York conference. It is a form of applied and aggressive Christianity, which maintains the evangelistic spirit, and unites to it the prominent features of the open and the institutional church. Tradition is abandoned and such methods of work are adopted as are developed out of the needs of the local field. Mr. Dent having been requested to introduce the movement in the New York east conference, resigned his charge in New Haven in 1898, and went to New York city, where he inaugurated the people's forward

movement in the Sixty-first Street Methodist Episcopal Church of that city, in which he is still pastor (1901). Here a Bible and music school have been established, chorals and supplied choirs, catechumen and confirmation classes introduced, and a burning evangelism is maintained. Possessing a strong interest in politics, in early life he was elected secretary of the Republican Club of Athens, became a delegate to congressional and other political conventions, and secretary of the Law and Order League of that city. On April 19, 1893, he was married to

Oliver C. Dent

Madeline Campbell, daughter of Edward Mortimer and Jessie (Percy) Archibald. The Archibalds are numbered among the crusaders, whence they obtain their crest and motto, a palm leaf, and "*Palmu non sine pulevere*." The Percys were earls of Northumberland. Mrs. Dent's maternal grandfather, Stephen Percy, was the captain who saved the crew of the New York passenger ship, Northumberland, in 1857, for which he received a gold and silver medal from the United States and English governments respectively.

JACKSON, Edward Payson, educator and author, was born at Erzerum, Turkey, March 15, 1840, son of William C. and Mary A. (Sawyer) Jackson. His parents were American missionaries under the American Board of Commissioners for Foreign Missions. His father was graduated with first honors at Dartmouth College and at Andover Theological Seminary. After ten years of missionary life, varied with many hardships, including the plague and a war between the Turks and the Koords, his mother's health became impaired, and the family returned to America in December, 1845. In 1856 Prof. Jackson entered Phillips Academy, Andover, Mass., and later was class poet at Amherst College, from which he received the honorary degree A. M. in 1870. He served during the civil war as private in the 45th, and as lieutenant in the 6th Massachusetts regiments. He was principal of high schools in Westboro and Holyoke, Mass.; superintendent of schools in Whitehall, N. Y.; principal of the Ladies' College, Ottawa, Canada, for three years, and since 1877 has been master of the famous Boston Latin School, the alma mater of so many distinguished men. In 1873 he published "Mathematical Geography," and in 1886 "A Demigod," a novel. These were followed by "The Earth in Space" (1887), and "Character Building" (1891), and nearly a hundred essays, poems and stories in various magazines. The novel, "A Demigod," was published anonymously, and was attributed to several noted novelists until its true authorship was disclosed. In 1889 the American Secular Union offered a prize of \$1,000 for the best essay adapted to aid in the instruction of youth in the purest principles of morality without

inculcating religious doctrines, and in 1891 the prize was equally divided between Nicholas P. Gilman, editor of "The New World," for an essay entitled, "The Laws of Daily Conduct," and Prof. Jackson for "Character Building: A Master's Talk with his Pupils." These essays were published separately and also in a joint volume, entitled, "Conduct as a Fine Art" (1892). He is past commander of Post 68, G. A. R., ex-president of the Chickatabut Club, vice president of the Colonial Club, a member of the Boston Authors' Club, and editor of "The Bohemian," a magazine of short fiction. He was married, in 1865, to Helen Mar Smith, of Lowell, Mass., who died in 1896. He has three sons and one daughter.

SOLEY, James Russell, lawyer and author, was born in Boston, Mass., Oct. 1, 1850, son of John James Soley. He is fifth in descent from John Soley, the first American ancestor, who emigrated from England during the seventeenth century, and settled in Charlestown, Mass., where he died in 1696. Both paternal and maternal lines lead back to Judge James Russell, the members of whose family were prominently connected with the colonial history of Massachusetts as early as 1640. James Russell Soley was graduated at Harvard University in 1870, studied law under Alexander B. Hagner, later judge of the supreme court of the District of Columbia, and at the Columbian University, where he was graduated, and was admitted to the bar of the District of Columbia. He was appointed assistant professor of history in the U. S. Naval Academy in 1871, and two years later was made head of the department of history and international law. He was commissioned professor in the U. S. navy Aug. 18, 1876, with the rank of lieutenant, and in 1878 was on special duty in Europe in connection with the department of education at the Paris exposition, and to inspect foreign naval colleges. In 1882 he was promoted to the rank of commander, and appointed superintendent of the naval war records at the navy department, where he remained until 1890. In 1885 and following years he lectured on international law at the Naval War College, Newport, R. I., and he also delivered courses of lectures at the Lowell Institute, Boston, on "European Neutrality During the Civil War," and kindred subjects, during 1885 and 1888. Resigning his commission in 1890, he was appointed assistant secretary of the navy, filling the office until his resignation in March, 1893. During his service in the navy department he took an important part in the development of the navy. He was an earnest advocate of the construction of large battleships, and did much to bring about the definite adoption of this type in 1890, which resulted in the construction of the Indiana, Massachusetts, Oregon and Iowa. He was also largely instrumental in the introduction of business methods in naval administration, the revision of the system of purchases and accounts, and the creation and organization of the naval militia. He devised and formulated the system governing the employment of labor in navy yards, adopted in 1891. In May, 1893, he removed to New York city, where he became a member of the law firm of Tracy, Boardman & Platt, since Boardman, Platt & Soley. In 1899 he was one of the counsel for Venezuela before the international tribunal of arbitration at Paris. He is the author of "History of the Naval Academy" (1876); report on "Foreign Systems of

James Russell Soley

Naval Education" (1880); "The Blockade and the Cruisers" (1883); "The Rescue of Greely," in collaboration with Com. W. S. Schley (1885); "The Boys of 1812" (1887); "Sailor Boys of '61" (1889); has edited the "Autobiography of Com. Morris" (1880), and has contributed "The Wars of the United States" to Justin Winsor's "Narrative and Critical History of America." He has also contributed to "Battles and Leaders of the Civil War," and is the author of various articles in "Scribner's Magazine," the "Century Magazine" and the "Nation." At the unveiling of the Jeanette monument at Annapolis, 1890, he delivered an address, and upon the invitation of the city of Boston pronounced a eulogy on Adm. Porter at the memorial celebration of 1892. He was married in New York city, Dec. 1, 1875, to Mary W., daughter of Robert Shaw and Mary (Woolsey) Howland. They have two children.

BILLINGS, George Herrick, metallurgist and engineer, was born at East Taunton, Mass., Feb. 8, 1845, son of Warren and Mary Frances (Cassell) Billings. His earliest American ancestor was William White, the Pilgrim, a son of Bishop John White of England. The paternal ancestor, Roger Billings (b. 1620; d. 1683), settled in Dorchester, Mass., about 1638; and from his second wife, Hannah, is descended Roger (b. 1658; d. 1715), who was married to Sarah Paine, Joseph, son of the latter, was married to Ruhannah Badoeck; his son, William, was married to Mary Badlam; William's son, Daniel, was married to Rebecca Battles, and his son, William, who was married to Marcia Stone, became the grandfather of our subject. The latter received his early education in the public schools of Pittsburgh, Pa., and at the Institute of Technology of Boston, Mass. In 1862 he entered the employ of Schoenberger & Co., a firm of Pittsburgh iron manufacturers, and since that time his attention has been given to the study and practice of iron metallurgy and its chemistry, as well as to various improvements in the manufacture of steel and the working of metals, especially in the processes of cold drawing and cold rolling.

He advanced through the positions of roll turner, heater and roller, finally becoming chemist and general manager. In Pittsburgh he served with the firm of Hatlam, Raum & Co. (1859-60), and of Reese, Grall & Dull (1861-62). He then removed to Boston, where he was connected with the Norway steel and iron works (1863-68), the firm being Naylor & Co., after which he removed to Cincinnati, O., to enter the Globe rolling mill as mechanical engineer, and remained there until 1872. Returning to the Norway steel and iron works he built and managed the compressed steel-shafting department (1872-85); he then assumed the general management of these, at that period, extensive iron works. At the present time (1901) he is the proprietor of a factory at Boston, Mass., where he is engaged in the manufacture of cold rolled and cold drawn steel and iron, having invented a number of improvements in machinery for this purpose. He is connected with the Orpheus Musical Society, and as a member of the American Institute of Mining Engineers, has written several papers, the principal being: "The Properties of Iron Alloyed with Other Metals" (1877); "The

Preference of Tensile Resistance to Carbon as a Measure of Hardness" (1880); and "On the Decrease of Ductility by Cold Rolling" (1883). He is also a member of the Boston Athletic Association, and the Old Colony Historical Society. Mr. Billings was married at Hallowell, Me., April 21, 1879, to Hattie Ann, daughter of Maj. Goodwin, and has had two children, Edward G., and Kenneth S. Billings.

CARLTON, Thomas, clergyman, was born at Londonderry, Rockingham co., N. H., in 1810, of sturdy New England stock. His youth was spent on a farm, in Niagara county, N. Y., where his parents had removed while he was a lad. He entered the ministry in 1829, and becoming a member of the Genesee conference of the Methodist Episcopal church, he was pastor of several churches in western New York, among them Canandaigua, Rochester and Buffalo, besides filling the position of presiding elder of three districts and serving for three years as financial agent of the Genesee Wesleyan Seminary. In 1852 he was elected senior agent of the Methodist Book Concern, located in New York city, and retained the position for twenty years. During this entire period he was also treasurer of the Methodist Episcopal Missionary Society. In these positions he displayed unusual talent as a financier and manager of the publishing interests of the denomination, and the present commanding position of the Methodist Book Concern, together with its extended facilities for the distribution of religious literature, should be credited largely to him. His services to the Missionary Society during the financial panic of 1857 were particularly efficient, and enabled it to meet all obligations as they became due. He was a member of all the general conferences from 1848 to 1872. The honorary degree of D. D. was conferred on him by Dickinson College. At the time of his death he was treasurer of the city of Elizabeth, N. J., where he died April 16, 1874.

ADLER, Liebmann, rabbi, was born at Lengsfeld, Saxe-Weimar, Germany, Jan. 9, 1812. His first teachers in Hebrew and rabbinical literature were Isaac Hess, rabbi of Lengsfeld, and Kuntzeuth, rabbi in Gelnhausen. He afterwards continued his theological studies at the Talmudic College in Frankfurt, and took a course of pedagogical studies at the Teachers' Seminary at Weimar. Upon graduation at this institution he served as a teacher in his native town, Lengsfeld. In 1851 Adler emigrated to America, and soon after his arrival was elected teacher and preacher of the Jewish congregation at Detroit. In 1861 he became rabbi of the Chicago Jewish congregation—Kehillath Anshe Maarabim ("Congregation of the Men of the West"), which position he held for the rest of his life. In his declining years, however, he was relieved from active official duties. Liebmann Adler was conservative in his religious views; but advocated, in a moderate degree, some reform in the liturgy and ceremonial life of his co-religionists. In 1890 he published two collections of sermons: "Belehrungen über Torah und den Fünf Bücher Moses" (2 vols.), and "57 Vorträge über Torah aus den Nachlassischen Biblischen Bichern." A selection from these sermons was translated into English and published by the Jewish Publication Society of America under the general title "Sabbath Hours" (1895). Liebmann Adler died in Chicago, Ill., Jan. 29, 1892.

Thos Carlton

George H. Billings

MILLIKEN, Richard Allen, merchant, was born at Waterford, Ireland, Sept. 15, 1817. His line dates back to one of the five regal families of Ireland of the thirteenth century, the name being O'Melaghlin. Upon his mother's side were many noted leaders of the British army and navy. He came to America when very young, his mother having already preceded him to Louisville, Ky., where she then resided. Shortly after he entered Barstow College and on completing his education in the fall of 1834 he engaged in the sugar business in New Orleans, in which line he continued to the

time of his death. When the civil war broke out he was handling about one-third of the crop of Louisiana; at that time he was appointed commissioner by the Confederate states in charge of the Burra Burra copper mines, near Knoxville, Tenn., which position he filled throughout the war. After the close of hostilities he resumed charge of his business, and having acquired extensive sugar estates, was at the time of his death one of the largest sugar-cane planters in Louisiana. Mr. Milliken was married, Oct. 6, 1864, to Deborah A. Farwell, of Unity, Me., sister of Sen. Nathan A. Farwell. In memory of her husband Mrs. Milliken donated to the state of Louisiana a building in New Orleans, known as the "Milliken Memorial" and used as a hospital for children. It is considered one of the finest institutions of its kind in the United States, and is under the direction of the Charity Hospital of that city. Mr. Milliken died in New Orleans, La., May 28, 1896.

NELSON, Thomas Henry, diplomatist and lawyer, was born in Mason county, Ky., Aug. 12, 1824. After studying law at Maysville, he removed to Rockville, and subsequently to Terre Haute, Ind. In the latter place he devoted himself to the practice of law, and in 1855 formed a law partnership with Judge Abrahm A. Hammond, afterwards governor of Indiana. At the same time he took a very active part in politics, becoming a leader of the Whig party and one of the founders of the Republican organization in the West. He served several times as delegate to state and national conventions, and was a candidate for presidential elector, congressman and other offices, but was usually defeated, as he resided in a district strongly Democratic. He was U. S. minister to Chili in 1861-65, and there became very popular on account of his brave action in rescuing many persons when the Jesuits' church at Santiago was burned, Dec. 6, 1864. In the war between Chili and Spain (1864-66) he was conspicuous as an active mediator. He was appointed minister to Mexico April 16, 1869, and upon the expiration of his term in 1873 settled as a lawyer in Washington, D. C., where he has since resided.

LOWELL, John, jurist, was born in Boston, Mass., Oct. 18, 1821, son of John Amory and Susan (Cabot) Lowell. He was a grandson of John Lowell, author (1769-1810); a great-grandson of John Lowell, statesman (1713-1802), and cousin of James Russell Lowell, the poet. His early education was received at Ingraham's private school in Boston, and later he entered Harvard, where he was graduated in 1843. He studied law in the office of the Loring's, in Boston, and was admitted to the bar in 1846. Engaging in the practice of his profession in Boston he continued there until March 11, 1865, when he was appointed by Pres. Lincoln U. S. district judge for the district of Massachusetts, the same court over which his great grandfather was the first judge

to preside, being appointed by Washington. On Dec. 18, 1879, he received the appointment of U. S. circuit court judge, and held the office until his resignation, May 1, 1884. He gained special prominence as an authority on the law relating to bankruptcy, patents and admiralty, and prepared the draft of a bankruptcy bill, which was introduced into congress in 1882. The Woodbury patent case was decided by him, involving interests of nearly \$40,000,000. His decisions have been published in two volumes (1877), and he has also written a treatise on the law of bankruptcy, published in 1899, after his death. After his retirement from the bench he engaged in private practice, and at the time of his death was serving as chairman of the state commission on revision of the taxation laws. Judge Lowell was married in Boston, Mass., May 18, 1853, to Lucy B., daughter of George B. and Olivia (Buckminster) Emerson. He died at Brookline, Mass., May 14, 1897, survived by two sons, John and James A. Lowell, both lawyers, of Boston.

GREEN, Norvin, capitalist, was born at New Albany, Floyd co., Ind., April 17, 1818, son of Joseph and Susan (Ball) Green. He was a descendant of Robert Green, who emigrated from England to America about 1665, settling in Virginia. Other distinguished members of the family were Gens. John and Moses Green, of the revolutionary army. Joseph Green was a volunteer in the war of 1812, fought under Jackson at the battle of New Orleans, and was one of the organizers of Floyd county, Ind. Norvin Green was educated at the country schools, and in youth removed with his father to Breckinridge county, Ky. He assisted his father in farm and other work, and when his father met with reverses the son replenished the family funds by his mercantile enterprise. In 1838 he entered upon the study of medicine under Dr. Mason, of Carrollton, Ky., and continued it in the University of Louisville, where he was graduated in March, 1840. During this period he also devoted considerable time to studying the rudiments of Latin, English literature and science. For thirteen years Dr. Green practiced his profession in Kentucky, where he also took an active interest in politics, serving two terms in the state legislature and acting as presidential elector on the Pierce ticket in 1852.

In May, 1853, he was appointed commissioner and disbursing agent for the construction of the new post-office and custom house at Louisville. In 1854 Dr. Green joined the Southwestern Telegraph Co., a syndicate formed to lease the lines from Cincinnati to New Orleans. In 1857 he visited New York city, and laid before the presidents of the six leading telegraph companies the first draft of the "six-party contract," which was the beginning of all telegraph consolidation. Immediately upon the execution of this contract the North American Telegraph Association was organized, with Peter Cooper as president, and in 1866 Dr. Green took an active part in uniting all U. S. companies under one head, as the Western Union Telegraph Co., of which he became president in 1878. In 1867 he again served in the Kentucky legislature and in 1870 became president of the Louisville, Cincinnati and Lexington railroad. Throughout his career he was noted not only for courteous and sympathetic bearing, but also for actual deeds of friendship and benevolence. He was married, in 1840, to Martha, daughter of James W. English, of Carrollton, Ky., who served as captain in the war of 1812. Four

R. Milliken

Norvin Green

sons and one daughter were born of this union. Though spending much time in New York, Dr. Green retained his residence in Louisville, Ky., where he died, Feb. 12, 1836.

PORTER, Augustus Steele, senator, was born at Canandaigua, N. Y., Jan. 18, 1798, nephew of Peter Buel Porter, secretary of war under Pres. Adams, and grandson of Joshua Porter (b. 1730; d. 1825), who for more than fifty years held offices of trust in Connecticut. Though a physician by profession, he served in the state assembly prior to the revolution, was a member of the committee of the pay table and a colonel of state militia. He superintended the manufacture of the first cannon balls made in America during the war, and owing to the scarcity of regular officers, personally led a regiment at the battle of Saratoga. His surgical skill was also utilized at the close of that fight. Augustus Steele Porter received his classical education at Union College, Schenectady, N. Y., where he was graduated in 1818, subsequently studying law under Judge Howell, at Canandaigua. He began the practice of his profession at Black Rock, N. Y., but afterward removed to Detroit, Mich., where he was elected mayor in 1836, serving in the office for some years. He became a U. S. senator Dec. 2, 1839, having been elected as a Whig, and continued to represent Michigan in that body until March 3, 1845, ranking as one of the best and most useful members. In 1848 he removed to Niagara Falls, which at that time was the home of his father, and was elected from that place as a delegate to the national Federal convention held in Philadelphia in 1866. Sen. Porter died at Niagara Falls, N. Y., Sept. 18, 1872.

CONRAD, Robert Taylor, jurist and author, was born in Philadelphia, Pa., June 10, 1810, son of a local publisher. His earliest American ancestor, Thomas Kunders, came over on the Concord from Creffeln on the Rhine, reaching Philadelphia Oct. 6, 1683. His descendants are Conrads, Canards, Canards and others. Robert studied law, and being admitted to the bar, early gained a reputation as an eloquent pleader. Before he attained his majority he wrote a tragedy, "Conradin," and at the age of twenty-

two began publishing the "Daily Commercial Intelligencer," afterward merged into the "Philadelphia Gazette." Failing health compelled him to abandon this occupation, and in 1834 he again took up his legal practice. He became recorder, and in 1838 was appointed judge of the criminal sessions for the city and county of Philadelphia; this position he filled until the court was dissolved. He then returned to journalism, edited "Graham's Magazine," and became engaged on the "North American" as associate editor. In 1854 the Whig and American parties elected him mayor of Philadelphia, which had just been consolidated with its districts, and two years later he was

appointed to the bench of the quarter sessions, remaining in that capacity until 1857. He was the author of the tragedy, "Alymer," or the Bondman of Kent," which was in 1814 performed with great success by Edwin Forrest, who played the role of its principal figure, Jack Cade. His other productions include a tragedy, "The Heroine," and a volume of poems and sonnets, among which are, more conspicuous, "The Sons of the Wilderness," being a meditative poem on the sorrows and sufferings of the North American Indians, and the "Lord's Prayer." He died in Philadelphia, June 27, 1858.

R. T. Conrad

PAINE, Martyn, physician and author, was born in Williamstown, Orange co., Vt., July 8, 1791, eldest son of Judge Elijah Paine, and brother of Charles Paine, governor of Vermont. Elijah Paine, Jr., a distinguished jurist of New York, was also a brother. Martyn Paine was graduated at Harvard A. B. in 1813 and M. D. in 1816. After securing his degree he went to live in Montreal, Canada, and practiced there until 1822, when he removed to New York city, where he lived the rest of his life. From 1841 to 1867 he was professor in the University of New York, Medical School, which, with four other physicians, he

founded in 1841. He first came before the public as a writer in 1832, during the cholera epidemic, when he published: "On the Cholera Asphyxia as It Appeared in the City of New York in 1832." His other books are: "Medical and Physiological Commentaries" (3 vols., 1840-44); "Essays on the Philosophy of Vitality and on the Modus Operandi of Remedial Agents" (1842); "A Therapeutical Arrangement of the Materia Medica and Upon Physiological Principles" (1842, of which several editions, revised and altered, were published, the last being in 1848); "The Institutes of Medicine" (1847, 7th ed., 1863); "On the Soul and Instinct, Physiologically Distinguished from Materialism" (1849); "Memoir of Robert Troup Paine by His Parents" (1852); "A Review of Theoretical Geology" (1856), and "Physiology of the Soul and Instinct, as Distinguished from Materialism, with Supplementary Demonstrations of the Divine Communication of the Narratives of Creation and the Flood" (1872). In 1851 the University of Vermont conferred the degree of LL. D. upon Dr. Paine. He was a member of the leading medical societies of Europe and America. He died in New York city, Nov. 19, 1877.

WILLIAMS, Thomas Hill, senator, was born in North Carolina about 1780. After completing an academic education, he studied law and was admitted to the bar; but his practice was shortly afterward relinquished in order to accept an appointment as a war department clerk in Washington. Pres. Jefferson appointed him, in 1805, as register of the land office of Mississippi and commissioner for deciding land claims in that territory. Later he became collector of customs for the port of New Orleans, and served for a few years in that office. He acted as a delegate to the convention which framed the constitution of Mississippi in 1817, and was one of the first senators elected to represent that state in the upper house of the national legislature, taking his seat on Dec. 11, 1817. At the expiration of his term, in 1823, he was re-elected to the U. S. senate, and thus served continuously for twelve years, retiring on March 3, 1829. He voted for the Missouri compromise of 1820. His later years were spent in Robertson county, Tenn., where his death occurred about 1840.

NOBLE, James, senator, was born at Battletown, Frederick co., Va., about 1760, and in his youth removed to Kentucky. Subsequently he again removed to Indiana, where he became very influential, though possessed of only a self-directed education. He was one of the first sent as to represent Indiana in the upper house of the national legislature, and in that body he served from Dec. 12, 1810, to his death, which occurred in Washington, D. C., Feb. 26, 1841.

Martyn Paine

KIMBER, Arthur Clifford, clergyman, was born near New Hamburg, N. Y., Nov. 5, 1844, son of Arthur C. and Elizabeth (Card) Kimber. His father, who came to this country in 1836, was a native of Louthrop, Gloucestershire, England, and a son of John Kimber and his wife, Mary Pegler, of the Peglers, founders of Bledington. John Kimber was descended from Thomas of Fairford (1688-1784), who was a descendant, probably, of Edmund of Down Ampney, born about 1540. The name originally was de Kymber. The Kimber's mother was a daughter of Clark and Mary (Biss) Card, natives of Bruton, Somersetshire, England. He attended the Richards Academy, Westport, Conn., the Flushing, N. Y., public high school, and St. Stephen's College, Annandale, N. Y., where he was graduated at the head of his class in 1866. He was then made tutor in Latin and Greek, and in 1868 was appointed acting professor of mathematics. He resigned this position in 1869 to enter the General Theological Seminary, New York, graduating Hellenistic Greek prizeman in 1871. The first part of his diaconate was served at St. Paul's, Trinity parish, New York city, immediately under the rector, Dr. Dix; the remainder at the parish church under Dr. Francis Vinton. He was ordained priest, May 26, 1872, and in November was elected by the Trinity vestry vicar of St. Augustine's, then in the Bowery. After a few years, the work there assuming such proportions that a larger building was needed, the vestry erected the present church and mission house in East Houston street at a cost of \$200,000, which, when consecrated in 1877, was the most complete establishment of its kind in the country. The plans made by Dr. Kimber and Mr. William A. Duncan, of the vestry office, embraced many new features, a chief being a large number of separate rooms for the Sunday-school, which was graded into ten grades with a very complete lesson system, and which became one of the largest in the country, numbering nearly 1,400. The baptisms were over 500 a year. Dr. Kimber has marked executive ability, and as a speaker is clear, concise and logical. Since its inception he has been a member of the uniform Sunday-school lessons committee; he is

also a member of the New York Churchmen's Association, of the National Arts Club, and of the New York Genealogical and Biographical Society. As a leading member of Mayor Strong's advisory committee on the east side parks it was due to him and Col. S. V. R. Cruger that these parks are of their present size and not one block each. In 1870 he began the publication of the "Palladium," a religious college monthly, and in 1878 was the first editor of the "Church-Sunday-school-Teachers' Weekly." He has contributed at times as "N. O. M." to the New York dailies, the "Times," of London, and the leading church papers. He first devised for use in St. Augustine's the now extensively used service leaflets. In 1867 Dr. Kimber first suggested through the "Scientific American" the word "photogram." He invented in 1866 a multiple charge cannon, in 1867, simultaneously with another, an improvement in postage stamps; and in 1871 as one of the "Evening Mail's" staff, diagramming with loose type and rules. He anticipated two important electrical patents, and has devised plans for torpedo warfare, one being in the British tactics, the other in the American. Dr. Kim-

ber received the degree of B.D. in 1879 and S.T.D. in 1886 from St. Stephen's College. He was married, June 12, 1894, to Clarissa, daughter of G. Weston Evans, of Vancouver, Wash., a descendant through her paternal grandmother of John Alden, of the Mayflower. They have three sons, John Evans, Arthur Clifford, Jr., and George Card.

PRATT, Edwin Hartley, physician and surgeon, was born at Towanda, Pa., Jan. 6, 1819, son of Leonard and Betsey (Belding) Pratt. His father was professor of special pathology and diagnosis in the Hahnemann Medical College, Chicago. The son attended the district schools of Carroll county, Ill., whither his parents had removed in 1851, and later Mount Carroll Seminary and Wheaton College, Illinois, for one year each. He was graduated at the University of Chicago in 1871, and having completed his medical studies at the Hahnemann College, was valedictorian of his class in 1873. After graduation he was offered and accepted the adjunct professorship of anatomy with the additional duties as demonstrator, and after spending the summer vacation at the Jefferson Medical College, Philadelphia, in the Keen School of Anatomy, he assumed his duties in the autumn. After filling the chair for three years he joined with several other physicians in founding the Chicago Homeopathic Medical College, where for seven years he held the professorship of anatomy and for six years more that of surgery. While occupying the latter position he first pronounced his theory and method known to the profession as "official surgery," by which is explained on an anatomical and physiological basis the predisposing causes of all chronic diseases. The faculty of the college, recognizing his signal achievements and the value of his new theory, created for him the chair of official surgery, which he still occupies. The official theory is now recognized by the establishment of special chairs for its exposition in leading medical colleges; also a number of state medical societies have official surgery bureaus on their programs. The demand for instruction in this subject became so urgent that in 1886 a private post-graduate class was established by Dr. Pratt for the convenience of practicing physicians and surgeons. It has been held for over thirteen years during the first week in September with an annual attendance of between fifty and one hundred from all parts of the United States and Europe. Subjects for this clinic, representing most complicated cases, have sometimes been brought from long distances. To meet the needs of the new procedure, Dr. Pratt has invented a number of surgical instruments which have passed into general use in the profession. He has also originated several new operations, notably an improved method in vaginal hysterectomy, wherein a skillful process of dissection has been substituted for the barbarous practice formerly employed of using clamps and ligatures. In 1892 he founded the "Journal of Official Surgery," which at once commanded the attention of the profession, many of his editorials having been widely copied by American and foreign medical journals. Dr. Pratt is a member of the American Institute of Homoeopathy, the Illinois Institute of Homoeopathy, the Chicago Homeopathic Medical Society, the Chicago Homeopathic Club, and of the medical societies of Illinois, Kentucky, Missouri and other states. He is also a charter member of the Apollo Musical Club

Arthur C. Kimber

of Chicago, one of the largest organizations of its kind in the world. The degree of LL.D. was conferred on him by the University of Chicago in 1886. In 1875 he was married to Isadore M. Bailey, of Jersey Heights, N. J.

TORRANCE, Francis J., manufacturer and railway president, was born in Allegheny City, Pa., June 27, 1839, son of Francis and Jane (Waddell) Torrance. His education was obtained in the public schools of his native city and the Western University of Pennsylvania. He entered business life in 1875 as a clerk in the employ of the Standard Manufacturing Co., of which his father was president. Subsequently he became its treasurer and general manager, and he is now (1901) chairman of the executive committee and vice president of the Standard Sanitary Manufacturing Co., into which the former concern has been merged. This company manufactures porcelain enameled baths, and bath-room appliances, and sanitary plumbing goods for every known use. It is probably the largest establishment of its kind in the world, having a capital of \$5,000,000, an authorized bond issue of \$2,500,000, with factories, branch stores and offices in Pittsburgh, Pa., New York city, Louisville, Philadelphia, Chicago, New Orleans, St. Louis, Montreal, Honolulu, Mexico City, London, Paris, Hamburg, St. Petersburg, Cape Town, Sydney, Buenos Ayres, and Havana. In 1892 Mr. Torrance represented his congressional district in the Minneapolis convention which nominated Benjamin Harrison for president, and he was delegate-at-large from Pennsylvania to the national convention at St. Louis, which nominated McKinley. He has been a select councilman for nine years, and for seven years president of that body. In 1894 he was appointed by Gov. Hastings a commissioner of public charities; was reappointed in 1897, and reappointed in 1899 for five years. For six years he has been a member of the committee on lunacy of the board of public charities; this board has entire control of all the institutions in Pennsylvania classed as criminal, penal, correctional and charitable. He has also been appointed delegate-at-large and special delegate to numerous conferences concerning prisons and charities.

Mr. Torrance is president of the Washington (Pa.) Electric Street Railway Co., the Indiana Railway Co., the Standard Ice Co., of Pittsburgh; the Monongahela and Ohio River Transportation Co., the Western Pennsylvania Exposition Society; the Pittsburgh Natatorium Co., and the Iron City Brick and Stone Co. He is a director of the Mechanics' National Bank, Pittsburgh; the Third National Bank, Allegheny; the National Union Fire Insurance Co., Pittsburgh; and the Sewickley Valley Trust Co., and chairman of the national committee of Confederate Supply Associations, which has control of nearly all the plumbing and sanitary supplies in the United States. For two terms he has been president of the American Republican Club, Pittsburgh, and he is chairman of the Republican city committee of Allegheny. Socially he is a member of the Duquesne, Country, Americans, Press and Civic clubs, of Pittsburgh; Stroubers and Fulton clubs, New York city; Manufacturers' Club, Philadelphia, and the Indiana Club, South Bend. During the past ten years he has been president of the board of trustees of the Sandusky Street Baptist

Church, Allegheny. Mr. Torrance was married, in 1884, to Marie K., daughter of David Dibert, of Johnstown, Pa. They have one daughter.

PITKIN, John Robert Graham, diplomat, was born in New Orleans, La., Feb. 12, 1841, son of John Waldo and Adeline (Graham) Pitkin. He is a lineal descendant of William Pitkin, a lawyer who emigrated from England in 1659, and settled in the Connecticut valley. The latter was married to Hannah Goodwyn, became the largest landholder of Hartford, and in 1664 was commissioned by the crown attorney-general of the Connecticut colony. John attended schools in New Orleans and New England, but was deterred by ill health from entering Yale. After a trip to Turkey and the Mediterranean sea, he returned to America and entered the University of Louisiana, where he was graduated, and admitted to the bar in 1861. He acted as principal of a public school in New Orleans until 1863, when he began to practice law in that city. In 1866 he was a delegate from Louisiana to the Southern loyalists' convention at Philadelphia, where his speeches were so favorably received that he was solicited by the Pennsylvania and New York Republican committees to deliver addresses throughout the state, and since that time he has served in a similar capacity through every presidential campaign. In 1867 he was appointed register in bankruptcy for Louisiana, which office he held for four years. Shortly before the presidential struggle of Hayes and Tilden he was appointed U. S. marshal for Louisiana by his personal friend, Pres. Grant, and during the intense excitement, which found frequent expression in bloodshed, he maintained the public peace by employing nearly four thousand deputy marshals. Later this action was inquired into by two committees of the house of representatives, but received entire justification. He resigned his office three months after the accession of Hayes, but in 1882 was again appointed marshal by Pres. Arthur. On Pres. Cleveland's inauguration he retired to the practice of law at New Orleans. Some months later he was designated by the U. S. circuit court as master in chancery in the suit of the Missouri Pacific Railroad Co. vs. the Texas and Pacific Railroad Co., and rendered valuable service in that capacity. In 1888 he was appointed U. S. minister to the Argentine Republic, where, in 1890, he checked the bombardment of Buenos Ayres by an insurgent fleet. In 1892 he declined re-appointment, and retired after a diplomatic career which had been highly commended. His address before the Washington convention in 1889 was printed by unanimous vote of congress, and at the Three America's exposition, New Orleans, he delivered a series of addresses which aroused much enthusiasm by their cogency and classic finish. He also opened the Louisiana immigration convention of 1888 with a memorable speech. In October, 1898, he was tendered an un-sought appointment as postmaster of New Orleans. He was a diligent student of literature and lectured occasionally in behalf of public objects, one of his most novel and successful literary addresses being on "The Fools of Shakespeare." In April, 1900, Mr. Pitkin was elected president of the Trans-Mississippi congress. He was one of the six original founders of the American Shipping and Industrial League. He died in New Orleans, La., in 1901.

KELLY, William, senator, was born in Tennessee about 1770, and after completing a classical

Francis J. Torrance

J. R. Pitkin

education, studied law, and took up its practice at Huntsville, Madison co., Ala., which he continued at Elyton, in Jefferson county. He was a Jackson Democrat in politics, and on this ticket was elected to the U. S. senate, taking the seat made vacant by the resignation of John W. Walker, and remaining a member of that body from Jan. 21, 1823, to March 3, 1825. After retirement he continued to make Alabama his home, until about 1831, when he removed his family to New Orleans, La. In the latter city his death occurred about a year later.

BOYD, Linn, congressman, was born in Nashville, Tenn., Nov. 22, 1800. In early life he removed with his parents to Trigg county, Ky., and there obtained what education could be secured in a country district. In 1819 he was commissioned to treat with the Chickasaw Indians on behalf of the government, for lands lying east of the Mississippi and Ohio rivers. At the age of twenty-six, while conducting a farm of his own in Calloway county, and showing an active interest in local questions, he was elected a representative in the state legislature, and served for three terms (1827-30). Returning to Trigg county he was elected from that district to the state legislature (1831-32) by the largest majority ever polled in the county, and three years later became a representative in the 24th congress

(1835-37). With the exception of the 25th congress, he continued to be a member of the house of representatives until 1855, being re-elected eight times. He was one of the introducers of the provision granting to actual settlers advantages over mere land speculators; served as chairman of the committee on territories; during two terms was speaker of the house, and throughout his entire congressional career labored faithfully for the interests of his constituents, retiring to private life with a high reputation. In 1859 he was elected lieutenant-governor of Kentucky, but did not live to take the office.

Mr. Boyd was married, Oct. 20, 1832, to Alice C. Benton, of Virginia; and after her death, on April 15, 1850, was married to Mrs. Anna L. Dixon, daughter of James Rhey, of Cambria county, Pa. She was a cousin of Pres. Fillmore, and at different times during his administration served as mistress of the White House. Mr. Boyd died at Paducah, Ky., Dec. 17, 1859, survived by his wife and one son, Rhey Boyd.

JULIAN, Isaac Hoover, author and journalist, was born near Centerville, Wayne co., Ind., June 19, 1823, son of Isaac and Rebecca (Hoover) Julian, of French and German descent. The first of the family to settle in America was René St. Julien, a native of Paris, who fought under William III, of England at the battle of the Boyne. He emigrated near the close of the seventeenth century, settling in North Carolina, but went afterward to Maryland, and thence to near Winchester, Va. His son, Isaac, great-grandfather of Isaac Hoover Julian, in 1741 was married to Barbara, daughter of Dr. Robert White, a Scotch emigrant, and settled in the Carolinas. Mr. Julian's grandparents were members of the Society of Friends. His parents were natives of Randolph county, N. C., and emigrated to Indiana territory near the beginning of the nineteenth century. The Hoovers and Julians were identified with the origin of Richmond. Isaac Julian assisted in clearing the heavy

forest from a portion of the site, and taught the first school in the township, while David Hoover, a brother-in-law, surveyed the plot and gave the name to the future city. In 1810 what was known as the "Twelve Mile Purchase" was made from the Indians, and Isaac removed thither. In 1822 he was a representative in the Indiana legislature. In the fall of 1823, attracted by reports of its fertility, he emigrated to the Upper Wabash valley. He died shortly after, and his widow and six children returned to Wayne county. Isaac Hoover Julian grew up to manhood on a small farm, and his education was restricted to a few terms at the district school, but was supplemented by a wide range of general reading. At the age of fifteen he began contributing to the newspapers and periodicals of his native state. After his majority he spent several years in Iowa, where he contributed to "The Ladies' Repository and Gatherings of the West." In 1848 he became deeply interested in the great political and social upheavals in Europe, and more especially in the anti-slavery movement in our own country. These gave inspiration to many of his subsequent writings. He then wrote for "The National Era," Washington, in whose columns "Uncle Tom's Cabin" first appeared. Returning to his native state, in 1850, he continued the study of law which he had begun in Iowa, and in 1851 was admitted to the bar, but finding the practice distasteful engaged in it for only a few years. In 1853 he was employed by a committee of anti-slavery friends to prepare an exposition of the legislation of Indiana respecting colored people. In 1854 he became editor of the Fort Wayne "Standard," and in 1857 edited an autobiographical memoir of David Hooper. In 1858 Mr. Julian purchased and published at Centerville "The Indiana True Republican." His editorial duties necessarily suspended his purely literary labors, but his previous writings had given him a creditable place in Western literature. Of his poetry James Whitcomb Riley said: "I have been impressed with all your verse as of a sterling and unusual product, based, as I believe it to be, upon poetic endowment the most genuine. Most certainly I find occasion to congratulate you for your song's sincerity and human heart and righteous message. Knowing and feeling its individuality, I feel equally pleased in the like worthy individuality of its author." Murat Halstead, in his reminiscences, referring to the political career of George W. Julian, said: "His brother Isaac was a valued contributor to 'The National Era.'" In January, 1865, Mr. Julian removed his paper to Richmond, changing its name to "The Indiana Radical." In 1873, because of the failing health of his wife, he removed to San Marcos, Tex., where he has since resided, resuming his vocation as journalist on the San Marcos "Free Press." He sold the "Free Press" in 1890, and in 1892 began his latest publication, "The People's Era." In June, 1900, he finally retired from the field of journalism, but still devotes himself to literary pursuits. He was married: first, in 1859, to Virginia M. Spillard, of College Hill, O., by whom he had five children; and second, in 1893, to Isabel McCoy Harvey, of Wisconsin.

SMITH, Wilson George, musician, was born at Elyria, Lorain co., O., Aug. 19, 1855, son of George T. and Calista M. (Wilson) Smith. His mother was a daughter of Pardon Wilson, one of the early settlers of Ohio. His father was editor of the Elyria "Courier" and a contributor to leading magazines and newspapers, and the early ambition of the son was to become an author. But after passing through the public schools of Cleveland he was obliged by ill-health to give up the thought of entering college, and his attention was turned toward music, which he studied at home with increasing

Linn Boyd

enthusiasm, meanwhile reading extensively in general literature. At the age of twenty-one he entered the College of Music in Cincinnati, studying under Otto Singer, who recognized his ability and advised him to study for the profession in Europe. Accordingly, in 1880, he went to Berlin, where, for more than two years, he studied music under Kiel, Kullak, Moszkowski, Scharwenka, Raff, and other great teachers. Upon returning to America in 1882 he settled in Cleveland, where he has since taught piano, organ, voice, and composition with remarkable success. In 1888-89 Mr. Smith was president of the Ohio Music Teachers' Association, and in 1889 was associated with Calixa Lavallee and Dr. Ziegfeld on the programme committee of the Music Teachers' National Association. He is often called upon to read papers before national and state associations, one of his best-known essays being "American Composers." His compositions for the piano include "Mazurka Hongroise" (op. 11); "Hommage a Grieg" (op. 18); "Echoes of Ye Olden Time" (op. 21); "Valse Scherzando" (op. 29); "Terpsichore"—valse de ballet (op. 31); "Polonaise de Concert" (op. 37); "Caprice Norwegienne" (op. 10); "Romantic Studies" (op. 57); "Etudes-Arabesque" (op. 55), and a progressive series of works in piano technique. The latter consist of "Special Scale Studies" (op. 55), two books; "Eight Measure Studies" (op. 60), two books; "Five-Minute Studies" (op. 63); "Thematic Octave Studies" (op. 68); "Chromatic Studies" (op. 69); "Transcription Studies" (op. 70), and "Half-Hour Studies" (op. 71). Among his numerous songs are "Good Night, Sweetheart," "Entreaty," "Thou Art Like Unto a Flower," "If I but Knew," "Go, Hold White Roses," "Shadow Song," "A Song of May," and a setting of Heine's song, "Du bist wie eine Blume." Concerning the characteristics of his composition, a prominent New York musician and critic has written: "His conceptions are always clear; his harmonies natural, though modern; his use of counterpoint being effective without at any time being obtrusive; poetical refinement, elegant simplicity, and masterly conciseness characterize all that he has written." Mr. Smith was married at Geneva, O., April 16, 1882, to Mezz Brett, a descendant of William M. Thackeray. She is a water-color artist of superior merit, and has written a number of stories and articles for the leading magazines.

MILLS, Albert Leopold, soldier, was born on Washington heights, New York city, May 7, 1854, fifth son of Abiel Backman and Anne (Warford) Mills. Through his father, who was a native of Old Hadley, Mass., he is descended from the earlier settlers of New England, and through his mother, from Long Island colonists, her immediate ancestors removing before the revolution to Hunterdon county, N. J. Albert L. Mills was educated in the schools of New York city until he entered the Military Academy at West Point, July 1, 1874. He was graduated and commissioned second lieutenant in the 1st regiment of cavalry, June 13, 1879, and was promoted first lieutenant 1st cavalry, Jan. 23, 1889, and adjutant 1st cavalry, Oct. 1, 1890, serving to Oct. 1, 1894. His first duty as an officer was in the department of tactics at the Military Academy, after which he served with his regiment on the Indian frontier in Oregon, Washington, Idaho, Montana, Dakota, Wyoming, and Arizona, participating in the Crow Indian campaign of 1887, the Sioux campaign of 1890, and other Indian disturbances. His regimental service was broken by a tour of duty as professor of military science and tactics at the South Carolina Military Academy at Charleston, and as an instructor in the departments of strategy, cavalry and tactics at the U. S. Infantry and Cavalry Officers School at Fort Leaven

worth, Kan. He was on duty at the latter school when war with Spain was declared. He took part in the Santiago campaign and in the battles of Las Guasimas and Santiago, in the latter being very severely wounded. His appointment to the superintendentcy of the Military Academy, Aug. 22, 1898, with the rank and emoluments of colonel in the army, came to him from the president as a recognition for gallantry during the Santiago campaign. Col. Mills was appointed captain and assistant adjutant-general of the 3d brigade, cavalry division, 5th army corps, June 10, 1898, promoted captain of the 6th U. S. cavalry Oct. 24, 1898, and was nominated by the president for brevet appointment of major and lieutenant colonel for gallantry in the battles of Las Guasimas and Santiago de Cuba. Col. Mills was married in 1884, in Brooklyn, N. Y., to Alada Thurston, eldest daughter of Rt. Rev. John Adams Paddock, D. D. They have one son and one daughter.

REDICK, John Irwin, lawyer, was born at Wooster, O., July 29, 1828, son of John H. and Eliza (Forbes) Redick. His father was a farmer. He was educated privately and at Delaware College. Having decided to adopt the legal profession he read law during the last year of his college course under the instruction of Eugene Parlee and the Hon. William Given, of Ohio. He was admitted to the bar in 1852 and removed to Lansing, Mich., but finding there little call for his legal talents engaged in the real estate business. In 1856 he removed to Omaha, Neb., and by persistent effort built up a lucrative law practice. In 1859 he formed a partnership with Clinton Briggs, and for ten years the firm held a prominent place at the Nebraska bar. In 1870 this partnership was dissolved, and Mr. Redick invested largely in Omaha real estate, which resulted in his gaining a considerable fortune. In 1860 he represented Douglas county in the territorial legislature. He always took a prominent part in politics, and was a Democrat up to the civil war, but at its close joined the ranks of the Republicans. He was chairman of the Nebraska delegation to the Baltimore convention which nominated Lincoln and Johnson, and was also chairman of the Nebraska delegation to the Philadelphia convention which nominated Grant for a second term. In 1876 he was appointed by Pres. Grant U. S. judge of New Mexico, which position he resigned after one year's service, but in 1880, becoming indignant at the defeat of Grant at the Chicago convention, returned to the Democratic fold. However, he again joined the Republicans, and voted for Harrison after his second nomination, and when the tree silver issue was presented took his final stand with McKimley for protection and the gold standard. Mr. Redick has done much to advance the material welfare of Omaha, and has contributed in many ways to its growth. He erected over forty of its buildings, and in most of its business enterprises has been a leading man. During 1886-89 he resided in Los Angeles, Cal., and was president of the Southern California National Bank. He was married three times, first, in 1856, to Mary E. Higby, of Pittsburgh, Pa., who died in 1861, leaving two sons, Charles and William, who still survive, second, in

1866, to Mary E., daughter of Capt. May, of Keokuk, Ia., by whom he had five sons; and third, in 1897, to Barbara, daughter of Lawrence Dundas Lyon, of Ingersoll, Ontario.

HOYT, John Philo, jurist, was born at Austinburg, O., Oct. 6, 1841, son of David and Susan (Paucher) Hoyt, and a direct descendant of Simon Hoyt, one of the original settlers of Boston. He worked on his father's farm, and attended the district school until he was sixteen years of age, when he was sent to the Grand River Institute, a local school of some note, to be fitted for teaching. He taught

school and further prosecuted his studies until 1862, when he enlisted in the Federal army, serving in various ranks until January, 1866. Returning home he entered upon the study of law, and later attended the Ohio State and Union Law College at Cleveland, O., where he was graduated in 1867. He began practice in Tuscola county, Mich. In 1868 he was elected prosecuting attorney of the county, and was re-elected in 1870. In 1872 he was elected a member of the state house of representatives, being re-elected two years later,

and upon the convening of the legislature, chosen speaker. He was appointed by Pres. Grant secretary of Arizona territory in 1876, and in the following year was made its governor. In 1878 dissatisfaetion arose at the conduct of Gov. Brayman, of Idaho territory, and Gov. Hoyt was designated to replace him. Becoming convinced that the charges were unjust he secured Gov. Brayman's reinstatement to favor, though he himself was left without an office. Pres. Hayes was so pleased with this action that he assured Mr. Hoyt he should have the first territorial governorship vacant; but as Mr. Hoyt preferred a judicial position he was appointed associate justice of the supreme court of the territory of Washington (Jan. 16, 1879). In 1883 he was reappointed, and served his second term, partly through an opposing administration. Upon his retirement from the bench in 1887, he assumed the management of the banking firm of Dexter Horton & Co., Seattle, Wash. He was president of the convention which formed the state constitution, and was then elected one of the judges of the supreme court of the state. He served for seven years under this election, during the last two of which he was chief justice; he was renominated in 1896, but was defeated with the whole Republican ticket. He thereafter retired to private practice in Seattle. In 1898 he was appointed one of the regents of the State University, which position he still holds (1901), and was in the same year made referee in bankruptcy, being reappointed in 1900. He was married at Caro, Tuscola co., Mich., Dec. 27, 1869, to Lettie J., daughter of Mortimer C. and Maria Lewis. She is a native of New York state, and a direct descendant of Anneke Jans, of New York city. They have two sons and a daughter.

WHITE, James, pioneer, founder of Knoxville, Tenn., was born in Iredell county, N. C., in 1737. For his services in the revolutionary war he received from the state of North Carolina a warrant for a large tract of land on the north bank of the Holston river. To this spot, which was then a dangerous wilderness, he removed in 1787, erected a fort and grist-mill, and commenced the establish-

ment of a settlement. In 1791 a treaty with the Cherokee Indians was made in the village, and this negotiation brought the place before the notice of Gov. William Blount, who adopted it as the capital of the Southwest territory. White then laid out his property in an extensive series of lots, and under the name of Knoxville the town soon attracted to itself a considerable population, bringing wealth to its founder. In the absence of Gov. Blount and Gen. Sevier, White assumed command of the fort, which at that time contained 300 stands of U. S. muskets with a large quantity of ammunition, and in September, 1793, was preparing with forty settlers to defend it against a threatened attack of some 1,500 Cherokees. The Indians, however, fled on discovering the approach of Gen. Sevier and his riflemen. In 1784 Mr. White was one of the founders of the state of Franklin, of which Gen. John Sevier was elected governor. This state covered the same territory that finally became Tennessee. He served in the territorial legislature; was a territorial delegate to congress from Nov. 18, 1794, to March 3, 1795; was a delegate to the convention which framed the constitution of Tennessee, and upon the admission of that state, in 1796, became a member of the local senate, of which he was shortly afterward elected president. This position, however, he resigned in December of the following year, gallantly giving his place to ex-Gov. William Blount, who had been expelled from the U. S. senate on a treasonable charge which was never proven. Mr. White was appointed a brigadier-general of Tennessee volunteers, and as such led a successful movement against the Creek Indians at Hillabee town, in November, 1813. He died at Knoxville, Tenn., in 1815.

ESTABROOK, Charles Edward, lawyer and legislator, was born near Platteville, Grant co., Wis., Oct. 31, 1847, son of Edward and Margaret (Mitchell) Estabrook. He worked on his father's farm in the summer and attended the country school in winter. In 1864 he enlisted in company B, 43d Wisconsin volunteer infantry, and served until mustered out in 1865. After pursuing a course at Platteville Academy and the State Normal School located at that place, he taught school at Platteville, Belmont and Manitowoc. Meantime he studied law and was admitted to the bar in January, 1874. Shortly after he was appointed city attorney of Manitowoc, and held this position by successive reappointments until 1880, when he resigned to accept a seat in the legislature of his state for the year 1881; he was re-elected and served during the sessions of 1882 and 1885. During his term as a legislator he originated and secured the enactment of the law providing for a state board of examiners for persons seeking admission to the bar, and the law providing for the holding of farmer's institutes, the common schools of agriculture. Mr. Estabrook was elected

attorney-general of the state in 1886 and re-elected in 1888, occupying this position from Jan. 3, 1887, to Jan. 5, 1891. While holding this office he passed officially upon many legal questions, some of which were subsequently taken to the supreme court, and in each case the decisions of the attorney-general were affirmed. In 1893 he edited a second edition of "Rorer on Inter-State Law," and has done other legal work, being a member of the commission to draft a general charter for cities in Wisconsin, which was adopted in 1889. In politics he is a Republican. He has frequently been a delegate to local and state conventions; in

1884 was a delegate to the national Republican convention at Chicago; is actively engaged in promoting educational work, and is a life member of the Wisconsin State Historical Society. Mr. Estabrook was married, Sept. 7, 1876, at Manitowoc, Wis., to Jennie Floodges. They have four sons and two daughters.

BEMIS, George Pickering, was born in Boston, Mass., March 15, 1838, son of Emery and Susan (Pickering) Bemis, and grandson of the Rev. George Pickering, of Wallham, Mass., the pioneer and leader of Methodism in New England. His father controlled the Boston tobacco market for many years. The son was educated at Cambridge, Mass., and at the Abbott Academy, Farmington, Me., at which he was graduated in 1851. He then removed with his parents to New York, where he filled important positions in one of the largest shipping houses, and also in a large produce commission house. In April, 1861, he returned to Boston, there enlisted in the Boston Tigers, 2d battalion of light infantry, and was the first guard stationed at Fort Warren, Boston harbor. In the fall of 1861, after six months' army service, he went to London, England, to join his cousin, George Francis Train, as private secretary, and to take charge of his street railway interests; immediately on his arrival in that city he was selected by the leading Americans as general manager of the London "American," the only American newspaper in Europe which upheld the Federal cause when all Great Britain sympathized with the Southern Confederacy. Returning to America, in 1863, he became closely identified with Mr. Train in his organization of the Union Pacific railway, the Credit Mobilier of America, and the Credit Foncier of America, of which Train was president and Bemis secretary. The main object of the Credit Foncier was to build up and own the towns and cities along the line of the Union Pacific railway from Omaha to Ogden, its stockholders being also the stockholders of the Credit Mobilier and the Union Pacific railway. In 1868 Mr. Bemis went to Omaha, still associated with George Francis Train, and there became largely interested in real estate. For the past thirty-three years he has been connected with the growth of Omaha. He organized and became president of the Bemis Park Co. in 1888, which presented Bemis Park to the city of Omaha, Mr. Bemis being the principal owner thereof. He laid out a large portion of the city. On Oct. 17, 1891, he was nominated by the Republican party for mayor of Omaha, and on Nov. 24 following, he was elected over his Democratic opponent by the largest majority (4,484 votes) ever given to a candidate for that office. A reform mayor was an urgent necessity at that time, and he gave to Omaha for four years (being re-elected in 1895) the best administration it has ever known, and saved millions of dollars to the tax payers of the city. He was married, June 8, 1870, to Julia F. Browne, of Owego, N. Y.

SCHUMPERT, Thomas Edgar, surgeon, was born in Caddo parish, La., Oct. 15, 1846, son of John Ira and Mary Pauline (Holt) Schumpert. His father, a native of Newberry, S. C., was a planter and physician by occupation. His mother was a

daughter of Thomas Holt, a planter, of Nashville, Tenn. He was educated at Capt. Thatcher's institute, Shreveport, La., and at Baton Rouge, and after pursuing medical studies at the University of Louisiana, was admitted to practice in 1888. His first professional location was at Greenwood, La., but within two years he removed to Shreveport, where, in 1891, he was elected assistant surgeon of the Charity Hospital, a few months later becoming surgeon-in-charge, which position he held until November, 1898. In September of the latter year he founded the Shreveport Sanitarium and Training

School for Nurses, one of the most complete private hospitals in the Union, thoroughly equipped with every modern appliance and convenience. A wide range of diseases is systematically treated by the most approved methods known to medicine and surgery. Dr. Schumpert is known as one of the most skilled and successful surgeons in Louisiana. He was the first in the state to perform the operation of symphysiostomy, has repeatedly operated for locomotor ataxia, and is the first man in the world to successfully perform the ligation of the left subclavian artery in its first part for aneurism in the third part. This operation, which many notable surgical authorities have declared an impossibility, no less a surgeon than Sir Astley Cooper having failed signally in attempting it, Dr. Schumpert performed without accident. He has written on many different medical subjects and is the inventor of various surgical appliances now in use. The sanitarium has succeeded far beyond the expectation of the most sanguine and the training school is an assured success.

CHASE, Frederic Augustus, clergyman and educator, was born at King's Ferry, Cayuga co., N. Y., Jan. 29, 1833, son of Henry and Harriet (King) Chase. The first American ancestor was William Chase, who emigrated from England in 1630, settling first at Roxbury and then at Yarmouth, Mass. His early education was obtained in the district schools of his native place, at Genoa, Cayuga and Homer academies, and at the age of twenty-one he entered Union College, Schenectady, N. Y. In 1857 he changed to the University of Michigan, where he remained for two years, but was not graduated. Hitherto he had given his principal attention to engineering and the sciences; but in 1860, deciding to enter the ministry, he commenced a course of study at the Auburn Theological Seminary, where he was graduated in 1863; he was ordained to the ministry at Parisville in the same year. He officiated as pastor of churches at Parisville (Congregational) and Lyndonville (Presbyterian), N. Y., until 1868, when he became president of a female seminary at Lyons, N. Y. This he relinquished in 1870; however, he remained in the town for two years and engaged in business. In 1872 he became professor of natural sciences in Fisk University, Nashville, Tenn., which position he still holds. Several minor inventions in improved heating and bathing apparatus have been made by him, although no patents were ever taken out. He has also contributed to periodical literature and has published a sermon on the death of Pres. Lincoln (1865). Prof. Chase was married in Detroit, Mich., 1863, to Julia A., daughter of Dr. Adam and Elizabeth (Ross) Spence, of Huntley, Scotland. They have three children living, one daughter and two sons.

F. Schumpert

G. P. Bemis

HOLDOM, Jesse, jurist, was born in London, England, Aug. 23, 1851, son of William and Eliza (Merritt) Holdom. At the age of seventeen he came to the United States and settled in Chicago, Ill., which has since been his home. He soon began the study of law, in two years entering the office of Judge Knickerbocker, with whom he remained until 1876, when he accepted the position of chief clerk in the office of Tenneys, Flower & Abercrombie. He became a partner in 1878 of the brother of Judge Knickerbocker, under the firm name of Knickerbocker & Holdom. This association continued until

1889, from which time he practiced by himself until his election to the superior bench of Cook county. He has been particularly successful in chancery and probate cases, and in those legal questions involving contests of wills and titles to real estate. He was appointed by Gov. Fifer as public guardian, and in the November election of 1898 was elected judge of the superior court, which distinguished position he still (1901) holds. He is a man of cultivated, scholarly tastes, and has an extensive library of rare and old books, which are his great delight. He is a vestryman of Trinity Episcopal Church of Chicago, is a Republican in politics, and is a member of numerous

clubs, such as the Union League, the Hamilton, Marquette, Caxton, Kenwood, Midlothian, Country and Law clubs of Chicago, and of the Chicago, Illinois State and American Bar associations. He was in 1900 and 1901 president of the Illinois State Bar Association. The Hamilton Club, of Chicago, entered upon a new era of prosperous activity under his presidency (1897-98).

LOWRIE, Walter, senator, was born in Edinburgh, Scotland, Dec. 10, 1784, and was brought by his parents to America when he was about seven years of age. They settled first in Huntingdon county, and later in Butler county, Pa. The son obtained a good education, and at eighteen commenced a course in theology, with the view of entering the ministry, but changed his purpose and embarked upon a political career. He was elected to the state legislature, and after serving in that body for several years, in 1819 became a U. S. senator, serving until March 3, 1825. His character was earnestly religious, and he made his influence felt for good in the legislative halls, where he founded the congressional prayer-meeting and the Congressional Temperance Society. Upon completing his senatorial term he was secretary of the senate for twelve years. He was for many years affiliated with the American Colonization Society as a member of its executive committee, and in 1836 became corresponding secretary of the Western Foreign Missionary Society, which was later known as the Presbyterian Board of Foreign Missions. His sons were John Cameron, Walter Macon, Jonathan Roberts and Reuben Lowrie. All became prominent in either law or theology. Sen. Lowrie died in New York city, Dec. 14, 1868.

MARKS, William, senator, was born in Chester county, Pa., Oct. 13, 1778. His father removed to Beaver while the son was an infant, and his boyhood was spent where scanty opportunities for education were afforded. He learned the trade of a tanner, which he followed successfully for some time, and attained considerable local prominence. In 1809 he became a member of the state legislature, serving as

a member of the lower house until 1814, and in 1821 he was elected to the senate, serving until 1825 as its presiding officer. An important system of public improvements was promoted by him during his service in the lower house of the state legislature. While still a member of the senate of Pennsylvania he was elected as a Democrat to the U. S. senate, where he remained from Dec. 5, 1825, to March 3, 1837; in that body he served as chairman of the committee on enrolled bills, becoming prominent also in the framing of tariff measures and a law for the distribution of moneys acquired from the sale of public lands. He died at Beaver, Pa., April 10, 1858.

STEARNS, Edward Carl, manufacturer, was born in Syracuse, N. Y., July 12, 1856, son of George Noble and Delilah A. (Taylor) Stearns. He is in the eighth generation from Capt. Nathaniel Stearns, a representative to the general court from Dedham, Mass., 1690. He early developed a taste for mechanics, and at the age of twenty-one was successor to his father in the manufacture of hardware specialties, which had already obtained a creditable recognition among the leading hardware dealers in the United States. The company he thus established in Syracuse, E. C. Stearns & Co., is still in existence. In 1891 Mr. Stearns, noting the increasing demand for bicycles, decided to engage in their manufacture. The existing models at that time on the market were heavy, lumbering machines, weighing from thirty to forty pounds, and Mr. Stearns was the original projector of the light and graceful wheel which bears his name, and was the first to demonstrate to the world that such machines were practical. The many succeeding improvements which characterize the high-grade wheel were also originated by him. The Syracuse works of the Stearns Co. include a score of large, modern buildings, covering an area of about nine acres, advantageously situated near the shipping centers of the city, and employing about thirty-five hundred men. Branch factories are also located at Toronto, Canada, and Berlin, Germany. The products of this company have not alone a home reputation, but are known the world over. Thriving agencies have been established in all European countries, South America, Africa, Australia and Asia. He sold his bicycle interests in 1899 to the American Bicycle Co., and since then, in addition to his hardware business, he has become largely interested in automobiles. He is president of the Stearns Steam Carriage Co., of Syracuse, which manufactures an improved type of steam carriage, and president of the Stearns Automobile Co., which controls valuable patents on the mechanism for hydro-carbon vehicles, and which will manufacture and market a light vehicle of that type. In politics Mr. Stearns is a Republican, taking an active part in all live questions of the day. In athletics he has always been a leader, and most of his leisure time is spent in out-of-door sports. He is a member of the cycle board of trade and of a number of local social organizations. Although still young in years, Mr. Stearns has achieved a success seldom won by the most assiduous workers until much later in life, and his energy, self-reliance, perseverance and honesty may well serve as a model for all ambitious young Americans. In 1881 he was married to Louisa, eldest daughter of John and Elizabeth (Brewer) Albro.

J. Holdom

E. C. Stearns

COXE, Eckley Brinton, mining engineer, was born in Philadelphia, Pa., June 1, 1839, son of Charles S. Coxe. His first American ancestor, Col. Daniel Coxe, came from England in 1702, and in 1727 published a description of the province of Carolina, of which his father was proprietor under conveyance from Sir Robert Heath, attorney-general for King Charles I., to whom the province had been granted by royal charter in 1629. His grandfather, Tench Coxe, was prominent as a statesman and financier during the

administration of Pres. Washington. He recognized the value of the Pennsylvania coal lands, and formed a partnership which acquired a tract of considerable extent. His son, Charles S. Coxe, judge of the district court of Philadelphia, extended this property considerably, and left a large estate in good condition when he died in 1879. Eckley was educated with a view to the management of this property. He was graduated at the University of Pennsylvania in 1858, and took a post-graduate mining course, after which he spent some months in geo-

logical work in the field, and then went to Europe to continue his studies, spending two years at the Ecole des Mines in Paris, and one year at the Berg Akademie in Freiberg. Two years more were spent in studying the practical operation of mines in England and on the Continent, and in 1865 he returned to America and undertook the active control of his property, making his home at Drliton, Luzerne co., Pa. All of his work was characterized by thoroughness and use of the most advanced methods and machinery. He was the first to lessen the risk of fire by building his "breakers" of iron and steel. He built railroads to convey the products of the mines to any one of several outlets to tide water, and to the lakes, and built docks at the terminals at each. He organized an iron manufacturing company to construct and repair his mining and railway machinery, incidentally doing also a good deal of outside work. The welfare of his employees was always foremost in his mind, and he founded insurance funds, schools and mutual benefit societies for their assistance. He was beloved by his men, and even when, during the labor troubles, he was harassed by sympathetic strikes the needy families of strikers found relief at his house. From 1881 to 1884 he was a member of the state senate. He served with distinction on the Pennsylvania commission on the waste of anthracite coal, and on the second geological survey commission of Pennsylvania. He was a trustee of Lehigh University from its beginning and an ardent advocate of technical education. Near the end of his life he wrote to a friend that he was living for two things, Lehigh University and the utilization of small coal. He was one of the founders of the American Institute of Mining Engineers, and was its president in 1878 and 1879. He was also a member of the American Society of Mechanical Engineers, and its president from 1892 to 1894. He became a member of the American Society of Civil Engineers on Feb. 7, 1877. He also belonged to a number of other scientific and social clubs, both American and foreign. He died of pneumonia on May 13, 1895.

KIER, Samuel M., manufacturer, was born in Indiana county, Pa., in 1813, of Scotch Irish descent. His father, Thomas Kier, was one of the

early salt manufacturers on the Kiskiminetas river, and subsequently his son became associated with him in this industry. They were much annoyed by the flow of a mineral oil from their salt wells, which accumulated on the surface of the boiling vats. This oil was skimmed off and thrown in the canal as useless, until in 1840 a lighted match was accidentally thrown on the "scum," and it caught fire. Attempts were then made to utilize the oil for fuel in evaporating salt water. Believing that it possessed medicinal properties, Kier after some experiments in purifying it, placed it on the market as a curative agent under the name of Kier's Petroleum or Rock Oil. He experimented for a time in refining it, and was the first to produce the refined oil which he called "carbon oil," and which afterwards came into general use as kerosene. With his brother, James M. Kier, he explored the oil-fields of the upper Allegheny. He perfected a lamp for burning the refined petroleum, which he manufactured and sold in large numbers. In 1845 was established the first pumping well known to the oil world on the Allegheny, near Kier's premises. To Samuel Kier thus belongs the credit for the pioneer work in introducing one of the most important discoveries of the nineteenth century. Another pioneer in the Pennsylvania oil business was Col. E. L. Drake, who had been a conductor on a railroad in Connecticut, and about 1857 made his appearance in Titusville, Pa. He became superintendent of the Pennsylvania Rock Oil Co., which had been incorporated in 1854. He conceived the idea of boring through rock to the sources of the oil, and in 1858 he started the first oil well at Oil Creek, Venango co., in one of the old pits supposed to be of prehistoric origin. On Aug. 26, 1859, he struck oil at a depth of seventy-one feet, the oil rising nearly to the top of his pipe at the surface of the ground. Kier was also interested in pottery works in New Jersey, was one of the originators of the famous Crescent steel works, and in 1838 was one of the founders of the firm of Kier, Royer & Co., engaged in transportation on the Pennsylvania canal. In 1847, in conjunction with B. F. Jones and James Buchanan (subsequently president of the United States), he engaged in the manufacture of fire-brick at Bolivar, and in 1873 established the same business at Salina. He was the owner of the coal works at Ireland's and Logan's Ferry, and operated the works at Sandy Creek. He died in Pittsburgh, Pa., in 1874.

HARROUN, Gilbert King, inventor and financier, was born at Corfu, Genesee co., N. Y., Sept. 23, 1835, son of Levi McGee and Lydia (O'Leary) Harroun, and a descendant of Alexander Harroun, of Scotch Irish ancestry, who emigrated from Colrain, Ireland, to America in 1719, was chosen one of the selectmen of Colrain, Mass., in 1741, and was famous as an Indian fighter. On the maternal side he is related to James O'Leary, the distinguished patriot and statesman. He received an academic education in western New York, and in 1858 became one of the owners of the Buffalo "Courier," a daily newspaper in that city. A job printing plant formed a portion of the establishment, and Mr. Harroun took

much interest in some of the more backed features of the concern. With James Henry Sanford, a pressman and a retired naval engineer, he perfected a coupon press to print consecutively numbered tickets, which he patented in 1859. They then sold their

Eckley Brinton Coxe

Gilbert King Harroun

interest in the "Comer," and with Mr. Lienau as the third partner, started in the railroad coupon ticket printing business under the style of Sanford, Harroun & Co., which, in 1862, was removed to New York city. The first coupon tickets were printed in 1860 for the Chicago, Burlington and Quincy railroad, and were soon adopted by all the leading lines. Cancellation stamps, conductors' punches, ticket cases, etc., were invented, and gradually the coupon ticket system was introduced among private firms. In 1866 he originated the first calendars with a leaf containing an aphorism for each day in the year. In 1884 he started the publication of "Mastery," a young people's magazine, which taught useful pastimes and handicrafts, and his course has been followed generally by juvenile and other publications. In 1889 he became controller of the "Mail and Express," and his thoughtful, far-reaching business methods brought to that paper no small degree of prosperity. He severed his connection there in 1893, and was appointed treasurer of Union College, with immediate charge of its large landed interests in Long Island City, which he managed with signal ability and success. This position he held until his death. He was in 1888 treasurer of the Presbyterian board of foreign missions. With the cooperation of Gen. Joseph Wheeler, Theodore Roosevelt and others he organized the Cuban Educational Association of the United States, designed to fit the people of Porto Rico and Cuba for self-government. Free scholarships were obtained through his efforts from educators in nearly every state in the Union, and a number of Cuban and Porto Rico boys entered various colleges and schools. Mr. Harroun was a governor of the Society of the Genesee. He was married, in 1858, to Annie Elizabeth, daughter of Capt. William Talcott, of Silver Creek, N. Y., and a direct descendant of Gen. Gage. They had one son, Gilbert King Harroun, Jr. Mr. Harroun died at Plattsburg, N. Y., Sept. 12, 1901.

SMOCK, John Conover, geologist, was born near Holmdel, N. J., Sept. 21, 1842, son of Isaac G. and Ellen (Conover) Smock. His earliest American ancestor,

Hendrick Mattheys Smock (or Smack), emigrated from the Netherlands in 1654 and settled at New Utrecht, Long Island, where he was a magistrate in 1660-89. From him and his wife, Geertje Hermans, the line of descent runs through their son, Johannes, and his wife, Catherine Barents; their son, Hendrick, and his wife, Mary Schenck; their son, John, and his wife, Elizabeth Conover; and their son, George (a revolutionary soldier), and his wife, Margaret Van Deventer, who were Prof. Smock's grandparents. His father was a farmer of high character, who was deeply interested

in the education of his son. After taking an academic course at Matawan, N. J., the son entered Rutgers College, where he was graduated in 1862; in 1863 he was engaged with Prof. George H. Cook in geological work in New Jersey, and in 1864 was made assistant in the survey of that state. In 1865-67 he was tutor in chemistry at Rutgers. Going to Germany in 1869, he spent two years in study at the University of Berlin and at the Berg Akademie. In 1871 he was called to the chair of mining and metallurgy in Rutgers and held the professorship until 1885, also resuming his work as assistant

geologist in the state survey, his relation to the college being only nominal after 1874. In 1885 he went to Albany, where he was assistant-in-charge of the New York State Museum, under the director, Prof. James Hall. He gave a part of his time to examining the iron ore districts of the state and to the building stone industry, and prepared bulletins 3, 7 and 10 on these subjects. In 1890 he was appointed state geologist of New Jersey, which position he held until July, 1901, when he resigned, finding the duties too arduous. The degree of Ph. D. was conferred on him by Lafayette College in 1882. Prof. Smock has contributed numerous papers to the "Transactions" of scientific bodies, and was associated with Prof. Cook in preparing the annual reports of the geological survey of New Jersey for the years 1871-84, and also the separate volumes: "Geology of New Jersey" (1868) and "Report on Clay Deposits" (1878). Since he has been state geologist of New Jersey the annual reports of the survey have been prepared under his direction, also Vols. III. and IV. of the "final report" series, and the "Report on Forests" (1890). The best years of his life have been given to the geological survey, which is well known for the excellent maps and practical reports published, and for its valuable services in making better known the mineral resources of New Jersey. Prof. Smock is a member of the American Philosophical Society, Philadelphia; Geological Society of America; National Geographic Society; American Association for the Advancement of Science; New Jersey Historical Society; American Forestry Association, and the American Institute of Mining Engineers, being a member of the board of managers of the latter association in 1876-77 and 1891-93. He was married, Oct. 15, 1874, to Catherine E., daughter of Abram J. Beekman, of Brooklyn, N. Y.

GRIMKÉ, Frederick, jurist and author, was born in Charleston, S. C., Sept. 1, 1791. He was a son of John Fincher and Grimké, judge of the superior court and a lieutenant-colonel in the revolutionary war, and brother of Thomas Smith Grimké, reformer, and also brother of Sarah and Angelina (Mrs. Theodore Weld) Grimké. He was graduated at Yale in 1810 and in 1818 removed to Columbus, O., where he practiced law and became prominent in his profession. He was presiding judge of the court of common pleas for some years and judge of the Ohio supreme court from 1836 until 1841, when he resigned his judgeship and devoted himself to philosophical study and to literature. He published "Ancient and Modern Literature" and "The Nature and Tendency of Free Institutions" (1848). His works, revised by himself, were republished after his death (1871). He died at Chillicothe, O., March 8, 1863.

CUTHBERT, Alfred, senator was born in Savannah, Ga., about 1781. He was graduated at Princeton College in 1803, and after being admitted to the bar began practice at Monticello, Jasper co., Ga. Later he was elected to the state legislature. In 1813 he was chosen as a Democrat to represent Georgia in the lower house of the national legislature; and taking the place of William Bibb, who was appointed senator, he continued to serve by re-election until his resignation in 1816. Later he again accepted a nomination to congress, however, and being elected continued a member of that body from Dec. 3, 1821, to March 3, 1827. In 1824 he was chosen to replace John Forsyth, who had resigned his seat in the U. S. senate on June 27th of that year. Sen. Cuthbert was shortly afterward re-elected for a full term, and served from Jan. 12, 1835, until March 3, 1843. His death occurred near Monticello, Ga., July 9, 1856.

NOTE.—We invite inspection to the Index of the first eleven volumes of the National Cyclopaedia of American Biography. As it covers but a portion of the set, names not found here are not necessarily omitted from the work, but we would be thankful for the suggestion of names of prominent persons, living or deceased, of national or local repute, especially those not found in previous works, of which any one has knowledge, and considers entitled to a place. Such suggestions may be the means of discovering valuable biographies that might have escaped notice, and, even if already known to us, may be the means of bringing out facts which will make their biographies more complete.
